In this talent contest young Greenleaf expressed his scientific knowledge with a project which demonstrated a process of practical use in separating almost any complex mixture of metals by distillation. I could not fully comprehend his explanation of the process, but it was apparent that Fred is an expert builder of "stills." Accordingly, I have offered his services as consultant to my congressional colleagues from the hills of West Virginia, Tennessee, and Kentucky.

The more important use of Fred's process will be in diverse fields, ranging from refining operations to atomic energy production. He believes the distillation method of separating mixtures of metals will be quick, economical, and efficient.

Science has interested Fred Greenleaf since he was 6 years old, when he received a chemistry set as a gift. Later he won top honors in the Annual Lehigh Valley Science Fair and competed in the 1954 National Science Fair.

The Science Talent Institute and Westinghouse are to be congratulated for their work in stimulating young talent in the field of technology which will be so important in the future development of our country.

The Cattle Program on the Fort Berthold Indian Reservation

EXTENSION OF REMARKS
OF
HON. USHER L. BURDICK
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 1, 1955

Mr. BURDICK. Mr. Speaker, the Indian Bureau evidently does not understand the agricultural program among Indians. At the Fort Berthold Indian Reservation in North Dakota the Department advised the Indians to go into the livestock business. Through that venture, the Department thought, the Indians would become self-supporting. This was a good plan, but apparently the experts on agriculture in that Department did not think the plan through.

No one can go into the cattle business for 1 year or 2 years and get very far. This is a long-term enterprise. There have been some losses on the reservation from this livestock venture, but nowhere near the loss which the Department is now forcing on these Indians. Since 30 percent of the cattle loans are in default, the Bureau has decided to advance no more money—and remember, it is Indian money and not taxpayers' money—and are recommending that the cattle loans in arrears be closed out. In other words, the cattle on hand are to be sold and the proceeds credited on the loans.

Just as soon as this is done those loans will be an almost total loss. If the cattle are sold through forced sale, the Indian will have nothing from which he can get money to pay. What should be done is to tide these loans over, put into the venture more money, and bring the herds up to a good standard of production. In many cases the Indians have bred their original stock up to better beef animals, and that cannot be done in a year or 2 years. It takes time, and these herds should not be sold but financed. These good cattle should not be sacrificed to make small payments on the indebtedness. What would you think of a man who started a turkey venture, bought birds for production, set the eggs, and then sold the turkey hen before the eggs hatched? This would be the same as what the Department is now doing in the cattle business on the Fort Berthold Reservation.

Senator LANGER'S committee held hearings at the reservation in October 1954, and pages 116 to 163 of Senate Report, Senate Resolution 89, sets out the whole situation in the cattle business on that reservation. In my opinion the cattle loans must be refinanced in order to do two things:

First. To stop further losses.

Second. To bring the cattle program to final success.

It cannot be done in a short time, but it can be done with proper financing over a long period of time. I am in the cattle business myself, and it took me several years in breeding better stock and getting a herd built up to a proper size to make my efforts worth while and to finally reach a point of success. I reached that point, but I didn't do it in 1 year or even 2.

The Indian Bureau evidently knows but little about cattle raising.

Alaska Road Commission

EXTENSION OF REMARKS
OF
HON. E. L. BARTLETT
DELEGATE FROM ALASKA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 1, 1955

Mr. BARTLETT. Mr. Speaker, January 27, 1955 marked the 50th birthday of the Alaska Road Commission. It was on that date in 1905 that the Congress created the Board of Road Commissioners for Alaska to work under the direction of the War Department. This Board, appointed by Secretary of War William H. Taft, was charged with the responsibility for location, construction, and maintenance of wagon roads and trails in Alaska. Prior to that time Capt. W. R. Abercrombie had located and constructed a military trail from Valdez to Eagle in 1901, over which mail was carried twice a month with packhorses in summer and dog teams in winter. In 1904 the Seattle Office of the Army Engineers completed a survey for a wagon road between the same points, Valdez at that time being the northern terminus of the Seattle-Valdez military cable, and Eagle the principal port of entry into Alaska from Canada and the Klondike gold fields.

The first road board consisted of Maj. Wilds P. Richardson, 9th Infantry, 1st Lt. George B. Pillsbury, Corps of Engineers, and 1st Lt. Samuel C. Orchard, 3rd Infantry, and was directed to hold its first meeting in Skagway on May 15, 1905. Major Richardson, being the senior officer, became the first president of what has since been known as the Alaska Road Commission. The first year's appropriation was $28,000, made available by the Congress from the Alaska fund derived from trade taxes collected out-

side of incorporated towns, and from liquor licenses.

Some of the earliest projects included a road from Haines up the Chilkat River to the large Indian villages of the Chilkat Valley, road from Fairbanks to the newly discovered gold camp on Pedro Creek, a tributary of Gold Stream, and short roads at Nome where gold had been discovered at and near the beaches. During this first year of the new Board, the overland route from Valdez to Fairbanks was also scouted out, utilizing the first section of the Valdez-Eagle trail between the coast and Gulkana. Based on these first-year studies of the Board, a direct appropriation of $150,000 was made by the Congress for work in 1906, which permitted start of construction of what is now known as the Richardson Highway, joining Valdez with Fairbanks, and which for years was the only overland route into the heart of Alaska.

The major effort until the late 1920's was directed toward improvement of the Richardson Highway and construction of mining roads in the vicinity of Anchorage, Fairbanks, and Nome. Then followed, in rapid succession, the construction of the Steese Highway from Fairbanks to Circle, the Elliott Highway from Fairbanks to Livengood, the Gulkana-Nabesna Road, and the road from Anchorage to Palmer to serve the colonization project established in 1935 to farm the Matanuska Valley.

The Glenn Highway, designed to connect Anchorage with the Richardson Highway, was started in the spring of 1941 and punched through during World War II. It was the following year that construction was initiated on the Alcan Highway—now officially the Alaska Highway—through Canada and Alaska to connect with the Richardson Highway at Delta Junction, as well as the Tok Cutoff to connect the Gulkana-Nabesna Road at Slana with the Alaska Highway at Tok Junction. Following World War II, construction was initiated in 1946 on the Sterling Highway on the Kenai Peninsula and also on the Taylor Highway, linking the Alaska Highway with Eagle on the Yukon River.

In 1948, at the request of the Armed Forces charged with the defense of Alaska, an extensive program of improving and asphalt surfacing of the main highway system was authorized by the Congress and which included the construction of the important link to join Seward with Anchorage. This program, having an estimated cost of $108,450,000, is now approximately 84 percent complete, with 812 miles of black top surfacing in place to serve the needs of the military as well as to aid in the development of the Territory.

The present system of highways in Alaska consists of a total of 4,100 miles, of which 3,791 miles are under the jurisdiction of the Alaska Road Commission and the remaining 309 miles, located in Chugach and Tongass National Forests, under control of the Bureau of Public Roads, the road-building agency for the United States Forest Service in Alaska. The major interconnected system joining the cities of Seward, Anchorage, Valdez, Fairbanks, and the villages of Kenai, Homer, Circle, Livengood, and Chitina with each other and the Alaska Highway, totals 1,372 miles. The important Copper River Highway, now under construction, will eventually link Cordova with this primary system.

The Alaska Road Commission continued under the jurisdiction of the War Department until June 1932, when civilian personnel and operations were transferred to the Department of the Interior with Mr. Ike P. Taylor as chief engineer.

Active heads of the Alaska Road Commission, in order, included:

Maj. Wilds P. Richardson, later general, 1905–17.

Maj. William H. Waugh, 1917–20.

Maj. John C. Gotwals, 1920.

Col. James G. Steese, later general, 1920–27.

Maj. Malcolm Elliott, 1927–32.

Mr. Ike P. Taylor, now retired, 1932–48.

Col. John R. Noyes, now brigadier general, and adjutant general of the Alaska National Guard was loaned to the Alaska Road Commission for 3 years by the United States Army to head up the extensive paving program requested by the military, 1948–51.

A. F. Ghiglione, incumbent Commissioner of Roads for Alaska.

Recent years, starting with the extensive improvement and paving program, have witnessed an increase in construction by contract on those roads which are readily accessible and adaptable to that type of construction. The Alaska Road Commission still continues to open up virgin and isolated areas of Alaska with crews and equipment under the direct supervision of the Commission, following a policy of stage construction whereby length is the initial and primary purpose of a highway in a pioneer country followed by refinements as needed and warranted by economic development. A current project of this nature is the Denali Highway connecting the Richardson Highway with a system of roads in Mt. McKinley National Park. The newest approved project is a road between Fairbanks and Nenana which will be started in the summer of 1955.

Working in cooperation with the Alaska Road Commission, a Federal organization deriving most of its funds from Congress, is the territorial highway organization consisting of the territorial highway engineer and a territorial board of road commissioners with one member from each judicial division. The territorial organization calls upon the Alaska Road Commission to perform a major part of work financed by territorial funds, thereby preventing costly duplication of effort. Mr. Irving Reed is the present Territorial highway engineer.

This oldest roadbuilding agency of the Federal Government numbers among its personnel many employees who have served the agency for 25 years or more, over half the period of its active life. Appropriate golden anniversary commemorative functions are planned during this 50th year of service to the Territory.

St. David's Day

EXTENSION OF REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 1, 1955

Mr. FLOOD. Mr. Speaker, there are few honors that please me so much in the course of a year than that of rising in the Congress of the United States on March 1—St. David's Day—to pay tribute to a proud, rugged, and productive strain in the American people whose ancestors were Welsh. St. David's Day is a folk holiday that is rich in ancient lore and steeped in religious faith. It has its inner appeal to all people who love strong character and the will to independence. It deserves recognition nationally. It has earned a place for itself on the calendar of significant events worthy of observance in this House because of the contribution Americans of Welsh descent have made to America's strength through the generations. And this holiday—St. David's Day—is a fitting moment for that recognition because it has a distinctive folk origin in the best sense of the word.

It expresses the vigor, the loyalty to tradition, and the love of life that is inherent in these remarkable people. In my judgment there is not an American of Welsh extraction who does not pause on this day to pay homage to what may well be termed the "patron saint" of Wales. In fact not only Americans of Welsh extraction but millions of other Americans join with their Welsh fellow-citizens to do hcnor to St. David. I sincerely hope we are witnessing the beginning of a celebration that, as the years go on, will become a day of national rejoicing for all Americans of whatever racial strain everywhere, a day upon which we can all join together to wish the people of Wales the best of health and the best of luck.

St. David's Day deserves a note of tribute from us all because it symbolizes the spirit of independence which is so characteristic of America's own beginnings and rules our way of life so much today. The intrepid quality of these people and their undying devotion to independence remained steadfast through the centuries, and it is this which is emphatically remembered as the Welsh all over the world join in keeping green the basic qualities of their unique culture. When Wales resisted the rule of the Norman kings in the 12th century—500 years after the death of St. David—it was their ancient saint's spirit that fired their cause. They evoked his memory in demanding an archbishop of their own, untrammelled by the domineering interference of Canterbury.

There is a fascinating mythology that has evolved through the centuries about the life of this unquestionably extraordinary historic personage. He is mentioned first in a 10th century manuscript of the Annales Cambriae. This reports his death in 601. He had been a bishop

and presided over the synods in Wales in the sixth century. In 1120 Pope Callistus II canonized David, and since then he has served as a kind of deeply devout and immensely moving rallying torch for Welshmen everywhere. And the language of Wales, it should be remembered, is a Celtic tongue, Celtic at one time having been spoken from the Alps in the north, to Gaul, Iberia, northern Italy, and as far east as points in Asia Minor.

The reason this story moves me so much is because my fellow Americans in the district in Pennsylvania that elected me to this seat have impressed me with the tough and loyal qualities, the steadfastness, the hard-toiling life of usefulness and patriotism that so marks Americans of Welsh extraction. In many ways this holiday expresses the jocund strength of the Welsh. And it is this strength which has fused itself into the life of our country and contributed to its greatness. For St. David's Day brings out the vitality and the eternal youth of the Welsh on a note of triumph and in a burst of song. Wherever groups of Welshmen gather they will sing together Hen Wlad Fy Nhadau or The Land of My Fathers. And they will talk, with an eloquence that is traditional, of the glories of old Wales. Whether the American whose forebears came from Wales is a leader in industry, in business, in the church, in the professions, in politics; or whether he is one of the doughty anthracite coal miners of Pennsylvania, we are bound to find in him the best of the stuff that makes a good American.

I believe that these people are so loyal to America, so indissolubly assimilated into the life and meaning of this country, because they are basically loyal, and, cleaving forever to the ancient folklore of their own racial beginnings, we know they will always—as they have demonstrated—remain loyal to the United States of America.

It is a pleasant duty and a reverent one to speak in honor of St. David's Day.

Career Planning in a Changing World

EXTENSION OF REMARKS

OF

HON. JOHN V. BEAMER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 1, 1955

Mr. BEAMER. Mr. Speaker, under unanimous consent to extend my remarks in the CONGRESSIONAL RECORD, I include the following speech delivered by Mr. Millard Cass, Deputy Under Secretary of Labor, at the College of William and Mary:

ADDRESS BY MILLARD CASS, DEPUTY UNDER SECRETARY OF LABOR, AT THE COLLEGE AND CAREER DAY PROGRAM, COLLEGE OF WILLIAM AND MARY, WILLIAMSBURG, VA., FEBRUARY 24, 1955

CAREER PLANNING IN A CHANGING WORLD

That the world is changing is a truism too obvious to require proof. Even in the lifetimes of those now in college, we have developed guided missiles, jet propulsion, atomic energy, television, electronic computers, radar, tubeless tires, antibiotics, numerous alloys and plastics, and countless other products.

Back in 1937 the only commercial transportation from here to Europe was by boat. This required 4 days on the *Normandie*, which was then the world's fastest ship. Today, planes regularly fly the Atlantic in approximately 12 hours.

It was 1930 before we had a telescope that was able to locate the planet Pluto, which comes within 2¾ billion miles of the earth. Now the 200-inch telescope at Mount Palomar Observatory captures from stars light which has been on its way to the earth for 2 billion years and has traveled at the rate of 6 trillion miles a year all that time. The distance of such stars from the earth runs into literally astronomical figures.

Change and progress are not, of course, new to the American scene. The difference between the technological advances of this generation and those which preceded us is basically in the rate, degree, and intensity of the progress.

You men and women now in college may, therefore, wonder in planning about the future. You may ask whether skills acquired today will be obsolete before they are perfected through experience. You may even feel that career planning in this changing world is futile. I do not blame you for being puzzled, but there is no need to be apprehensive.

Each generation of Americans has thrilled to the promise of new inventions. Some workers in each generation have viewed with fear, however, the effect which new industrial developments would have on their own opportunities for employment. Such fears—then and now—cannot be discounted. Industrial progress has ofttimes involved displacement of some workers. Always, however, it has required the employment of others in the new processes. Many basic inventions which at the time appeared to reduce job opportunities in fact opened vast new fields of employment. This was true of the invention of the steam engine by Oliver Evans in 1795, the steam locomotive of John Stevens in 1825, the Duryea Brothers' automobile of 1896, and the Wright Brothers' airplane in 1903.

It is up to us to be aware of the economic problems which arise from industrial progress and to render help whenever possible to those who are displaced by technological advances. It is up to those planning their careers to plan with a view to meeting the changing demands of a changing world.

The number of jobs available to our people has constantly increased through the years. Labor-saving devices have reduced our work but not our work opportunities. They have made it possible to reduce the workweek and lengthen vacations, thereby increasing our leisure time, improving our health, and expanding our cultural and educational activities. The marvelous inventiveness of the American people has thus helped rather than hindered our forward progress. Our ever-rising standard of living is based upon the industrial development of our Nation and the skill, ingenuity, and industry of our people.

There are some who have seen in the development of atomic energy cause for great fear. Like any other powerful force, atomic energy can be used to create or to destroy, to promote progress or to devour things we hold dear. Fire, gunpowder, dynamite, and electricity all share with atomic energy the power to make life more pleasant and fruitful or to destroy persons and property.

There is no more need for our generation to be paralyzed by the fear of a mushroom cloud than there was for prehistoric man to quake at the sight of fire, for the people of the Middle Ages to recoil at the threat of gunpowder, or for our own grandfathers to be petrified by the development of electric power or shaken by the explosion of dynamite.

Fire, gunpowder, dynamite, and electricity have all brought more blessings than sorrow to mankind. I am confident that this great new development of our generation will also, in the years ahead, become a benefactor of man and a servant of the human race. Already we have started to reap rich dividends from atomic research in the fields of medicine and agriculture, and have taken the first steps toward commercial production of electrical energy by atomic power.

I am convinced that we shall meet successfully the dilemma which nuclear fission has posed. We shall be able, through the peaceful uses of atomic energy, to bequeath to our children a better world than that we received from our parents.

As President Eisenhower said in his magnificent address to the General Assembly of the United Nations on December 8, 1953, we are determined "to find the way by which the miraculous inventiveness of man shall not be dedicated to his death, but consecrated to his life."

Underlying all other economic and social change in the United States is the rapid growth of our population. Nearly 4 million children were born each year between 1948 and 1953. Last year, the number exceeded 4 million for the first time in our history. As a result, demographic experts predict that our population will increase to between 200 and 220 million by 1975. This increase in population will stimulate the economy by creating growing markets.

Men and women now in college will be about in the middle of their working lives in 1975. At that time, the labor force of the United States will be over 88 million, according to the Bureau of the Census—20 million more than now. We will need one-third more jobs for a work force of that size.

Of course, not every industry or every occupation will increase employment by one-third. For a second significant trend in our economy is the shift in manpower requirements as between certain industries. This shift has brought about a substantial realinement in recent years in the employment opportunities in the various sectors of our economy. Some industries, such as agriculture and mining, have been declining in employment for some years. Other industries, such as railroads and textiles, have been remaining relatively stable. The Department of Labor's occupational outlook studies suggest that some of the other basic industries, such as steel, electric power, and automobiles, may expect only moderate increases in employment over the next two decades.

Greater than one-third expansions will therefore have to take place in other segments of the economy—for example, such rapidly growing industries as chemicals and electronics manufacturing, health services, and educational services. We may need a half-million more teachers in the next 10 years to take care of a 50-percent increase in school enrollments.

The industrial trend in the years ahead, then, is definitely toward an increasing proportion of employment in services and a decreasing proportion in the goods-producing industries.

A third underlying trend in our economy is increasing productivity. Changing technology increases productivity and affects employment opportunities, as well as the whole social and economic framework of the changing world.

Output per man-hour in the economy as a whole has grown by about 2 percent compounded annually over the long run, and some studies indicate even more rapid growth in recent years. The heavy expenditures on factory construction and new equipment over the last 8 or 10 years have had a

substantial effect on increased productivity. So has the increase in the number and percentage of our workers who are skilled.

The dramatic impact of technological advances upon our entire way of life can be illustrated with the important effects of a few products developed in the last 20 years, such as nylon, plastics, frozen foods, television, and antibiotics, which have already become taken for granted as a part of our daily lives, and atomic energy.

On the horizon we can see the beginnings of a few new developments which may have the same far-reaching effects in the next 20 years, such as solar energy, the gas-turbine engine, automation, and electronic computers.

We must assume that in the future technological development will proceed at an accelerated pace because the number of scientists and engineers in the United States is growing rapidly. In the 1930's, when the basic research was done which later gave rise to nylon, television, atomic energy, and antibiotics, there were less than one-quarter of a million engineers in the United States. There are now over half a million. The number of scientists has grown equally rapidly. Taking engineers and scientists together, we now have between three-quarters of a million and one million people engaged in pushing back the frontiers of knowledge in the natural sciences and converting this new knowledge into practical use in industry, medicine, military applications, and our daily lives. There is every reason to think, therefore, that the fruits of their labor, which we will reap 20 years from now, will be even more impressive than the gains over the past two decades.

A fourth major underlying trend, and one that results directly from increasing productivity, is a vast and very widespread increase in consumer purchasing power. It is safe to predict that the American people will continue a steady gain in purchasing power out of an increasingly productive economy as long as there is no all-out war. This means, of course, a higher standard of living in terms of housing, leisure, vacations, labor-saving devices, education, and health services.

A fifth aspect of our changing world is the growing importance of international events to us in the United States. Our position of leadership in the free world provides us with a challenge and a responsibility. Today's college students will have to strive toward a greater understanding of the people of other countries so that, as thinking citizens of the United States, they can help our country exercise its leadership effectively.

What are the implications of all of these developments for you who are attending college today?

In the first place, the rapid changes of the past and the prospect of even greater ones in the future suggest that no individual can count upon making a career in one occupation or working for one employer his whole life. He must strive to maintain flexibility. Our studies of occupational mobility have shown that in every field there is a great degree of mobility into and out of the occupation, from one employer or industry to another, and from one part of the country to another.

To a person in college, getting a broad educational background is extremely helpful. It makes possible greater flexibility in the years ahead and increased mobility. Many of you are now struggling with subjects which seem at first glance to be quite remote from your chosen field of endeavor. You may wonder why a foreign language is important or what you are going to do with the mathematics or English which you are required to study. I think when you graduate and start to work, you will find that practically every subject you studied in your college career is of real use to you.

In order to progress in the world, to earn a good living and to find satisfaction from his work, a person must be qualified to accept the many and varied employment opportunities which come his way in the course of a lifetime. Now is the time when you must acquire the basic tools and the fundamental knowledge necessary to adapt yourselves to changing jobs in this changing world.

Even in professions like law and medicine, changes are constantly taking place and a broad background of education and training is essential in order to keep up with new developments. For example, commercial air transportation has opened to lawyers the new and specialized field of aviation law. The same is true of atomic energy, which has brought in its wake legal problems far different from those we have faced before. This is also the case in medicine, where new drugs and new methods of treatment require constant changes in techniques. New medical problems have been posed by radiation and, on the other hand, we hope to find new cures for old ailments through atomic research.

In addition to the need to be informed of international affairs so as to discharge your responsibilities as citizens, you should be interested in them in connection with your career planning. The number of jobs in all phases of international work has increased tremendously in the past 15 years and will continue to grow. These positions are in a number of Government agencies engaged in international affairs and technical assistance programs. They are also available in industrial firms having export business or overseas operations, as well as tourist and travel businesses.

The increased opportunities in the international field may confront many of you now in college with attractive job opportunities for which you can qualify if you have, for example, taken seriously your study of foreign languages. Thus, a subject which now seems to have no practical value may pay great dividends in the years ahead.

Many economists, statisticians, chemists, and physicists have found in later years that it is as important to be able to write a good letter as it is to know the technical tools of one's specialty. The English compositions which may seem like drudgery in college may, in fact, lay the groundwork for a good impression upon some business associate in later life. Too many of us forget that a large majority of the people with whom we deal may judge us by the letters they receive from us or the articles we write.

Just 2 months ago, the national manpower council at Columbia University released its study of a Policy for Skilled Manpower. This report points out that the nuclear age will not eliminate the need for skilled workers. Quite to the contrary. The more highly complex and automatic the machinery of production and daily living becomes, the more skilled technicians are required to produce, operate, and service this machinery.

The skilled worker will have to have a broad base of training and experience to meet the changing and increasingly complex problems he will face. As the research staff of the national manpower council found: "Automatic machines will require highly skilled maintenance and repair men. Atomic generators will require maintenance men who are more skilled than at present. Many of today's electricians will have to learn electronics if they are to retain their skilled status. Pipefitters may have to learn hydraulics. A skilled worker who formerly measured with calipers and now uses a micrometer will soon have to learn to work to tolerances measured with light waves." This is just as true in the professional and scientific field.

The college graduate of tomorrow will find, as so many of us have already found, that learning is a continuing process. The truth of the matter is that the college degree you will earn does not certify that you have learned anything of great moment in the business world. A college degree just certifies that you are ready to begin learning how to use to practical advantage the theoretical training you have already acquired. This truth does not confront only the college graduate. I have heard skilled craftsmen, who served an apprenticeship and worked as journeymen in their trades, state that they were only then beginning to acquire the well-rounded skill that permitted them to be justly proud of their ability.

All of us, whether we are in the skilled trades, in a professional field, or in the world of business or finance, continue to learn throughout our working lives by study and by experience. We must keep up with the changing developments, new tools, novel problems, and modern techniques in our vocations.

These facts emphasize the importance of a broad educational background which can provide a foundation for future learning and facilitate the acquisition of knowledge throughout one's working life. This changing picture has prompted Secretary of Labor James P. Mitchell to give a new direction and increased impetus to the training activities of the United States Department of Labor.

As Secretary Mitchell has said: "For the training of our workers we use many sources—schools and colleges, vocational education, apprenticeship, the Armed Forces, and the on-the-job training courses of industry. We must reexamine all of these with a view to determining whether the methods they employ and the skills they teach are keeping pace with the temper of our times and the requirements of our economy. We must constantly reevaluate our training programs to determine whether we are training enough of the people we need in the skills we require."

Security is one of a number of factors worth considering in choosing a vocation. It is not the only or even the main factor, however. Yet, in the past 20 or 30 years there has been a growing emphasis on job security. People are deeply interested in protection against depressions. Security in this sense of permanence is not always consistent with opportunity. Relatively secure jobs, such as those in public utilities, retail establishments, or in the local, State, or Federal Governments, do not always offer the greatest opportunity to advance, the greatest earnings, or the greatest job satisfaction.

The United States is dedicated to the maintenance of a high level of employment and business activity. We believe that we have learned a few things about how to forestall serious depressions, and that we have developed mechanisms and programs to cushion our economy against economic declines, and to stimulate business when an incipient downward trend is spotted. We have come so far along the road of economic stability that all of us can appropriately face the future with confidence. The strength of our economy was fully demonstrated in the economic downturn of 1949–50 and in the decline through the first half of 1954.

I certainly would not advise any persons planning their careers today to choose their path upon the basis of economic fears or a depression psychology. Those whose main interest in choosing a career is security may find that they are paying a very high premium for insurance against something that is not very likely to happen.

You here at William and Mary are to be commended for holding a Career Day. This occasion provides an opportunity for you to give attention to job openings that might presently be available, and also to give thought to the broader aspects of career planning. I hope that today's program has been of both immediate and long-range

assistance to all of you. But to get real returns from this program, you must follow-up; you must continue to think about and plan your careers, and to use the counseling facilities of your college.

In closing, I should note that by your presence here at this fine college you have already shown that you have a real interest in career planning. Merely by attending college, you are taking effective steps to prepare yourselves to meet the challenge of the world of tomorrow. Through your studies, extracurricular activities and social contacts, you are equipping yourselves to face the problems of this troubled world.

In you, and millions like you, studying in colleges, secondary schools, vocational schools and through apprenticeship and on-the-job training of industry, is the hope of our Nation.

The Wall Street Journal Shoots From the Hip and Misses

EXTENSION OF REMARKS
OF

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 1, 1955

Mr. THOMPSON of New Jersey. Mr. Speaker, there are two ways of doing things—the right way and the wrong way. No more striking example of these two ways of doing things has come to my attention for a long time than the handling of the same set of facts by the New York Herald Tribune of February 24, 1955, and the Wall Street Journal of the same date. Both papers were reporting on the hearings held by the subcommittee of the House District of Columbia Committee on legislation cosponsored by 12 of my colleagues and myself to create a Federal commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents and a music, drama, fine arts, and mass communications center.

One of the witnesses who appeared and testified in support of these bills was Robert W. Dowling, president of the City Investment Co., of New York, and president, also, of the congressionally chartered American National Theatre and Academy. The same day Mr. Dowling appeared before the subcommittee he repeated an offer he had made a few years ago to President Harry S. Truman to raise through private subscription from businessmen, foundations, and wealthy individuals whatever sums were necessary to build the kind of cultural center envisioned in these 14 bills. The New York Herald Tribune, the Washington Post and Times Herald, and the Washington Evening Star handled this story the right way. The Wall Street Journal handled the story the wrong way. I include the following material for the information of my colleagues who will undoubtedly have this legislation before them shortly for decision:

[From New York Herald Tribune of February 24, 1955]

PLAN FOR FINE ARTS CENTER IN WASHINGTON IS REVEALED

WASHINGTON, February 23.—A group of New York art patrons stands ready to underwrite the entire cost of a national fine-arts center in Washington. Representative ADAM C. POWELL, Jr., Democrat, New York, said today such a center, long proposed, would cost from $15 to $20 million.

Representative POWELL made his statement while testifying before a House District of Columbia subcommittee studying a bill to establish a commission which would plan such a center and a civic auditorium.

"I can state positively," Representative POWELL said, "that a group associated with the arts for many years and spearheaded by one of the biggest investment corporations will completely finance the project without one cent of expense to the United States."

The group would want from Congress only Federal land to build on, Representative POWELL continued, and indicated the probable site would be near the Smithsonian Institution on the wide Mall which leads from the Capitol to the Washington Monument.

DOWLING HEADS GROUP

Representative JAMES H. MORRISON, Democrat, Louisiana, chairman of the subcommittee later said the head of the group, Representative POWELL, was talking about, is Robert W. Dowling, president of the City Investment Co. in New York, who also is board chairman of the American National Theater Academy, a private group promoting the American theater.

Representative MORRISON said Mr. Dowling had told him there was an excellent possibility that funds could be raised by private subscription to build a cultural center here second to none in the world.

NOT YET ORGANIZED

In New York last night, Mr. Dowling described the phrase "excellent possibility" attributed to him by Representative MORRISON as describing the situation accurately. He said the matter has been discussed by a number of groups, but that no organization has been formed nor any steps started toward raising the funds for the project.

[From the Wall Street Journal of February 24, 1955]

CULTURE BY DECREE

Like many other people in this country, we're all for culture. But like many others, we're not for all-out culture. We think people ought to be free to take it or leave it.

So we don't like the idea of the Government getting into the business of building theaters and cultural centers as proposed recently to a congressional committee. Some officials of the American National Theatre and Academy suggested that Congress pass a bill which would set up a District of Columbia Auditorium Commission, which in turn would plan construction of a civic auditorium including an inaugural hall of Presidents and a music, fine arts, and mass communications center in the Nation's Capital.

The ANTA says that the center is necessary because of the State Department's cultural exchange program; France, for instance, has placed at United States disposal five Government national theaters there for painting exhibits and for performances of the Philadelphia Orchestra and Oklahoma. We think that's fine; it will doubtless do us more good for Europeans to see some American folklore and hear music by Americans than some of our other efforts to make friends there have been able to accomplish.

The trouble is, ANTA says, that while everything's up to date in Paris, France, the same isn't true of Kansas City or New York or Washington. There just aren't five Government theaters where visiting troupes or art collections from abroad can be housed to reciprocate in the exchange of culture. There isn't even one.

Well, we think that state of affairs is sound. For one thing, we doubt if there is such a lack of private space as ANTA says; a couple of years ago the Austrian exhibit packed the crowds into the art gallery the Mellons built in Washington. For another, you can't get culture by decree any more than the Treasury can get taxes by osmosis. For still another, why should taxpayers in San Antonio or Seattle or Sarasota be forced to contribute to a National Theater in Washington or New York which they may never have the chance to see? It would make as much sense to pass a law saying that every collector of old masters must scatter some surrealism about the walls.

There's even a better reason in our view why this proposal should be voted down. Art has languished and the theater has been prostituted everywhere exactly to the extent of Government interference and control.

Though he didn't mean it that way, what we mean was put very well by President Derwent of ANTA when he told the House District of Columbia Committee:

"Only in America do we lag behind in the establishment of a National Theater. We need to counteract efforts of Russia—the Russians use their arts in propaganda."

Exactly.

FEBRUARY 26, 1955.

Mr. WILLIAM H. GRIMES,
Editor, the Wall Street Journal,
New York, N. Y.

DEAR MR. GRIMES: I am very interested in the editorial "Culture by Decree" which appeared in your publication on Thursday, February 24, particularly because it was inaccurate in several respects.

As you know, I am 1 of the 13 House Members who introduced bills creating a Federal commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents and a music, drama, fine arts, and mass communications center. All of these bills provide that the proposed commission shall "endeavor particularly to formulate a method of financing the project on a self-liquidating basis."

The Nation's Capital is particularly disadvantaged and underprivileged in cultural matters in comparison with other world capital cities and many cities in our own country, we are told by competent observers who cannot be accused of making political hay or of trying for partisan advantage. In his message on the state of the Union last month the President declared that—

"In the advancement of the various activities which will make our civilization endure and flourish, the Federal Government should do more to give official recognition to the importance of the arts and other cultural activities."

An appropriation of only $25,000 is called for in these bills which are sponsored by members of both parties on a strictly bipartisan basis. If your Washington representative had attended the hearings, or if you had taken the trouble to read the New York Herald Tribune of February 24, page 9, to check the facts, you would see that Robert W. Dowling, president of the American National Theater and Academy and the City Investment Co., who testified in support of these bills, repeated an offer he had made to President Truman to raise through private subscription from businessmen, foundations, and wealthy individuals whatever sums were necessary to build the cultural center envisioned in these bills. I would hope, also, that every American, when Mr. Dowling begins his fund-raising campaign, will be given the opportunity to contribute any amount he wishes toward building a great cultural center in Washington which will make the Federal city the Paris of America. Money is raised for the Metropolitan Opera Co. and the Philharmonic-Symphony Orchestra of New York on a national basis and the advancement of the cultural status of

our National Capital is a challenge to the loyalty and patriotic love of country which is present in each and every one of us.

As you know, the Congress insists on depriving Washingtonians of the vote and in serving as the city council of Washington—a role it has jealously maintained since the 1870's. The citizens of Washington pay nearly $170 million, more than is paid by a good many States, in Federal taxes each year. Yet they are deprived of all voice or representation in local or National Government, and the District's Commissioners are appointed by the President. Washington can't build a sewer, collect garbage, or put a dog in the pound without the consent of Congress. Washingtonians would like to abolish segregation in their Fire Department and there is much discussion of this at the present time with Congress insisting that segregation be maintained. Forty percent of Washington's real estate is reserved for Federal purposes which effectively removes it from the tax rolls. The Government started out with a 50–50 division of costs of running the Federal City but has reduced its contribution over the years until now it is about 15 percent. No other American city is treated like this by private business located within the city's limits. Our forefathers threw the tea in Boston Harbor and went to war when King George III insisted on taxation without representation.

I have been told that the Federal contribution to the civic center at Columbus Circle in New York City was about $6,500,000. American tax dollars have been used to rebuild opera and music buildings in Europe. Why can't similar funds be spent at home on cultural programs in San Antonio, Seattle, Sarasota, the cities you mention, as well as Cleveland, Trenton, New York, Washington, and other cities and towns across our land? Surely, more money should be spent in each State and in each community on the advancement of the various activities which make our civilization endure and flourish, for, as you may know, all of our cultural programs are finding it increasingly difficult to continue in the face of constantly rising costs.

In my statement on behalf of my bill, H. R. 4215, I said in part: In view of the many roadblocks which have defeated all efforts of earlier Congresses to enact legislation similar to the bills which you are considering here today, it is my considered opinion that it is very important to make a thorough and detailed study of American subsidy, direct or indirect, of foreign art programs and cultural centers. This information should be available through the Department of State and the Foreign Operations Administration. I hope, Mr. Chairman, that you will request this information and include it in the hearing record of your subcommittee. I believe that this information is essential to a general, public understanding of the issues involved in this legislation and to the advancement of these excellent bills in the Congress.

Copies of my bills, H. R. 4215, H. R. 4307, and H. R. 2210 (H. R. 4215 being considered), together with my statement before the subcommittee, are enclosed for the information of your readers and yourself. I hope you will do me the courtesy of carrying this material in order to correct the picture you presented. Dare we hope that once you have established your branch office in Washington the accuracy of your reporting will improve?

Cordially,

FRANK THOMPSON, JR.,
Member of Congress.

THE WALL STREET JOURNAL,
New York, N. Y., February 28, 1955.

HON. FRANK THOMPSON, JR.,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN THOMPSON: Thank you very much for taking the trouble to write us such a long letter about our editorial, Culture by Decree, and explaining to us your own views on the matter.

I note that you are interested in having the funds for this national theater raised by popular subscription or otherwise financed by private means. The Wall Street Journal would certainly not oppose a national theater financed on this basis and if our editorial gave any such impression, I am very sorry. What we questioned—and what we continue to question—would be the idea of having such a theater paid for out of Federal funds. Our view may be wrong, of course, but it is our opinion that a government ought not to take money from all the taxpayers and use it to subsidize individual cultural affairs.

You mention some cases where it has been done and can only note that we were opposed to it in those cases also. Specifically, we wrote an editorial opposing the use of Federal funds for the proposed civic center in New York City.

I hope this position does not make you think I am opposed to cultural activities. I personally contribute to both the Metropolitan Opera Guild and the Philharmonic Society and believe that this is the way for Americans to pay for their cultural activities.

You say you hope that the accuracy of our reporting will improve. I do not see from reading over the editorial again where our reporting was in error, although, of course, our opinions might be, but I am sure you will do us the courtesy of not denying us the right to a different opinion.

Sincerely yours,

VERMONT ROYSTER,
Senior Associate Editor.

Statehood and Foreign Policy

EXTENSION OF REMARKS
OF

HON. E. L. BARTLETT

DELEGATE FROM ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 1, 1955

Mr. BARTLETT. Mr. Speaker, there never has come to my attention a more eloquent, convincing, and logical expression why the grant of statehood to Alaska and Hawaii would aid our foreign policy than that which was made on February 22 by Senator JOSEPH C. O'MAHONEY, of Wyoming, when S. 49, the Hawaii-Alaska statehood bill, was under consideration by the Territories Subcommittee of the Senate Interior and Insular Affairs Committee. Senator O'MAHONEY's remarks were made when Under Secretary of the Air Force James H. Douglas was before the committee; they were so appropriate and so right that I take pleasure in presenting the statement here:

Senator O'MAHONEY. Mr. Chairman, we have before us, Mr. Secretary, two recommendations from the Cabinet level. One of these is the letter of the Secretary of Defense, C. E. Wilson, from which I will read this sentence, which, of course, has been repeated several times during the hearing:

"With respect to title II of the bill"—being the Alaskan portion—"however, the Defense Department believes that it would be in the interest of the national security that Alaska remain a Federal Territory at the present time."

Now, those last three words are qualifying words "for the present." They may have little significance, or they may have much. I do not know.

Mr. DOUGLAS. I will be very glad to ask the Secretary if he thought it practical and appropriate to interpret those words.

Senator O'MAHONEY. I think it would be very well if you would do so. It would be helpful.

Now, the other report which I have here is the letter of the Assistant Secretary of State, Thruston B. Morton, dated February 4, 1955, to the chairman of this committee. In the second paragraph of his letter he says, speaking of the two Territories which are affected here:

"It is this Department's view that such action would serve to support American foreign policy and strengthen the position of the United States in international relations."

Senator JACKSON. Senator O'MAHONEY, that seems to corroborate the statement made by the then General Eisenhower in Denver after the Korean war, the very point that President Eisenhower previously made.

Senator O'MAHONEY. When I was chairman of this committee some years ago, and we held hearings on the Alaskan and Hawaiian statehood bills, and the committee endorsed them, I took them to the floor with the deep conviction that what Secretary Morton said was right, namely, that it is an efficient method of defense of the United States and of the freedom for human beings for which it stands, to prove to the Asiatic world that we believe in letting people govern themselves.

We are represented in this cold war as being imperialists who want to step into the shoes of the vanishing empires of Great Britain and France and Holland in Asia.

I have been convinced from the very outset that the most effective thing that we could do in the Pacific area would be to prove to the Asiatics that we do believe in self-government by granting statehood both to Hawaii and to Alaska. And when we say Alaska, I say it because I know that the Aleutian Islands are just directly north of Hawaii, and Bering Strait, only 40 miles across, separates Alaska from Siberia.

I am mindful of the testimony that was given on behalf of the governors of the 11 western States by Gov. Earl Warren, of California, now Chief Justice of the United States. I want to make a part of the record here his statement:

"I am also appearing as a westerner who happens at the moment to be chairman of a governors' conference of 11 western States, which organization has gone on record several times during the past few years in favor of statehood for Alaska. We in the West believe that the development of any part of the West is of great benefit to the entire West and we consider Alaska as an integral part of the West. We have had the association of its governor in the council of the governors' conference committee 5 or 6 years and we have come to believe that this is the time for Alaska to be given statehood. We believe that we have a particular interest in the defense of Alaska and we believe that if Alaska is given statehood, is given an opportunity to develop its resources and its civilization, that it will be a greater factor in the defense of our Nation than it could otherwise be. We believe in the last analysis the defense of Alaska will come from the civilization that we develop there rather than just from the airplanes we send there or the fortifications that we develop.

"We are of the opinion that Alaska will not develop to the full extent of its potentialities unless it does achieve statehood."

I cannot think of a more eloquent expression of the point of view which this committee has shared in the past. But the testimony that is now presented here on behalf of the Department of Defense is vague and cloudy and uncertain.

The issue before us is whether or not our foreign policy, of which Secretary Morton speaks in his letter, is to be supported by an attitude of the extension of freedom to our own integrated Territories or whether it is going to be hampered by a policy which would seem to indicate that instead of advocating the right of self-government in the Territories, we are being asked by the Department of Defense to insist that the territorial status be maintained in Alaska, but you do not say that as to Hawaii. Alaska is closer to the area of war than is Hawaii. If it is a matter of defense, if there is a present danger, if there are any conditions that this committee does not know of which are governing the Secretary of Defense in what he says, by all means let the Secretary come here and in executive session tell us what they are.

* * * * *

Senator O'MAHONEY. Mr. Chairman, may I make another statement here?

Mr. Secretary, what bothers me about this matter is this: during this period while Congress has been declining to grant statehood to Hawaii and Alaska, the situation in Asia has been deteriorating. At this moment the Secretary of State is at Bangkok seeking to convince southeast Asia, where Thailand now is apparently about to be attacked by the Communists, that its interests lie in joining with the other states of southeast Asia in defense against communism, and the chief obstacle to the progress of the Secretary of State in Bangkok is the fact that we have been represented as only colonials of a different kind.

I cannot understand why it is not clear to the Department of Defense, unless there is something that you cannot tell us, why it is not clear to you that by granting statehood to Alaska and Hawaii we will be telling all of Asia that we are not colonials.

SENATE

WEDNESDAY, MARCH 2, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father God, Thou unseen source of beauty, goodness, and truth: Though the people imagine a vain thing, Thou still art God, sitting above the floods of human turmoil; Thy mercy endureth through all human denials and betrayals. Make us alive and alert, we pray Thee, to the spiritual values which underlie all the struggle of these epic days. Open our eyes to the futility of changing maps without changing men. To this end may selfishness and all uncleanness be purged from our own hearts and our will be lost in Thine. In spite of suspicions, animosities, disillusionments, and disappointments which plague the councils of men, gird our hearts to seek peace and pursue it, that the sadly sundered family of mankind at last may be bound by golden cords of understanding fellowship around the feet of the one God. In the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Monday, February 28, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its clerks, announced that the House had passed, without amendment, the joint resolution (S. J. Res. 42) to amend the National Housing Act, as amended.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes.

The message informed the Senate that, pursuant to the provisions of title 8, section 1106 (a), United States Code, the Speaker appointed as members of the Joint Committee on Immigration and Nationality Policy the following Members on the part of the House: Mr. CELLER of New York, Mr. WALTER of Pennsylvania, Mr. FEIGHAN of Ohio, Miss THOMPSON of Michigan, and Mr. REED of Illinois.

The message also informed the Senate that, pursuant to the provisions of section 5, Public Law 420, 83d Congress, the Speaker had appointed as members of the Board of Directors of Gallaudet College the following Members on the part of the House: Mr. THORNBERRY, of Texas; and Mr. PHILLIPS, of California.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

ENROLLED BILL SIGNED DURING ADJOURNMENT

Pursuant to the order of the Senate of February 28, 1955,

The PRESIDENT pro tempore announced that on March 1, 1955, he signed the enrolled bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes, which had previously been signed by the Speaker of the House of Representatives.

REPORT OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Pursuant to the order of the Senate of February 28, 1955,

Mr. BYRD, from the Committee on Finance, to which was referred the bill (H. R. 4259) to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption, reported it favorably, with amendments, on March 1, 1955, and submitted a report (No. 36) thereon.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. CLEMENTS, and by unanimous consent, the Committee on Finance was authorized to meet during the session of the Senate today.

On request of Mr. CLEMENTS, and by unanimous consent, the permanent Subcommittee on Investigations was authorized to meet during the session of the Senate today and the remainder of this week and the Subcommittee on Internal Security was authorized to meet during the sessions of the Senate today.

BURNET R. MAYBANK, LATE SENATOR FROM SOUTH CAROLINA

Mr. CLEMENTS. Mr. President, I ask unanimous consent that the legislative business of the Senate be now suspended, in order that memorial addresses may be delivered on the life, character, and public service of the late Senator from South Carolina, Hon. BURNET R. MAYBANK.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JOHNSTON of South Carolina obtained the floor.

Mr. CLEMENTS. Mr. President, will the Senator from South Carolina yield so that I may suggest the absence of a quorum?

Mr. JOHNSTON of South Carolina. I yield for that purpose.

Mr. CLEMENTS. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. CLEMENTS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JOHNSTON of South Carolina. Mr. President, on September 1, 1954, while the Senate was in recess, a distinguished colleague and a dear personal friend of mine passed from the scene of his many and arduous labors. When death called, BURNET R. MAYBANK was at his summer home in the mountains of North Carolina, resting temporarily from his heavy responsibilities.

Senator MAYBANK was born in Charleston, S. C., on March 7, 1899, of an illustrious family of South Carolinians. Five of his forebears held the high office of Governor of our State. Graduating early from Porter Military Academy, at 18 years of age he entered the naval service of our country, during World War I. Later, he graduated from the College of Charleston, the first municipal college in the United States and the oldest institution of higher education in South Carolina.

Early in life, entering private business as a cotton broker and exporter, he likewise began his public-service career as a

young man, first as an alderman, and then as mayor of his native city. He was elected Governor in 1938, and United States Senator in 1941. In the latter office, by successive reelections, he served until his untimely death.

Only a short time before his passing, Senator MAYBANK was renominated without opposition to succeed himself—a rather unique and singular happening in the political vicissitudes of South Carolina. This fact illustrates the high respect and esteem in which his fellow citizens there held him, and denotes, as well, a token of grateful appreciation of the able and faithful service he so capably rendered his State and his Nation.

It is my good fortune to have been his friend since 1938, when he succeeded me as the Governor of South Carolina. He was my able senior colleague in this body.

When I arrived here, he welcomed me with an intimacy of friendship, fellowship, and helpfulness that I shall cherish as long as I live. Through our years of common service, there was never a difference of a substantial nature between us. The infrequent occasions of our contrary voting arose by reason of differing viewpoints; yet, we always maintained the mutual respect and esteem due one colleague from another. I recall with gratitude that on one occasion, when a measure of great concern to me was about to be voted upon, and when he was then resting at his summer home, he sent this cheering message: "I will come back if my colleague wants or needs me." In our conferences, meetings, and discussions, there was always the kind consideration that any man hopes to receive from his associate. I relate these qualities of his personality in order to give utterance to my deep feeling of loss, as it now becomes my sad duty to pay my humble tribute to a friend and brother, an advocate in a common cause—for our Nation's and State's best interest.

Had Senator MAYBANK lived, he would have returned to the chairmanship of the Senate Banking and Currency Committee and the high position he held as a member of the all-important Appropriations Committee. In both of these offices of great trust and confidence, he displayed qualities of leadership and ability that mark him as a statesman of the first order. Devoted as he always was to the Nation's prime interests, he reflected with great honor the confidence placed in him by the citizens of South Carolina.

Millions of our fellow countrymen in South Carolina and throughout the country are indebted to him for his unceasing labors toward solution of the Nation's housing problems.

The men of our armed services, and the mothers, fathers, wives, and children of our servicemen are in debt to him for his unceasing interest in their welfare, because of his service as a member of the Appropriations Committee of the Senate.

There seemed to be no end to his indefatigable industry and his unlimited capacity for work. Toll, however, was being taken by his ceaseless activities in ways hidden from the public, and which, no doubt, accounted in a large measure for his sudden death at a time when most of us felt he was at the meridian of his powers and capacities.

The name and fame of every man survive for a little time or, perchance, for a little longer time—then disappear. It is strikingly true, however, that what a man is or does remains eternal.

Carlyle framed it in this manner:

> Genuine Work alone, what thou workest faithfully, that is eternal, as the Almighty Founder and World Builder himself. Stand thou by that; and let time and the rest of it go prating.

Numberless thousands, recognizing in him the true qualities of leadership and friendship, are sorrowed by his passing. The country has lost a statesman it can now ill afford to lose. The State of South Carolina has lost a senior Senator of whom she will always have reason to be proud. I have lost a true friend, a fine companion, and a dear colleague, the like of whom rarely exists among men of differing opportunities.

Senator MAYBANK was a devoted husband, a kind and generous father whom his family loved and respected. These ties and his family obligations were foremost in his consideration, and he was always attentive to their interests and their needs. Because of his early demise, a beloved member and strong supporter is absent from the family hearth.

Those near and dear to him have our heartfelt sympathy and the knowledge that we sincerely appreciate his real worth both as a man and as a public servant.

In the busy pursuit of our everyday lives, it is quite appropriate to set aside a sacred hour to pause in serious reflection and to pay deserved tribute to the memory of our departed colleague. So we gather today to do honor to him who but yesterday walked and labored beside us.

The thought of death and a day dedicated to memorial observances must bring to each of us the stark realization of life's uncertainty, the immutable certainty of death, and the utter vanity of many of our human pursuits. The issues of life with Senator MAYBANK have been framed. In all the controversies involving mortal beings he has finally answered the ultimate summons from the Supreme Judge of us all. How vain and useless would be our present proceedings were they not to awaken in us a more serious and conscious knowledge that we soon will follow in his train.

Our sadness today is lightened by a happy reflection of the great accomplishments attributed to him—accomplishments of trust and confidences kept, deeds of unselfish public service, and consecrated devotion to the noble ideals of manhood and statesmanship.

The great American poet, Longfellow, prescribed a mission in life for us all—a mission to which the life of this great statesman directs us:

> Lives of great men all remind us
> We can make our lives sublime,
> And, departing, leave behind us
> Footprints on the sands of time:
> Footprints, that perhaps another,
> Sailing o'er life's solemn main,
> A forlorn and shipwrecked brother,
> Seeing, shall take heart again.
>
> Let us then be up and doing
> With a heart for any fate,
> Still achieving, still pursuing,
> Learn to labor and to wait.

BURNET R. MAYBANK did leave well-defined footprints on the sands of time, footprints that we may well follow.

Mr. President, in these troubled times when the world is ajar with seemingly impossible differences among men and nations, our country suffers an irreparable loss in the passing of such a man as the late senior Senator from South Carolina.

We miss him. South Carolina misses him. And we join our thoughts and voices in saying of our departed friend, "Well done thou good and faithful servant."

Mr. President, the opportunity was presented to the late Senator MAYBANK to come to this body when his illustrious predecessor was elevated to the Supreme Court of the United States. Former United States Senator James F. Byrnes served many years in this body with distinction and honor and in other high offices with great distinction and ability. The practice has usually been, as in the case of Senator MAYBANK and myself, to leave the Governor's office and receive the compliments of a favorable constituency by being sent to this body.

Not so with Senator Byrnes. After leaving the Senate and the Supreme Court of the United States, and other high offices, he returned to South Carolina for further service in the high office of governor.

Because of a long and continuous friendship existing between Governor Byrnes and our deceased colleague, I was pleased to ask former Senator Byrnes to send me his tribute, which I now request be made a part of the RECORD.

There being no objection, the statement of Governor Byrnes was ordered to be printed in the RECORD, as follows:

STATEMENT BY JAMES F. BYRNES—BURNET R. MAYBANK

The senior Senator from South Carolina [Mr. JOHNSTON] has invited me, as a former Senator from this State, to prepare for inclusion in the RECORD some remarks about the late Senator BURNET R. MAYBANK.

I would not abuse the privilege generously accorded me by writing at length the story of BURNET MAYBANK's interesting and inspiring life. I am sure that detailed story will be recorded by members of the congressional delegation who were associated with him in recent years.

As I think of Senator MAYBANK, my mind goes back to my association with him in his younger days. He made rapid progress in his cotton business, but he was interested in public affairs and particularly in the progress of the city of Charleston, where he was born.

With his fine mind, his indomitable energy, and inspiring enthusiasm, he so impressed people of Charleston in all walks of life that they drafted him to be a candidate for mayor. He was elected.

By the time he assumed office the great depression was on. While revenues were rapidly decreasing and loans could not be negotiated, Charleston, like other municipalities, was faced with the problem of continuing public services to which the people had become accustomed.

Mayor MAYBANK demonstrated unusual resourcefulness and had marked success in solving the financial problems of his city.

He gave to the city a sound and progressive administration.

When he became a candidate for governor, his successful administration as mayor of Charleston, his outstanding service on the board of bank control, and his contribution to other agencies having jurisdiction over statewide activities, caused the people of the State to conclude that he would make a good governor.

At that time there still remained some political prejudice in the Piedmont section of South Carolina against any citizen of Charleston who was a candidate for a State office. BURNET MAYBANK overcame that prejudice and was elected governor.

As governor he made such a fine record that when I resigned from the United States Senate to become an Associate Justice of the Supreme Court, he was elected to the Senate, where he served until his death.

Senator MAYBANK had reason to be proud of his continued election to the Senate because in some of these contests he was opposed by men of ability, who had previously demonstrated unusual political strength.

He was successful, not only because he possessed ability, but because he inspired his friends to fight for him and for the causes he espoused.

He believed with Emerson that, "To have a friend, one must be a friend." He liked people. He wanted people to like him. I am satisfied that nothing gave him greater happiness than the fact that in 1954 when he announced his candidacy for reelection, he had no opponent in the Democratic primary.

A man in public office can show appreciation of the support of his friends in no way better than by faithfully and efficiently discharging the duties of his office. BURNET MAYBANK did that. He made good in every public office he held, but he was particularly efficient in his service in the United States Senate as a member of the Appropriations Committee and the Banking and Currency Committee. As a Senator he rendered outstanding service to his country and his State. South Carolinians are proud of the record of Senator MAYBANK.

Through the years, whenever I was a candidate for public office, BURNET MAYBANK supported me. I always supported him. I enjoyed his friendship and his confidence. I cherish the memory of that friendship. I cherish it because BURNET MAYBANK was a good man. Whenever a man can say that of another man, he can pay no higher tribute. Additional adjectives are unnecessary.

Senator MAYBANK was at home among people in all walks of life. He could enjoy their virtues without indulging in their weaknesses. He was always a gentleman. He was honest and truthful, and always considerate of the feelings and the views of others.

He was clean. In all my years of intimate association with him, I never heard him tell a story that could not be repeated in the presence of his family.

He was an impulsive man. Like all of us, he made mistakes. Unlike many of us, he had the courage and willingness to admit his mistakes.

He loved his family. His will is indicative of that love. Some of its bequests are indicative, too, of his pride of family. He made specific gifts of personal property to his children, giving the "Aiken silver" to one daughter, and the "Madison chair" to another. He valued these things more than most people, and he wanted his children to value their heritage.

By his sudden death the State and the Nation lost a devoted public servant. Certainly, I lost a valued personal friend.

The highway of life is a wonderful road. In our youth we joyfully dance through the years, free of cares and responsibilities. Determinedly we march through the years of maturity, manfully overcoming the obstacles that beset our paths. Bravely we walk along the ever-narrowing path of old age until with faltering steps we finally reach our resting place. Along this highway we meet many people. Some of them we take to our hearts and share their joys and sorrows. To part with them is painful and they are sorely missed.

I miss BURNET MAYBANK. I shall miss him always.

Mr. JOHNSTON of South Carolina. Mr. President, on November 2, 1954, I received from a dear friend of mine and a resident of my home city of Spartanburg, S. C., Mr. Walter S. Montgomery, resolutions which were adopted by the board of directors of the American Cotton Manufacturers Institute, Inc.

Mr. Montgomery is chairman of a special committee appointed to prepare resolutions of condolence over the passing of Senator MAYBANK. These resolutions extoll the virtues and character of our departed friend.

In deference at that time to the expressed wishes of members of the family of the deceased, I have retained these resolutions for presentation on this memorial occasion. I now ask that they be incorporated in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

BURNET RHETT MAYBANK: AN AMERICAN STATESMAN

When BURNET RHETT MAYBANK died on September 1, 1954, the Nation lost one of its outstanding statesmen. Senator MAYBANK was a man of deep loyalty and devotion to friends and country. He had a keen awareness of the worth of the individual and an understanding of the need to provide a sound structure of government within which the individual might develop to the limit of his capabilities.

Born in Charleston, S. C., March 7, 1899, Senator MAYBANK was the descendant of five former governors of his native State. He was first elected an alderman of the city of Charleston, and later its mayor. At the age of 38 he followed in the footsteps of his forebears to become Governor of the State. He was elected to succeed James F. Byrnes as Senator from South Carolina in 1941, and served in that position until the date of his death. During his tenure in the Senate, one of his most important assignments was chairman of the Senate Banking and Currency Committee, from which position he distinguished himself for the clarity of his reasoning and the soundness of his judgment.

While Senator MAYBANK's death brought sorrow to countless thousands who had known him and who had labored with him, it brought particular sadness to those connected with the American cotton trade and industry. Having worked as a cotton broker, Senator MAYBANK understood the problems of the cotton industry and was quick to champion the cause of cotton whenever consistent with the best interest of the Nation. With the death of Senator MAYBANK, there passed from the American scene a brilliant statesman, an outstanding citizen, and a beloved friend.

In recognition of the value of the life of this great American, the board of directors of the American Cotton Manufacturers Institute, Inc., assembled in regular meeting at Charlotte, N. C., on September 22, 1954, directed that the president of the institute appoint a special committee composed of those members of the board residing in South Carolina; that this special committee transmit to Mrs. Burnet Rhett Maybank and family these expressions of sympathy of the members of this organization and of the members of its board of directors; and that a copy of these expressions be sent to the senior Senator from South Carolina with the request that they be incorporated in the CONGRESSIONAL RECORD.

American Cotton Manufacturers Institute, Inc.: Walter S. Montgomery, Chairman, Special Committee; James A. Chapman; R. G. Emery; F. E. Grier; C. B. Hayes; Ellison S. McKissick; J. C. Self, Jr.; Wm. A. L. Sibley; Elliott Springs; Earle R. Stall; Fred W. Symmes.

Mr. JOHNSTON of South Carolina. The Democratic national committeeman from South Carolina, Mr. Edgar A. Brown, of Barnwell, S. C., who was a friend of our late colleague for many years, upon learning of the latter's death, paid a fine tribute to the late Senator MAYBANK.

I ask unanimous consent that this tribute be printed in the RECORD at this point as a part of my remarks.

There being no objection, the tribute was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM A SPEECH OF STATE SENATOR EDGAR A. BROWN, OF BARNWELL, S. C., REFERRING TO THE UNTIMELY DEATH OF SENATOR BURNET R. MAYBANK

On September 1, 1954, God, in His infinite wisdom, saw fit to take from our midst our beloved Democratic Senator, BURNET R. MAYBANK, a person who was not only loved by the people of our State, but was loved, admired, and respected by the entire Nation.

He not only carried the torch for his native State, but he carried it for the South. He carried this torch in one hand and the Democratic banner in the other hand. No matter how tired and weary he may have become at times, this Democratic banner was never allowed to be lowered. He always held it high above his head, and was proud that he was a son of a Democratic State and represented Democratic people who had put him in a position of prestige and power to carry on in his way the work he loved with all of his heart.

Mr. JOHNSTON of South Carolina. Mr. President, my distinguished colleague, BURNET R. MAYBANK, as I have already remarked, was a devoted and zealous friend of our public-housing program. This interest of his originated long before his service in this body began.

The National Association of Housing and Development Officials knowing most intimately of the valiant services rendered his country by the late Senator, very appropriately adopted a resolution expressing their sorrow over his passing. I ask that this resolution be now incorporated in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas in 1937, upon the passage of the United States Housing Act, it was freely predicted that the program would never be accepted in the South; and

Whereas BURNET R. MAYBANK, as mayor of the city of Charlston, S. C., proved this prediction wrong by securing for his city one of the first allocations made for low-rent public housing, sponsoring a program based on the housing needs of the people of his community that currently is regarded as one of the more successful in the country, especially for minority families; and

Whereas as Governor of South Carolina, BURNET R. MAYBANK carried out the principal planks in his platform by calling for

local, State, and Federal aids of various kinds for families of low income—public housing, public power, and rural electrification—indicating his tremendous interest in and dedication to the welfare of the little people; and

Whereas on his election to the Senate just prior to World War II, Senator MAYBANK was assigned to the Committee on Banking and Currency and immediately became active in the whole field of housing and slum clearance, playing a major part in securing rent control, effective war-housing legislation, and other programs aimed at maintaining economic stability and increasing war production; and

Whereas on assuming the chairmanship of the Banking and Currency Committee he introduced the Housing Act of 1949 and piloted it through the committee, the Senate, and the Congress by securing unprecedented bipartisan support for it; and

Whereas he was the first to recognize the need for a total approach to housing, particularly the necessity for homes for families of middle income, authoring the middle-income bill of 1950 and courageously battling for it on the Senate floor, where it was defeated by a close vote, thus dramatizing for the country the problem for which we are presently seeking a satisfactory solution; and

Whereas when the slums of America are wiped out and the objectives of the Housing Act of 1949 are realized, history will show that BURNET R. MAYBANK was one of its chief architects and will prove his philosophy that true equality for all people can be achieved only when all families have the opportunity to secure decent homes in good neighborhoods and are permitted to enjoy the fruits of a sound and prosperous economy: Now, therefore, be it

Resolved, That the National Association of Housing and Redevelopment Officials pays this grateful and affectionate tribute to the memory of a lovable human being who used his many talents, his great wealth, and his illustrious heritage in the interests of the less privileged among us.

Mr. JOHNSTON of South Carolina. Mr. President, Senator BURNET R. MAYBANK was a great friend of the schools of America and he was instrumental in rendering many services to the schools in Beaufort, S. C.

An article to this effect was prepared by Mr. O. K. McDaniel, administrator of the school-construction program at Beaufort, in the Beaufort Gazette, a fine newspaper in my State.

I desire to have that expression of their regard incorporated in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Beaufort (S. C.) Gazette of September 9, 1954]

TRIBUTE TO SENATOR BURNET R. MAYBANK

(By O. K. McDaniel)

In the sudden and untimely passing of the late Senator BURNET R. MAYBANK I feel that I have lost a friend, the community of Beaufort an ever-ready helper, the State of South Carolina an able representative and the South, and the Nation, a real statesman.

During the last 12 years it has been my duty and privilege to contact Senator MAYBANK on a few personal matters and more often on matters connected with the maintenance and operation of Beaufort schools. On every occasion he has shown exceptional courtesy and displayed a genuine interest and desire to help. He was always frank to give us both sides of the issue at stake and plainly pointed out the difficulties involved. At the same time he assured us that he would do all in his power to help.

Only recently it was my privilege to be in his office in Washington, D. C., concerning legislation before the Senate affecting the schools of Beaufort. It was during the closing days of Congress and he was exceedingly busy on the floor of the Senate. His able assistant, Mr. Smith, and his secretary, Mr. Jones, listened to my story and assured me that they would convey my problem to the Senator. Early the next morning the Senator called me from his office and talked to me over the phone in my room at the hotel. He had a complete understanding of my problem and assured me that he would do all he could. However, he informed me that we in the South might expect some rough sailing from the present administration, as he had already encountered such in other legislation he was sponsoring. Two days later the desired legislation passed the Senate and the following week it passed the House. The last accounts we have of it is that it is on the President's desk awaiting his signature.

All of us are familiar with the problem of ever-mounting school enrollment and increasing attendance as the result of the influx of pupils in war-impacted areas, such as Beaufort. Our representatives in Congress, both in the House and the Senate, became aware of this problem and took the position that there was a Federal responsibility involved and that assistance from the Federal Government should be given. As a result of their efforts, along with others of like mind, this responsibility was accepted, first, through the Lanham Act, later through the Landis Act, and finally through Public Law No. 874, which gives assistance in maintenance and operation, and Public Law No. 815, which renders aid for schoolhouse construction. Senators MAYBANK and JOHNSTON, and Representative RIVERS worked shoulder to shoulder in convincing Congress that such need was just. After the acts were enacted into law it took a lot of pushing each year to get sufficient appropriation to take care of the entitlements. Our Representatives, including Senator MAYBANK, saw to it that Beaufort received its share. With the reactivation of and enlargement of Beaufort Naval Air Station it became evident to many of us that more assistance and more buildings would be needed. During the closing days of the 83d Congress these laws were extended and they now await the President's signature.

It is an interesting story concerning the actual benefits Beaufort County School District No. 1 has received from such legislation and the untiring work of our representatives in Congress. In 1941–42 Beaufort school district received $3,867 for assistance in maintenance and operation. Since that time the district has received $447,979 for that purpose, and $857,414 for schoolhouse construction. It may well be said that the excellent school buildings at Port Royal, Dale-Lobeco, Robert Smalls, and the additions to the Beaufort High School stand as a memorial to the faithful and untiring work of Senator BURNET R. MAYBANK and others who had a part in making them a reality. Only recently we received announcement that an additional $27,000 has been awarded Beaufort school district for additional classrooms at St. Helena consolidated schools.

Senator MAYBANK was the product of the best culture and refinement of the Old South and Charleston in particular. Yet he never lost the common touch and never forgot in his public career that he was the servant of the most humble. The high esteem in which he was held by the people of his native State was such that he never asked for a public office that it was not given him. A final testimony of the implicit trust in his ability and sincerity was shown in the last primary when he was renominated for a 6-year term in the United States Senate without opposition. The poet, Kipling, might well have spoken of Senator MAYBANK with these words when he said:

"If you can walk with crowds and keep your virtue,
Or walk with Kings—nor lose the common touch,
If all men count with you, but none too much;
If you can fill the unforgiving minute
With sixty seconds' worth of distance run,
Yours is the Earth and everything that's in it,
And—which is more—you'll be a Man, my son!"

The PRESIDING OFFICER (Mr. JOHNSTON of South Carolina in the chair). The Chair recognizes the junior Senator from South Carolina.

Mr. THURMOND. Mr. President, from the time he was 27 years old, BURNET RHETT MAYBANK devoted his life to public service.

Most Senators knew him here in the United States Senate as a colleague from 1941 till last year when his untimely death came on September 1—a man admired, respected, and loved by his associates and by vast numbers of people who knew him only through his reputation.

Prior to coming to the Senate as successor to the Honorable James F. Byrnes, who was appointed to the Supreme Court, BURNET MAYBANK had served as Governor of South Carolina from 1938 through 1941. For the 8 years from 1931 through 1938, he served the city of Charleston as a distinguished mayor. Before being elected mayor, he was an alderman in Charleston from 1927 through 1930. Also, during this long period of outstanding public service, he was from 1934 through 1938 chairman of the South Carolina Public Service Authority which created the huge Santee-Cooper power project, now serving lower South Carolina. President Roosevelt appointed him to the Public Works Administration.

My distinguished predecessor was, by profession, a cotton exporter. You who were his colleagues know of his continuing interest in, and vast store of knowledge on, the subject of cotton. He was an expert in this field.

You knew, too, of the great legislative ability which he demonstrated throughout his career in Washington. He served exceedingly well as he went about the task of representing the people of his State and the people of the United States in this great deliberative body.

He performed in an unusual manner the duties of a Senator, whether on the floor, where he seldom spoke at length, or in the committees of which he was a member. As chairman of the Banking and Currency Committee, Senator MAYBANK established himself deep in the favor of Members on both sides of the aisle who recognized the superb qualities inherent in this South Carolinian.

Not only in the Senate, but also as a leader in the Democratic Party, BURNET MAYBANK was held in high esteem by his fellow Members. From 1930 on he was a member of all city, county, State, and National Democratic conventions for which he was eligible.

We recognize him as having been the epitome of the people of his native city,

Charleston. He graduated from Porter Military Academy in Charleston and from the College of Charleston. His college career was interrupted by service in the Navy during the First World War. But he finished at the top of his college class as its honor graduate.

BURNET MAYBANK'S political record was phenomenal. He never lost a political contest in which he was a candidate. After having served on the Charleston City Council and one term as mayor, he was virtually drafted by public demand for mayor for another term, and he was unopposed. Although he knew little of the technical aspects of sociology, he was at all times conscious and mindful of the desires and needs of his people.

He was the first Governor elected from Charleston in 75 years after the War Between the States. The second time he ran for a full Senate term in 1948 he won nomination in the first primary by a handsome majority over four opponents. Six years later, last year, he was accorded the unusual honor of being nominated to another 6-year term without opposition.

I first knew BURNET MAYBANK while he was mayor of Charleston. In 1932 when both of us attended the National Democratic Convention, I came to know him more intimately and to like him. Later I was closely associated with him in the creation of the South Carolina Public Service Authority. During the years 1947 through 1950, while he was in the Senate and I was Governor of South Carolina, we worked together on many projects. He was sincerely and deeply interested in the public good.

He has been described as a man who had an inherent feeling of obligation for public service. BURNET MAYBANK came of ancestry which was used to high office and leadership. Five of his forebears had been Governor of South Carolina.

A most intimate friend of Senator MAYBANK told me recently that "he had the most forgiving disposition of any man I ever knew. He never held opposition against anyone and, therefore, he gained friends and votes with each succeeding election, even among his former opponents."

This friend declared that the Senator had a deep feeling of attachment for the land and for the people who worked it, in spite of the fact that he, himself, was city-bred. He loved the restful seclusion of his mountain retreat and went there as often as his duties in Washington and Charleston permitted.

BURNET MAYBANK liked the sun and the surf of the beaches of his native State. An excellent shot, he was a hunter of turkey and ducks in the low country of South Carolina. This love of the out-of-doors gave him the appearance of robust health until very near the end of his life.

Despite the honors and demands of public life, and the attractions associated with such a career, the outstanding characteristic of BURNET MAYBANK was his utter devotion to his family. As a husband and a father he fulfilled the highest meaning in the definitions of those relationships. He was fond of children and he enjoyed the days during which his two daughters and his son were growing up. I am told that he enjoyed playing little jokes on his children and they in turn on him, knowing his excellent sense of humor.

Senator MAYBANK was a member of the Episcopal Church and served as a vestryman at historic old St. Michael's Church in Charleston. At the time of his death he was senior warden at St. John's-in-the-Wilderness, at Flat Rock, N. C., where his summer home was located.

A South Carolina newspaper editor has well expressed the thought which aptly sums up the feeling of the people who knew him best. This is what he said in an editorial the day after Senator MAYBANK died:

The sincere sadness felt by the people of South Carolina over the death of Senator BURNET R. MAYBANK is a mirror of the distinguishing trait of the man they grieve.

For Senator MAYBANK was above all a sincere man. He had other fine qualities, to be sure, but shining above them all was his innate freedom of hypocrisy, his nature to appear to be no better or worse than he was.

In conclusion, I offer, with my colleagues, consolation to our deceased friend's family with the thought that BURNET MAYBANK'S sacrifices for his State and Nation were not in vain. Long will his record stand for lesser statesmen to emulate. But much more significant, long will he be remembered for what he was himself—for his ability, his generosity, his friendliness, and his impulsive eagerness to do good for others.

Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point an editorial entitled "Senator MAYBANK," which was published in the Greenville (S. C.) News of September 2, 1954.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SENATOR MAYBANK

The sincere sadness felt by the people of South Carolina over the death of Senator BURNET R. MAYBANK is a mirror of the distinguishing trait of the man they grieve.

For Senator MAYBANK was above all things a sincere man. He had other fine qualities, to be sure, but shining above them was his innate freedom of hypocrisy, his nature to appear to be no better or worse than he was.

His effectiveness both as governor and Senator gathered strength because of being fed copiously from his fountain of sincerity. One did not search for a motive in his words, deeds, or votes. Even though one did not agree with him on occasions, still there was the feeling that he acted only with a sincere desire to do the right thing.

The people of South Carolina liked the man. His neighbors elected him mayor of Charleston. When he offered to become Governor of the State he was a new kind of candidate, but thousands who had not known him before were attracted to his genuine sincerity. No citizen of Charleston had been elected governor since the Civil War, but MAYBANK overcame this artificial handicap and proved one of the State's best chief executives.

In the Senate MAYBANK was not spectacular, because that was not his nature. He was not a blowhard in the cave of winds. But he was attentive to business, both that which pertained to national affairs and those of South Carolina. He had boundless enthusiasm and energy which he applied wholeheartedly to whatever business was to be done. He had the confidence and respect of his colleagues, without which a Senator had just as well not be there.

Result was that with each passing year MAYBANK grew in stature in the Senate and came to be known as one of the outstanding Members of that body. He was a specialist on the problems before the Banking and Currency Committee, which he headed during the last Democratic administration and later was ranking member. He was serious and he was good humored and it was natural that he should have persuasion with those who also served.

At the same time the Senator never neglected the problems and opportunities peculiar to his own State. He never forgot the people who elected him. He was not a pork-barrel Senator, but he insisted and usually got the share to which his State was entitled. The Donaldson Air Force Base, for example, was forever under his watchful eye for nurture. The personal problems and difficulties of his constituents were taken to heart. His telephone bill for talking to them took a sizable portion of his pay check.

It is ironical that a man who so appealed to voters as to receive another term without opposition should be stricken before the new term begins. Whereas only 2 months ago there was rejoicing that he had been so well rewarded for good service, today there is a void against the sky. In bowing to the wisdom of the Lord in taking him in what should have been his prime, one still may grieve that there was work he wanted to do and could not do.

South Carolinians will always remember the smiling face of the young man from Charleston who came to them a few years ago seeking the governor's and later the Senator's offices. They will not forget the impression he made as one offering to render unselfish public service and not to satisfy personal political ambition. He measured to their appraisal and expectations.

It was in the early years of his political life that MAYBANK delivered a one-sentence speech at a banquet in South Carolina. He arose and said, "BURNET MAYBANK will never let you down." And he never did.

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a newspaper article published in the Greenville (S. C.) News of September 2, 1954. It was written by Mr. Frank van der Linden, manager of a Washington news bureau.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WASHINGTON, September 1.—A unique and powerful personality passed from the national scene today when Senator BURNET R. MAYBANK, of South Carolina, died suddenly of a heart attack at his summer home at Flat Rock, N. C.

No other Senator was ever quite like the husky human dynamo who thought, spoke, and acted with lightning speed, as he did the work of three men every day.

Beloved for his kindness and good humor, MAYBANK mingled the courtesy and charm of the old Charleston aristocracy with the nervous energy of a business executive.

He talked in telegrams—brief snatches of sentences that jumped from one subject to another as his brilliant mind flashed. He spoke in a staccato dialect of soft Charleston accents fired with the speed, and the gestures, of a Frenchman. He once said he developed his machine-gun delivery as a cotton broker, doing business by telephone.

MAYBANK drove himself, and his office staff, at a terrific pace. He shuttled back and forth from his office in the Senate Office Building, to the Senate floor, the hearing rooms of the Appropriations and the Banking and Currency Committees, and his pri-

vate hideaway in the Capitol, where he kept two telephones buzzing most of the time.

MAYBANK was a national statesman, not a provincial politician. As chairman of the Banking and Currency Committee, he fathered the 1949 Housing Act which encouraged the construction of homes by the millions, and included public housing and slum clearance projects.

MAYBANK also wrote the Defense Production Act, which set up the economic controls essential to the Korean conflict. He was cochairman of the joint Senate-House watchdog committee which kept tab on the Federal agencies administering that act.

As a member of the Appropriations Committee, the South Carolina Democrat helped to draft money bills providing hundreds of billions of dollars for Government expenses in war and peace. He was formerly chairman of the Independent Offices Subcommittee. He fought for cuts in foreign aid bills and favored high price supports for basic farm commodities.

MAYBANK also sat on the steering committee that assigns Democratic Senators to committees.

MAYBANK remained a "regular" Democrat in the 1952 election, although Governor James F. Byrnes and many other friends urged him to back Gen. Dwight D. Eisenhower, who nearly carried South Carolina on an independent presidential ticket.

MAYBANK made one concession: He resigned from the Democratic National Committee in protest against his party's civil rights plank. But he campaigned for Democratic senatorial candidates in several States.

In his 13 years on Capitol Hill, MAYBANK rose to a powerful place among the southern leaders of the Senate. He ranked with such men as Georgia's Senators WALTER F. GEORGE and RICHARD RUSSELL, Virginia's HARRY BYRD, and Texas' LYNDON JOHNSON in influence and prestige. He always stood up for the rights of the South.

MAYBANK used his power for the benefit of his constituents, including the textile mills, the cotton and tobacco farmers, and the other economic interests of his State. Many an item, buried deep in the technical language of a complicated bill, turned out to be a "Maybank amendment" protecting some of his people.

While he spoke rarely on the Senate floor, MAYBANK was a master of person-to-person conversation in the cloakrooms and around the committee tables and over the telephone. He got things done through his driving force but without a lot of waste motion.

Having a genial disposition, and loving a good joke, MAYBANK had a host of friends among his fellow Senators and the Capitol employees, regardless of party. He was unbeatable as a candidate for office.

Mayor of Charleston at 32, he became Governor at 40 and a Senator at 42. He was elected in November 1941 after Senator Byrnes resigned to become a Supreme Court Justice. MAYBANK had a hard race in 1942 but defeated four other candidates by a clear majority in 1948 and won renomination this year without opposition.

MAYBANK'S sudden death, at 55, shocked Washington. None of his associates had known that he had a heart ailment, although he had occasionally visited the naval hospital at nearby Bethesda, Md., for treatment of other illnesses and for checkups. A blood vessel burst in his throat in the winter of 1950, and he had a siege of pneumonia after the day-and-night grind of the Democratic convention of 1952. But he snapped back, each time, and had appeared in excellent health.

"He worried about his health," said his longtime administrative assistant, Col. Dresden A. Smith, of Walhalla. "He was afraid of having a long and painful illness. He wanted to go quickly—just as he did."

Smith, who had served with MAYBANK for 20 years, was probably the first person in Washington to be notified of the Senator's death. Smith recalled that, on his own 73d birthday last August 13, MAYBANK had honored him with a party.

"I remember joking with him and saying, 'When you are 73 I am going to have a party for you.'

"He was always doing little kindnesses for people," Smith said. "The only complaint I ever had against him was that he worked too hard."

"He died in his prime, still champion," said Norman Stevenson, of Charleston, member of the Banking Committee staff.

"That is the way he wanted to go, and at the place he wanted, too," said Lee Parsons, of Andrews, minority clerk of the committee. "He loved that summerhouse, for it was his father's house, and you know what a family man he was."

MAYBANK'S associates said the Senator had planned to retire after his next 6-year term, for which he was the unopposed Democratic candidate in the November 2 election. They said he had once expressed the hope that his son, Burnet Maybank, Jr., of Greenville, might succeed him in the Senate.

The Senator's death was a double shock for Miss Mary Anthony, of his office staff. She was formerly an aid to Congressman Joseph R. Bryson, of Greenville, who died in March 1953.

South Carolina has thus lost two members of its congressional delegation in the 83d Congress. MAYBANK is the eighth Senator to die in this Congress and the fifth in 1954. Senators Taft, of Ohio, Tobey, of New Hampshire, and Smith, of North Carolina, died in 1953; Senators Butler and Griswold, of Nebraska, Hoey, of North Carolina, Hunt, of Wyoming, and Maybank died this year.

Among the other South Carolina Senators who died in office were Ben Tillman, 1918; Alva M. Lumpkin, who was appointed after Byrnes' resignation and served only 10 days, from July 22 until his death August 1, 1941; and Ellison D. (Cotton Ed) Smith, who died in 1944.

Senator OLIN D. JOHNSTON, of South Carolina, will head the official Senate delegation to MAYBANK'S funeral at St. Michael's Episcopal Church, in Charleston, Friday at 11 a. m., eastern standard time. Burial will be in Magnolia Cemetery, Charleston.

Bobby Baker, of Pickens, the assistant secretary for the Senate minority, is in charge of arranging for Democratic Senators to attend the funeral. Baker, who came to Washington in 1942 as a page for MAYBANK, said about 30 Senators of both parties will go to the rites. The list will be published tomorrow.

Flags over the Capitol flew at half staff today in honor of MAYBANK.

Everyone attending the McCarthy censure hearings stood for a moment of silence at the request of the investigating chairman, Senator ARTHUR V. WATKINS, of Utah.

"It is with regret and deep sorrow that we received the news of the death of Senator MAYBANK," WATKINS said. "He was greatly beloved in the Senate."

Senator SAM J. ERVIN, of North Carolina, another committee member, said: "I considered Senator MAYBANK one of the most capable Members of the Senate. He was a gallant gentleman. His death is a great loss to North Carolina as well as to his own State. He had rendered fine service to the textile industry of our States, being an authority in that field."

Senator JOHNSTON, attending a convention of Government workers at Cleveland, Ohio, also sent a message of regret.

JOHNSTON praised his colleague as "a true gentleman and statesman whom I had learned to know, respect, and admire so well."

Former Gov. STROM THURMOND, of Aiken, in Washington for the American Legion convention, said: "Our State has suffered a tremendous loss in the death of Senator MAYBANK. He was a fine citizen and a great United States Senator who rendered outstanding service to South Carolina."

THURMOND, who ran against JOHNSTON in 1950, refused to comment on reports that he is a likely aspirant for MAYBANK'S seat.

Martin Rosefield, of Sumter, past department commander of the American Legion, said: "Senator MAYBANK was a good Legionnaire and a friend of all veterans. We regret his passing very deeply."

South Carolina House Members, scattered by the congressional recess, telephoned their tributes to Washington.

From Lancaster, S. C., Representative JAMES P. RICHARDS, of the Fifth District, said: "It is a tragic loss to South Carolina and to the Nation that BURNET MAYBANK has been taken in the fullness of his service and influence. I feel a deep sense of personal loss, as I valued his friendship. His place will be hard to fill."

Second District Congressman JOHN J. RILEY, of Sumter, vacationing at Edisto Beach, said: "I was shocked to learn of the passing of Senator MAYBANK. South Carolino has lost one of her outstanding and influential public servants. I have lost a very dear friend whose counsel and cooperation have been of untold benefit to me in my public service."

Sixth District Congressman JOHN L. MCMILLAN, of Florence, said: "Senator MAYBANK'S death is a great shock to me. He was one of my closest friends, and he will always be missed by me. South Carolina and the Nation have suffered a great loss. With his long service, he had built up seniority, and he was a great man in the Senate."

Mr. CLEMENTS. Mr. President, it is difficult to realize that our good friend, BURNET R. MAYBANK, is no longer with us.

Senator MAYBANK was one of the most forceful personalities in a body of forceful men. His skill and his determination made him a power to reckon with—whatever the occasion and whatever the issue.

Although my service in the Senate has been comparatively brief, yet I count myself among his friends and as one of the many whom he helped with his advice and counsel. I learned early that it was the part of wisdom to begin any step by consultation with BURNET MAYBANK.

He was never too busy to help any Senator, no matter how junior. Although he presided over one of the most important committees of this body, he was always willing to cooperate, and likewise to see the other man's point of view.

In return, his colleagues bestowed upon him an affectionate regard which is possessed by few. He was respected; he was admired; he was loved to an extent that made him a Senate institution.

As a legislative craftsman, he had few equals. His personality was stamped on some of the most important legislation of our times, vital economic legislation that affects the daily lives of our citizens.

I was deeply shocked by the sad news of his passing. To all of us came the realization that something very strong and very fine had passed from our lives.

But to the Senate, to his native South Carolina, and to his family, BURNET R. MAYBANK will always remain a living legend—a force from which all of us can draw strength as we face the problems yet to come.

Mr. KNOWLAND. Mr. President, it was with great sadness that all the Members of the Senate heard of the passing of our late good friend and colleague, BURNET MAYBANK, of South Carolina. He had served his State and country well, not only, as has been already pointed out, as mayor of his native city, but as Governor of the great State of South Carolina, and as a Senator of the United States.

BURNET MAYBANK was a good party man. He took a keen interest in the party to which he belonged, and he served in the various echelons of that organization from the precincts on the city level up to the national committee. Yet, while a devoted partisan, he was not a bitter partisan. Before he was a Democrat he was an American; and the aisle which divides our two parties in the Senate of the United States did not divide BURNET MAYBANK from those of us who sit on this side of the aisle.

It was not my privilege to know him before I came to the Senate 10 years ago, but I have been privileged, as were some other Members of this body, to serve with him during almost a decade. I can say that I know of no Member of this body who showed greater courtesy and consideration to his colleagues than did BURNET MAYBANK.

I was privileged to serve with him on the Committee on Appropriations. He was an interested and active member of that committee. Of course, as a Senator from the State of South Carolina, he was deeply interested in the great economic, social, and political problems which affected his native State. As a Member of the Senate from the great South, which has shown such tremendous development over the years, of course, he was interested in that area of our country whose development meant so much to him and which means so much to the people of all the 48 States. But, over and above that, in a true sense of the word, he was a Senator of the United States. Regardless of locality, whenever a given area had a problem Senator MAYBANK took a keen interest in trying to find a fair and equitable solution.

It was the sad privilege of a number of us representing the Senate of the United States to go to Charleston, S. C., to attend his funeral services. We could all recognize the deep affection in which BURNET MAYBANK was held by the people of South Carolina and of his native city of Charleston.

He will be greatly missed as long as any of us who serve in the Senate of the United States shall survive. He left his imprint upon this Chamber and upon the Members who served with him. To his family and to his colleagues we extend our deepest sympathy.

All of us on this side of the aisle will miss him as deeply and as sincerely as will any of his colleagues who sit on the other side of the aisle.

Mr. HILL. Mr. President, shocked indeed were we when the news of BURNET MAYBANK's death was flashed across the country. We knew that he had not been well and, in fact, sick and hospitalized at times during the past 2 years. But we little dreamed that the end was at hand. He was always so vital, so alert, so active, and so persistently on the job.

BURNET MAYBANK and I had been close friends almost since the day he first came to Washington to take his place in the Senate. During his service of 13 years our homes were in the same neighborhood. We were neighbors and our families were close. During all the hard and strenuous days of World War II we shared the ride back and forth to the Senate Office Building each morning and each evening.

BURNET MAYBANK was a gallant soul. He literally gave his life to the service of his people. He was city councilman and mayor of historic old Charleston, his native city. Then he was the devoted and distinguished Governor of his State, the first Charlestonian to be elected Governor since the War Between the States. His record as Governor was so outstanding in its accomplishments for South Carolina that the people promoted him to the Senate.

It was my privilege to sit by his side as a member of the old Senate Committee on Military Affairs, the Senate Committee on Armed Services, and the Senate Committee on Appropriations. I saw at firsthand his devotion to our country and its free institutions, and his deep concern for the rights, the happiness, and the welfare of the people.

BURNET MAYBANK's life is the story of exceptional ability, of rare knowledge of human nature, of generosity, of courage, of tireless effort, of dedication and of faith—and above all of loyalty. Loyalty to his family and his friends. He needed no assurances. He made no demands. He gave the utmost of his friendship. He stood steadfast and true, as fixed and constant as the North Star.

Loyalty to his State, its great traditions and proud history. His forebears had written much of that history, and no word or deed of his should profane it. Rather did he bring to it new honor and luster.

Loyalty to the people of his State. He could walk with kings, but he never lost the common touch. And his was ever the grateful heart, thankful to God and to the people who honored and favored him. His was the heart attuned with compassion, sympathy, and understanding for all people. He was the leader in the many battles for decent and better homes for people of every color, creed, and class. He fought that all men might have a fairer and a better opportunity, and that those who inhabited the land might enjoy its fruits, their rightful heritage.

Loyalty to his country. As chairman of the Senate Committee on Banking and Currency, chairman of the Joint Committee on Defense Production, and chairman of the Subcommittee on Independent Offices of the Appropriations Committee during the Korean war, with all the vexatious, exacting, and overwhelming problems, from price control to military defense, he gave his all. He was the soldier and the patriot, and the heavy and excruciating burdens took the toll that brought his untimely end. He gave his life in the cause of our country while the sun of his life was still high in the western sky.

No man in this body was more beloved of his colleagues than was BURNET MAYBANK. We loved him living. We love him now. There was no braver, manlier man.

As we pay our hearts' tribute to him, we remember his wonderful wife, his fine son, who has already started a career worthy of his father, and his two lovely daughters. We shall treasure all our days the privilege of the golden friendship and of the example of the life and character of BURNET MAYBANK, the friend, the patriot, the statesman, the great American.

Mr. CAPEHART. Mr. President, since last Thursday I have attended the funerals of three close friends in Indiana. I returned to the Senate Chamber today in order to be present at this memorial service.

When I learned of Senator MAYBANK's death, I traveled from Los Angeles to Charleston, S. C., so that I might attend his funeral.

I wish I had the ability to express adequately my feelings about Senator MAYBANK. There is an old saying that in order really to know a person one must talk with those who worked with him each and every day, not merely with those who associated with him only socially, who met him only at clubs, or at church. By talking with those who worked with him daily, one would really learn the true character of the man.

As a member of the Committee on Banking and Currency and the Joint Committee on Defense Production, I had the good fortune, privilege, and pleasure of working very closely with Senator MAYBANK for almost 11 years. He was the ranking Democrat on the Committee on Banking and Currency when I was chairman, and I was the ranking Republican during the past few years when he was chairman of the committee.

I have been associated with many persons in business and in politics, but I do not believe I have ever been associated with any one who was more highly regarded than was Senator MAYBANK. The reason was that Senator MAYBANK was perfectly frank, honest, and outspoken and he never hesitated to make clear where he stood, so that there could be no doubt about his position. He had the faculty of promoting teamwork and cooperation. Although he and I did not always agree, we worked together and were able to accomplish much as a result of our teamwork. Senator MAYBANK had great respect for every member of the committee over which he presided. It always was his purpose to do what was right, and he always tried to do what was right.

Senator MAYBANK was a man of ability and wisdom. He was an outstanding statesman. As we say in Indiana—and I think this is one of the highest tributes I can pay him—he was smart. He understood people and their problems. He worked hard and was enthusiastic about everything he did. He was a good businessman. During his life he accomplished much as an administrator, as governor of his great State, as mayor of his home city, and as a United States Senator.

BURNET MAYBANK had deep love for and pride in the members of his family. He was sincerely interested in their welfare, as he was in the welfare of every person in his great State of South Carolina, and in the welfare of the United States. He loved not only his home, but also his State and the American system of government.

It was a great experience for me to work with Senator MAYBANK as closely as I did, because in that way I really learned to know him; and, as I have said, one must work with a man in order to know him. Too often we are inclined to jump to conclusions concerning friends or acquaintances when we really do not know them. But when one can work with a man such as Senator MAYBANK for almost 11 years and be in almost daily contact with him, one acquires a deep love for the man.

As the years passed, my respect for Senator MAYBANK deepened, as did my regard for his ability and sincerity of purpose. I think this is the greatest compliment one can pay to another.

Senator MAYBANK was a loyal American. His death is a deep loss to me and to the Senate as a whole. We all know what a great loss has been sustained by his family, his home city of Charleston, and his beloved State of South Carolina. We in this body have lost a true friend.

Mr. President, we need more Burnie Maybanks in this world.

Mr. MARTIN of Pennsylvania. Mr. President, I count my association with our late distinguished colleague, BURNET MAYBANK, as one of the great privileges that have come to me as a Member of this body.

His untimely passing leaves me with a profound feeling of personal loss.

Senator MAYBANK was respected and honored on both sides of the aisle as a statesman who was guided in every thought and deed by the highest principles of patriotic Americanism. He served with distinction as a member of the Armed Forces in World War I. He served as Governor of his native State and as a member of the American Battle Monuments Commission. He served the Senate as an active and forceful chairman of the Banking and Currency Committee, and as a member of the Senate Appropriations Committee.

South Carolina and the Nation have suffered a severe loss in the death of Senator MAYBANK, and I join in extending my deepest sympathy to those near and dear to him.

Mr. ELLENDER. Mr. President, on August 19 of last year, the day before the Congress adjourned, I left Washington on an official visit abroad. It never dawned on me that death would claim two of my friends and neighbors in the Senate before my return. I well remember that on the afternoon before I departed, I stood at my desk in the Senate and suggested to my two neighboring colleagues, Senator Pat McCarran, of Nevada, who sat to my right, and Senator BURNET MAYBANK, of South Carolina, who sat to my immediate left, that they "take care of things for me" in my absence. Both wished me "bon voyage," and suggested that I be careful on the long voyage by airplane I was about to undertake.

I was in Libya, having breakfast at Wheelus Air Force Base when I learned of the passing of BURNET MAYBANK. My first sensation was of great shock; my second was the knowledge of deep loss and of consummate sorrow.

BURNET MAYBANK came to the Senate in 1941 to fill the unexpired term of James Byrnes. I came to know him well; I served with him on the Committee on Appropriations; I worked with him on many legislative problems, particularly those relating to housing. In that field he evidenced keen interest and a most sympathetic understanding of the problem.

He was a good friend and an able Senator. His arduous work on the Committee on Banking and Currency, his tedious work on the Senate Appropriations Committee, the wealth of constructive legislation which bears his name, all attest to the fact that BURNET MAYBANK served his State and his Nation with distinction.

Mr. President, BURNET MAYBANK came from a distinguished family. Some of the prominent characters portrayed in the famous novel Gone With the Wind could be traced to his ancestry. He began his career in public life in 1927 as a member of the City Council of Charleston, S. C., his home town. Eleven years later, he was elected Governor of his State. In 3 more years he had been elected to the United States Senate. At the time of his death he had been renominated without opposition for another full term. BURNET MAYBANK had never, in his full and illustrious career, known political defeat. Death came in the bloom of that career, and I know that all of us here today who have known him, and who have worked with him, feel deeply his loss. We who have the same philosophy of government have suffered a grievous blow, for the wise counsel he has provided, and the sage leadership he has offered, will be difficult to replace.

I wish to add my voice to the other voices which have been raised today in eulogy to BURNET MAYBANK—a devoted husband, a loving father, a fine man, an able Senator, but above all, a true gentleman, whose sense of honor and fair play offer all of us in this Chamber a standard which we could do well to follow.

Mr. EASTLAND. Mr. President, it is with a sense of deep sadness and heavy heart that I join with my colleagues, and his countless friends everywhere, in paying tribute to our late colleague and beloved friend, BURNET RHETT MAYBANK.

The great State of South Carolina has contributed many men of outstanding character, ability, and leadership to serve in positions of honor and trust in the National Government. None acquitted themselves more ably, or served with a greater sense of dignity and devotion to duty, than did Senator MAYBANK.

BURNET MAYBANK was rooted deep in the soil of South Carolina. His life was in keeping with her finest traditions. As a cotton exporter, he was an able man of business, and accumulated his fair share of worldly goods, but his great contribution to his fellow man is found in the simple phrase—a public servant. From 1927 he was continuously in public office, as alderman of the city of Charleston; mayor of Charleston from 1931 to 1938; Governor of South Carolina from 1939 to 1941; and finally, United States Senator, elected in 1941 to finish the unexpired term of the Honorable James F. Byrnes.

My intimate association with Senator MAYBANK started in 1943, when I returned to the Senate for my first elective term. To know him was to love him, and as the years passed and we fought many battles together, our devotion to each other became deep and abiding. To me, his passing has left a void that cannot be replaced.

Through the perilous years of war, it was the steady hand and clear head of Senator MAYBANK that framed the multiple and intricate legislation which was necessary to mobilize our civilian economy for the maximum degree of war effort. No more monumental task was ever accomplished than that performed by his Banking and Currency Committee, both during World War II and the Korean incident. For years he also served on the Armed Services Committee, thus encompassing both military and civilian effort. His arduous work and patriotic sacrifices during those periods of danger and strife must have been a strong contributory factor in his early demise.

His contributions to the economy of this Nation in the field of slum clearance, apartment construction, Federal aid for home building, and like legislation, have erected for him a lasting monument, and for his efforts the people of this Nation will be forever in his debt.

The great agricultural population of the Nation knew that in Senator MAYBANK they had a tried and true friend. He was always in the frontline in the fights for the farmers' welfare.

Mr. President, I could eulogize Senator MAYBANK at great length. But his life, as he lived it, is its own eulogy. Mere words cannot express the degree of his sterling worth and high-minded character. To me his loss is deep and personal. But his State, the South, and the Nation, as well as we who knew him so well, have been the gainers for his having lived. About him it can truly be said: "Well done, thou good and faithful servant."

Mr. SALTONSTALL. Mr. President, I should like to pay a brief tribute to a colleague whom I truly miss. BURNETT MAYBANK was my friend. We first met in 1920, at a wedding of a mutual friend in Flat Rock, N. C., where he spent his summers. We had a nice time together at that function. Then our ways parted until we were Governors of our respective States, and again we met at the Governors' Conferences over a period of years, and became fast friends.

When I came to the Senate in 1945, BURNET helped in every way he could to acquaint me with the procedure and the ways of operation of the Senate. During the past 10 years he and I served together on the Armed Services Committee and on the Appropriations Committee. In the latter we were respectively chairman and ranking minority

member of the Subcommittee on Independent Offices for the past 4 years, and as such we worked out a mutual understanding of the various problems before that subcommittee and the full Committee on Appropriations. We thought alike on many of the matters before the committee.

Always he was cooperative. Always he was helpful; and while we naturally disagreed at times on political philosophy and, as Senators from our respective States, necessarily differed on some questions that came before us, we never suffered a break in our personal relations, no matter how keen the political arguments became.

Like every other Member of the Senate, I trusted him. I liked him. He was always friendly. Many times we discussed our various children and their problems. During the last years of his life, he had a stepdaughter who married the son of a friend of mine in Massachusetts, so that brought him to our State.

The citizens of South Carolina may well take pardonable pride in choosing as their Governor, and then as their Senator, a man of BURNET MAYBANK'S standing. The people of the city of Charleston, the city which he called home, can truly consider him one of the first of its many fine citizens. His personality, his character, his unimpeachable integrity, and his loyalty to his colleagues, will be remembered in the United States Senate for many years to come. His public life was one of energy and service to the people of his State and to the people of the Nation. We shall always remember him as a friend, and we shall always respect him for his principles, for his high standing as a public servant, and, above all, for his love of country, in the full sense of that phrase.

At this hour, when we are thinking of him, of what he made of his life and of his public career, and of his love of his family and his friends, we can with full hearts extend our sympathy to his widow, his children, and his friends.

Mr. MCCLELLAN. Mr. President, I sincerely share, subscribe to, and associate myself with the very reverent and profound sentiments which have been and will be expressed by others here today, in eulogy and in memory of our distinguished, honored, and lamented colleague, BURNET MAYBANK.

At this hour, Mr. President, we pause from our pressing and arduous duties of state to pay well-earned and deserved tribute to one of our great Americans; one with whom it was our pleasure and privilege to labor and to associate in this body for a number of years; one who became known to us and esteemed by us for his real worth and magnificent qualities, which we so well recognized and so fondly cherished.

I have referred to the strenuous duties incumbent upon those who serve in this body because I am constrained to attribute his untimely passing to his unswerving devotion to duty and his indefatigable labors in performing the duties that rested upon him as a Member of the United States Senate.

He was dedicated to America; to the ideals and traditions of freedom, justice, and liberty; and to the preserving of the way of life we have established and maintained—a way of life unexcelled and unequaled in the annals of world history.

Mr. President, although I knew of him as governor of his State and as a United States Senator, I had never met him personally and it was not my pleasure and privilege to know him until I came to the Senate, some 12 years ago. It was then that our friendship began; and during the passing years, those ties were constantly strengthened, as my admiration and respect for him were increasingly enhanced as our associations became more constant and confiding, and as we labored together toward the same general goals and objectives in the legislative branch of the Government.

I first served with him for a brief time on the Banking and Currency Committee, and later for a number of years, until his death, I served with him on the Appropriations Committee. In his every act, in his every decision, there was reflected a consciousness of his sense of obligation and responsibility to the public trust which had been reposed in him.

He possessed deep and firm convictions. Once he had reached a decision on an issue involving a basic and fundamental principle, he was unswerving in the course he pursued. He was possessed of both the vision and the courage of a true statesman, and he applied these qualities unreservedly throughout his entire career of public service.

He had another notable capacity, that of developing strong and lasting reciprocal friendships. One could not know Senator MAYBANK without sensing the warmth and depth of his appreciation of his fellow man and his keen sense of fairness and justice toward all.

These, Mr. President, and many other sterling qualities commanded the admiration, respect, and esteem of us all.

Mr. President, my life has been greatly enriched by having known and having had the pleasure and privilege of being associated with and laboring with BURNET MAYBANK. The great loss the Nation has sustained in his passing is felt keenly by every Member of this body.

Mr. President, beyond the fields of labor, it was my opportunity and privilege to have had many social contacts with BURNET MAYBANK and his family. His family and mine have enjoyed many happy associations together and a warm friendship which has endeared them to us. Today we say to them that they have our deepest, heartfelt sympathy and prayers that they may be comforted and sustained.

Mr. CHAVEZ. Mr. President, I desire to associate myself with the remarks of my colleagues who today have paid and others who will pay tribute to a fine citizen and public servant, the late Senator BURNET R. MAYBANK, of South Carolina.

Mr. President, many years ago I read Sir Thomas Gray's Elegy Written in a Country Churchyard, wherein he said:

The boast of heraldry, the pomp of pow'r,
And all that beauty, all that wealth e'er gave,
Awaits alike th' inevitable hour.
The paths of glory lead but to the grave.

I am sure those who now are paying tribute to our late colleague do not believe that is the fate of Senator MAYBANK. His path did not lead only to the grave. I prefer to believe in the faith expressed by him, and so well known to the American people, especially to those of us of the South: "He is just going away."

I knew BURNET MAYBANK intimately and well for many, many years. I worked with him on committees. I traveled with him in many parts of the world. Whether in official work or in the everyday affairs of life, he was always an outstanding example of an American at his best, and at all times he was a perfect gentleman.

As a family man, as a father, as a husband, he was ever loving.

Today we can repeat the words of the bard of Avon, who, speaking of the dead king, said:

After life's fitful fever, he sleeps well.

Mr. President, I am positive and confident that every person who knew BURNET MAYBANK is today offering a prayer for him. May the Lord take care—as we know He will—of BURNET MAYBANK'S noble and fine family.

Mr. SCHOEPPEL. Mr. President, it was my rare privilege to meet and to know Senator MAYBANK but not until after I came to the United States Senate, for I did not have the opportunity of knowing him when he was chief executive of his great State. He served in the Senate during some interesting, and certainly some challenging years, as well as fruitful years, when many issues were contested. They were rewarding years for BURNET MAYBANK because he gave generously of himself and of his wisdom to meet the problems which arose.

I had the privilege of serving with him on the Banking and Currency Committee. It was there that association with him endeared him to me. There I came to know him as a man of ability, integrity, and fairness, a man of understanding, and of great tolerance toward all the views there expressed.

He has departed from this chamber and from the presence of all of us; but he has left indelibly imprinted on our memories the recollection of his sterling character, his unswerving loyalty and his devotion to principle, and to his country. We shall always cherish our association with him and the privilege we have had of serving here with him.

BURNET MAYBANK came from the Deep South. He was a great southerner, but yet he had a profound understanding not only of the problems of the South, but of the problems of the North, and of the burning issues of the day. He understood the positions which many of us took.

I join my colleagues in paying tribute to a man whom I learned to admire greatly in the short time I served with him. He has left his imprint here. His influence was directed toward a greater America. Those of us who served in the Senate with him are better because we were privileged to know BURNET MAYBANK. Our sympathy to his family and to his close associates will always be warm and vital.

Mr. WELKER. Mr. President, I wish I could speak with the eloquence of my distinguished colleagues about BURNET MAYBANK who was my close personal friend and whom I truly loved.

The circumstances which brought me the news of his tragic death were sorrowful, indeed. At that time I was living in the high mountains of Idaho. Newspapers were late. I rose early one morning to go out and get my newspaper. Then, for the first time, I read that Senator BURNET MAYBANK would be buried in Charleston, S. C., upon that very day.

I confess that my heart was heavy. My family had not yet risen. I am proud to say that I went back to my room and penned in longhand a letter to his wonderful widow and her children, expressing my deep sorrow at the loss of this great American.

It is difficult to understand why such a great American, such a great statesman, regardless of political affiliation, should be stricken down in the full flower of his service of his country.

BURNET MAYBANK played the game squarely and above board. He never stooped to low partisan politics. His vote was dedicated to that which was best for his country. No one needs to tell the American people the rich heritage which he left to this great Republic because of his devoted and patriotic public service. I admired him not only as a close personal friend, but because he was a fine Christian gentleman. He was among the foremost of the lay leaders of the church he served so well. He was a great Governor of the State of South Carolina. Prior to that he served his country with distinction as a soldier in World War I.

South Carolina and the Nation have lost a magnificent public servant. The vacant chair which he left in the United States Senate will always remain a challenge to those who follow in his footsteps.

As I say farewell to this great man, whom I know God has taken into His loving hands, I am confident He is watching over us every day. He asked us first, last, and always to be Americans, regardless of political affiliations.

In my opinion—and this conviction I shall hold as long as I shall live—Senator MAYBANK is not dead. He is just away.

Mr. HOLLAND. Mr. President, the death of BURNET R. MAYBANK, late a Senator from South Carolina, removed from the Senate one of the most colorful and lovable personages who have been Senators during the period of my acquaintance with Members of the Senate. I met Senator MAYBANK in July 1941, when we were serving as Governors of our respective States, during our attendance at the National Governors' Conference in Boston, Mass., where we were the guests of the then Governor of Massachusetts, now the distinguished senior Senator from that Commonwealth, LEVERETT SALTONSTALL. Mrs. Holland and I were delighted to know Governor and Mrs. Maybank, who had with them one of their lovely daughters, Roberta. The friendship between our two families has grown ever warmer since that date, 14 years ago. Senator MAYBANK and I quickly discovered that we were members of the same college fraternity, in which both of us continued to take an active interest, which made for an added strong bond between us.

Senator MAYBANK was already serving as senior Senator from his State, with quite important assignments, when I came to the Senate, and he found frequent occasions to assist me in various friendly ways, especially during my early months and years in the Senate. I shall always gratefully remember that consideration. He had a contagious sense of humor, which frequently evidenced itself at otherwise serious moments in such a way as to lighten the burden of all Senators and preserve and enhance the kindly personal relations among all of us, which were to him a matter of course, and to which he obviously attached very great importance. I do not know any Senator who had more friends in the Senate, or whose friends found warmer pleasure in the opportunity to do things for him and for causes which were dear to him.

I am completely satisfied that his interest in the housing problems of citizens of modest income played a very great part in the passage of important legislation in that field, which was handled by the Committee on Banking and Currency, on which he served for many years so effectively, either as its chairman or as ranking minority member.

He had served with distinction as mayor of Charleston during a large part of the depression, and I remember that he found great satisfaction in the knowledge that he had been able, during those difficult days, to secure the construction of badly needed public housing for some of his humbler fellow citizens. He was proud that much of this housing had been secured through local financing rather than by Federal assistance.

One of his fields of greatest service was the cotton industry, including in his active interest, as he did, the problems of the growers and all other groups in that great industry. It is my recollection that he told me that his people had been exporters of cotton from Charleston for over three generations, and his family have been cotton planters for at least that long.

I believe he was the first and only citizen of Charleston to be elected Governor of his State since the War Between the States. I know that he was recognized by his fellow citizens as the very personification of the spirit and traditions of historic Charleston, which has played such an important part in the shaping of the growth and life of our Nation throughout all the years of our history.

He was particularly active and effective in attending to his important duties as a member of the Senate Appropriations Committee, on which he rendered outstanding service to our entire Nation.

We had the pleasure of visiting him and his family at their beautiful and well-loved summer home at Flat Rock, N. C., which was established by his grandfather in his search for restored health and strength at the end of the War Between the States.

Senator MAYBANK was deeply imbued with the traditions of his family, his city, his State, and his beloved Southland, but, in addition and above all, he was a truly great and loyal American who served his country well and played a large part in helping to build national unity and national strength.

It was an inspiration to know BURNET MAYBANK and to come within the influence of his hospitable, good-humored, friendly, and always lovable personality. The vast concourse of his fellow citizens who attended the funeral obsequies at historic Charleston last September—people of high and low estate whose deep personal affection for BURNET MAYBANK showed clearly in their grief-stricken faces—spoke eloquently of the tender place which he held in their hearts—and those of us who could be present came away with the fullest possible impression that his loss was a tragic personal blow to his neighbors who knew him best.

His passing was a great loss to his State and to his Nation. I miss him greatly, both personally and officially. Mrs. Holland and I extend our deepest sympathy to Mrs. Maybank and the children, who, in their great sorrow, have every right to be exceedingly proud of the splendid heritage which he left to them.

Mr. BRIDGES. Mr. President, to each of us during our lives come times when we must perform certain duties which are most painful to us. One such occasion faces me today when the Senate is paying its respects to the memory of my very good friend and colleague, the late BURNET RHETT MAYBANK.

I first met BURNET MAYBANK when he served as mayor of his home city, Charleston. My close personal friendship with him began in 1941, when he first came to the Senate. It ripened rapidly after he was appointed to the Committee on Appropriations, on December 15, 1941. During the years of close working association with him, my respect and affection for him grew until I came to regard him as a real friend in every sense of the word.

One of Senator MAYBANK's outstanding characteristics was his profound sense of duty to the Nation and to the great State of South Carolina, which he in part so ably represented. Despite the increased responsibilities which came to him, he was ever willing to devote himself and his time to the duties which he shouldered so effectively. He gave himself unstintingly to the role of chairman of the Senate Banking and Currency Committee, yet he worked just as hard and just as effectively on the Senate Appropriations Committee. In 1949 and 1950, he was chairman of the Treasury-Post Office Subcommittee, and in 1951 and 1952 he carried on the arduous tasks of the chairmanship of the Independent Offices Subcommittee. It was then that I first saw the type of work he did and the kind of leadership he rendered.

In so many ways, BURNET MAYBANK typified the essential qualities of a gentleman in high places. That is unusual in any man. At all times, even in the very heat of debate—and he was a good

debater and he liked debate—he was always courteous and willing to listen to both sides of the question. He never compromised with his conscience, but he was always willing to cooperate if possible. He was a determined and courageous fighter, but he never took unfair advantage of an opponent.

He worked hard, but his own accomplishments and his unfailing sense of good humor invariably lightened the tasks of his colleagues. Above all, to my mind, it was his inborn sincerity and decency which instilled in all of us a deep sense of respect.

BURNET MAYBANK's untimely death has removed from our ranks a stalwart who will be hard to replace. However, his record and the principles he stood for will remain always to guide us throughout the future. We miss him, and in this hour our thoughts are with his loved ones, to whom we extend our deepest sympathy.

Mr. YOUNG. Mr. President, the late Senator BURNET MAYBANK was one of the first Members of the United States Senate I met when I came here 10 years ago this month.

He was an easy person to meet. Like all great men, he was an easy person to talk to. He was kindly and likable. He was a very able Senator, and few, if any, Members of the Senate today have their names attached to more important legislation than the late Senator BURNET MAYBANK.

He was one of the best friends agriculture ever had. Senator MAYBANK believed in the cause of the farmers and never missed an opportunity to try to help them.

Senator MAYBANK made a great many friends, largely because of his kindly and sincere manner. He was an honest man and an honorable Senator. The United States Senate has lost a very able Member, and all of us a most cherished friend.

Mr. RUSSELL. Mr. President, I first met the late lamented BURNET RHETT MAYBANK in Savannah, Ga., when we were both very young men. I cannot recall the exact year. It must have been about the year 1926, because I remember he told me then that he was a candidate for a place on the aldermanic board of his home city, historic Charleston, S. C. The year, the month or the day do not come to mind now, but I remember the occasion very well.

It is rarely that a person meets a man for the first time and then has a feeling that he has known him always. I have met only 2 or 3 people, as I recall, about whom I had such a feeling. I felt that BURNET MAYBANK and I understood each other completely the first time we met, when we were very young men. We were from neighboring States. I, therefore, had brief contacts with him from time to time as he pursued his career in South Carolina and I pursued mine in the State of Georgia.

I remember well when a large number of Members of the Congress and the Vice President of the United States visited the city of Charleston on the occasion of what I believe was called an azalea festival when BURNET MAYBANK was mayor of the city of Charleston. He was always a gracious man, and he was a most gracious host at that time. The Members of the Congress who were in the group presented him with a piece of silver as a token of their appreciation of the wonderful hospitality which was extended to us. It was my high privilege then, Mr. President, to be asked to make the brief presentation speech when a silver platter was given to the mayor of the city of Charleston. I do not recall what I said, but I do remember that I predicted then that the low country of South Carolina would again provide the State with a Governor, and that he would be BURNET MAYBANK. I also expressed the hope that I would meet with him in the Senate, and voiced the belief that I would serve with him if I were able to remain in the Senate long enough.

For several years we served together in this body, and the friendship which was already fast became as intimate and close as any friendship that can exist between men. It was one of the finest frinedships I have ever known. I came to love him as Jonathan loved David, and I know from countless acts rather than from words that he was my devoted friend. I could never find words to express my feelings regarding our companionship and relationship in this body.

BURNET MAYBANK was a remarkable man, Mr. President. He came of an old and aristocratic family. He was a gentleman to the manner born. But over and beyond that, BURNET MAYBANK was a gentleman by instinct. It was not necessary for him to point to his heritage, because within himself he had every instinct of gentility and of a real man. He was both an aristocrat and a democrat. I refer not only to his party affiliations, but to his relations with the people among whom he lived and whom he served in this body. I have never known a man who more completely held and kept the common touch than did BURNET MAYBANK.

He had a fine aptitude and a natural capacity for public service. From a local leader he became a State leader. At the time of his untimely passing, when the hand of death was laid upon him, he was recognized as a great national leader. In every position in which he ever served in a public capacity, as alderman, as mayor, as governor of the great State of South Carolina, and as a Senator of the United States, he demonstrated a prodigious capacity for work.

I have served in legislative bodies, Mr. President, for 33 years, for 10 years as a member of my State Assembly, and for 23 years in this body. I have served with hundreds of men in legislative work, but I have never known a more conscientious man or one who was more consecrated to the public service than was BURNET MAYBANK. He had every attribute of real greatness. He had all the hallmarks we look for when we undertake to define and to describe a real man.

He was tolerant. He could differ with others widely and vigorously, not only in the Senate, but in his local political relations within his State, but he did so without bitterness. I never heard him make bitter statements about any of those who ever opposed him in a political campaign or on the floor of the Senate in debate.

He was a courageous man. He had the personal courage of a man who reacts to personal dangers. He had the kind of courage that permitted him to stand by the side of a friend when all others had left, and he had the kind of courage of conviction in political matters which, for lack of a better definition, we call intellectual honesty.

In all his relations with his family and in his personal relations with his friends he was as gentle as a woman, but in defending the things in which he believed he was as brave as a Numidian lion. He had real character. He was loyal to his friends, to his State, to his Nation, and to the Senate as a great legislative body. He understood the Senate of the United States. He had genuine character. There is no higher tribute to be paid any man, in my opinion, Mr. President, than to say he was incapable of little thoughts or petty acts.

He was greatly beloved on both sides of the aisle. I believe every Member of the Senate of the United States with whom he served over a period of almost 14 years had a real affection for him.

Mr. President, I sorrow with the people of South Carolina. They have lost one who stands high in the galaxy of great statesmen whom, from its infancy, they have given this country and who have contributed so notably to its upbuilding and progress. I grieve with his personal friends and with the members of his family. I grieve with them in the passing of one whom I deeply loved. It is difficult to realize that I cannot look down to his seat and see him there. I hear at times the echo of the voice which we all knew so well. I can only say I shall miss him and that the Senate of the United States will never be the same to me without the presence of BURNET MAYBANK.

Mr. ERVIN. Mr. President, when the sad tidings came that Senator MAYBANK had answered the last summons, North Carolina sorrowed with her sister State, South Carolina, in the irreparable loss suffered by her and the Nation. It was altogether natural that this should be so. I do not believe there are any two States in the Union which feel more close to each other than do North Carolina and South Carolina. There are many historic ties between these two sister States. They have stood together in times which tried men's souls. The people of the two States are bound together by personal ties as numerous as the sands of the sea. Moreover, BURNET MAYBANK was, in a sense, an adopted son of North Carolina, because he loved to spend his vacations in his summer home in the beautiful mountains of Henderson County, in my State.

While I did not have an opportunity to know BURNET MAYBANK well until I came to the Senate last June, I had followed his career in the service of his State and the Nation throughout the years with increasing admiration. I was deeply impressed, during the time I sat in the Senate with him, by three qualities which he displayed in a striking manner: The intellectual integrity which he brought to bear upon the problems

which confronted him as a Senator; the great devotion which he manifested to the causes in which he believed; and the unsurpassed friendliness with which he treated those who had the privilege of coming into contact with him.

Since BURNET MAYBANK has taken his departure from this historic Chamber, we who were permitted to enjoy the good fortune of sitting beside him can appreciate, with increased poignancy, the words of the ancient Persian poet:

For some we loved—the loveliest and the best,
That from his vintage rolling time hath prest,
Have drunk their cup a round or two before,
And one by one crept silently to rest.

Mr. KILGORE. Mr. President, it was my privilege to serve with BURNET MAYBANK during the entire period of his service in the United States Senate.

I was in the first year of my first term when Senator MAYBANK, then a young man of 42, was first elected to the Senate to fill the unexpired term of James F. Byrnes. When Senator MAYBANK entered upon his senatorial duties, he had already made a distinguished record of public service as mayor of his native Charleston and as Governor of South Carolina, and he brought to the Senate an ability, a capacity for work, and a devotion to principle which never faltered.

I first met Senator MAYBANK before he came to the Senate, while he was serving as Governor, when I attended the funeral of Judge Alva Moore Lumpkin, whom Governor Maybank had appointed to fill the unexpired term of Senator Byrnes, but who died shortly after he took his place in the Senate.

During the 1940's, before the reorganization of the committee structure of the Congress, I served with Senator MAYBANK on the old Senate Committee on Mines and Mining and on the Committee on Military Affairs, and there I came to know him intimately. Later we served together for a time on the Committee on Armed Services, and from 1949 until his death we served together on the Committee on Appropriations.

Senator MAYBANK was a public servant in the tradition of Jefferson. He shared Jefferson's belief in the wisdom of the people, and like Jefferson he reposed particular confidence in the wisdom of the American farmer. Jefferson's remark that "Those who labor in the earth are the chosen people of God, if ever he had a chosen people, whose breasts he has made his peculiar deposit for substantial virtue," was echoed by Senator MAYBANK on the floor of the Senate 2 weeks before his death, when he said in debate on the farm bill:

The farmer does more thinking than the city folks, who are continually going to the moving-picture theaters or somewhere else. The farmer stays home and thinks, until election day.

It was my privilege also to sit beside Senator MAYBANK in the Chamber for a great many years. While on occasions we may have disagreed, he was always absolutely honest with me, as I tried to be honest with him. For that reason, I had sincere respect and regard for him. BURNET MAYBANK was more like a brother to me than he was a Senator. His passing leaves a void in my life in the Senate. For that reason, it can be understood how deeply I feel about his death.

Senator MAYBANK himself had in full measure the wisdom and the virtue which he saw in agrarian democracy. The Senate of the United States is smaller without BURNET MAYBANK. The State of South Carolina has suffered a severe loss by his death.

We who associated with Senator MAYBANK shall treasure, as will his family, our feeling of trust and confidence in him.

While BURNET MAYBANK might have felt differently than I did on various questions, he always understood my feelings, and was always completely honest. That is a virtue which, in my humble opinion, makes of a man a true representative of his people as well as a sincere Member of this body.

Mr. BARKLEY. Mr. President, it is strange how sometimes casual, isolated episodes weave themselves into a fabric of thought or human conduct. Last night after retiring I turned on a bedside radio, as is my custom, and found myself listening to the Bing Crosby program. Instead of the usual musical selections, the program consisted of a discussion of 2 new biographies, 1 of Sir Walter Scott, and 1 of Alexander Dumas. Very interesting commentaries were given with respect to both men.

My thoughts returned to 2 visits to Scotland which I have made in recent years, to 2 drives from Edinburgh to Abbotsford, which was the home of Sir Walter Scott, and to 2 trips from his home to Melrose Abbey, where his remains now lie. I was told that over that road for years it was Sir Walter Scott's habit to drive a span of horses, and that when he reached a certain hillside or highland upon the road he always stopped to look at a very beautiful scene which to him never grew stale.

The same horses which had drawn him for years over that highway drew his hearse from Abbotsford to Melrose Abbey; and when they reached the identical spot on that Scotland highway, the horses stopped as if to give Sir Walter another chance to have a final view of the scene which he loved.

Today our legislative carriage pauses. The team that draws us on the journey which will finally terminate at some Melrose Abbey stops as if to give BURNET MAYBANK another chance to view the scene in which he worked and which he loved.

It is difficult to speak of the friendship that existed between Senator MAYBANK and me. We served for many years on the Committee on Banking and Currency. Because of the illness of Senator Wagner, who was chairman, it fell to my lot to be acting chairman of the committee for many years during Senator MAYBANK's service upon the committee. During that time and that service, and partly, perhaps, because he had married an outstanding Kentuckian who was socially and politically connected with the history of my State, we formed a very close and abiding personal friendship, and I contracted for him at that time a profound admiration, not only for his ability and for his industry but for his deep understanding.

Later he became the chairman of the committee, and was chairman of it for a good many years while I presided over this distinguished body. I often said then what I repeat today—that he was one of the ablest and most efficient chairmen of any committee who ever served in the United States Senate.

He had all the qualities which have been so eloquently described in the Senate today. He could walk with kings and never lose the common touch. He could walk with men in the common walks of life and never lose his appreciation of the value and the contribution of those who occupied a lower stratum of human society.

It seems really a pity that men of such charm, personality, ability, devotion, and affection should die at any time, but particularly that they should die in the prime of life.

So I utter these few words in honor of a great Senator, a great South Carolinian, but even beyond and above that, a great American, which term has become sort of hackneyed, but which, in the case of BURNET MAYBANK, fulfills all the implications that such a description may have in application to a human being.

As I have come back to the Senate, I miss many of my former colleagues, but none more greatly and more grievously than two whom I shall mention, Clyde Hoey, of North Carolina, on whose behalf I understand memorial services have already been held, and BURNET MAYBANK, of South Carolina. As long as I shall live I shall cherish the memory of those two great American statesmen and two warm, fine friends, and I hope that today, like Sir Walter Scott, on the way from Abbottsford to Melrose Abbey, as the spirit of BURNET MAYBANK looks down from the battlements of heaven, he may catch a hallowed view of the scene where he worked and which he loved.

Mr. FREAR. Mr. President, through the relentless passage of time, we in this Chamber have witnessed the departure of a number of distinguished and able colleagues. It may be truly said that most, if not all, of these men have been taken from us at a time when their ability and capable guidance of national and international affairs could ill-afford to be lost. Most assuredly was this true of our late associate from South Carolina.

I had the privilege of counting Senator MAYBANK as one of my close personal friends. We served together on the Committee on Banking and Currency for 6 years, during 4 of which he held the position of chairman. I am sure that no one who was a member of that committee or who appeared before it during the chairmanship of Senator MAYBANK would fail to acknowledge the complete fairness and impartiality with which he administered the functions of the committee. It was always an interesting, stimulating, and pleasant experience to observe Senator MAYBANK in the role of presiding officer at committee sessions.

His colorful personality is remembered with affection by all who knew him.

In addition to our association in the Senate, I have had the opportunity of visiting Senator MAYBANK's great State of South Carolina on several occasions in company with him on committee assignments. It was notably obvious that the people of Charleston, and, for that matter, of all parts of the State, were genuinely and sincerely fond of the man who had served them with such boundless enthusiasm and energy as mayor of his home town, as Governor and as a leading Member of the United States Senate.

Mr. President, while I should like to say many things at this time, I do not believe that words can compensate for the loss which this body has sustained as a result of Senator MAYBANK's death.

I should merely like to add that the recollection of our work together over a period of 6 years will ever be remembered by me as one of the most rewarding experiences of my life.

To the Senator's family and to the young men from South Carolina whom he brought here for his personal staff and for his committees, I again extend deepest sympathy.

Mr. SYMINGTON. Mr. President, it was my privilege first to meet Senator BURNET MAYBANK when I came into Government service some 10 years ago. At that time I knew very little about the operations of the Government. Senator MAYBANK, a Member of this great body was the one to whom I reported with respect to the operations of the Surplus Property Board. Almost immediately I came to know him as a truly outstanding and patriotic American. In the following years of our friendship he never once said anything that was little; he never once committed a small act.

I had the honor over the years to get to know him better, and also his gracious and lovely lady. I visited in South Carolina with him, and he did me the honor to visit me in Missouri.

The more I saw BURNET MAYBANK, the more I listened to him, the more I understood him, the more I felt in my own mind and heart how great this legislative body must be to produce men of his caliber, and how honored it must be to have him as a Member.

He has left us now. To me the Senate will never be the same without his blessed character and personality. I loved him and respected him.

To his wonderful wife, and to his fine children, I express my deepest sympathy, and I also express the same sympathy to his great State.

Mr. NEELY. Mr. President—

Whether at Naishapur or Babylon,
Whether the cup with sweet or bitter run,
The wine of life keeps oozing drop by drop,
The leaves of life keep falling one by one.

Another cherished leaf has fallen from the Senate's ceaselessly changing tree of life. Once more the senatorial silver cord has been loosed, the golden bowl broken, and the pitcher broken at the fountain and the mourners go about the streets. In the Senate we weep for the beloved departed BURNET MAYBANK as Rachel wept in Rama for her children and would not be comforted because they were not.

Senator MAYBANK was a masterful debater, an outstanding statesman, and a distinguished public official who knew no dictator but his conscience, no guide but his judgment, and no purpose but to serve his State, his country, and his God. While he was on the pinnacle of political and official fame, in the prime of mature manhood, while every breeze was bringing him promises of a long continuation of his boundless service and brilliant success, he was abruptly summoned from a home of comfort, culture, and love to that mysterious realm from whose bourn no traveler ever returns. Without a protest, a murmur, or a moan, he passed from the restless land of the living into the silent land of the dead.

He was a veteran of the First World War. He was successively an alderman of Charleston, and the mayor, chairman of South Carolina's Public Service Authority, and Governor of South Carolina. He received important appointments from both President Roosevelt and President Truman. In 1941 he was elected United States Senator to complete an unexpired term, and was reelected to the Senate in 1942 and again in 1948.

Political history attests, and the people of South Carolina, by recorded vote, repeatedly proclaimed that BURNET MAYBANK was a preeminent patriot of spotless character and stainless reputation, and that he was a worthy successor of such famous South Carolinians as John C. Calhoun, Wade Hampton, and Robert Y. Hayne.

He symbolized the fortitude, glamor, and glory of the Old South. He typified the progress, goodness, and greatness of the South that is new.

In the Senate none knew "Burnie" but to love him, none named him but to praise. It seems but yesterday that he was with us, endowed with joyous life and peace and sweet content. It seems but an hour ago that our hearts were thrilled with the eloquence of his words and the logic of his argumentation. But now we call his name in vain. From his lips an answer never more will come. And in the hush that pervades the sanctuary of our dead, we realize that this beloved, faithful friend has sailed that surging, sad, and solemn sea which separates the narrow shores of time from the boundless kingdom of eternity. He has passed the limits of earthly vision. His shadowy form cannot be seen through the illusions of love, the telescopes of science, or the tears of grief.

On occasions such as this we are haunted by the demon of skepticism and despair, and we ask anew the world-old question propounded by the man of Uz, "If a man die, shall he live again?" But unlike the afflicted patriarch, we seek no refuge either in silence or submission. We simply turn from this perplexing question of the Old Testament to find it answered in the New by Him who came 15 centuries after Job, and said: "Be thou faithful unto death, and I will give thee a crown of life."

Thanks to the hallowed hope that springs eternal in the Christian breast, we believe that the separation from our beloved one is but for a night, and that joy cometh in the morning. A divinity within whispers with still small voice in the listening ear of love: "The grave is not the end of all."

While our hearts are filled with grief and our eyes are dimmed with tears, thoughts of the last bitter hour come like a blight over our spirits; but even now, when earthly help and sympathy seem vain, we look beyond the cloud that hangs above us like a pall, and there, through faith, we see the star of hope still shining on. In the lustrous light of that constant star, we read the assuring promise of the Saviour of the world: "I am the resurrection and the life; he that believeth in Me, though he were dead, yet shall he live; and whosoever liveth and believeth in Me shall never die." In this promise we put our trust. While dogmas perish and creeds crumble, while agnosticism decays and atheism dies, we shall continue to lean upon the everlasting arm, believing that the twilight here is but the dawn of a grander day upon some other shore; believing that the feeble flame that flickers here for a little while will at last leap into a bright and shining light when the spirit of man has winged its flight back to Him that gave it birth. God pity the man who doubts the existence of another life in another land—

Who hopeless lays his dead away,
Nor looks to see the breaking day
Across the mournful marbles play;
Who hath not learned in hours of faith
The truth, to flesh and sense unknown,
That life is ever Lord of Death,
And love can never lose its own.

Fortunately for us, an unbeliever such as this, if such there be, is not with those who mourn with us today.

No one knows, nor would it be well to know, what takes place between the great Creator and His created in the last sad moment of life on earth. But we do know beyond the peradventure of a doubt that the dying thief, while suffering on the cross, received absolution from his sins and was promised a triumphant entrance into Paradise with the Saviour of the world.

It is our fervent hope and belief that the same unfailing mercy, the same loving kindness and the same boundless charity that gave to the malefactor a heritage in that house not made with hands, have been extended to Senator MAYBANK, and that he has been joyously admitted into the kingdom of Heaven. Let us—

No farther seek his merits to disclose,
Or draw his frailties from their dread abode,
(There they alike in trembling hope repose)
The bosom of his Father, and his God.

From this memorial exercise, the living should learn anew a lesson that is as old as sacred history. The lesson is this: "It is better to go to the house of mourning than to go to the house of feasting; for that is the end of all men; and the living will lay it to his heart."

While we are busily engaged in weaving our names into the tapestry of private fortune and public fame, and while we are eagerly endeavoring to lay up for ourselves treasures upon earth, let us also make timely preparation

for the coming of that inevitable hour in which every man must surrender his own soul. May we not be unmindful of the fact that death, "with icy hand that never tires and sickle keen that never turns its edge," comes nearer and nearer to everyone with every fleeting breath; that it comes indifferently "as a thief in the dead of night or as a royal guest at the blaze of noon." Let us bear this well in mind, not that our days may be consumed with impotent grief or our lives shrouded with dispiriting gloom, but rather that we may be up and doing while opportunity's sun still shines, for the night cometh soon when no man can work. Henceforth let us labor in the Master's vineyard, with renewed energy and increasing zeal. With abiding faith that everything in this vast universe was designed by an Unerring Architect for some ultimate good, and that all who seriously strive shall eventually wear perfection's starry crown, let us emulate the illustrious "BURNIE" MAYBANK'S shining example by going forth with hope in our hearts and courage in our breasts to fight the good fight, to finish our course and unqualifiedly keep the faith. And

When Earth's last picture is painted, and the tubes are twisted and dried,
When the oldest colors have faded, and the youngest critic has died,
We shall rest, and, faith, we shall need it—lie down for an aeon or two
Till the Master of All Good Painters shall set us to work anew!

And those that were good shall be happy; they shall sit in a golden chair;
They shall splash at a ten-league canvas with brushes of comets' hair;
They shall find real saints to draw from—Magdalene, Peter, and Paul;
They shall work for an age at a sitting and never be tired at all!

And only the Master shall praise us, and only the Master shall blame;
And no one shall work for money, and no one shall work for fame;
But each for the joy of the doing, and each, in his separate star,
Shall draw the Thing as he sees It for the God of Things as They Are!

Mr. DANIEL. Mr. President, the junior Senator from Texas did not know BURNIE MAYBANK either as long or as intimately as did other Senators who have spoken today in tribute to his memory. However, in the short period of 2 years as his colleague I found him to be a distinguished statesman, a Christian gentleman, and a true friend.

In 1953 Senator MAYBANK was one of the first Members of this body to welcome me as a freshman Senator. He made it a point to be present during my maiden speech, and in this and in many other ways he indicated his friendly interest in this new Member of the Senate.

On St. Patrick's Day in 1953 Senator MAYBANK invited me to speak at the annual banquet of the Hibernian Society in his home city of Charleston. It was there, in his home city, that I saw at firsthand the love of this man not only for the Irish, but for all his fellow men. It was there, as his guest, that I observed at firsthand the deep love of this distinguished statesman for his wonderful family, his beloved city, and his native State.

Above all, Mr. President, it was there, in Charleston, that I saw at first hand the love and esteem which the people of South Carolina held for BURNIE MAYBANK. Only they and his family loved and respected him more than did we, his colleagues in the Senate.

The privilege of knowing BURNIE MAYBANK is one of the rich rewards which have come to me as a Member of the United States Senate. I join my colleagues in this tribute, and in heartfelt sympathy for his family and for the people of South Carolina.

Mr. LEHMAN. Mr. President, last summer the Senate lost one of its most useful, most respected, and most beloved Members, Senator BURNET MAYBANK, of South Carolina. I am very proud of the privilege of joining in this heartfelt tribute to a great Senator and a great American.

I was honored by Senator MAYBANK'S friendship for more than 15 years. I met him first in Albany in 1939, when he and his family attended the governors' conference, held that year in New York State. His children were about the age of some of my children, so we had the pleasure and privilege of seeing a great deal of the family during their stay in Albany.

When I came to Washington 6 years ago he was one of the first to greet me and to offer his assistance. His encouragement and help were invaluable. I shall always be deeply grateful to him.

I can vouch for the fact that he was one of the hardest-working men in the Senate. Throughout the time of my service here my offices were across the hall from his. I saw him in operation. I know the long hours he worked. I can testify to the fact that night after night the lights in his office shone until well toward morning.

I had the privilege of serving on the Banking and Currency Committee with him for several years. I came to respect deeply his expert knowledge and interest in housing, and in the many other activities of that very important committee.

I shall not talk about his accomplishments in politics in his own State or in the Senate. I would rather say a few words about my estimate of BURNET MAYBANK as a person. There is no question that he was a man of rigid and unbending integrity and character, and of complete sincerity. We always knew where BURNET MAYBANK stood on any important issue. He never hesitated for a moment to express himself frankly and forcefully upon issues that affected his State or the Nation, and to fight for the principles to which he was devoted. He was completely frank and honest in his estimate of people. He was either for you or against you; and yet I do not believe that he ever deliberately sought to hurt or punish anyone in the world. He was always punctilious, fair, and courteous in his relationships, just, and without rancor.

He was an impulsive man, and a very friendly man. My estimate of him was that he was also a very shy and sensitive man. He gave his respect and his affection to many people, but only when he thought they were worthy of his trust. Above all things, no man I have ever known was motivated by a fiercer devotion to his State and to his Nation than was BURNET MAYBANK.

He is greatly missed in the Senate, and we shall remember him for the rest of our lives. I have the deepest sympathy for his devoted family, to whom he meant so much. We in the Senate have lost a real friend—friend for whom we had deep affection—and the Senate as a whole has lost one of its most valuable and most beloved Members. The country has lost a devoted and loyal public servant.

Mr. MORSE. Mr. President, in paying tribute to the memory of our late colleague, Senator BURNET RHETT MAYBANK, of South Carolina, each one of us understands the inadequacy of words in praising the life of a great and good man. The divine secret of life and death will be forever wordless.

When I became a Member of the Senate and made the acquaintance of Senator MAYBANK, from the very outset of our association I found him to be considerate, kind, and fair in all his dealings with his fellow Senators. Always he was fair and highly professional in his relationship with Senators with whom he found himself in disagreement on an issue. He made a memorable record in the United States Senate for his State and for all America.

Especially am I grateful to Senator MAYBANK for his understanding and cooperative attitude in dealing with the problems of the Pacific Northwest. His interest in the maximum development of our national resources was not confined to his native South Carolina, but reached out to all other areas of the Nation. He once said, "No government ever went broke developing for the people their own resources."

Senator MAYBANK was a devout believer in human values, as well as in property values. At the outset of his political career he resisted the lure to join the swelling stream of able young southerners seeking fortune in other sections of the country. In 1937 he refused a Presidential appointment to the Federal Power Commission. He preferred the uncertainty of a gubernatorial race. All his life he placed a high premium on human needs. There is no doubt in my mind that his untimely death on September 1, 1954, was hastened by his untiring devotion to his Nation's needs.

To his wonderful family I extend my sincere sympathy. I pray they may find some comfort in the fact that his public record will remain a living memorial.

The State of South Carolina, the United States Senate, and all America have lost a dedicated servant.

Thanks be to God that such men have been
Although they are no more.

Mr. HUMPHREY. Mr. President, the moving eulogies being paid to the memory and the public service of our beloved friend, Senator BURNET MAYBANK, are but a continuing testimonial to the private feelings of fellowship and friendship and affection that each of us has felt throughout the years for this wonderful man.

I wish the family of Senator MAYBANK to know that what has been said on the

floor of the Senate during the past few hours is but a continuation of the kind and sincere expressions of individual Members of the Senate throughout the years.

Senator MAYBANK made a distinguished record of public service which was noteworthy for devotion to his country and to the people whom he so brilliantly and ably represented.

It is always fitting and proper to note that in the life of Senator MAYBANK there was a kind of awareness of the vital needs of the people, not only of his own State, but of the Nation as a whole.

We have heard references to Senator MAYBANK'S devoted patriotism; but his patriotism went far beyond what is generally described as patriotic devotion. His was the patriotism of good works.

No citizen of this Nation should be unmindful of the splendid work and achievements of Senator MAYBANK in the field of housing—not only housing for those who were more fortunate, but a shelter and home for those who were less fortunate. This beloved friend of ours was interested in "the least of these." He worked in their behalf. Senator MAYBANK was a friend of the farmer—the small farmer, the family farmer. He was the friend of the kind of agriculture in this country that builds for a strong society, both morally and economically. His record of achievement in the Senate in behalf of agriculture is second to none.

Nor can I forget Senator MAYBANK as one who was always willing to lend his energies and talents—and great they were—in the field of social welfare. He was interested in the infirmities which always plague mankind, and to the dedication of the resources of our country toward lifting those burdens.

I like to remember Senator MAYBANK by the affectionate term by which so many of us knew him—Burnie. I shall always remember the spontaneity of his activities and of his bodily motions in the Chamber. It will never seem quite the same not to have him rise, with hand uplifted, and address the Chair.

Senator MAYBANK was a friend to many of us who came here without many friends in the Senate. He was one of the first to extend the warm and generous hand of fellowship to a new Member. I like to think of him as a great giver. The greatest gift he gave to anyone was the privilege of his friendship.

Whether it was in the Chamber or in the cloakroom, or whether it was in the dining room or in the every-day activities of life, this man, Senator MAYBANK, was always the same. There was no assuming on his part, and there was no false pretense. He was a true blue, good man day in and day out.

I believe it is for those reasons, among many others, that he was held in the highest esteem by persons of all political persuasions throughout our great Nation.

Finally, I should like to comment upon the unusual qualities of human understanding that BURNIE MAYBANK possessed. He understood people. He understood their limitations and their great qualities. He had a way of being most tolerant and understanding of both their assets and liabilities. It was because of these wonderful attributes, one might say, that he was the kind of Senator that has made America a truly great and progressive country. He really felt the impulses of the people of the Nation, and he was able, in his own, inimitable fashion, to translate those impulses into legislative action.

That is a great achievement. Many people are brilliant, many have intellectual qualities, but only a few possess both brilliance and intellectualism, plus the human qualities which bring forth the positive and glorious achievements of program and of policy to which Congress is supposed to be dedicated.

I wish to join with my colleagues today in expressions of sympathy and condolence to the lovely family of our departed good friend. America is a better country because of "BURNIE" MAYBANK. The memory of his spirit and of his many fine achievements will abide with the Senate. There is an immortality of the soul and spirit, in which all of us believe.

Mr. DOUGLAS. Mr. President, the spontaneous tributes which have been paid to Senator MAYBANK by so many Members of this body constitute a real indication of the deep affection in which he was held by everyone. I can imagine, however, that after 2½ hours of such tributes, the services may become somewhat painful to the members of the family of the Senator whom we loved so well, and, while I had hoped to pay verbal tribute to Senator MAYBANK, I shall content myself with asking unanimous consent to have printed in the RECORD the statement which I have prepared.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DOUGLAS

BURNET R. MAYBANK was one of the most lovable and warmhearted men whom it has ever been my privilege to know. When I first came to the Senate and was assigned to the Banking and Currency Committee of which he was chairman, I must confess that I was at first slightly repelled by what seemed to be the sternness of his face and the surface formalism of his manner. As we worked together, however, I soon found that all this was largely a mask and that underneath it all, BURNIE MAYBANK had a deep and passionate concern for the underdog and wanted to help him in every way which he regarded as proper.

This came out clearly in the 1949 struggle to pass a slum-clearance and public-housing bill. Senator MAYBANK fought like a tiger to get this bill passed. He turned on his great personal charm, he buttonholed Senators, and he lobbied. We could never have passed the bill without him. While the struggle was at its height, I asked him what had caused him to take such a deep concern in the terrible problem of the slums. He told me about the Charleston slums and of epidemic diseases which had started there and of how a member of his own family who had gone into the slums to nurse the sick had caught the deadly disease and had died. "I determined then and there," he said, "to do my best to help wipe out the slums, and as Mayor of Charleston, I put through the first public-housing project in the country." BURNIE'S eyes glistened with moisture as he spoke. I lost my heart to him right then and there and we became fast friends.

Although one of the Charleston aristocracy—and what could possibly be more exclusive than that—BURNET MAYBANK was extraordinarily sensitive to the hardships which hard-pressed men and women of all races had to suffer and his great heart was always urging him on to help them.

There were certain other traits of his which we all cherish. Mathew Arnold once defined a gentleman as "one who never consciously inflicts pain." This was true of Burnie. He was always gentle in public speech, if explosive in manner, and he was always careful not to reflect on the character or motives of those with whom he differed. He set us all a good example in this, as in so many other respects.

One of Burnie's most endearing, if often puzzling characteristics, was his rapid and frequently unintelligible speech when he was stirred up on a matter of great importance. Northerners find the Charleston accent difficult enough to understand at best, but to this Burnie joined his training as a cotton broker where speech and action has to be rapid. The result was that his sentences would pour out in a perfect Niagara of speech. I, at least, could barely understand a word, but I could guess how much he cared about the topic by the tones of his voice and by the frequency with which he would raise and wave his forefinger. It was therefore always very endearing, exciting, and stimulating to hear him speak.

But underneath all his manner, at times formal and at other times lovably boyish, was a keen and cool mind. He knew what forces were at work on any given issue and he could appraise the relative strength of every position, both logically and politically. He knew how to get people to help him and the causes in which he was interested, for it was difficult to deny him anything, and he was a master political strategist and tactician.

But most of all he was our beloved friend, warmhearted, generous, and kind. We loved him and we grieve for his loss. We extend our sympathy to his wife, his son, his daughters, and his family whom he loved. It is hard to lose him in the full strength and vigor of his career, but it was inspiring to have had him as a noble and highly useful citizen and friend.

Mr. SMITH of New Jersey. Mr. President, I rise to identify myself with those who have paid such glowing tributes to my dear friend, Senator MAYBANK. I have had the privilege of serving in the Senate for 10 years, and during nearly all that time Burnie was one of my dearest friends. I wish to express on this occasion the deep affection I had for him as a man and the respect in which I held him as a statesman. As I look back over my contacts with him—and they were not so many as were those of some of my colleagues, because I did not have the privilege of serving on any committee with him—one or two thoughts stand out. One is that BURNIE MAYBANK expressed his love for his fellow men. There was not a Senator who did not feel the personal affection of BURNIE MAYBANK. As members of opposite political parties, we frequently were on different sides in debate, but no political differences ever lessened Burnie's love of his fellow men. We can never forget him. It is because he had that affection for others that we are hearing these wonderful tributes to the man whom everyone loved. He was a symbol of something which those coming from his State can understand. He represented the high civilization of America as expressed in the Deep South.

In the city of Charleston, where I have visited many times, I feel there is something which BURNIE MAYBANK symbolized to the *n*th degree. He represented and symbolized the area from which he came. He was a great credit to his State and to the Nation.

I merely wish to add that Mrs. Smith, who is devoted to his family, joins me in expressing our deepest sympathy to his wife and his children at this time, but we rejoice with them in the career of this great and outstanding American who lived what he represented.

Mr. SCOTT. Mr. President, coming from North Carolina, I wish to speak of a name which has been in the memories of the people of the Carolinas for several generations. Having been in public life for some 30-odd years and having served as the head of a farm organization dealing with many people in South Carolina, I can say that the name and the achievements of the man whom we honor today have always been held in the very highest esteem. When, for several years, I worked with the Federal land bank, with headquarters at Columbia, I learned the truth of the statement made here a few moments ago, that in order really to know a man one should talk with those who have worked with him in various capacities. The name of MAYBANK has always been honored and regarded in the very highest degree.

While commissioner of agriculture of my State for 11 years I had occasion to work with another segment in South Carolina, and all my associates in that undertaking had profound respect for Senator MAYBANK.

We in North Carolina felt that we had an unusual distinction, in that we seemed to have 3 Senators from our State. Senator MAYBANK'S second home was in North Carolina. It was also the second home of his father. He had his second home in the Land of the Sky, amid beautiful surroundings. In the Land of the Sky we knew Senator MAYBANK as our third Senator.

On September 1 I attended the apple festival in the city of Hendersonville. It was a gala occasion. People came from all over the country to attend and take part in the exercises. There were many personal friends of BURNIE MAYBANK present. I happened to be in the audience when the news came that our distinguished third Senator had passed away. There was a complete hush throughout the audience. No one, for a moment, could say a word except "Is it so?" As we learned the truth and were shocked at what had happened, we knew that a tenant of the Almighty, "a workman who needeth not to be ashamed," had passed on.

Mr. SPARKMAN. Mr. President, from the time I entered the Senate, I have had the great privilege and pleasure of serving on the Banking and Currency Committee under the leadership of our great colleague and great friend Senator MAYBANK. From January, 1947, for 2 years, the Republicans were in the majority, and, consequently, that committee had a Republican chairman. Senator Wagner, who was the ranking Democratic member, was kept away continuously because of illness. So it fell to Senator MAYBANK to serve in the capacity of ranking Democratic member. When the new Congress was organized, Senator MAYBANK became chairman of the committee, and I served under his chairmanship thereafter, with the exception of the 83d Congress, when again he served as the ranking minority member.

BURNIE MAYBANK, as chairman, appointed me to be chairman of the Subcommittee on Housing of the Committee on Banking and Currency. That subcommittee perhaps had the heaviest load of any subcommittee of the full committee. It was in the days of rent control. The subcommittee were preparing the Wagner-Ellender-Taft housing bill, which became law. We rewrote the law the following year. I can bear testimony to the finest cooperation and help from BURNIE MAYBANK, as chairman of the committee, that could possibly be extended, not only in the subcommittee, but also in the full committee and on the floor of the Senate. There were many controversial questions. The passage of the bill entailed a hard fight.

Something has been said about Burnie's characteristics on the floor of the Senate. I recall that many times during a hard fight on the floor, he would instantly pick up the ball, so to speak, and run with it. I remember his coming to members of the committee many times and saying, "We have this fight won. Let's vote."

I do not recall his ever guessing wrong. He knew. More often than not it was because the Members of the Senate had absolute confidence in him and in his leadership.

BURNIE MAYBANK was an outstanding Senator and a devoted friend. I was out of the country when he died. I remember that when I received the first report of his death, I simply could not believe it; it did not seem possible that a man in the prime of his life, so active, and so intensely interested in the very things which contribute to life, should be taken away. Great was my sadness when I realized the truth.

Senator MAYBANK was a devoted servant of the people of South Carolina and, indeed, of the people of the Nation as a whole. I mourn his passing, and I am proud to join with my colleagues in paying this brief word of tribute to the memory of so good a man.

I join with my colleagues also in extending my sympathy and condolences to the beloved members of Senator MAYBANK'S family.

Mr. President, the junior Senator from Virginia [Mr. ROBERTSON] remained in the Chamber until a few minutes ago, when it was necessary for him to leave in order to keep a previous engagement. He had planned to make some remarks on this occasion.

He has asked me to obtain unanimous consent to have his remarks printed at this point in the RECORD.

There being no objection, the remarks prepared by Senator ROBERTSON were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ROBERTSON

When I first learned of the death of Senator MAYBANK, I gave a brief statement to the press in which I characterized him as "one of the best beloved Members of the Senate—a statesman, a patriot, a lovely southern gentleman."

That statement was based on the close association which we had over a period of nearly 8 years during which the late Senator from South Carolina and I served together on both the Appropriations and the Banking and Currency Committees and had daily contacts. I also had the privilege of visiting him in his native State and saw for myself the regard in which he was held by the friends and neighbors whom he served.

The rule of "noblesse oblige" seldom has been better exemplified than in the career of BURNET RHETT MAYBANK. He was the descendant of a distinguished Member of this body—R. Barnwell Rhett—and of five Governors of South Carolina. He grew up in the atmosphere of Charleston where an aristocratic background meant not the right of personal privilege but a solemn obligation to reflect credit upon honored names and to preserve those principles of constitutional government for which his ancestors had stood.

Accepting the obligation of public service, our late colleague became an alderman in Charleston at the age of 28 and went on to be mayor of that city and then Governor of South Carolina at the age of 38. After 3 years in that office, he accepted appointment to the United States Senate and was twice thereafter elected to this body in which he served until the date of his untimely death.

The expert knowledge and sound judgment which made BURNET MAYBANK successful in the cotton business were not left behind when he started handling public rather than private funds. He is remembered as mayor of Charleston particularly because when he took office the city was in a bad financial condition and when he left office it was out of debt.

When he was elected to the higher offices which he later held he was sometimes spoken of as a friend of the businessman, because of his recognized knowledge of business affairs but it is significant that in his actions and decisions he made it clear that he represented all the people and not any limited group. Thus the Washington Post and Times Herald, in an editorial comment on his death, said the secret of his success was his ability to reconcile antagonistic forces in politics; that he was essentially a moderate and used his influence to harmonize conflicting interests.

His quality as a harmonizer was strikingly demonstrated by the fact that he never was defeated in any bid for public office and throughout his political career opposition to him steadily diminished to the point that he was without opposition in either major party for reelection to the Senate last year. This was the first time since popular election of Senators began in 1913 that South Carolina chose one of its representatives to sit in this body without making him meet the test of opposition.

Editorial writers, since his death, have commented on his integrity, his independence, and his personal charm. The American Cotton Manufacturers Institute, which recognized him as the Member of the Senate who knew the most about cotton, publicly characterized his as a man of deep loyalty and devotion to friends and country, and one who had a keen awareness of the worth of the individual and an understanding of the need to provide a sound structure of government within which the individual might develop to the limit of his capabilities.

I personally concur in all of these statements and can only reiterate what I said at the time of his death—I feel as though I have lost a brother and share the grief over his passing which was so universal in the State of South Carolina.

Mr. SPARKMAN. Mr. President, the Senator from Arkansas [Mr. FULBRIGHT] also had hoped to be present on this occasion, and had prepared a statement about the late Senator MAYBANK. The Senator from Arkansas unfortunately has been delayed in his return to Washington, and has asked me to present his remarks for the RECORD. I ask unanimous consent therefore, that the statement prepared by the junior Senator from Arkansas be printed at this point in the RECORD.

There being no objection, the statement prepared by Mr. FULBRIGHT was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR FULBRIGHT

The late Senator BURNET R. MAYBANK preceded me to the Senate by about 3 years. I had of course known of his political career in his native city of Charleston and in his State of South Carolina, dating back to 1927. This was a career, incidentally, which had never been marked by defeat.

I had not been in this body very long before I came to recognize in Senator MAYBANK the qualities which so endeared him to his State and which later brought him national recognition as one of the outstanding statesmen of his time. He and I became close friends and we were intimately associated while he served as chairman or ranking minority member, of the Senate Committee on Banking and Currency. I was privileged to sit at his side through many, many hours of committee deliberations. As time passed I came more and more to admire him as a man and as a Senator.

While he was chairman of the Banking and Currency Committee, he was for several years a member of the Senate Appropriations Committee. It would be difficult to imagine two more strenuous committee assignments than these. However, Senator MAYBANK carried this burden in good humor and without complaint. Throughout my many years of association with him I never knew him to shirk his duties or responsibilities. On the contrary he always met them cheerfully and sincerely welcomed them as opportunities for public service.

I relied on Senator MAYBANK to a great degree in the Banking and Currency Committee, always with the knowledge that his counsel would be given freely and openly and that his only motive would be his concept of the public welfare. I also relied upon him in many other problems which were common to our States, with the same degree of certainty that his counsel would be forthright and wise.

His death was a grievous shock to me. When I had seen him last he appeared to me to be in the prime of life, as full of vitality, good humor, and friendliness as any man could be. His political career had only recently been crowned by renomination without opposition in the Democratic primary of his State.

Senator MAYBANK'S death was a personal loss to me. I feel that my own life and my experience in the Senate were immeasurably enriched by reason of my association with him. His death also deprived the State of South Carolina, the South, and the Nation of one of its wisest and most unselfish leaders.

Mr. STENNIS. Mr. President, it has been an inspiration and a comfort to be present in the Senate to hear the beautiful tributes which have been paid to our late friend, and which, from my personal knowledge of the man, I know have been uttered with great sincerity and truthfulness.

I do not know of any Member who is missed more on the floor of the Senate than is our late colleague, BURNET MAYBANK. He is missed on the floor of the Chamber, in the committee rooms, at the luncheon table, at social functions, and in the cloakroom. We miss him for his fine qualities, which have already been so clearly enumerated today.

I remember that soon after I came to the Senate, someone pointed him out to me and said, "Senator MAYBANK can get a bill passed here perhaps easier than anyone else."

That statement impressed me, and I asked why.

I was told, "Even though Senator MAYBANK sometimes talks so fast that all that he says cannot be understood, we have such absolute confidence and faith in his high integrity, that we accept, on our personal faith in him, bills which he sponsors."

That was quite a complimentary statement. But observations in the Senate over several years taught me that it was exactly correct.

I was impressed by what the senior Senator from South Carolina [Mr. JOHNSTON] said with reference to a telegram Senator MAYBANK once sent to him: "If you want me or need me, I will come." That describes the man. It was not a question of need alone. If a friend simply wanted Senator MAYBANK to be here, that was enough. If one simply wanted Senator MAYBANK to respond, his response, was spontaneous; there was no argument or fuss about it. He was ready.

"If you want me or need me, I will come." I can think of no better tribute to Senator MAYBANK than those words, because they describe his ever ready friendly helpfulness.

He had all the instincts of a gentleman. He was one of the most delightful traveling companions I have ever known.

I wish to mention also that Senator MAYBANK was a man of outstanding ability. He always knew what was going on, and usually he was one step ahead of many of us in his thinking and in his solution of a problem.

To those to whom he gave his name, I wish to say that none have ever had a finer heritage, none have ever had more to live up to, than they do. May God guide them and sustain them in their efforts to do so. Such true greatness deserves worthy successors.

Mr. WILEY. Mr. President, when our deceased brother was Governor of his State, it was my good fortune to visit him. I remember meeting him, as it were, under the pillars, and I recall what someone said about him: "There is a real southern gentleman."

I did not realize then that it would be only a year or two before he would be a Member of the Senate, but when he came, it was like meeting an old friend. Yet I had met him only that one time before he came to the Senate.

I concur in the many beautiful things which have been said about his life. He was a real southern gentleman. He possessed the virtue of honesty. He was friendly. He was straightforward. He was kindly. He was generous.

It was Edison, I believe, who said that genius is 99 percent work. Our deceased brother was a genius because he was a hard worker, and he loved the American way of life. He was not living in his yesteryears. He was aware of the changing world, and he knew of its challenges.

As one of his colleagues has said, Senator MAYBANK was a friend of the lowly. He was one who loved his fellowmen.

To me, Senator MAYBANK had a virtue which is lacking in many of us. He was cooperative and always ready to help.

We all feel a deep sympathy for those who seem to have lost him, but I say to them: You have not lost him. You cannot lose something real. He simply has gone ahead in the journey.

I feel certain that if Senator MAYBANK could speak now, he would say, "Carry on. I am all right. I am doing my job as I have always done it. Life was but a kindergarten. I learned there how to work and how to carry on."

Mr. MANSFIELD. Mr. President, I wish to join with my colleagues in paying tribute to the late Senator MAYBANK. I can say without qualification he was one of the finest men I have been privileged to serve with while in Congress.

When the news of Burnet's death reached me, I was in Indochina. I can say truthfully that the Americans in that part of the world, 10,000 miles away, were very much saddened by the passing of this great Senator and statesman from South Carolina.

His death in September of last year has left a vacant spot on Capitol Hill, which will be extremely difficult to fill.

Although my association with Senator MAYBANK in the Senate was of less than 2 years' duration, I knew him as an extremely capable, conscientious, and friendly man. He had a remarkable record of service to the Democratic Party, to his State, and to his Nation.

It is interesting to note that since his attaining office in 1927 he never once suffered a defeat.

He made outstanding records as mayor of Charleston, Governor of South Carolina, and chairman of the Senate Committee on Banking and Currency.

I know that the death of our friend, the late Senator BURNET MAYBANK, has deprived our Nation of a great Senator and a true gentleman. We shall miss him greatly. May his soul rest in peace.

Mr. LONG. Mr. President, it was my privilege to be associated with the late BURNET MAYBANK as a colleague in the Senate and as a next-door neighbor.

BURNET MAYBANK brought to the Senate a wealth of talent and experience, gained as mayor of Charleston and as Governor of South Carolina. Upon his arrival in the United States Senate in 1941 he quickly made for himself an enviable reputation as a legislator through his great ability and his unflagging devotion to the interests of his State and Nation. I had the honor of serving under his chairmanship on the Committee on Banking and Currency shortly

after my admission to this body. I came to know of those many qualities which made BURNET MAYBANK so respected as an authority on monetary policy, housing, and related matters.

His vigorous leadership, his sound, clear thinking, and his devotion to duty as he saw it were always abundantly in evidence. His conduct on the floor of this body was exemplary. Never was there an occasion when his words were offensive or abusive of any of his colleagues. Time and again we saw him save the day to make possible the passage of legislation vital to the welfare of this Nation. He displayed that indispensable legislative requisite of the ability to find the honorable middle course upon which men of differing views could join for constructive achievement.

Millions of our people today enjoy better housing as a result of his farsighted efforts in the field of housing legislation during the years following World War 2. His other legislative accomplishments are too many to enumerate and discuss at this time. We knew him as a man of the highest integrity and honor, a man who gave sympathetic consideration to the problems of others, a man of deep convictions, and at all times a man of truth and loyalty.

BURNET MAYBANK was a kindly man. As his neighbor here in Washington, I have many vivid memories arising from his gentle qualities. I was often touched by his kindness and affection for my two small daughters. They thought of him as a true friend.

It was the combination of his many fine qualities that endeared BURNET MAYBANK to his colleagues in the Senate and to his many friends. I have often said and heard it said by others, that no Member of this body was more completely loved my all Members than BURNET MAYBANK. His State and the Nation at large suffered a grievous loss in his passing. It was a genuine honor to have been his friend.

I wish to extend my sympathy to his widow and his family.

Mr. BYRD. Mr. President, BURNET MAYBANK was a man devotion for whom came easily to all of us.

He was a fine public servant throughout a long career as United States Senator, and as a legislator and governor of his beloved State of South Carolina.

I think he would like to have us remember him in the words of the motto of his State—"Ready in Soul and Resource."

I never knew a man who was more ready always to start with diligence from where he stood to achieve his objective.

He was a man with the imagination of hope, not regret; a man with will and force and personality.

With an overriding capability to conceive goodness, he was a master of commonsense as a measure of that which was possible. His common sense was a composition of experience and vision. He used it for the practical interpretation of the facts and whims of human nature before him.

He was a fine mixture of faith and work, but he would make no compromise between doctrine and fantasy.

There was nothing about him or his personality that was sham or imitation. Everything he did was characterized by a deep respect for his fellowman, which, to him, meant preserving as much liberty as possible for those whose lives we share.

I shall always remember Senator MAYBANK as a man of personal merit and rare individual charm. And to me his association and company were always a source of warm pleasure.

He and I, Mr. President, were intimate and devoted friends. He had many other friends in this chamber. I treasured his friendship. I admired and loved him as a man.

He was a man of contagious cordiality, innocent mirth, and high resolution.

I mourn the loss of BURNET MAYBANK, and trust that the heritage of his spirit may remain with us undiminished.

Mr. MONRONEY. Mr. President, today as a large number of Senators have spoken of our late beloved colleague, BURNET MAYBANK, of South Carolina, I have been thinking of the pleasure of association that we have all had in serving here with him.

Certainly his great achievements for agriculture, for social progress, for financial stability of our institutions have marked his official career with great distinction. The pride that his State has in his fine record is a distinction to them in recognizing his ability and to elevating him to high office so many times. For he served all the people of his State, his Nation, and the world with distinction and ability.

But I wish to address my remarks to the friendly personality and the ever-present desire to help a fellow Member that our friend "Burnie" always had. He was a busy man, with a tremendous workload thrust upon him by the Senate, but he always had time for a friendly word or a friendly hand for a fellow Member.

Indeed his friendliness was not limited to Senators, for he was a favorite with the staffs of our committees, and of our offices, with the elevator operators, doormen, and others who serve us in this task.

I first discovered this helpful friendliness of Senator MAYBANK when I served in the House. No matter how difficult the legislative matter was in the conference committees between the House and the Senate—Burnie always managed to give every man his hearing, to respect his ideas and his suggestions and to work out in the best possible spirit of compromise a bill to achieve the ends sought by the legislation.

I have seen him preside over deadlocked conference committees until 2 or 3 a. m., always maintaining his friendly attitude and spirit. It helped to solve many tough legislative problems because the conferences were being run by a man whom all knew was a real friend.

I extend my sincere sympathy to his lovely family, to his devoted friends in the State of South Carolina, and yes, to ourselves, for we will miss this able, friendly, and diligent public servant. His work has well served his Nation and his memory will always be fresh in the minds of those who were privileged to serve with him and to know him.

Mr. CLEMENTS. Mr. President, some of our colleagues who will not be present this afternoon have requested that statements they have prepared be placed in the RECORD.

I ask unanimous consent that statements prepared by the following Senators be printed in the RECORD at this point: The senior Senator from Oklahoma [Mr. KERR], the senior Senator from Washington [Mr. MAGNUSON], the senior Senator from Montana [Mr. MURRAY], the senior Senator from Missouri [Mr. HENNINGS], the senior Senator from Tennessee [Mr. KEFAUVER], and the senior Senator from Texas [Mr. JOHNSON].

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KERR

The glory of this beautiful sunshiny day is made even brighter as we think about our departed friend and colleague, BURNET MAYBANK. I held him high in my esteem and if it were possible, even higher in my respect. He was my friend for nearly a dozen years. He first won my admiration as a great Governor of his native State of South Carolina. His life was an inspiring example as a devoted husband and father. He won undying fame by his constant and effective service to all classes of citizens in his successful efforts for better housing. The present and future generations of American farmers will remember him and be grateful for what he did for them.

We in the Senate and people everywhere will be encouraged to always make the defenses of our country strong and true as we remember the heroic work that he did for a greater Air Force and a stronger military power. We have all lost a cherished friend. South Carolina has lost one of her most distinguished sons. America has lost one of her noblest patriots and statesmen.

But in the higher sense BURNET MAYBANK will live on in the memories of those who knew him and in the hearts of friends who loved him.

STATEMENT BY SENATOR MAGNUSON

BURNIE MAYBANK was my friend—one of the closest and truest friends I have ever had.

In a legislative fight it was comforting to have him on my side. He fought hard. He fought clean—but he fought effectively. He was always considerate—he was a gentleman.

As a companion Senator MAYBANK had no peer. Though we served States from opposite sides of the Nation, Burnie and I were closer than brothers.

His departure is a great personal loss to all who knew him. Yet he lives on in our affections and our memory.

STATEMENT BY SENATOR MURRAY

I join my colleagues in paying tribute to the memory of a beloved and kindly colleague; of a fine Senator and a great American—to the memory of BURNET MAYBANK, in whose warm friendship I was honored to share.

BURNET MAYBANK devoted his life to the service of his city, his State, and his Nation. He rendered that service with a constancy, an ardor, and a selflessness seldom matched in these or any other halls. And in so doing he displayed at all times a keen intelligence, a delightful quickness of wit and, above all, a warm and human understanding of his fellows and their problems.

Senator MAYBANK served the people of his State well. He was wholehearted in his devotion to their interests and adamant in defending those things they held to be right. Yet BURNET MAYBANK accorded to every other Member of the Senate those same rights to hold and fight for contrary opinions as he demanded for himself. And when regional or sectional differences of opinion or approach to a problem could be compromised without sacrificing principle, it was BURNET MAYBANK who, time after time, worked out those agreements which, during his service in the Senate, made possible those great legislative achievements which have meant so much to all our people in every part of our country.

In BURNET MAYBANK's passing, the Nation lost a devoted servant, the Senate lost one of its stalwarts, and I lost a warm and kindly friend. To his family, I would extend my most sincere condolences and the hope that their sorrow may be in part assuaged by the knowledge that in his too-short span of life BURNET MAYBANK accomplished far more that was good than is often vouchsafed those granted 4-score years and more.

STATEMENT BY SENATOR HENNINGS

Together with so many of his colleagues here in the Senate who knew and loved BURNET MAYBANK, I would like to join with a few words of tribute, conscious as I am of their inadequacy, to a good friend and a distinguished American.

BURNET MAYBANK's life was a record of outstanding public service—to his community, his State, and his country. After service in World War I, he went on to serve as alderman of the city of Charleston, mayor of Charleston, chairman of the South Carolina Public Service Authority, and then as Governor of South Carolina and Senator from his State from 1941 until his untimely death.

A man of indomitable spirit and abundant energy, he devoted himself tirelessly to his duties in the Senate and ably represented all the people of his State. As chairman of the Senate Committee on Banking and Currency, his broad understanding of the issues coupled with a remarkable ability to get to the heart of a situation were responsible for much of the constructive legislation enacted in the field of housing, banking, and postwar economic stabilization. And, yet, as his responsibilities in the Senate became heavier and the demands on his time more pressing, he was never too busy for a kind word of friendship and encouragement to his colleagues. Our lives are all richer for having known BURNET MAYBANK. He was truly a great soul.

All of us who had the privilege of knowing and working with BURNET MAYBANK had the highest respect for his integrity, his ability, and his remarkable character, and the deepest affection for those qualities of heart and mind which endeared him to all. We will continue to miss his inspiration and his leadership here in the Senate. And to Mrs. Maybank, his family, and to the State and its people who honor and loved him, I want to add my few and humble words, impossible as it is to express my sense of loss in the passing of our friend. We shall never see his like again.

STATEMENT BY SENATOR KEFAUVER

It is my privilege to be given this opportunity to say a few words in tribute to our late beloved colleague, BURNET MAYBANK.

BURNET MAYBANK devoted a lifetime to the service of his people and his country. From the day back in 1927 when he was elected to the office of alderman of the city of Charleston, until that fateful day in September 1954 when he was taken away from us, Senator MAYBANK served the people well.

BURNET MAYBANK is no longer with us, and his absence will be greatly felt. But his devotion to duty will always remain as an inspiration to his successor and those of us left behind to carry on the many tasks remaining to be done.

STATEMENT BY SENATOR JOHNSON OF TEXAS

There are men in this world—and, unfortunately, they are few—who combine to a high degree the seemingly contradictory qualities of force and gentleness.

In their ranks could be found our late colleague—my good friend—BURNET R. MAYBANK.

We all knew Senator MAYBANK as a man of firm determination and unshakeable purpose. We knew him as one with an uncanny eye for the weakness of an opposing position and with the skill and ability to exploit that weakness to the fullest advantage.

But we also knew him as a man of reason; a man of moderation; a man with a deep affection for his fellow mortals. Coupled with that affection was a keen understanding of the problems which others face and a willingness to share the burdens of finding a solution.

His heart quite properly belonged to his beloved South Carolina. But because he loved his native soil so deeply he understood with equal depth the feelings of those who were born and reared in other sections—no matter how distant.

In BURNET MAYBANK I always found the counsel of wisdom and the courage of conviction. He never shirked a duty or an obligation, and his devotion to his Nation was of the highest order.

His passing was a sad blow to his Nation, to his friends, and to his family. But all of us can draw consolation from the thought that we were once associated with this very strong but very gentle man.

He was a gentleman in the true sense of the word. And the name BURNET R. MAYBANK will always live in the annals of American statesmanship.

Mr. MANSFIELD. Mr. President, on behalf of the junior Senator from Washington [Mr. JACKSON], I ask unanimous consent that he may have printed in the RECORD the statement he has prepared on the passing of the late Senator MAYBANK.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR JACKSON HONORING SENATOR BURNET R. MAYBANK

Mr. President, it is not possible for me to add to the outstanding tributes that have been paid today to BURNET MAYBANK. I can only confirm and corroborate these deserving statements. I shall always remember him for his deep and devoted interest to the problems of not just the State of South Carolina but the the Nation as a whole. He was sincerely interested in assisting other Senators with their many problems. He never hesitated to devote his talent, his energy, and his wisdom to the many social and economic problems of the Nation. He had a broad vision, a broad understanding of our country and the world as it is today. His wise counsel, his devoted service, will be sorely missed in this Chamber. I wish to join with my colleagues in extending to his family my deepest sympathy.

ORDER FOR ADJOURNMENT OUT OF RESPECT TO THE MEMORY OF THE LATE SENATOR MAYBANK

Mr. THURMOND. Mr. President, I ask unanimous consent that when the Senate adjourns today, it do so out of respect to the memory of and in reverence for the late Senator MAYBANK.

The PRESIDING OFFICER. Without objection, it is so ordered.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will now be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters. I ask unanimous consent that the Senate operate under a 2-minute limitation on statements made in connection therewith.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT RELATING TO TWO-PRICE SYSTEMS OF PRICE SUPPORT AND MARKETING APPLICABLE TO RICE

A letter from the Acting Secretary of Agriculture, transmitting, pursuant to law, a report with respect to the various two-price systems of price support and marketing which could be made applicable to rice (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT ON SPECIAL ASSISTANTS EMPLOYED BY DEPARTMENT OF JUSTICE

A letter from the Attorney General, transmitting, pursuant to law, a report showing the special assistants employed by the Department of Justice, for the period July 1 through December 31, 1954 (with an accompanying report); to the Committee on Appropriations.

STATISTICAL STOCKPILE REPORT

A letter from the Director, Office of Defense Mobilization, Executive Office of the President, transmitting, pursuant to law, a confidential report entitled "Statistical Stockpile Report to the Congress," for the period July 1 through December 31, 1954 (with an accompanying report); to the Committee on Armed Services.

RESOLUTION OF GOLD COAST LEGISLATIVE ASSEMBLY

A letter from the Assistant Secretary of State, transmitting a copy of a joint resolution adopted by the Gold Coast Legislative Assembly, thanking the Congress of the United States for the message of greeting contained in the joint resolution adopted at the 2d session of the 83d Congress (with an accompanying paper); to the Committee on Foreign Relations.

ACCEPTANCE OF GIFTS BY CERTAIN CIVILIANS

A letter from the Acting Secretary of State, transmitting a draft of proposed legislation to amend the act providing for membership and participation by the United States in the United Nations Educational, Scientific, and Cultural Organization to provide for the acceptance of gifts, and for other purposes (with accompanying papers); to the Committee on Foreign Relations.

AUDIT REPORT ON SOUTHEASTERN POWER ADMINISTRATION

A letter from the Assistant Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Southeastern Power Administration, Department of the Interior, for the fiscal year ended June 30, 1954 (with an accompanying report); to the Committee on Government Operations.

ACQUISITION OF CERTAIN RIGHTS-OF-WAY AND TIMBER-ACCESS ROADS

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize the Secretary of the Interior to acquire certain rights-of-way and

timber-access roads (with an accompanying paper); to the Committee on Interior and Insular Affairs.

PROPOSED CONCESSION PERMIT, WHITE SANDS NATIONAL MONUMENT, N. MEX.

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a copy of a proposed concession permit within White Sands National Monument, N. Mex. (with accompanying papers); to the Committee on Interior and Insular Affairs.

LAWS ENACTED BY MUNICIPAL COUNCILS OF ST. THOMAS AND ST. JOHN, AND ST. CROIX, AND LEGISLATIVE ASSEMBLY OF VIRGIN ISLANDS

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of laws enacted by the Municipal Councils of St. Thomas and St. John, and St. Croix, and the Legislative Assembly of the Virgin Islands (with accompanying papers); to the Committee on Interior and Insular Affairs.

CERTIFICATION OF SOIL SURVEY AND LAND CLASSIFICATION

A letter from the Assistant Secretary of the Interior certifying, pursuant to law, that an adequate soil survey and land classification has been made of the lands to be benefited by Haystack Equalizing Reservoir, north unit, Deschutes project, Oregon (with an accompanying paper); to the Committee on Interior and Insular Affairs.

PROPOSED AWARD OF CONCESSION PERMIT, LAKE MEAD NATIONAL RECREATION AREA, ARIZONA

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed award of a concession permit, in the Lake Mead National Recreation Area, Arizona (with accompanying papers); to the Committee on Interior and Insular Affairs.

OVERSEAS NAVIGATION CORPORATION *v.* THE UNITED STATES

A letter from the clerk, United States Court of Claims, Washington, D. C., transmitting, pursuant to law, and pursuant to Senate Resolution 193, 82d Congress, 1st session, a copy of that court's opinion rendered on March 1, 1955, in the case of *Overseas Navigation Corporation* v. *The United States*, together with an opinion in the case of *Gay Street Corporation of Baltimore* v. *The United States*, decided January 11, 1955 (with accompanying documents); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF ALIENS—WITHDRAWAL OF NAME

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, withdrawing the name of Ramon Gonzalez-Garcia from a report relating to aliens whose deportation has been suspended, transmitted to the Senate on July 15, 1954; to the Committee on the Judiciary.

PAYMENT OF MONEY ORDERS

A letter from the Postmaster General, transmitting a draft of proposed legislation relating to the payment of money orders (with an accompanying paper); to the Committee on Post Office and Civil Service.

PURCHASE OF BONDS TO COVER CERTAIN POSTAL EMPLOYEES

A letter from the Postmaster General, transmitting a draft of proposed legislation to provide for the purchase of bonds to cover postmasters, officers, and employees of the Post Office Department, contractors with the Post Office Department, mail clerks of the Armed Forces, and for other purposes (with an accompanying paper); to the Committee on Post Office and Civil Service.

ADJUSTMENT OF SALARIES OF CERTAIN EMPLOYEES OF POST OFFICE DEPARTMENT

A letter from the Postmaster General, transmitting a draft of proposed legislation to amend section 16 of the act entitled "An act to adjust the salaries of postmasters, supervisors, and employees in the field service of the Post Office Department," approved October 24, 1951 (65 Stat. 632; 39 U. S. C. 876c) (with an accompanying paper); to the Committee on Post Office and Civil Service.

AMENDMENT OF ACT TO ESTABLISH COMMISSION OF FINE ARTS

A letter from the Chairman, the Commission of Fine Arts, Washington, D. C., transmitting a draft of proposed legislation to amend the act of May 17, 1910, relating to the establishment of a Commission of Fine Arts, and for other purposes (with an accompanying paper); to the Committee on Rules and Administration.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

PETITIONS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

Two joint resolutions of the Legislature of the State of Washington; to the Committee on Interior and Insular Affairs:

"House Joint Memorial 7

"To the Honorable Dwight D. Eisenhower, President of the United States, and to the Senate and House of Representatives of the United States of America, in Congress assembled:

"We, your memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas the Congress of the United States on March 2, 1899, set aside certain lands in the State of Washington as Mount Rainier National Park (30 Stat. 993) and the legislature of Washington on March 16, 1901, ceded to the United States exclusive jurisdiction over this area (ch. 92, Laws of 1901); and

"Whereas, the Congress declared in the statute creating the first national park (17 Stat. 32) that the area be 'designated and set apart as a public park and pleasuring ground for the benefit and enjoyment of the people,' which purpose was again confirmed in similar language in the act creating Mount Rainier National Park; and

"Whereas Mount Rainier National Park has become the prime and major attraction in the State of Washington for visitors from all States of the Union because of its unique natural and scenic features and its year-round potential for recreation; and

"Whereas facilities necessary for adequate use of the recreational potential of the park are sorely inadequate and those existing have deteriorated and are in an obsolete state, thus severely restricting the use of the park; and

"Whereas the National Park Service has for years pursued policies which make it difficult for private enterprise to operate tourist facilities in the park and which discourage it from investing in improved or expanded facilities; and

"Whereas a number of surveys undertaken over the years have proposed that certain improvements be undertaken in Mount Rainier National Park which proposals were refused by the National Park Service; and

"Whereas the Governor of the State of Washington and the Mount Rainier National Park Development Study Committee recommended in 1953 a program under which modern tourist and recreational facilities would be built and operated by private enterprise without drawing on Federal appropriations, which program is being actively supported by a large number of leading civic organizations and the National Park Service has declined these plans; and

"Whereas an essential part of such development plans are facilities to transport visitors to higher altitudes and the act of Congress which created Mount Rainier National Park granted the right to any railway or tramway company to construct and operate a railway or tramway line which provision was amended by act of Congress of January 26, 1931 (46 Stat. 1044), which empowered the Secretary of the Interior to authorize the establishment and operation in the park of a tramway or cable line or lines for the accommodation or convenience of visitors and others; and

"Whereas the Governor of the State of Washington requested on October 16, 1953, that the Secretary of the Interior grant such authorization, which request was joined in by the Mount Rainier National Park Development Study Committee and a large number of clubs, associations, and organizations in the State of Washington; and

"Whereas the Secretary of the Interior by letter of December 17, 1954, notified the Governor of the State of Washington that no further consideration would be given to permitting the establishment of a tramway or cable line for the transportation of visitors nor to some of the other requests that would permit the establishment and operation of tourist and recreational facilities for visitors; and

"Whereas by such action the original purpose of the park as designated by Congress is being frustrated, and the use of the recreational potential of the park is being denied to hundreds of thousands of residents of Washington and other States and serious damage is being inflicted upon the tourist industry which is one of the largest industries in the State of Washington: Now, therefore, be it

"Resolved, That your memorialists respectfully petition the President and the Congress of the United States to enact legislation and take such appropriate measures that will assure the citizens of the United States and of the State of Washington the adequate use of Mount Rainier National Park through permission to establish and operate such facilities as are required for the use of visitors, both summer and winter, and create such conditions that will make it possible for private operators to finance and maintain them at no public expense; and be it further

"Resolved, That copies of this memorial be transmitted to the President of the United States, the Secretary of the United States Senate, the Clerk of the United States House of Representatives, the members of the Committees on Interior Affairs of the United States Senate and the United States House of Representatives and to each member of the Washington congressional delegation.

"Passed the House February 8, 1955.

"JOHN L. O'BRIEN,
"Speaker of the House.

"Passed the senate February 19, 1955.

"EMMETT T. ANDERSON,
"President of the Senate."

"House Joint Memorial 2

"To the Honorable Dwight D. Eisenhower, President of the United States, and to the Senate and House of Representatives of the United States of America, in Congress assembled:

"We, your memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled,

respectfully represent and petition as follows:

"Whereas the construction of McNary Dam on the Columbia River has created a large lake composed of the backwaters from the dam; and

"Whereas the lake created by McNary Dam has inundated the town of Wallula, which was an historic site in the State of Washington; and

"Whereas it would be appropriate to perpetuate the memory of the historic town of Wallula by naming the lake which now covers its site after the town now destroyed by its waters: Now, therefore, be it

"*Resolved*, That we, the Senate and the House of Representatives of the State of Washington do hereby respectfully memorialize and petition the President of the United States of America, and the Congress of the United States of America, to name the body of water created by the backwaters of McNary Dam, Lake Wallula.

"Passed the house February 3, 1955.

"JOHN L. O'BRIEN,
"*Speaker of the House.*

"Passed the Senate February 10, 1955.

"EMMETT T. ANDERSON,
"*President of the Senate.*"

Resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Interior and Insular Affairs:

"Resolutions memorializing the Congress of the United States to take action to admit Alaska and Hawaii to statehood

"Whereas the matter of the admission to statehood of Alaska and Hawaii has been under consideration for a long time; and

"Whereas both Alaska and Hawaii by the democratic processes prevailing therein and the actions of their people have shown that they are entitled to become States of the United States of America: Therefore be it

"*Resolved*, That the Massachusetts House of Representatives respectfully urges the Congress of the United States to take such action as may be necessary to admit both Alaska and Hawaii to statehood; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the State Secretary to the President of the United States, to the presiding officer of each branch of Congress, and to each member thereof from this Commonwealth."

A joint resolution of the Legislature of the State of Montana; to the Committee on Appropriations:

"House Joint Memorial 6

"Joint memorial of the House of Representatives and Senate of the State of Montana to the Congress of the United States, to JAMES E. MURRAY and MIKE MANSFIELD, Senators from the State of Montana, and to LEE METCALF and ORVIN FJARE, Representatives in Congress from the State of Montana, urging that the Congress of the United States make sufficient funds available to develop topographic maps for the entire State of Montana as soon as possible

"Whereas the State of Montana is very inadequately covered by the United States topographical maps; and

"Whereas at the present rate of progress it will take many years to complete the State; and

"Whereas topographic maps are used by many industries, such as, mining, lumbering, and the development of oil-bearing areas; and

"Whereas topographic maps are very essential in the development of radio and television stations, and especially since television is a new enterprise just coming into the State; and

"Whereas topographic maps are invaluable in development of land and water resources; and

"Whereas topographic maps are essential in locating rights-of-way for telephone, telegraph, rural-electrification lines, highways, railways, and pipelines; and

"Whereas topographic maps are essential in planning the operation and management of both State and national agricultural, grazing and forest lands; and

"Whereas the Interdepartment Advisory Council on Natural Resources has made a study of the uses to be made of topographic maps in Montana and has set up an orderly program for developing the mapping areas of the State according to priorities: Be it therefore

"*Resolved by the House of Representatives and Senate of the State of Montana*, That the Congress of the United States be respectfully urged and reqeusted to make sufficient funds available to develop topographic maps for the entire State as soon as possible; be it further

"*Resolved*, That a copy of this resolution be submitted by the secretary of state of Montana to the presiding officers of both Houses of the National Congress, RICHARD NIXON and SAM RAYBURN, to the Chairman of the Appropriations Committees and Committees on Interior and Insular Affairs of both Houses of the National Congress, and to the Regional Director of the United States Department of the Interior—Geological Survey; be it further

"*Resolved*, That the secretary of state of the State of Montana be hereby directed to transmit a certified copy of this memorial to the Congress of the United States, to JAMES E. MURRAY and MIKE MANSFIELD, Senators from the State of Montana, and to LEE METCALF and ORVIN FJARE, Representatives in Congress from the State of Montana.

"LEO C. GRAYBILL,
"*Speaker of the House.*
"GEO. M. GOSMON,
"*President of the Senate.*

"Approved February 17, 1955."

Two joint resolutions of the Legislature of the State of Colorado; to the Committee on Finance:

"Senate Joint Memorial 5

"Memorializing the Congress of the United States to amend the Internal Revenue Code to allow the oil shale industry the same depletion allowance as that given the oil and gas industry

"Whereas it is becoming apparent that the United States must eventually turn more and more to synthetic sources to supplement its petroleum resources, and for this reason the promotion and development of new domestic sources of fuel oils, including the mining and production of oil shale, is essential; and

"Whereas the depletion allowance now allowed on the mining of oil shale is 5 percent as compared with a 27½ percent depletion allowance given the oil and gas industry; and

"Whereas the oil shale industry, in the exploration and promotion of oil shale deposits and in the mining of oil shale, should be given the same economical assistance as is given the oil and gas industry, in order to expand the oil shale industry and create a competitive market between the two industries: Now, therefore, be it

"*Resolved by the Senate of the 40th General Assembly of the State of Colorado (the House of Representatives concurring herein)*, That it respectfully memorializes the Congress of the United States to amend the Internal Revenue Act so as to provide that the depletion allowance allowed on the mining of oil shale be raised from 5 percent to 27½ percent of the value of the oil produced from oil shale mined; and be it further

"*Resolved*, That a copy of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to the Senators and Congressmen representing the State of Colorado in the Congress of the United States.

"STEPHEN R. MCNICHOLS,
"*President of the Senate.*
"MILDRED H. CRESSWELL,
"*Secretary of the Senate.*
"DAVID A. HAMIL,
"*Speaker of the House of Representatives.*
"LEE MATTIES,
"*Chief Clerk of the House of Representatives.*"

"Senate Joint Memorial 6

"Memorializing the Congress of the United States to amend the Internal Revenue Code to allow the metal mining industry the same depletion allowance as that given the oil and gas industry

"Whereas it is the consensus of the members of this general assembly that the metal mining industry be given the same economical assistance in the form of depletion allowances as is given the oil and gas industry: Now, therefore, be it

"*Resolved by the Senate of the 40th General Assembly of the State of Colorado, (the House of Representatives concurring therein)*, That it respectfully memorializes the Congress of the United States to amend the Internal Revenue Act so as to provide that the depletion allowance allowed the metal mining industry the same as that allowed the oil and gas industry; and be it further

"*Resolved*, That a copy of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to the Senators and Congressmen representing the State of Colorado in the Congress of the United States.

"STEPHEN R. MCNICHOLS,
"*President of the Senate.*
"MILDRED H. CRESSWELL,
"*Secretary of the Senate.*
"DAVID A. HAMIL,
"*Speaker of the House of Representatives.*
"LEE MATTIES,
"*Chief Clerk of the House of Representatives.*"

A concurrent resolution of the Legislature of the Commonwealth of Puerto Rico; to the Committee on Finance:

"Concurrent resolution to express the desire of the Legislative Assembly of the Commonwealth of Puerto Rico that the provisions of title III of the Social Security Act and the Federal Unemployment Tax Act be extended to the Commonwealth of Puerto Rico

"Whereas it is the desire and purpose of the Legislative Assembly of the Commonwealth of Puerto Rico to enact for Puerto Rico a law providing a system of unemployment insurance for workers in Puerto Rico; and

"Whereas economic insecurity due to unemployment is a serious menace to the health, security, and welfare of the people of Puerto Rico. Unemployment is, therefore, a subject of general interest and concern which requires appropriate action by the legislative assembly to prevent its spread and to lighten its burden which falls relentlessly upon the unemployed worker and his family. The achievement of social security requires protection against this great hazard of our economic life. This objective can be obtained by the establishment of employment agencies which will render gratuitous services to the public; by devising appropriate methods to reduce to a minimum the volume of unemployment and by the systematic accumulation of funds during periods of employment from which benefits may be paid during periods of unemploy-

ment, thus maintaining the purchasing power of the workers, and limiting the serious social consequences of unemployment; and

"Whereas it is desirable in the interest of the Commonwealth that unemployment insurance in Puerto Rico be coordinated with the unemployment insurance system in the States of the United States and with the standards adopted by existing legislation of the United States, and this would be made possible by the extension of the Federal Unemployment Tax Act to Puerto Rico. Now, therefore, be it

"Resolved by the Legislative Assembly of the Commonwealth of Puerto Rico:

"First. The Legislative Assembly of the Commonwealth of Puerto Rico hereby expresses its desire and consent that the provisions of title III of the Social Security Act as well as the provisions of the Federal Unemployment Tax Act be extended to Puerto Rico, and specifically that section 3306 (j) of the latter act, which appears in chapter 23, subtitle C of the 1954 Internal Revenue Code of the United States (26 U. S. C. A. 1607 (j)), be amended so that the definition of 'state' therein shall be amended by inserting the words 'Commonwealth of Puerto Rico' after the word 'Hawaii.'

"Second. The Legislative Assembly of the Commonwealth of Puerto Rico likewise expresses its desire and consent that the effective date of said amendment to the Federal Unemployment Tax Act be the first of January of the year 1956.

"Third. That certified copies of this resolution be transmitted immediately to the Governor of the Commonwealth of Puerto Rico so that the governor will certify the contents thereof to the President of the United States, the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, the Resident Commissioner of Puerto Rico in Washington, and the Secretary of Labor of the United States."

A letter from the secretary of state of the State of Washington, informing the Senate that legislation relating to abandoned iceboxes is now pending before the house and senate of that State (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

A resolution adopted by the Long Island Chapter, Knights of Columbus, Brooklyn, N. Y., favoring the enactment of the so-called Bricker amendment to the Constitution of the United States, relating to the treatymaking power; to the Committee on the Judiciary.

A resolution adopted by the Friday Morning Club, of Los Angeles, Calif., favoring the enactment of Senate Joint Resolution 1, relating to the treatymaking power; to the Committee on the Judiciary.

A resolution adopted by the Ontario-Upland Real Estate Board, Ontario, Calif., favoring the enactment of legislation to provide sufficient funds for the establishment of a San Bernardino Federal Housing Administration office; to the Committee on Appropriations.

A telegram from the Seattle branch of Marine Cooks and Stewards, A. F. of L., signed by James O. Willoughby, port agent, congratulating Senator MAGNUSON for his 25 years of public service; ordered to lie on the table.

By Mr. SALTONSTALL (for himself and Mr. KENNEDY):

Resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Finance:

"Resolutions memoralizing Congress against passing legislation reducing tariff rates on textile imports from foreign countries

"Whereas the textile industries in Massachusetts are being affected economically by legislation favorable to textile imports from foreign countries; and

"Whereas the continuance of the textile industry in the Commonwealth is essential to its economic development: Now, therefore, be it

"Resolved, That the house of representatives of the Commonwealth urges the Congress of the United States not to pass any legislation granting a decrease of tariff rates on textile imports from foreign countries; and be it further

"Resolved, That copies of these resolutions be sent forthwith by the secretary of the Commonwealth to the President of the United States, to the presiding officer of each branch of Congress, and to each of the Members thereof from this Commonwealth."

A joint resolution of the Legislature of the State of Oregon; to the Committee on Foreign Relations:

"Senate Joint Resolution 7

"Whereas the attention of a world plagued with the imperialistic designs of Godless communism is focused with foreboding on the next move of the Chinese Communists; and

"Whereas this move could take form in large-scale military aggression aimed at subjugation of Formosa, the Pescadores Islands, and related territory; and

"Whereas the President of the United States has asked the Congress for a grant of authority to employ United States Armed Forces as he sees fit in frustrating a possible Chinese Communist attempt to seize Formosa, the Pescadores Islands, and related territory; and

"Whereas the Congress of the United States with but 6 dissenting votes has given its approval to the subject request, known as the Formosa Resolution; and

"Whereas the greatest import of the 'Formosa Resolution' stems from its inherent influence as a deterrent to Chinese Communist aggression; and

"Whereas this influence will be felt in direct proportion to the degree of unanimity with which the 'Formosa Resolution' is upheld by the citizens of the United States of America and their elected officials, as well as the peoples of all free nations: Now, therefore, be it

"Resolved by the Senate of the State of Oregon, the House of Representatives jointly concurring, That this 48th legislative assembly, in regular session assembled, hereby give its unequivocal backing to the action taken by the President and the Congress in their advocacy of the 'Formosa Resolution'; be it further

"Resolved, That all interested citizens of Oregon and all civil, fraternal, management, labor, veterans' and other organizations in this State hereby be urged likewise to apprise the President and the Congress of their concurrence in the 'Formosa Resolution' to the end that as many Americans as possible be united in expressing opposition to Chinese Communist designs on the territory in the western Pacific area in question; and be it further

"Resolved, That the secretary of state of the State of Oregon hereby be directed to send copies of this resolution to the President and the Oregon delegation to the Congress of the United States of America and to the appropriate representatives of press and radio who can assist in giving the viewpoint set forth in this resolution the widest possible dissemination.

"Adopted by senate, February 3, 1955.

"ELMO E. SMITH,
"President of Senate.
"ZYLPHA ZELL BURNS,
"Chief Clerk of Senate.

"Adopted by house, February 9, 1955.

"E. A. GEARY,
"Speaker of House."

By Mr. NEUBERGER:

A joint resolution of the Legislature of the State of Oregon; to the Committee on Interstate and Foreign Commerce:

"House Joint Memorial 6

"To the Honorable Members from Oregon of the Senate and the House of Representatives of the United States of America, in Congress assembled; and to the Honorable Douglas McKay, Secretary of the Interior for the United States of America:

"We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

"Whereas several years ago certain airlines were granted temporary authority by the Civil Aeronautics Board to establish and operate through air freight and passenger transportation service between Portland, Oreg., on the one hand, and Alaskan cities upon the other, pending a general investigation known as the States-Alaska Case, covering the issuance of permanent certificates authorizing such operations; and

"Whereas by reason of this through air transportation service, inaugurated and maintained by these airlines during the past several years, a vital pattern of trade and commerce has been developed as between the industries and businesses of the State of Oregon and the Territory of Alaska, and as a result Oregon industries and businesses are enjoying a rapidly increasing air cargo commerce with industries and businesses in Alaskan cities, while through passenger service is encouraging and building a close tie of friendly business relationship, and thus this service has proved to be an absolute necessity in the public interest; and

"Whereas during 1954 the Civil Aeronautics Board, in the course of their general investigation, caused public hearings to be held respecting the question of adequate air transportation service in the public interest between the United States and the Territory of Alaska, and at these hearings the business interests of the city of Portland and the State of Oregon, supported by the Public Utilities Commissioner of Oregon, intervened in support of a permanently maintained through air transportation service, both air cargo and passenger, between Portland, Oreg., and Alaskan cities, while Seattle business interests, supported by the Washington Public Service Commission, took a position favoring a monopoly of Alaskan air commerce by Seattle commercial interests in that they advocated that presently existing through air transportation operation between Portland, Oreg., and Alaskan cities should be done away with as uneconomical, and that all temporary airline certificates be rescinded, and that Seattle, Wash., should be permanently designated as the sole and exclusive terminal of all air commerce between the Territory of Alaska and the United States of America; and

"Whereas thereafter an initial decision was proposed by the Chief Hearing Examiner to the Civil Aeronautics Board recommending the granting of the request and contentions of Seattle business and commercial interests by the creation of a virtual monopoly of air trade and commerce in favor of Seattle, and limiting all through air transportation service between the Territory of Alaska and the United States to the one single air terminal located in and near Seattle, Wash., and rescinding all temporary certificates held by airlines now serving Portland, Oreg., maintaining through air transportation service between Portland and Alaskan cities, thereby slamming shut the door of trade and commerce between Alaska and the State of Oregon and strangling all competition which is the very essence and life of American commerce, all to the great detriment and loss of not only the businesses,

industries and the people generally of Oregon, but also to the detriment and loss of citizens of the Territory of Alaska and their new and growing industries; and

"Whereas presently existing air trade and commerce between the United States and the Territory of Alaska was found by the Civil Aeronautics Board investigation, through its Chief Hearing Examiner and staff, to be an absolute necessity in the public interest, as shown by the following quoted excerpt from the examiner's report:

" 'No territory under the American flag is so dependent upon air transportation as the vast land area of Alaska. The last frontier of the United States contains a vast wealth of natural resources and is so located as to play a vital role in the defense plans of the Nation. Unlike other parts of the United States, there are no alternative modes of transportation in Alaska—the river boats and the dog team have, to a large part, been displaced by the airplane.

" 'Inadequate, unreliable, and high cost shipping from the States to Alaska has played a large part in the development of the Territory as an area of high costs with a consequent deterring effect upon its growth. In addition to the high transportation charges incurred in the transportation of cargo to Alaska, the uncertainties inherent in the system in the past have resulted in the necessity for maintaining unusually high inventories. The problem of spoilage in perishable products has been another problem resulting from the transportation lack. * * * Neither the sea route nor the highway route can offer a reasonably comparable service from standpoint of time, and both of these routings are of limited use during the winter months'; and

"Whereas it has been reliably reported that the membership of the Civil Aeronautics Board has finally adopted the detrimental recommendations of the Chief Hearing Examiner, basing their conclusions upon the concept that economy of operations demands a cessation of through air transportation service between Portland, Oreg., and Alaskan cities, even though a strangling monopoly is created and established thereby in favor of Seattle businesses and industries, and despite the apparent fact that the public interest of Oregon will suffer great and irreparable damage while the Territory of Alaska becomes competitively shackled respecting its air trade and commerce with the United States; and

"Whereas if the aforesaid decision becomes the final decision of the Civil Aeronautics Board, all air transportation operations between Portland Oreg., and Alaskan cities will be subject to the additional costs of terminal operations at Seattle, Wash., made necessary by the combination of local flights to Seattle with through flights from thence on to Alaskan cities, which will warrant necessary additional overhead costs of separate organization, separate billing and handling expense on air cargo, and under well recognized court decisions covering rates and charges for transportation, increased rate charges for these additional terminal services are justified, and it is obvious that any proposed shuttle service between Seattle and Portland, and thence by through service to Alaska, on all movements of air cargo, as well as passenger, would entail added rates and charges which will have the effect of doing away entirely with any competitive aspects of air transportation, trade and commerce as between Portland and Seattle in relation to the markets and cities of the Territory of Alaska: Be it

"Resolved by the House of Representatives of the State of Oregon (the Senate jointly concurring therein), That the President of the United States and the Secretary of the Interior be hereby memorialized to bring this most vital transportation and economic situation to the attention of the honorable membership of the United States Civil Aeronautics Board, through established procedures, in behalf of the public interest of the people of the State of Oregon, to insure the protection of the public interest in Oregon, as well as the Territory of Alaska, and avert the grave economic consequences which will inevitably follow if an air trade and commerce monopoly is created in flavor of the business and commercial interests of Seattle to the exclusion of the commercial and trade interests of the city of Portland, Oreg., by the establishment of through air transportation service as between Seattle, Wash., only, and Alaskan cities, while denying the same through air transportation service between Portland, Oreg., and Alaskan cities, in direct violation of the competitive principles of trade and commerce which is the very essence of the American system and way of life; and be it further

"Resolved, That the secretary of state of the State of Oregon, is hereby directed to present official copies of this memorial and resolution, through proper channels, to the President of the United States and to the Secretary of the Interior for their consideration and action relative to any decision which might throttle air trade and commerce as between Oregon and the Territory of Alaska, and create a virtual monopoly in behalf of Seattle, Wash., detrimental to the public interest of both the State of Oregon and the Territory of Alaska.

"Adopted by house February 1, 1955.

"E. A. GEARY,
"Speaker of the House.

"Adopted by senate February 11, 1955.

"ELMO E. SMITH,
"President of the Senate."

By Mr. JOHNSTON of South Carolina:

A resolution of the House of Representatives of the State of South Carolina; to the Committee on Rules and Administration:

"House resolution memorializing the electors of the Hall of Fame at New York University to consider the name of Gen. Thomas J. 'Stonewall' Jackson for inscription in the Hall of Fame

"Whereas the President of the United States in an address to the United Daughters of the Confederacy in Washington, D. C., on November 10, 1953, referred to Robert E. Lee and Thomas J. 'Stonewall' Jackson as holding before us a veneration for ideals, a conviction that to rise high in your profession you do not have to surrender principle; and

"Whereas the President in the same address further said: 'If you had no other reason for existence except to hold before Americans the memory, the accomplishments, the characters, and the qualities of these two men, I still think your Association would be well worthwhile'; and

"Whereas one of these distinguished Generals referred to by the President, Robert E. Lee, is now honored in the Colonade of the Hall of Fame; and

"Whereas 'Stonewall' Jackson has been referred to as the 'Perfect Lieutenant' and the right hand of Lee; and

"Whereas distinguished heads of State, soldiers, statesmen, authors, poets, and scholars have for many years paid high tribute to General Jackson; and

"Whereas the fame of 'Stonewall' Jackson is known throughout the civilized world, and has become the birthright of every man privileged to call himself an American; and

"Whereas the Jacksonian principles of military tactics and discipline have been and are now studied by military leaders of all nations; it seems fitting that his name should be forever enshrined in the Hall of Fame: Now, therefore, be it

"Resolved by the House of Representatives of the State of South Carolina, That the electors of the Hall of Fame are urged to consider the name of Thomas J. 'Stonewall' Jackson for inscription in the Hall of Fame and if at all possible be so placed that it will be near the colonnade of Robert E. Lee; be it further

"Resolved, That a copy of this resolution be mailed to each Member of the South Carolina congressional delegation and to the director of the Hall of Fame at 17 East 80th Street, New York City, for dissemination to each member of the Electors College."

By Mr. HUMPHREY:

A concurrent resolution of the Legislature of the State of Minnesota; to the Committee on Interstate and Foreign Commerce:

"Concurrent resolution memorializing the President of the United States, the Federal Maritime Board, and the Congress of the United States to support measures to restore package freight service on the Great Lakes

"Whereas the Congress of the United States under Public Law 856 enacted by the 81st Congress, provided that certain surplus vessels could be reconverted for use as package freighters on the Great Lakes; and

"Whereas the vessels which were so reconverted were not used for the purpose intended because of the outbreak of the Korean war, but were assigned to the carrying of iron ore; and

"Whereas prior to World War II package freight was a major Minnesota industry. In excess of 700,000 tons of freight were shipped to and from the port of Duluth during the last year that package freighters operated on the Great Lakes. Included in said shipments from the State of Minnesota were approximately 64,000 tons of butter; 6,000 tons of buttermilk; 12,000 tons of cheese; 28,000 tons of cream; 6,000 tons of eggs; 45,000 tons of dressed poultry; 170,000 tons of flour; 107,000 tons of mill products; in excess of 18,000 tons of wool; 19,000 tons of lumber; 3,000 tons of paper products; and in excess of 40,000 tons of manufactured metal products; and

"Whereas this trade benefited every segment of the Minnesota economy including the great agriculture and manufacturing industries; and

"Whereas the discontinuance of this trade not only has adversely affected our agriculture and manufacturing industries, but has caused substantial unemployment in the maritime industries at the head of the Great Lakes; and

"Whereas the restoration of package freight service on the Great Lakes not only will substantially contribute to the wellbeing and growth of Minnesota industry, provide a market for products grown and manufactured in Minnesota, both at home and abroad, but will also help reduce unemployment and more importantly will provide a stepping stone to the maximum use of the facilities of the part of Duluth for international trade when the St. Lawrence seaway has been completed: Now, therefore, be it

"Resolved by the house of representatives, (the senate concurring), That the President of the United States, the Federal Maritime Board, and the Congress of the United States be memorialized to effect the restoration of package freight service on the Great Lakes; be it further

"Resolved, That the secretary of state be instructed to transmit copies of this resolution to the President of the United States, to the Chairman of the Federal Maritime Board, and to each Member of Congress from the State of Minnesota.

"Adopted by the house of representatives, the 1st day of February 1955.

"ALFRED I. JOHNSON,
"Speaker of the House of Representatives.

"G. H. LEAHY,
"Chief Clerk, House of Representatives.

"Adopted by the senate, the 11th day of February 1955.

"KARL F. ROLVAAG,
"President of the Senate.

"H. Y. TORREY,
"Secretary of the Senate.

"Approved February 18, 1955.

"ORVILLE J. FRUMAN,
"Governor of the State of Minnesota."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ELLENDER, from the Committee on Agriculture and Forestry, without amendment:

S. 941. A bill to amend section 13 of the Federal Farm Loan Act, as amended, to authorize the Federal land banks to purchase certain remaining assets of the Federal Farm Mortgage Corporation; (Report No. 37);

S. 942. A bill to repeal Public Law 820, 80th Congress (62 Stat. 1098), entitled "An act to provide a revolving fund for the purchase of agricultural commodities and raw materials to be processed in occupied areas and sold."; (Report No. 38); and

S. 1051. A bill to amend section 8a (4) of the Commodity Exchange Act, as amended; (Report No. 39).

By Mr. EASTLAND, from the Committee on Agriculture and Forestry:

S. 752. A bill to amend section 102 (a) of the Agricultural Trade Development and Asssitance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks; with an amendment (Report No. 40).

INCREASED EXPENDITURES AND EMPLOYMENT OF ADDITIONAL ASSISTANTS BY COMMITTEE ON BANKING AND CURRENCY—REPORT OF A COMMITTEE

Mr. SPARKMAN. Mr. President, from the Committee on Banking and Currency, I report favorably, without amendment, the resolution (S. Res. 57) authorizing further expenditures and temporary employment of additional assistants by the Committee on Banking and Currency to study public and private housing, and I submit a report (No. 42) thereon. I ask unanimous consent that the report be printed, and that the resolution and report be referred to the Committee on Rules and Administration, for action by that committee.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Alabama? The Chair hears none, and the report will be received, and printed, and the resolution and report will be referred to the Committee on Rules and Administration.

INCREASED COMPENSATION FOR OFFICERS AND EMPLOYEES OF POST OFFICE DEPARTMENT—REPORT OF A COMMITTEE. (S. REPT. NO. 41)

Mr. JOHNSTON of South Carolina. Mr. President, I submit a favorable report on Senate bill 1, to increase the rate of basic compensation for officers and employees in the Post Office Department, with an amendment. I ask unanimous consent that the views of the minority be filed in connection therewith.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service:

One hundred and fifty-three postmasters.

By Mr. GEORGE, from the Committee on Foreign Relations:

Julius C. Holmes of Kansas, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary to Iran, vice Loy W. Henderson;

Laird Bell, of Illinois, to be a member of the United States Advisory Commission on Educational Exchange, vice James L. Morrill, resigned;

Arthur Hollis Edens, of North Carolina, to be a member of the United States Advisory Commission on Educational Exchange;

Anna L. Rose Hawkes, of Vermont, to be a member of the United States Advisory Commission on Educational Exchange; and

Robert H. S. Eakens, of Texas, and sundry other persons for appointment as Foreign Service officers of class 2, consuls, and secretaries in the diplomatic service.

By Mr. ELLENDER, from the Committee on Agriculture and Forestry:

Sam H. Bober, of South Dakota, to be a member of the Federal Farm Credit Board, vice Raymond Sayre, deceased.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAPEHART:

S. 1251. A bill to amend the Railroad Retirement Act to provide that the annuity of the widow of a deceased employee shall not be reduced on account of any benefits to which she may be entitled under the Social Security Act; to the Committee on Labor and Public Welfare.

By Mr. YOUNG:

S. 1252. A bill to provide price support for class II durum wheat of the 1955 crop at 125 percent of parity; to the Committee on Agriculture and Forestry.

By Mr. JENNER (by request):

S. 1253. A bill for the relief of Peter Skole; to the Committee on the Judiciary.

By Mr. LANGER:

S. 1254. A bill creating a Federal commission to study the copyright laws and to make recommendations for their revision; and

S. 1255. A bill for the relief of Brigitta Poberetski; to the Committee on the Judiciary.

By Mr. KILGORE:

S. 1256. A bill to provide for the appointment of additional circuit and district judges;

S. 1257. A bill for the relief of Col. Walter E. Ahearn, and others;

S. 1258. A bill to permit the naturalization of certain persons by reason of honorable service in the United States Navy prior to December 24, 1952;

S. 1259. A bill to amend the act of January 12, 1951, as amended, to continue in effect the provisions of title II of the First War Powers Act, 1941; and

S. 1260. A bill to authorize the grant or retrocession to a State of concurrent jurisdiction over certain land; to the Committee on the Judiciary.

(See the remarks of Mr. KILGORE when he introduced the above bills, which appear under a separate heading.)

By Mr. SMITH of New Jersey (for himself and Mr. CASE of New Jersey):

S. 1261. A bill to authorize the conveyance of certain lands within Caven Point terminal and ammunition loading pier, New Jersey, to the New Jersey Turnpike Authority; to the Committee on Armed Services.

By Mr. BEALL:

S. 1262. A bill to transfer ownership to Allegany County, Md., of a bridge loaned to such county by the Bureau of Public Roads; to the Committee on Public Works.

By Mr. BEALL (for himself and Mr. BUTLER):

S. 1263. A bill for the relief of the city of Frederick, Md.; to the Committee on the Judiciary.

By Mr. CASE of South Dakota:

S. 1264. A bill to amend the act of April 6, 1949, to extend the period for emergency assistance to farmers and stockmen; to the Committee on Agriculture and Forestry.

By Mr. DOUGLAS:

S. 1265. A bill for the relief of Francisco-Manuel Gonzalez Abad and Jose Maria Gonzalez Abad;

S. 1266. A bill for the relief of Helene Margareta Jobst; and

S. 1267. A bill for the relief of Lionginas Kublickas, Juozas Grismanauskas, and Edmondas Paulauskas; to the Committee on the Judiciary.

By Mr. CLEMENTS (for Mr. BIBLE):

S. 1268. A bill to authorize the establishment of a National Minerals Advisory Council; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. CLEMENTS when he introduced the above bill, which appear under a separate heading.)

By Mr. CLEMENTS (for Mr. MURRAY, Mr. DOUGLAS, Mr. LEHMAN, Mr. PASTORE, Mr. KENNEDY, and Mr. MCNAMARA):

S. 1269. A bill to amend the National Labor Relations Act, as amended, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. CLEMENTS (for Mr. SMATHERS):

S. 1270. A bill for the relief of Lloyd Alfred Fisher; to the Committee on the Judiciary.

By Mr. WILEY:

S. 1271. A bill to authorize the appointment in a civilian position in the Department of Justice of Brig. Gen. Edwin B. Howard, United States Army, retired, and for other purposes; and

S. 1272. A bill to authorize the appointment in a civilian position in the Department of Justice of Maj. Gen. Frank H. Partridge, United States Army, retired, and for other purposes; to the Committee on Armed Services.

S. 1273. A bill to amend sections 1, 3, and 4 of the Foreign Agents Registration Act of 1938, as amended; to the Committee on the Judiciary.

(See the remarks of Mr. WILEY when he introduced the above bills, which appear under separate headings.)

By Mr. NEELY (by request):

S. 1274. A bill to amend the act approved March 3, 1899 (30 Stat. 1045, 1057, ch. 422), to provide for the appointment by the Commissioners of the District of Columbia of special policemen, and for other purposes;

S. 1275. A bill to authorize the Commissioners of the District of Columbia to designate employees of the District to protect life and property in and on the buildings and grounds of any institution located upon property outside of the District of Columbia acquired by the United States for District sanatoriums, hospitals, training schools, and other institutions;

S. 1276. A bill to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes," approved March 1, 1907; and

S. 1277. A bill to amend the act entitled "An act to control the possession, sale, transfer, and use of pistols and other dangerous weapons in the District of Columbia, to provide penalties, to prescribe rules of evidence, and for other purposes," approved July 8, 1932; to the Committee on the District of Columbia.

By Mr. STENNIS:

S. 1278. A bill to further define self-employed individuals for purposes of the Federal old-age and survivors insurance system; and

S. 1279. A bill to provide that services performed by agricultural employees who are not employed by the same employer for more than 60 days in a calendar year shall not be considered to be employment for the purposes of coverage under the Federal old-age and survivors insurance system; to the Committee on Finance.

(See the remarks of Mr. STENNIS when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. HUMPHREY:

S. 1280. A bill to provide for the uniform classification of certain persons who are subject to the provisions of the Universal Military Training and Service Act; to the Committee on Armed Services.

S. 1281. A bill to exempt from tax billiard and pool tables maintained by religious organizations if no charge is made for their use; to the Committee on Finance.

S. 1282. A bill to amend the Veterans' Readjustment Assistance Act of 1952 so as to extend until July 1, 1959, the basic service period for establishing eligibility for educational benefits; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HUMPHREY when he introduced the last above-mentioned bill, which appear under a separate heading.)

S. 1283. A bill to extend the times for commencing and completing the construction of a toll bridge across the Rainy River at or near Baudette, Minn.; to the Committee on Public Works.

By Mr. MUNDT:

S. 1284. A bill for the relief of James P. Burke; to the Committee on the Judiciary.

By Mr. CLEMENTS (for Mr. MURRAY, Mr. DOUGLAS, Mr. LEHMAN, Mr. PASTORE, Mr. KENNEDY, and Mr. MCNAMARA):

S. 1285. A bill to amend the Davis-Bacon Act, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. ELLENDER (by request):

S. 1286. A bill to provide for retirement of the Government capital in certain institutions operating under the supervision of the Farm Credit Administration; to increase borrower participation in the management and control of the Federal farm credit system; and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. SPARKMAN:

S. 1287. A bill to make certain increases in the annuities of annuitants under the Foreign Service retirement and disability system; to the Committee on Foreign Relations.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. DWORSHAK:

S. 1288. A bill to amend the Fair Labor Standards Act of 1938 to include in the definition of "agriculture" the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained and operated for farming purposes, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. CLEMENTS (for Mr. BIBLE and Mr. KNOWLAND):

S. J. Res. 51. Joint resolution extending an invitation to the International Olympic Committee to hold the 1960 winter Olympic games at Squaw Valley, Calif.; to the Committee on Foreign Relations.

By Mr. BYRD:

S. J. Res. 52. Joint resolution proposing an amendment to the Constitution of the United States relative to disapproval of items or provisions in appropriation bills; to the Committee on the Judiciary.

(See the remarks of Mr. BYRD when he introduced the above joint resolution, which appear under a separate heading.)

SUNDRY BILLS FOR CONSIDERATION OF JUDICIARY COMMITTEE

Mr. KILGORE. Mr. President, I introduce, for appropriate reference, five bills which have been submitted by the Administrative Office of the United States Courts, the Department of the Army, and the Department of the Navy.

I ask unanimous consent that there be printed in the RECORD to accompany each of these bills the letters forwarded on these proposals, by the Administrative Office of the United States Courts, the Department of the Army, and the Department of the Navy, recommending the enactment of such legislation.

The PRESIDENT pro tempore. The bills will be received and appropriately referred; and, without objection, the letters accompanying the bills will be printed in the RECORD.

The bills, introduced by Mr. KILGORE, were received, read twice by their titles, and referred to the Committee on the Judiciary, as follows:

S. 1256. A bill to provide for the appointment of additional circuit and district judges.

(The letter accompanying Senate bill 1256 is as follows:)

ADMINISTRATIVE OFFICE OF THE
UNITED STATES COURTS,
Washington, D. C., January 5, 1955.

Hon. RICHARD M. NIXON,
Vice President of the United States,
United States Senate,
Washington, D. C.

DEAR MR. VICE PRESIDENT: On behalf of the judicial conference of the United States, I transmit herewith for the consideration of the Congress a draft of a bill providing for additional circuit judgeships and district judgeships which have heretofore been recommended by the judicial conference but not authorized by the Congress. I hope that the bill may be introduced in the Senate and referred to the appropriate committee for consideration. Evidence concerning the business of each of the courts involved and the need of the additional judgeships is ready to be adduced when a hearing is held. The need is urgent and I therefore trust that a hearing may be set as soon as practicable.

Thanking you for your consideration, I am,

Sincerely yours,

HENRY P. CHANDLER.

S. 1257. A bill for the relief of Col. Walter E. Ahearn, and others.

(The letter accompanying Senate bill 1257 is as follows:)

DECEMBER 23, 1954.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There are forwarded herewith a draft of legislation "For the relief of Col. Walter E. Ahearn, and others" and 4 enclosures explaining in detail the overpayments for which legislative relief is requested for certain disbursing officers of the Army, Navy, Air Force, and Marine Corps.

This proposed legislation is a part of the Department of Defense legislative program for 1955. The Bureau of the Budget interposes no objection to the submission of this proposal to the Congress. The Department of the Army has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted.

PURPOSE OF THE LEGISLATION

The objective of the proposed bill is to clear the accounts of the named disbursing officers of the amounts listed in the draft of bill, which amounts represent errors that occurred in making payments to certain individuals during the period July 1, 1948, through June 30, 1952, and resulted in disallowances by the Comptroller General of the United States. The enclosures include descriptions of the erroneous payments made, a résumé of the circumstances under which they occurred, and statements regarding the collection actions taken with regard thereto.

The absence of negligence on the part of disbursing officers, the impossibility of securing voluntary refunds from the payees, or the impracticability of enforcing collection against the recipients of erroneous payments does not operate to relieve the disbursing officers of the technical responsibility with which they are charged under the statutes and under their bonds. Further, the accounts of these disbursing officers cannot be cleared under any provision of law currently in effect or now under consideration in the Congress. For the protection of the Government, that is, in order to bring suits against the surety companies because of shortages in the disbursing officers' accounts within the 5-year limitation required by the act of July 31, 1947 (61 Stat. 646; 6 U. S. C. 5), the Comptroller General has caused suits to be filed against the sureties of the bonds of certain disbursing officers named in the proposed legislation, or the Comptroller General has referred to the Department of Justice, for institution of legal proceedings, deficiencies in the accounts of certain disbursing officers named in the proposed legislation. The legislative relief herein proposed is required to stay or prevent further judicial proceedings against the named disbursing officers in those cases where collections have not been effected from the payees. This legislative relief in no way affects the right of the Government to continue collection action against the payees.

The proposed legislation, if enacted, will authorize the relief of each disbursing officer of the accountability and responsibility and will allow credit in the official disbursing accounts in the amount shown or in such lesser amount as may be necessary to adjust his account up to the maximum stated. This language is considered necessary since collection actions are being continued and the exact amount of relief which ultimately will be required for each disbursing officer cannot now be determined. The amount set forth in the proposed bill opposite the name of each disbursing officer is the maximum amount for which such disbursing officer is believed to be presently indebted to the United States by reference to current records.

Where the circumstances surrounding disbursements indicate that reasonable care and attention have been given to the performance of the disbursing duty, and where every effort has been made to recoup to the United States the amounts of erroneous payments, the relief of disbursing officers of technical accountability is considered distinctly in the interest of the United States, when viewed from the standpoint of justice to a group of public servants.

Attention is also invited to the fact that the number of disallowances which are represented by the amounts listed in the bill and the total amount represented thereby are negligible when measured against total payments made by such disbursing officers of hundreds of millions of dollars to a great number of payees.

The proposed legislation further provides for the refund to any disbursing officer named, or his heirs, if deceased, if any amount of the overpayments described herein is refunded by the disbursing officer or his heirs to clear his account, or if any amount due the disbursing officer or his heirs is set off against any of the overpayments made by the disbursing officer. Such amounts are to be paid from the account to which credited, if such account is available for disbursement, or if not, to be paid from the appropriation set aside for the

payment of certified claims. It also provides that the relief granted shall be considered and construed as precluding recovery from the disbursing officer of any interest charges arising from any item included in the overpayment so cleared or relieved.

The proposed relief legislation contains cases not within the purview of (1) the act of December 13, 1944 (58 Stat. 800), relating to relief of disbursing officers of the Army on account of the physical loss of Government funds, vouchers, records, or papers in their charge; (2) the act of December 23, 1944 (58 Stat. 921), losses due to exchange transactions; (3) the act of July 26, 1947 (61 Stat. 493), authorizing the Comptroller General of the United States, within 2 years, to relieve disbursing officers and certifying officers, and special disbursing agents of the War and Navy Departments of accountability or responsibility for losses of public funds, and of responsibility for erroneous and illegal payments occurring between September 8, 1939, and July 1, 1946; (4) the proposed amendment to the act of July 26, 1947, supra, to extend coverage for payments made from September 8, 1939, to July 1, 1948, as originally authorized by that act for a more limited period, now incorporated in the act of March 17, 1954 (Public Law 310, 83d Cong.); (5) legislation for the relief of Col. Samuel J. Adams and others incorporated in the act of August 31, 1954 (Private Law 957); and (6) the act of June 3, 1954 (Private Law 391, 83d Cong.), for the relief of Col. Henry M. Denning and others.

LEGISLATIVE REFERENCES

Legislation identical with the attached draft of bill was submitted by the Department of Defense to the 83d Congress on June 14, 1954, and introduced in the form of H. R. 9597. No further congressional action was taken on that bill.

COST AND BUDGET DATA

The enactment of the proposed legislation will not entail an expenditure from Federal funds, except as to any amounts that might be refunded to any disbursing officer or his heirs under section 2 thereof, but will validate approximately $157,159.64 in the accounts of disbursing officers concerned for disallowances by the Comptroller General of the United States.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

S. 1258. A bill to permit the naturalization of certain persons by reason of honorable service in the United States Navy prior to December 24, 1952.

(The letter accompanying Senate bill 1258 is as follows:)

DEPARTMENT OF THE NAVY,
Washington, January 5, 1955.

Hon. RICHARD M. NIXON,
President of the Senate,
United States Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: There is forwarded herewith a draft "To permit the naturalization of certain persons by reason of honorable service in the United States Navy prior to December 24, 1952."

This proposal is part of the Department of Defense Legislative Program for 1955 and the Bureau of the Budget has advised that there would be no objection to the presentation of this proposal for the consideration of the Congress. The Department of the Navy has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

The purpose of this proposed legislation is to permit the naturalization of those Filipinos who by reason of honorable service in the United States Navy were eligible for naturalization under the Nationality Act of 1940, but who because they have not been lawfully admitted to the United States for permanent residence are not now eligible for naturalization under the Immigration and Nationality Act.

Section 324 of the Nationality Act of 1940 (54 Stat. 1149) enabled a member of the Armed Forces, including a native-born Filipino, who was not a citizen of the United States and who had served honorably at any time in the Armed Forces of the United States for a period or periods aggregating 3 years, to be naturalized expeditiously without having met certain normal requirements such as lawful admission into the United States for permanent residence.

The Nationality Act of 1940 was repealed by the Immigration and Nationality Act, which Act became effective December 24, 1952. Section 323 of the Immigration and Nationality Act provides that persons in the Armed Forces of the United States who have served honorably for a period of 3 years may be naturalized without having been physically present in the United States for any specified period and without meeting certain other normal residence requirements. This section, however, differs from section 324 of the Nationality Act of 1940 in that it requires that the application must have been lawfully admitted to the United States for permanent residence in order to qualify for naturalization under its provisions.

The majority of the Filipinos in the naval service were enlisted in the Philippine Islands and have never been lawfully admitted to the United States for permanent residence. Of those who were eligible for naturalization prior to December 24, 1952, the effective date of the Immigration and Nationality Act, some were prevented from filing petitions for naturalization before that date because of service outside of the United States, and others did file their petitions but the petitions were received too late to be processed before December 24, 1952. Because of the small annual immigration quota of 438 allotted the Philippine Islands by Presidential Proclamation No. 2980, it is now virtually impossible for these Filipinos to qualify for naturalization.

Enactment of the proposed legislation would waive the requirement of lawful admission into the United States for permanent residence in the case of those Filipinos who, by reason of honorable service in the United States Navy prior to December 24, 1952, are otherwise eligible for naturalization under section 328 of the Immigration and Nationality Act, if petition for naturalization is filed within 3 years after the effective date of the legislation. Many of these Filipinos are serving in areas where there is no naturalization court before which they may appear. A period of 3 years during which they may file petitions for naturalization is necessary in order to permit them to make the required appearance through normal rotation of duty. It is estimated that approximately 2,800 Filipinos would become eligible for naturalization by the enactment of this proposed legislation. Past experience, however, has shown that not all Filipinos in the naval service desire to become United States citizens, some preferring instead to return to their homeland upon final discharge from the Navy or transfer to Fleet Reserve. This figure, therefore, represents the maximum number who would become eligible for naturalization by the enactment of this proposed legislation.

LEGISLATIVE REFERENCE

This proposal was submitted to the 83d Congress by the Department of the Navy on June 21, 1954, as a part of the Department of Defense legislative program for 1954. It was introduced as H. R. 9755 and S. 3739. No further action was taken by the Congress with respect to the proposal.

COST AND BUDGET DATA

The Immigration and Naturalization Service has advised that the enactment of this proposed legislation would involve additional cost to the Government of possibly $30,000.

Sincerely yours,

C. S. THOMAS.

S. 1259. A bill to amend the act of January 12, 1951, as amended, to continue in effect the provisions of title II of the First War Powers Act, 1941.

(The letter accompanying Senate bill 1259 is as follows:)

DEPARTMENT OF THE NAVY,
Washington, D. C., February 7, 1955.

Hon. RICHARD M. NIXON,
President of the Senate,
United States Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation, "To amend the act of January 12, 1951, as amended, to continue in effect the provisions of title II of the First War Powers Act, 1941."

This proposal is part of the Department of Defense legislative program for 1955, and the Bureau of the Budget has advised that it is in accord with the program of the President. The Department of the Navy has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

The proposed legislation would amend section 2 of the act of January 12, 1951 (64 Stat. 1257; 50 U. S. C. App. 611, Note), as amended (Public Law 426, 82d Cong., and Public Laws 97 and 443, 83d Cong.), so as to continue the effectiveness of title II of the First War Powers Act, 1941, for the duration of the national emergency proclaimed December 16, 1950, or until June 30, 1957, whichever is earlier. Public Law 443 of the 83d Congress last extended that authority until June 30, 1955. This 2-year extension of title II of the First War Powers Act, 1941, was urged by the President in his state of the Union message (p. 6, H. Doc. No. 1, 84th Cong.).

Under the provisions of the existing law the President may authorize any department or agency of the Government exercising functions in connection with the prosecution of the national-defense effort to enter into contracts and into amendments or modifications of contracts and to make advance, progress, and other payments thereon, without regard to the provisions of the law relating to the making, performance, amendment, or modification of contracts whenever he deems such action would facilitate the national defense, subject however, to the additional provisions which are set forth in title II of the First War Powers Act, 1941.

Also by the authority of that title, the Deparment of Defense is empowered to amend contracts without consideration. This includes the extension of the time of performance of contracts and the waiver of liquidated damage and performance bonds by the United States.

The Department of Defense is currently authorized to make advance payments on advertised contracts. Without the authority granted by title II of the First War Powers Act, 1941, the Department of Defense could make advance payments only on negotiated contracts.

The exercise of title II authority permits the defense agencies to make the necessary adjustments to assure the continued availability of essential productive capacity. Without this authority, it will be impossible to use the special procurement techniques necessary and proper in situations of military or production urgency, which other permanent laws are not designed to afford. It is believed that the extension of title II

of the First War Powers Act, 1941, as amended, is vitally necessary in order to supplement other contract authority and to insure an uninterrupted performance of contracts to facilitate the national defense.

COST AND BUDGET DATA

The enactment of this legislation would cause no apparent increase in budgetary requirements insofar as the Department of Defense is concerned.

Sincerely yours,

C. S. THOMAS.

S. 1260. A bill to authorize the grant or retrocession to a State of concurrent jurisdiction over certain land.

(The letter accompanying Senate bill 1260 is as follows:)

DECEMBER 23, 1954.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation, "To authorize the grant or retrocession to a State of concurrent jurisdiction over certain land."

This proposed legislation is a part of the Department of Defense Legislative Program for 1955. The Bureau of the Budget interposes no objection to the submission of this proposal to the Congress. The Department of the Army has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted.

PURPOSE OF THE LEGISLATION

The purpose of this legislation is to authorize the grant or retrocession to a State of concurrent jurisdiction over lands otherwise under the exclusive jurisdiction of the United States so as to enable the State to provide for the control of roads, streets, highways, or other rights of way thereon. This authority is needed primarily to avoid problems that arise out of the policing by military personnel of highways that are situated within a military reservation but used extensively by the civilian public as well as by military personnel. It would provide for the retention, at the same time, of appropriate military control over the area.

This proposal would provide for the creation in a State of jurisdiction over land without any relinquishment by the Federal Government of its jurisdiction of title to the land. Any grant or retrocession of jurisdiction pursuant to its terms would take effect only upon the acceptance thereof by the State concerned. The authority to make the grant or retrocession of such jurisdiction would be vested in the heads of departments, independent establishments or agencies of the Federal Government, including the Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force, in much the same manner as such officers are now authorized by section 355 of the Revised Statutes, as amended, to accept or secure from a State consent to or cessation of exclusive or partial jurisdiction.

The act of May 23, 1950 (64 Stat. 187) provides for the retrocession to the Commonwealth of Massachusetts of jurisdiction over a highway transversing Fort Devens. The act of April 15, 1952 (66 Stat. 60) provides for the retrocession to the State of North Carolina of jurisdiction over a highway transversing Fort Bragg. The act of May 27, 1953 (Public Law 38, 83d Cong.) provides for the retrocession to the Commonwealth of Virginia of jurisdiction over a highway transversing Fort Belvoir. Public Law 41, 83d Congress, provides for the retrocession to the State of Oklahoma of jurisdiction over a highway transversing Fort Sill.

Problems involving the policing of a highway transversing a military reservation have arisen at a number of military installations. This proposal would provide a means for alleviating the particular problems that have arisen at such installations as well as similar problems that may arise in the future at these and at other installations without the necessity of special legislation by the Congress in each case.

LEGISLATIVE REFERENCES

A similar legislative proposal was included in the Department of Defense Legislative Program for 1954 and was submitted to the 83d Congress in January 1954 and introduced as H. R. 7111. That proposal passed the House of Representatives on May 17, 1954, with a minor technical amendment (House Rpt. No. 1558, dated May 5, 1954). The inclosed proposal is identical with H. R. 7111 as it passed the House of Representatives.

COST AND BUDGET DATA

The enactment of this proposal will cause no apparent increase in the budgetary requirements for the Department of Defense.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

NATIONAL MINERALS ADVISORY COUNCIL

Mr. CLEMENTS. Mr. President, on behalf of the junior Senator from Nevada [Mr. BIBLE], I introduce, for appropriate reference, a bill to authorize the establishment of a National Minerals Advisory Council. I ask unanimous consent that a statement prepared by the junior Senator from Nevada be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 1268) to authorize the establishment of a National Minerals Advisory Council, introduced by Mr. CLEMENTS (for Mr. BIBLE), was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

The statement presented by Mr. CLEMENTS is as follows:

STATEMENT BY SENATOR BIBLE

I have today introduced a bill to establish a National Minerals Advisory Council in the Department of the Interior. The bill provides that members of the council are to be persons familiar with mining and the minerals industries. It does not place a limitation on the number of members who shall compose the council but it does provide that the council shall meet not less than four times each year and may meet more frequently at the call of the Secretary of the Interior. The chairman of the council would be designated by the Secretary.

The council's major function would be to advise, consult with, and make recommendations to the Secretary concerning activities and duties of the Secretary relating to mining and the minerals industries, including matters of policy. Council members would be compensated on a per-diem basis for the time actually engaged in advisory or consultative purposes in conjunction with council activities.

A National Minerals Advisory Council is not a new idea. Such a council was originally organized without benefit of authorizing legislation in 1947 and dissolved in 1952 at the insistence of the Department of Justice because of antitrust objections.

Hearings on a bill to establish a National Minerals Advisory Council were held before the House Committee on Interior and Insular Affairs in May 1954. At that time, representatives of the Department of the Interior expressed a need for the enactment of such legislation. However, at that time the Department of the Interior and the Department of Justice had been unable to reach a satisfactory agreement with respect to establishment of such a council without impinging upon the antitrust laws.

It is felt that proper statutory authority from the Congress for such a council could meet those objections.

In its report to President Eisenhower on November 30, 1954, the President's Cabinet Committee on Minerals Policy, made a strong recommendation along these lines. I quote from recommendation No. 11, under the heading "Development of Domestic Mineral Resources," contained in the Committee report:

"It is recommended that the Secretary of the Interior develop ways and means of establishing and maintaining through some workable body the contacts between the mining industry and Government necessary to give force and effect to policies recommended herein."

In my judgment, in effect the practical implementation of the entire Committee report hinges on a workable body similar to the council proposed herewith. This Committee is composed of the Secretary of the Interior as Chairman, the Secretary of State, the Secretary of Commerce, and the Director of the Office of Defense Mobilization.

The original establishment of the National Minerals Advisory Council came about after persistent criticism of the lack of concern for the mining industry and the failure to heed the advice of its leaders on the governmental level. Initially, the Council membership came from industry alone, but it was later expanded to include technical experts, fabricators, and large consumers of metals. Public members were later added.

After the Defense Production Act of 1950 was approved, the Department of Justice set down certain criteria to guide all department advisory committees. Such were set down in a letter of October 19, 1950, which, as printed on page 27, House Report 1217, 82d Congress, follows:

"MY DEAR ———: In several instances various Government departments have requested the views of the Department of Justice with respect to whether participation by members of an industry in the activities of industry advisory committees would be considered a violation of the antitrust laws. In view of the recent increase in the number of such requests, it is felt that a statement of the Department's position in this regard might be helpful.

"As a general matter we are of the view that the decision as to the necessity for the formation of industry committees to advise a Government department, and the responsibility for their formation, rests with the specific department. However, in organizing such committees, there are certain requirements which should be met in order to minimize the possibility of violation of the antitrust laws. Briefly stated these requirements are:

"1. There must be statutory authority for the employment of such committees, or there must be an administrative finding that it is necessary to utilize such committees to perform certain statutory duties.

"2. The agenda for such committees and their meetings must be initiated and formulated by the Government.

"3. The meetings to be held must be at the call of and under the chairmanship of full-time Government officials.

"4. Full and complete minutes of each meeting must be kept.

"5. The functions of such committees must be purely advisory and any determinations of action to be taken must be made solely by Government representatives.

"So long as the activities of industry advisory committees are carried on within these limitations, we would not view the activities as constituting an independent violation of the antitrust laws. We wish to emphasize, however, and it should be made clear to participants in such activities, that the De-

partment of Justice retains complete freedom to institute proceedings, either civil or criminal, or both, in the event that any particular plan or course of action is used to accomplish unlawful private ends. Further, this Department retains full freedom to institute civil actions to enjoin continuance of any acts or practices found not to be in the public interest and persisted in after notice to desist.

"Yours sincerely,

"PEYTON FORD,
"Deputy Attorney General."

If the above are the objections of the Department of Justice, I believe such can be met by proper language.

With respect to the bill presented herewith, I gave recognition to laws establishing the National Advisory Committee for Aeronautics, the advisory committee to advise the General Services Administration, the advisory council to advise the Secretary of the Interior respecting the coal-mining industry, and the advisory board selected by the President to advise in connection with the operations of the Commodity Credit Corporation.

Therefore, it appears to me precedent exists for such a council as proposed.

APPOINTMENT OF CERTAIN RETIRED ARMY OFFICERS TO CIVILIAN POSITIONS IN DEPARTMENT OF JUSTICE

Mr. WILEY. Mr. President, at the request of the Department of Justice, I introduce, for appropriate reference, two bills authorizing the appointment of Brig. Gen. Edwin B. Howard, United States Army, retired, and Maj. Gen. Frank H. Partridge, United States Army, retired, to civilian positions in the Department of Justice. I believe this proposed legislation will be helpful to the public interest in making available the splendid capacities of these two distinguished officers.

The PRESIDENT pro tempore. The bills will be received and appropriately referred.

The bills, introduced by Mr. WILEY, were received, read twice by their titles, and referred to the Committee on Armed Services, as follows:

S. 1271. A bill to authorize the appointment in a civilian position in the Department of Justice of Brig. Gen. Edwin B. Howard, United States Army, retired, and for other purposes; and

S. 1272. A bill to authorize the appointment in a civilian position in the Department of Justice of Maj. Gen. Frank H. Partridge, United States Army, retired, and for other purposes.

AMENDMENT OF FOREIGN AGENTS REGISTRATION ACT

Mr. WILEY. Mr. President, I introduce, for appropriate reference, a bill to amend sections 1, 3, and 4 of the Foreign Agents Registration Act of 1938, as amended. I ask unanimous consent that excerpts from a memorandum describing the reasons for this bill, in terms of making more effective the original act, in clearing up its ambiguities, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the excerpts will be printed in the RECORD.

The bill (S. 1273) to amend sections 1, 3, and 4 of the Foreign Agents Registration Act of 1938, as amended, introduced by Mr. WILEY, was received, read twice by its title, and referred to the Committee on the Judiciary.

The excerpts presented by Mr. WILEY are as follows:

EXCERPTS FROM MEMORANDUM ON FOREIGN AGENT AMENDMENTS

In administering the Foreign Agents Registration Act of 1938 the Department of Justice has become aware of a number of deficiencies which, if eliminated, would materially strengthen the act. * * *

Section 1 of the act contains a definition of terms. In defining "foreign principal" the section provides that the term shall include "a domestic partnership, association, corporation, organization, or other combination of individuals, subsidized directly or indirectly, in whole or in part, by any foreign principal demand. * * *" By reason of this limited definition agents of a domestic organization, which is financed, controlled, supervised or directed by a foreign government or foreign political party, are not required to register unless it can be established that such domestic organization is "subsidized" by a foreign principal. The proposal will bring such agents within the purview of the registration requirements of the act, irrespective of whether their organization is "subsidized," if a foreign government or a foreign political party supervises, directs, controls, or finances a domestic organization to such a degree as to exercise substantial control over its policies and activities.

Section 3 of the act sets forth the exemptions from the registration requirements. Among others, the section exempts "any person engaging or agreeing to engage only in private, nonpolitical, financial, mercantile, or other activities in furtherance of the bona fide trade or commerce of such foreign principal or in the soliciting or collecting of funds and contributions within the United States to be used only for medical aid and assistance, or for food and clothing to relieve human suffering, * * *." This exemption has been found to be ambiguous, and it is therefore proposed that it be amended so as to define more exactly the nature of the activities, engaged in or to be engaged in by an agent of a foreign principal which will entitle him to exemption. The amendment will clarify the subsection and aid in the making of administrative rulings.

Another amendment which would improve the act is addressed to the filing and labeling requirements (sections 4 (a) and 4 (b). These require the filing and labeling of political propaganda transmitted in the United States mails or by any means or instrumentality of interstate or foreign commerce "(i) in the form of prints, or (ii) in any other form which is reasonably adapted to being, or which he believes will be, or which he intends to be, disseminated or circulated among two or more persons." The quoted matter constitutes a test which is most difficult to administer, and is really unwarranted. Its deletion would increase the effectiveness of the act.

Finally, it is suggested that a new subsection (e) be added to section 4 to give legislative sanction to what is presently a rule promulgated by the attorney general. The rule, designed to plug a possible loophole in the disclosure provisions of the act, subjects an agent of a foreign principal physically outside of the United States to the registration, filing, and labeling provisions of the act in the event such agent disseminates political propaganda within the United States through the mails or any other instrumentality of interstate or foreign commerce. This rule is now being utilized by the Post Office Department as its legal basis for declaring nonmailable propaganda mailed by an agent of a foreign principal outside the United States to persons within the United States, and as the basis upon which the Bureau of Customs is resting its authority for the seizure of propaganda material arriving in the United States by freight or express from agents of foreign principals located outside the United States and destined to persons not registered with this Department within the United States. Consequently, it is considered desirable that this rule be given legislative approval.

The Bureau of the Budget has advised that there is no objection to the submission of this legislation.

PROPOSED AMENDMENT TO THE SOCIAL SECURITY ACT PERTAINING TO FARMERS

Mr. STENNIS. Mr. President, I introduce for appropriate reference a bill to provide that services performed by agricultural employees who are not employed by the same employer for more than 60 days in a calendar year will not be considered to be employment for purposes of coverage under the Federal old-age and survivors insurance system.

When the Congress approved last summer the amendment to the Social Security Act broadening the coverage of farm workers I made a statement on the floor strongly opposing broadening the coverage of farmers. I pointed out that the bill carried the germ to destroy the small farm unit in many areas of this country, and that the tax would add greatly to the burden which the small farmer was already carrying. Judging by a number of reports that I have received, there are a number of problems that are coming to the surface in connection with this program and particularly in regard to the tremendous burden of recordkeeping.

It seems to me that an employee not employed by the same employer for more than 60 days in a calendar year should be exempt, and I certainly urge the appropriate committee of Congress to give this important question immediate consideration.

It will be recalled that the bill as finally approved provides for coverage of any farm worker who earns as much as $100 a year from any one employer.

The $100 a year criterion is bringing into the picture a large number of persons who are not really a part of the farm-labor force, such as a farm boy working for a neighbor on Saturdays, a high-school boy working a few weeks during a summer vaction, local people who turn out for a couple of weeks to help harvest a cotton crop or a strawberry crop, and numerous other situations where the work is extremely temporary in nature. It does not seem to me that any purpose is accomplished by the inclusion of this very casual type of employment, and that this goes beyond the intention that the Congress had in mind in enacting the legislation.

A second major problem is that associated with the so-called day-haul labor. For example, during the cotton season, or during a vegetable or fruit harvest season, a farmer may need to employ about 20 workers for a period of 4 or 6 weeks. He may send his own trucker, or some trucker with whom he has an arrangement, into a local city each morning to haul out workers wishing to work that day. The daily turnover of such workers is very heavy, quite normally 50 percent or more, and occasionally 100

percent. Thus, during a 2-month period a farmer may actually employ five or six hundred workers, even though the number of workers on his farm at any one time is not over 20.

These workers are usually paid once a day, or in some cases many times a day as they deliver harvested products to the central collecting point.

Of the five or six hundred workers this farmer may employ during a harvest season, not a single worker, or perhaps 1 or 2 workers, may work for the farmer a sufficient number of days to earn a hundred dollars. But the farmer has no way of knowing which workers are likely to come back to his farm and earn $100 or more.

Therefore, if the farmer is to be sure that he complies with the law he must keep a record of how much money is paid to each of these five or six hundred workers. This involves a record-keeping operation extremely difficult to work into the established pattern of harvesting operations in many areas. As a result of all this record keeping, the employer may not actually pay any social-security tax at all because no individual worker earns as much as $100, or in other instances the amount of the social-security tax will be a few dollars. We have here a situation in which the cost to the employer of collecting the tax will be many times greater than the amount of the tax itself. It is, I think, an impossible situation and one which the Congress should study to determine if there may not be a means of avoiding this burden without jeopardizing the major purposes of the 1954 amendments to the social-security law.

In order to provide a basis for consideration of the problem, this bill which I am introducing provides for what might be called a qualification period; that is, a period of employment that is not covered by social-security tax liability. Those who qualify by working the requisite number of days will then be considered to be covered by social security for the remainder of the period worked. It is my belief that this proposal will eliminate the great bulk of record keeping required by the present legislation without appreciably affecting the purposes of the 1954 amendment.

Another problem has arisen in this connection, that is, the status of sharecroppers. It was my understanding of the amendments we approved last summer that a sharecropper was to be considered as self-employed. I understand, however, that interpretations are being made that a sharecropper under certain circumstances is to be classified as an employer, and that the landowner is therefore responsible for withholding a paying tax in such instances. I think this goes beyond the intent of the Congress, but since the law is apparently not explicit in this connection, I am introducing a bill to clarify the intent of the law.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1279) to provide that services performed by agricultural employees who are not employed by the same employer for more than 60 days in a calendar year shall not be considered to be "employment" for the purposes of coverage under the Federal old-age and survivors insurance system, introduced by Mr. STENNIS, was received, read twice by its title, and referred to the Committee on Finance.

EXTENSION OF EDUCATIONAL BENEFITS TO MEMBERS OF THE ARMED FORCES

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, a bill which proposes to extend the GI bill of rights so that its educational benefits will be made available to all of our young men and women who enter the service through the Selective Service System or through voluntary enlistment. The proposal would accomplish that objective by extending until July 1, 1959, the basic service period for establishing educational benefit eligibility.

All of us in the Congress and the people of the Nation appreciate that we are in an emergency. It is highly unlikely that we can foresee any period in the near future when we shall need less military manpower. Our manpower needs, in fact, may continue to grow as we meet constant international crises and growing tensions. It will be necessary that our military forces be large and that the morale of those forces be high. It is to me unfair and unjustifiable to say that young men and women who entered the Armed Forces in January of this year somehow are more deserving of benefits from their Nation than the men and women who enter the Armed Forces in March of this year or January of next year. These men and women will be serving together in the same units and with the same responsibilities. They should receive the same benefits.

My proposal relates at this time to the extension of the GI educational benefits law because I consider the educational program the least controversial of the benefits we call the GI bill of rights. The educational program is of value not only to the individuals who are able to continue their education by virtue of it, but is also vitally important to our Nation. A well-educated citizenry is the foundation stone of a strong democracy. I, therefore, look upon my proposal not only as providing a reward for service to deserving men and women who join the armed services, but also as being of value to the national security of the United States.

In order to achieve this objective, I am presenting my proposal to the Senate in two forms. First is a separate bill to amend the Veterans' Readjustment Assistance Act of 1952, and second is this same proposal in the form of an amendment to the Universal Military Training and Service Act. It is my hope that the Senate Labor and Public Welfare Committee will favorably report my bill. It is my intention to propose an amendment when H. R. 3005 reaches the floor if it seems at that time to be the most effective way for the Senate to pass upon the proposal.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1282) to amend the Veterans' Readjustment Assistance Act of 1952 so as to extend until July 1, 1959, the basic service period for establishing eligibility for educational benefits, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

INCREASE OF CERTAIN ANNUITIES UNDER FOREIGN SERVICE RETIREMENT AND DISABILITY SYSTEM

Mr. SPARKMAN. Mr. President, I introduce, for appropriate reference, a bill to make certain increases in the annuities of annuitants under the Foreign Service disability system.

Until 1946, our Foreign Service personnel served under the basic act of 1924. In 1946 the act was amended in a form which effectuated a reorganization of the Foreign Service, so as to provide a better Foreign Service, with increased pay for those in that Service.

Normally, when Congress increases the pay of those who are engaged in any particular governmental service, provision is made for an automatic increase in the retirement pay of those who have previously retired from that service. But a ruling by the Comptroller General held that this particular act did not provide for such an automatic increase.

In 1952, Congress passed an act providing for a 7-percent increase in retirement pay. However, the increase which was provided for the active personnel in the Foreign Service approximated an average of about 33⅓ percent. The result has been that the few persons who had retired before that time have received an increase of only about 7 percent, whereas those who have continued to serve received an increase which probably averages about 33⅓ percent.

The bill I am introducing attempts to adjust that discrimination and to make it possible for the few persons—there are probably not more than 200—to receive greater benefits. These persons constituted the real backbone of our Foreign Service in the years prior to World War II.

I think the measure is entitled to the most careful consideration of the Senate and of Congress as a whole, and I hope that favorable action will be taken on it without too much delay.

Mr. President, I ask unanimous consent that the bill may be printed at this point in the RECORD. It is very brief, and I think it would be helpful in providing information to all Members of the Senate.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 1287) to make certain increases in the annuities of annuitants under the Foreign Service retirement and disability system, introduced by Mr. SPARKMAN, was received, read twice by its title, referred to the Committee on For-

eign Relations, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the annuity of an annuitant under the Foreign Service retirement and disability system pursuant to the act of May 24, 1924 (45 Stat. 140), as amended, or the Foreign Service Act of 1946 (60 Stat. 999), shall be increased the first day of the second month following enactment of this act in accordance with the following rules:

If the annuitant was formerly a participant in the system, the annuity to which he is entitled shall be increased—

(a) by 25 percent if his retirement took place before July 1, 1945;

(b) by 22.5 percent if his retirement took place on or after July 1, 1945, but before July 1, 1946;

(c) by 17.5 percent if his retirement took place on or after July 1, 1946, but before July 1, 1947;

(d) by 11.25 percent if his retirement took place on or after July 1, 1947, but before July 1, 1948; and

(e) by 5 percent if his retirement took place on or after July 1, 1948, but before July 1, 1949.

SEC. 2. (a) The increase in the annuity of an annuitant who was formerly a participant in the system shall be computed on the annuity he was entitled to receive immediately prior to the effective date of Public Law 348, 82d Congress; (b) in the case of an officer who elected a reduced annuity at time of retirement and who availed himself of the restoration clause in section 821 (b) of the Foreign Service Act of 1946, as amended, such officer's annuity shall be recomputed, in the event of his wife's prior death at any time after the effective date of Public Law 348, on the basis of the full annuity to which he would have been entitled had his wife died prior to July 1, 1948.

SEC. 3. If the annuitant receives an annuity as the survivor of a former participant in the system, the increase in the annuity shall be based on the amount by which the annuity of the former participant would be increased, pursuant to sections 1 and 2 of this act, if he were still living. The increase in the annuity of such an annuitant shall bear the same ratio to the increase that would be received by the former participant as their respective annuities, computed as of a date immediately prior to the effective date of Public Law 348, 82d Congress, bear to each other.

SEC. 4. If a wife of a Foreign Service officer who retired prior to July 1, 1949, becomes an annuitant subsequent to the effective date of this act, as a result of the election made by the officer at time of retirement, such widow shall be entitled to the same increase as though she was an annuitant on the effective date of this act.

SEC. 5. In no case shall an annuity increased under this act exceed the maximum annuity payable under section 821 (a) or (b) of the Foreign Service Act of 1946, as amended.

SEC. 6. No annuity currently payable to any annuitant under the Foreign Service retirement and disability system shall be reduced as a result of the provisions of this act.

AMENDMENT OF CONSTITUTION RELATING TO DISAPPROVAL OF INDIVIDUAL ITEMS IN APPROPRIATON BILLS

Mr. BYRD. Mr. President, I introduce, for appropriate reference, a joint resolution to amend the Constitution of the United States relative to disapproval of individual items in appropriation bills. I ask unanimous consent to have printed in the RECORD, a statement by me explaining the proposed legislation.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection the explanation will be printed in the RECORD.

The joint resolution (S. J. Res. 52) proposing an amendment to the Constitution of the United States relative to disapproval of items or provisions in appropriation bills, introduced by Mr. BYRD, was received, read twice by its title, and referred to the Committee on the Judiciary.

The statement presented by Mr. BYRD is as follows:

STATEMENT BY SENATOR BYRD

The question of authorizing the President to veto single items in appropriation bills has been considered for nearly a hundred years. I have advocated it as a means of reducing nonessential Federal expenditures since I came to the Senate 22 years ago. I am today introducing proposed legislation which I believe to be a new approach to its accomplishment.

The new joint resolution would amend the Constitution to allow Congress to confer the authority on the President by statute. Heretofore, most proposals have been in the form of amendments writing specific item veto authority directly into the Constitution.

Principal objections to writing the authority directly into the Constitution have included:

1. The contention that too much time would be required to repeal a constitutional amendment in the event of a President who would abuse the authority, or exploit it for political purposes.

2. The contention that too much time would be required to amend the Constitution to perfect the provision on the basis of experience.

3. The requirement for brevity in the Constitution precludes necessary definitions of such terms as "items" and "provisions."

The approach contemplated in the amendment would meet all of these objections, and at the same time conform with the views of many legal authorities that a constitutional provision is required to confer item veto authority on the President.

The resolution would amend the Constitution to provide that "Congress may by law authorize the President to disapprove any item or provision, as defined by the Congress" in any appropriation bill it passes, in the same manner, and subject to the same authority of Congress to override a presidential veto of the whole bill.

Under this arrangement Congress could define items and provisions in such manner as it chooses with respect to limitations on appropriations, legislative riders, etc.

Action on repeal or amendment of a statute is much simpler and faster than amending the Constitution. In fact, the statute could be written so its effect could be suspended for specified periods by resolution which would not be subject to veto.

The wisdom of the item veto is demonstrated by the fact that a great majority of the States have conferred the authority upon their governors, and the record of its use in the States is impressive in terms of savings in nonessential appropriations.

The Federal budget has been in the red 23 out of 26 years. The Federal debt is at its peacetime peak of $280 billion. Contingent debt of the Federal Government is approximately $250 billion. Under present conditions a balanced budget is not within sight.

Under these circumstances, it would seem that every device for responsible and constructive economy should be used. I believe this is such a device, and that it is properly safeguarded in the form I have suggested.

The joint resolution reads as follows:

"Resolved (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

" 'ARTICLE —

" 'SECTION 1. The Congress may by law authorize the President to disapprove any item or provision, as defined by the Congress, in any appropriation bill which shall have passed the House of Representatives and the Senate and shall have been presented to him for his approval, in the same manner and subject to the same limitations as he may, under section 7 of article I of this Constitution, disapprove as a whole any bill which shall have been presented to him. Whenever the President pursuant to any such authorization disapproves more than 1 item or provision in any appropriation bill, the vote of the House of Representatives and the Senate upon reconsideration shall be taken separately on each such item or provision.

" 'SEC. 2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States, as provided in the Constitution, within 7 years from the date of its submission to the States by the Congress.' "

AMENDMENT OF UNIVERSAL MILITARY TRAINING AND SERVICE ACT—AMENDMENTS

Mr. HUMPHREY submitted amendments, intended to be proposed by him to the bill (H. R. 3005) to further amend the Universal Military Training and Service Act by extending the authority to induct certain individuals, and to extend the benefits under the Dependents Assistance Act to July 1, 1959, which were referred to the Committee on Armed Services, and ordered to be printed.

TRADE AGREEMENTS AND EXTENSION ACT—AMENDMENT

Mr. NEELY. Mr. President, on behalf of myself and the Senator from Colorado [Mr. ALLOTT], the Senator from Wyoming [Mr. BARRETT], the Senator from Maryland [Mr. BEALL], the Senator from Ohio [Mr. BENDER], the Senator from Nevada [Mr. BIBLE], the Senator from Kansas [Mr. CARLSON], the Senator from Texas [Mr. DANIEL], the Senator from Illinois [Mr. DIRKSEN], the Senator from West Virginia [Mr. KILGORE], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Pennsylvania [Mr. MARTIN], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Kansas [Mr. SCHOEPPEL], the Senator from Idaho [Mr. WELKER], and the Senator from North Dakota [Mr. YOUNG], I submit, for appropriate reference, an amendment to House bill 1, to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes. At the proper time the amendment will be proposed on the floor of the Senate.

The PRESIDENT pro tempore. The amendment will be received, printed, and referred to the Committee on Finance.

Mr. NEELY. Mr. President, the purpose of the amendment just submitted by me for myself and 16 distinguished Republican and Democratic Senators representing every geographical area of the country, is to place a reasonable limit upon the foreign oil which is flooding the United States at the rate of a million two hundred fifty thousand barrels every day.

Let it be thoroughly understood that it is not the purpose of the amendment to destroy or impair the principle of reciprocal trade with the other nations of the world. On the contrary, it is my belief that the amendment, if adopted, would strengthen the sound reciprocal trade principle by protecting it from abuse by those who are more concerned about profits than they are about the general welfare.

The basic principles upon which the nation was founded have survived for almost 200 years because, from time to time, they have been subjected to such restraints and limitations as were dictated by changing times and conditions and the instincts of national self-preservation.

It is in this spirit, Mr. President, that the sponsors of this amendment will urge the Senate to make it a part of the law of the land.

INCREASE IN LIMIT OF EXPENDITURES OF COMMITTEE ON PUBLIC WORKS—REFERENCE OF RESOLUTION TO COMMITTEE ON RULES AND ADMINISTRATION

Mr. CLEMENTS. Mr. President, I ask unanimous consent that Calendar No. 38, the resolution (S. Res. 70) increasing the limit of expenditures by the Committee on Public Works, be taken from the calendar and referred to the Committee on Rules and Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. WILEY:

Address entitled "The Expanding Great Lakes Frontier," delivered by him before the Antigo (Wis.) Chamber of Commerce on February 26, 1955.

NOTICE OF HEARING ON NOMINATION OF BEN F. CAMERON, OF MISSISSIPPI, TO BE UNITED STATES CIRCUIT JUDGE, FIFTH CIRCUIT

Mr. McCLELLAN. Mr. President, pursuant to notice published in the CONGRESSIONAL RECORD of February 23, 1955, on behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in the nomination of Ben F. Cameron, of Mississippi, to be United States circuit judge, fifth circuit, vice Edwin R. Holmes, retired, that a hearing has been scheduled on this nomination for 3 p. m. Friday, March 4, 1955, in the committee room, room 424, Senate Office Building, at which time all persons interested in this nomination may make any representations which are pertinent. The subcommittee consists of myself, chairman, the Senator from Mississippi [Mr. EASTLAND], and the Senator from Idaho [Mr. WELKER].

NOTICE OF HEARING ON NOMINATION OF GEORGE W. PERKINS, OF NEW YORK, TO BE UNITED STATES PERMANENT REPRESENTATIVE ON COUNCIL OF NORTH ATLANTIC TREATY ORGANIZATION

Mr. GEORGE. The Senate received today the nomination of George W. Perkins, of New York, to be the United States Permanent Representative on the Council of the North Atlantic Treaty Organization, with the rank and status of Ambassador Extraordinary and Plenipotentiary, vice John C. Hughes, resigned. I give notice that this nomination will be considered by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the Committee rule.

THE CLAY ROAD PROGRAM

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the body of the RECORD certain editorials and articles with respect to the program known as the Clay road program.

There being no objection, the editorials and articles were ordered to be printed in the RECORD, as follows:

[From the Waterbury (Conn.) Republican of January 26, 1955]

THE NEW ROAD PROGRAM

The President is scheduled to send to Congress Thursday his recommendations for a 10-year, 101-billion, Federal-State road building program. It contains one big flaw.

Something will have to be done in the next 10 years if the Nation's roads are to remain adequate to handle the expected volume of vehicular traffic. The President's plan is intended to bring about the needed improvements. But the financing will mean a large increase in the national debt.

The proposed bookkeeping setup is such as to avoid the appearance of debt increase. Actually it will be cellophane camouflage. Senator HARRY F. BYRD (Democrat, Virginia), chairman of the Senate Finance Committee and economy watchdog of Capitol Hill, has been at pains to point this out.

As outlined in the report of the President's Advisory Committee on a National Highway Program submitted on January 11, the 10-year plan concentrates on modernizing the key 40,000-mile national system of interstate highways. The Federal Government would continue for 10 years its regular aid to States, at the rate of about $600 million a year. The State and local governments would spend about $70 billion over the 10 years.

In addition to its regular contributions to State governments, the Federal Government would spend an additional $25 billion on interstate highways. Some 5 billion of this would come from licenses—filling stations, motels—on the rights-of-way. The remaining $20 billion would come from 30-year, 3-percent bonds issued by a Federal highway corporation.

These bonds, fully taxable, would be guaranteed by the United States Treasury, but the debt represented would not be included in the public debt under obligations guaranteed by the Government. Annual payments would be met by appropriations by Congress out of the revenues which the Federal Government will derive from the motor vehicle fuel and lubricating oil taxes projected at the present rates.

The $20-billion bond plan, says Senator BYRD, would mean "operating the Government on two sets of books. One set for activities financed by borrowing outside the (public) debt and expenditures outside budgetary control, and the other set for activities financed by borrowing on the record and expenditures under budget control."

BYRD charges also that the bond plan would "dry up gasoline tax revenue for 20 years, from 1966 to 1987," although these revenues would not be specifically earmarked for debt retirement by Congress. And he points out that the aggregated interest charges on the bonds would run to more than $11,500 million, or 55 cents on the dollar.

No matter what oratory may ensue on the proposed plan, the essential point is this: If the Government is responsible for a debt, it makes no difference how that responsibility is recorded. Laudable as the intent of the plan may be, the country's debt ceiling is dangerously high now.

[From the Martinsville (Va.) Bulletin of January 17, 1955]

SENATOR SCOTT MIGHT GIVE SENATOR BYRD IDEA ABOUT HOW TO GET ROADS

Last week Gov. Robert F. Kennon, of Louisiana, went to Washington and told a highway conference that he felt taxpayers would shell out money for road construction less grudgingly than for any other purpose.

He said he felt this was so because the taxpayer is convinced he is really getting something for his money when roads are built with what he pays for taxes.

The Louisiana Governor was speaking in support of the Federal highway plan submitted to President Eisenhower by a special committee appointed to investigate the matter.

On Saturday of this past week, United States Senator HARRY F. BYRD, of Virginia, took the Federal plan apart, declaring that it was wrong financially and would destroy the Federal budget. He appears to be very definitely against the same plan, at least in its financial aspects, that appears to be warmly supported by Governor Kennon and others.

We confess we know little about the Federal highway plan. All we profess to know is that we need highways and plenty of them. We need them in Virginia and we need them badly. About the rest of the Nation, we can hardly say.

To Senator BYRD we say only that we need the highways in Virginia and hope someone can come up with a plan that will meet his sympathetic support. If the Federal Government cannot undertake the program, perhaps the State of Virginia could handle its own needs with the same recognition of need, that has made North Carolina highways an envy of those Virginians who enjoy them. Perhaps our Senator would enjoy calling on Senator KERR SCOTT, of North Carolina, to find out how better and adequate roads can be acquired as needs demand.

[From the Lake Worth (Fla.) Leader of January 21, 1955]

BYRD HITS ROAD PLAN

"Thoroughly unsound" was Senator HARRY F. BYRD's verdict on the multi-billion-dollar highway program formally proposed to President Eisenhower last week by his advisory committee for a national highway plan.

The contemplated procedures, he added, would violate financing principles, defy budgetary control, and evade Federal debt law. With a good deal of restraint he avoided the obvious word, "sham."

First among the Virginian's targets was the proposal to set up a Federal corporation to sell $20 billion in Government-guaranteed bonds at 3 percent interest. The bonds would be retired from revenues from the 2-cents-a-gallon gasoline tax, and 5 billion more would be raised by taxing filling stations and motels along roads.

This bond issue would cost taxpayers more than $11.5 billion in interest, which would mean every dollar borrowed would eventually cost $1.55. But to make matters worse, in Senator BYRD's opinion, it is proposed that the bonds not be included in the regular Government debt figure. This would mean keeping two sets of books and pave the way for endless outlays for other building programs under the same formula of financial legerdemain. Furthermore, it is predicted, the bonds will probably not be paid off at maturity, in keeping with the current idea on debt retirement.

Having had long experience with road-building in his own State, Senator BYRD proposes an alternate plan.

First, he suggests that the 2-cent gasoline tax now being collected by the Federal Government be repealed, thus permitting the States to reimpose it. Secondly, the present Federal aid to primary, secondary, and urban road system which, for many years has been integrated with State highway systems, should be continued on a longstanding basis. This amounts to $535 million. Further, the lubricating-oil tax now collected by the Federal Government be continued, and finally, a one-half cent per gallon Federal gasoline tax be imposed. Revenue from this tax plus the Federal lubricating-oil tax, according to estimates of increasing use, shortly would be sufficient to compensate the Federal Treasury for this Federal aid.

Under this plan, it is declared, States would retain as much control over their roads as they have had in the past; $11.5 billion would be saved for additional road construction; and road revenue would be evenly distributed over future years to keep highways modernized to meet changing conditions.

By comparison, the Byrd program stands out as a forthright approach to a major problem without an effort at financial trickery and misrepresentation of the kind that has been offered to Mr. Eisenhower. And as such it is recommended reading for Gen. Lucius D. Clay, head of the Presidential Advisory Committee, whose voice carries so much weight at the White House. Its importance is already conceded by the Democratic Congress.

[From the Boise (Idaho) Statesman of January 17, 1955]

MR. BYRD TALKS SENSE

One Democratic Member of the United States Senate who demands attention when money matters are discussed is Senator BYRD of Virginia. And the Senator has been heard from in one of the occasional times he speaks up on Federal expenditure.

Senator BYRD has criticized, as "thoroughly unsound," the Eisenhower administration's plan for a multi-billion dollar highway program financed in part by revenue outside the Federal budget. There are few who will dispute Mr. BYRD's reasoning. Once the Government starts an extensive use of outside financing to attain the desires of any administration it is plain that the budget is meaningless. Furthermore, the entire obligation of a Federal administration to have concern for the expenditure of public funds will have been discarded.

This particular Eisenhower plan, which has some likeness to the New Deal schemes that were generated to create prosperity, should not be necessary if the Nation's economy is as sound as the President has contended. Only in times of national disaster, when the economy is at a low ebb, should the Federal Government attempt extraneous expenditure of any kind, and then only through a period of readjustment. The Federal Government's function is to govern, and nothing more. There is no emergency now, and none in sight.

Under the Eisenhower highway program, the Federal Government would expend $25 billion over and above normal highway expenditures for an interstate network. A Federal highway corporation would raise $20 billion of this amount by floating bonds, and the debt would not be classed as part of the Federal budget. The bonds would be retired from revenues from the Federal 2-cent gasoline tax. The remaining $5 billion would be raised by fees charged to filling stations, motels, and other businesses along the highways.

Senator BYRD has a better suggestion: Return to the States 1½ cents of the Federal gasoline tax and let them build their own highways, meanwhile forgetting the $20 billion of Federal bonds.

As always, the gentleman from Virginia knows what he is talking about.

[From the Norwich (Conn.) Bulletin of January 21, 1955]

SENATOR BYRD'S HIGHWAY PLAN

Senator BYRD, of Virginia, is in accord with the views of the special committee named by President Eisenhower which has recommended a 10-year plan of highway construction that will involve the expenditures of over $100 billion. "No one recognizes more fully than I," declares the Senator, "the need of road improvement to meet the constantly increasing impact of modern-day traffic." On the other hand he doesn't like the method that has been suggested for financing the plan. He cannot understand how the proposed arrangement can be carried out without actually increasing the indebtedness of the Nation.

Being in favor of such construction, but believing that some other way of meeting the situation would be preferable, he has done what is always asked under such circumstances, produced a plan which he figures will meet the requirements and at the same time will not create a greater national debt and at the same time save billions in interest for other road construction.

Under his substitute plan Senator BYRD recommends:

1. That the 2-cent gas tax now being collected by the Federal Government be repealed, thus permitting the States to reimpose it.

2. Present Federal aid to primary, secondary, and urban road systems which, for many years has been integrated with State highway systems, be continued on the longstanding match basis. This amounts to $535 million.

3. That the lubricating-oil tax now collected by the Federal Government be continued.

4. A one-half-cent gallon Federal gasoline tax. Revenue from this tax plus the Federal lubricating-oil tax, according to estimates of increasing use, shortly will be sufficient to compensate the Federal Treasury for this Federal aid.

This represents a look at the highway-building program which is deserving of consideration as further study is given to the question by Congress. It doesn't represent opposition to the proposed system of improved roads throughout the country. Rather is it agreed by the Senator that such construction is needed. What he is concerned about is keeping away from piling up Federal indebtedness and he cannot see how the bonding plan escapes being regarded as an increased debt.

The Byrd plan leaves much of the gas-tax revenue now going to the Federal Government to the States, with the half a cent still going to the Government for meeting the road work on which the Federal and State Governments join. The saving in interest is a substantial one.

The administration's idea of seeing that the country is provided with a better system of highways has received a good reception. That Congress will do something about it is to be expected. That other suggestions regarding financing will be offered is probable but out of the medley of ideas an efficient and economical plan should result.

[From the New Haven (Conn.) Journal-Courier of January 24, 1955]

HIGHWAY PROGRAM ARGUMENTS

It now looks as if President Eisenhower's proposed 10-year road-building program—to be offered to Congress in a special message on Thursday—may become one of the most controversial items on the 1955 agenda.

While it is not argued that the roads shouldn't be built, there is a definite cleavage on Capitol Hill on the financing methods proposed by the Clay Commission.

The program as now constituted would cost $101 billion. Of this, State and local governments would supply $70 billion, $6 billion would come from regular Federal tax moneys, $5 billion would come from fees from gas stations, motels and other business enterprises operating along the new highways. The remaining $20 billion would be borrowed via 30-year, 3 percent bonds to be offered—outside the Federal debt limit by a Federal corporation created for that purpose. Presumably these bonds would be retired on schedule by toll revenues.

Senator BYRD and some others already have challenged the soundness of the principle of creating this kind of extra-budgetary Government debt. It is argued that once such a precedent has been set, statutory ceilings on the Federal debt will become meaningless.

There will be counter-proposals. One will be that the Federal tax on gasoline be cut from 2 cents a gallon to ½ cent so the States can increase their own gas taxes 1½ cents a gallon and do the highway-building themselves according to the Clay Commission blueprint.

[From the San Francisco (Calif.) News of January 20, 1955]

GOLD BRICK HIGHWAYS

Senator BYRD has a plan for financing the $100 billion, 10-year highway program proposed by the President's Advisory Committee.

Instead of the gold-brick scheme devised by the committee, which would hike the Federal debt without acknowledging it, the Senator suggests:

Repeal the 2-cent Federal gasoline tax so the States may reimpose it and pay for their own highway construction. Use a Federal tax on lubricating oil and a new half-cent tax on gasoline to finance the present Federal aid program for roads.

This, the Senator estimates, would save loading the cost of the program on future generations—with an additional price tag of $11,500,000,000 for interest on the debt.

In the Senator's own State of Virginia, a first-class highway system has been built and maintained on a pay-as-you-go basis—which makes it cheaper and doesn't indulge in the sleazy trick of passing on to the children our own obligations. What's wrong with Virginia's way?

[From the Texarkana (Ark.) Gazette of January 19, 1955]

SENATOR BYRD AND THE HIGHWAY PROJECT

In the Sunday morning dispatches, Senator BYRD of Virginia was quoted as blasting the Presidential Commission's proposal for

a multi-billion-dollar highway program as thoroughly unsound and one which he believes would completely destroy the budget as a Federal debt limitation.

People who advocate a balanced budget, a halt to inflation, and a sound economy, who also have some knowledge of finance, will thoroughly agree with him.

The proposed authority to the suggested highway commission to raise $20 billion by floating bonds would clearly be an evasion of the present Federal debt limitation. The proposed allocation of the present revenue from the 2-cent-a-gallon gasoline tax to retire these bonds would be a diversion from the present revenues of the Government and would further unbalance the budget.

However, President Eisenhower has apparently lost much if not all of his interest in any attempt to balance the budget, probably having come to the conclusion that the public is not particularly interested in recovering from the 20-year financial debauch and is in favor of trying to taper off rather than sober up.

This is evidenced by the highway proposal, the proposal to increase payments to the defense forces and Government employees, the increase in social benefits of one kind and another with no suggestion of any increase in taxes to take care of the increased expenses, which can only lead to further deficits. The present deficit is figured at around $4 billion.

Are we going back to the old New Deal proposal to spend and spend and tax and tax with the idea that we can spend ourselves into prosperity?

Apparently we are.

[From the Tucson (Ariz.) Star of January 18, 1955]

HIGHWAY PLAN UNSOUND

Senator BYRD, of Virginia, was right last week when he attacked the Clay Commission plans for a vast interstate network of Federal highways as financially unsound.

The plans, expected to be incorporated in a forthcoming message from the President, envisage a $25 billion highway program, $20 billion of it financed by 3-percent revenue bonds repayable from Federal gasoline taxes, and $5 billion of it by fees on service stations, motels, and other business establishments along the highways.

Senator BYRD's point, in attacking the proposal, is that it would destroy the Federal budget and debt limit, by allowing a $25 billion indebtedness to be incurred by the Government, completely separate from our current bookkeeping system. "You cannot evade debts by definition," he pointed out, adding that in 30 years the money would cost taxpayers 55 cents on the dollar, and the chance of it being repaid in that time were slim, since we have retired not a dollar of Federal debt in a quarter of a century.

In condemning the plan, which would certainly entail waste on a grand scale, Senator BYRD wisely suggested that we continue the present system, in effect, of Federal and State cooperation on highway building.

This, he points out, would permit States to retain what control they now have over highways, would save $11.5 billion in interest for future highway building, and would allow a flexible and continuing construction program designed to keep highways modernized to meet changing conditions.

[From the Florence (Ala.) Times of January 20, 1955]

MR. BYRD HITS SHAM ROAD PLAN

"Thoroughly unsound," was Senator HARRY F. BYRD's verdict on the multibillion-dollar highway program formally proposed to President Eisenhower last week by his advisory committee for a national highway plan.

The contemplated procedures, he added, would, "violate financing principles, defy budgetary control, and evade Federal debt law." With a good deal of restraint he avoided the obvious word, "sham."

First among the Virginian's targets was the proposal to set up a Federal corporation to sell $20 billion in Government-guaranteed bonds at 3 percent interest. The bonds would be retired from revenues from the 2-cents-a-gallon gasoline tax, and $5 billion more would be raised by taxing filling stations and motels along roads.

This bond issue would cost taxpayers more than $11.5 billion in interest, which would mean every dollar borrowed would eventually cost $1.55. But to make matters worse in Senator BYRD's opinion, it is proposed that the bonds not be included in the regular Government debt figure. This would mean keeping two sets of books and pave the way for endless outlays for other building programs under the same formula of financial legerdemain. Furthermore, it is predicted, the bonds will probably not be paid off at maturity, in keeping with the current idea on debt retirement.

Having had long experience with road building in his own State, Senator BYRD proposes an alternate plan.

First, he suggests that the 2-cent gasoline tax now being collected by the Federal Government be repealed, thus permitting the States to reimpose it. Secondly, the present Federal aid to primary, secondary, and urban road systems which, for many years has been integrated with State highway systems, should be continued on a long standing basis. This amounts to $535 million. Further, the lubricating oil tax now collected by the Federal Government be continued, and finally a one-half-cent-per-gallon Federal gasoline tax be imposed. Revenue from this tax plus the Federal lubricating-oil tax, according to estimates of increasing use, shortly would be sufficient to compensate the Federal Treasury for this Federal aid.

"Under this plan," it is declared, "States would retain as much control over their roads as they have had in the past; $11.5 billion would be saved for additional road construction; and road revenue would be evenly distributed over future years to keep highways modernized to meet changing conditions."

By comparison, the Byrd program stands out as a forthright approach to a major problem without an effort at financial trickery and misrepresentation of the kind that has been offered to Mr. Eisenhower. And as such it is recommended reading for Gen. Lucius D. Clay, head of the presidential advisory committee, whose voice carries so much weight at the White House. Its importance is already conceded by the Democratic Congress.—The Nashville Tennessean.

[From the Dothan (Ala.) Eagle of January 17, 1955]

A HIGHWAY PROGRAM THAT ISN'T UNANIMOUS YET

President Eisenhower's proposed 10-year road-building program, which carries a price tag of $101 billion, sparkles with appeal for if there is anything that the people of this country want it is more, better, and safer highways—particularly when the Federal Government bears part of the cost.

This program, developed by a Presidential Highway Commission, would include a network of toll roads desired by the Federal Government for strategic defense purposes. The Federal Government would pay $25 billion of the cost and the States and local governments the remainder. As an inducement for the State and local governments to participate, they would be allowed to use the tolls to liquidate their expenses and, in addition, the Federal Government would give them other money to help build primary and secondary highways.

To finance the cost of the Federal Government, the Commission proposes establishment of a Federal Highway Corporation, which would float $20 billion worth of bonds to be repaid by the Federal tax of 2 cents a gallon on gasoline. The FHC would get the other $5 billion from fees on filling stations, motels, etc., along the highways. None of this new $25 billion debt would be classed as part of the present Federal debt.

But, appealing as this plan may seem to be on paper, it is drawing opposition from quarters that advance sound arguments for opposition. First, the National Education Association is against it. Second, the American Automobile Association. Third, Senator HARRY F. BYRD.

The AAA objects to the provisions for toll roads on the grounds that the Commission would permit the Federal Government to pay cash to the States for toll highways already built—or built later—if they became part of the interstate highway system.

The NEA objects because of a fear that State governments would be tempted to divert school funds to highway construction.

Senator BYRD complains that the program is unsound, and would wreck the Government's already questionable control over the Federal debt. Establishment of the FHC, he says, would give the Government 2 sets of books—"1 set for activities financed by borrowing outside the debt and expenditures outside budgetary control, and the other set for activities financed by borrowing on the record and expenditures under budget control."

"If," he says, "they can set up a corporation to borrow money outside the budget and the debt limit to build roads, they can do anything." He points out that the FHC would not own the roads or have any assets, unlike the RFC which had loans and the CCC which has crops as assets.

Under the proposed interest rate on the FHC loan, says BYRD, the Government would have to pay $1.55 for every $1 borrowed and he doubts if the bonds would be paid off at maturity because, "We have not paid off a single dollar of Federal debt in 25 years."

With the AAA, the NEA, Senator BYRD, and others who will find objections protesting the President's road-building program it is, as they say in the Senate, certain to bring on some debate.

[From the Lewiston (Ohio) Tribune of January 20, 1955]

NATIONAL HIGHWAY FINANCING PROBLEMS

President Eisenhower's proposed national highway program seems headed for critical examination in Congress, chiefly because of the odd financing plan recommended for it.

Senator HARRY F. BYRD (Democrat, Virginia) raised some valid doubts about the plan when he objected that the program, as presently proposed, would "violate financing principles, defy budgetary control, and evade Federal debt law."

BYRD has a habit of objecting almost automatically to proposals which he thinks threaten States' rights or a balanced budget. This time, however, he seems to have found a cause to which he can recruit objectors from outside his normal circle.

BYRD declared in an announcement Saturday, the text of which was received here yesterday, that he would discuss Mr. Eisenhower's highway recommendations in the Senate after they are submitted to Congress next Thursday. Meanwhile he takes a dim view of the financing plan proposed by the National Advisory Committee for a National Highway Program, the Clay commission. BYRD declares:

"The committee's recommendations fall generally into two parts: (1) Continuation of the regular Federal aid to highways at the rate of $623 million a year, and (2) expenditure during the next 10 years of an additional $25 billion for the so-called interstate highway system. Federal expenditures on

the two programs in 10 years would total $31 billion.

"The committee estimates the $25 billion would construct 40,000 road-miles designated by the Federal Government as interstate highway. This would be little more than 1 percent of all public road mileage. The average would be about 800 miles per State. For this the committee recommends borrowing $20 billion at 3 percent interest and collection of $5 billion in fees from filling stations, motels, etc., operating on the rights-of-way.

"If the 30-year taxable bonds recommended by the committee can be sold at 3 percent interest, and if they are paid off on schedule, the last maturing in 1987, the interest would cost more than $11.5 billion. At this rate every dollar borrowed would cost taxpayers $1.55."

However, BYRD contends it is most unlikely, in view of the Federal debt's history, that the bonds would be paid off on schedule and predicts that the program will be expanded in mileage, scope, and amount even before the 40,000 miles are constructed.

"The committee recommended to the President," said BYRD, "that the program be financed throught a Federal corporation, which, without either assets or income, would borrow $20 billion from the public. The Treasury, under a contract with the corporation, would guarantee the corporation's bonds, but the debt would not be included in the record of obligations guaranteed by the United States. Annual appropriations to meet principal and interest payments would be requested, but the request could not be refused or reduced by subsequent Congresses for 30 years if the faith and credit of the Government are to be honored. If financial difficulty should develop at any time, the corporation with no further authorization could make mandatory calls upon the Treasury for amounts up to $5 billion outstanding at any one time.

"Such procedures violate financing principles, defy budgetary control, and evade Federal debt law.

"If the Federal Government can properly borrow money for roads in this fashion, without regarding it as debt, and spend it without budgetary control, it may be expected that similar proposals will be made for financing endless outlays. * * *

"This would mean operating the Government on two sets of books—one set for activities financed by borrowing outside the debt and expenditures outside budgetary control, and the other set for activities financed by borrowing on the record and expenditures under budget control.

"Count it as you will, as we spend more than our income, we add to our debt. The least the Government can do, in fairness to taxpayers, is to keep books and accounts in a manner reflecting the true state of our fiscal affairs."

Perhaps BYRD's condemnations of the fiscal methods suggested are unduly harsh, and we were not greatly impressed by the States' rights financing methods BYRD proposed instead. But it does seem odd that a "businessman's government" has proposed such an apparently unbusinesslike method of financing a very worthy project.

If the Federal Government cannot countenance, for example, a separate Columbia Basin account to help finance the expansion of self-liquidating Federal dam projects in the Northwest, how can it justify going outside regular budget channels to finance a national project which cannot directly repay its costs to the taxpayers?

Surely there must be some way, considering the importance of a national highway program, to depend more upon direct taxing to finance it and less upon cost-doubling bonds, annoying tolls, and other trick methods of raising the necessary funds.

Mr. Eisenhower's national highway program is an excellent idea, particularly if it can be kept reasonably free of pork-barrel politics and develop a truly national highway system. But the methods thus far suggested for financing it undoubtedly will get some deservedly critical attention in Congress.—B. J.

[From the Chicago (Ill.) Daily Calumet of January 25, 1955]

HIGHWAY PLAN NEEDS STUDY

To everyone who piles up mileage in an automobile President Eisenhower's proposal to spend $100 billion in 10 years to modernize the Nation's highways, looks good. But, it's not all gold that glistens. United States Senator HARRY F. BYRD, of Virginia, great watchdog of Uncle Sam's purse, has spoken sharply against the multibillion-dollar proposal.

Senator BYRD, whose reputation as a wallet watcher has maintained the Finance Committee chairmanship for him whether the majority is Democratic or Republican, declares the idea of financing a vast program by a bonding scheme outside of the Budget violates finance principles and opens the door to all manner of similar operations without budgetary controls. Says he: "This ambitious highway program would cost some $11.5 billion in interest. That figures that for each dollar's worth of highway constructed, gasoline taxpayers would contribute $1.55."

Mr. BYRD offers as a substitute that the Federal Government withdraw from the gasoline-tax field. He would cut the Federal levy, now 2 cents a gallon, to one-half cent and let the States raise their existing gas taxes for road purposes. We like that decentralization idea.

Senator BYRD, indeed, makes a strong argument when he declares that road revenue can be more easily distributed over future years if the States retain control over most of the fuel-tax moneys. Under the President's plan, we can see distinct possibilities of constructing multilane highways beyond actual present and anticipated needs in some areas and paying 55 percent too much for them through interest charges. Remember, after construction, comes maintenance costs. Ouch!

As far as strategic interstate routes are concerned, it appears to us the Federal Government with its tax on lubricating oil and a half-cent tax on gasoline, could press forward with programs to continue developing those highways. Certainly the job could be done on a pay-as-you-go basis. Of course, this is not as fast.

President Eisenhower's plan is the result of a study made by a committee headed by Gen. Lucius D. Clay. That committee's plan, adopted by Mr. Eisenhower, is based on existing rates of highway-user tax. We frankly wonder how much of that revenue from State and fuel taxes would remain for other roads after State participation in Ike's plan for the three key routes in Illinois. Continuation of existing highway programs, which we also need in our great State, might call for a boost in gasoline taxes for the small-car owner whose burdens are heavy enough already. The gasoline tax in Illinois now is murder—a nickel a gallon.

An estimate by the Clay committee that taxes on interstate highway filling stations and motels could raise $5 billion toward those roads look too much like counting chickens before they hatch. States certainly would want a hand in such a source of revenue, be it large, medium, or small. Bet your life on that.

Senator BYRD has performed a valuable public service in pointing out the pitfalls of the $101 billion (to be exact) interstate highway program. It would appear from this roost the Clay committee's grand plan deserves close examination and, if approved in principle, some revision lest it lead the Nation into a financial trap.

The Clay committee also is to be commended for working out a great scheme anent our highways. Our roads are lagging behind the onrush of more and faster automobiles. Too, highways form an important factor in our pattern for defense. Just the same, we feel sure, General Clay would be the first to concede that his plan is not bulletproof. Let the Congress weigh this program carefully. It's a terriffic deal.

H. F. W.

[From the Peoria (Ill.) Star of January 18, 1955]

BYRD CHALLENGES ROAD PLAN

We do not doubt that the $101 billion in road construction contemplated in President Eisenhower's plan is all needed, but Members of Congress had better sit up and pay attention to Senator BYRD's objections.

The Senator foresees that the plan entails borrowing by the Government beyond the legal debt limit. He foresees that every Federal dollar spent in this way will cost the taxpayer $1.55, since the interest charge (at 3 percent) on the proposed $20 billion bond issue would be $11½ billion. And Senator BYRD foresees that if this method of borrowing and spending outside the normal budgetary controls is approved by Congress, "It may be expected that similar proposals will be made for financing endless outlays which may be desirable for education, hospitals, public health, etc." Senator BYRD said the President's proposal for Federal funds for building schools was of this character.

One big objection to this type of financing is that the accounting system of the Government would not truly reflect its fiscal operations.

It is our opinion that Senator BYRD's point will have to be refuted logically before the President's highway plan can be approved, and we are inclined to believe that the Senator is right.

[From the Fort Wayne (Ind.) News-Sentinel of January 20, 1955]

IS NATIONAL ROAD PLAN PANACEA?

Much has been made of the Eisenhower administration's proposed national highway program as a positive hedge against the threat of a depression cycle.

Much has been said about the necessity for Federal domination on such a road program, and any critics who suggested it might well be another step in the ultimate complete domination of the citizen by his Government were dismissed contemptuously.

But the other day Senator HARRY F. BYRD, Democrat, of Virginia, brought his powers to bear on the matter and came up with a few thoughts with which the administration will have to deal.

Under the recommendations of the National Advisory Committee for a National Highway Program, the administration proposal falls generally into two classifications:

1. Continuation of the regular Federal aid to highways at the rate of $623 million a year.

2. Expenditures during the next 10 years of an additional $25 million for the so-called interstate highway system.

Now let's see what Senator BYRD has to say, first, about the Committee's recommendations for financing the $25-billion expansion:

If the 30-year taxable bonds recommended can be sold at 3 percent interest, and if they should be paid off on schedule, the last maturing in 1987, the interest on the bonds would cost more than $11.5 billion.

That, Senator BYRD points out, would mean every dollar borrowed would cost the taxpayer $1.55. Furthermore, he adds:

"Based on all recent Federal experience, I submit it is a violent assumption to predict these bonds will be paid off at maturity. In effect, we have not paid off a single dollar

of the Federal debt in 25 years. Continuing increase in the Federal debt is in prospect for an indefinite period."

Furthermore, the Senator predicts that even before the contemplated 40,000 miles of road are constructed under the program it will be expanded in mileage, scope, and amount—getting the taxpayer ever more certainly on the hook.

But, more importantly, Senator BYRD takes issue with the whole theory of the program being carried out by the Federal Government and dares suggest such a program is more properly the province of the sovereign States.

As a substitute for the Committee's recommendations, he proposes:

1. That the 2-cent gasoline tax now being collected by the Federal Government be repealed, thus permitting the States to reimpose it.

2. That present Federal aid to primary, secondary, and urban road systems, which for many years has been integrated with State highway systems, be continued on the long-standing match basis. (This aid now amounts to $535 million.)

3. That the lubricating-oil tax now collected by the Federal Government be continued.

4. That a one-half-cent-a-gallon Federal tax be imposed, which, together with revenue from the lubricating-oil tax, will be sufficient to compensate the Federal Treasury for this Federal aid.

We agree with Senator BYRD when he says his plan would permit the States to retain as much control over their roads as in the past, save $11.5 billion in interest to be applied to additional road construction, and evenly distribute road revenue over future years to keep highways modernized to meet changing conditions.

And certainly no Hoosier will disagree with the Virginian when he declares:

"Nothing is truer than the rule that power follows the purse. When the Federal Government makes a grant, it directs the exact manner in which the fund is expended, even though the expenditure is partly contributed by the State. Time and time again I have seen the iron hand of Federal bureaucracy compel the States to do things they desired not to do because of grants made by the Federal Government."

Hoosiers, too, have felt the "iron hand of the Federal Government" in the past and are feeling it currently in the Civil Service Commission's allegations on violations of the Hatch Act. And we don't like it.

[From the Indianapolis (Ind.) Times of January 18, 1955]

MR. BYRD WARMS UP

Senator HARRY F. BYRD has come out with a preliminary appraisal of the $101 billion highway program proposed by President Eisenhower's Advisory Commission.

The respected Virginian has made it clear that he is choosing his words with restraint, pending Ike's formal announcement on where he stands.

While merely warming up, so to speak, Mr. BYRD has this to say:

"Legerdemain * * * thoroughly unsound * * * a procedure that would violate financial principles, defy budgetary control and evade the Federal debt."

That is pretty good for a starter. In full voice, Mr. BYRD may peel the paint right off the White House.

We admire both his splendid early season form and his views on this matter.

The President's commission says among other things that if a Federal corporation is set up, and if that corporation sells $20 billion worth of 30-year bonds, then for some reason or other we can just forget about adding the total to our national debt.

Nonsense, says Mr. BYRD. The so-called corporation plans to pay 3 percent interest to the bond buyers. Over 30 years, that'll mean the buyers must be paid back their $20 billion plus $11.5 billion in interest. And who'll be in hock for all those billions? The taxpayers, of course. If that isn't adding to the national debt, what is?

Good luck, Senator BYRD. From any angle, the whole set-up looks about as sound as a chain letter.

[From the Richmond (Ind.) Palladium-Item of January 23, 1955]

UNSOUND FEDERAL FINANCING

Senator BYRD, Democrat, of Virginia, has shown his customary sound judgment in analyzing the proposal for a national highway program costing $101 billion.

The Senator finds that during the 10 years which this project would cover the Federal Government would spend $31 billion on the highways.

One part of this program includes the annual spending of $623 million a year in regular Federal aid to highways.

The second part would be the expenditure of $25 billion to build 40,000 miles of national highway.

Five billion of this latter fund would come from fees from filling stations, motels, etc., operating along the highways. The other twenty billion would have to be borrowed at not less than 3 percent interest.

Senator BYRD says that the interest on the twenty billion, the principal of which is to be retired in 30 years, would amount to $11½ billion dollars. This means that for every dollar borrowed taxpayers would have to pay back $1.55.

BYRD does not believe the bonds issued as evidence of indebtedness would be paid off in 30 years. He says that not a single dollar of Federal debt has been paid off in the past 25 years, and the national debt is going higher.

It also is a matter of concern to note that one of the proposals is that the Federal Government set up a corporation, which without either assets or income, would borrow the $20 billion from the public. The United States Treasury would guarantee the bonds, but the actual debt for which the Government would be pledged to meet if required, would not be included in the national debt.

This, actually, is dishonest bookkeeping and deceptive juggling of national obligations in order to avoid boosting the current staggering national debt of $275 billion.

This procedure would be a violation of sound fiscal policy as well as of moral principle.

Senator BYRD again has drawn a clear picture of what would be a grave mistake in Federal financing.

[From the Davenport (Iowa) Democrat and Times of January 30, 1955]

IKE'S ROAD PROGRAM MEETS OPPOSITION

President Eisenhower's vast new road-building program has encountered serious opposition in Congress.

Foremost critic is Senator HARRY F. BYRD, Virginia Democrat, and chairman of the Senate Finance Committee, who has assailed it strongly in his self-appointed role as watchdog of the Treasury.

As outlined in the report of the President's Advisory Committee, the 10-year plan concentrates on modernizing 40,000 miles of interstate highways. The Federal Government would continue regular aid to States for 10 years at $600 million a year while State and local governments would spend an aggregate of $70 billions over the same period.

In addition, the Federal Government would spend $25 billion on interstate highways. Some $5 billion would come from licensing filling stations, motels, and so forth, along the rights-of-way, while $20 billion would be raised through 30-year bonds issued by a Federal highway corporation.

Senator BYRD proposes instead that the 2-cent Federal gas tax be cut to one-half cent and the States be allowed to raise their taxes to absorb the difference. He thinks the States would do a better and more efficient road-building job.

Opposition from so strong and determined a Senator makes it certain the road program will not have smooth sailing.

[From the Muscatine (Iowa) Journal of January 21, 1955]

SENATOR BYRD ON ROADS

Senator HARRY F. BYRD, of Virginia, is recognized as among the able Members of the United States Senate and likewise as one who looks with concern at the mounting national debt.

He has commented and criticized recommendations which were made in the Clay Commission relative to a national highway program, in which included: (A) Continuation of the regular Federal aid to highways at the rate of $623 million a year; and (B) expenditures during the next 10 years of an additional $25 billion for the so-called interstate highway program.

It is to the latter phase of the proposal that Senator BYRD voices objections. The committee recommended borrowing $20 billion at 3 percent interest and collection of $5 billion from concessions operating along the highways. The committee report indicated that revenue from gasoline taxes and lubricating oil would liquidate the debt, which would be assumed by a Government corporation, carrying a Treasury guaranty, but with the obligation not included in the Government's debt.

Such a procedure, he charges, violates financing principles, defies budgetary control, and evades Federal law.

If the Federal Government can borrow money for roads in this fashion, BYRD contends, without regarding it as debt, and spend it without budgetary control, it may be expected that similar proposals will be made for financing endless outlays for other purposes.

"Count it as you will, as we spend more than our income, we add to our debt," he insists. "You cannot avoid financial responsibility by legerdemain, and you cannot avoid debt by classification. The obligations of the Federal Government and its citizens will still remain."

BYRD sees another grave objection to the program as outlined of importance equal to his other objections.

This is in the phase which provides Federal grants to States.

Since 1934, he notes, Federal grants to States have expanded enormously in cost and in functions. Every Federal grant, he continues, elevates the control of the Federal Government and subordinates the authority of the States. Nothing is truer than the rule that power follows the purse. When the Federal Government makes a grant, it directs the exact manner in which the fund is expended, even though the expenditure is partly contributed by the State. "Time and again I have seen the iron hand of the Federal bureaucracy compel the States to do things that they did not desire to do, because of grants made by the Federal Government," he asserted.

The Virginian, noting that he realizes the need of road improvements, proposes another way to get them.

He suggests that the Federal Government repeal its 2-cents-a-gallon tax on gasoline, permitting States to reimpose it; that present Federal aid to primary, secondary, and urban roads be continued on the long-standing basis; that the Federal tax on lubricating oil be continued; and that there be a one-half-cent-per-gallon Federal gasoline tax, on the basis of estimated increasing use, he says, will be sufficient to compensate

the United States Treasury for the Federal highway aid.

BYRD says his suggestions will result in more road development than can be accomplished under the committee's plan; will avoid increasing the national debt and will serve to preserve the soundness of the Federal budgetary system.

It's difficult to believe that the Virginia Senator is talking through his hat, for a considerable part of his career in public life has been devoted to the problems of road construction in Virginia.

[From the Sioux City (Iowa) Journal of January 19, 1955]

THE HIGHWAY PLAN

Senator BYRD, of Virginia, the Senate watchdog on finance, has spoken out sharply against the multi-billion-dollar highway construction program recently presented by Gen. Lucius Clay's presidential advisory committee.

The Senator, whose reputation as a dollar-watcher, has kept his Finance Committee chairmanship for him whether the majority is Republican or Democratic, says the idea of financing a vast program by a bonding scheme outside of the budget violates finance principles and opens the door to all manner of similar operations outside of budgetary controls.

Perhaps even more pertinent to Iowans who rejected a Democratic gubernatorial candidate and his proposed bonding program for highway modernization, is Mr. BYRD'S observation that the ambitious interstate highway program would cost some $11.5 billion in interest, meaning that for each dollar's worth of highway, gasoline taxpayers would contribute $1.55.

Mr. BYRD offers as a substitute for the Clay committee plan a proposition similar to that backed by numerous States in the past; namely, that the Federal Government withdraw from the gasoline-tax field. The Virginia Senator would cut the Federal levy, now 2 cents a gallon, to one-half cent and let the States raise their existing gas taxes for road purposes.

Senator BYRD makes a most significant point in his opinion that road revenue can be more evenly distributed over future years to keep roads modernized if the States retain control over most of the fuel-tax revenues. Under the Clay committee plan we can see distinct possibilities of building multi-lane highways beyond actual present and anticipated needs in some areas and paying 55 percent too much for them through interest charges. And after the construction phase would come the costs of maintenance.

As far as the strategic interstate routes are concerned, it appears to us that the Federal Government with its tax on lubricating oil and a half-cent tax on gasoline could press forward with programs to continue developing those highways. The job could certainly be done on a pay-as-you-go basis, though admittedly not as fast as a massive bond issue would permit.

Iowa has had some experience with highway bonding. We well recall the early thirties, when gasoline revenues were not meeting payments on the $100 million bond issue. The bonds had to be refinanced along with drastic action to increase gasoline revenues.

The Clay committee plan is based upon existing rates of highway user taxes. We frankly wonder how much of that revenue from State fuel taxes would remain for other roads after State participation in the committee's plan for the three key routes in Iowa. Continuation of existing highway programs, which Iowans need too, might require a boost in gasoline taxes for the small-car owner whose burdens are heavy enough already.

An estimate by the committee that taxes on interstate highway filling stations and motels could raise $5 billion toward those roads looked too much like counting the chickens before they hatch. And States would certainly want a hand in such a revenue source.

Senator BYRD has performed a valuable public service in pointing out the pitfalls of the $101 billion interstate highway program. We think that the Clay committee's grand plan deserves some very close examination and, if approved in principle, some revision lest it lead the Nation into a financial trap.

[From the Lexington (Ky.) Herald of January 21, 1955]

NATIONAL HIGHWAY PROGRAM

The President's National Advisory Committee headed by Gen. Lucius Clay has made recommendations as to what the road program of the United States should be for the next 10 years. President Eisenhower will submit a special message on this on January 27.

The Advisory Committee recommends continuation of regular Federal aid for highways at the rate of $623 million a year. This is a very wise suggestion because there is always the danger that in undertaking an extensive long-range program this might be used as an excuse for cutting down on the present road construction.

In addition, the Clay committee recommends that in the next 10 years an additional $25 billion be spent on constructing 40,000 miles of road designated by the Federal Government as interstate highway. This would entail an expenditure of approximately $31 billion in 10 years.

That practical businessman, HARRY F. BYRD, of Virginia, in a statement analyzing the Clay proposal, insists upon figuring the interest and adding it to the cost. He says this program will cost $42.5 billion and that "it is a violent assumption to predict these bonds will be paid off at maturity." He says that in 25 years "in effect we have not paid off a single dollar of the Federal debt."

He also says with considerable truth that the type of revenue-bond financing which is proposed violates Federal financing principles, defies budgetary control, and evades the Federal debt law. There is justification for this viewpoint, and Senator BYRD has called attention to many obligations of the Federal Government over and beyond those calculated in the Federal debt.

On the other hand, these roads just must be built. Unless they are, the population of the country is going to be decimated on the highways and traffic will be bottlenecked all over the country.

Senator BYRD offers an alternate plan which would not work as a substitute. Irreconcilable States righter as he remains, he suggests that the 2-cent Federal gasoline tax now being collected by the Federal Government be repealed and the source of revenue turned over to the States. No real national interstate system of roads would ever be built this way. There would be toll-road States, detour States, and a crazy quilt of patchwork roadbuilding without the through highways of the type the Nation needs. It is to be doubted, too, if the States would face the necessity for meeting these national needs.

A great deal depends, too, on the designation of the interstate highways and the division of the funds to be spent. For that reason, it is a good thing that the Public Works Committees of both Houses of Congress will go into details of this immense plan.

Meanwhile, there must be a new look at the whole problem of the big Federal debt because no longer can it be claimed that it is a New Deal device to throw the country into socialism. The realities of the debt situation must be faced and so must the roadbuilding needs.

[From the Biddeford (Maine) Journal of January 19, 1955]

HIDING SOME ROAD COSTS

When you are making a study of financial problems in relation to government it is usually safe to depend for one angle of the study on the opinion of United States Senator HARRY F. BYRD, Democrat, of Virginia. He has something to say on the proposed national highway program recommended by the National Advisory Committee to the President.

Those who favor bond issues to build roads would do well to weigh the words of the Virginia Senator. He touches on programs financed by borrowing outside the debt, and expenditures outside the record, as far as budgetary control is recorded; also on activities financed by borrowing on the record and expenditures under budget control. Senator BYRD says: "Count it as you will, as we spend more than our income we add to our debt. The least the Government can do, in fairness to taxpayers, is to keep books and accounts in a manner reflecting the true state of our fiscal affairs. When the Government contracts a bona fide debt, but arbitrarily removes it from classification as public indebtedness, it creates fiscal confusion and disorder, and destroys confidence in Government credit."

Federal grants have increased 300 percent in programs and 2,300 percent in cost since 1921. Committee recommendations fall generally in two parts, Senator BYRD points out. One part is continuation of the regular Federal aid to highways at the rate of $623 million a year, and (2) expenditure during the next 10 years of an additional $25 billion for the so-called interstate highway system. Federal expenditures on the 2 programs in 10 years would total $31 billion. The $25 billion would construct 40,000 road miles of such interstate highways. The average would be about 800 miles per State. If the bonds can be sold at 3 percent interest, and if they are paid off on schedule—the last maturing in 1967, the interest would cost more than $11.5 billion. At this rate every dollar borrowed would cost taxpayers $1.55, Senator BYRD figures.

The Virginia Senator says that, "Based on all recent Federal experience, I submit it is a violent assumption to predict these bonds will be paid off at maturity. In effect, we have not paid off a single dollar of Federal debt in 25 years. Continuing increase in the Federal debt is in prospect for an indefinite period. Actually, the committee recommends that the Federal Government assume virtually the complete obligation for the so-called interstate highway system. (Abolishing the 60–40 Federal-State matching requirement in this program.)"

Federal agencies will determine the location of the interstate road system, will fix the number and location of access roads, which may be considerable distances apart, will fix the fees for the activities, such as filling stations, motels, restaurants, etc., that are located along the rights-of-way, and will control construction standards and other details, the Senator points out in an article outlining his program to be introduced on the Senate floor.

Maine can appreciate the above warning by the Virginia Senator, as we already have such a powerful and dictatorial authority operating within the State.

Senator BYRD is going to do more than talk. He will offer a plan as a substitute for the Committee's recommendations. His proposals will include:

1. That the 2-cent gasoline tax now being collected by the Federal Government be repealed, this to permit the States to reimpose it.

2. Present Federal aid to primary, secondary, and urban road systems which, for many

years has been integrated with State highway systems, be continued on the long-standing match basis. This amounts to $535 million.

3. That the lubricating-oil tax now collected by the Federal Government be continued.

4. A one-half cent per gallon Federal gasoline tax. Revenue from this tax, plus the Federal lubricating-oil tax, according to estimates of increasing use, shortly will be sufficient to compensate the Federal Treasury for this Federal aid.

Under this plan States would retain as much control over their roads as they have had in the past; $11.5 billion interest would be saved for additional road construction; and road revenue would be evenly distributed over future years to keep highways modernized to meet changing conditions. Under the committee plan principal and interest payments on the $20 billion bond issue would dry up gasoline-tax revenue for 20 years, to 1987, with the exception of about $600 million which is committed to matching funds of States for their primary, secondary, and urban systems.

Maine would de well to study the program of Senator BYRD before committing the great-grandchildren of present residents to paying for roads which will be outmoded, worn out, and probably abandoned years before that generation of citizens first see the light of day.

[From the Boston (Mass.) Evening Globe of January 17, 1955]

SENATOR BYRD'S DOUBTS

President Eisenhower's $101 billion public roads program faces close inspection in Congress. That is the meaning of the attack delivered against the plan by conservative Senator HARRY BYRD, of Virginia. Senator BYRD, expressing the instinctive distrust of huge Federal projects implicit in an old-fashioned States rights southerner, thinks it would be wiser to have the Federal Government hand over gas taxation rights to the States to do their own road building.

Undoubtedly, the President's program is the largest public works proposal ever put forward by our Government in peacetime. Beside it, the projects sponsored by the late Franklin D. Roosevelt seem modest. On the other hand, the case for inducing Federal and State collaboration to obtain a well-balanced transcontinental road system is strong indeed.

Senator BYRD'S criticism may not block Ike's program. It does insure that Congress shall give careful scrutiny to the scheme before rendering a verdict.

[From the Boston (Mass.) Herald of January 14, 1955]

HOW TO MAKE DEBTS DEBTLESS

There are still a few Puritans left in the world of finance. These are the men who know life is hard and earnest, and it does no good to sugar-coat the facts. In Government HARRY BYRD is one of them. Sometimes we wonder if maybe we—well, here's the story:

The Federal Government is considering a $101-billion highway program in the next 10 years, of which the Federal share will be $25 billion. The traditional, the puritanical, method of raising the $25 billion would be to borrow it quite frankly and openly and put it on the books as that much more of a national debt.

But that isn't the present plan. The present plan is to set up an authority, which would issue the necessary bonds. This would make the debt a debt of the authority and not of the Federal Treasury, even though the bonds would be guaranteed by the gasoline tax and other governmental revenue.

In this way the Government could get the $25 billion without any increase in the national debt. The debtless debt system.

But that isn't the only modern un-Puritan device.

There is a plan now under scrutiny here and elsewhere for schools and other public buildings to be constructed by private enterprise, which would then lease the buildings back to the municipal or State government. When Government payments on the lease had sufficiently reimbursed the constructor, ownership would go to the Government.

Offhand, it would appear that the Government would pay, year by year, just as much on the lease as it would pay on borrowings for its own construction. The only difference would seem to be that in one case it would be called a debt (in the good old puritanical sense), and in the other it would not be called a debt.

Of course that isn't the whole story. It appears to be possible for private enterprise to build things a lot cheaper than some cities. Besides, securities issued by private enterprise yield income taxable under the Federal income tax, while municipal bonds give a happy refuge to persons in the high brackets. There may be something in the plan we don't fully appreciate.

Maybe we are being a stuffy old Puritan in wanting a debt to be acknowledged as a debt. Maybe we ought to go lie down on McKinley's grave and watch the world progress. But will someone tell us first how this debtless debt practice can be extended to family finances?

A PLAN FOR ECONOMIC DISARMAMENT

Mr. SYMINGTON. Mr. President, I rise to submit a resolution outlining a plan for economic disarmament. The resolution is a practical one, in that it presents a businesslike method for attaining disarmament.

In order to save the time of the Senators, and in respect of the memory of our beloved late colleague, the Honorable BURNET MAYBANK, I submit the resolution without making supplementary remarks; and I ask unanimous consent that it be retained in the Office of the Secretary of the Senate until Monday next, March 7, in order that Senators who may wish to do so may join in sponsoring it. At a later date I plan to speak on this resolution.

I ask unanimous consent that the resolution be printed in the body of the RECORD, at the conclusion of these remarks, together with an article by John R. Cavley, of the Kansas City Star; an article by Mr. R. K. Shackford, of the Washington Daily News; and, finally, an editorial, "The Gauge of Red Intent," also published in the Washington Daily News.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred; and, without objection, the articles and editorial will be printed in the RECORD.

The resolution (S. Res. 71) was referred to the Committee on Foreign Relations, as follows:

Whereas low living standards are one of the primary causes for war and improved living standards promote peace; and

Whereas such improved living standards can be attained only if world resources, both human and material, are devoted in increasing amounts to peaceful purposes; and

Whereas a major power has recently announced an increase in its armaments budget and has proclaimed as policy the expansion of arms production and war-supporting industry at the sacrifice of civilian production: Be it

Resolved, That the President of the United States be requested to present to the United Nations this proposal to explore the possibilities of limiting the proportion of every nation's resources devoted to military purposes, both direct and indirect, so as to increase steadily the proportion devoted to improving the living levels of the people.

That any such limitation provide adequate means of inspection and control and be made part of any comprehensive regulation, limitation, and balanced reduction of all armed forces and armaments.

That the exploration of the possibilities of this method of disarmament be pursued to gain recognition for the principle that the way any government divides its resources can be taken as a measure of its peaceful or aggressive intent; also for the principle that high living standards constitute an automatic built-in deterrent against aggression and that any nation which deliberately and persistently holds down the living levels of its people to build military power is a threat to world security; also for the principle that the conversion time that must elapse before resources can be shifted from peaceful to war purposes can be used as a basis for preventing possible aggression before it takes place.

That to implement these principles consideration be given to the following:

An adequate number of key resources be selected and standards be drawn up for determining what ratio of each of these resources should be set as a maximum ceiling limiting the proportion of each of these resources which may be utilized for military purposes.

Along with each such ceiling adequate measures of inspection and control be enforced to prevent the diversion or conversion for military purposes of resources committed for peaceful uses, also that any such acts of diversion or conversion be considered automatic evidence of aggressive intent.

The ceilings limiting the possible military uses should be set to attain a major increase in living levels, to provide adequate warning before any of these resources can be converted to war production and to contribute to other arms and armament controls.

These ceilings be subject to periodic revision by agreement among the participating nations with the view of providing balanced security and progressively to increase the proportion of all resources to be committed to peaceful uses, provided that it be recognized a "freeze" of existing resources allocations cannot be taken as a starting stage because it would freeze a pattern of continuing aggression for some nations, while keeping others relatively defenseless.

Ceilings upon the military uses of these key resources be established to the end that no nation's economic expansion be curbed.

In setting such ceilings, allowance be made for the special economic needs of individual nations, particularly those with underdeveloped economies.

That the President be further requested to direct the appropriate Government agencies to complete studies now underway, or to undertake any new studies that might be needed to carry through the objectives of this resolution.

The articles and editorial presented by Mr. SYMINGTON are as follows:

[From the Kansas City Star of March 1, 1955]

BOLD PEACE PLAN—SENATOR SYMINGTON OFFERS NEW CONCEPT FOR DISARMAMENT AND GLOBAL SECURITY—TO WORK THROUGH U. N.—RESOURCES OF EACH NATION WOULD BE PRORATED FOR CIVILIAN AND MILITARY PRODUCTION

(By John R. Cauley)

WASHINGTON, March 1.—Senator SYMINGTON, Democrat, of Missouri, today proposed an economic disarmament plan which he

said is aimed at "achieving security through high-living standards for all the peoples of the world, including the Russians and Chinese."

The Missouri Senator said he would introduce in the Senate tomorrow a resolution requesting that the President present to the United Nations a proposal to explore the possibilities of limiting the proportion of any nation's resources which can be devoted to military purposes. That would increase steadily the proportion of every nation's resources devoted to improving living levels, he said.

BASIS FOR ACTION

His proposal, SYMINGTON explained, would require a foolproof system of inspection and controls but, even if the Russians do not agree, he said, the plan still would provide a basis for action on behalf of peace.

"Under this plan," SYMINGTON said, "certain key resources would be selected. A system of ceilings would then be imposed, limiting the proportion of each of these resources that could be devoted to military purposes.

"As an example, it could be stipulated that no less than a certain percent of the steel output of a particular country should be allocated to its civilian economy. This clearly would limit the steel available for military purposes.

"These ceilings would not curb any nation's economic expansion."

SUBJECT TO REVISIONS

"Because of different economic needs, all nations would not be allotted the same ceilings. The ratios would be subject to periodic revisions by agreement."

SYMINGTON pointed out his proposal is advanced as an integral part of any enforceable proposal to achieve a balanced reduction of all arms and armaments.

Under SYMINGTON'S plan, once a nation has committed its resources to peaceful use, a significant length of time must elapse before they can be converted to war use.

A TIME LOCK

"This lapse of time—conversion time—is of crucial importance," SYMINGTON said, "because if aggression is to be prevented, the time act is during the period when the manufacture of weapons first begins. That is when resources are being shifted from peaceful to warlike uses.

"The resolution being introduced stresses the importance of a full study of how this factor of conversion time can be utilized to prevent aggression. In principle, this conversion time can be transformed into a virtual time lock, which would have to be broken open before any nation's resources could be shifted to warlike purposes.

"In the very process of being broken open, that time lock could serve automatically to warn the world of approaching aggression."

The Senator said that his resolution was not "put forward with any thought that such a disarmament program could serve as a substitute for our capacity for instant retaliation with nuclear weapons in case of an all-out attack."

MUST NOT LAG

"We must retain that capacity," he said. "And we should never lag either in the development of nuclear weapons, or in the means of delivering them. This is specially true with respect to the development and production of the so-called 'ultimate' weapon, the intercontinental ballistic missile with hydrogen warhead."

The plan embodied in his resolution, SYMINGTON explained, would enable the free peoples to bring to bear the full pressure of world opinion upon the Communist leaders to improve the living standards of their people.

"Since the same resources cannot be used simultaneously for both peaceful and warlike purposes," SYMINGTON said, "a rapid increase in the standard of living in Communist countries would tend to curb their potential aggressive power."

APPLY TO ALL

"The Soviet rulers have justified the hardships imposed on the Russian people as being necessary for defense. This plan of disarmament would be applicable to all nations. It would offer the Soviet leaders a means of preventing any possible invasion of Russia. At the same time the way would be opened for a swift and dramatic increase in the Russian standard of living.

"Rejection of this plan could only mean that the sacrifices now being exacted from the Russian people are made necessary by the aggressive intentions and commitments of the rulers of Russia."

[From the Washington Daily News of March 1, 1955]

(By R. H. Shackford)

President Eisenhower was urged today to explore the possibilities of challenging Russia to a butter over guns economic disarmament plan—a plan for raising living standards the world over.

Senator STUART SYMINGTON, Democrat, of Missouri, former member of the National Security Resources Board, announced his support of the plan and released the text of a resolution he will introduce in the Senate tomorrow.

"Low living standards * * * high armaments. I believe it is time the free nations launched an all-out moral offensive to break the chain linking these two," Senator SYMINGTON said.

Seventy-five percent of Russia's production goes into heavy, war-potential industries. Seventy-five percent of America's production goes into personal consumption for a high standard of living.

WORK THROUGH U. N.

Under the SYMINGTON resolution the Senate would ask the President to present the butter over guns plan to the United Nations. The U. N. would try to work out a formula for limiting the proportion of every nation's resources that could be devoted to military purposes.

The original butter over guns plan was suggested by Samuel Lubell, an associate of Bernard Baruch. It was published last week by the News and other Scripps-Howard newspapers. The plan would not stand alone but be part of an integral plan to obtain reduction of all arms.

"This (butter over guns) disarmament plan," Senator SYMINGTON said, "is designed to combat any type of aggression.

"The plan embodied in this resolution would enable the free peoples to bring to bear the full pressure of world opinion on the Communist leaders to improve the living standards of their people.

"Since the same resources cannot be used simultaneously for both peaceful and warlike purposes, a rapid increase in the standard of living in Communist countries would tend to curb their potential aggressive power."

The plan would call for a "fool-proof system" of inspection and control, as in all disarmament plans.

"Rejection of this plan," Senator SYMINGTON said, "could only mean that the sacrifices now being exacted from the Russian people are made necessary by the aggressive intentions and commitments of the rulers in the Kremlin."

AUTOS CITED

Senator SYMINGTON pointed out that the United States built 5,500,000 autos last year whereas the Soviets built only 45,000—less than 1 percent of United States auto production although Soviet steel production is growing fast.

The butter over guns disarmament plan, according to Senator SYMINGTON, is based on these principles.

"The way a government divides the resources at its command is a revealing measure of its peaceful or aggressive intent.

"High living standards constitute an automatic, built-in deterrent against possible aggression.

"After a nation has committed its resources to peaceful uses, a significant length of time must elapse before they can be converted to war."

If the Soviets rejected such a plan, Senator SYMINGTON said, it would reveal for all the world Russia's aggressive intentions.

Russia can block a butter over guns plan and probably will. But she cannot prevent the free world from observing how the Soviet regime is allocating more and more resources to military purposes and dragging the Russian people down to the armed misery of a totalitarian fortress.

[From the Washington Daily News of March 1, 1955]

THE GAGE OF RED INTENT

We can have no hope that any disarmament talk, whatever its form, ever will lead to actual disarmament so long as the rulers of Russia continue to pour the bulk of their nation's resources into war goods.

Unfortunately, Russian peace propaganda has been too much trusted, too little suspected, in too many parts of the world.

But the real test of the Kremlin's intentions can be measured by the treatment of Russia's civilian population. How much for human necessities and comforts? How much for war?

That is the purpose of the butter-and-guns disarmament proposal, which Senator SYMINGTON, Democrat of Missouri, now recommends to the United Nations. Senator SYMINGTON proposes a Senate resolution calling on President Eisenhower to urge the U. N. to explore and consider this proposal.

The idea is simple: Whatever nation depresses the living standards of its people to build military power is an aggressor nation, and therefore a menace to the peace of the world.

"High living standards," said Senator SYMINGTON, "constitute a built-in deterrent against possible aggression."

To prove the peaceful aims of which they prate, all the Russian rulers need do is convert a major portion of their resources to civilian purposes, in line with similar action by other industrial nations. No nation, and especially Russia, can maintain high living standards and at the same time go all out in preparing for war.

That's the test. It is a test any people can understand. It is a test from which the Kremlin bosses cannot hide. So long as they deprive their people of necessities and comforts in the interest of military power, so long must the free nations of the world judge them as aggressors.

The Russian rulers may block the butter-over-guns proposal, or any other disarmament plan. But they cannot prevent the rest of the world from seeing how they divide their resources between the civilian economy and their war program.

To this end, the butter-over-guns proposal merits the widest debate and attention in the Senate and in the United Nations—that it may be put squarely to the Communist bosses. Their answer inescapably will be the measure of their intentions.

Mr. KNOWLAND subsequently said: Mr. President, a little earlier in the afternoon, during my temporary absence from the Chamber, the distinguished Senator from Missouri [Mr. SYMINGTON] submitted a resolution which I believe has been referred to the Committee on

Foreign Relations. I think the resolution is deserving of an early hearing, to explore the point of view expressed relative to a means of carrying on our diplomatic relations with the Soviet Union, in an attempt to arrive at a formula whereby the world can be directed to more peaceful pursuits.

In asking that my remarks appear in the RECORD immediately following those of the distinguished Senator from Missouri, I ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, the following:

An article entitled "Butter Over Guns—A Peace Plan for the Free World," written by Samuel Lubell, and published in the Washington News of Thursday, February 24, 1955. I understand the article was also published in other Scripps-Howard newspapers on the same day.

An editorial entitled "Butter Over Guns," also published in the Washington Daily News of Thursday, February 24, 1955.

An editorial entitled "The Big Lie," published in the Washington Daily News of Saturday, February 26, 1955.

An article entitled "Ivan Has Less To Eat Now Than Under the Czar. Figures Prove Reds' Big Lie," written by R. H. Shackford, a distinguished foreign correspondent and staff writer, and published in the Washington Daily News of Friday, February 25, 1955.

An editorial entitled "Russia's Behind and Our Ahead," published in the Washington Daily News of Friday, February 25, 1955.

An article entitled "Agriculture Is Russia's Achilles Heel. After 37 Years the Soviets Still Can't Feed Their Own," written by R. H. Shackford, Scripps-Howard staff writer, and published in the Washington Daily News of Monday, February 28, 1955.

An editorial entitled "The Gauge of Red Intent," published in the Washington Daily News of Tuesday, March 1, 1955.

There being no objection, the articles and editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Daily News of February 24, 1955]

BUTTER OVER GUNS—A PEACE PLAN FOR THE FREE WORLD

(By Samuel Lubell)

The peaceful nations of the world can seize the initiative—now—in the long struggle for peace by striking at all that is most vulnerable in the Soviet system.

That opportunity was put there by the Kremlin itself in the bitter struggle which brought the recent downfall of Premier Georgi Malenkov. In the course of that upheaval the soft underbelly of Soviet communism was flung over and exposed. Unwittingly, Russia's own ruler pointed where to strike the blow that could change the whole course of the cold war.

They showed the world the way to mobilize every measure short of war to halt aggression before it takes place.

How can that be done?

By taking these steps:

The United States should sponsor before the United Nations a bold new plan of economic and military disarmament which would: Limit the proportion of any nation's resources that could be devoted to "guns"—that is, to war industries and all other direct and indirect military expenditures—as against "butter," meaning what goes to lifting levels of the people.

The debate touched off by this proposal should be used as a dramatic moral offensive to make clear to the world why high living standards are a built-in reassurance of peace, and any industrial nation which deliberately depresses the living of its people to build military power is a threat to peace.

If the Soviets accept the proposal, a basis for lasting peace might move into sight. Trade could flow freely, since products would be exchanged with Russia for mutual advantage.

But if the Soviets refuse to reverse their present guns-over-butter policy, the free nations should agree to treat her as a potential aggressor.

In support of that, every measure short of war should be invoked until the Soviets do reduce defense expenditures appreciably, and better the living conditions of the Russian people.

Among those short-of-war measures would be the full force of world opinion, the strengthening of other nations' defenses; also the breaking off of all economic relations—aid, credit or trade—which might strengthen a potential aggressor.

The basic idea of emphasizing living standards as a war deterrent was touched on by President Eisenhower in his speech before the American Society of Newspaper Editors in Washington in 1953. But there was no followthrough. Now there is opportunity to act.

This entire program stems from the nature of modern warfare. As Hitler taught only too well, wars do not start when one country crosses another's frontier.

War begins when a would-be aggressor shifts his resources from peaceful to warlike processes, when tractor assembly lines are replaced by tank assemblies, when building materials are diverted from constructing homes to rearing munitions plants.

In short, war starts when a would-be aggressor makes the ominous choice of putting guns over butter.

Malenkov's ouster stripped away the last illusion that the Soviet Union has become anything more than a perpetual war economy.

Although our own defense budget has been cut for 3 successive years, Soviet arming has been raised at least to what it was when Russia was supplying Red China with equipment to fight in Korea.

The Soviet proposal announced a week ago to freeze defense budgets at present levels still would leave Russia mobilized for aggression, while preventing peaceful nations from strengthening their own defenses.

It seems to have been brought forward largely to delude the Russian people into thinking that the new sacrifices being imposed on them are made necessary by some threat from the West rather than by the Kremlin's aggressive commitments.

In ousting Malenkov the dominant faction in the Kremlin cracked down on efforts to increase civilian production so as to expand Russia's arms and war industry. In essence this was the same decision Hitler made when he boastfully chose "guns over butter."

The challenge is clear.

If war is to be prevented, Hitler taught, the time to act is when the bombs are being made rather when they are falling.

The "butter over guns" disarmament proposal would furnish the basis for such action. By setting ceilings on the use of certain key resources, "butter over guns" disarmament would lock up enough of every country's production in peaceful purposes so no nation could mobilize its economy for a blitzkrieg without giving the world at least 3 years' warning.

No country's economic expansion would be curbed, since the proportion of resources allocated to guns, not the quantities, would be limited. The butter-guns ceilings also would vary with the special needs of individual countries—underdeveloped nations would not have the same ceilings as highly industrialized ones—and they could be reviewed periodically, say, every 5 years.

The net effect would be like drawing a new internal frontier inside each nation's economy—the butter-guns line—which, if crossed, would be an open confession that a government had passed from peaceful to aggressive intention.

If the men in the Kremlin really want peace, they should welcome such disarmament and cooperate to set up the system of inspection and control that would be required to enforce it.

If they do not, the peaceful nations still can draw this frontier against aggression by declaring they will use Russia's division of her resources as a yardstick for judging Soviet intentions.

Going further, the free nations could bring forward their own "butter over guns" standard of how Russia's resources should be divided to insure a minimum level of decent living for the Russian people.

Soviet propagandists, of course, would try to make the world believe that Russian living standards were rising. But the outside world would have little difficulty in judging the truth of the matter.

If Russia's resources actually were directed from war to peace, it would become readily apparent in the new homes that would be built, the new factories for consumer goods, the general abundance of things to buy.

In debating this butter over guns disarmament proposal we could call on the world to judge which of the two economic systems, ours or Russia's, makes for peace.

Last year, for example, the United States produced 5.5 million autos, 7.3 million television sets, and 9 million washing machines, refrigerators, and vacuum cleaners.

The steel used to manufacture these articles obviously could not be used for war.

In Russia, with roughly half of our steel supply, only 45,000 passenger autos were produced in 1954, only 365,000 TV sets, and hardly 600,000 washing machines, refrigerators, and vacuum cleaners. Most of the rest of Russia's steel went into expanding her military potential.

Shortly after he became premier, Malenkov revealed that more than two-thirds of Russia's industrial resources were being directed into heavy industry, and scarcely one-third to consumer goods.

Every possible means should be utilized to make known to the Russian people that satisfying their yearning for better living is our peace aim.

Within the Kremlin may be some men who will understand how other Soviet leaders are destroying any basis for peace by denying their own people a decent living.

Moscow has always sought to justify the harsh exactions inflicted on the Russian people as being necessary to strengthen Russia against outside attack. The butter over guns proposal would challenge this propaganda. The ceilings would be applicable to all major powers, including a revived Germany.

The peace offensive proposed here is not intended to settle every cold-war issue. It does not cover such problems as subversion, which could be considered another form of aggression. Nor would it take the place of efforts to control atomic and other weapons.

Essentially, it seeks to give new life to the possibility of curbing military aggression with measures short of war by gaining worldwide recognition for a simple principle:

That the intentions of even the most secretive dictators can be judged by how they divide the resources they command between

war preparation and bettering living standards.

It may be argued that other countries will not go along with so forthright a program. Even if we knew that to be true, simply to proclaim this principle before the United Nations would be a considerable victory for the cause of peace.

WHAT ABOUT ENFORCEMENT?

(By Samuel Lubell)

Enforcing butter over guns disarmament would be no more—nor less—difficult than policing other systems of arms control.

The plan aims at padlocking enough of every nation's resources in peaceful production so no country can mobilize its economy for military aggression without warning the rest of the world. A variety of inspection controls could be employed to achieve that objective.

Every phase of economic activity need not be policed. We know enough of the interrelated processes of mobilizing for war to be able to select a relatively small number of economic choke points—which would show readily how a nation is dividing its resources between war and peaceful uses. In Russia, because nearly all her industries rely on railroad transportation, inspection would be easier.

Obviously it would be easier to make sure that tractor plants were not producing tanks than to check on the number of troops or weapons a country might be permitted.

In any case, these industrial and economic controls could be reinforced by and meshed with the usual controls on weapons and armed forces.

The big question mark, of course, is whether the Soviets would agree to the tamper-proof system of inspection and control which all disarmament plans require. This requirement cannot be compromised.

Where butter over guns differs from other disarmament plans is that if it breaks down, the violation comes early enough in the mobilization process to give every other nation time to rearm.

Also by drawing a guns-butter frontier inside every nation's economy it provides the free world with a moral basis for employing measures short of war to halt aggression while it is being prepared.

[From the Washington Daily News of February 24, 1955]

BUTTER OVER GUNS

We're under no illusion that the Russians will accept the butter over guns disarmament proposal of Samuel Lubell, suggested on page 1.

They probably won't even want to discuss it.

They would much rather talk about capitalist warmongering and capitalist imperialism, and try to get us to waste our time talking about their own phony disarmament and peace proposals. Such as that latest phony, a freeze on armaments as of January 1, 1955, which would leave nations on Russia's east and west, Japan and Germany, totally disarmed, with Soviet bayonets bristling on their frontiers.

But we have our own good reasons to discuss butter versus guns. It is a subject of universal appeal to humanity in all lands, including especially the people in Russia and in other countries behind the Iron Curtain.

Those people have had precious little butter—or anything else they want and need. But they are overequipped with guns, tanks, bombs, jet planes.

Russia is 1 of the 2 mighty military powers on earth. Yet the average Russian worker has but one pair of shoes and it takes 2 months of his wages to buy another pair. He has only the clothes on his back. His family lives in one room. And his living condition cannot be made better as long as Russia's productive capacity is geared to producing tools of war, at the sacrifice of civilian goods.

Russia has more steel capacity than either Germany or England, and about half as much as the United States. But is that steel used to produce autos, refrigerators, television sets, bicycles, etc., as in Germany and England and the United States?

Certainly not.

But Russia has more jet planes than any other nation. More tanks. More artillery. The Commies claim they have more A-bombs than the United States has, and if we didn't know they were such liars, we might agree.

But this much we know: Russian arms fueled the Red aggression in Korea. Russian-made guided missiles and artillery and jet planes are lined up along China's coast facing Formosa, threatening the peace of the world.

If Russia's hard-pressed economy were diverted from producing arms and made busy providing a few necessities for the Russian people—another suit of clothes for each man, another dress for each Russian woman, another loaf of bread and roast of meat on the dinner table, a spare pair of shoes, a whole house or apartment for a family—there wouldn't be enough productive capacity left for Russia to rear a formidable fortress and keep other countries fearfully armed.

Even if Russia agreed to a foolproof inspection of atom-bomb production—which she won't—we still would need to draw a line on how much of her productive capacity were dedicated to civilian needs.

Hitler couldn't have started a war if several years earlier he hadn't started denying his people in order to build his war machine. Yet Hitler never denied his people as the Russian people are denied now.

Our hope for peace for our time lies in somehow forcing the Russian rulers to provide more generously for the Russian people—to lock up in higher living standards the Soviet productive capacity.

The boys in the Kremlin would rather talk about something else. But let's talk about that. It's a way to get the Russian people, and all peoples, on our side.

[From the Washington Daily News of February 26, 1955]

THE BIG LIE

It would be fantastic, of course, to have any real expectation that the Russians ever would agree to any workable disarmament program.

But that doesn't mean the "butter over guns" idea shouldn't be proposed and debated.

The chief purpose of the proposal is to get over in a dramatic way to the peoples of the world, including as far as possible the Russian people, the difference to them individually between the economy enjoyed by the United States and the economy suffered by the people of Russia.

For home consumption the Communists harp on the big lie—that the people of the United States are living in misery because the Government has devoted our resources almost exclusively to war production.

The opposite is true, of course. While about 75 percent of our production goes to consumer enjoyment, only about one-quarter of Russian production is grudgingly liberated for consumer goods.

But the Russian people, who never have had a decent standard of living, are fed on promises—promises which never materialize. Still there always is hope. What else have they to live on?

And they are fed on the big lie that conditions in America even are worse than they know them to be in Russia, despite the propaganda.

The nub of the "butter over guns" program is that all industrial nations agree to limit the proportion of their productive capacity devoted to a war potential. The Russians won't agree, as we have said.

But we think they should be given the opportunity to reject it. For in the rejection is another telling revelation of their aggressive intentions. And in the process, another means of showing the peoples of friendly and neutral nations—and to some degree the peoples behind the Iron Curtain—the evidence of our own peaceful intentions.

The evidence is conclusive. It lies in the overwhelming percentage of our resources which are devoted to the well-being and pleasures of the individual American citizen—as against the headlong war production in Russia.

The difference will be understandable to anyone once the facts are made clear. The "butter over guns" proposal is an effective and vivid way of achieving this. It is a peace offensive with a stomach appeal.

[From the Washington Daily News of February 25, 1955]

IVAN HAS LESS TO EAT NOW THAN UNDER THE CZAR—FIGURES PROVE REDS' BIG LIE

(By R. H. Shackford)

If the United States challenged Russia to give the Russian people more basic needs, it might expose one of the biggest "big lies" intensively propagandized by the Kremlin.

That big lie goes like this:

The United States economy is on a war basis; the Soviet economy is a peaceful one.

The American standard of living is deteriorating and impoverishment of American workers is growing; the Soviet standard is improving rapidly and the Soviet worker is happy as a lark.

THE LUBELL IDEA

The butter over guns peace proposal of Samuel Lubell, published in the News and other Scripps-Howard newspapers, strikes at the heart of this problem. The United States would sponsor a United Nations plan for economic disarmament. All nations would be asked to agree to limit the proportion of their resources devoted to guns—heavy industry—to allow more for butter—consumers' goods.

Today three-fourths of what Russia produces never gets to the consumer; it goes into heavy industry (what the Communists call means of production) to turn out more heavy industry and armaments.

By contrast, nearly three-fourths of America's production is for personal consumption; food, clothing, houses, autos, TV sets, refrigerators, and so forth.

Since World War II per capita personal consumption in the United States has risen more than 40 percent. Russia is barely above prewar level and in most of her satellites personal consumption has been reduced below prewar levels.

This is the comparative production picture of Russia and the United States:

STEEL

Russia has surpassed both Britain and Germany, but has only about two-fifths of American production. The Soviets are about where we were during World War I. Despite the advantage of western know-how, Soviet steel capacity is increasing at the same rate we were 40 years ago. Almost all Soviet steel production goes back into heavy industries or armaments.

AUTOMOBILES

United States: With steel production of about 111 million tons a year, we produce more than 6 million cars annually plus another 1 million trucks and buses. In 1915–16, when American steel production was about the same as Russia's today, the United States made 895,930 passenger cars and 74,000 trucks.

Russia: With steel production of 41,700,000 tons, only 28,000 cars were made in 1950;

only 42,000 are due this year. If the ratio between steel and auto production was the same as in the United States, the Soviets would be building more than 1 million autos a year.

HOUSING

United States: Between 1946 and 1952 6 million privately owned one-family separate dwellings were built in urban areas. Average size was 4 to 5 rooms. In addition, millions more multi-dwelling units and rural houses were built.

Russia: In the same 7 years only a little more than 1 billion square feet of urban housing was built. That's equivalent to about 10 million 10- by 12-foot rooms. Fewer than 4 million rural dwellings—many floorless huts—were built.

FOOD

Russians always have lived on a bread diet. Yet the Soviets can't produce enough grain for the people, let alone to raise livestock. That didn't deter the regime from selling 366,000 bushels of wheat last week to Iran. America is plagued with the reverse problem—huge grain surpluses.

United States: More than 23 million pounds of meat are produced annually—145 pounds a person.

Russia: Meat is almost unknown to average Russians. Stalin's grandiose target for 1955—now admitted a flop—called for only 5,600,000 pounds of meat or 25 pounds a person. Actual production is less than half that.

CLOTHING

United States: More than 500 million pairs of leather shoes annually or 3 pairs for each person; nearly 2 billion pairs of hosiery or a dozen pairs a person; more than 10 billion yards of cotton goods.

Russia: Only about 1 pair of shoes a year for each of its 210 million people; 777 million pairs of hosiery; less than 6 billion yards of cotton goods.

[From the Washington Daily News of February 25, 1955]

RUSSIA'S BEHIND AND OUR AHEAD

A story that went the rounds here in wartime, when Russia was an ally, related that a Soviet general called at the Pentagon to complain loudly that the United States was behind on promised deliveries of munitions to Russia.

An American general listened to the tirade just so long and then started reeling off a number of promises the Russians had made on which they, too, had failed to deliver.

"But," said the indignant Russian general, "I am not here to discuss the Russian behind. I am here to talk about the United States' behind."

The story gives point to why it is all to the advantage of the United States and the free world to explore and debate the butter-over-guns disarmament idea—the proposal that each industrial nation's aggressive intentions be measured by how it divides its productive capacity between the hardware of war and soft goods for civilian uses.

It is in producing things the people want that is Russia's biggest "behind," and contrariwise the United States' largest "ahead." Indeed, all countries of the Western World are far ahead of Russia in permitting people to work for their own comforts.

After 37 years of Communist rule, the Russian people are worse off than under the Czars. They have fewer cattle, and thus less beef on the table and fewer hides from which to make shoes. Russia has a vast and potentially productive Wheat Belt, but there isn't enough bread to eat, because farmers over there do not have the incentive, as ours do, to make 2 grains grow where 1 grew before. And because too much of Russia's chemical capacity is devoted to making explosives rather than fertilizers, and Russia's rapidly expanding steel production goes into tanks rather than tractors.

We have here the material for a big debate: Does capitalism or communism promote war? In all capitalist free-economy countries, where goods are produced to meet the demands of consumers, living standards have risen. In Russia, living levels are being deliberately depressed to build a more awesome war machine.

The people of England, who suffered so cruelly from Hitler's air armada and who have known so much of austerity, will understand the menace of an unfriendly country staying perpetually on a war economy. The French, the Dutch, the Belgians, the Danes, the Norwegians, whose lands were invaded, know the probable consequences.

None of those countries fears the United States, because they know that most of our productive capacity is devoted to making automobiles, refrigerators, television sets, and surpluses of food and fiber which threaten nobody.

[From the Washington Daily News of February 25, 1955]

AGRICULTURE IS RUSSIA'S ACHILLES HEEL—AFTER 37 YEARS THE SOVIETS STILL CAN'T FEED THEIR OWN

(By R. H. Shackford)

Of all the failures of communism, Soviet agriculture is the most dramatic and, for the Russian people, the most tragic.

It has been for 37 years of Communist rule because the peasant won't be communized, the farms were stripped of workers for heavy industry, and only a tiny amount of machinery was allowed for farm modernization.

Just before Stalin's death, Malenkov announced: "The grain problem * * * has been solved—solved definitely and finally."

A year later, just before Malenkov's ouster, Khrushchev said:

"The present level of grain production does not meet the growing requirements of the national economy * * * why was it believed that we had sufficient grain?"

The failure is not an accident. The reason is the deliberate planning of the Kremlin and its fanatical drive for more industry with military potential.

Here are some highlights from Khrushchev's report which disclose how desperately Russia needs more emphasis on peaceful rather than warlike production:

Grain: "It is completely inadmissible that as a result of a protracted harvesting period (up to 45 days some places), one-quarter of the harvest on collective and state farms is being lost."

Hogs: In one area, Khrushchev reported, "the number of pigs increased between 1940 and 1953 from 68,000 to 129,000, or nearly double. But the output of pork declined from 1,900 tons in 1940 to 1,500 tons in 1953.

"Twenty-two per cent of all pigs are being delivered in bad condition, weighing only 30 kilograms (66 pounds) each." (American pigs delivered for slaughter weigh several hundred pounds each.)

Dairy cows: "In Kostrama Oblast the number of cows increased by 20 per cent in comparison with 1949, but the production of milk decreased by 10 percent."

Beef cattle: "From October 1953 till October 1954, the losses of cattle in live weight amounted to 42,000 tons. This is due to fact that cattle delivered to many procurement bases do not receive either food or water for prolonged periods. The ministry of meat and dairy industry attempt to justify themselves with the peculiar theory that cattle can live without food for a prolonged period, and, having water, do not lose weight."

Tractors: Sovietized farms received only 137,000 much-needed tractors in 1954. In the United States more than 300,000 are sold for farms each year. The ratio of tractors to farm acreage in Russia is one-tenth that in the United States.

Khrushchev complained many tractors produced were obsolete, used expensive kerosene and damaged crops.

"For six years work has been in progress on the designing of a new tractor with a diesel engine," he said. "About 3,500,000 rubles were spent for this purpose, and the tractor hasn't been designed yet."

[From the Washington Daily News of March 1, 1955]

THE GAGE OF RED INTENT

We can have no hope that any disarmament talk, whatever its form, ever will lead to actual disarmament so long as the rulers of Russia continue to pour the bulk of their nation's resources into war goods.

Unfortunately, Russian peace propaganda has been too much trusted, too little suspected, in too many parts of the world.

But the real test of the Kremlin's intentions can be measured by the treatment of Russia's civilian population. How much for human necessities and comforts? How much for war?

That is the purpose of the "butter-and-guns" disarmament proposal, which Senator SYMINGTON, Democrat of Missouri, now recommends to the United Nations. Senator SYMINGTON proposes a Senate resolution calling on President Eisenhower to urge the U. N. to explore and consider this proposal.

The idea is simple: Whatever nation depresses the living standards of its people to build military power is an aggressor nation, and therefore a menace to the peace of the world.

"High living standards," said Senator SYMINGTON, "constitute a built-in deterrent against possible aggression."

To prove the peaceful aims of which they prate, all the Russian rulers need do is convert a major portion of their resources to civilian purposes, in line with similar action by other industrial nations. No nation, and especially Russia, can maintain high living standards and at the same time go all-out in preparing for war.

That's the test. It is a test any people can understand. It is a test from which the Kremlin bosses cannot hide. So long as they deprive their people of necessities and comforts in the interest of military power, so long must the free nations of the world judge them as aggressors.

The Russian rulers may block the butter-over-guns proposal, or any other disarmament plan. But they cannot prevent the rest of the world from seeing how they divide their resources between the civilian economy and their war program.

To this end, the butter-over-guns proposal merits the widest debate and attention in the Senate, and in the United Nations—that it may be put squarely to the Communist bosses. Their answer inescapably will be the measure of their intentions.

Mr. KNOWLAND. Mr. President, I believe these articles and editorials are worthy of the attention of the Senate. They are along the general lines, as I understand, of the resolution offered by the distinguished Senator from Missouri.

I hope the Committee on Foreign Relations will consider them and that the agencies of the executive branch which are interested in foreign affairs may also have the opportunity to discuss with the committee the merits or demerits of the proposal, in case there should be some weaknesses in the plan, so that the committee might be fully advised.

IMPORTANCE OF AN EXPANDED UNITED NATIONS TECHNICAL-ASSISTANCE PROGRAM

Mr. WILEY. Mr. President, I have been deeply interested in the work of the United Nations technical assistance specialists throughout the world who, along with our own point 4 experts, have literally been performing miracles in contributing to the economic health of underdeveloped nations, for a very modest appropriation on our respective parts.

I have before me a letter which was sent to the distinguished chairman of the Senate Foreign Relations Committee, along with various members of that committee, including myself. It comes from Mr. Oscar A. Benson, president of the National Lutheran Council. I ask unanimous consent that the letter be printed at this point in the body of the RECORD. It underlines the importance of an expanded U. N. technical-assistance program.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL LUTHERAN COUNCIL,
New York, N. Y., February 24, 1955.

The Honorable WALTER F. GEORGE,
Chairman, Foreign Relations Committee,
Senate Office Building,
Washington, D. C.

MY DEAR SIR: Pursuant of the expressed desire of the National Lutheran Council at its 1955 annual meeting held recently in Atlantic City, N. J., let me share with you the following statement concerning the continuing participation of the United States in the United Nations' expanded technical assistance program:

Among more than a billion people in our world today, substandard food and clothing supplies represent the normal condition. In vast areas, disease and illiteracy run rampant. Millions of our fellow men strive for a better future but need help to help themselves.

The National Lutheran Council, representing eight Lutheran church bodies whose aggregate United States of America membership totals 4.5 million souls, has been gratified to see the United States and the United Nations develop programs of technical assistance to countries in the economically underdeveloped areas of the world. We have been pleased that our country has had a leading role in the development of the technical assistance program of the United Nations.

We now note with keen disappointment that the United States has not contributed to the support of the United Nations expanded technical assistance program for 1955. We believe the United States should make clear its deep interest in an effective United Nations program.

The National Lutheran Council urges the Congress to strengthen the multilateral program of the United Nations by appropriating the full amount requested by the President for the United Nations expanded technical assistance program.

We urge that future appropriations for this important work be made in advance of the period of intended use so that the United Nations may develop a program of increased stability and vigor. We want to do our full share in supporting this program which helps the people of economically underdeveloped areas toward a fuller realization of their desires for a better economic, social, and cultural future.

Respectfully yours,

OSCAR A. BENSON,
President.

BIRTHDAY TRIBUTE TO HIS HOLINESS, POPE PIUS XII

Mr. WILEY. Mr. President, today, March 2, 1955, marks the 79th birthday of His Holiness, Pope Pius XII.

It is my pleasure and privilege to convey now to this great spiritual leader my warmest personal greeting and, I am sure, that of my colleagues in the Senate and House of Representatives.

It is my hope and prayer, and I am sure that of men of good will everywhere, representing all the religious faiths of mankind, that this great leader will enjoy many more full, healthy years in the service of mankind.

His long and unfortunate illness, from which he has not completely recovered, has caused deep concern, not only to the 450 million devout members of his church, but to all men who have appreciated his noble and tireless efforts in the cause of world peace, freedom, and spiritual dedication.

His particular efforts in sustaining the hope and faith of the millions of valiant souls of his own and other churches trapped behind the Iron Curtain, have been a particular contribution.

His historic appeals for wisdom and judgment on the part of leaders of all nations to avoid the holocaust of a third world war, have struck a respondent chord in hearts everywhere.

His Holiness, Pope Pius XII, is a great man, but a humble man. He is a frail man, but a mighty man. His is the supreme voice of his church, but his is a voice which speaks universal concepts that men and women of all faiths can understand and appreciate.

He is a great heir of a rich tradition of centuries, but he is keenly sensitive to the special needs of modern times.

As former chairman of the Senate Foreign Relations Committee, and now as its ranking Republican member, I am pleased to express this personal word of deep and sincere tribute.

His Holiness is no stranger, to these, our own American shores.

The many Americans who had the opportunity to feel his magnetic presence in the course of his extensive air travel throughout the United States almost 2 decades ago, remember him with deepest admiration. The people of Germany, where he served a tour of duty of 12 years, remember him with affection, as do the people of many other lands.

Eugenio Maria Giuseppe Giovanni Pacelli was born on March 2, 1876. He was ordained a priest in the Basilica of Saint Mary Major on April 2, 1899. A monsignor in 1904, and soon an envoy on many missions abroad, he became, on February 7, 1930, Papal Secretary of State, under Pius the XI.

During these long years of preparation, his notable record had marked him for the destined role which was to be his upon his selection by the sacred College of Cardinals for the position of vicar of Jesus Christ, successor of St. Peter.

His services as supreme pontiff has occurred during an era of grimmest significance to mankind. The onrush of the merciless international Communist conspiracy, with its vicious persecution of countless millions; the unveiling of the most destructive weapons in the history of mankind—to cite but two phases of the problems of our time—have made of his years in the Holy See some of the most significant in all the long history of the Catholic Church and of all mankind.

A great many anecdotes—inspiring, humorous, and full of human interest—could be told of this great but humble man. But the one I should like to recall now concerns his comments on the subject of a sneering remark by Red dictator Joseph Stalin. The archatheist and materialist, Stalin, had snidely asked at one of the international conferences, "How many divisions does the Pope have?"

When asked what he thought about Stalin's inquiry, His Holiness once said: "You may tell my son Joseph he will meet my divisions in the hereafter."

Perhaps that single sentence in reply to the ruthless enemy sums up most vividly the humility, the compassion, the understanding, the faith of this great spiritual leader. Perhaps, it best epitomizes the struggle of Christ versus anti-Christ. It depicts the caliber of leadership of this servant of the Lord, unawed by all the massive 175 Red army divisions or by the Red atomic bombs or H-bombs, unawed by the vast power of the Communist Party in Italy itself, or throughout the world. It conveys the well-merited, complete confidence and reliance in Him who is the only source of real power, and who is the Father—omniscient, omnipresent, omnipotent—of all men, of Communist and Christian alike.

So, now, to His Holiness—both from men, such as myself, and women not of his faith, as well, of course, as from the faithful of his church; from the hearts of humanity everywhere—go these prayerful good wishes and congratulations. May divine providence grant him many, many more years of service to mankind.

USE OF BAGASSE NEWSPRINT

Mr. ELLENDER. Mr. President, I hold in my hand a weekly newspaper, the Franklin Banner-Tribune, published in Franklin, St. Mary Parish, La., the heart of the Louisiana sugarcane belt. This issue—that of February 24, 1955—is printed on bagasse newsprint. The heading at the top of the front page is as follows: "Twenty-five Louisiana Papers Using Bagasse Newsprint."

On page 2 appears an editorial entitled "The Sugar Belt Makes History Today." The editorial sets forth a most interesting account of the trials and tribulations which were experienced by those who worked on the project and brought it to a successful conclusion. I ask unanimous consent that the editorial be printed at this point in the body of the RECORD, as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE SUGAR BELT MAKES HISTORY TODAY

Thursday, February 24, 1955, will go down in history as one of the most momentous

days in the economic revolution that is taking place in the Sugar Belt of Louisiana.

All over the 18-parish area in which sugarcane is grown, and even in some sections of Louisiana that do not cultivate and harvest the tall, sweet grass, smalltown weekly and daily newspapers are going to press today with a special type of newsprint.

The cooperating publications are publishing their regular editions on paper that has been made from Louisiana sugarcane bagasse by the Valentine Pulp and Paper Co., of Lockport, La.

This significant announcement means that at long last a byproduct of the principal crop grown in southern Louisiana is being put to use for the manufacture of one of the most important commodities consumed in a free country. Over one-half of the 700,000 tons of bone dry bagasse that has been produced in the State has largely gone to waste. Now it is going into newsprint and other paper products to help to satisfy the needs of a dynamic, growing population.

There are many far-reaching aspects to this official announcement. For one thing it means that now the sugar cane farmer will be growing a crop that will be used in its entirety. It marks the beginning of an era when year-around employment will be realized in the cane patch supplanting the uncertainty of the seasonal "cane grinding." The Valentine properties at Lockport substantiate this statement. The new paper mill adjoins the sugar factory, cane fields and research department of the company. There are jobs to be had in the sugar mill and the fields and in the laboratory and now there are 180 more men and women employed in the paper mill.

This has resulted in a boom in the Lockport community and throughout the parish of LaFourche. A big new housing development is now going into Lockport and the new payrolls will mean new families and new homes and a higher standard of living and a bigger and better town.

What the smokestacks of Valentine have done for that area will be accomplished throughout the sugarcane-growing part of the State just as sure as night follows day. St. Mary and her sister parishes are bound to benefit from this program.

This is a rich and diversified agricultural area but cane is king in the land. The farmer can grow sugar cane better than he can grow any other kind of crop. He has proven this for over a century now, overcoming every conceivable type of obstacle from disease to world politics. He has developed new varieties of sugar cane and by sound farm practices he has been able to realize a higher yield per acre with each passing year. Now he will be growing cane for sugar, sirup, molasses, feed—and paper.

If there has ever been any doubt in the mind of the cane planter about the value of research the Valentine mill should erase it forever. This new development was due to hours and months and years of patient, painstaking work and experimentation in the laboratory of the Valite Corp., an affiliate research company of Valentine's. The work began back in the 1930's and was accelerated after the Korean war. In 1952 newsprint was made from 100 percent bagasse by the company on an experimental basis at the Herty Laboratory in Savannah, Ga.

After economic feasibility was established, Valentine interests banded together with Brown and Root, one of the world's greatest construction firms, to form the Valentine Pulp & Paper Co. A mill capable of producing 50 tons of paper products daily was built at Lockport. The success of this mill is attested to by the fact that hardly had it been completed but what the company announced that it was being expanded into a $4,500,000 facility capable of manufacturing 80 tons of paper a day, including newsprint.

Small town newspapers in Louisiana and all over the Nation have been confronted with a problem that parallels the problem of the cane farmer in magnitude. Newsprint has been a scarce and expensive commodity. Most of it had to be imported. Financially unable to build their own mills or even enter into long range contracts, the small newspapers have had to fight for newsprint in the open market on a catch-as-catch-can basis. During wartime the situation had been particularly acute and the black market operators thrived.

The newsprint market has improved considerably, but the future for the small town newspaper had been in doubt. Now, with the mill at Lockport able to supplement established sources, the nonmetropolitan press can face the future with confidence. Newsprint is the basic commodity on which the free press is printed and if it is cut off, the real victims will be the American people because, without the newspaper for the dissemination of news and advertising, freedom would die on the vine.

Member newspapers of the Louisiana Press Association look on the mill at Lockport as "their mill" because for almost 4 years now the LPA has been working hand-in-hand with the Valentine company on this project. The ultimate benefit to the economy of the State of Louisiana is beyond the imagination.

There is one last conclusion that can be drawn from this development. The Farm Bureau of Louisiana, the American Sugar Cane League, Louisiana Congressmen and other agencies have fought a hard but discouraging fight for an increase in the mainland quota of sugar cane. If there had been any hesitation on the part of the Congress or the national administration to justify this increase, that question should now be resolved in favor of the increase. There are about 120 small town newspapers in Louisiana and over 8,000 in America. They won't all use bagasse newsprint, but this new source may one day mean the difference between success or failure to many of them.

This story is being told in Louisiana today, but in a few days it will be known all over America and in most foreign countries. Great industries are built over a long period of time. The south Louisiana paper manufacturing industry will be built around bagasse. The only way to insure its full growth is with an ever-increasing supply of sugarcane now and in the years that lie ahead. The only safe and sure way to obtain the product needed by the American farmer and the American publisher is to have it grown on the same ground that gave birth to the Red, White, and Blue.

ADDRESS BY THE SECRETARY OF THE TREASURY BEFORE THE NATIONAL CANNERS ASSOCIATION

Mr. BENNETT. Mr. President, Treasury Secretary Humphrey, in Chicago, on February 19, made an unusual speech in which he asked himself questions, and then gave the answers, on many of the troublesome problems of the present day. The questions asked are of the bothersome kind that many Members of the Congress are asked these days. The answers are forthright and clear, from a man in a position to have a substantial amount of information on what the situation is. So that all Members may have available to them the answers to these questions, I ask that Secretary Humphrey's speech in full be inserted in the body of the RECORD. It deserves careful reading.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS BY TREASURY SECRETARY HUMPHREY AT 48TH ANNUAL CONVENTION OF THE NATIONAL CANNERS ASSOCIATION, CHICAGO, ILL., FEBRUARY 19, 1955

Mr. Willkie (Mr. E. E. Willkie, president of the National Canners Association) and gentlemen, I am delighted to have the opportunity to meet with the National Canners Association this morning.

I am greatly impressed with something I have just heard about your association. I am told that your financial statement for the past year shows that you have operated with a budget that is balanced. To one who has the ambition to do likewise but is beset with all of the problems of the Secretary of the Treasury of the United States, that is something I note with great envy.

I am also glad to have this opportunity to see so many of my good friends of days that were more carefree and to have this chance to explain to such a fine group of leading businessmen as are here this morning some of the simple principles so vital to the successful operation of our economy which the Eisenhower administration is trying to perpetuate and strengthen.

We live in an age of change, devoted to the use of new techniques. Now, as I am not an orator but at heart, and by experience, just a businessman like yourselves, to whom deeds mean more than words, I am going to choose a new technique in speaking to you this morning. It is the technique of the presently popular radio-TV quiz show. By using questions which I am constantly being asked by Government officials, newsmen, Members of Congress, and people like yourselves, I will try to inform you by my answers of our problems, our accomplishments, and our hopes.

Gentlemen, the stage is set. The clock is marking off the seconds. The klieg lights are on. The moderator is in his place. We are on the air and are ready for the first question.

Question: "Mr. Secretary, please tell us—has the administration abandoned its program of trying to balance the budget?"

The answer to that is absolutely "No." We are working, and with a reasonable amount of success, toward a balanced budget. The record shows that progress has been good, even though we have not reached the goal. The Government's deficits have been cut substantially since we came into office. The deficit in fiscal 1953 was almost $9½ billion. We could do very little about this in 5 short months as actual spending plans were committed beyond recall. However, the Eisenhower administration did cut the deficit in the next fiscal year, fiscal 1954, down to $3.1 billion, or two-thirds of the way toward a balanced budget. It is true that the deficit in the present fiscal year (fiscal 1955) looks like $4.5 billion, but the new budget for fiscal 1956 again cuts the deficit to $2.4 billion. Both the present deficit and the deficit for the next fiscal year may be less than now estimated if revenue holds up and if we are able to cut spending further, as we are continuously trying to do.

Question: "Why haven't we cut Government spending faster?"

The Government can only reduce its expenses by putting people out of work, either directly or indirectly. This sounds harsh, but the fact is that the Government spends most of its money for only two things: (1) the employment of people working directly for the Government, or (2) the purchase of goods which are made by people who will be out of work if the orders for the goods are canceled. Under these circumstances, it would not be prudent to cut Government spending too fast, even if it were possible to do so. Of course, the most important reason

is that in these perilous times our first obligation to the Nation is to adequately provide for our security. But there is another very important consideration that must be prominently kept in mind.

We must constantly have in mind in making these reductions the necessity of creating new employment to absorb those who will thus be out of work. There must be a great transition—moving people from working for the Government, either directly or indirectly, into jobs working for the production of goods for the general public. We have gone through 2 years of this transition with reasonable success. We are striving continually to do better and to make the transition with less loss of time for those directly involved. We cannot switch from years of deficit spending to a balanced budget in too short a time.

Question: "Why has this administration cut so much from the defense budget?"

Sixty-five percent of our latest budget goes for major national-security programs. This amounts to about $40.5 billion a year. Of the remaining $21.9 billion, $14.8 billion or 24 percent of the total budget goes for payment of interest on the debt and other charges fixed by law. That leaves only $7.1 billion, or 11 percent, of the total budget for other so-called civilian agencies of Government. So, it simply follows that if any large cuts in spending are to be made, they must largely come—but carefully and wisely made—from the heavy total for defense.

Now, when we talk about cutting expense, let's always remember that does not mean cutting our effective defense. Let's recall how much stronger we are today than we were when Korea began in June of 1950. At the outbreak of Korea, our Armed Forces had less than 1½ million men, equipped almost wholly with material of World War II manufacture. We now have 3,100,000 men in service, and our present target for 1956 is an armed strength of 2,860,000 men, or almost double the number of June 1950. By the end of fiscal 1956 we will have an Air Force of 131 wings and 975,000 men as compared with 48 wings and only 411,000 men when the Korean fighting began. The Navy and marines will be second to none (with 857,000 men). And the Army will be 80 percent above June 1950 in manpower (1,027,000 as compared with less than 593,000), but of even greater importance is the fact that because of advances in the science of warfare, each Army division will have 80 percent more firepower than a division of World War II.

To support these forces, we will spend an estimated $34 billion—almost three times what we were spending when Korea broke out. So the total in both personnel and money going into our defense forces today is comparatively substantially increased.

Question: "Have we cut too much from our security?"

No. The reductions that we have made in spending for defense have not reduced our armed strength. As the President has said, we are increasing it; this Nation is in a stronger position to defend itself today than it was 2 years ago. We have a more flexible and better balanced Defense Establishment tailored to meet the requirements of future warfare and at lower cost to the taxpayers. Nothing that has happened in Formosa or elsewhere in the world up to this very day has changed our budget plans for lower spending in the year to come. I say this while emphasizing one basic fact: We can and will spend whatever we need to spend for our security. But this administration is operating in the firm knowledge that real security comes not from merely spending billions of dollars but rather from spending them wisely.

What we are doing is shifting some of the emphasis from men to machines, from the old concept of slugging it out with masses of men to being ready to beat the enemy with mobility, technological know-how and the most modern superiority of weapons and equipment.

Question: "Can't we cut spending and balance the budget by just eliminating all foreign aid?"

That is a program which is often suggested but is neither simple nor wise to carry out if you just stop and think about it. Certainly it is better to put military equipment in the hands of our friends overseas so that they can help to defend themselves if the need comes, rather than to also send American boys to handle those weapons, with all the potential loss in lives and national wealth, as well as the human anxiety that is involved. Total expenditures for mutual security, including both military assistance and economic support, are estimated at $4.7 billion for fiscal 1956, including the provisions for a program in Asia. This compares with mutual security spending of $4.3 billion in the present fiscal year.

The total cost included in this program for economic assistance alone is $1,025,000,000 in fiscal 1956 as compared with $1,075,000,000 in the present fiscal year. The total estimated expenditures in 1956, not including obligations for the future, for all Asian economic assistance will be about $585 million as compared with about $500 million to be spent for economic aid in Asia in the present fiscal year. So, while the estimated over the actual spending for economic aid increases slightly in Asia, the overall foreign economic aid program is still decreasing. This is directly in line with this administration's conclusion that we can best serve the cause of the free world by helping its members to help themselves through selective development programs in which private investment can play the major role.

While significant accomplishments have been realized through foreign aid which are in the mutual interest of the United States and other free countries, history has sadly proved that large grant programs not only burden the American taxpayer but do not always produce either stronger or more friendly allies. The entire program is under intensive, continuing review to be sure that in the future both military and economic assistance may be properly balanced as operating parts of our foreign relations and defense programs.

Question: "In view of the big reductions in expenditures that have been made could the budget have been balanced?"

Yes. If we had not accompanied the heavy cuts we made in spending with substantial tax cuts, we would have balanced the budget. But we had to consider the proper balance in our sensitive economy. We knew that heavy cuts in Government spending meant putting people out of work. We believed that we should cut taxes sharply and so give more people added money to spend for themselves to help create jobs for those who previously got their paychecks directly from the Government or from Government purchases. We cut taxes in calendar year 1954 by a total of $7.4 billion—the largest single dollar tax cut in history. We did this to help make possible the easier and quicker transition in jobs from high Government spending to lower Government spending. The fact that the economic downturn was so quickly checked and that we are now proceeding upward on a broad front is proof that the policy of cutting taxes as we cut spending is a sound policy. The fact that consumer spending in the past year was the highest that it has ever been is also good evidence of how the tax cuts helped to make the successful economic transition.

Question: "Will there be further tax cuts?"

Not this year, if the administration's recommendations are accepted by the Congress. The President has proposed that the corporate rate of 52 percent, as well as excise taxes which would go down on April 1, be continued for 1 full year. We are asking this because we think the current status of the economy will take it and because further tax reduction would lead to too heavy deficit financing and a possible revival of dangerous inflationary pressures.

This does not mean that taxes must not be cut further. They are still too high for the long run and must come down. As the President has said, we certainly hope that we can be planning additional tax reductions a year from now.

Question: "If you are going to cut taxes further next year, how can you ever balance the budget?"

That is a question we are often asked—and it is an important one. As I have said, we have not abandoned the goal of balancing the budget, and neither have we stopped cutting taxes. We can and will do both. We will keep trying to cut government spending further. At the same time our expanding economy can provide greater tax income even at lower tax rates because it is on a broader base. As this country continues to grow, there is no reason why we can't have both a balanced budget and lower tax rates provided only that world conditions continue to improve.

Let's notice here the difference between the administrative and the cash budgets. As long as the Government is not taking out of the economy more than it spends, the Government is not increasing the money supply and thus being inflationary. So when we have a balance in the cash budget (which includes the receipts of the trust funds such as social security) we have eliminated that particular inflationary pressure. We did have a cash balance between money collected from the public and money paid out by the Government last year, although we will not quite have a cash balance this year. We estimate a small cash surplus in fiscal 1956. So that the inflationary effect of deficit financing will have been almost eliminated during the entire period this administration has been in financial control.

Question: "Why do you have to raise the debt limit if you are really cutting spending as you claim?"

When we came into office, there was $8 billion between the amount of the then-existing debt and the $275 billion debt ceiling. Now, in the very first year, the previous budget which we inherited turned out with a deficit of $9½ billion. Actually there was little we could then do beyond carrying out the spending that had already been planned and paying the bills that were presented. We had no leeway under the debt limit as we entered our first full fiscal year, 1954, so we asked the Congress for an increase, as a matter of prudence as we looked ahead. As things came out in fiscal 1954, we cut the prior administration's $11 billion estimated deficit (after an overestimate of revenue is figured in) to $3 billion—a cut of $8 billion. But even then we still had this $3 billion deficit that had to be put on top of the $9 billion deficit that we inherited from the preceding year. These two things, plus the wide seasonal variations in collection of corporate income taxes, made some elasticity in the debt limit absolutely essential. Congress recognized this and last year authorized a $6 billion temporary increase in the limit on the condition that the debt would go back to the $275 billion limit at the end of this fiscal year.

This year we estimate a $4.5 billion deficit, which we hope we may cut a little, as I have said. And in fiscal 1956 we are estimating a smaller deficit of $2½ billion or less. But regardless of the size of the deficit and the reductions we are making, each deficit pushes up our debt still further, and so involves the problem of what to do about the debt limit. It will be with us acutely again this June.

Question: "Is borrowing outside the debt limit necessarily improper?"

No, not necessarily. If the Government borrows outside of the regular debt for something which must be paid back from general funds, it is and would be improper. But if the Government is acquiring or operating earning assets, it is perfectly proper that they should be independently financed.

For example, if a toll road is built and the tolls to be collected are sufficient to meet the debt service, both principal and interest, required to amortize the debt that is created to pay for the road, it is a perfectly clear case of a proper independent financing of an earning asset. Now, the toll to be collected can be based on weight or axle charge, on a mileage basis, or on any other suitable measure of use, including the consumption of oil and gasoline.

If the collections made under such a measure of use are dedicated in good faith to meet the debt obligations that are incurred, it is a perfectly proper way to independently finance debt required to pay for roads. Moreover, the entire economy is benefited: First, by the construction of the road and its employment of men and materials; second, by the use of the road and its benefits to transportation; and, third, by the liquidation of the cost of the road through a user tax measured by gas and oil, rather than by placing an additional burden on the back of the general income-tax payer.

Question: "Is the Government improving its debt structure?"

Yes. The enormous debt is too heavy in short-term maturities. These can be inflationary as well as the source of trouble and possibly real danger to our whole economy under certain circumstances with so many short maturities. We are making progress slowly in lengthening the average maturities, and we must move slowly so as not to upset our sensitive economy. The 40-year 3-percent bonds just issued have been a real step forward. The issue was a great success. It has lengthened the average maturity of our whole marketable debt from 4 years and 2 months to 4 years and 9 months. It is the longest Government bond issued since 1911 when some 50-year bonds were issued to help finance the Panama Canal. This issue, like all our financing operations, had to be rightly timed for market conditions which were appropriate to be sure that we did not interfere with other financing requirements and so affect the economic situation in an unfavorable way.

Question: "Will there be more long-term issues?"

Yes. It is our firm goal to continue to lengthen the maturities of the debt as rapidly as appropriate conditions permit. The issue last week was the second long-term issue we have put out. The first was the 3¼-percent 30-year bond in the spring of 1953. We will have more when and as the conditions make it appropriate. We want to have varied types of issues so that all types of investors will have appropriate Government securities in which to put their funds. This will spread the debt as widely as possible among the largest number of investors so as to both finance the debt and promote sound economic growth.

Question: "Have we permanently stopped inflation?"

That depends upon the courageous and tenacious will of the great majority of the American people to do so. The lure of inflation is something that is never permanently killed. It beckons like a siren to enticing, evil ways. Unless continuously watchful resistance is always exerted, the weak may fall for its false promises of ease to riches and be led down the primrose path to their ruin. It means the destruction of savings, which make investment possible, which in turn makes jobs. When we jeopardize the making of ever more and better jobs in America, we are ruining the very foundation of this Republic.

Our record of the past 2 years has been good. The value of the dollar has changed less than one-fifth of 1 cent between January 1953 and today. This compares with a loss of 48 cents in the value of the dollar from 1939 to the time when this administration took office. Inflation will stay checked only if we continue to actively resist the things which bring inflation about. Government must continue to cut down deficit financing and to handle its debt in a proper way.

The Federal Reserve System must continue to use wisely its money and credit responsibilities so that the economy of the Nation can operate with the minimum of regulation. Savings must be protected. Investment must be encouraged by a great and ever-growing group of both large and small investors, and more and better jobs will thus be created to produce more goods for better living for more and more Americans.

Question: "Isn't a little inflation a good thing?"

No, it is not, and such thinking is very dangerous. I know there are millions of Americans who are earning more dollars today than they did 20 years ago. That's good. In many cases there is a real improvement in that they have better homes, automobiles, and so forth. But the fact that this increase in dollar income has been accompanied by less value of the dollar must be considered. In addition, the large numbers of persons on fixed incomes and persons who have put aside savings for retirement and old age have been cruelly hurt by inflation taking away 48 cents of each dollar they saved 15 years ago.

Fortunately, inflation has now been stopped. As economists of the American Federation of Labor put it recently, according to press reports: "Unionized labor fared better in 1954 on the wage front than in any other postwar year. Higher hourly wages and stable living costs had given most workers their greatest postwar gain in purchasing power. This was true even though the average pay rise of 5 to 9 cents per hour was modest in comparison with increases in previous years. Last year the wage earner got the full benefit of a fatter pay envelope. In other years inflation gobbled up much of his gain."

There is nothing academic about this point because America today is a Nation of earners and of haves rather than have-nots. Most Americans today are saving several dollars a week out of their pay and putting it in insurance policies, retirement funds, and so forth. The recurrence of inflation would rob millions of people of their savings.

Question: "What is the prospect for more jobs in this country?"

The prospect for jobs is very closely related to what I have just been talking about. Probably the most important thing in promoting a high level of employment and business activity is confidence—people's confidence in our Government, confidence in each other, and confidence in the future.

If the great bulk of the American people are reasonably confident of the future they will expand their activities, invoke new initiative and try new ways of doing things. As they continue to find their confidence justified, they will not only save money but will invest their savings. This will provide the funds to produce the tools and power for the new plants, new equipment and new and better ways of making more things. This will lead to greater production, greater earnings of more people to pay for more consumption of more things and so in turn make more and better jobs as the years go by. A man can earn more only if he can produce more. As we produce more we will all have more. If we maintain confidence in the stability of our system, there will be more and cheaper goods produced through more and better jobs and with more and better earnings for both the workers and the investors.

Question: "What is the economic outlook today?"

The economic downturn of last year is behind us. In general, the economy is now moving upward on a broad front. There are some lines and areas which are still depressed. Unsolved problems still remain on which we are diligently working. Unemployment in January was 3,300,000, an increase of 500,000 over the previous month and an increase of 200,000 over January a year ago. But as concrete evidence of the economy's upward movement, employment in January was 60,200,000, or 400,000 higher than in January a year ago. The economy never moves in a smooth straight line, up or down, but as long as our broad movement is upward we are moving in the right direction. If Government, business, labor, farmers, and all our citizens remain both confident and reasonable in their demands upon the whole economy, we should be able to maintain this upward trend, and supply the rightful demands of an ever-growing population.

REVENUE ACT OF 1955—FILING OF MINORITY VIEWS

Mr. KERR. Mr. President, I ask unanimous consent, on behalf of certain members of the Committee on Finance, that they be authorized to prepare and file miniority views on House bill 4259, the Revenue Act of 1955.

The PRESIDING OFFICER. (Mr. McNAMARA in the chair). Is there objection?

Mr. KNOWLAND. Mr. President, reserving the right to object, I should like to clarify 1 or 2 points.

First of all, there has been printed, and is now available to Members of the Senate, the report of the Committee on Finance on House bill 4259. I have asked the Secretary of the Senate to see that each Member on this side of the aisle receives a copy this afternoon, so that it may be studied over the weekend. I assume it will be available also to Members on the other side of the aisle.

I have made some inquiries, and I understand that the printed hearings before the Finance Committee will be available on Friday. It seems to me that the Senator should give some indication to the Senate as to when the minority views will be filed. This is a subject of great importance. I had hoped that the bill might be taken up this week, and at least the debate started, but I understand from the leadership on the other side that they do not care to have the bill taken up this week.

In connection with a tax bill which may affect some $2 billion-plus in revenue, it seems to me that we should have some assurances from the Senator that the minority views will be filed at least by Friday, so that they will be available to the Senate by Monday of next week.

Mr. KERR. Mr. President, there are six members of the committee who, I believe, will participate in the minority views. Certainly there is no disposition on the part of the Senator from Oklahoma to delay consideration of the bill by a day, an hour, or a minute. Neither can I determine with any degree of accuracy when we shall be able to send the minority views to the printer.

Therefore, in view of the fact that when the chairman of the committee asked permission to file the report of the committee on the bill during the recess, he did not ask permission that the minority views also might be filed, we had no choice other than to come to the Senate and ask unanimous consent that we be permitted to file the minority views.

Mr. KNOWLAND. Mr. President, will the Senator yield at that point?

Mr. KERR. I yield.

Mr. KNOWLAND. I wish the RECORD to be perfectly clear. I think the Senator is entitled to file the minority views. Certainly the minority Members, or those having minority views, should have the right to file them. Merely because of a parliamentary situation which requires the obtaining of unanimous consent, I would not object to the Senator's filing the minority views, because I think the views of the minority should be before the Senate at the time the bill is taken up for consideration.

My only point is that it seems to me the Senator should give some indication as to the time within which he expects to file the minority views—let us say, until midnight on Friday next—in order that there may be ample opportunity to file them and make them available to the Senate next week. I am not trying to foreclose the filing of the minority views, or making them available to the Senate.

Mr. KERR. I cannot make the views available until they are prepared. I cannot speak for other Members who, I am advised, wish to participate in this report. I will say to the Senator that I shall undertake to see that the minority views are filed within a week.

Mr. KNOWLAND. Mr. President, I should have to object to that. If the Senator wishes to make a request that the minority members have until midnight on Friday to file the minority views, I shall have no objection to such a request.

Mr. CLEMENTS. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. CLEMENTS. As I understand the request of the Senator from Oklahoma, it covers only such time as is needed by the six Members to file their views.

Mr. KERR. That is absolutely correct.

Mr. CLEMENTS. And only the time that is needed.

Mr. KERR. The Senator is correct.

Mr. CLEMENTS. Will the Senator yield for an observation?

Mr. KERR. I yield.

Mr. CLEMENTS. The observation of the acting majority leader is that the minority should have an opportunity to file their views. As I understand, they do not have access to all of the committee staff which would be available to those who filed the majority report, if they desired to use it. Is that correct?

Mr. KERR. We would have access to the committee staff after they had served the purposes of the majority. Knowing that, we made arrangements to obtain outside help, in order that we might expedite the preparation of our report.

Mr. CLEMENTS. Mr. President, will the Senator further yield?

Mr. KERR. I yield.

Mr. CLEMENTS. I hope that neither the leadership on the other side of the aisle nor the chairman of the committee will insist that a deadline be set for the filing of the minority views. I think we can place confidence in the Senator from Oklahoma, who is one of the ranking Members on the Democratic side, and who supports the minority position. I think we may have confidence that he will not delay the filing of the minority views one day, one hour, or 1 minute beyond the time necessary to place those views before the Senate.

Mr. KERR. The Senator is entirely correct. The distinguished Senator from California knows that the majority leader is one of the Senators with whom I expect to confer. The Senator from California knows he is not in Washington. He knows that the Senator from Oklahoma at this time cannot state the exact hour or day or minute when he can complete that contact and discussion and bring the minority views to the Senate.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. BYRD. The acting majority leader has made reference to the staff of the committee. The report of the committee will require very little work, because it will merely transmit to the Senate the continuation of the excise taxes and the 5 percent additional corporation tax, which expire on March 31. Therefore, as chairman of the committee, I will say to the Senator from Oklahoma that I believe he can get the staff today, if he chooses to do so, in order to prepare his minority views. I wish to make it clear also that had the chairman of the Committee on Finance known that the Senator from Oklahoma desired to file minority views, he would have included that request.

Mr. KERR. I should like to ask the Senator from Virginia a question. Was not that request made at the meeting yesterday; namely, that certain members of the committee be permitted to file minority views?

Mr. BYRD. I do not recall it.

Mr. KERR. I may say to the distinguished chairman of the committee that I was present until toward the end of the meeting. When I left the meeting, the motion was pending. I discussed the matter with one of my colleagues, and asked him to be good enough to make arrangements for the filing of minority views. He said he would do so. He told me that he had done so.

Mr. BYRD. I know the subject was discussed, but I do not recall that any motion was made.

Mr. KERR. I will say to the distinguished chairman that no motion is necessary. Any Member may merely ask for the privilege, and that privilege is automatically granted.

Mr. BYRD. I inquire of the Chair whether the report of the committee has been filed.

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). The report has been filed with the Secretary of the Senate.

Mr. BYRD. The committee had unanimous consent that the report may be filed during the adjournment of the Senate.

The PRESIDING OFFICER. The report was filed yesterday afternoon.

Mr. BYRD. As chairman of the committee I have no objection to the filing of minority views. I wish to say to the Senator from Oklahoma, however, in the interest of speed, that he can use the staff of the committee, which is a very excellent staff.

Mr. KERR. I appreciate the Senator's courtesy, but I will say to him that it will be our purpose to use the staff just as soon as we have gathered the material for a draft of the minority views. However, the Senator from Virginia knows that six Senators are interested in this matter. He is as familiar with the situation generally as is the Senator from Oklahoma, and he knows that the Senator from Oklahoma cannot state the hour or the minute when he can finish his discussion with his colleagues.

Mr. BYRD. It is not necessary to name the hour or the minute. It seems to me that there ought to be some limitation, because the tax bill is in a very peculiar situation. The excise taxes expire March 31, and, if they should expire, it would mean a loss to the Treasury of $1 billion. The 5 percent tax on corporations will also expire on March 31, and unless they are continued, the Treasury will be faced with a loss of $2 billion.

There will be quite a controversy with respect to the amendment to the bill which was adopted by the House and which provides for a $20 reduction in income tax for every taxpayer and for every one of his dependents.

Time is a very important factor in the situation. If the bill should go to conference, it may well remain in conference quite a while.

Therefore, I believe there ought to be a reasonable assurance from the Senator from Oklahoma with respect to the date on which he will file the minority views. He has the services of the entire staff of the Committee on Finance in preparing his minority views.

Mr. KERR. Mr. President, I am asking only for the time that is required. I told the distinguished Senator from California that it could be done within a week. I did not ask that we should be permitted to wait a week to file it, but only such time as is required, not to exceed 1 week.

Mr. KNOWLAND. Mr. President, I would have to object to such a request. I believe revenue is of the utmost importance to the Nation and to the Treasury. Certain taxes will expire at the end of March. We are now approaching the middle of March. Obviously, the bill will be highly controversial. Undoubtedly, there will be considerable discussion on one or more amendments to the bill.

I have no desire to prevent the distinguished Senator from Oklahoma from filing minority views. The report of the committee was filed yesterday under unanimous consent that the committee

could file its report during the adjournment of the Senate. I would not object to a request that the Senator from Oklahoma be permitted to file the minority views up to midnight of Friday or up to noon of Monday. However, I feel, in the interest of orderly procedure of the Senate, the Senate is entitled to some assurance.

Mr. KERR. Mr. President, I renew my request.

Mr. KNOWLAND. I object to the request in that form.

Mr. KERR. Mr. President, I renew my request for unanimous consent to file, as soon as we are able to prepare them, minority views of certain members of the Committee on Finance on H. R. 4259, the Revenue Act of 1955.

Mr. KNOWLAND. I object to the request.

The PRESIDING OFFICER. Objection is heard.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the minority views of the Committee on Finance may be filed up to noon of Monday next.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

Mr. CLEMENTS. Mr. President, I should like very much to have the Senator from Oklahoma express the views of the minority of the committee with reference to the unanimous-consent request of the Senator from California. I should not like to object to it. If the Senator from Oklahoma feels that the request gives him ample time in which to file the minority views, I would not wish to object to it. However, I should like to have him express himself on the request.

Mr. KERR. The Senator from Oklahoma does not know if that will give him ample time. I must say that I have examined and made some research of the records of the Senate with respect to requests for unanimous consent to file minority views. So far as I have been able to learn, never in the history of the Senate has such a request been objected to.

I am sure the distinguished minority leader feels very heavy upon his shoulders the burden of his leadership. It may be that he feels that he and those who agree with him will need from Monday noon—which according to my calendar will be March 7—3 weeks and 3 days in which to secure action by the Senate of the United States on this proposed legislation. I acknowledge that it could not be passed in that time if passage depended alone on the merits of the bill.

However, there is not the slightest disposition on the part of the Senator from Oklahoma, or anyone associated with him in the request, to delay either the filing of the minority views or the consideration of the bill beyond the time necessary for us to be in position to submit our views to this body in accordance with the orderly processes of the Senate, which are and have been, so far as I know, from the day the Senate was organized, in line with the request I have made.

If the minority leader cares to assume unto himself the prerogative to sit in judgment upon the intended purpose of the Senator from Oklahoma and five other honorable Members of the Senate, to the extent that he is unwilling, if unanimous consent is granted for the filing of the minority views, to accept the assurance that they will be filed as soon as they reasonably can be, then I would want him to stand on his record of objecting. I would then object to his request for unanimous consent for limited debate, which might be more than needed but which also might be less than needed, in which six Members of the Senate would have the opportunity, in accordance with custom as old as the Senate, and without any exception on the record, to file their views as a minority of the committee.

The PRESIDING OFFICER. Is there objection to the request?

Mr. BYRD. Mr. President, the Senator from Oklahoma, as I understand, has agreed to file the minority views by noon on Wednesday. The Senator from California wishes them to be filed by next Monday. I make the unanimous-consent request that they be filed by noon next Tuesday.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

Mr. KERR. Mr. President, reserving the right to object, I am of the opinion that the report can be filed at or prior to that time. I feel that the chairman of the committee has made his request in a spirit of fairness and in recognition of the fact that there is no intent on my part nor on the part of any of the other members who constitute a minority of the committee in any way to delay the filing of the minority views. While I should like the Senate to have the advantage of the unanimous-consent request as it was originally made, in view of the action of the minority leader in objecting to the request made by me, and the spirit of fairness and of good will evidenced by the chairman of the committee, I make no objection.

Mr. CLEMENTS. Mr. President, will the Senator from Oklahoma yield?

Mr. KERR. I yield.

Mr. CLEMENTS. If the Senator from Oklahoma is making no objection, I suppose it is a little late for me to make the suggestion which I was going to make, but I make it, anyway.

It is my understanding that the distinguished Senator from Virginia, the chairman of the committee, would not object to the Senator from Oklahoma having until next Wednesday to submit the minority views, and so stated.

Mr. KERR. The Senator from Kentucky is eminently correct, and I had that in mind as a part of the background from my knowledge of the fairness and good will of the Senator from Virginia.

Mr. CLEMENTS. Is it not a fact that at the time the Senator from Oklahoma had his discussion with the chairman of the committee he assured the chairman that he was not going to take any more time than was absolutely necessary to prepare the minority views and get them before the Senate?

Mr. KERR. That is correct.

Mr. BYRD. Mr. President, I do not think we should quibble about 24 hours. The Chairman of the Finance Committee wishes to get the proposed legislation before the Senate and has absolute confidence in the Senator from Oklahoma.

It seems to me that if one side wants the minority views filed on Wednesday and the other side wants them filed on Monday, it would be well to suggest the time as noon on Tuesday.

Mr. KERR. Mr. President, in view of my knowledge of the attitude of fairness and good will of the distinguished chairman of the committee, I will make no objection to his request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

The Chair hears none, and it is so ordered.

PROPOSED CLOSING OF VETERANS' ADMINISTRATION HOSPITALS

Mr. MANSFIELD. Mr. President, the Hoover Commission released earlier this week its recommendations relative to Federal health services. I have taken particular interest in their recommendations regarding medical care of veterans. The Commission proposes the closing of 19 Veterans' Administration hospitals because of "uneconomic and inefficient operation." I have my reservations about the curtailment of free hospital care to veterans, but my immediate concern is the Commission's recommendations to the Veterans' Administration to close all "surplus" hospitals immediately. One of these 19 veteran's hospitals is located in Miles City, Mont.

This is the second attempt by the Hoover Commission to close this Veterans' Administration hospital at Miles City. At this time, I wish to register strong protest against this proposed action.

There are 2 veterans' hospitals in the State of Montana, 1 at Helena and the 1 at Miles City, at opposite ends of the State. These 2 hospitals serve 148,000 square miles in Montana alone, not considering the large areas served in adjoining States. Under present conditions great distances are involved in reaching these hospitals. If the hospital at Miles City is closed it will place much greater burdens on those who are in need of the services offered at veterans' hospitals. Many will have to travel hundreds of additional miles to receive adequate medical attention.

The hospital at Miles City serves veterans in Montana and in addition, those from large sections of North and South Dakota and Wyoming. There is one veterans' hospital in Sheridan, Wyo., but this hospital is limited to mental patients. This is the closest one to the Miles City Hospital.

The Hoover Commission has made great strides in many areas but these latest recommendations are a great disappointment. If there is one category of citizens which we should not treat solely on a dollar-and-cents basis, it is the veteran, those who have given of their time, health, and lives in the service of the United States. In addition, the report fails to make note of the fact that the existing number of VA hospital

beds is short of the total authorized by Congress.

In view of the seriousness of these recommendations I again wish to make known my opposition to the proposed closing of the Veterans' Administration hospital at Miles City, an important link in the network of services provided for our veterans.

SHIPMENT OF FOODSTUFFS TO RUSSIA AND OTHER COMMUNIST-DOMINATED COUNTRIES

Mr. WILLIAMS. Mr. President, recently numerous reports have appeared in the press to the effect that serious consideration is being given by the administration to a proposal that we give to Russia and other Communist-dominated countries wheat, butter, and other surplus agriculture products.

According to the press this proposal has been considered seriously enough to have the question submitted to the Attorney General for an opinion as to whether or not the necessary authority exists under the present law. It is reported that the Attorney General has ruled that it would require new legislation authorizing the sale of our surplus agricultural commodities to Soviet Russia, but that no additional legislation would be required to give it to them.

I am very much concerned that such a proposal would even be seriously considered, especially when we realize that Russia is today not only recognized as a major threat to our national security, but also recognized as having encouraged the illegal retention of American citizens as prisoners in Red China.

The fact that the economic system of Russia is today breaking down to such an extent that under the Communist program they are unable to supply the citizens of their country with the necessities of life, is the only hope we have that through inner strife the present regime in Russia can be overthrown.

The Communist clique which has been governing Soviet Russia is well aware of the restlessness of her people. There is not enough food. There is not enough clothing. There is no security for anyone.

To ship American food into Russia today to alleviate the unsettlement as the result of short food rations would not only relieve the present Soviet regime of their embarrassment but also release more Russian workers for military service or for service in the production of military goods. The Soviet people would never even know that the extra rations came from America.

Certainly from a humanitarian standpoint we would like to help the distressed of any nation; however, as long as the would-be recipient nation insists upon violating all rules of international law and ignoring the rights of the free citizens of other countries such aid cannot be justified.

The Russian people should be given to understand in clear language that as long as their country maintains her present warlike attitude and as long as a single American citizen is illegally imprisoned in Soviet dominated territories no economic aid can be expected.

I ask unanimous consent to have incorporated in the RECORD an article on this subject which appeared in the Christian Science Monitor of February 24, 1955.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHEAT TO SOVIET?—PROS AND CONS CLASH

(By Neal Stanford)

WASHINGTON.—Should the American wheat surplus be used to help meet Moscow's wheat deficit?

That question has more angles than a tetrahexahedron.

The issue arose with the shift in Soviet Premiers last month and the Kremlin's admission of a breakdown in its farm program.

This question has just about everything. It involves humanitarianism, psychological warfare, congressional legislation, the national stockpile, interdepartmental differences, international trade. It is studded with personalities: President Eisenhower, Nikita S. Khrushchev, Nelson Rockefeller, the Shah of Iran, Ezra Taft Benson, poor Georgi M. Malenkov, Konrad Adenauer. It involved the USIA, the CCC, FOA, the National Grange, Public Law 480, definition of what is and what isn't a friendly nation.

RUSSIAN SALAD

What you get when you mix up all these issues, factors, personalities—if you will pardon the expression—is a salade Russe. For every question answered two new unanswered ones pop up. For every argument pro, a con shows up on the other side of the ledger. In fact some of the issues involved provide both pro and con arguments. And so, without further ado and introduction, let us plunge into the confusions that this very simple question causes.

A gift of American wheat to the Soviet people obviously would relieve a certain amount of human suffering. Or would it? Moscow admits it is low on wheat and other grains. But why then is it selling 10,000 tons of wheat to Iran? Why is Warsaw, its satellite, trading agricultural products with West Germany?

Is there any assurance that the U. S. S. R. wouldn't step up its wheat sales abroad to keep pace with the free wheat it received from the United States? Or what would prevent it from even selling American wheat gifts abroad, if it so desired? United States wheat, after all, might not help the poor Soviet peasant. It might rather be used by Moscow to improve the Soviet trade position.

Or take the mechanics of the question. Should this wheat be "given" to the Soviet Union, or "sold or traded"? Why should not the United States turn a fast ruble out of the deal? Wouldn't it be smart to try to get some Soviet manganese, or cobalt, or even sables in return for these shiploads of wheat? Uncle Sam doesn't need to be Uncle Shylock, but neither does he need to play Santa Claus to the Soviet Union. You can build up a good case for selling or trading, rather than giving, surplus wheat to Moscow.

But at this point you run into Public Law 480. This law allows that the Commodity Credit Corporation can sell some $700 million worth of farm surpluses to nations "other than the U. S. S. R." It lets the Foreign Operations Administration give away $300 million worth of farm surpluses to "friendly people without regard to their governments." Thus, unless the law is amended, the United States cannot sell wheat to the Soviet Union. It has to give it to Moscow. It can be charitable, but it cannot be businesslike.

WEB OF CONFUSION

This Soviet wheat shortage has both the Soviet and United States Government tangled in a web of confusion and contradiction. Mr. Malenkov gets the down elevator in the U. S. S. R. because of the failure of the government's farm policy—which was really the fault of his successor to authority, Mr. Khrushchev, but who was able to pin it on poor Georgi.

Here in Washington, President Eisenhower looks at the subject with suspicion. New psychological warfare boss, Mr. Rockefeller finds himself playing Laocoon trapped in the coils of this great debate. Commerce is pitted against Agriculture; State Department finds itself at odds with FOA. The United States Information Agency through the Voice of America, sheds crocodile tears over the critical shortage of foodstuffs in Russia. Mr. Benson pleads for the part of the good Samaritan. Attorney General Herbert Brownell, Jr., says it's for free or Congress will have to pass a law.

With all this wrestling, debate, arguments, and dispute the chances are against any sale, barter, or free gift of United States wheat to the Soviet Union. It is a political axiom: When in doubt, do nothing. And there's no doubt the administration is in doubt on this question.

NOMINATION OF GEN. JULIUS C. HOLMES TO BE AMBASSADOR TO IRAN

Mr. WILLIAMS. Mr. President, yesterday the Senate Foreign Relations Committee approved the nomination of Brig. Gen. Julius C. Holmes as the Ambassador to Iran.

I wish to go on record in opposition to the confirmation of General Holmes for this important position, and at the same time officially to file a request with the majority and the minority leaders that advance notice be given to the Senate prior to taking up the nomination for consideration. At that time I will state my reasons for objecting to the confirmation of the nomination.

SHORTER PRESIDENTIAL CAMPAIGNS COULD INCREASE DOMINANCE OF MONEY IN ELECTIONS

Mr. NEUBERGER. Mr. President, I call the attention of the Senate to a matter which has received very little attention publicly, but which I think is of considerable concern.

I must confess to some alarm over the fact that both major political parties have substantially shortened the 1956 Presidential campaign through planning their national conventions for later dates than usual.

The Democratic convention is scheduled for Chicago either July 23 or August 13, depending upon State election laws. The Republican convention is scheduled for August 20.

It is evident that these dates narrow the time of campaigning. It also will tend to reduce the length of the campaigns in the various States, because the identity and character of the Presidential nominees invariably influence all campaigning in a Presidential year.

At first blush, Mr. President, this might seem a desirable objective. Yet I confess to the fear that it will make big money more dominant than ever in our political life. A short campaign will not reduce the sums available for politics;

it merely will mean that these sums can be concentrated more decisively and effectively.

Television is astronomically expensive. A national hookup may cost $75,000. In the city of New York, at the last mayoralty election, a leading candidate withdrew because he confessed that soaring TV costs made a $1,000,000 exchequer necessary to be elected chief executive of that one city.

The presidential nominee with the smaller purse will need more time in which to make felt his personality and his program. Some of the most decisive campaigning in America is carried on by word of mouth—at community suppers, at church socials, at trade-union meetings, at farm potlucks, around the hot stove, or over the corral fence. This is why the candidate with the slim wallet occasionally can defeat the man with the big campaign treasure chest. But such word-of-mouth campaigning, Mr. President, takes time—a lot of time. It can't be flashed onto millions of TV screens virtually overnight, at vast expense.

I am disturbed over the total impact of television upon our national life Through TV, it is possible to introduce theatrical techniques into politics. When we give additional dominance to such a medium, through shortening the period of time for candidates to reach the people, I am alarmed. I wonder if a "blitzkrieg" on TV will not shape the public mind, before a less favorably financed nominee can get his message to the people by slower and less costly means.

The campaign train, making the whistle stops, is traditional in our life. But a short campaign may not allow time for a candidate to go by train, at only nominal expense, to hundreds of comparatively small communities. He will have to be on TV nightly, spreading his image across the Nation into every parlor and living room. And what if one candidate lacks the funds to buy all this TV time?

Some day, Mr. President, shorter political campaigns may well be possible and desirable, but I believe they will be premature until we have solved the urgent problem of making television—and perhaps other media—equally available to candidates irrespective of their financial backing.

ADJOURNMENT TO FRIDAY

Mr. CLEMENTS. Mr. President, prior to moving that the Senate adjourn until Friday next, I should like to announce for the RECORD that no legislative business is expected to be taken up on Friday.

Under the order previously entered, I move that as a mark of respect to the memory of the late Senator MAYBANK, of South Carolina, the Senate stand in adjournment until Friday next at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 2 minutes p. m.) as a mark of respect to the memory of the late Senator MAYBANK, the Senate adjourned until Friday, March 4, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 2, 1955:

NORTH ATLANTIC TREATY ORGANIZATION

George W. Perkins, of New York, to be the United States permanent representative on the Council of the North Atlantic Treaty Organization, with the rank and status of Ambassador Extraordinary and Plenipotentiary, vice John C. Hughes, resigned.

UNITED STATES MARSHAL

Thomas H. Trent, of Florida, to be United States marshal for the southern district of Florida, vice Leo H. Brooker, resigned.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MARCH 2, 1955

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, we are again turning unto Thee with confidence and hope, for Thy thoughts and purposes concerning us are always those of kindness, of love, and of peace.

Grant that during this Lenten season we may take some time to yield ourselves to the discipline of silence and self-examination and listen more attentively and eagerly to what Thou art saying unto us about our character and conduct, our tasks and responsibilities.

Help us to cultivate those capacities and powers of insight and understanding which will enable us to see our problems and difficulties in their right perspective.

Enlarge and enrich our minds and hearts with faith and trust and may we surrender our wills and desires in glad obedience to the infallible guidance of Thy divine spirit.

Hear us in Christ's name. Amen.

The Journal of the proceedings of yesterday was read and approved.

NEBRASKA'S BIRTHDAY

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. MILLER of Nebraska. Mr. Speaker, yesterday was Nebraska's birthday. Eighty-eight years ago, on March 1, 1867, President Andrew Johnson signed a proclamation making the State of Nebraska one of the United States, the 37th State in the Union. It is interesting to note that the Nebraska statehood bill is one of the few statehood bills vetoed by a President.

On March 21, 1864, the Congress passed a law defining the boundaries of the Nebraska Territory and setting up the machinery for creating the State of Nebraska, which was subsequently approved by the President on April 19, 1864. The people of the proposed State called a constitutional convention, adopted a constitution and a formal government and transmitted these items to the Congress.

The Statehood Act was passed by the Senate and the House of Representatives, but was vetoed by the President because he felt that a provision in the act might be construed as infringing upon the right of the new State to regulate the voting and other fundamental rights of its citizens. The Congress then reconsidered the act, and overrode his veto and Nebraska was admitted on the condition that the embryonic State assure the Congress and the President that there should be no denial of the elective franchise and all other fundamental rights of persons within the State by reason of race or color. The Territorial legislature was called into session and on the 20th of February 1867, enacted its assurance accordingly. President Andrew Johnson then, on the 1st of March 1867, issued his proclamation declaring Nebraska a State. Thus, in the strife-torn years immediately following the Civil War, we find the formal beginning of the State of Nebraska.

There are many factors that have contributed to the greatness of our State, but the two most important are its land and its people. From 1867 until 1950 our population has grown from 50,000 to 1,325,510; and our land has been developed from the native unbroken prairies, even then rich with life-giving grasses, to the highly cultivated irrigated farm grounds that lie in the valleys of the many Nebraska rivers.

The exploration and settlement of Nebraska is one of the striking chapters in the history of American expansion, one without parallel. It is a story written in adventure, in toil, in tragedy, and reward. Acheological expeditions have uncovered considerable evidence of the presence of prehistoric man in the State, indicating that man existed in this area from ten to twenty thousand years ago. The deep soil deposits have preserved some of the finest prehistoric animal and reptile specimens yet found on the North American Continent.

At the time of the coming of the first white men, the Nebraska territory was inhabited by the Indian tribes, who moved across the Great Plains as the food supply shifted from place to place. The first white men to visit this region were 30 Spaniards under the leadership of Francisco Vasquez Coronado, who came into the territory on a foray from the Rio Grande in 1541. French fur traders began to venture up the Missouri River about 1700, and in 1739 the Mallet brothers, with a party of eight Frenchmen, named the Platte River and traveled nearly the entire length of the State on a journey from the Missouri River to Santa Fe.

During these years, ownership of this little-explored and richly abundant territory was a source of struggle between France, England, and Spain. The reports of the early French explorers, glowing with praises of this wonderful new empire, awakened the imagination of the French as to the possibilities of this "most marvelous region upon the face of the earth." France moved upon the Nebraska region from two directions—from the North, following the founding of Quebec in 1609, and from the

South with the founding of Biloxi on the Gulf of Mexico in 1700. By the year 1720, Spain and France had become rivals for possession of this vast region west of the Mississippi River; the Spanish had settlements in the Rio Grande Valley and in Texas; the French in the Mississippi Valley. At the close of the Seven Years' War, France ceded all her claims east of the Mississippi River to England, and all claims west to Spain. Nebraska was thus a part of the Spanish province of Louisiana from 1763 until 1801, when Napoleon bought it back from Spain. Even before the new provisional governor could arrive to take up control of his domain, war broke out between France and England. In financial desperation, Napoleon changed his plan and sold the entire province to the new American Republic for $15,500,000; and at an imposing ceremony in the Great Square on the river front in New Orleans on November 30, 1803, the Nebraska region became American territory with Thomas Jefferson as her President.

Almost before the ink was dry on the purchase agreement, an American expedition started to explore the area of the Louisiana Purchase. Lewis and Clark were the commanders of this initial exploratory adventure, and in the 2 years of their expedition, 1804–06, skirted the Nebraska territorial boundaries. Five years later, the Hunt party of Astorians touched Nebraska on their way to Oregon, and in 1813 seven of the party crossed the mountains and followed the North Platte to its junction with the South Platte, and thence along the Platte to the Missouri River. Manuel Lisa, who built a permanent fort in 1812 about 10 miles north of the present Omaha post office, was probably the first white settler and the first to engage in farming in Nebraska. In September 1819 Major Long established Fort Atkinson upon the site of the present village of Fort Calhoun in Washington County, and the 1,000 people who came to live there built the first school library, brickyard, sawmill, and grist mill in the State.

The missionary period followed the establishment of a permanent fort in Nebraska. While the missionary work among the Indians of the State did not generally convert the tribes to Christianity, still the story of missionary work among the Indians filled the space of 40 years in the history of Nebraska with a heroic record and with more valuable information upon the elements of life in this territory at this time than is derived from any other single source.

With the settlement and beginning of development of Nebraska, the pioneers again looked to the westward toward the lands that lay beyond the Continental Divide. Nebraska was the avenue for the crossing. The rich grasslands provided the food to sustain the animals, and the abundant water supply and wild game provided the means of survival for these hardy adventurers. To Nebraska belongs the honor of first pointing out to the American Nation a natural, practicable roadway across the mountains, binding the western shores of this great country to the rest of the Nation.

Several trails were developed. Of all the old overland trails crossing Nebraska, each with its story written deep into the lives of the men and women in the record of the westward march of the American people, the Oregon Trail was the first and the most famous. The Trail began its career in 1832, and by 1840 had become a well-traveled road, a great traveling city flowing 2,000 miles from the Mississippi River to the Pacific Ocean.

The migration of the Mormons from Florence, now a suburb of Omaha, in the spring of 1847, brought into existence the great Mormon Trail, which traversed Nebraska and merged at Fort Laramie with the established Oregon Trail.

An increased interest in quicker, more adequate transportation naturally followed after the establishment of these wagon routes to the West. The Nation was divided by the extreme pressure of commercial interests of the North and the South, each pushing to construct the first Pacific railroad. Farsighted leaders of both areas grasped the strategic position of the Nebraska Territory as the natural route for the railroad to the west coast, and voices in many quarters became loud in a demand for the organization and recognition of the Nebraska Territory. In his annual report, dated November 30, 1844, Secretary of War William Wilkins recommended the formation of a territorial government, but it was not until May 30, 1854, after several bills had been introduced and nearly all the controversial issues of the day were debated, that President Franklin Pierce signed the Kansas-Nebraska bill into law.

In only a few years the movement for statehood was started, and on April 19, 1864, the Nebraska enabling act was passed and approved. Nebraska's statehood, as had been her Territorial establishment, was to be delayed and greatly influenced by the stark national issues facing the Congress and the people during those times. Local factions were divided over the slave-free question, and controversy developed over the problems of governmental expense which would be created if Nebraska was to become an independent State, so it was not until 1866 that a constitution and a form of State government were framed. The statehood bill finally passed after long and bitter debate, over Presidential veto, when the Nebraska Legislature adopted laws repudiating slavery in the new State.

Settlement and growth of this new Territory had been slow during the Civil War period and years before, although the foundation for growth had been laid by the Congress when it enacted the free-homestead law in 1862. On the date this law became effective, January 1, 1863, Daniel Freeman took out the first homestead in the United States, on Cub Creek, in Gage County, Nebraska. Since that time, over 1 million homesteaders over the United States have received more than 120 million acres of land from our Government, and more than 100,000 homesteaded and lived in Nebraska. These settlers came from New England and New York, Michigan and Illinois, and from the war-torn States of the South. More and more settlers came from many countries across the seas. The Irish settled in Holt County in 1874 and Greeley County in 1877. Germans settled Madison, Stanton, and Thayer Counties between 1867–70. Swedes settled in Polk and Saunders Counties about 1870 and Phelps and Burt Counties about 1880. Bohemians founded communities in Knox, Colfax, Saunders, and Saline Counties about 1870. A group of Hollanders settled in the southern part of Lancaster County about 1875 and extended their settlements into Clay and Hamilton Counties. Danish, Swedish, Bohemian, and Polish communities were founded in Howard and Valley Counties. French settlements were made in Richardson, Nemaha, Antelope, and other counties. The seeds of greatness of Nebraska's people were brought in from a score of different States and from a dozen different foreign countries; but, once these seeds took root in Nebraska soil, the product which grew from them became Nebraska's most valuable asset—courageous, hard-working and sincere American citizens.

The several homestead laws, the free homestead law of 1863, the Timber Culture Act, and the Kinkaid law, have been instrumental in opening the lands of Nebraska to the agricultural development and cultivation now so prevalent in our great State, and the railroad brought great progress by transporting settlers into the State and farm commodities from Nebraska to the other States of the Union.

Over the many years, one of the significant achievements in the State's history has been the development of irrigation in the North Platte Valley. Local individual initiative and the Federal Reclamation Act of 1902 helped these farmers turn much of the dry land into a true Garden of Eden, the Quivera for which Coronado searched when he and his small band of explorers first entered this territory. Scottsbluff, one of the most important and fast-growing cities in Nebraska, owes much of its expansion to the development of irrigation from the North Platte River and its feeder streams. The sandhills area grazes most of the State's 5 million beef cattle, and we look with pride on the industry that provides much of the world's beef supply and foundation stock for cattle herds in all quarters of the agricultural world.

Nebraskans are justly proud of the progressive, efficient, and economical record of their State government. The State constitution, adopted in 1920, contains a provision prohibiting the State to contract any indebtedness in excess of $100,000. The State has no income tax and no sales tax, and in 1934 the people adopted an initiative proposal to create the unicameral legislature, a novel experiment in the field of lawmaking bodies.

Many Nebraskans have brought credit to the State and the Nation with their contributions to literature, art, and music; and to the military and political science of the world. Writers such as Willa Cather, Bess Streeter Aldrich, Mignon Eberhart, Louise Pound, Hartley Burr Alexander, Keene Abbott, and Mari Sandoz; poets such as the beloved John

G. Neihardt, poet laureate; musical composers such as Thurlow Lieurance and Howard Hanson; great military leaders such as John J. Pershing; artists such as J. Laurie Wallace, Elizabeth Dolan, Kady Faulkner, Robert Gilder, Dwight Kirsch, and Dale Nichols; and political giants of their time such as William Jennings Bryan, J. Sterling Morton, Charles G. Dawes, and George W. Norris, have helped bring fame and recognition to the State, and have left their works as a heritage to the people of our time. Our State Capitol, the creation of Bertram Goodhue, stands as one of the outstanding architectural achievements of the age, a fitting monument to the men and women whose courage and vision built a prairie land.

No tribute to the great State of Nebraska would be complete without pause to pay homage to the 47,801 sons who served, and the 1,000 who died, in World War I; and the 128,000 men and women who served, and the 3,655 who died, in World War II.

One of the most able portrayals of Nebraska is contained in a description of the great seal of Nebraska, adopted by the legislature in 1867:

> The eastern part of the circle to be represented by a steamboat ascending the Missouri River; the mechanic arts to be represented by a smith with hammer and anvil; in the foreground, agriculture to be represented by a settler's cabin, sheaves of wheat, and stalks of growing corn; in the background a train of cars heading toward the Rocky Mountains, and on the extreme west, the Rocky Mountains to be plainly in view; around the top of this circle, to be in capital letters, the motto, "Equality before the law," and the circle to be surrounded by the words, "Great seal of the State of Nebraska."

"Equality before the law," "Honesty before men," "Reverence before God"—these are the precepts that have made Nebraska great during her 88 years as a State; these are the precepts that will keep Nebraska great as long as our free Nation endures.

SPECIAL ORDER GRANTED

Mr. HOFFMAN of Michigan asked and was given permission to address the House for 10 minutes today, following the legislative program of the day and the conclusion of any special orders heretofore entered.

SUBCOMMITTEE NO. 1 OF THE COMMITTEE ON ARMED SERVICES

Mr. PRICE. Mr. Speaker, I ask unanimous consent that Subcommittee No. 1 of the Committee on Armed Services may sit during general debate this afternoon.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AMENDING THE NATIONAL HOUSING ACT

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 160) providing for the consideration of House Joint Resolution 202, to amend the National Housing Act, as amended, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of House Joint Resolution 202, to amend the National Housing Act, as amended. After general debate, which shall be confined to the joint resolution, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the joint resolution shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. BOLLING. Mr. Speaker, I yield one-half hour to the gentleman from Ohio [Mr. BROWN]. At this time I yield myself such time as I may require.

Mr. Speaker, I urge the adoption of House Resolution 160, which will make in order the consideration of House Joint Resolution 202, to amend the National Housing Act, as amended.

Mr. Speaker, House Resolution 160 provides for an open rule with 1 hour of general debate on the joint resolution itself.

The testimony before the Committee on Rules indicated that the presently authorized FHA insurance authorization will be used up within the next month, and House Joint Resolution 202 proposes to increase the existing insurance authorization by $1.5 billion. Passage of House Joint Resolution 202 would permit the FHA residential mortgage insurance programs to continue until Congress, later on in the session, decides upon the insurance authorization which will be required by FHA during fiscal year 1956.

According to the provisions of the Housing Act of 1954, the general insurance authorization under section 217 of the National Housing Act was amended to provide that the aggregate amount of principal obligations of all FHA mortgages which may be insured and outstanding at any one time, with the exception of home repair loans, cannot exceed the sum of (a) the outstanding principal balances as of July 1, 1954, of all insured mortgages, (b) the principal amount of all outstanding commitments to insure as of July 1, 1954, and (c) $1,500,000,000, except that with the approval of the President such amount may be increased by not to exceed $500 million.

On July 1 of 1954, the outstanding principal balances of mortgages insured by the FHA stood at $16.5 billion, while commitments to insure mortgages were outstanding in the amount of $2.3 billion. Upon passage of the Housing Act of 1954, the FHA mortgage insurance authorization stood at $20.3 billion, and became $20.8 billion—the extra $500 million authorized by the President—on December 28, 1954. If House Joint Resolution 202 becomes law, the authorization will be $22.3 billion.

Under the FHA program the dollar amount of mortgage insuring authority is set up on a revolving basis and as mortgages are paid down or off, or commitments expire a corresponding amount of mortgage-insuring authority again becomes available to the FHA. At the present time amortization payments and insured mortgage terminations are running at about $100 million a month, while the pickup in insuring authorization from expiration of commitments approximates $125 to $150 million a month. Thus during an ordinary year from $2.7 billion to $3 billion of insuring authority becomes available for use again due to this revolving fund. This amount, of course, becomes available within the maximum insuring limitation.

It is estimated that if the $1.5 billion additional authorization is granted that this increase, together with the estimated $393 million available at the end of January 1955, would provide a total authorization of $1,893 million, or about $630 million over estimated net requirements to June 30, 1955. Thus a comfortable margin of safety is provided in case unforeseen activity in insuring takes place.

Mr. Speaker, I hope that the House will adopt House Resolution 160, which will make in order the consideration of House Joint Resolution 202.

Mr. Speaker, I know of no opposition to the rule, and I reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, the gentleman from Missouri [Mr. BOLLING] has explained the purposes of this rule making in order House Joint Resolution 202, to amend the National Housing Act. There has been no controversy over this measure. I understand that the action of both the Committee on Banking and Currency and the Committee on Rules was unanimous.

I have no requests for time, and I yield back the remainder of my time.

Mr. BOLLING. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to; and a motion to reconsider was laid on the table.

TO AMEND THE AGRICULTURAL ADJUSTMENT ACT OF 1938

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 161 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 1573) to repeal section 348 of the Agricultural Adjustment Act of 1938. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute

rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. MADDEN. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio [Mr. BROWN], and I yield myself such time as I may require at this time.

Mr. Speaker, I rise to urge the adoption of House Resolution 161 which will make in order the consideration of the bill (H. R. 1573) to repeal section 348 of the Agricultural Adjustment Act of 1938.

House Resolution 161 provides for an open rule with 1 hour of general debate on the bill itself.

Mr. Speaker, it was brought out during the hearing before the Committee on Rules that the present section of 348 of the Agricultural Adjustment Act of 1938, as amended by section 311 of the Agricultural Adjustment Act of 1954 prohibits the making of agricultural conservation program payments to any farmer who knowingly harvests any basic commodity in excess of his acreage allotment.

The testimony before the Committee on Rules indicated that this provision has not worked well and has placed some undue hardships on some farmers who really were not meant to be affected by this provision.

One example that was given was that ordinarily conservation payments are made to the farmers as soon as they start carrying out the provisions of the conservation program. According to the strict interpretation of this section of the present bill, however, a farmer must wait until he can certify that he has not harvested a crop in excess of his allotment before he can receive his payments and in some areas crops are being harvested at the year's end. Thus it would mean that conservation payments would be carried over until the next year.

According to the report on H. R. 1573, section 348, of the AAA Act, as amended, which H. R. 1573 would repeal, is in direct conflict with the spirit of several provisions of the acreage allotment and marketing quota laws, and with at least 2 other provisions of the 1954 act itself.

The Committee on Agriculture in their report indicated that they feel that the marketing quota penalties and the loss of price supports in the case of acreage allotments have been sufficient deterrents to overproduction of commodities which are granted price supports in return for a measure of production control by farmers.

The Committee on Agriculture indicated that they feel that conservation programs are designed for the long-range benefit of the Nation and that the conservation program should not be tied to the price-support program.

Mr. Speaker, the rule which the Committee on Rules has granted is an open one; amendments will be in order and I hope that the membership of the House will adopt the resolution which will allow for the consideration of H. R. 1573.

Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. WALTER].

Mr. WALTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, yesterday I was deeply shocked to see a press release which purported to issue jointly from the offices of several Senators and Members of this body.

I was, and still am, shocked because the statements made in the release were inaccurate.

I regret that those who permitted the use of their names on this erroneous release did not check the facts before making it public.

It is not true that the Immigration and Naturalization Act in any way tends to, and I quote, "maintain our own iron curtain, against visitors and alien immigrants alike, while criticizing the Iron Curtain abroad."

It is not true that, under present law, there are "daily examples of senseless cruelty against aliens already resident here, or recently arrived here." Such statements are untrue, made either ignorantly or deliberately, but they are untrue and demonstrably so.

During the year 1954, the total admission of aliens to the United States was over 770,000—immigrants, temporary workers, and visitors. This is no iron curtain.

According to the Solicitor General of the United States, Simon Soboloff, a week ago, there were 2, I repeat 2, persons under arrest in the custody of the Immigration and Naturalization Service. They were both stowaways.

The Immigration and Naturalization Act, characterized by its enemies as a "shameful" law, has not had the stifling effect they would imply.

An actual increase of immigration is reported in 1954, the second year the act was in operation. A total of 208,000 immigrant aliens were admitted, an increase of 22 percent over the preceding year. Nonimmigrant admissions reached an all-time high of 566,613 during the past year, according to the statistics of the Immigration and Naturalization Service.

The act attempts to deal in an orderly way with the admission of aliens, placing restrictions in the way of those whose admission would be contrary to the interests of the United States. It provides for the deportation of those who abuse our hospitality, or by subversive or criminal act endanger our country and its citizens. The critics of the act lose sight of the fact that admission to the United States is a privilege and not a right, that national and not international interest must be our first concern in this field.

The intolerable barriers which are said to keep renowned scientists, scholars, and men of letters from coming to our shores as visitors, cannot be found in the language of this statute. Aliens whose entry would be prejudicial to the public interest or would endanger the welfare, safety, or security of the United States are barred, it is true, but if these renowned scientists, scholars, and men of letters fall within this subversive classification, their admission could not seriously be advocated by any persons having the interests of the United States at heart. Did we not hear from Professor Pontecorvo in the Soviet press just the other day how many atomic secrets he has betrayed to our mortal enemy? And was he not a visitor to the United States just a few months before he deserted to the enemy camp? I am rather proud of the fact that all those visits Dr. Pontecorvo paid to the secret United States laboratories were made before the enactment of the "iniquitous" McCarran-Walter Act and that he could not have paid such a visit since its enactment.

The national origins quota system, which is basically the target of the opposition to the act, has been in effect since 1929. It provides a mathematical formula for determining quota allocations, based on the 1920 census figures, with a view to the maintenance of homogeneity in this melting pot of nations. It was not designed to relieve population pressures in all the countries of the world. It is a businesslike formula which insures, at least, the minimum quota to every country or quota area. It is quite unlike the "commission-distribution" proposal advocated in some of the loosely prepared bills which would permit almost the entire quota to be allocated to asylum preference and national interest groups. Suffice it to say, these bills propose that the commissioners who would allocate these quotas would be political appointees.

As I have said before, I much prefer that visas be allocated under a formula devised by mathematicians rather than under one contrived by politicians.

The joint explanatory statement appearing in the RECORD of February 25, 1955, submitted by the sponsors of the alleged revision bill in the Senate refers to the flexibility of its proposed quota system. This proposal certainly has flexibility, if nothing else. In fact, it permits the politically appointed commissioners to exercise flexibility to the extent that, of the 250,000 quota numbers to be made available under the bill, only 250 numbers would be guaranteed to any one nation or quota area, leaving approximately 200,000 quota numbers to be dispensed by the commissioners at will, as political expediency may direct. True, the statement stipulates that not less than 25 percent of the quota shall be available for family preference, not less than 5 percent for occupational preferences, not less than 20 percent for surplus-population groups, and a minimum of 15 percent for refugees, but there is no restriction which would prevent the commissioners from allotting the total number of 200,000 visas to just one nation or quota area.

One item in the statement calls attention to the liberal provision in the new bill that a naturalized United States citizen may return with equanimity to the country of his birth or of his former nationality and may permanently reside there throughout the rest of his lifetime without loss of United States citizenship.

Coupled with the exemption in our income-tax laws benefiting citizens who remain abroad for a period in excess of 18 months, we might question the advisability of permitting permanent retention of United States citizenship for persons so residing. It certainly does not substantiate the charge that the present law is "discriminatory, oppressive, and ruthless."

But the whole issue turns upon the question of the quota. According to the joint release, the intention seems not to abolish quotas but to reallocate them so as to put the whole Western Hemisphere under a quota, and thus to destroy our good relations with our closest neighbors.

It is a truly devilish scheme to turn our Canadian and Latin-American friends away from us and to give aid and comfort to future Moscow agents like Arbenz, of Guatemala.

The timing is good. It is as good as the best Kremlin tradition. Latin America is now—after Asia—the No. 1 target of international communism.

Mr. BROWN of Ohio. Mr. Speaker, as the gentleman from Indiana [Mr. MADDEN] has explained, House Resolution 161 makes in order consideration of the bill H. R. 1573 under an open rule, with 1 hour of general debate.

H. R. 1573 simply corrects an inequity that has been found in the Agricultural Adjustment Act as it was amended last year. The situation creates a controversy in agriculture, and this amendment is a corrective one only.

The measure was, of course, as expected, reported unanimously by the Committee on Agriculture. The rule was also reported unanimously by the House Committee on Rules.

Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, certainly each of us cannot become a millionaire nor establish and maintain a mammoth industrial plant.

Nor can management, without the wholehearted cooperation of employees, create, build, and maintain an efficient, profitable industrial plant.

Nevertheless, the door of opportunity is still open here in America to those of us who are willing to wholeheartedly work toward a desired end. Each of us can, if health permits, at least do something more than worthwhile to establish his own independence and security.

As an outstanding example of what can be done, not only by the individual possessing exceptional ability and a driving ambition but by those of us who have just an average amount of intelligence in an industrial age, is illustrated by the story of Whirlpool, its workers, its president, and management.

From the February 1955 issue of Inside Michigan comes the story demonstrating the truth of the above statement. That story reads as follows:

WHIRLPOOL'S OTHER BALANCE SHEET—A BIG-SCALE EXPERIMENT IN COMMUNITY RELATIONS IS PAYING OFF FOR WHIRLPOOL CORPORATION AT ST. JOE

(By Edward C. Fielder)

Some few months ago Mr. Elisha Gray II, president of the Whirlpool Corp., makers of home laundry appliances, addressed the Rotary Club, of Los Angeles, on a somewhat unique topic. He was holding forth about the changed concept of industrial management in general, including the effect of "big government" and "big labor." He said that for the past 20 years these two had occupied the center of the industrial stage while the businessman had figuratively been pushed into the wings. This was a good, solid, informative speech and the members nodded appreciatively over their cigars. But Mr. Gray went on to say something that gained national attention:

"I beg of you—let us heed the lessons and the meaning of the past two decades. Let us acknowledge that in addition to the ordinary assets which we list on our balance sheet such as cash, accounts receivable, inventory, etc., we truly have other unlisted assets which contribute greatly to our business success. And just as today's corporate balance sheet fails to list these assets, so does it ignore the matching liabilities or responsibilities."

What other assets? Many of his listeners knew that Mr. Gray headed the Whirlpool Corp., with principal offices and plant at St. Joseph, Mich.; many knew that Whirlpool is the largest manufacturer of home washers in the industry, almost as large as its two leading competitors combined; a few know that Elisha Gray II was the bearer of a famous American industrial name, being the grandson of the inventor of the pay-station telephone and a founder of what is now Westinghouse Electric. That's about all the Rotarians knew about Mr. Gray or his company. But it was enough to qualify him to speak with authority.

He went on to set up virtually another set of books in his speech. He listed as assets: (a) "a well-balanced community," physically, socially, and educationally; (b) "our people—our greatest asset;" the 3,500 men and women who work for Whirlpool in St. Joseph and Benton Harbor, and the total of 6,000 or more who work for the company in all its plants, and (c) the community spirit of all the people, employees, and others, toward the company.

Balanced against these assets were liabilities which he called responsibilities. First among these was consideration, if it could not be freely given, then the asset called "people" was worthless. Second was competent management, in which the people could retain confidence. If they didn't have confidence in the company management, and trust it to decide wisely on matters affecting company operations, said Gray, no amount of dollar profit on the books would have any lasting meaning. The company would disintegrate, in time. And the third responsibility was a sense of belonging to the community; integrating the company into it in a spirit of good citizenship and nothing else. That meant gifts, he said, for charitable and community causes, "because there are few rich people nowadays to finance such things." And it meant an everlasting effort to see that the company's people were successful, personally, according to their definition of the term—happy, solvent, prosperous.

"Up to now," he concluded, "in evaluating the performance of a company, we have used only a financial accounting. I suggest that we encourage a public accounting by all businesses on the additional values of a company's citizenship—its success in the handling of the human factors which, in the last analysis, are its very bone and sinew."

In a spirit of curiosity, which might be called openminded skepticism, I conducted a small investigation at the Whirlpool plant, to see what was happening. I was shown through the various departments, often cutting loose from my guide to finger some newly fabricated parts or examine a big multistage press. I wanted to see how Whirlpool washers were built, and the kind of material and workmanship that went into them. I had a chance to talk to a few people. Later I was given cordial access to all the statistics on the business, its history, and figures on earnings, dividends, Federal income and excise taxes, and so on. It's exciting reading.

For example, Whirlpool's phenomenal volume—production and sales. The company is not a major advertiser; it has about 80 regional distributors and 12,000 retail outlets. The company makes and sells upward of 6,000 units a day. It has achieved, through elaborate and costly production tooling (including 20 miles of overhead conveyors) so efficient a utilization of manpower that it is challenging the automotive industry. Whirlpool's Benton Harbor-St. Joe plants are running about 1.75 completed units per man-day.

Whirlpool has a very good record of labor peace in St. Joe, although its contract is with one of the most volatile of all unions, the UE. It pays hourly wages in excess of the industrywide average in the electrical appliance industry and among other St. Joseph industries, and Whirlpool pays not far from $100 a week across the board. To challenge the worker to the utmost, the production engineers give him more and more elaborate machines to operate. Thus the production cost per item remains the same, or drops slightly from year to year.

With fair wages, secure employment with minimum seasonal layoffs, and a delightful community to live in, Whirlpool employees tend to become quite happy with their lot and develop a genuine satisfaction for their jobs. The president, Mr. Gray, is an MIT-trained engineer who learned merchandising after graduation. He was an executive for Sears-Roebuck and learned personnel work with Sears at Chicago. Later he was vice president of the Cutler Shoe Company, manufacturers. As general manager, he built up that business even in the depression period, 1933–1938. He came to the predecessor of the Whirlpool Corp., then known as the Nineteen Hundred Corporation, in 1938 as assistant to the president. Later he became executive vice-president, and in 1949 was elected to the presidency upon the retirement of the co-founder and long-time president, Louis C. Upton.

The trade name "Whirlpool" was adopted by the corporation in 1950 to replace the cumbersome and confusing brand name "1900 Cataract." Gray's skill as a merchandiser has been largely instrumental in building a big sales volume rapidly, and keeping it climbing. He is a keen business analyst, well aware of the limitations on too-rapid growth, but able to exploit the present demand for automatic washers, dryers and ironers to its utmost.

With Gray as president and active head of the business, Whirlpool operation shows facets of genius. He uses truck trailers by the dozens as warehouse space for purchased parts, because of rapid consumption and savings in handling costs. Conveyors running around the high upper spaces of the plant, 30 feet in the air, serve as mobile parts supply reservoirs, with "cushion" supplies ready to flow down into the assembly lines in case of a breakdown somewhere.

The company's capitalization is low, and the sales high. Working capital turns over nine times a year. Until 1954 a reasonably

good rate of earnings before taxes was virtually confiscated by the application of the so-called excess-profits tax to growing companies. With earnings before taxes of nearly $12 million in 1953, net earnings after taxes were only $4,203,036. But with the excess-profits tax no longer applicable, net earnings for 1954 are expected to be nearly double the 1953 figure.

Gray has repeatedly made it plain that in spite of skyrocketing production and sales volume since World War II the company's net income remains proportionately low. There isn't very much left to accumulate capital reserves for new construction, badly needed at the present time. Every dollar in the business has to do the work of 2 or 3. To help stretch available dollars, the company's story is told to machinists, press operators, office clerks, everybody who will listen. They are told in effect "You've got a stake in this company too. We've all got a big job to do. It gets tougher every year. So you should know what management is doing, and what our problems are. Maybe you can help us with suggestions."

Throughout the various Michigan plants of the company there is a noticeable response to this spirit. You can see it in St. Joe, in the washer plant. You can hear it when a worker voluntarily points out to a plant visitor why the one-piece single-weld cabinet is better and stronger than the competitors'; why the three-point rubber suspension is better and longer lasting than any other washer's. You can feel it in the surprising thickness of the sheet-steel fabricated parts and the sturdy iron castings. "Look," says the worker. "Feel that casting. Weigh it in your hand. They don't scrimp on stuff like that. It's the best. Costs more, but with this volume it's possible to put the value into the machine, and take a smaller unit profit."

The Kenmore line, sold by 692 retail Sears-Roebuck stores as well as 550 catalog offices and the general catalog, is made here in this plant and is a part of the spectacular production volume. Whirlpool and its predecessor company have supplied all of Sears' electric washers since 1916. At that time the late Louis C. Upton negotiated a contract with Sears for 25 machines; sort of an experimental contract to see if Sears had a market for what was then a dubious item. Not many housewives believed in it. In 1922 the company delivered only $25,000 worth of machines to Sears. But 3 years later, in 1925, Sears sold $125,000 worth. Except for that first experimental 1916 contract for 25 machines, Sears has purchased hundreds of millions of dollars' worth of home-laundry items from Whirlpool in the last 39 years—without a contract of any kind.

Sears-Roebuck does not single out Kenmore washers and dryers for any special advertising. Housewives buy both Whirlpool and Kenmore machines mainly because they hear about them from other wives who own them; word-of-mouth advertising. If ever an electrical appliance was sold strictly on its competitive merits, without ballyhoo, the Whirlpool products are. And because of its vast public acceptance, they are now the leading brand names in the whole field. The added fact that no exclusive contract exists between Sears and Whirlpool shows that Sears thoroughly believes that Kenmore machines are the best that can be built. Since World War II it has been selling both brands, as fast as Whirlpool can build them, and usually the market howling for more.

In the eyes of Elisha Gray, whom his associates call Bud, there are two major human advantages in this position of leadership. First comes his human balance sheet, wherein he conscientiously asks himself and his management team whether he is doing his utmost to preserve his invaluable pool of trained, able workers. "Our greatest asset," he calls them. "Pride in being part of a company, loyalty to a company, devotion to the job—these things can be earned, depending upon what management does." He says that responsibility cannot be delegated to the public-relations department or to some vice president in charge of good citizenship. It is something that all management has to live with—"they have to feel it in their bones." And the determination to merit the respect and trust of these highly skilled employees is a continuing, day-by-day effort.

The highest wage in the industry and steady employment are only two of the means used at Whirlpool to gain this objective. There is a long list of regular and special benefits for employees, including a good retirement program, a year-end bonus, vacation pay, veterans' benefits, medical services, recreational facilities, various shared insurance coverages, and even a big Christmas turkey to every employee with the company's compliments.

"These are some of the direct and indirect benefits that we enjoy from the existence and healthy growth of Whirlpool Corp., and the effect that these benefits have in gaining and holding mutual respect and support. If these things are not good, then it is only a matter of time," says the company's statement to employees, "before our tangible assets, such as machinery, buildings, supplies, and the like, will be so much junk."

Working conditions are constantly improved, but Gray says there is still a long way to go. Parking facilities are being expanded periodically, ventilation improved, better lighting installed, and large sums spent to ease the workload in certain operations.

Secondly, Gray feels that the Whirlpool Corp. should work unceasingly to maintain its present excellent relations with the community of St. Joe-Benton Harbor. "If charity begins at home," he says, "we feel at home * * * in the last 10 years we've contributed $596,836 to local charities," to about 150 separate causes per year. In addition, the company pays nearly a third of all the local taxes collected. The Whirlpool comment on this is typical: "It's money well spent. It has helped develop the community's schools, streets, and system of fire and police protection." There was no gasp of pain at the size of the local tax bill, which is now about a quarter of a million dollars per year.

Whirlpool buys locally in every possible case, last year spending over $14 million in local purchases from 125 firms. All kinds of supplies and services that can be produced in St. Joe-Benton Harbor are contracted for. The Whirlpool payroll in the community for 1954 came to approximately $20 million, which upon analysis turned out to be about a third of the community's industrial income. That $34 million in cash means a greatly expanded community economy, felt in every line—better schools, more doctors and dentists, bigger and better supermarkets, and general community prosperity.

This is a story of paramount importance to Michigan. This is the tale of a single organization, started in St. Joseph in 1911 with a borrowed $5,000, which grew gradually and not at all rapidly for most of its 44 years, from an original 6 employees to more than 3,500. It is the chronicle of a long struggle and repeated failure in its early years, when the company tried its hand at everything from air rifles to Boy Scout mess kits. Its first electric washer prototype was a failure because it used cast-iron gears, which quickly stripped their teeth. The lesson of quality was learned right then. Cut-steel gears, much more expensive, restored the machine's dependability.

It is of importance to Michigan because in this world center of high-speed mass production this company proves that its people and its community are indeed its greatest assets—by treating them with the consideration their importance demands. Employees, as well, find in the Whirlpool story an ever-present example of what enlightened labor relations can be and should be—cooperation with a management program toward the common goal of building a better product at less cost as the only way to earn higher wages, security of employment, and greater opportunities for advancement.

"Anyway," says a company spokesman, "we think that the money spent on these projects by Whirlpool is a sound investment in ourselves, our future employees and in our neighbors."

Call it parternalism if you like. The company doesn't have to do many of these things. President Bud Gray calls it "square-dealing," and that's something the Whirlpool people understand. The point is—it pays off.

Because of the "human balance sheet," the financial balance sheet is the biggest of its kind in the world. Michigan can well be proud of such an achievement.

Mr. MADDEN. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

RETIREMENT EXPERT

Mr. McCORMACK. Mr. Speaker, I offer a privileged resolution (H. Res. 163) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That effective March 1, 1955, there shall be paid out of the contingent fund of the House, until otherwise provided by law, compensation at the basic rate of $4,100 per annum for the employment of a retirement expert in the House Disbursing Office who shall be designated by the Clerk of the House subject to the approval of the Speaker.

The resolution was agreed to; and a motion to reconsider was laid on the table.

INCREASED FHA MORTGAGE INSURANCE AUTHORIZATION

Mr. SPENCE. Mr. Speaker, I move that the House resolve inself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H. J. Res. 202) to amend the National Housing Act, as amended.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of House Joint Resolution 202, with Mr. HAYS of Arkansas in the chair.

The Clerk read the title of the resolution.

By unanimous consent, the first reading of the resolution was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Kentucky [Mr. SPENCE] will be recognized for 30 minutes, and the gentleman from Michigan [Mr. WOLCOTT] for 30 minutes.

The gentleman from Kentucky is recognized.

Mr. SPENCE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is a resolution that increases the authority for insurance by the FHA by the sum of $1,500,000,000.

This is not an appropriation; it is an authorization to this agency of the Government to insure home mortgages.

This organization has been in operation since 1934. It was organized in depression times when we needed to stimulate home building, and it has been an instrument used for that purpose ever since.

The unused balance of authorized insurance on the 1st of January this year I believe was about $390 million. This sum will be exhausted very shortly, and the $1,500,000,000 is to carry on the activities of this agency until June 30 of this year. But before that time the whole housing program will have to be gone into and there will have to be an extension, before June 30. Of course, up to this point the FHA has sustained no losses. They charge one-half of 1 percent for insurance and they have a reserve now, I believe, of about $400 million.

If in times of depression an undue burden might be placed upon the Government to meet the defaults, it could be taken care of without great strain upon our economy. When a mortgage is in default it will be paid by debentures which do not mature for 20 years. This would tide over a possible cycle and would probably save the Government from any serious loss. I think a man does not have to be an optimist to think there might not be some losses from these great activities. The outstanding insurance, I believe, is limited to $20,800,000,000 with reserve funds growing all the time.

As an evidence of my optimism in this respect I cite to you the Home Owners Loan Corporation. You will remember that the Home Owners Loan Corporation was organized when we were in the depths of a depression, when mortgages were being foreclosed all over the land and people were being dispossessed of their homes. That device was set up in order that the Government might take over these mortgages, might reduce the interest rates and might give the mortgagors further time to pay. That was done and millions of homes of American citizens were saved by that method. It never cost the Government a cent because in the final liquidation of the affairs of the Home Owners Loan Corporation the Government sustained a profit.

I think we can make the same argument in favor of this agency. At the time it was stated that these methods were visionary. They were not visionary, they were the result of vision. As the prophet of old said, "Where there is no vision people perish."

I think you can vote with absolute assurance for this increased authorization in reference to insurance to continue to accomplish the purpose which it has accomplished throughout the years. I believe firmly that if you would take away this support from the mortgage market and the building industry there would be a great decrease in building during coming years. I do not believe we have reached the saturation point in good homes in America. We can stand a great deal more building of decent homes for our people, which is not only an investment in the health and comfort of our people but it is an investment in the assurance of good citizenship and stable government.

I hope that this joint resolution will be passed and I ask for its support.

Mr. WOLCOTT. Mr. Chairman, I think it is self-evident by this time that the Congress did a very splendid job last year in the enactment of the Housing Act of 1954. The only criticism that is heard is that we might have done a better job than we intended to do because there are some people who are thinking now in terms of saturation of the home-building market and wondering if we perhaps are not producing more homes than the economy will absorb. It might be well for us to have in mind that we have not reached that point yet.

The projection made by the economists and our own economic committee in the Congress presents a very interesting, if not amazing, condition. We project the economy for 10 years in the future, and we find that we may expect a national economy dollar-wise valued at about $535 billion in 10 years' time as opposed to the present national product of about $365 billion.

That is predicated upon the expectation that within the next 10 years we will have a population here in the United States of about 191 million people. So, carrying the projection one step further, if it was considered probable that the national economy could absorb 1 million new homes, new units, a year for the next 10 years as of last year, with these new facts before us, we may raise our sights somewhat and can be reasonably assured that we need for replacement of old homes and the construction of new units at least 1.2 million units for the next 10 years.

The Housing Act of 1954 made such a program possible, and in practice during the last few months we are assured now, with the aids which we have given the act, the aids which we are giving it under this bill, that we can safely produce 1.2 million homes not only this next year, but if we continue these practices, for the next 10 years. We do not need to be in any danger; we do not need to sense any danger that we will reach the saturation point in the production of safe, sanitary, very desirable homes under the program for the next 10 years. For that reason, this bill should be enacted, because without its enactment there will be a probability that the authorization for home owners' financing through the Federal Housing Administration will be inadequate to cover this next year.

Now, we have coming up further amendments to the Housing Act of 1954 which we must pass upon before June 30 of this year. At that time we will take a long-range look at the housing situation and determine what we might expect should be the maximum of authority.

I want to stress that this is only an authorization for mortgage financing and involves no appropriation. The Federal Housing Administration is on a sound basis, as the chairman has indicated. Perhaps not adequate reserves have been built up against all losses, but reserves are being constantly built up against losses, which indicates, of course, that the FHA is not only on a sound basis but it is making a profit. The profit that goes into reserve against losses, I believe, is about $400 million, which is a sizable sum. Although the total authorization for home-mortgage assistance is a large amount, in the billions of dollars, in order to get the true picture of the possible contingent liability on the part of the Federal Government, we must deduct from this total authorization all of the assets included in all of the mortgaged properties covered into the FHA insurance program, all of the homes which have been financed through FHA. In addition to that, we may take into consideration, of course, this increase in reserves. So the probabilities of any losses under the FHA-insured program are infinitesimal.

At this juncture, I should like to pay what I intend to be a very high compliment to the Administrator of the Housing and Home Finance Agency, a former colleague of ours, Albert Cole. The FHA is one of the constituent parts of the organization which he heads. This organization, the Housing and Home Finance Agency, during his tenure of office, has functioned efficiently with no losses and with a high regard for the true American idea that private enterprise can and should be able to do the job which the Government, in some quarters, is expected to do. I want to commend to this House for its consideration the very splendid work which has been done by Mr. Cole and his staff. Wherever there have been deficiencies Mr. Cole has stepped in quickly to correct them, and all of them are in the process of being corrected.

Mr. Chairman, this bill makes possible the uninterrupted continuance of this very delightful program under which the American people can be assured of decent, safe, adequate, and sanitary homes; and it should be adopted unanimously.

Mr. SPENCE. Mr. Chairman, I yield such time as he may desire to the gentleman from Georgia [Mr. BROWN].

Mr. BROWN of Georgia. Mr. Chairman, House Joint Resolution 202, the pending measure would increase the insurance authorization available to FHA by $1.5 billion. This increase together with an estimated $393 million available at the end of January would provide an aggregate authorization of $1,893,000,000 or about $630 million over estimated requirements to June 30 of this year. Such excess would provide a reserve margin in insurance authorization against a possible greater volume of FHA activity than anticipated. If it is not needed it will, of course, not be used.

Mr. Chairman, several of my colleagues are critical of what they regard as the exceedingly slow pace of the new FHA programs, inaugurated last year as part of the Housing Act of 1954. They are, I realize, understandably disappointed with the failure of the FHA to issue any commitments under either section 200—rehabilitation and neighborhood conservation housing insurance—or section 221—relocation housing

insurance—in the 6 months which have elapsed since their enactment into law. But may I remind these gentlemen that in the establishment of any new housing program there are often many complexities and problems initially unforeseen even by its most unenthusiastic advocates. So while sympathizing with the irritations and disappointments felt by them on this matter, I do believe that, at least for the present, a somewhat more patient attitude upon the part of my colleagues is warranted.

My friends, let us not lose our perspective on this subject. Let us never forget that the overall record of FHA down through the years has been such that we can all point to with pride. A revolution has taken place in the housing field during the last 20 years, and the FHA has played a major role in that revolution.

Prior to 1933, most prospective buyers had to make a downpayment of at least 25 percent of the appraised value of the property. A first mortgage would probably be limited to a half or two-thirds of the appraised value. On this mortgage the borrower would pay anywhere from 6 to 8 percent interest. The loan would have a maturity of 3, 4, or 5 years. If a second mortgage was necessary, as it usually was for families of moderate incomes, the purchaser could obtain one by paying a discount to the lender and perhaps a commission to a broker in addition. Discount and commission may have amounted to 15 or 20 percent of the loan. Interest on the second mortgage would be 8 percent or more. The borrower was periodically at the mercy of arbitrary and unpredictable forces in the money market. When money was easy to get, renewal every 1 to 5 years was no problem. But if his mortgage expired at a time when money was hard to get, it might be impossible for the homeowner to secure a renewal, and foreclosure would ensue. This was the situation in the early thirties. Foreclosures totaled 150,000 in 1930, nearly 200,000 in 1931, and 250,000 in 1932.

Such was the inevitable result of the free money market policy pursued during the 1920's. The mortgage interest rates I have cited were, of course, but typical of the general level of interest in every segment of the economy at that time. During the 1920's the interest rates paid by the Government on the Federal debt were extremely high, with dramatic peaks reached in 1920—before the 1921 depression—and in 1928—before the 1929 depression. The computed rate of interest on the Federal debt averaged 4 percent for the decade. Rates on private borrowing were also very high. Rates on short-term loans to business were well over 6 percent during much of the time. Yields on high-grade corporate bonds maintained a level well above 4 percent. Farm mortgage interest rates fluctuated between 6 percent and 6.5 percent. It is a widely held opinion among economists that these high interest rates were a major contributory factor causing the economic debacle of the early 1930's.

Mr. Chairman, it may be that I have been guilty of a slight digression, but I do feel strongly that, not only for the sake of the housing industry but for that of the entire economy as well, it is vital that our present monetary managers avoid a repetition of anything approaching the tight credit policies of the twenties. If they do not, I fear, despite FHA and the many other economic safeguards we have developed over the last 2 decades, that we may yet experience a a painful economic readjustment.

Today, due to FHA and the liberal credit policies developed during the 1930's, the home buyer can make a downpayment of as little as 5 percent. If he is a veteran he may not need to make any downpayment at all.

His interest on an FHA-insured loan is 4½ percent plus one-half percent to cover the cost of insurance. The loan may run for as long as 30 years. On a VA-guaranteed loan no insurance premium is charged and the interest is 4½ percent net. Prior to the hard money policy of 1953, as you know, our veterans only had to pay 4 percent on their home loans. It is my most sincere hope that this Congress will, by developing a workable secondary mortgage market, make it possible to return the GI rate to its historic level of 4 percent.

The FHA loan is an amortized loan, on which payments of interest, principal, taxes, and insurance are made monthly during the life of the loan. Making arrangements for financing the home has become a one-time transaction. Monthly payments are geared to the borrower's prospective income.

In the twenties a family could acquire a home only after many years of saving to meet the high initial costs. After a downpayment was finally made, interest costs on payments were high. Hopes of owning a home usually were deferred to middle or later life. There always was the risk of sudden foreclosure and liquidation.

Today a family can get a home early in life. The initial cost is relatively low. Monthly payments are reasonable and there is protection against sudden foreclosure caused by economic fluctuations.

The home has become a reality to most American families when they need it most—to bring up the family, not simply to retire to when the children have grown up.

Let me remind you that the changes brought about by FHA are the product of bipartisan endeavor. Men on both sides of the aisle in this body long ago came to the conclusion that home building is far too important to made a political football. There is no other industry that is so dynamic—no other industry that can do as much to sustain the prosperity of this Nation. There is no other industry which touches so greatly the lives of so many millions of families, no other industry whose full production is so necessary to raise our American standard of living.

I fear too many of our people desire to depress the present housing boom by tightening credit and raising interest rates.

Mr. SPENCE. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Chairman, I rise just for the purpose of issuing a word of warning on this whole program which I voiced in the Committee on Rules yesterday.

We have indirect obligations of the Government on this program now of something like $20 billions. We have been constantly increasing them. I am not speaking in opposition to the bill, I am just throwing out a little red flag on the thing of whether we are going to overdo it.

If you drive around Washington and the suburban areas today you will find that in the last few months there have appeared a great many signs of properties for sale and for rent. You will find in the daily newspaper pages of advertising of property either for rent or for sale.

I am just wondering if we are giving enough attention to the question of whether this market is becoming saturated, because when it becomes oversaturated the financial burden of taking care of these loans is going to fall on the taxpayers of the United States.

I would hope that our Committee on Banking and Currency, which has given so much and such fine attention to this subject, would go into that question a little more deeply and see if we have not about reached the point where we are building more houses under Government financing than the public demand calls for.

In that connection, I saw last night a little card that is put out by the Riggs National Bank here in Washington, a weekly financial summary, in which it makes the statement that housing starts continue at the rate of over 1,400,000 a year, but the number of households increase is less than 600,000 per year, in contrast to the 1,500,000 increase in households in the late 1940's. In other words, the demand for houses in the last 5 years has decreased from 1,500,000 a year to 600,000 a year. That is a warning we should heed.

I think that is a pretty serious thing for us to be thinking about. I do hope that the committee, before asking for any further increases in authorization, will give some very serious study and consideration to the question, namely, of whether we have not about reached the saturation point in the building of homes.

Mr. WOLCOTT. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. McDONOUGH].

Mr. McDONOUGH. Mr. Chairman, I feel this is very essential, urgent, and necessary legislation at this time, in spite of the remarks of the gentleman from Virginia concerning the situation in this immediate area. Out in California, where we are taking in around 500 new residents per day, we have had a tremendous building program going on for a number of years, and the saturation point has not been reached by any means. Without the extension of this authorization the building of homes for thousands upon thousands of people not only in California but other parts of the United States would be hampered.

Further, I think I can say without much fear of contradiction that the

building of homes is a means of supplying labor to thousands of skilled mechanics. It is the means of keeping in circulation much of the manufactured products that go into the homes.

Although it may appear that a saturation point has been reached in certain places, in many other parts of the country the saturation point has not by any means been reached as yet. There is another feature of the FHA, which I think we should realize, which would prevent saturation, and that is the caution with which these loans or guaranties of loans are granted. The FHA does not promiscuously allow loans to be made in the various communities. It makes surveys. It determines whether those homes are needed. It finds out whether it is economically sound to allow those loans. For these reasons, I think it is very timely that we pass this legislation. I do not know of any reason why any Member of the House should vote against it. We should supply facilities for the processing of the loans. In the Los Angeles area, the processing of loans is about 6 months behind, because the demands for loans on new homes is so great. That is the sort of problem we are facing in the West, and I think in other parts of the country. For these reasons, I believe the bill should be passed.

To give you a picture of the population increase in the Los Angeles area in the last 10 years, if the entire population of Pittsburgh and Baltimore—1,755,000—were transported westward and settled within the Los Angeles metropolitan area, you would have a fair estimate of our population increase between January 1, 1945, and January 1, 1955.

The impact of this migration, averaging nearly 500 new residents a day for 10 years, makes even seasoned statisticians sit up and take notice.

While the city's population climbed from 1,725,000 in 1945 to its present estimated 2,150,000, a 24.6-percent increase, Los Angeles County became the most populous county in the country, second in the world. The county jumped from 3,345,000 residents 10 years ago to 4,950,000 today, and has not stopped yet.

With a 50-percent rate of increase for the metropolitan area chalked up during the past decade, a population larger than that of Albany, capital of New York, has been added to this area each year. Certainly the problems inherent in this number of increased residents stagger the imagination and resources of any community.

Only 5 United States cities—New York, Chicago, Detroit, Philadelphia, and Los Angeles—exceed the present 1,041,140 population of the San Gabriel Valley, which now accounts for more than a fifth of the county's population, according to figures compiled by the Los Angeles Chamber of Commerce.

San Fernando Valley, starting with about 200,000 residents in 1945, now has more than 600,000 inhabitants, more than the population of Minneapolis or Buffalo.

Los Angeles, city, county, and metropolitan area, has met the challenge of fantastic growth with a creativity and resourcefulness characteristic of the Southland.

To take care of the housing requirement of the tremendous increase in population, houses built on subdivisions formed in 8 southern California counties since 1946 to late in 1954, about four-fifths—conservatively estimated—or about 371,200 were built in the Los Angeles metropolitan area—enough homes to supply housing for 371,000 families or around 1,300,000 men, women, and children. And, of course, in that same time thousands more dwellings were built on previously formed subdivisions and on scattered lots.

Strongly indicated is that the recently enacted National Housing Act signed by President Eisenhower will stimulate home-building and home-improvements projects. That new widening of the way to homeownership is one of the phases of the strong building and realty activities and general progress here during the past 2 years that give impetus to continuance of very favorable trends in this new year and thereafter.

In the 556,380 building permits, totaling $2,990,314,100, issued in Los Angeles—city—in the span from January 1, 1945, to the final third of 1954, there were 139,578, amounting to $1,143,066,978, for single-family dwellings; 6,456 permits, $73,990,583, for double dwellings, and 7,606 permits, $333,091,567 for apartment buildings.

The urgent need to pass this bill, House Joint Resolution 202, was indicated by Mr. Norman P. Mason, Federal Housing Administration Commissioner, when he made the following statement during the hearings of the House Committee on Banking and Currency. I quote:

> At the end of December the estimated unused authorization was $603 million. Preliminary estimates show $393 million unused authorization on January 31. The net use of authorization has averaged $260 million monthly for the period since September. Continued net use at this rate would exhaust the present authorization about mid-March. This will be the beginning of the spring peak in individuals' planning for home construction or home purchase and also at a time when servicemen are increasing their use of the new insurance program adopted for their assistance in 1954 and as the new program for urban renewal in our cities is just getting underway.
>
> Taking into account the seasonal increase in applications for mortgage insurance during the spring months and also some increase in expirations of commitments, it is expected that monthly use of authorization will average about the same amount through June, or a total of slightly over $1,250,000,000 authorization to be needed through that date.
>
> House Joint Resolution 202 would have the effect of raising the available mortgage insurance authorization by $1,500,000,000. Combined with the $393 million authorization unused at the end of January, this would provide $630 million above estimated requirements and provides only a reasonable reserve for a possible greater volume of applications than anticipated. It should perhaps be noted that the FHA program of mortgage insurance is a voluntary one in which the volume of activity is entirely dependent on the desires of builders, lenders, and home buyers.

I urge every Member of the House to support and vote for House Joint Resolution 202.

Mr. SPENCE. Mr. Chairman, I yield 15 minutes to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Chairman, when I came to the Congress, following the election of President Truman, we were experiencing in the district from which I come, and generally throughout Chicago, a severe housing shortage. Conditions were tragical. I was grateful to the leadership for my assignment to the Banking and Currency Committee. It was in the committee vested with jurisdiction in the field of housing that I thought I could best serve, humbly but hopefully, the men and women who had given me the confidence of their ballots.

This thought was strengthened by the not inconsiderable experience, well known to the people of Chicago, that had been mine two decades ago when another feverish construction boom at a time of inflated costs was followed by a bust engulfing both equity owners and the many investors in real-estate bonds whose savings had financed skyscrapers, luxurious hotels, and palatial apartment buildings in almost every nook and corner of the city.

Those skyscrapers, hotels, and apartment buildings still glorify the skyline of beautiful Chicago. All went through the wringer of reorganization. The original equity owners and bondholders were washed away with the suds, and those who enjoyed the handsome windfalls later to come were those who gained control through the purchase of securities from starving and impoverished bondholders at a few cents on the dollar.

I did not want that to happen again. I had seen $10 billion of the savings of good people in my home city of Chicago go down the drain for the simple reason that no one told these good people that improved real estate, constructed in a period of unusual prosperity and high costs, and with the expectation of a continuing ability of tenants to supply money necessary for maintenance and mortgage commitments, inevitably must suffer the impact of a return to normalcy.

The tendency in a period of large salaries and generous wages is to build above the ability of ordinary people either to own or to rent in normal times.

HOUSING ACTS OF 1950 AND 1954

In 1950 I was happy when the housing bill that came from the Banking and Currency Committee was enacted into law. I saw great promise for the future in the research provision. Here, thought I, was something constructive—a laboratory study with constant and persistent experimentations in new forms of dwellings, in types of structure, in materials, in financing—until from it all had come a feasible and practical blueprint for decent housing within the financial reach of all our people. Nothing came of it. The great promise held forth by the research provision in the housing bill of 1950 rests amid the junk.

The housing bill of 1954 admittedly was a measure to stave off the recession or at least to prevent the recession from growing into a depression. No one pre-

tended that it would relieve in any measure the housing shortage among the large segment of our population with limited means. But it would build homes, into which people could move with small downpayments and mortgage commitments running many years. It would do that because the Government, not the builders or the mortgage houses, was guaranteeing against the future.

I voted for amendments that I thought would broaden the range of benefits to include some at least in the low or modest income brackets. The amendments defeated, I voted for the bill.

DEFEAT OF MULTER AMENDMENT

I shall vote for House Joint Resolution 202 despite the defeat in committee of the Multer amendment reducing the amount of the increased authorization. At present time, we do have FHA, and under its guaranty homes are being built when without FHA there would be no home construction, a great industry would collapse, unemployment would grow and our economy certainly would suffer; better houses beyond reach of many families than no new houses at all.

The amendment that was offered by the distinguished gentleman from New York to reduce the increase in FHA mortgage insurance authorization I thought had great merit. The purpose of the amendment, I thought, should have appeal to my colleagues on the ground of prudence. It was not intended, nor would it retard the present building activity, which happily is approaching an all-time high. We must be realistic. A collapse in the construction boom well might be the forerunner of a depression. We cannot permit that to descend upon us. And without FHA there would be no construction, or very little, and the collapse would be inevitable. Therefore, the enactment of House Joint Resolution 202 becomes imperative.

ENCOURAGEMENT TO PROCRASTINATION

But I thought it is equally imperative, if we are to begin to get our housing program on a sounder basis, profiting from our experiences, that the increased authorization should not exceed the requirements of the present and the foreseeable future. Otherwise we encourage practices which we could not condone and which ultimately might bring the entire housing program into popular disfavor. Furthermore, an authorization beyond the requirements of present plans would be an incentive to procrastination in the enactment of a housing act of 1955 in which imperfections in the present act could be corrected and which could have the benefit of our past experiences in the field.

Briefly, here are the facts and the figures: As of January 31, 1955, there was an estimated $393 million in unused authorization. House Joint Resolution 202 increases the authorization by one and a half billion dollars, which added to the $393 million would make the total available to FHA $1,893,000,000. As the average monthly use of the authorization is $260 million, this would carry FHA to the end of August or into September. This is longer than is necessary since the responsibility is no longer that of the 83d Congress but now belongs to the 84th Congress.

Without delay work should be started and assiduously pursued in the housing bill of 1955 to the end that in the early summer it should have gone from the consideration of the Congress to the action of the President. Certainly if we are to adjourn by August, as seems to be the expectation, the Housing Act of 1955 should be on the statute books in early summer. If we hold back our action on legislation in the housing field to the last frantic, frenzied, and confused days and weeks of the session we are sure to come up with a dud.

By reducing the increase in FHA authorization by $250 million we would supply all the authority needed to carry the present wave of construction, even accelerated much beyond expectation, up to and into August. The adoption of the amendment would have served the double purpose of keeping FHA adequately and abundantly equipped to carry on its work and of encouraging the early enactment of a better housing act in 1955. I say a better act because it is not too unreasonable to expect that always we progress, in legislation as in other matters, through trials and failures.

I shall vote for House Joint Resolution 202 even though I think the adoption of the Multer amendment would have strengthened FHA and its purpose.

HOUSING SHORTAGE CONTINUES

The housing shortage, especially as it slaps with tragedy our urban families of modest means, remains with us, unaffected by the $32 billion of Federal credit responsible for the greatest home-construction activity in our history. In my own district and in Chicago generally the tragedy has become more grim since the end of rent control. Despite the efforts of the responsible real-estate interests to keep rent increases within reason, the letters that pour into my office show how cruelly the housing shortage in the area of residence by families of modest incomes is being taken advantage of by speculators who purchase properties at inflated prices, raise the rent, and try to pay off the purchase price within a few years.

Mr. Chairman, I hope the 84th Congress will approach the housing problem in a new manner. I came here with a dream that we might make possible decent housing within the reach of all people. This is the third Congress of which I have been a Member. I still hold to the dream; I think sometime, and while I am here, it will be realized.

I cheerfully give credit to FHA, but when I contemplate the billions of dollars of credit of the United States we have extended to build homes it makes me sad to realize that not one home has been built within the reach of 50 or 60 percent of our population.

These are the facts that stand out: First, since World War II we have built more new homes than in any comparable period in our history; second, this has been made possible not by private industry working with investment capital, but by the furnishing by the Federal Government of full guaranty against loss; third, the security to builders, who immediately receive cash payments from mortgage proceeds, and to the mortgage houses, who are guaranteed by the Government against loss, has confined the operations of private industry almost exclusively to the furnishing of homes to those in the upper- and middle-income groups; and, fourth, with the exception of some public housing in earlier years, now practically at a standstill, nothing has been done to meet the housing needs of those in the low-income brackets.

As regards urban families in the low- and middle-income groups the situation has been getting worse rather than better. I am not blaming private industry. It is natural that when there is available a market with certain profits and no risks private industry will not explore the possibilities of other markets. When the more attractive markets have been worked out, American private industry will, as it has always done, find a way of profitably meeting the need that does exist.

CHALLENGE TO PRIVATE INDUSTRY

The need now is for homes within the financial reach by purchase or by rent by the 50 or 60 percent of our urban populations that have received little or no benefit from the FHA program, however advantageously that program has worked in other income areas. I have too much confidence in American business to believe that it cannot develop this housing field where there is the greatest unfilled demand. The blueprint for a future America, supplied by the active participation of private industry with decent housing for all American families, should be suggested in the Housing Act of 1955.

There cannot be a safe America until we have reached our goal of decent housing for every family within our fold. Safety from disease, safety from crime, safety from social disorders are only a few of the safeties we assure for ourselves with good housing.

SITUATION IN CHICAGO

Let me speak briefly on the situation in Chicago. That is the territory with which I am most familiar. Practically all of the FHA-mortgage-guaranteed construction is in the suburban areas. Homes are priced in some instances possibly as low as $12,000, most run $15,000 and up. Downpayments are small, mortgage terms are long.

Families who have resided in the city are forced to go into the suburbs because of the shortage of suitable homes in the old neighborhoods. With the sudden growth of suburban communities has come an excessive demand on school, water, and other facilities. There also has been created a traffic problem. In many instances the suburban residents use their own automobiles for transportation to and from their places of business and of employment in Chicago. The resultant congestion in traffic in the rush hours adds to a situation already difficult to handle.

Meanwhile with the exodus to the suburbs the residential districts of the city itself are becoming more and more

dilapidated. Even in some of the districts where rehabilitation plans have been approved by official action and by popular sentiment the properties to be demolished are to be replaced with residences in the $25,000 and up class. Where will the families in low and middle income areas go?

PUBLIC HOUSING FOR AGED

What is needed if our cities are to be saved and utilized for the greatest use by all the people who work in those cities is a new approach. I will not take the time to pursue this thought other than as it applies to a bill for public housing for our senior citizens. Eleven other members of the Banking and Currency Committee have joined me in the introduction of this measure.

Under the FHA program it is impossible for a senior citizen to qualify for a mortgage. Security required is the productivity of the mortgagee not only at the time of entering into the mortgage but during the entire period of the mortgage commitment. Value of the real estate security is of secondary consideration.

My distinguished colleague from Ohio [Mr. ASHLEY], who is a cosponsor of the bill for housing for our senior citizens brought out at a recent hearing of our committee that the present average of FHA mortgagees is 32 years whereas only a few years ago it was 37 years. This would indicate that it is getting more and more difficult for a man even in the prime of life to get FHA insurance. For the man or woman passed the prime the door is shut, nailed up and padlocked.

Here then is a segment of our population deserving of our best effort that is entirely overlooked in our housing program. If we should increase the FHA authorization under the present setup a hundredfold our senior citizens still would be shivering in the cold.

CONTENTMENT HAS BEEN EARNED

Policemen in Chicago are forced to retire at 62, schoolteachers at 65, industrial workers generally at 65. Usually they retire on modest pensions or allowances. They have before them many rich years of contentment if given the opportunity.

Housing in congenial neighborhoods and associations is requisite to the enjoyment of that contentment earned by their long and honorable service in the working periods of their lives. They have earned something more than being given shelter in the homes of their children, welcome and beloved, it is true, but nevertheless guests in the homes and strangers in the activities of younger generations, that of their children and that of their grandchildren.

The bill which has been introduced by 12 members of the Banking and Currency Committee would provide for public housing especially constructed for the aged, located in the neighborhoods where their children reside and dear to them because of old associations. The public housing for our senior citizens would have none of the stigma of charity since the cost of maintenance would be borne entirely by the rental payments of the tenants. Such rents, however, would be geared to the limited means provided by modest retirement pensions. I trust that the bill cosponsored by 12 members of the Banking and Currency Committee will receive the thoughtful and sympathetic attention of Members on both sides of the aisle.

NEW APPROACH REQUIRED

Mr. Chairman, I have attempted only to sketch the outlines of the new approach I think we should take to the housing problem of the Nation. We have put some $32 billion of the Nation's credit behind FHA, and we are happy with the results that have been accomplished in the higher income area. The benefits of the program have extended into the modest income areas as well, and for that we rejoice.

Let us now explore the possibilities of bringing housing into the income areas that have been overlooked. A decent roof over the head of every American family must remain our objective until that end is reached.

Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. If there are no further requests for time, the Clerk will read the joint resolution for amendment.

The Clerk read as follows:

Resolved, etc., That section 217 of the National Housing Act, as amended, is hereby amended by striking "$1,500,000,000, except that with the approval of the President such aggregate amount may be increased by not to exceed $500,000,000" and inserting "$3,500,000,000."

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. COOPER], having resumed the chair, Mr. HAYS of Arkansas, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the joint resolution (H. J. Res. 202) to amend the National Housing Act, as amended, pursuant to House Resolution 160, he reported the joint resolution back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the House joint resolution.

The House joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the House joint resolution.

The House joint resolution was passed; and a motion to reconsider was laid on the table.

Mr. SPENCE. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Joint Resolution 42.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky [Mr. SPENCE]?

There being no objection, the Clerk read the Senate joint resolution, as follows:

Resolved, etc., That section 217 of the National Housing Act, as amended, is hereby amended by striking out "$1,500,000,000, except that with the approval of the President such aggregate amount may be increased by not to exceed $500,000,000" and inserting in lieu thereof "$3,500,000,000."

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

A similar House bill (H. J. Res. 202) was laid on the table.

A motion to reconsider was laid on the table.

SPECIAL ORDER GRANTED

Mr. HARRIS asked and was given permission to address the House for 10 minutes today, following the legislative program and any special orders heretofore entered.

TO AMEND THE AGRICULTURAL ADJUSTMENT ACT OF 1938

Mr. COOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 1573) to repeal section 348 of the Agricultural Adjustment Act of 1938.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 1573, with Mr. MADDEN in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. COOLEY. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, the purpose of this bill is to repeal section 348 of the Agricultural Adjustment Act of 1938, as amended. The section reads as follows:

SEC. 348. (a) Any person who knowingly harvests any basic agricultural commodity on his farm which has been determined by the Secretary to be in excess of the farm acreage allotment for such commodity for the farm for such year under this title shall not be eligible for any payment for such year under the Soil Conservation and Domestic Allotment Act, as amended.

Section (b) reads as follows:

(b) Persons applying for any payment of money under the Soil Conservation and Domestic Allotment Act, as amended, shall file with the application a statement of facts showing eligibility under this section.

Section 348 was written into the law during the last session of the Congress. It was sponsored by the senior Senator from Florida. The bill now before you was introduced by the gentleman from Kansas [Mr. HOPE] on January 6, and the purpose of H. R. 1573 is to repeal section 348 of the Agricultural Adjustment Act of 1938, as amended.

To the end that you might know the views of the Secretary of Agriculture and the officials of the Department of Agriculture, I need only read only one line from the hearings. Mr. McConnell, Administrator, Commodity Stabilization Service, United States Department of Agriculture, had this to say:

All I can say is that the Department favors the repeal of section 348.

I would like to say that it was never intended or contemplated, even remote-

ly, that the agricultural-conservation program should be tied in with the acreage-allotment and marketing-quota law. The effect of this amendment, which is now section 348, was to deprive a farmer of his ACP payments if he knowingly exceeded his acreage allotments on any one of the crops then under control. I do not believe anyone would suggest that there was any element of control contemplated in the original ACP program. It was a program to induce the farmers to build up their soil resources and to enrich the fertility of the soil and to engage in good farming practices. I believe that every dollar that has been invested in the ACP program is a good investment in the future security of our Nation.

Actually, in my section of the country, through the ACP program, we have just about revolutionized agriculture. We have changed the whole landscape and the countryside, and we have enriched the Nation, I believe, far beyond the investment that we have made in this program.

I know that in some high places in farm circles there are people who would like to destroy the ACP program. There are others in other high places who would like to destroy the entire farm program which has served so well the needs of our people both in times of peace and in times of war. There are those who are going on the platforms of this country in an effort to bring the farm program into disrepute, and they talk about the tremendous and gigantic costs to the Federal taxpayers of the farm program which is now and for the past two decades has been in operation. The truth is the program has been successful.

I do not think any intelligent person, familiar with the operations of the program, can truthfully say that the program has been financially burdensome. If we are to continue the program we want it to be as free from controls as practicable.

We have heard a lot of these orators screaming their heads off about controls and regimentation and we are told that we have been making the farmers of America goosestep to tunes that are played here in Washington. Those who talk loudest about freedom for the farm are now actually advocating economic shackles for the farmers of America.

I want to call attention to the fact that the Secretary of Agriculture, after very careful thought and consideration, decided to issue an order which would force the farmers into a program of multiple compliance or cross compliance, meaning that a farmer would have to comply with every program for every commodity or he would lose all of the benefits of all of the programs for every commodity. But after issuing that administrative order, even Secretary Benson himself concluded that the order was not feasible and should be repealed and, by proper order he did repeal the order requiring multiple compliance.

This section 348 is absolutely incompatible with the ACP program. It is no part of the marketing quota and acreage allotment program and yet in the last hours of the last session, when it appeared that we would not have a farm bill at all, the House conferees were forced into the position of having to embrace this section 348, when there was not a man on our committee in favor of it.

This bill has as its author the former distinguished chairman of our committee, Congressman HOPE, of Kansas, who is recognized by this Congress and by this country as one of the brilliant farm leaders of America. I daresay that he knows more about agriculture at home and abroad than perhaps any other Member in either House of the Congress. I know that there is no greater champion of the farmer than CLIFFORD HOPE.

I need call attention only to one other thing and that is that this resolution that is now before the committee was unanimously reported by the House Committee on Agriculture. It is recommended by the Department of Agriculture. I hope it will be adopted without opposition.

Mr. HOPE. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I should like to take a little time to go into the history of the legislation which would be repealed by the bill before us at this time. In the Agricultural Adjustment Act of 1938 there was a provision which said in effect that a cotton producer would not be eligible to receive agricultural conservation payments unless he stayed within his cotton-acreage allotment. That provision, as I say, was included in the Agricultural Act of 1938 and remained in that form in the agriculture legislation until the last session, when the Agricultural Act of 1954 was enacted. When that legislation was before another legislative body which I am not permitted to mention by name, an amendment was adopted on the floor which applied that provision to all basic commodities. Examination of the RECORD discloses that this matter was not debated or discussed on the floor in the other body, except that the author made a very, very brief explanation.

In the committee on conference on that bill all of the House conferees opposed the provision but they were unable to eliminate it from the legislation and it remained a part of the Agricultural Act of 1954.

The effect of that legislation if we retain it will be to prevent any farmer from participating in the agricultural conservation program if he is in any respect whatever out of compliance with acreage allotments under the farm program. Since all of the six basic commodities are now under acreage allotments, it means that all producers of the basic agricultural commodities will not be able to participate in the agricultural conservation program if they are out of compliance even if it is by one-tenth of an acre or less.

This matter has been considered by the Department of Agriculture and, as the distinguished chairman of our committee has stated, the Department was represented by Mr. McConnell, the Assistant Secretary, at the hearing which was held on this legislation. He endorsed the legislation and gave the Department's reasons for opposing it.

I would like at this time to read a part of the statement of Mr. McConnell which he made at the hearings on this measure before the Committee on Agriculture. I quote now from the hearings:

> If there is anybody in the United States who is concerned with surpluses, it is certainly the Department and the portion of the Department with which I am concerned. It is my considered judgment, after studying this matter, that all the power that can be brought to bear on the objective of holding down overproduction is in the acreage allotments, backed up by marketing quotas, and anything else you do, like this measure, does not add to that. In other words, you do a lot of work, go to a lot of expense, create a lot of hardships which have no relation to the overproduction. That is my one point. We feel that it will not change that pattern materially.

This provision we are attempting to repeal today will particularly affect corn and wheat producers. It will not have any material affect on cotton and peanut and tobacco producers because those commodities are under marketing quotas whenever acreage allotments are in effect, and that almost automatically, prevents any farmers from being out of compliance. But it will have a very great effect upon the producers of wheat and corn if they are not in compliance.

There is a particular situation affecting wheat that I wish to mention, and that is that under the Agricultural Adjustment Act all producers may produce and sell without penalty up to 15 acres of wheat. That does not mean that they are in compliance if their acreage allotments are less than 15 acres. If their allotments are less than 15 acres and they plant 15 acres, then they are out of compliance, and under the legislation we are trying to repeal today those farmers would be out of the ACP program.

There are more of those situations, perhaps, than most people imagine. In the States east of the Missouri River, and in some other areas also, there are a great many farmers who are not in compliance with wheat acreage allotments but who have been led to believe that they were in compliance with the program, if they planted 15 acres or less. Acting in good faith, they planted 15 acres or less, and then found that they are not in compliance and cannot participate in the ACP program. Most of them feel that they have been misled and that their Government is acting in bad faith with them. That is one situation which very substantially enters into this picture. Of course, in the case of corn where we do not have marketing quotas, there will undoubtedly be farmers who will not comply with acreage allotments and they will be thrown out of the agricultural conservation program.

My thought has always been that the agricultural conservation program was a program which should stand on its own feet. It should not be used to compel compliance with the programs for price support. Likewise, I think the price support program is one which should stand on its own feet. We have methods of forcing compliance with the price support program, and as Mr. MCCONNELL

said in his statement before the committee, we do not need this additional method. We have been able to get along without it for almost 20 years and I see no reason for going into it now.

Mr. LOVRE. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. LOVRE. I simply want to commend the gentleman for sponsoring this legislation. With reference to corn farmers, I do want to call the attention of the House to the fact that last year, in 1954, in South Dakota, 40 percent of our farmers complied with corn allotments. That means that is the same law is in effect in 1955, and we have no greater compliance than we had last year, 60 percent of our farmers would be denied the benefits of the soil conservation program.

Mr. HOPE. I thank the gentleman from South Dakota who is the author of a similar bill, and who has been very active in his support of this legislation.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. COOLEY. I would like the RECORD to show also that Messrs. BERRY, CHRISTOPHER, POLK, WILSON, JONES, LAIRD, and ALBERT are authors of similar bills, and that Messrs. AVERY, MOULDER, ABBITT, GEORGE, JOHNSON, QUIGLEY, DEANE, and Mrs. KNUTSON also introduced bills having the same purpose in mind as the bill reported by our committee.

Mr. HOPE. Yes, I thank the gentleman. What he says indicates the great interest in this matter. I cannot recall any time in recent years where so many bills on one subject were introduced and referred to the Committee on Agriculture.

Mr. HAYWORTH. Mr. Chairman, will the gentleman yield?

Mr. HOPE. I yield.

Mr. HAYWORTH. Can the gentleman tell us the official position of the farm organizations on this legislation, especially the Farm Bureau?

Mr. HOPE. No farm organizations appeared at the hearing on this bill. I have no direct information myself as to the position of any of the farm organizations. I have been told since coming on the floor today that some Members have received wires from the Farm Bureau opposing the legislation. That is all I know about it.

Mr. COOLEY. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Chairman, it is not very often that I impose upon the time of the committee in debate having to do with agricultural matters, but I think certainly it is in keeping with what the gentleman from Kansas was just saying and the gentleman from North Carolina [Mr. COOLEY], chairman of the committee, if I point out that while it is true the basic industry of my district is the production of anthracite coal, I have about 3,000 farm families in my district. Further, to point up what the gentleman from Kansas was indicating with particular reference to the small wheat acreage matters, that problem is especially mine with reference to the matter now before us.

Certainly there is little doubt, from what they have presented to me, that this amendment to the original act was certainly wrong in principle.

I have before me, on page 2 of the report, this language, and this typifies the case that I have. For instance, these small wheat farmers in my district, mostly under 15 acres, were not at any time permitted to vote on this wheat acreage allocation program. They had nothing to do with the voting on allotments. They were subject entirely to the action of their bigger brothers throughout the country.

This wheat-marketing-quota law provides, for example, that any farmer, whether he has a wheat allotment or not, may plant and market up to 15 acres of wheat without becoming subject to the marketing-quota provisions. It was the clear intent of this provision of law to permit farmers in areas where wheat is not a major commercial crop, and certainly wheat in my district is not a major commercial crop, but there is a great deal of small wheat acreage, to plant a small acreage as a nurse crop or a cover crop or for use on the farm.

So, Mr. Chairman, I am glad that the committee is unanimously reporting this legislation and this amendment to the law, and return to the real purpose and intent to help the small farmers and not in any way destroy what we are trying to do.

Mr. COOLEY. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. HAYWORTH].

Mr. HAYWORTH. Mr. Chairman, I would like to get into the RECORD the official position, as my office has it, of the farm organizations on this matter, including the Grange, the Farmers Union, and the Farm Bureau Federation. The Grange and the Farmers Union, according to what we hear, were both enthusiastically for this particular piece of legislation. The Farm Bureau official to whom we were referred, did not seem to know about it when first called, but after studying the report, stated that the Farm Bureau was against the legislation.

Mr. COOLEY. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, in the 1955 report of the American Farm Bureau Federation, on page 6, I find this language:

> That Government should, with a minimum of control and aid, stimulate individual initiative.

That is exactly the ACP program. It has no control over the farmer. It does not contemplate that the program will in any way control his operation. It is only calculated to stimulate individual initiative.

I am not surprised at the Farm Bureau Federation. Unfortunately, in recent years we have met with opposition from the American Farm Bureau Federation on every bill we have brought from the Committee on Agriculture. This section that we are trying to repeal is an effort to regiment the farmer, and yet the Farm Bureau Federation comes out in favor of retaining section 348.

Mr. BASS of Tennessee. Will the gentleman yield?

Mr. COOLEY. I yield.

Mr. BASS of Tennessee. I wonder if there is anyone here who can state why the Farm Bureau Federation is opposing this measure. Did they give any reasons?

Mr. COOLEY. No. I would like to say that we held open hearings. A public announcement was made that the hearings were going to be held. The Farm Bureau did not ask to be heard. They have representatives in the city of Washington, and apparently they were indifferent about the matter until the bill reached the floor of this House for consideration. I hope no Member of the House will be influenced by any expression of opinion by the American Farm Bureau Federation.

I now yield to the gentleman from North Carolina [Mr. FOUNTAIN] such time as he may desire.

Mr. FOUNTAIN. Mr. Chairman, I rise in support of H. R. 1573. I associate myself with the views expressed by my colleague, the chairman of the Committee on Agriculture, the distinguished gentleman from North Carolina [Mr. COOLEY], and by the distinguished former chairman of the Committee on Agriculture, the gentleman from Kansas [Mr. HOPE].

I think it has already been well stated that section 348 has never had any rightful place in the Agricultural Adjustment Act of 1938, as amended. The present language of section 348 prohibits the making of agricultural-conservation program payments to any farmer who knowingly harvests any basic commodity in excess of his acreage allotment. In the first place, the ACP program is a separate and distinct program from that of the acreage-allotment program.

Prior to 1954, section 348 had applied only to cotton and had declared ineligible for ACP payments any cotton farmer who knowingly overplanted his allotment. There are no acreage allotments on cotton except when marketing quotas are in effect. In addition, the quota provisions themselves are an effective deterrent to overplanting. Consequently, as the committee report indicates, the provision was largely unnoticed and seldom used. During the closing hours of the 83d Congress a conference committee of the House and Senate reluctantly accepted section 348 in order to assure the passage of the 1954 act. This was the first time the principle set forth in section 348 had been made applicable to all basic commodities. It became new law and all kinds of difficulties and conflicts resulted, many of which have already been related during the course of this debate.

It is obvious that a strict interpretation of the provisions of section 348 would seriously retard the agricultural-conservation program which for any particular year is usually planned almost a year in advance and is authorized by Congress on that basis. As has been stated, the practices which will be approved for payment are normally determined prior to the beginning of the calendar year and soon after the beginning of the year farmers are invited

to sign up for the program and begin to carry out the practices. Normally, our farmers are eligible for payments as soon as they have carried out these practices or as soon as the materials have been purchased, and ordinarily all payments have been made by the end of the fiscal year on June 30.

If a farmer must wait until he can certify that he has not harvested a particular crop in excess of his allotment, payment frequently cannot be made until the following year because in some areas some crops are still being harvested at the year's end. Another situation indicated the ridiculousness of section 348. It is the wheat-marketing-quota law which provides, for example, that any farmer—whether he has a wheat allotment or not—may plant and market up to 15 acres of wheat without becoming subject to the marketing-quota provisions. Clearly it is the intent of the wheat-marketing provision of law to permit farmers in areas where wheat is not a major commercial crop to plant a small acreage as a nurse crop or cover crop, or for feed on the farm, without penalty. In spite of this fact, section 348, as amended, would penalize these farmers without allowing them any benefit from the agricultural-conservation program unless they complied with acreage allotments.

In addition, section 304 of the 1954 act repealed the authority for marketing quotas on corn, permitting the growing of corn in excess of acreage allotments with no penalty other than the loss of eligibility for price support. Section 348, nevertheless, would impose a new penalty—loss of ACP payments.

Section 348, as amended, would be repealed by this bill. Its provisions, as I have indicated, are in direct conflict with the spirit of several provisions of the acreage-allotment and marketing-quota laws, and as pointed out in the committee report, with at least two other provisions of the 1954 act itself. It is most unfortunate that section 348 was ever included in the 1938 act, as amended. It would add additional and unnecessary administrative difficulties and procedures. It in no way adds anything to the restrictions already set forth in the program. Programs which are designed to stabilize the price and the supply of basic agricultural commodities necessarily are and should always be kept entirely separate from those programs, such as the ACP program, which are designed for the preservation and improvement of our soil and water resources for the long-range benefit of the Nation as a whole.

The ACP program has been a good program. It has given our farmers added incentive to conserve our soil and to make it more productive. While the program has helped them individually, it has also played a significant part in keeping our Nation economically strong. Let us strike section 348 from the Agricultural Adjustment Act and carry on with a program which has meant so much to our people and to the security of our Nation.

Mr. COOLEY. Mr. Chairman, I yield 3 minutes to the gentleman from Missouri [Mr. JONES].

Mr. JONES of Missouri. Mr. Chairman, I do not care to burden the committee. I was the author of a bill similar to the one we are considering. The particular point I would like to make here today is that my colleage the gentleman from Missouri [Mr. CHRISTOPHER], who, as most Members know, has been quite active in the farm program, was also the author of one of the bills and appeared before our committee at the hearings. He is ill and unable to be here today. I am sure that if he were here he would speak on this in his usually convincing manner and show you the desirability of approving this bill. The change, of course, as has been pointed out, has been endorsed by the Department of Agriculture. Also as Mr. McConnell told us, there is no connection between price supports and ACP. I think we are all agreed on that; and that is the purpose of this bill today, to get rid of the amendment which did tie the two together.

I hope this bill will pass.

Mr. COOLEY. Mr. Chairman, I yield such time as he may desire to the gentleman from Wisconsin [Mr. JOHNSON].

Mr. JOHNSON of Wisconsin. Mr. Chairman, I wish to go on record in support of this bill.

I think it could be said that anybody who opposes the repeal of this section of the Agricultural Adjustment Act is opposed to the soil-conservation program, because I do not think there is any particular law at this time that is doing more to wreck the soil-conservation program throughout the United States than the section we are trying to repeal.

I also introduced a bill, H. R. 3438, to correct the inequitable section 348 of the Agricultural Adjustment Act of 1938 pertaining to cross compliance for agricultural conservation payments.

The present law has worked to the disadvantage of farmers in my district, and I suspect that the same thing is true of farmers in many other sections of the country. Most of the dairy farmers in the ninth district of Wisconsin raise corn for feed on their own farms. They do not raise corn for commercial sale.

Thus, the present cross compliance law does not help in the promotion of soil-conservation practices because farmers cannot qualify for ASC payments. On the basis of numerous letters from farmers in my district—and also on the strength of personal conversation with scores of farmers—I know that this situation is true.

In January of this year I received a letter from a county agent in my district which summarizes the difficulties of dairy farmers in operating under the cross compliance provisions of the Agricultural Act.

I wish to quote two short paragraphs from this county agent's letter as follows:

> There is one matter I would like to bring to your attention. Under the present ASC regulations, a farmer must comply with his corn allotment to get ASC payments. This works a hardship on dairy farmers since a considerable amount of their corn acreage is for silage corn.
>
> Since the corn allotment is designed to cut down the amount of corn on the market, and since the acreage of silage corn will not affect corn on the market, wouldn't it be possible to eliminate silage corn from the corn-acreage allotment?

It was this situation that prompted me to introduce my bill, H. R. 3438. Since H. R. 1573 accomplishes the same purpose, I support the committee's report and urge my colleagues to vote for its adoption.

Mr. COOLEY. Mr. Chairman, I ask unanimous consent that all Members who desire to do so may extend their remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. TUMULTY. Mr. Chairman, I desire to call the committee's attention to the following telegram I received from the New Jersey Farm Bureau opposing this legislation. This telegram sets forth the reason for the Farm Bureau's opposition to the bill.

I join with them in their opposition to this bill. The telegram is as follows:

> TRENTON, N. J., *March 1, 1955.*
>
> JAMES TUMULTY,
> *House Office Building,*
> *Washington, D. C.:*
>
> New Jersey Farm Bureau opposes H. R. 1573 which would make agricultural conservation program payments to farmers who exceed allotments. This principle contrary to a sound farm program.
>
> W. P. WATSON, *Secretary.*

Mr. DEANE. Mr. Chairman, I strongly favor the proposed legislation, H. R. 1573 as reported out by the House Committee on Agriculture. Along with several Members of this House, I introduced a similar measure, H. R. 4059, which would repeal section 348 of the Agricultural Adjustment Act of 1938, as amended.

This measure is particularly vital to the farmers in my section of the country. I have heard from many of them, both in writing and by word of mouth, and the consensus of their opinion is that section 311 of the Agricultural Act of 1954 which amended section 348 of the Agricultural Adjustment Act of 1938 is too rigid. As is known by this House, section 348 of the Agricultural Adjustment Act of 1938, as amended, provides that any person who knowingly harvests any basic agricultural commodity, namely cotton, tobacco, corn, wheat, rice, and peanuts, in excess of the farm acreage allotment for such commodity shall not be eligible for any payment under the agricultural conservation program.

I am delighted to see that the House Committee on Agriculture has reported out a bill, H. R. 1573, which abolishes this rigid and unfair restriction.

In changing the basis of allotment to harvested acres, section 348 of the Agricultural Adjustment Act of 1938, as amended, did not eliminate the difficulties it was designed to eliminate but instead it multiplied the conflicts and problems of administration. If a farmer has to wait until he can certify that he has not harvested a crop in excess of his allotment, he frequently cannot receive

his payment until the following year, and it is very difficult in farming as in business to have one's payments held up for several months or a year.

Section 348, as amended, which would be repealed by this bill, is in direct conflict with the spirit of several provisions of the acreage allotment and marketing-quota laws, and with at least two other provisions of the 1954 act itself.

Therefore, due to the conflicts which section 311 of the 1954 act has caused in amending section 348 of the 1938 act and due to the rigid regulatory authority left in the hands of the Secretary of Agriculture in enforcing the provisions of section 311, I am altogether in accord with the repeal of this restrictive legislation. In supporting the committee bill, H. R. 1573, I agree with the findings of the committee that the marketing quota penalties and the loss of price supports in the case of acreage allotments have proved sufficient deterrents to overproduction of those commodities which are accorded price support in return for this measure of production control by the farmer.

Mr. BERRY. Mr. Chairman, I wish to emphasize my strong support for the provisions of H. R. 1573, which would repeal section 348 of the Agricultural Adjustment Act of 1938. Sometime ago I introduced a bill identical in purpose to H. R. 1573.

Section 348 under existing law is to take effect this year and will deprive farmers of agricultural-conservation program payments if they knowingly exceed acreage allotments for any of the crops under control by the ASC.

For example: In my own State of South Dakota, during 1954, 60 percent of the farmers in the commercial-corn area overplanted their allotment. These same farmers, if they continue their present operation in 1955, will lose their AC payments under the provisions of section 348.

Many South Dakota farmers have contacted me about this matter, and I share their belief that the agricultural-conservation program should not be tied in with the acreage-allotment law. No one would suggest that the original ACP program was inaugurated in order to exercise an unfair control over the farmers of this Nation. It was to the contrary a program aimed at inducing farmers to enrich the fertility of the soil by building up soil resources through engaging in good farming practices.

I do not have to outline for you the significant accomplishments of the ACP program, as we are all familiar with the great value of soil-conservation practices. It is enough to say that the AC program has given our farmers increased incentives to practice soil-conservation methods, and the program has thereby played an important role in maintaining our Nation's economic strength.

It is grossly unfair to deny our American farmers partial reimbursement for cost of their conservation programs because they have not complied with acreage allotments.

The agricultural conservation program should not be used to compel compliance with the programs for price support. If a farmer does not choose to comply with acreage allotments and thereby lose his right to participate in the price-support program, it is not necessary to impose an additional penalty in the form of depriving the farm operator of soil conservation payments.

I know there are many Members of the House who agree with my contention that the provisions of section 348 of the Agricultural Adjustment Act of 1938 would prove to be very detrimental to the American farmer and thereby of great harm to the entire Nation.

I hope that the Congress will recognize the great benefit to be derived from repealing section 348 and making it possible for the farmers of this country to receive Federal cost-sharing payments under the agricultural conservation program even though the operator plants in excess of acreage allotments.

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. KING].

Mr. KING of Pennsylvania. Mr. Chairman, I think this legislation is not a matter of great significance, and I do not oppose this matter strenuously because it will not materially change the overall program. I believe, however, we should understand what we are doing.

First, I would say that the Department of Agriculture approves this in a passive way, because they recognize that the old provision is hardly worth the trouble it makes for them in administration.

The more significant thing in my estimation is the reasoning of the Farm Bureau in opposing this bill. They recognize this as just relaxing the rules, relaxing the restrictions which are inevitably necessary to make any Government price-support program work.

Mr. HOPE. Mr. Chairman, will the gentleman yield?

Mr. KING of Pennsylvania. I yield.

Mr. HOPE. Would it be more equitable to say that what they want to do is to increase the restrictions? That is the position of the Farm Bureau. We have never had these restrictions before; but their position, as I understand, is that they want to impose additional restrictions, and the position of the Department is that they are satisfied with the restrictions we have now.

Mr. KING of Pennsylvania. I do not propose to speak for the Farm Bureau, but it is my opinion that they recognize that any workable price-support program must have rather rigid restrictions on production.

Even the leaders of our committee who favor high supports admit the necessity of regulations which will keep supply in line with demand. Yet, they take every opportunity to weaken the regulations.

After all these years of rigid price supports no reasonable adjustment has been accomplished and the surpluses pile higher and higher.

The legislation as it now stands does tie together two separate programs, the price-support program and the soil-conservation program, both of which are pure subsidies of production. They are responsible for the tremendous surpluses we are now carrying and we are not carrying those surpluses at any small cost. The cost is tremendous.

Last year's amendment was put in simply to say that if a farmer is going to benefit by receiving these subsidies he ought to comply fully with the farm program and cooperate to every extent, even if the programs be separated into separate pieces of legislation. Both are a part of the same old subsidy of production that has gotten us into this mess and because it creates a few hardships and causes the Department administrative troubles, we are now relaxing this restrictive measure.

Mr. COOLEY. Mr. Chairman, will the gentleman yield?

Mr. KING of Pennsylvania. I yield to the gentleman from North Carolina.

Mr. COOLEY. We have only had it in operation during the past year. After having it for 1 year, Mr. McConnell of the Department of Agriculture, I am sure with the consent and approval of the Secretary of Agriculture, Mr. Benson, the Committee on Agriculture, of which the gentleman is a member, advocates the repeal of it. Why should we insist on keeping something in the law which the Administrator, the Secretary of Agriculture, does not want?

Mr. KING of Pennsylvania. Mr. Chairman, I said at the outset that I was not strenuously opposing this bill. I was only trying to explain why the Department is willing to go along with it. I tried to point out the simple implications in what we are doing.

We are doing away with one of the restrictive provisions and insofar as that is accomplished we will make farmers a little freer to go ahead and produce. We speak very solicitously about the soil-conservation program. I am not attempting to argue that at this point, except let me say that the soil-conservation program that you all want to preserve is at least 80 percent subsidy, 80 percent of the $250 million we put into that program every year is a subsidy of production.

Mr. HOPE. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. LAIRD].

Mr. LAIRD. Mr. Chairman, it has been stated here that this particular section has been in operation for 1 year. I think it should be made clear that this particular section has not gone fully into operation as yet, but it will go into operation with this year's ACP program unless immediate action is taken here in the House and in the Senate. It is necessary to get rapid action on this legislation.

I have talked with the Wisconsin State ACP committee in reference to the so-called Holland amendment to the Agricultural Act of 1954. The members of our State committee have stated to me that it will be almost impossible to administer the program in our State if section 348 of the Agricultural Adjustment Act of 1938, as amended, is retained. For that reason I joined with the gentleman from Kansas [Mr. HOPE], in cosponsoring this legislation providing for the repeal of section 348. The repeal of this section is supported by the Secretary of Agriculture and the

Department of Agriculture as well as by your House Agriculture Committee.

Mr. HOPE. Mr. Chairman, I yield such time as he may desire to the gentleman from South Dakota [Mr. LOVRE].

Mr. LOVRE. Mr. Chairman, the purpose of this legislation is to separate two distinct programs which were united in the 1954 Agricultural Act. The two programs involved are the price-support and soil-conservation programs. There is absolutely no correlation between the two programs—one is designed to support prices and the other to encourage good soil and water conservation practices.

Last year, the conferees on the agriculture bill adopted what is known as the Holland amendment, which is nothing else than a penalty provision for the enforcement of the price-support program. The purpose of the amendment was to deny any farmer payment for good soil-conservation practices when he failed to comply with his acreage allotments under the price-support program. This method of jeopardizing one program, which admittedly is universally accepted as sound, to enforce another program, which is more or less controversial, certainly is unfair and unjust in every way and should be repealed. That is the purpose of this legislation.

In my State alone, in 1954 only 40 percent of our farmers complied with their corn-acreage allotments. If this legislation, which we today seek to repeal, had been in effect in 1954, it would have meant that 60 percent of our farmers would have been denied the right to participate in the soil-conservation program.

We all know of the great need for sound soil and water conservation practices in this country. With an ever-increasing population, in the not too distant future, we are going to find that the productive capacity of our farmers is definitely limited because of a shortage of tillable land. We must keep what we have and recover what we can.

By denying farmers partial reimbursement for the costs of their conservation programs, we are hindering a most vital program. I have never been able to see why this provision was in the law, and the first bill I introduced during this session of the Congress was to repeal this section. I hope that this will be done with no undue delay.

Mr. COOLEY. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, here is what the Department had to say about the effect of this section, and I am quoting from Mr. McConnell's testimony where he says that:

> We have observed the effects of it long enough to believe that it has no particular effect in controlling what it was aimed to control, to keep people within their allotments, and we think there are other means which are already in effect. The marketing quotas do that very effectively.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Michigan?

Mr. HOFFMAN of Michigan. Is this an administration measure?

Mr. COOLEY. Well, it is sponsored by the former distinguished chairman of the House Committee on Agriculture.

Mr. HOFFMAN of Michigan. Mr. HOPE?

Mr. COOLEY. Mr. HOPE, and it is approved by Mr. Benson and his colleagues in the Department of Agriculture, and the repeal of it, I might say, is both an administration measure and a nonadministration measure, which has bipartisan support.

Mr. HOFFMAN of Michigan. This is one of the measures where the Democratic Party is supporting the President?

Mr. COOLEY. Well, that may be. You can take it that way if you want to, but section 348 was written into the law in the last Congress.

Mr. HOFFMAN of Michigan. It takes care of cotton and peanuts?

Mr. COOLEY. Popcorn and crackerjacks.

Mr. Chairman, I yield to the gentleman from Tennessee [Mr. BASS].

Mr. BASS of Tennessee. Mr. Chairman, the only reason I rise is this: There has been some controversy about the Farm Bureau opposing this measure. I would like to state that on two different occasions we held public hearings on this bill. The gentleman from Texas [Mr. POAGE] held hearings, and there were no opponents to the bill. He felt that he should circulate the information and give 4 or 5 days for someone to come in and oppose the bill if they felt like that. Five days later we had another hearing, and I feel quite sure that the Farm Bureau is well enough organized that they had information that some 15 bills were introduced in this matter, they knew that public hearings were being held, and I am surprised to find that organization, ordinarily efficient as a legislative sounding board for farm people, would come in on the day this bill is to be voted on the floor of the House and oppose it.

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from Kansas [Mr. AVERY].

Mr. AVERY. Mr. Chairman, I rise in support of H. R. 1573. My colleague the gentleman from Kansas [Mr. HOPE] and I introduced identical bills to repeal the so-called Holland amendment.

I think the substantiating evidence has been pretty well presented here this afternoon, and there are just two basic points I would like to make. There has been considerable talk about the small wheat farmer with 15 acres of wheat being unduly penalized by section 348. In my part of Kansas we are mostly small farmers. I am one of them myself. I am not speculating on what the farmers are thinking, because I am one. I have found that it is the small farmer that is being penalized by section 348. Now, because of the price-support program, your large farmer will naturally stay in compliance; he practically has to, because he is going to freely market his merchandise and commodities. Your small farmer, operating 160 acres or less or a half section, primarily is trying to raise feed for his livestock on his farm and does not offer commodities on the market directly for sale, and he is the man that is being penalized by section 348, the Holland amendment. Therefore I think he should receive some consideration in this repeal this afternoon.

Just one more thing. We have been conscious of soil conservation development for about 30 years. This thinking began to generate back in the twenties. It was in the thirties before it got going, and now in the fifties it is just about approaching the point where it is somewhere near satisfactory to those of us interested in it. Now comes section 348, which, in my opinion, will probably retard soil conservation work by at least 5 years. I urge everyone to support H. R. 1573.

Mr. HOPE. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. KNOX].

Mr. KNOX. Mr. Chairman, H. R. 1573, a bill to repeal section 348 of the Agricultural Adjustment Act of 1938, in my opinion, is in the best interest of the small farmers throughout this entire Nation.

In the district I represent, we have many small farmers who grow from 1 to 15 acres of wheat, not for the market, but for home consumption. I do not believe it was ever the intent of Congress that these people who are operating small farms should ever become penalized because of providing the necessary feed for their poultry or livestock. A vote against this bill would be un-American and a violation of trust which is vested in the Congress. It is very unfortunate that Senator HOLLAND'S amendment prevailed in the Senate a year ago, bringing about this problem of confronting small farmers. Therefore, I heartily endorse the provisions of the bill for the repeal of section 348 whereby the small farmer who has the initiative to provide for himself and his poultry and livestock will not become penalized as he would today should this amendment not be adopted.

Mr. HOPE. Mr. Chairman, we have no further requests for time.

Mr. COOLEY. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That section 348 of the Agricultural Adjustment Act of 1938, as amended, is hereby repealed, effective with respect to 1955 and subsequent crops.

Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. COOPER] having assumed the chair, Mr. MADDEN, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H. R. 1573) to repeal section 348 of the Agricultural Adjustment Act of 1938, pursuant to House Resolution 161, he reported the bill back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

REMOVING INEQUITIES IN SOCIAL-SECURITY PROGRAM

Mr. MARTIN. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. BOSCH] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. BOSCH. Mr. Speaker, the 83d Congress made certain changes in the Social Security Act in accordance with the recommendation of the President of the United States. These changes were modest in their application and coverage.

The basic reasoning behind the social-security program is to see that the people of this country enjoy the benefits from the money which they have contributed into the fund. I am firmly convinced that there is need for further revision of the program in three respects. It is for this reason that I am today reintroducing my bill which will, if adopted, remove what I would consider inequities in this program.

First. It will give more benefits to the needy, those whom we consider at all times. It raises the basic benefit to $75 for beneficiaries and raises the widow and children benefits proportionately.

Second. It will reduce the benefit age from 65 years to 60 years. I believe that a more equitable distribution under the social-security program will take place if the benefit age is reduced to 60 years. It has become increasingly evident that it is almost impossible for anyone over 45 years to obtain employment. Having contributed to the fund they should have the opportunity to enjoy the benefits at 60 years of age.

Third. This bill will also remove the restrictions on outside income and earnings of the beneficiaries as long as they have met all other requirements and are otherwise found qualified to receive social-security benefits under the program. I am firmly convinced that the present restriction on outside earnings, before the age of 72 years, works a hardship on most of those who are recipients of these benefits.

Mr. Speaker, I sincerely trust that these recommendations will receive favorable consideration and action by the Committee on Ways and Means.

SECTION 462, REVENUE ACT OF 1954

Mr. MUMMA. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MUMMA. Mr. Speaker, I was somewhat alarmed last week when the gentleman from New York [Mr. ZELENKO], as recorded on page 2061 of the CONGRESSIONAL RECORD carrying the proceedings of the House of February 24, made the statement that the taxpaying business people of the country were getting a terrific windfall in the matter of tax deductions by reason of the accrual method by which they kept their books.

I was so worried about this matter, because I had never heard of any such provision in the last tax bill in connection with the taxes a corporation had to pay, that I had our accountant check up on this subject. We have been in business 35 years and he has been very successful in his relations with the Internal Revenue Bureau, and rightly so. He said we have been keeping our books on an accrual basis for the last 35 years.

It is true that this deduction, or whatever you may call it, does tend to level out the hills and the valleys in your financial statement. People selling items that require service, such as air conditioners, set up an account against every one of such articles they sell, but sooner or later within the year there is a day of reckoning.

Let me read this letter in which our accountant explains this situation:

PENNSYLVANIA SUPPLY CO.,
Harrisburg, Pa., February 28, 1955

Congressman WALTER M. MUMMA,
House Office Building,
Washington, D. C.

DEAR MR. MUMMA: The following is some dope I got together on the changes that were made by the 1954 Revenue Act that Mr. ZELENKO talked about:

1. Section 462 permits a taxpayer to provide reserves for estimated expenses and to deduct reasonable additions to such reserves in the year in which the expenses are estimated. Estimated expenses of this kind were not permitted prior to the 1954 Revenue Act.

2. Examples of expenses which ordinarily meet the requirements are cash discounts, product warranties, sales returns and allowances, freight allowances, quantity discounts, and vacation pay; an example of this is:

A taxpayer sells air conditioners which he guarantees for 1 year. Taxpayers' experience indicates that the average cost per unit of fulfilling the guaranty is $24. For each unit sold $24 is credited to a reserve account. As the expenses are actually incurred, the reserve shall be charged with the amount of these expenses. In no event will a double deduction be permitted. At the close of each taxable year the reserve shall be adjusted to reflect charges in the actual cost experience of the taxpayer.

3. From Mr. ZELENKO's statements one might be led to believe that a taxpayer could set up reserves for expenses without limitations to evade income tax and that the Government would never collect tax that it would otherwise collect, to the extent of 5 billions (it would be interesting to know how this amount was estimated).

The above reasoning is not true for the following reasons: (a) Only reserves can be set up for expenses which in the opinion of the Commissioner can be estimated with reasonable accuracy; (b) the general purpose of section 462 is to bring tax accounting more closely into harmony with generally accepted accounting principles. It is not intended to permit taxpayers to deduct estimated expenses in any taxable year unless such treatment would be proper for such year under the taxpayer's method of accounting.

The estimated expense must be attributable to the income of the taxable year and part or all of which would be required to be taken into account for a subsequent taxable year. Expenses attributable to income of future years are not expenses for which an addition to a reserve under section 462 is allowable.

Whether a reserve for estimated expenses is reasonable shall be determined in each particular case in the light of the pertinent facts known at the close of the taxable year. In case actual expenses prove to be more or less than those estimated for prior years, the amount of the excess or inadequacy shall be reflected in the determination of a reasonable amount for the current taxable year.

In any case in which a reserve for estimated expenses as of the close of any taxable year is determined to be excessive, such excess shall be taken into account in computing the taxable income for the taxable year for which such determination is made.

I hope this gives you some information that you wanted; and if not, please let me know and we will try again.

Yours truly,

AMOS EBERT.

SPECIAL ORDER GRANTED

Mr. MADDEN asked and was given permission to address the House on Wednesday, March 9, 1955, for 60 minutes, at the conclusion of the legislative program and any special orders heretofore entered.

VIEWS EXPRESSED IN WEEKLY LETTERS, JANUARY AND FEBRUARY 1955

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, I am inserting herewith certain paragraphs that were contained in my weekly letters during the past 60 days. They are as follows:

[From 1,115th weekly letter of January 6, 1955]

C-BOMBS

The first A-bomb was a crude weapon in comparison with later scientific developments, yet it leveled a large industrial city. The H-bomb disintegrated a whole island in the Pacific Ocean. The cobalt bomb, or C-bomb, has been discovered and our scientists have the know-how for its manufacture. It will be the greatest of them all. Two hundred cobalt bombs will be sufficient to make a ball of fire out of the entire earth. It is the weapon of ultimate destruction and presents a great challenge.

WORKWEEK

Were it not for the 40-hour week, we would likely have 12 million unemployed people today. Many people now living can remember the 6-day workweek when it was standard in American industry with 12 hours a day. Technological developments are constantly improving our productivity. Consideration is now being given to a 36-hour workweek to be effective within the next decade, with frequent 3-day weekends a uniform practice.

BOOM AND BUST

The boom-and-bust theory is outmoded. Depressions are either manmade or man-permitted; they can be avoided. A panic every few years, which would permit the fortunate and the privileged to acquire the property and possessions of the less fortunate and poor, should not be tolerated in the future. If well-known policies and practices are pursued by officials working in the public interest, all the people of our country will be

privileged to enjoy reasonable prosperity with accompanying conveniences, comforts, and many of the luxuries of life.

WHY PAY TAXES?

Advertisements are appearing in financial journals with the heading "Why Pay Taxes?" The incomes from all bonds issued by States, cities, and other political subdivisions are not taxable for Federal income or other purposes. A fortunate person with a few million dollars can invest his savings in these tax-exempt securities and make no reports of any kind whatsoever and pay no taxes. There are persistent demands for projects that will cause the issuance of tax-exempt bonds.

In the $25 billion highway program, it is proposed that half the bonds be sold by the States and cities. They would be tax exempt. Would it not be better for the Federal Government to issue all the bonds, which will be taxable, and require the States and cities to reimburse the Federal Government to the extent of 50 percent?

[From 1,116th weekly letter of January 13, 1955]

FARMER'S CONCERN

There is developing growing bipartisan concern about the farm situation among Members of the House. Of immediate concern is the continuing drop in farm incomes. Since 1951, farm income has dropped from $16 billion to a little over $11 billion in 1954. It is expected to decline some more in 1955. Efforts will be made to wipe the Republican farm law off the books and restore the nonsliding 90 percent of parity price supports. Representative COOLEY, of North Carolina, the incoming chairman of the House Agriculture Committee, believes such an effort will get bipartisan support among House Members, and a rigid 90-percent support law will be passed. However, the outlook for approval in the Senate is doubtful at this juncture. Any worsening of the farm picture could change the Senate outlook quickly.

DISTURBING TREND

President Eisenhower has made a fine prediction that we should have a gross national product of $500 billion a year in 10 years. This is a commendable declaration on his part; however, since he came into office, the gross national product has gone down over $14 million on an annual basis. This is disturbing. In order for our country to remain prosperous and afford an adequate opportunity for full employment, our gross national product should go up 3 or 4 percent a year. The trend the last 2 years has definitely been downward.

[From 1,117th weekly letter of January 20, 1955]

SMALL BUSINESS VERSUS MONOPOLY

There are disturbing signs indicating that monopoly and concentration of economic power are increasing. The expansion of monopoly power is at the expense of independent small business. Between 1950 and 1954, the annual rate of mergers has quadrupled. This rate of increase in mergers is as great as the concentration movement that took place between 1924 and 1928 before the great depression.

The growing power of monopoly has made it extremely difficult for small business to prosper and survive, even under conditions of high-level business activity. Thus in 1954, a year which the administration has called one of the most prosperous peacetime years on record, small-business failures were 35 percent larger than they were in 1952.

Federal Trade Commission reports explain also why there has been such a sharp increase in mergers. According to their quarterly financial statistics for all United States manufacturing corporations, the profitability of the small firms has dropped markedly the last 2 years while that of the giants has increased. The after-tax-rate of profit for the smallest-size manufacturing firms fell 60 percent from the first half of 1952 to the first half of 1954. In the same period, the firms with the largest assets increased their profit rate by 6 percent. Under the Democrats in 1952, the profit rate of the small firms was almost on a parity with their large competitors.

PROGRAM NEEDED TO ENCOURAGE FAMILY FARMING

President Eisenhower in his state of the Union address expressed concern over the plight of the low-income farm family. About 1 in every 4 farm operators receives under $1,000 cash income a year. A farm family cannot enjoy an American standard of living at such depressed income levels. I am in favor of a system of income payments limited to family-size farm operations to boost the level of farm family income and promote family-size farming. Such a system could be based on parity supports ranging, for instance, from 100 percent of parity on the first $7,500 of gross farm production up to 70 percent of parity on the last increment of $2,500 of production but not exceeding $15,000 in total production. This would remove some of the criticism against the present price supports whereby the big payments go to the largest farms.

WILL THERE BE A BANKERS' TOLLGATE ON THE NEW HIGHWAY PROGRAM?

The President's message proposing to increase highway spending by $50 billion in the next 10 years will be sent to Congress on January 27. The financing features will undoubtedly reflect the recommendations of the President's Advisory Commission. Of the Commission's 5 members, New York bank representation dominated, with 3 of the members, including the Chairman, having such connections. Gen. Lucius Clay, Commission Chairman, is a director of the Marine Midland Trust Co., of New York. Stephen Bechtel, a member of the Commission, is a director of the J. P. Morgan bank. The third representative of the New York banks on the Commission was S. Sloan Colt, head of the Bankers Trust Co., of New York. This latter bank is regarded as a part of the Morgan group. A fractional one-tenth of 1 percent difference in interest charges on the proposed program could mean millions in profits to the bankers and millions in extra costs to the public. The President's proposals for financing the expanded highway construction should be carefully scrutinized to make sure that the New York banks will not be standing like tollgate keepers on the new highways.

FEDERAL RESERVE AND TREASURY RESPONSIBLE FOR STOCK INFLATION

Our economy has been exposed to a new element of instability as a result of the accelerated inflation of stock prices. The Federal Reserve and the Treasury are to blame. The Federal Reserve cut margin requirements 33 percent in early 1953 to expand margin trading. Brokers' loans went up $300 million in 3 months when legitimate business was starved for credit. In early 1954 I predicted that the tax cut on dividends and accelerated depreciation would increase upper-bracket and business saving. Because of the lack of consumer purchasing power, I warned this would not go into new plant and equipment investment but would be used for speculative purposes, such as bidding up the prices of existing securities. When this became apparent and stock prices began to accelerate in October 1954, why didn't the Federal Reserve move in and stop this inflation? I shall find out whether the fact that the elections were held in the midst of the spiral was responsible for the failure to take early preventive action. I shall also ask whether the fact that speculators, who took their profit in 1955, can wait until April 1956 to pay their capital-gains tax influenced the Board's decision.

PROMISE VERSUS PERFORMANCE

No matter how many Madison Avenue hucksters the White House hires to write its messages, these facts cannot be erased from the record:

1. Nonfarm jobs averaged 1.3 million lower in 1954 than in 1953.

2. Small business failures rose sharply the third year in a row. They totaled 11,220 in 1954, up 35 percent over 1952.

3. Dividend payments are approaching a rate of $10 billion a year, up a billion since 1952. Farm income is approaching a rate of $10 billion a year, down $4 billion since 1952.

[From 1,118th weekly letter of January 27, 1955]

NEW YORK BANK HELPED BY FEDERAL RESERVE MONETARY POLICY

The Guaranty Trust Co. of New York, a leading supporter of the Federal Reserve's hard-money policy in 1953, has warmly praised the Board of Governors for its timely and flexible policies. This bank has just had the happy experience of increasing its 1954 net profits by 23 percent, while its loans to business declined and its gross earnings from bank operations also fell. The Guaranty Trust Co. made over $7 million from the sale of United States Government securities in 1954. No wonder the bank praised the Federal Reserve, for the Reserve's flexible policies made it possible for the Guaranty Trust to buy Government securities cheap in 1953 and sell them at a higher price in 1954.

Profits from the sale of securities were the chief reasons why major New York banks hung up new profits records in 1954, a year of declines in business borrowing and slightly lower average interest rates.

The executor of the new flexible monetary policy is William McChesney Martin, for a number of years the head of the New York Stock Exchange. The architect of the new policy is the Under Secretary of the Treasury, former economic policy adviser to the American Bankers Association and former executive board chairman of the National City Bank of New York, W. Randolph Burgess.

These two Government officials, along with the Secretary of the Treasury, George Humphrey, formerly a director of the National City Bank of Cleveland, are holding their feet on the necks of the farmer, the small business man and the laborer to protect the country from inflation. But the bankers in Wall Street, who are applauding this trio, know whose interests are being protected.

ONE-HUNDRED-AND-ONE-BILLION-DOLLAR HIGHWAY PROGRAM

The President's highway program is going to be carefully scrutinized. Apart from the fact that extreme care should be taken to guard against any unfavorable financing features that the New York bank representatives may have recommended, other considerations are involved. For example, it is set policy as of now that Federal matching-funds are not available for toll-financed State roads. However, the American Automobile Association believes that the new highway program being recommended by the President will practically force the State to build toll roads. The AAA is against toll roads. I am against toll roads. The average toll paid is equivalent to an additional 15 cents a gallon tax on gasoline.

[From 1,119th weekly letter of February 3, 1955]

AGE DISCRIMINATION OVER 30

James P. Mitchell, Secretary of Labor, has warned that half of our population might be jobless in the next 20 years as a result of prejudice against hiring older workers.

According to persons who have studied the trends in employment practices, present trends are against hiring men past 45, and some even refuse to take men over 40. Women past 35, or even younger, are finding hiring practices that rule them out on the grounds of age.

The practice is said to grow out of the employers' desire to keep down their pension liability, which is increased when older workers are taken on.

On the other hand, the ban against hiring workers over 35 or 40 will mean that in a short time a few workers will be supporting a growing load of jobless citizens, either through taxes or by direct contributions.

This problem will have to be solved by means of education, changes in employment policies, and also by making the private pension and welfare program more flexible than they are now.

CREDIT UNIONS FACE ATTACK FROM BIG BANKS

With the growing popularity of low interest cooperative credit unions, many of the big bankers have determined to put a stop to this kind of competition. The big eastern bankers have powerful voices in the Eisenhower administration. It is, therefore, no surprise to see that the President has—unwittingly, perhaps—thrown his full weight on the side of the big banks and against the little people who run their own credit unions. Using the excuse that he wants to protect workers' savings, the President in his economic report proposes a series of measures that will effectively put the credit unions under the control of elements favorable to the big banking interests. The objective of the President's recommendations is to stop the "rapid spread of credit unions, cooperative agencies which provide a means whereby employees of the same firm or members of the same fraternal or similar association can invest their savings in an institution under their own management and from which they can, when the occasion arises, borrow money for personal needs."

[From 1,120th weekly letter of February 10, 1955]

ADULT DELINQUENCY

Alcoholism is 100 times more prevalent than polio, according to Dr. Caradine R. Hooten, executive secretary of the Methodist Board of Temperance. There is a lot of talk about delinquency—most of it concerning juvenile delinquency. From the information available, it appears that the question of adult delinquency should also receive consideration.

Back when Dr. Hooten and I were young boys, we were deskmates for a year at the Hughes Springs Public School. Now he occupies an office adjacent to the United States Capitol Grounds in the magnificent Methodist Buildings in a suite formerly occupied by the famous Bishop Cannon, of Virginia. Our offices are within a stone's throw. Dr. Hooten has become nationally and internationally known and recognized.

EASY CREDIT VERSUS LOWER TAXES

Concern has been voiced about the no-down payment, 30-years-to-pay building boom. People who voice misgivings about the recent increase in mortgage and installment debt feel that the administration could have done the consumer a better service by reducing his taxes last year instead of making it easier for him to get into debt. There is no question, however, but that the need for housing is great, especially among young veterans. Liberalizing terms has opened the way for mass production and mass merchandising of housing, which should result in a bigger and better quality house for the middle and lower income families.

ROSY PICTURE CLOUDED BY DARK SPOTS

Looking at the stock market and the overall picture of jobs and sales, there is plenty of prosperity around us. Furthermore, if we pursue the right economic policies, there is no reason why we can't have an expanding economy with decent jobs and rising living standards for all. But the danger is that we are going to try to sweep some of the unpleasant facts under the rug and sort of hope they will stay out of sight. This is what the President has apparently done in his economic report. The fact that this is a postwar low for the income shares of farmers and small-business proprietors is given a line in some obscure section of the report. The plight of the depressed belt of high-level unemployment running down the Appalachian Range from Maine down through Alabama is treated only scantily. Here we have depressed coal mining and textile towns, not to count the depressed farm equipment area of the Quad Cities in the Midwest and also excluding the serious unemployment in Oregon. Yet, very little is offered in the way of relief for these people in the President's economic report. Pools of unemployment do not remain isolated. Unless they are mopped up, they seep out and cover the neighbor's floor.

ANOTHER REVERSAL ON MONETARY POLICY

Secretary of the Treasury Humphrey has taken off on the second leg of his campaign to restore the high interest rates of the 1920's. Issuance of the recent 40-year, 3-percent bond finds the Treasury another step closer to its goal of restoring a 4-percent rate on United States Government bonds. This was the rate under the Republicans back in the early 1920's. The last long-term bond approaching this maturity was the 50-year, Panama Canal Zone, 3-percent bond issued 44 years ago. In other words, Secretary Humphrey is paying 3 percent for 40-year money today when savings are much more plentiful, compared with the 3 percent that was paid for 50-year money nearly a century ago when savings were scarcer.

A panel of monetary and fiscal experts appearing before the Joint Economic Committee did not feel there was any inflationary danger, nor was there any urgent need for putting out such a long-term bond at this time.

An official of one of the big Government bond houses has called the "flexible" monetary policies a financial roller coaster.

NATIONAL DEBT

For 20 years, the Republicans claimed that the Democrats were spendthrifts who were driving the country down the road to national bankruptcy. Republican campaign pledges have always contained promises to reduce the national debt and balance the budget. I have looked at the President's 1956 budget, and this is what it shows. From fiscal 1953 to fiscal 1956, total budget deficits come to $19.4 billion. The President has asked to have the statutory debt ceiling raised permanently.

[From 1,121st weekly letter of February 17, 1955]

OUTLOOK

Despite much rosy optimism in year-end forecasts, it is becoming evident that our economy is vulnerable to a setback in a number of places. I am not a prophet of gloom and doom, but I do believe that action is a better safeguard against serious trouble than just preaching confidence. We should be watching the auto- and home-building picture very closely.

THE MONEY MANAGERS ARE PUNISHING INNOCENT PEOPLE

Testimony before the Joint Economic Committee on the President's Economic Report by a panel of monetary economists brought out several interesting facts. First was the disavowal of the Treasury-Federal Reserve myth that they do not determine the interest rates and prices of Government securities. Second, it was stated that in the last 2 years basic economic forces had little to do with the determination of all interest rates. They were determined by the Federal Reserve and Treasury officials. Finally, one witness, Professor Wood of the University of Missouri, said that the Eisenhower monetary policy was punishing innocent people with unemployment for the misdeeds of the monopolies. He predicted that the people will sooner or later demand that the money managers stop this inequitable and inhumane practice.

LESSONS FROM EXPERIENCE AND GUIDES TO THE FUTURE

Under this heading, the President's Economic Report notes that "monetary policy can be a powerful instrument of economic recovery, so long as the confidence of consumers and businessmen in the future remains high." I agree that confidence in the future is the key ingredient for the success of any economic policy. That is why I have opposed as vigorously as I know how the so-called flexible monetary policy and flexible price-support policy. The flexible monetary policy is upsetting to businessmen, to consumers, to home builders and home buyers, and to holders of Government bonds. Under such a policy, it is impossible to build confidence in the future. There is no assurance that the marketable bonds you buy today at 100 will not drop to 96 or lower within a few months. Interest rates fluctuate, upsetting business calculations. Mortgage money tends to dry up at the least sign that credit may be tightened. Planning is difficult under these circumstances. The same is true under the flexible price-support program. I say give a farmer a fair price that he can depend on, and he will go out and produce and earn a living for himself and his family. In that way, we will build confidence for the future. Par support of Government bond prices will assure an ample credit supply at low interests rates at all times, thereby eliminating uncertainty and building confidence for the future. Firm support of farm prices, at least 90 percent of parity, will build the farmer's confidence in his future.

HOUSING FOR THE AGED

The Honorable BARRATT O'HARA, of Illinois, is sponsoring a bill setting up a Federal program of low-rent public-housing units for the aged. It is pointed out that our national housing program has, so far, failed to make provision for this deserving group. Retired people represent a large part of the market for consumer goods. They are very important in our economy. A grateful Government must adequately provide for them. The States of New York and Massachusetts have set up modest State programs.

PLIGHT OF SMALL BUSINESS AND FARMERS

The administration is taking a callous approach to the real squeeze that exists for millions of our low-income farm families and for the millions of independent businessmen. Their income shares have reached a postwar low. In large part, their position reflects the abandonment by the Eisenhower administration of the full-employment philosophy in favor of protecting the integrity of the lenders' dollar. When the economy stops growing as fast as it should, the weaker groups soon become victims of the strong. This is what has been happening in this country the last 2 years.

[From 1,122d weekly letter of February 24, 1955]

UNFAIR TAXATION

A terrific campaign is being carried on concerning the matter of Federal income taxes on cooperatives and corporations. I doubt that any country on earth has ever had or ever will have a system of taxation that metes out exact justice in every instance. We certainly do not want injustices or inequalities, but oftentimes in adjusting one, we create a dozen more.

COOPERATIVES

It is the desire of Congress to make taxes just as equal and uniform as it is possible to make them and is now considering these questions. There are four principal ways of doing business: (1) as an individual—although he operates under a trade name, he pays taxes as an individual and does not pay Federal income taxes under the trade name; (2) a partnership—earnings of the partnership are divided; the partnership pays no Federal income tax, as such, but the partners pay on what they receive; (3) cooperatives, as such, pay every other kind of tax from the lowest to the highest level, but do not pay a Federal income tax; the members occupy the position of a partnership and pay on the profits that they receive; (4) a corporation—it pays all taxes like a cooperative and a Federal income tax, since it occupies the position under our Constitution as a person and is entitled to all the rights and privileges of a person; when the earnings are distributed by the corporation, the shareholders pay on what they receive in the way of profits.

The Government makes no effort to compel a person or group of persons to operate a certain way; they are privileged to operate either way they choose. They can select the form of business that they desire to the extent of changing from a corporation to a cooperative or to a partnership, if they believe it will help them taxwise. For instance, the largest brokerage house in the United States, Merrill, Lynch, Pierce, Fenner & Beane, is a partnership. In the year 1954, their published report disclosed a $20 million net profit. This partnership will not pay taxes on the net profit, but the 107 partners will pay Federal income taxes on the part they receive. The Railway Express Co. is a cooperative. It is owned by 80 railroads. The Associated Press, the greatest of the national news-gathering agencies, is a cooperative. Mutual investment funds aggregating over $8 billion dealing in stocks and bonds occupy a cooperative status for income tax purposes. Some corporations have changed their status to that of cooperative, believing they will have some tax advantage that way. There is nothing to prevent this being done and it is strictly a matter up to the individuals concerned. Other corporations, after considering the matter, have declined to convert into cooperatives because, after evaluating the matter, they have decided that the advantages of a corporation far outweigh the tax advantges of a cooperative and there are too many disadvantages in a cooperative, which they do not have as a corporation.

The fight in Congress in recent years has been double taxation. Many people seriously contend that it is double taxation to tax a corporation and also tax the shareholders. Congress has made a substantial step in the direction of relieving this burden by exempting the first $100 received by a taxpayer in dividends from the corporations.

There is one particular tax evasion that is devastating to independent and small businesses throughout the Nation. A national chain can permit one of its units to sell goods at a loss until the small business is destroyed. It does not mean too much to the national chain because, at the end of the year, it secures a deduction on the loss for Federal income tax purposes; the national chain indirectly receives a premium or bonus from the Government for destroying a small-business man. It is going on every day throughout the Nation. Efforts to stop it have been persistent over the years, but sufficient attention has not been gained in the Congress to assure success.

[From 1,123d weekly letter of March 3, 1955]

INTEREST RATES GOING UP

Interest rates are rising. The long-term, 2½ percent Victory bonds fell below 96.5 in the week ending February 26. These bonds were at par after the debacle of the spring of 1953. In 1953, these long-terms dropped below 94 in early April. As the Federal Reserve refused to support them, they continued to fall. Even after small-scale purchasing was started by the Federal Reserve, they fell; and finally on June 1, 1953, they touched 89. The Federal Reserve is again refusing to protect these bonds, although it could be done without any cost to the Government or to the Federal Reserve banks. Knowledge that the 12 powerful men, who run the Open Market Committee, will not intervene will enable the speculators to drive the price of these bonds down as far as they want. They will buy them back cheap and wait for a new rise to sell.

SCHOOL BILL FRAMED BY INVESTMENT BANKERS?

Hearings are being held on the President's school-financing proposal. The opposition to this bill is widespread. The intricate and complicated financing provisions and the establishment of a so-called "reasonable interest rate" yardstick at the high rate of 3⅛ percent on tax-exempt bonds has called the attention of many to what I have said for a long time, namely, that the money, credit, and debt-management programs of the administration have been conceived and executed by and for the banking and investment groups. On this point, I was happy to note that Senator PAUL DOUGLAS, Democrat, of Illinois, a member of the Senate Labor Committee considering the bill, said that the testimony indicated the administration bill appeared to have been "primarily drafted by investment bankers" and that its result would be to run the neediest school districts "more heavily into debt."

Indications are that we may be returning to my idea that 2.5 percent is the maximum rate the Government should pay for its bonds. Senator ALEXANDER SMITH, the Republican Senator from New Jersey and a former chairman of the Senate Labor Committee, has suggested a lower rate at which the Federal Government could buy school-construction bonds. He said a good rate might be 2.5 percent rather than the 3⅛ percent now included in the proposal. If school districts can sell their bonds to the Federal Government at 2.5 percent, there would be no good reason why the Federal Government should pay more when it offers to sell its own bonds. There are $40-billion of tax-exempt bonds outstanding now. Federal bonds that are taxable should be issued instead of school district or State bonds that are exempt from income taxes.

VETERANS, JOBS, AND HOUSING

We have been told that about 300,000 members of the armed services may be entering the civilian labor force this year. In addition to the normal additions to the labor force, this means we will have to have a million new jobs. If we don't, unemployment will increase. The economy has to expand faster than it has been to provide these veterans with the jobs they should have if they want them and are willing to work. Therefore, I think the administration should begin to seriously plan for a more rapid expansion than we are now getting. More consumer purchasing power is needed. It will mean more income for the businessman and better prices for the farmer. This will lead to a demand for still more goods and more investment. Investment means jobs. In this way, boosting consumer purchasing power will provide jobs for our returning veterans.

Our veterans need housing too. Yet there is a widespread propaganda campaign that the GI home loan terms are too liberal. As a result, there are signs of tightening up of mortgage money already. This may be used as an excuse for raising interest rates again and perhaps to increase down payments. These actions will make it more expensive for a veteran to obtain decent shelter and reduce the level of home building. I believe that this country can expand and absorb much more housing than is now being provided. The present terms are making it possible, for the first time, for many of our young married couples to afford a home instead of renting. We should encourage, not discourage, home ownership for our veterans.

WHAT CHANCE DOES SMALL BUSINESS HAVE?

One witness before the Joint Economic Committee, T. K. Quinn, former vice president of General Electric Corp., told us, "There are today 68 private billionaire corporations in the country. As few as 200 industrial giants own outright the most important half of American industry."

JUVENILE DELINQUENCY IN PRINCE GEORGES COUNTY

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Michigan [Mr. HOFFMAN] is recognized for 10 minutes.

Mr. HOFFMAN of Michigan. Mr. Speaker, a committee of the other body for a long, long time has been conducting hearings upon the subject of juvenile delinquency endeavoring to ascertain the courses thereof and a possible remedy.

In this noon's Washington Daily News, page 52, there is an item which may be of interest to those who are interested in that very important subject. It states that—

Prince Georges police today put a thick file in a drawer and marked it "closed." A 9-month investigation of a teenage "gang-war" battle which sent one youth to the hospital and left 4 razor scars on another.

The news story continues as follows:

Nine youths known to be present at the "rumble" testified yesterday in Hyattsville police court.

IDENTITY UNKNOWN

None of them, including the 2 who were injured, could identify the ones who clambered into one teenager's car, beat him to insensibility, and left another bleeding from cuts on both arms.

After the hearing, Deputy State's Attorney Ernest N. Cory recommended that assault with intent to kill charges against two 17-year-old District boys be dropped.

"This was done more as somebody's idea of sport rather than with any malice," he said.

Why should a prosecuting officer make that kind of comment when a group of high-school students and other youth are interested? What was he trying to do?

Having already stated that the beating and the carving was done more as somebody's idea of sport rather than with any malice, this prosecuting officer added the following:

When I was a kid there was a gang here known as the swamp rats and another as the hilltoppers. I was a swamp rat. We used to have fights with the hilltoppers all the time.

Doubtless millions of our citizens have heard the story of George Washington and the cherry tree. The statement attributed to him, true or false, "Father, I cannot tell a lie," beyond question has influenced many to be truthful.

The youths of today as well as we older folks get plenty of propaganda, the trend of which is not helpful toward a better life. Many young people and some older ones, reading or hearing

statements made by public officials, especially those charged with the enforcement of the law, are sometimes unduly influenced to follow a course or join in activities which do not tend toward good citizenship.

Fighting between rival gangs certainly does not contribute toward good citizenship and why a public prosecuting officer should publicly, at least by inference if not directly, condone that kind of vicious, illegal action—think of the razor—is an attitude which I cannot understand. Can you?

I cannot believe that Mr. Cory, if he has children, would suggest that his boys or girls join a gang and follow in their father's footsteps by engaging in gang fighting. Surely, Mr. Cory would temper his remarks by suggesting that the boys and girls leave their razors at home while engaging in that sport.

NATURAL GAS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Arkansas [Mr. HARRIS] is recognized for 10 minutes.

Mr. HARRIS. Mr. Speaker, I am today introducing a bill which would make it clear that the independent producers and gatherers of natural gas and the sales thereof to interstate pipeline companies shall not be subject to the control and jurisdiction of the Federal Government.

On the other hand, it assures protection for the consumer by providing that when an increase in any rate or charge of a natural-gas company is based upon any new or renegotiated contract for the purchase of natural gas the Commission will be required to consider and thus determine if the price for such natural gas is the reasonable market price in the field where it is produced.

In other words, Mr. Speaker, this bill has a dual purpose: First, to relieve the burden and the onus of independent producers and gatherers of natural gas and their sales in the field where they are highly competitive of control and regulation of the Federal Government; and, second, to protect the consumers from unreasonable rates and charges. It would prohibit any "gigging" of the consumer.

The provision of this proposed bill is in line with and carries out the recommendations of the Advisory Committee on Energy Supplies and Resources Policy, established by the President last year, as announced in its report made public last Saturday, February 26.

The Committee, generally known as the President's Fuel Policy Committee, said that—

> The Federal Government should not control the production, gathering, processing, or sale of natural gas prior to its entry into an interstate transmission line.

The President's Committee further recommends that the consumer should be protected by the Federal Power Commission when applications for an increase in rates and charges are made by an interstate natural-gas company based on any new or renegotiated contract for the purchase price of natural gas.

In other words, the President's Fuel Policy Committee would make it clear that the interstate transmission of natural gas by the interstate transmission lines, and the subsequent sale of such gas for resale, is a public utility function and should be under the regulations of the Federal Power Commission.

These and other recommendations made by the Policy Committee are consistent with the principles and policies which have made this the greatest country in the history of mankind.

I have prepared this bill to carry out these recommendations.

It would extricate the concern, confusion, and consternation which now exist.

This, Mr. Speaker, is the culmination of a long-drawn out fight that resulted in the decision of the United States Supreme Court in June of last year, in the Phillips Petroleum Co. case.

In that case, the Supreme Court completely nullified and reversed the policy, which had been consistently adhered to for 15 years and regarded during all of that time as the law of the land, by holding that the Federal Power Commission had unqualified jurisdiction over the production and gathering of natural gas and the sales thereof by an independent producer to an interstate pipeline company.

The majority opinion of the Court stated that—

> We believe that the legislative history indicates a congressional intent to give the Commission jurisdiction over the rates of all wholesales of natural gas in interstate commerce, whether by a pipeline company or not and whether occurring before, during, or after transmission by an interstate pipeline company.

This rather strange interpretation of the plain language of the Natural Gas Act of 1938, makes it imperative that Congress clarify this problem by positive legislation.

Under this interpretation, the Supreme Court of the United States has by one stroke made every gas producer in the United States, more than 4,000 of them, a public utility, whether it is a big or little producer, an integrated company, or an individual independent wildcatter.

If this policy by such an interpretation of the Court is allowed to stand, it will destroy future exploration and discoveries of natural gas and thereby ultimately deprive the consumers of an adequate supply of this important fuel.

Therefore, Mr. Speaker, this proposed bill to amend the Natural Gas Act recognizes that the production and gathering of natural gas and the sale thereof, in or near the field where it is produced, is a local and highly competitive risk-taking enterprise, and should not be subject to Federal price-fixing utility regulations.

It would make it clear and definite that the more than 4,000 independent producers and gatherers of natural gas are not utilities and, consequently, should not be treated as such.

It provides assurances for protection of the consumer by establishing an equitable criteria for a determination as to the reasonable market price of natural gas in a field should an interstate natural-gas company on such basis ask for increased rates.

Furthermore, it would provide equity and justice of a natural-gas company who produces a part or all of its gas or purchases from an affiliate by permitting a reasonable market price therefor in the field where produced.

Finally, it would establish additional criteria with reference to an application for a certificate of a natural-gas company in further protection of the consumer. A certificate should be granted only in the event the price to be paid for the natural gas is not greater than the reasonable market price in that area.

Under these proposals and safeguards, our fundamental objective for a sound program to stabilize and obtain the greatest possible results by this industry could be accomplished in efforts to serve the American public.

They would offer the greatest possible encouragement and hope for the future. It would strengthen our national security, provide for our national defense, and give assurance of an adequate supply of natural gas in a time of rapidly growing demands. At the same time it would guarantee the consumer continued low prices which have been maintained through free, competitive practices in the face of constantly increased cost of other commodities.

This is not necessarily a Republican proposal. It is not necessarily a Democratic proposal. It is the American way under long-established American tradition.

I am deeply impressed and, indeed, highly pleased over this joint effort to bring about this important and imperative amendatory legislation.

I am hopeful and fully expect that hearings will be held on this proposed legislation by our committee in the very near future.

Mr. PRIEST. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to my distinguished chairman.

Mr. PRIEST. I appreciate very much the statement the gentleman has made. As chairman of the committee, I can assure the gentleman that while no date has been set for holding hearings, the committee will hold hearings within a reasonable time.

I would like to ask the gentleman this question: Regardless of whatever Congress eventually decides to do, I am sure the gentleman shares my opinion that following the opinion by the Supreme Court last year the Congress must take some action in this field.

Mr. HARRIS. Yes. I think it is highly imperative.

Mr. HESELTON. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. HESELTON. I have listened to the gentleman's very able presentation. I received the impression that this was not only a consumer bill but a nonpartisan bill. Am I right?

Mr. HARRIS. That is correct. I hope the gentleman will join us in getting it reported out of the committee and approved by the House.

Mr. BEAMER. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. BEAMER. I wish to join the gentleman in his feeling about this legislation that it affords State control instead of being forced to go to the Federal Government.

Mr. HARRIS. I thank the gentleman.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. HOFFMAN of Michigan. It was my understanding that you made the statement that the consumer, under this legislation, would be protected. Just how will that be brought about?

Mr. HARRIS. By providing authority for the Federal Power Commission, as the regulatory agency of the Federal Government. If and when an interstate natural gas company makes application for increased rates and charges on the basis of additional or higher cost of the natural gas in the field, the Commission shall determine whether or not it is a reasonable price in the field where it is produced. If it is unreasonable, then the application for the increased cost would not be allowed by the Commission.

Mr. HOFFMAN of Michigan. Then ultimately the Federal Government will have indirect control of the price.

Mr. HARRIS. Yes, that is true. If prices are out of line they would have, should the company ask for an increase. Otherwise they would not have.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. GROSS. What criteria are used in determining what is an independent producer of natural gas?

Mr. HARRIS. An independent producer is one who is engaged only in the production and gathering of natural gas and sells at arm's length or competitively to the transmission lines for resale.

Mr. BEAMER. Mr. Speaker, will the gentleman yield further?

Mr. HARRIS. I yield.

Mr. BEAMER. Is it not true that under this measure you are eliminating dual control by Federal and State governments?

Mr. HARRIS. Yes. As the President's committee, when it reported last Saturday, stated, the interstate transmission field in this industry would be controlled by the Federal Government, the distributing end of it by the States, as we provided by enabling legislation in the last Congress, and the production and gathering and sale by independent producers by States where it is produced, gathered, and sold.

Mr. ROGERS of Colorado. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield.

Mr. ROGERS of Colorado. Do I understand the gentleman's statement to be that the Federal Power Commission first ruled that they did not have jurisdiction of this matter?

Mr. HARRIS. Throughout the history of the act the Federal Power Commission has consistently adhered to the policy that they did not, under the act, have jurisdiction over this phase of the industry.

Mr. ROGERS of Colorado. And the Supreme Court ruled that they did have?

Mr. HARRIS. The Supreme Court did rule that, as I just explained, in the decision of June 7 last year.

Mr. ROGERS of Colorado. Prior to the time the Supreme Court rendered that decision, have you any facts and figures to indicate how the consumer was protected during that period?

Mr. HARRIS. Yes. There are many facts and figures which we will develop during the course of the hearings.

Mr. ROGERS of Colorado. I want to point out that in my State an interstate gas supply line was supplying gas to the city and county of Denver, and a company there, and they made application to our public utilities commission for an increased rate, based upon the theory that they had to pay the interstate line a much larger price for the gas.

Mr. HARRIS. But was it based on the increased cost or purchase price of gas in the field? That is the point.

Mr. ROGERS of Colorado. The question is, That the interstate system apparently was free to charge anything they wanted to.

Mr. HARRIS. No, no; they never have been. The Federal Power Commission has that authority and has had it since the act of 1938, and is strengthened in that authority by this piece of legislation.

Mr. ROGERS of Colorado. Then what did the Phillips decision do in this case?

Mr. HARRIS. It made a utility out of more than 4,000 independent producers of natural gas in this country.

Mr. ROGERS of Colorado. But before then did not the Federal Power Commission have complete control of it?

Mr. HARRIS. No; and never did attempt to take control of them.

Mr. ROGERS of Colorado. Then what would keep any interstate gas company from charging anything they wanted to under the present law?

Mr. HARRIS. The Federal Power Commission has control over rates and charges of the Natural Gas Co. to the distribution company for sale.

Mr. ROGERS of Colorado. The gentleman means the Federal Power Commission has charge of it prior to the Supreme Court decision?

Mr. HARRIS. And they still have charge of it.

Mr. ROGERS of Colorado. And if they still have charge of it why the necessity for this legislation?

Mr. HARRIS. To clear up or extricate the jurisdiction given by the Supreme Court to the Federal Power Commission over the producing and gathering and sale of natural gas to the interstate transmission companies. Those prices are arrived at competitively in the usual enterprise system.

Mr. ROGERS of Colorado. In other words, you do not want the Federal Power Commission which now regulates interstate gas transportation to regulate the producers?

Mr. HARRIS. That is right. Independent producers that sell at arms length.

Mr. ROGERS of Colorado. You do not want them to have any regulation of any producing field.

Mr. HARRIS. They never have had, and the country has developed pretty fast under this procedure.

Mr. ROGERS of Colorado. I thank the gentleman.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that I may proceed for 2 additional minutes to make an announcement on an additional subject.

The SPEAKER pro tempore (Mr. COOPER). Is there objection to the request of the gentleman from Arkansas?

There was no objection.

A COMMON SYSTEM OF AIR NAVIGATION, TRAFFIC CONTROL, AND LANDING AIDS

Mr. HARRIS. Mr. Speaker, I want to make an announcement and call to the attention of the House a serious problem which I believe to be of great importance.

The Interstate and Foreign Commerce Committee of the House has for many years fostered the development in this country of a common system of air navigation, traffic control, and landing aids. Your committee has regarded this objective as in the national interest, because it eliminates duplication of facilities as well as duplication of expenditures, and promotes efficiency in the movement throughout the country of military and civil air traffic.

Facts have come to our attention recently which indicate that there may be developing a conflict between civil and military navigation systems. The present system, which was expected to accommodate the needs of both civil and military operations, is known as VOR/DME. This is a static-free, short-range, navigation system. This very high frequency omnirange and distance measuring equipment gives both bearing and distance to the pilot. It appears that during several years past the military agencies have been developing the TACAN system which, for military purposes, holds certain advantages over the present one, and which incorporates, for defense reasons, certain important military features. This system supplies information similar to that supplied by VOR/DME. It is understood that the newly developed TACAN system and the present VOR/DME cannot coexist if both are fully implemented.

Thus, the issue presents itself as to the course of action which should be followed in maintaining air navigation facilities in the future, which are common to both civil and military users. The satisfactory development of such a short-range system of navigation is essential to the defense of the country, as well as to the economic growth of civil aviation, both commercial and private. In addition to the problem of technical compatibility, there is also a very important consideration of economy. The support of two major systems of navigation in the United States would impose a heavy and unnecessary burden on the public.

In view of your committee's constant interest in the maintenance of a common system of air navigation facilities, it is essential that we learn all of the facts concerning this developing conflict, for the purpose of informing the House on

this important subject and recommending a policy to be followed for the future. Therefore, our committee will immediately start the necessary inquiries, under its standing authority to investigate the problems of civil aviation.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Iowa.

Mr. GROSS. I understand the committee is going to start hearings on this proposal to scrap Omnirange, is that right?

Mr. HARRIS. As I have just advised, apparently there is a conflict developing between these two systems. It is the intention of the committee to make inquiry into this conflict.

Mr. GROSS. I want to commend the gentleman for his statement and say that I hope the committee will go into this thing thoroughly.

Mr. HARRIS. I thank the gentleman. The committee intends to do so.

Mr. PATTERSON. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Connecticut.

Mr. PATTERSON. I wonder how this system will tie in with the foreign systems that are now being used commercially? For instance, I have in mind a plane taking off from LaGuardia or Idlewild and going to Italy. Is there any conflict there?

Mr. HARRIS. Apparently not, but we are going to inquire into it. I think I can say that some of these types of operations are going into foreign countries.

Mr. PATTERSON. Will the foreign countries have the equipment to use under the system that the gentleman is recommending?

Mr. HARRIS. I am not now recommending any system. We will look into it and find out.

Mr. GROSS. If they get it we will give it to them probably.

Mr. PRIEST. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Tennessee.

Mr. PRIEST. I think the gentleman from Arkansas has answered the question that the gentleman from Iowa [Mr. GROSS] asked about the situation, which is about all I have in mind.

Mr. MACK of Illinois. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Illinois.

Mr. MACK of Illinois. I would like to commend the gentleman for calling this matter to the attention of the House. I am satisfied that it will be impossible to operate a dual system of air navigation in our country. I think they have taken initial steps to inaugurate such a program and I believe it is highly important that our committee investigate this matter and make a detailed study of these two proposals.

Mr. HARRIS. I want to thank the gentleman, a member of the committee. I am highly delighted, and I am sure every Member of this House will be pleased, that he is a member of the committee which will go into this very important matter. He is recognized as one of the outstanding authorities on this subject.

Mr. PRIEST. I think it might be well to point out to the House at this point in the RECORD that some of this is classified information. It will have to be dealt with as classified on an operational level, but otherwise it is not classified.

Mr. HARRIS. The gentleman is correct. As a matter of fact, most of it is classified, and for that reason I may have appeared to be somewhat evasive in answering my friend from Iowa and my friend from Connecticut a moment ago. But we do intend to go thoroughly into all phases of it.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. GORDON, for 10 days, on account of official business.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. ABBITT and to include extraneous matter.

Mr. ROBERTS.

Mr. HOFFMAN of Illinois (at the request of Mr. MCVEY).

Mr. HOSMER and to include extraneous matter.

Mr. KNOX and to include a newspaper clipping.

Mr. PATMAN to extend his remarks in the RECORD following the day's proceedings and to include certain excerpts.

Mr. SIMPSON of Illinois and to include an article.

Mr. ANFUSO (at the request of Mr. MCCORMACK) and to include extraneous matter.

Mr. RODINO (at the request of Mr. MCCORMACK) and to include extraneous matter.

Mr. ENGLE and to include extraneous matter.

Mr. FOGARTY and to include a newspaper article.

Mr. EVINS.

Mr. VAN ZANDT and to include extraneous material.

Mr. BERRY in two instances, and to include in one a tabulation.

ADJOURNMENT

Mr. BOWLER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 9 minutes p. m.) the House adjourned until tomorrow, Thursday, March 3, 1955, at 12 o'clock noon.

EXECUTIVES COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications, were taken from the Speaker's table and referred as follows:

490. A letter from the Acting Secretary of Agriculture, transmitting a report on the study of various two-price systems of price support and marketing which could be made applicable to rice, pursuant to section 315, Public Law 690, 83d Congress; (H. Doc. No. 100); to the Committee on Agriculture and ordered to be printed with illustrations.

491. A letter from the Postmaster General, transmitting a draft of proposed legislation entitled "A bill for the relief of Theodore J. Harris"; to the Committee on the Judiciary.

492. A letter from the Administrator, Federal Civil Defense Administration, transmitting a draft of proposed legislation entitled "A bill to amend further the Federal Property and Administrative Services Act of 1949, as amended, to authorize the disposal of surplus property for civil defense purposes"; to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees, were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LONG: Joint Committee on the Disposition of Executive Papers. House Report No. 84. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. BONNER: Committee on Merchant Marine and Fisheries. H. R. 249. A bill relating to the regulation of nets in Alaska waters; with amendment (Rept. No. 85). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALBERT:

H. R. 4552. A bill to authorize the construction of a highway crossing over Lake Texoma, Red River, Tex., and Okla.; to the Committee on Public Works.

H. R. 4553. A bill to prohibit the disposal of certain surplus real property; to the Committee on Public Works.

By Mr. AYRES:

H. R. 4554. A bill to incorporate the Army and Navy Union of the United States of America; to the Committee on the Judiciary.

By Mr. BENTLEY:

H. R. 4555. A bill to amend the Railroad Retirement Act of 1937 to provide that survivors of certain deceased employees who had 30 years' service or more at the time of their deaths shall be entitled to survivor's benefits under that act; to the Committee on Interstate and Foreign Commerce.

By Mr. BOSCH:

H. R. 4556. A bill to amend the Social Security Act to increase the minimum benefits payable thereunder, to lower from 65 to 60 the age at which such benefits become payable, and to provide that deductions on account of outside earnings shall not be made in the case of beneficiaries 60 years of age or older; to the Committee on Ways and Means.

By Mr. CELLER:

H. R. 4557. A bill to amend the postal service laws relating to publication of attachments; to the Committee on the Judiciary.

H. R. 4553. A bill to amend section 11 of the Administrative Procedure Act; to the Committee on the Judiciary.

H. R. 4559. A bill to amend section 1784 of title 28, United States Code, relating to publication of notice; to the Committee on the Judiciary.

By Mr. HARRIS:

H. R. 4560. A bill to amend the Natural Gas Act, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. CELLER:

H. R. 4561. A bill to amend section 28 of the Bankruptcy Act of 1938 relating to designation of newspapers; to the Committee on the Judiciary.

By Mr. DORN of South Carolina:

H. R. 4562. A bill to amend Veterans Regulation No. 9 (a) to provide for payment of not in excess of $75 to cover the cost of acquisition of a burial site for certain deceased veterans, and for other purposes; to the Committee on Veterans' Affairs.

H. R. 4563. A bill to amend Veterans Regulation No. 1 (a) to provide that the Administrator of Veterans' Affairs may fix special compensation rates for certain seriously disabled veterans; to the Committee on Veterans' Affairs.

By Mr. ELLIOTT:

H. R. 4564. A bill to provide for a Veterans' Administration general, medical, and surgical hospital of 500 beds at Russellville, Ala.; to the Committee on Veterans' Affairs.

By Mr. FOGARTY:

H. R. 4565. A bill to amend the Labor Management Relations Act, 1947, and for other purposes; to the Committee on Education and Labor.

H. R. 4566. A bill to amend the Davis-Bacon Act, and for other purposes; to the Committee on Education and Labor.

By Mr. FORD:

H. R. 4567. A bill to prohibit sales from vending machines of postage stamps accompanied by matter bearing or containing advertising; to the Committee on the Judiciary.

By Mr. FRELINGHUYSEN:

H. R. 4568. A bill to amend the Internal Revenue Code of 1954 to provide a 30-percent credit against the individual income tax for amounts paid as tuition or fees to certain public and private institutions of higher education; to the Committee on Ways and Means.

By Mr. GUBSER:

H. R. 4569. A bill to provide for renewal of and adjustment of compensation under contracts for carrying mail on water routes; to the Committee on Post Office and Civil Service.

By Mr. HENDERSON:

H. R. 4570. A bill to amend the Agricultural Adjustment Act of 1938 to exempt certain wheat producers from liability under the act where all the wheat crop is fed or used for seed on the farm, and for other purposes; to the Committee on Agriculture.

By Mr. HILL:

H. R. 4571. A bill to authorize the Secretary of Agriculture to continue to make certain emergency loans and to provide an improved emergency credit source for farmers and stockmen; to the Committee on Agriculture.

By Mr. JOHNSON of Wisconsin:

H. R. 4572. A bill to amend the Rural Electrification Act of 1936 so as to provide greater flexibility in making rural-electrification loans, by eliminating the requirement that half of the funds for such loans be allotted among the States, and removing the limit on the amount of unallotted funds which may be loaned in any State or in the Territories; to the Committee on Agriculture.

By Mr. KILGORE:

H. R. 4573. A bill authorizing Gus A. Guerra, his heirs, legal representatives, and assigns, to construct, maintain, and operate a toll bridge across the Rio Grande, at or near Rio Grande City, Tex.; to the Committee on Foreign Affairs.

By Mr. KING of California:

H. R. 4574. A bill to extend the Federal old-age and survivors insurance system to individuals engaged in the practice of law; to the Committee on Ways and Means.

By Mr. LANE:

H. R. 4575. A bill to amend the act entitled "An act authorizing Federal participation in the cost of protecting the shores of publicly owned property," approved August 13, 1946; to the Committee on Public Works.

By Mr. LECOMPTE:

H. R. 4576. A bill to authorize the Secretary of Agriculture to pay indemnity for losses and expenses incurred during July 1954 in the destruction, treatment, or processing, under authority of law, of swine, swine carcasses, and products derived from swine carcasses, infected with vesicular exanthema; to the Committee on Agriculture.

By Mr. METCALF:

H. R. 4577. A bill to safeguard the health, efficiency, and morale of the American people; to provide for improved nutrition through a more effective distribution of food supplies through a food-allotment program; to assist in maintaining fair prices and incomes to farmers by providing adequate outlets for agricultural products; to prevent burdening and obstructing channels of interstate commerce; to promote the full use of agricultural resources; and for other purposes; to the Committee on Agriculture.

By Mr. MOLLOHAN:

H. R. 4578. A bill to amend the Social Security Act to reduce, for purposes of old-age and survivors insurance benefits, the age requirement from age 65 to 60; to the Committee on Ways and Means.

By Mr. PELLY:

H. R. 4579. A bill to amend the Tariff Act of 1930 to repeal the duty on crude silica; to the Committee on Ways and Means.

By Mr. REUSS:

H. R. 4580. A bill to amend title II of the Social Security Act to reduce from 65 to 60 the age at which widows' benefits become payable thereunder; to the Committee on Ways and Means.

By Mr. SIMPSON of Pennsylvania:

H. R. 4581. A bill to amend section 4091 of the Internal Revenue Code of 1954 (relating to imposition of tax upon lubricating oils) and to amend section 6416 (b) of the Internal Revenue Code of 1954 (relating to overpayments of tax); to the Committee on Ways and Means.

H. R. 4582. A bill to amend the Internal Revenue Code of 1954 with respect to deductions from gross income of amounts contributed to employees trusts; to the Committee on Ways and Means.

By Mr. STAGGERS:

H. R. 4583. A bill to authorize and request the President to undertake to mobilize at some convenient place in the United States an adequate number of the world's outstanding experts, and coordinate and utilize their services in a supreme endeavor to discover means of curing and preventing cancer; to the Committee on Foreign Affairs.

By Mr. WALTER:

H. R. 4584. A bill to amend the Clayton Act by granting a right of action to the United States to recover damages under the antitrust laws, establishing a uniform statute of limitations, and for other purposes; to the Committee on the Judiciary.

By Mr. WRIGHT:

H. R. 4585. A bill to amend the act of August 24, 1912, to simplify the procedures governing the mailings of certain publications of churches and church organizations; to the Committee on Post Office and Civil Service.

H. R. 4586. A bill to require the Secretary of the Army under certain circumstances to offer land in reservoir areas for sale to the former owners thereof; to the Committee on Public Works.

By Mr. REED of Illinois:

H. J. Res. 237. Joint resolution to strengthen and improve State and local programs to combat and control juvenile delinquency; to the Committee on Education and Labor.

By Mr. BENNETT of Florida:

H. J. Res. 238. Joint resolution proposing an amendment to the Constitution of the United States relative to disapproval of items or provisions in appropriation bills; to the Committee on the Judiciary.

By Mr. COOLEY:

H. J. Res. 239. Joint resolution designating the third week in October of each year as National Farmers Week; to the Committee on the Judiciary.

By Mr. GRANAHAN:

H. J. Res. 240. Joint resolution designating the third Sunday in June of each year as Father's Day; to the Committee on the Judiciary.

By Mr. METCALF:

H. J. Res. 241. Joint resolution to establish a national policy for the production and utilization of food and fiber, so as to make full economic use of the productive capacity of United States farms to improve domestic nutrition and clothing standards and buttress the foreign policy of the United States; to the Committee on Agriculture.

By Mr. DAWSON of Illinois:

H. Con. Res. 91. Concurrent resolution authorizing the printing of additional copies of hearings held by the Committee on Government Operations on the organization and administration of the military research and development programs; to the Committee on House Administration.

By Mr. TUMULTY:

H. Res. 164. Resolution relative to the proper nomenclature of hurricanes; to the Committee on Interstate and Foreign Commerce.

H. Res. 165. Resolution to express the felicitations of the House on the occasion of the 100th anniversary of the incorporation of the city of Hoboken, N. J.; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. HAYS of Arkansas: Memorial of the State of Arkansas urging that action be taken by the Veterans' Administration to provide more beds and facilities for treatment of ex-servicemen who are in need of psychiatric care at the Veterans' Administration hospital at Fort Roots, Ark.; to the Committee on Veterans' Affairs.

By Mr. HESELTON: Resolutions of the House of Representatives of the Commonwealth of Massachusetts memorializing the Congress of the United States to take action to admit Alaska and Hawaii to statehood; to the Committee on Interior and Insular Affairs.

By Mrs. ROGERS of Massachusetts: Memorial of the Massachusetts House of Representatives to take action to admit Alaska and Hawaii to statehood; to the Committee on Interior and Insular Affairs.

By the SPEAKER: Memorial of the Legislature of the State of Connecticut, memorializing the President and the Congress of the United States relative to house joint resolution 48, relating to expressing confidence in the foreign policy of the President of the United States; to the Committee on Foreign Affairs.

Also, memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States to take action to admit Alaska and Hawaii to statehood; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Washington, memorializing the President and the Congress of the United States to name the body of water created by the backwaters of McNary Dam "Lake Wallula"; to the Committee on Public Works.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred, as follows:

By Mr. BATES (by request):

H. R. 4587. A bill for the relief of Antonio Pereira Moco; to the Committee on the Judiciary.

By Mr. BECKER:

H. R. 4588. A bill for the relief of Antonio Penna; to the Committee on the Judiciary.

By Mr. OLIVER P. BOLTON:

H. R. 4589. A bill for the relief of Janos (John) Kapka; wife, Edith; and children, Edith Rosemary, Georgette, Janos, Jr., Alice, Steven, and Mary Valery; and mother-in-law, Antonia Majer; to the Committee on the Judiciary.

By Mr. BOSCH:

H. R. 4590. A bill for the relief of Agosto Giampoali; to the Committee on the Judiciary.

By Mr. CUNNINGHAM:

H. R. 4591. A bill for the relief of Marion A. Comegys; to the Committee on the Judiciary.

By Mr. DAGUE:

H. R. 4592. A bill for the relief of Katherine Wiedner; to the Committee on the Judiciary.

By Mr. DEROUNIAN:

H. R. 4593. A bill for the relief of Loretta Pereira; to the Committee on the Judiciary.

By Mr. GRANAHAN:

H. R. 4594. A bill for the relief of Kathryn T. Lilly; to the Committee on the Judiciary.

By Mr. GUBSER:

H. R. 4595. A bill for the relief of Slobodan Galeb; to the Committee on the Judiciary.

H. R. 4596. A bill for the relief of Suye Uchida; to the Committee on the Judiciary.

By Mr. HENDERSON:

H. R. 4597. A bill for the relief of Guy H. Goddard; to the Committee on Armed Services.

By Mr. HESELTON:

H. R. 4598. A bill for the relief of Oldrich Prochazka; to the Committee on the Judiciary.

By Mr. JACKSON:

H. R. 4599. A bill for the relief of Raymond Jean-Henri Rombeau; to the Committee on the Judiciary.

H. R. 4600. A bill for the relief of Antonio Hernandez-Gomez; to the Committee on the Judiciary.

H. R. 4601. A bill for the relief of Max Horkheimer and Rose Christine Horkheimer; to the Committee on the Judiciary.

By Mr. MACK of Illinois:

H. R. 4602. A bill for the relief of Edward Neal Fisher; Committee on the Judiciary.

By Mr. MACK of Washington:

H. R. 4603. A bill for the relief of Edith C. Eldred; to the Committee on the Judiciary.

By Mr. METCALF:

H. R. 4604. A bill relating to the issuance of certain patents in fee to lands within the Blackfeet Indian Reservation, Mont.; to the Committee on Interior and Insular Affairs.

By Mr. PATTERSON:

H. R. 4605. A bill for the relief of Andrew Christopher Smith; to the Committee on the Judiciary.

H. R. 4606. A bill for the relief of Mrs. Iris Millicent Bell; to the Committee on the Judiciary.

By Mr. POWELL:

H. R. 4607. A bill for the relief of Joyce Delores Evans; to the Committee on the Judiciary.

By Mr. REUSS:

H. R. 4608. A bill for the relief of Ahmet Haldun Koca Taskin; to the Committee on the Judiciary.

By Mr. ROONEY (by request):

H. R. 4609. A bill for the relief of Winsome Valarie Hall; to the Committee on the Judiciary.

H. R. 4610. A bill for the relief of Victorena Ambrozene Plunkett; to the Committee on the Judiciary.

By Mr. ROOSEVELT:

H. R. 4611. A bill for the relief of Bernard M. Silbert and others doing business as Almond Acres housing project; to the Committee on the Judiciary.

By Mr. YATES:

H. R. 4612. A bill for the relief of Vladimir and Svatava Hoschl; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

132. By Mr. BUSH: Petition of Bottle Run Grange, No. 1301, Williamsport, Pa., in opposition to the universal military training bill; to the Committee on Armed Services.

133. By the SPEAKER: Petition of the chairman, American Lithuanian Council, Gary, Ind., requesting the United States to use its influence to help Lithuania and other Baltic States regain their freedom and sovereign rights in accordance with the principles of the Atlantic Charter and the Charter of the United Nations; to the Committee on Foreign Affairs.

134. Also, petition of Francisco Cepero, Santurce, P. R., relative to Civil No. 95-4, *Francisco Cepero, petitioner,* v. *United States District Court for Southern District of New York;* to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

The Expanding Great Lakes Frontier

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Wednesday, March 2, 1955

Mr. WILEY. Mr. President, on last Saturday, February 26, it was my pleasure to address the Antigo, Wis., Chamber of Commerce on the subject of the expanding Great Lakes frontier.

I ask unanimous consent that the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE EXPANDING GREAT LAKES FRONTIER

(Address by Hon. ALEXANDER WILEY, of Wisconsin)

It is a privilege to address this fine chamber of commerce regarding the expanding economic frontier of America.

I want to talk to you about the future prosperity which you of Antigo and which all of us in Wisconsin will enjoy in the years and decades to come.

What we are going to do is not, however, "put on rose-colored glasses" and assume that the future will be all bright and easy. Rather we are going to take a realistic look at the great challenge—the great opportunity which lies before us.

SEAWAY A GREAT BOOST

It is my belief that the Great Lakes-St. Lawrence Seaway, now scheduled to begin operations in the 1959 shipping season, will prove to be one of the most tremendous economic boosts in United States history.

It is my belief that it will be a great spur to midwestern industry and agriculture; that it will pump economic health into communities in States all along the Lakes and adjacent to those States.

POPULATION WILL SOAR IN LAKE AREA

Right now, in the Great Lakes area, 58 million people live in the 8 States having immediate access to the Lakes.

An additional 13 million people live in the 9 States which are generally regarded as tributaries, in an economic sense, to the Lakes.

We 71 million Americans will be the ones most immediately affected by the waterway.

But meanwhile America's population is zooming upward. Last year 4 million babies were born.

By the normal laws of population increase, our country as a whole is scheduled to jump from 163 million people today to around 285 million people 20 years from now—in 1975.

It is my belief that because of the seaway populations along the Lakes will increase even faster than the normal proportion of increase in other States provided—I repeat, provided—we take the necessary action to assure our progress.

NEW SEAWAY WILL BENEFIT US

Fortunately, such progress already is shaping up.

The lake area is going to benefit from seaway construction payrolls immediately, construction on harbors, construction on deepening of channels (such as are provided under the Wiley channel bill, S. 171).

Then, the lake area is going to attract many new industries, requiring direct access to the deepwater ports of the world.

It is going to attract increased tourist trade.

It is going to benefit from increased integration between America's economy and the economy of our Canadian good neighbor (which is also booming).

All this is scheduled to result, and yet I believe that it is only the beginning of the bright horizons before us.

OVERALL UNITED STATES OUTLOOK BRIGHT

If in the next decade the seaway were to come about all by itself, then the promise which the future holds would not be so completely bright.

But the fact of the matter is that the seaway is but a part of the overall expanding economic horizons affecting our country as a whole.

Right now, whole new American industries are developing.

I cite but two industries: The atomic energy industry, which will probably revolutionize electric power, medicine, and many other fields; and the industry known as automation; that is, the so-called automatic factories in which electronic machines perform operations which might otherwise be performed manually.

Now, it is a fact that all of these new industries will raise problems in turn.

They will require shifting of labor from one type of job and industry to other types, and there may be temporary labor surpluses.

But, so long as new industries are being created as fast as old industries feel the impact of sometimes adverse developments, then we can be sure there will be overall prosperity ahead for Wisconsin and America.

Now, I ask you, my friends in the Antigo area: How well are you and I planning to have this community benefit from the changing economic patterns of America—patterns involving, for example, atomic energy and automatic factories?

Can you contribute here in this area—directly or indirectly—to some of the subcontracting work involved in, say, these two enormous industries?

The fact of the matter is that each community must plan its place in the coming dynamic era.

You in this audience tonight are realists. You know that we cannot here in this area try to duplicate, even in part, the factories, the facilities, the resources, the transportation of some enormous metropolis. Even if that were possible, you wouldn't want it.

What you can and should do, however, is make Antigo's unique, specialized, tailored contribution to the coming era.

That means mobilizing the best minds in this community, the best civic organizers, and doers.

It means tapping your finest engineering, business, labor, and professional abilities so as to make Antigo's fullest contribution.

GETTING IN ON GROUND FLOOR

Most of the technical developments which I am describing are not going to happen overnight. They are going to take years and years. But the time to get in on the ground floor is now.

Recently, I have been in correspondence with an outstanding organization know as Atomic Industrial Forum, which consists of leading Wisconsin and other businesses which are planning for their atomic future.

This is the type of self-help, forward-looking organization which will help accelerate America's economic development. It is the type which is needed as we advance boldly and in a free-enterprise fashion to America's new economic frontiers.

So, too, I am hoping that in our State of Wisconsin we can, on a statewide basis, plan to attract the most modern type of industries to our State. We want industries with tremendous growth potential, industries which will need the type of skilled workers with which we in Wisconsin are blessed, industries which will need the stable, wholesome communities which we in Wisconsin have to offer.

That is why I have been in correspondence with the Governor's office, with the University of Wisconsin, and with other leading Wisconsin enterprises—private and public.

SO-CALLED NORMAL INDUSTRIES REQUIRE ATTENTION

But we don't need miracle fields, like atomic energy or automation, to assure our prosperity.

Even and indeed, especially, in so-called normal ordinary types of enterprise—manufacturing, wholesale, distribution, agriculture, we can and should plan to benefit from the St. Lawrence seaway.

WORKING OUT PROBLEMS WITH CANADA

But I want to repeat my word of caution regarding not becoming overoptimistic or going overboard, and assuming that prosperity will automatically be ours. And let me mention now that we still have to work out some seaway matters with our Canadian friends.

I want to say very frankly that there have been some differences with regard to duplicating seaway facilities between ourselves and our friends across the border. I have hope and confidence that these differences are properly going to be worked out satisfactorily. After all, there is no finer set of neighborly relations in the world than prevails between ourselves and our Canadian friends.

America tarried too long on approving the seaway. We were long overdue in coming in on the dual-nation, dual-purpose navigation and power project.

But now that we are going in, I hope that we and Canada will proceed on a basis of complete cooperation. I hope we will definitely avoid duplicating facilities and will put our respective dollars where they can be of best possible use for the good of both nations.

MIDWEST MUST PROTECT ITSELF

And just as I want America to speak up frankly in relation to her needs and those of Canada, so I want the Midwest to speak up frankly in relation to her needs.

Frankly, the Midwest has often been woefully negligent in protecting itself in the economic race.

Time after time, the Midwest has been treated like an orphan child when Uncle Sam has built new projects and poured in new Federal funds.

Time after time, the Midwest delegations in Congress have failed to work together as a team, while, by way of contrast, New England delegations or gulf coast or Northwest delegations have far exceeded us.

I don't mean to say that I want the Midwest to come "hat-in-hand" to Uncle Sam for handouts. We of the Midwest don't believe in handouts. We don't believe in looking to Washington for things which we should do and will do for ourselves.

But neither should we fail our obligations to make sure that we receive our fair share of Federal cooperation on projects in which there is a very definite national interest.

The Great Lakes connecting channels represent one such project. But there are many others which will directly benefit us.

Now, just how will the seaway affect Wisconsin?

It is my belief that Wisconsin particularly stands most immediately to gain from the seaway. Our State has probably planned more intensively for the seaway than most other States. We have been in the forefront of the battle for the seaway, and it is we who should be in the forefront of benefiting from it.

CHANNELS MUST BE DEEPENED

Our first priority must, of course, be to secure action on the legislation to which I have already referred. It is the legislation which not only I have introduced, but which numerous other Senators and Representatives have introduced—namely, to deepen the connecting channels to 27 feet. Otherwise we will not have a 27-foot deep waterway west of Lake Erie.

We can we quite sure that these channels are going to be deepened. That does not mean, however, that we should take them for granted. Actually, some of my colleagues from the South, for example, were more interested in getting Federal funds to supplement the hundreds of millions that they have poured into the gulf coast than they are interested in approving the relatively modest $109 millions which will be necessary for the Great Lakes connecting channels.

Now, as channel work is getting under way, it is our estimate that seaway traffic will reach 52 million tons by 1965.

This tonnage will be of great aid to all of Wisconsin, to its industries, and its farmers who will be able to ship their products inexpensively across the waters.

But, I reiterate, my friends, that each community, including Antigo, should not assume that benefits will flow automatically to us, should not assume that prosperity is going to drop into our laps.

In the first place, there is stiff competition for new business all along the lake area.

QUESTIONS ON ANTIGO'S FACILITIES

In the second place, even if there were not this competition, each community cannot prosper unless it analyzes and improves its own particular facilities and resources—soundly and carefully.

And so, we should ask ourselves, as I'm sure you of this Chamber have been asking yourselves:

What is our available industry and our available labor supply?

What are the trends affecting current Antigo business?

What can we do to hold what we have and improve what we have?

What land do we have available for expanded industries?

What housing is available for increased labor supply?

How modern is the machinery in our plants?

What is our access—today and tomorrow—to other means of transportation: railroad, road, and air?

These are but a few of the important questions which must be considered before Antigo or any other community can fully benefit from the waterway.

There is every reason for faith and confidence in the future. Wisconsin stands at the threshold of a new era. I am sure that with the leadership displayed at this meeting and meetings throughout our State, we can go forward to fully benefit from this great frontier.

CONCLUSION

I have tried during this address to comment on some of the highlights of the coming era. I have tried to paint a picture which I believe is realistic and sound, and not one based upon superoptimism or rose-colored glasses, especially in relation to so-called new miracle industries.

I believe, in summary, that the seaway is what you and I choose to make it. It is not going to drop prosperity into our laps. But it is going to make prosperity available to us if we have the brains and the initiative to realize it, as I believe we will.

Very shortly, there will be published in Washington a new St. Lawrence Seaway Manual which has been prepared at my direction. It will help answer some of the many questions which I know are in your minds about the seaway. I hope that you will write to my office for a copy of it. And I hope that on my return to Washington you will always feel free to contact me. Give me the benefit of your judgment, your constructive criticism, your advice. I will be happy to hear from you always.

Thanks again for your attention and good luck to you all.

Drought-Relief Program

EXTENSION OF REMARKS

OF

HON. E. Y. BERRY

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1955

Mr. BERRY. Mr. Speaker, from time to time there has been inserted in the CONGRESSIONAL RECORD criticisms of the handling of the drought-relief program by the Department of Agriculture. Most of these criticisms have been made by those who do not have a clear understanding of the problem or the steps taken to alleviate the hardships caused by drought throughout the country. Congress has passed several acts to help meet the distressing situation caused by drought and it has been the earnest desire of those charged with the administration of the programs to so administer them within the law as to give the greatest relief possible.

I am placing at the close of my remarks a table showing the number of cases and the funds expended through the Department of Agriculture for the fiscal year 1955, and in the case of loans, feed, and hay programs and wind-erosion control, July 1, 1954, through February 4, 1955.

The charge has been made that the emergency credit made available to farmers in drought-stricken areas has been entirely inadequate. However, since emergency loans were first authorized in

1949 pursuant to Public Law 38, 81st Congress, a total of 157,940 loans amounting to $212,274,468 have been made to enable farmers in designated areas to continue their normal operations. Since the inception of the special livestock-loan programs, which was authorized in 1953, a total of 5,649 loans amounting to $49,702,328 have been made to livestock operators. Most of these loans, as well as a majority of the emergency loans, have been made as a result of the drought conditions which have existed throughout much of the country. The following table reflects the activity under these programs by years for the country as a whole:

	Emergency loans		Special livestock loans	
	Number	Amount	Number	Amount
United States:				
1949	362	$974,948	------	----------
1950	25,360	29,833,887	------	----------
1951	13,274	19,198,873	------	----------
1952	21,226	31,488,774	------	----------
1953	35,442	43,225,068	------	----------
1954	42,449	57,984,342	3,985	$37,282,206
1955 through Feb. 4	19,827	29,568,576	1,664	12,420,122
Total	157,940	212,274,468	5,649	49,702,328

These loans have been made to farmers and stockmen who have been unable to obtain elsewhere the credit required for them to continue their normal operations and the volume of loans made is an indication that the emergency credit programs of the Department have been used fully in meeting the needs of farmers who have suffered from the drought and similar conditions.

Uniform regulations have been issued with respect to all of the emergency lending programs of the Department and these regulations apply in all of the States. The Farmers Home Administration emergency lending authorities are used in meeting the needs of small farmers as well as the needs of large operators who qualify for assistance. The refinancing of existing debts under our emergency lending authorities is prohibited. To do otherwise would not be consistent with the acts under which the various loans were authorized. Likewise Farmers Home Administration emergency lending authorities are not used to compensate applicants for the actual losses which they have suffered as a result of the drought or similar conditions. Emergency and special livestock loans were authorized for the purpose of enabling qualified applicants to continue their normal operations. Consequently, the amount advanced to each applicant is limited to what is necessary for that purpose. The amount actually advanced may or may not be in excess of the actual losses suffered by the applicant, depending upon the particular circumstances involved.

The act under which special livestock loans were authorized states specifically that such loans will be made only to those applicants "who have a good record of operations but are unable temporarily to get the credit they need from recognized lenders and have a reasonable chance of working out of their difficulties with supplementary financing." A similar restriction applies to all of the other types of emergency loans and it would not be consistent to approve a loan for any applicant in a position to obtain his credit elsewhere or to any applicant who did not have a reasonable prospect for success with the assistance of the loan. It is not intended for these loans to compete with credit extended by banks and other private lenders but rather to supplement the credit available from those sources. When loans are made other creditors are urged to cooperate in keeping the farmer or stockman in business so that he will have an opportunity to recover from his losses and in a relatively short period return to his usual source of credit. Therefore, there is no justification or authority for making loans to applicants who are able to obtain their credit elsewhere or to applicants who do not have a reasonable prospect for success.

When loans include funds for the production of cash crops, the amounts advanced for that purpose generally are scheduled for repayment out of the income to be derived from the crops produced. Loans are scheduled for repayment in this manner as it is the generally accepted principle that creditors advancing funds for production purposes are entitled to the first claim upon the income produced. In situations in which an applicant's prospective income will be abnormally low because of the drought or other conditions or when his expenses will be abnormally high for similar reasons, provision is made for the scheduling of amounts advanced for annual recurring expenses over a period longer than 12 months.

In general, there have been two chief criticisms of the agricultural conservation program.

First. Fair prices of conservation materials were discontinued.

Second. Green manure, small grains, and so forth, were limited to land shifted from production of crops because of acreage allotments.

The determination and posting of the maximum fair price at which ACP would purchase materials—in this case seed—for conservation work was required under law until enactment of Public Law 690, 83d Congress. It then became permissive and could be used whenever and wherever it was apparent that a maximum was needed to prevent unjustifiable increases in prices of conservation materials or services. Instructions were sent to States by the Acting Secretary, September 3, 1954, canceling existing fair prices and giving instructions for their re-establishment where needed. Conditions for establishing were:

First. Supply through local sources inadequate to meet anticipated demand.

Second. Inadequate supply will result in commercial prices that are excessive in relation to such demand.

In drought areas there was a special practice (F-3). This practice permitted use of cost-sharing for cover crops without regard to the shifting of acreage from other crops. The rate of cost-sharing for this practice was determined by the State and county committees as that rate necessary to obtain adequate performance under prevailing conditions without regard to the 50 percent of cost provision.

In order to further alleviate the drought situation where 1954 funds were not adequate, authority was given to open the 1955 program in the late summer and fall of 1954 with the use of funds allocated for the 1955 program.

On January 27 and 28 a conference was held here in Washington, attended by one representative from each of the drought States. In most cases, prior to January 27, representatives of the Federal agencies had conferred at the State level in order to enable their conferee to reflect the thinking of all agencies.

Several times during the conference here the statement was made to the effect that the emergency drought measures carried out in 1954 under the agricultural conservation program were most helpful and no doubt more productive of lasting good than any of the other emergency measures.

The statement has been made that the present emergency feed program is inadequate in that farmers, particularly the small farmers, cannot obtain sufficient relief.

The present emergency feed program was designed to utilize the regular channels of trade to the maximum extent practicable. Aside from the general policy that private channels of trade should be used insofar as practicable, there were other compelling reasons for utilizing the type of program. It was clearly the intent of Congress that feed grains should be placed in the farmers' hands as rapidly as possible. This type of program was designed to take advantage of the feed grains in dealers hands and elsewhere in the pipeline so that farmers could obtain feed without any delay.

It is probable that at least a month's time was saved on the average as compared to delivering feed direct to farmers from CCC stocks. It was also realized that to furnish feed grains to farmers in designated areas gratis would tend to greatly disturb the national price structures by offering incentives to obtain feed in large enough quantities to permit resale at a profit. It was felt that the subsidy rate when coupled with the provisions for credit and the provisions of the hay program would make it possible for farmers, both large and small, to retain their basic herds.

It has been suggested that the Department should furnish CCC stocks of feed grains or seed direct to farmers for the purpose of planting pastures. This type of program was also considered but the same delays could be expected in placing the feed grains and seed stocks in farmers hands as outlined above. Furthermore, to furnish these direct to farmers would be putting the Government in direct competition with the long-established channels of trade.

Large supplies of hairy vetch have been held by CCC and a stock of 26 million pounds remains in inventory. These seeds have been and are, at the present time, offered for sale at $12.65 per hundred pounds. CCC sold several million pounds of hairy vetch in fall of 1954 at

the above price, which is the market price in wholesale carlots.

The crimson clover seed held by CCC was mostly acquired from the 1953 crop in February and March of 1954. This seed was sold by CCC at prices that returned to CCC its total cost in the seed and this action kept the price of the seed to the consuming farmer much lower than would have been the case had CCC not owned the seed.

The alfalfa seed owned by CCC amounted to 37 million in January 1954. This seed had been offered at $37.50 and $43, which is more than CCC costs for nearly a year with few sales. It was reduced $35 and $40, which is the support price at which it was acquired. These prices are market prices for carlots in producing areas as is evidenced by the fact that CCC has at present 7,700,000 pounds and sales are not active.

Mr. Speaker, I believe you will agree with me that Congress has wisely provided ways to alleviate a serious drought situation that has extended all the way from the Rocky Mountains to the Atlantic Ocean. It is my belief and I think will be concurred in by most Members of Congress, that the hardships of drought have been very grave and that they continue to be a threat to a great many communities throughout the Nation. It may be that additional legislation will be required. However up to the present I think you and Members of Congress from these States will agree that the drought relief program as authorized by Congress and administered by the Department of Agriculture has been of untold help in relieving a most distressing situation.

United States Department of Agriculture drought program (fiscal year 1955) [1]*—Loans, feed, and hay programs, and wind erosion control (July 1, 1954, through Feb. 4, 1955)*

[1] This report covers the States in which counties are currently designated as drought disaster areas for emergency feed and hay assistance. A separate report is available, as of June 30, 1954, covering activities under the drought program in the fiscal year 1954.

[2] This reflects activity under the 1954 feed program. In addition, there were obligations of $79,500 for Colorado and $491,500 for New Mexico incurred in the fiscal year 1955 under the 1953 feed program which was terminated in these 2 States as of July 15, 1954. The cost of the subsidies under the 1954 program is being borne by Commodity Credit Corporation pursuant to sec. 301 of Agricultural Trade Development and Assistance Act of 1954 (Public Law 480, 83d Cong.); the administrative costs are being borne under Public Law 175 funds.

[3] Charged to the balance of $15,257,747 of the $50 million appropriated to carry out sec. 2 (d) of Public Law 38, as amended by Public Law 115, 83d Cong.

[4] Represents allocations made from the $15 million provided by the Third Supplemental Appropriation Act, 1954. An allocation of $180,000 from these funds was also made to Nebraska.

The Alabama Coosa River Basin

EXTENSION OF REMARKS
OF

HON. KENNETH A. ROBERTS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1955

Mr. ROBERTS. Mr. Speaker, during the 83d Congress legislation was authorized to permit the building of five hydroelectric dams on the Coosa-Alabama Rivers system, and it has long been evident that a 9-foot channel should be constructed from Rome, Ga., to Mobile, Ala. This improvement is in great demand and should be done at the time the dams are being constructed, by providing for locks on the dams and by dredging these rivers while the hydroelectric dams are being constructed. This would result in great savings to the Federal Government. In order for this work to proceed in an orderly, economical, and efficient way, a new survey of the river should be made by the Corps of Engineers, and I am especially grateful that a public meeting has been called under the sponsorship of Mayor W. A. Gayle, of the city of Montgomery, the chamber of commerce of the capital city, and the Coosa River Improvement Association.

On Saturday, March 5, 1955, public officials, businessmen, industrial leaders, and others of the cities and towns which will be affected by this improvement will meet in the city of Montgomery for the purpose of organizing a movement to begin work on this important development. An outstanding engineer, Lieutenant General Pick, United States Army (retired), will address the group at its luncheon meeting.

I have prepared a statement on this important development which gives the background and history of the improvements that have been made, and of the efforts that have been put forth in the past to bring about the realization of this highly important development. The statement is as follows:

THE ALABAMA-COOSA RIVER BASIN

THE RIVER

The Alabama-Coosa River is one of the principal rivers of the Southeast extending from the Blue Ridge Mountains of northwest Georgia and southeast Tennessee southwesterly across the Piedmont Plateau to the lowlands of the gulf coastal plain in Alabama and draining an area of 22,800 square miles.

The river basin has all the natural and climatic resources essential for economic progress. It has a moderate climate with an abundant but well distributed rainfall. It has fertile soil. It has many of the basic raw materials within its soil, so essential for future industrial progress. The human resource—an adequate supply of labor—is also available for industrial progress.

The potential hydroelectric development of the river basin is great. At the present time, there is an installed capacity of 564,000 kilowatts of hydropower in the 6 plants owned by the Alabama Power Co. together with the Allatoona plant built by the Corps of Engineers. This past session of Congress (83d) Public Law 436 was enacted which will permit the Alabama Power Co. to construct an additional 5 dams on the Coosa River and which is expected will add 360,000 kilowatts to the Alabama Power Co.'s capacity; these dams are to be constructed within 10 years from the date of the commencement of construction of the first dam.

At the present there are frequent floods in the river basin and though they are not severe, they cannot help but retard the economic growth of the basin. About 526,000 of the acres are subject to overflow which

could be avoided by the construction of certain flood projects in connection with the development of the dredging of the river and the construction of the proposed dams and hydroelectric plants.

HISTORY

The development of the Coosa River has been the subject of study by the Corps of Engineers for the past 80 years. The Corps of Engineers of the Army first began investigating and reporting on the practicability of improving the Coosa River for navigation in 1870. The Corps of Engineers made a study of the Alabama River in 1875. The first improvement was a series of locks and dams in the Coosa River to enable shallow-draft navigation to reach Rome, Ga. The first really significant step toward overall basin development in the Alabama-Coosa River system was the 308 report made in 1934. This report recommended a system of locks and dams on the Alabama River and on the Coosa River above the existing power dams, and locks in the power dams. It also recommended a 9-foot deep channel for navigation upstream to Rome, Ga., 650 miles above Mobile, and additional power.

The feasibility of several dams for power on the tributaries was also investigated. A system of levees was built at Rome to control floods, and another flood-control project has been built at Prattville, Ala. Great progress was made when the Allatoona Dam and Reservoir was built on the Etowah River, 48 miles above Rome.

In 1941 the Corps of Engineers submitted a report recommending the adoption of a comprehensive program of development of the basin's water resources in accordance with plans being prepared by the Chief of Engineers with such modifications thereon from time to time as seemed advisable. This was adopted by Congress and approved by the President in 1945 and is the present authorization for the Corps of Engineers' program.

The 83d Congress enacted Public Law 436 to permit the Alabama Power Co. to construct five dams along the river.

OUTLINE OF LEGISLATIVE ACTION

The Corps of Engineers 308 report was made in 1934. It presented a long-range plan for development of the river. (H. Doc. No. 66, 74th Cong.)

House Document No. 414, 77th Congress recommended a comprehensive project including a deeper channel for navigation.

Hearings held on Alabama-Coosa River in the 77th Congress before the House Committee on Rivers and Harbors. (November 5 and 6, 1941.)

Hearings held in 78th Congress:

1. Before House Committee on Rivers and Harbors, October 19-20, 1943.

2. Before Senate Committee on Commerce, April and May 1944. (Held on H. R. 3961.)

The Rivers and Harbors Act of 1945: It authorized appropriations for the implementation of the plans as set forth in House Document No. 414, 77th Congress.

Public Law 436, 83d Congress authorized the Alabama Power Co. to build a series of dams on the river.

THE FUTURE OF ALABAMA LIES IN THE DEVELOPMENT OF THE ALABAMA-COOSA RIVER

One of the firmest cornerstones of Alabama's future lies in the development of the great resources of the Alabama-Coosa River Basin. This promising future can be attained only by the eventual development of the Alabama and Coosa Rivers and the long hoped for and dreamed of 9-foot deep-water channel from Rome, Ga., to Mobile.

The fulfillment of the dreams Alabamians have had for this magnificent river basin for these many years would provide a significant contribution to the defense bulwark of our Nation—allowing for the fast, safe, yet inexpensive movement of vital defense elements such as petroleum, chemicals, pulp, ore, and building materials; it would provide economic advantages to the industries already in the area through lowering their operating costs; and it would attract new commerce and industries to develop the abundant natural resources within the river basin.

The present shallow depths of the Alabama River generally limit commerce to small movements of gravel, sand, logs, and pulpwood. The Alabama and Coosa Rivers must be channeled because of the advantages which will accrue to Alabama and its people, the Nation, and its citizens.

RESOURCES OF THE RIVER BASIN

Industry

Textiles: Cotton processing is important; silk and rayon knitting are prominent. There are approximately 130 textile mills employing about 43,000 workers.

Steel and iron: There are steel and iron mills in the river basin towns of Gadsden, Anniston, and Rome which use coal and iron ore mined in the surrounding area. This industry employs about 10,000 men in 33 plants.

The vast Cahaba coalfield of St. Clair, Bibb, and Tuscaloosa Counties which produce great amounts of coal would be made available if the coal had the advantage of reduced transportation rates afforded by river transportation. The same situation would be true of the great Warrior coalfield lying in the counties of Walker, Blount, Cullman, Winston, Marion, Fayette, and Tuscaloosa.

The steel mills would use Venezuelan iron ore and ore from other foreign countries coming into Alabama through the port of Mobile, thereby giving the counties served by the Alabama-Coosa, an equal and fair chance with the counties served by the Tombigbee and Warrior system which is now being made navigable.

Paper: Paper manufacture consumes vast quantities of water, involves a difficult waste problem, and requires low-cost, dependable, bulk transportation to and from the mill. The waters of the Coosa River plus the nearby supply of pulp has aided in the success of the Coosa River Newsprint Co.

Chemical: In the river basin there are approximately 64 establishments engaged in the manufacture of chemical products, including fertilizer plants, the Childersburg powder works, and cottonseed-oil mills.

General: There are about 70 concerns of the glass, clay, and stone group of industry which are engaged in the manufacture of cut stone, marble, building brick, and tile.

Agriculture

The abundant rainfall and fertile soil make farming desirable in this area. About 40 percent of the population is engaged in agricultural pursuits. Cotton, corn, peanuts, potatoes, velvet beans, and cattle raising are the most important.

Mineral resources

The Alabama-Coosa River Basin acreage contains many valuable minerals; bauxite, Selma chalk (for cement), clays, coal, arsenic ores, fluxing materials, fuller's earth, gold, lead graphite, granite, marble, slate, mica, ochre, lime, manganese ore, iron ore (both brown and gray), gravel, sand, silica sand, and asbestos.

At the present time because of the high transportation costs, only clay, coal, marble, lime, iron, gravel, and sand are being produced. Decreased water transportation costs would undoubtedly make it more profitable to mine bauxite, cement, coal, iron ore, fluxing materials, fuller's earth, graphite, and manganese.

Human resources

There is an adequate labor supply in the river basin—much of it due to the influx of war workers, many of whom stayed on. The number of workers has also increased due to the movement of new industries into the area.

It is interesting to note that populations demonstrate a tendency to follow water. In northern New York State where water transportation on the New York State barge-canal system parallels the railroad, the population is 5½ times greater than the population in southern New York which has only railway service. Almost three-fourths of the 100 largest American cities are either sea, Great Lakes, or river ports with rail connections. Take the case of Houston, Tex., 50 miles from deep water in the Gulf of Mexico. In 1910 Houston's population was 78,000. Today it is 600,000. The city is next to the largest port in the Nation, second only to New York, and this is due to the dredged ship channel from the gulf to Houston.

THE ADVANTAGES OF WATER TRANSPORTATION

In recent years, freight business on the Nation's waterways has been increasing between 10 to 15 percent a year; in 1953 the waterways, excluding Great Lakes, transported 6 percent of the total ton-mileage. Traffic on the inland waterways has nearly tripled since 1946. Over the past 20 years, ton-miles have increased on the inland waterways at the average rate of 3.25 billion a year. On the Mississippi, traffic rose from 36 million tons in 1942 to 80 million tons in 1953.

The greatest advantage water freight has over other methods of transportation is cost. The average cost of railroad equipment to move 15,000 tons of freight would be $3,220,551. The average cost of equipment to move 15,000 tons of freight on the inland waterways would be $930,000. In the 22-year period ending June 30, 1948, the transportation savings on the 15 largest and most active waterways, as computed by the Army engineers, totaled over 2.5 billion dollars.

As another example, take the shipment of a ton of wheat from Minneapolis to Knoxville. By rail it costs $17.69 but by water costs only $5.55.

This is why new industries moving south every day would prefer to settle along the banks of a river where it can take advantage of the low costs of water transportation rates. In the first 3 months of 1954, 85 waterside development projects—all costing over $100,000 and some well into the millions—were announced. Within the last 2 years over $3 billion in new plant investments has been made along the banks of the Ohio River and its tributaries.

In 1952 the midcontinent of the United States surpassed the industrial East as a producing area—and why? Because industries have been leaving the East and settling along the inland waterways. It should be remembered that the railroads serving the river-port cities have also benefited by thousands of additional car loadings from industry and by greatly increased movement of in- and out-bound consumer goods and passengers.

ALABAMA'S FUTURE LIES IN THE DEVELOPMENT OF THE ALABAMA-COOSA RIVER

Full development of the Alabama-Coosa River would bring the river-basin area adequate hydroelectric power for industrial purposes; employment for its people; cheap water-rate transportation; freedom from floods; and would provide wonderful recreational areas for its people to enjoy. The river and its basin possess all the natural resources of people, water, and minerals, and all it needs is the direction of man in order that this area can make a significant contribution to the national defense and general economic progress of the State of Alabama and the entire Nation. Every dollar spent will bring more than its own value in return. It is estimated that the river and harbor and flood-control program accomplished to date by the Corps of Engineers has returned to the Nation more than $2 in value for every dollar expended.

I would like to urge that the State of Alabama and the Federal Government jointly pursue the full development of the Alabama-Coosa River, including a 9-foot channel from Rome, Ga., to Mobile, Ala. Such an undertaking would be beneficial not only to the immediate people and industries within the river basin but to Georgia, Alabama, and to the Nation.

I would like to encourage the State of Alabama and the Federal Government to undertake this project at the same time that the Alabama Power Co. is building five dams along the river in order that the work might be coincided and accomplished with the least amount of cost. Perhaps the State could assume the responsibility for building the docks in the various ports under the already established State Waterways Commission. The cities could also participate in the construction of such docks and warehouses. The counties and State jointly could contribute to the building of access roads to service the ports. The Federal Government would dredge the river and build the channel, and work on the flood-control installations.

Alabama should no longer ignore the bounty of this magnificent river system. Alabama must act now.

Girl Scouts of America

EXTENSION OF REMARKS
OF
HON. E. Y. BERRY
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. BERRY. Mr. Speaker, under leave to extend my remarks I include in the RECORD a statement about the Girl Scouts of the United States of America. I know that all Members of the Congress are familiar with the fine work that is being accomplished by the Girl Scout organization. However, I feel it is appropriate that we give special recognition to this worthwhile group and take note of some very interesting facts about the Girl Scouts.

During the week of March 6 to 12 the Nation will observe Girl Scout Week. As the organization of the Girl Scouts of the United States of America begin their 43d year, there are 2,350,000 girls and adults registered as members of the organization. In my own State of South Dakota there are well over 6,000 Girl Scouters.

South Dakota is known as the Land of Infinite Variety, because we are blessed with a variety of terrain and activities that are ideal for outdoor enthusiasts. Anne L. New, director of public information for national headquarters of the Girl Scouts, informs me that the State and National parks in South Dakota will no doubt be visited by many Girl Scouts during the coming camping season. I know that all of the other States will also experience considerable activity by the Girl Scouts as they develop resourcefulness through camping and outdoor living.

I like the Girl Scout theme for 1955, which is "Believe, Belong, Build."

Girl Scouts believe by knowing their country's history and traditions, by constantly renewing their promise to God and their country, by adhering to the Girl Scout laws, which emphasize the spiritual foundations underlying our society.

Girl Scouts belong by entering into scouting's free association of girls and adults, by learning through actual experience to accept people on the basis of their essential worth, by enjoying the personal satisfactions of belonging to a group with worthy objectives and a constructive program of learning by doing.

Girl Scouts build as each girl in scouting develops her own best capacities under the guidance of trained and devoted adults, as she explores her community and its resources and contributes to community welfare in line with her growing experience and ability, as she learns the duties and responsibilities of citizenship and strives to achieve the Girl Scout goal of becoming a happy, resourceful individual who is willing to share her abilities as a citizen in her home, her community, her country, and the world.

Some 10 million women have enjoyed Girl Scout experiences and certainly the training they have received through the organization has helped them to be better citizens. The Girl Scout organization is helping to build a strong America, and it is fitting that this Congress give the Girl Scouts recognition and support.

Hoover Commission Latest Report a Blow to Many Existing Veterans' Laws

EXTENSION OF REMARKS
OF
HON. JOE L. EVINS
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. EVINS. Mr. Speaker, the new Hoover Commission report to the Congress on personnel and civil service, in effect, is a repeat of the job and the recommendations made some 4 years ago by the original Hoover Commission.

Certainly the position taken in this new report is a repeat performance so far as the basic rights of veterans are concerned, inasmuch as the recommendations propose a further whittling away of the vital veterans' preference rights under existing law.

Foremost among the recommendations again put before the Congress, is the abandonment of the rule of three, the means by which initial selection for jobs in the Federal service has traditionally been made. The substitute offered would be a rule of five, which plainly means there will be no veterans' preference of any consequence—a system of select any and pass over others. A further recommendation is made for the elimination of the numerical rating and the present register system—the substitute offered being some loose device called the category system.

The Hoover Commission would also limit veterans' special appeal rights and otherwise whittle away at the statutes.

The recommendations in this regard should again be defeated. In this connection, Mr. Speaker, I desire to have inserted in the RECORD, along with my remarks, an editorial entitled "Hoover Commission Latest Report a Blow to Many Existing Veterans' Laws," which appears in the current issue of the National Tribune-The Stars and Stripes, a publication of the veterans of the United States.

The article is as follows:

HOOVER COMMISSION LATEST REPORT BLOW AT MANY EXISTING VETERAN LAWS—CALLS FOR REDUCTION IN COMPENSATION FOR SOME SERVICE-CONNECTED CASES—WOULD DENY HOSPITALIZATION TO NONSERVICE GROUP AND ASKS FOR PROMISSORY NOTES FOR CARE IN CERTAIN CASES—HOSPITAL PROGRAM CUT

The Hoover Commission last Sunday night released its special study on the vastness of Federal health and medical services, and recommended radical surgery of such services.

The Commission's economy knife was directed chiefly against medical services of the Veterans' Administration, but other medical programs such as those of the Armed Forces, Public Health Service, and other Federal arms also would be overhauled and curtailed.

The report, which deviated considerably on some major points from the recommendations of the Commission's medical task force which spearheaded the study, recommended:

That VA hospitalization and other medical services be confined only to service-connected ailments, and to those veterans with nonservice-associated ills who are truly indigent—and are proved to be so needy they can't go elsewhere.

That even needy veterans with non-service-associated illnesses be required to sign some non-interest-bearing promissory note, obligating them to pay for their hospitalization or other medical care at a future date should their financial state improve.

That the whole VA system of disability pension ratings for service-connected infirmities be made more realistic to the effect of such disabilities on earning capacity. (The Commission cited, as example, that present VA practice allows 30 percent disability, with pension of a minimum of $50 a month, for amputation of a great toe in service-connected cases.)

That there be more cross-servicing between the military hospitals to better fill some hospitals and eliminate others now only partially filled. Thus, sailors would be admitted to Army hospitals; soldiers might go to Air Force hospitals and, in general, admissions would be made for convenience rather than according to the kind of uniform the patient wears.

That merchant seamen patients be no longer eligible for care at public expense. These seamen are now cared for at 12 Public Health Service hospitals at a cost estimated by the Commission's medical task force at about $12 million a year.

That all plans to build any more VA general hospitals, excepting those actually under construction or contracted for construction, be withdrawn. This would forever kill the hopes of those fighting for a new VA hospital for the Washington area.

To effect many of its major recommendations, the Commission urged creation of a Federal Health Advisory Council to coordinate Government medical policies and oversee systematic cross servicings among the 66 administrative units now having medical functions.

The Commission also asked the Government to develop a voluntary, contributory system of medical and hospital insurance

for its civilian employees, rather than provide the medical services and hospitalizations in Government institutions.

The report complained that Federal agencies have assumed more and more responsibilities for complete or partial health and hospital care until they now service some 30 million Americans. The cost of such servicings, the report noted, now exceeds $4 billion, including $2,030,000,000 for disability allowances under "a cumbersome system which breeds inefficiency and huge waste."

Unless something is done, these costs and coverages will increase, it was stated in the Commission's report.

The medical report is the latest of a series the Commission is making on Government reorganization. An earlier medical task force for the first Commission on Organization of the Executive Branch of the Government made similar findings, in March 1949, on "enormous and expanding Federal medical activities, devoid of any central plan."

The report similarly complained that in addition to the wastage, the Federal medical services also drain off physicians and dentists from private practice. In 1954, the newest medical task force estimated, more than 6 percent of the active medical personnel in this country was employed by the Government.

The Commission's report is scheduled to be presented to Congress this week and since it touches on so many controversial points it is certain to meet many objections from legislators.

One, Representative CHET HOLIFIELD, of California, a nonveteran, who also is a member of the Commission, filed the sole Commission dissent, which accompanied release of the report and recommendations.

Congressman HOLIFIELD called the report recommendations "wholly unrealistic," and said he was opposed to curtailment of any hospital and medical facilities "in the face of impending civilian defense needs."

The Commission's report differed radically from that of its own task force in the recommendations for medical care of veterans with non-service-connected ailments. In effect, the Commission recommended a form of "means test" of financial ability to pay. These veterans, in non-service-connected illnesses, who could pay for part or all of VA hospitalization costs, would have to do so. Others would have to sign obligations for future payments, if they could afford this repayment in the future.

The task force, however, had recommended a form of GI bill of health rights which would offer veterans free care for even non-service-connected ills occurring within 3 years after separation from the service. After that, except for service-associated ailments, veterans would be on their own.

As now practiced, the Commission said, veterans with non-service-connected disabilities can get VA care only if beds in VA hospitals are available, and only if they sign a statement of inability to pay for such care. However, the Commission pointed out, the Veterans' Administration is prohibited by law from challenging such can't-pay statements.

On the task force's 3-year limit on VA hospitalization rights, the Commission said it believes that "the sentiment of American people is that a sick and really indigent veteran should be provided care in a Veterans' Administration hospital." But it recommended that the can't-pay statement should be verified by VA investigators, and that VA be authorized to collect wherever such statements are not substantiated.

"It is difficult to believe," the Commission said in its report, "that all of the approximately 369,000 such veterans given care last year were actually unable to pay for at least part of their hospital and in-patient medical care."

Eisenhower's So-Called Power Partnership Reverses Half a Century of Public Power Policy

EXTENSION OF REMARKS
OF
HON. CLAIR ENGLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. ENGLE. Mr. Speaker, the principle of low-cost public power with preference to municipalities and other public agencies has been stated at least 13 times in acts of Congress dating from 1906. In other words, for almost 50 years the Federal Government has consistently followed a policy of selling publicly produced power at the lowest possible rates, giving preference to municipalities and public agencies. Furthermore, that has been the policy of the executive agencies in the generation and sale of electric energy during all of that time, including the present administration up to and including the issuance of the power statement made by the Department of the Interior with the approval of the President in August of 1953.

The adoption of the so-called power partnership program therefore is a reversal of almost half a century of power policy in the Federal Government. It is a complete reversal of the low-cost power principle and a complete abandonment of the preference to municipalities and other public agencies. If this new policy is adopted and put into effect, there will be no more low-cost public power, and public agencies will no longer be able to secure such power on a preference basis, or at all.

The reversal of this historic policy in the Federal Government will have the effect of turning over for the exclusive benefit and profit of the private power monopoly the major yet-to-be-developed hydroelectric resources of the Nation. The huge investments of the Federal taxpayers in these great projects will be in a large measure handed over for the profitable use of the private utilities.

It gives the private utilities the benefit of the Government's low interest rate on the storage features of these projects used for power—no doubt the power companies would be glad to have the Federal Government build the storage features on all their projects on the same basis.

This would enrich the treasuries of the private utilities but it will leave the general public without the benefit of a low-cost power supply. The private power monopolies, operating with what amounts to a guaranteed profit on their investment, will be able to charge the power consumers whatever price they choose to fix or can wangle from the various State agencies established for the purpose of regulating power rates. In my opinion, this is exactly the opposite direction to which the American people want to go.

CVP PROJECT CITED

An example of how this policy will operate can be readily seen by asking what would have happened if such a power-partnership principle had been applied in the construction of the Central Valley project. Under those circumstances, the private power company would have built the powerhouses at Shasta and Keswick, paid the Federal Government a price for storing the water in Shasta Dam, and then distributed and sold the power at its established commercial rate throughout its service area in California. There would have been no low-cost Government public power for the farmers in the irrigation districts in California, or for the Federal installations and the municipalities using that power at the present time. There would have been no low-cost public power in the market with which to compare the rates of the private utility, thus forcing a more favorable contract as has been done for the city of Redding. There would be no power to operate the pumps at the delta to lift the water of the Central Valley project to the San Joaquin Valley, unless the Federal Government turned around and bought some of its own power back from the private utility for that purpose, presumably at a much higher rate than is presently being charged the farmers of the San Joaquin Valley for the use of power. The revenues from power which presently are used to subsidize the irrigation development in the San Joaquin Valley would be nonexistent. In short, the Central Valley project would never have been built and today would not be serving the needs and growth of the State of California.

Even a more dramatic example is the possible application of this principle on the power development on the Columbia River. Great industrial development has followed the low-cost available power in the Northwest; however, had private power companies taken over the development of these powerhouses, the cash receipts they paid to the Federal Government for storing the water would be returned to the United States Treasury and the power would have been sold on the market at the going commercial rate. The great aluminum plants that contributed so much during the Second World War would not have grown up around that kind of a power market.

PUBLIC POWER AN ASSET

There is little real distinction between the taxpayers and the power consumers of an area. Everybody who turns on a light pays taxes in one form or another, and everybody who turns on a light pays a light bill. Low-cost public power produced in this area is a rebate on taxes to every consumer who turns on a light. If that public power is turned over to a private utility, the light consumer pays the commercial rate and the private power company puts the profit in its pocket. Low-cost power is an asset in every area in which it is produced and distributed. History has shown that the volume of use of electricity and industrial growth rises in proportion to the reduction in power rates. That has been true not only in the Northwest, but in the TVA area. Turning the powerhouses on the proposed Trinity River project over to the P. O. & E. Co. is an

assessment against every man who uses an electric light or electric power in his business in this whole area.

While belaboring the partnership idea at home, and calling on the local people to build their own projects, no such philosophy is being advocated or put in effect overseas. We are committed to spend nearly $2 billion—1.7 billion—for irrigation and power developments in foreign lands. This compares with roughly two and one-half billion—$2.4—spent in over a half century in this country. Not one penny of this foreign expenditure will be repaid, principal or interest, while here at home repayment is becoming the main test for new projects. Why has our Government agreed to give away nearly as much for irrigation and power development in 6 years of the Marshall plan as we spent in 50 years of reclamation here at home? Obviously because it is a good thing for the economies of those countries we are trying to help. I am in favor of doing a little something for America too as we go along—and without a lot of argument about partnership, and how soon the project is going to pay back to the last penny.

PROGRAM INCONSISTENT

But the inconsistency in this administration's clampdown on irrigation and power development does not end there. The projects under construction in Europe today with your money are all for power—nothing for irrigation—a million one hundred and fifty-five thousand kilowatts—1,155,000 kilowatts. If anyone suggests that the Federal Government here build a steam plant, a howl goes up to high heaven. But in Europe most of the power being built is steam power—900,000 kilowatts of it, only 255,000 in hydroelectric power. We have had knockdown and dragout fights over the Federal Government building transmission lines, but in our foreign aid program we build not only the transmission lines but the distribution systems as well.

Is this "creeping socialism" here at home, and something good and beneficial in foreign countries? The answer is no—it is good for those countries, and it would be good for us. But here we have a well-heeled power lobby that picks the pockets of the power consumers in order to poison their minds with false propaganda.

De Valera Approves Joint Talks Proposal

EXTENSION OF REMARKS
OF
HON. JOHN E. FOGARTY
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1955

Mr. FOGARTY. Mr. Speaker, on yesterday I was privileged to insert in the CONGRESSIONAL RECORD remarks concerning the proposal of Mr. Costello, Premier of Ireland, to engage in mutual discussion of problems between the Republic and the officials of the six-county government in Ireland. In the February 18 issue of the Irish Times appears an article giving the reaction of Mr. Eamon De Valera, former Premier of Ireland, to the proposal suggested by Mr. Costello.

The complete harmony of viewpoint of these two opposing leaders of the Irish Republic is indicative of the universal opinion held by the Irish people concerning the demand for the unification of their island country. Mr. De Valera shows a complete accord with Mr. Costello regarding the desirability of mutual talks concerning the various problems, which must, of necessity, arise between the two areas of the country. He also pointed out the impossibility of any agreements being reached on the matter of mutual defense between Great Britain and Ireland, so long as partition continued.

During the course of his address before an audience in Manchester, England, Mr. De Valera concisely set forth the difficulties underlying any consideration of the question of mutual defense between Great Britain and Ireland. He also very forcefully pointed out that the principle by which those in the six counties demanded separation from the rest of Ireland, applies equally to the majority in Tyrone, Fermanagh, Derry city, South Down, and South Armagh, where that majority desired to be separated from the six counties and reunited with the Republic. If the principle is valid in justifying the cutting off of the six counties from the rest of Ireland, then certainly that same principle is equally valid in cutting off these additional areas from the six counties and returning them to the Republic of Ireland from which they were forcibly removed.

The resolution which I have presented to this House, House Resolution 32, would aid in bringing about the mutual discussions and amicable settlement of the border problem in Ireland. The urging for such a solution, which favorable consideration of my resolution would provide, could well prove a determining factor in achieving an end to partition in Ireland.

The article reporting Mr. De Valera's reaction to Mr. Costello's proposal, as well as the article reporting on Mr. De Valera's speech in Manchester are being made a part of my remarks, because I feel that both articles are of genuine interest to the Members of the House. They are as follows:

NORTH-SOUTH TALKS PROPOSAL ENDORSED BY MR. DE VALERA

Mr. Eamon de Valera, T. D., said in London on Wednesday that a meeting between the Governments in Dublin and Belfast was an obvious step, which should be taken. But on the question of defense talks, he said that the Irish people could be relied on to take the necessary measures. There was no possibility of discussing this subject while the country remained divided.

Mr. de Valera said this is an interview with a representative of the Yorkshire Post. He was commenting on an interview with Mr. Costello published in that newspaper, and in the Irish Times yesterday, which quoted the Taoiseach's readiness to meet Lord Brookeborough, and on a leading article in the Yorkshire Post.

The report of the interview quotes Mr. de Valera: "I am particularly glad to see a paper like the Yorkshire Post showing an interest in this question, which is of fundamental importance," and goes on: He added that the attitude of Britain and of its publicists when the question of the partition of Ireland arose and was discussed, was: "Oh, it's a matter for the Irish themselves. If only the Irish would agree among themselves."

"You seem to want to have it both ways," Mr. de Valera commented. "When there's a possibility of Irish agreement you say, 'We must have something to do with it.' If that's your attitude you must share the responsibility for the continuance of partition. Those of us who have been dealing with this matter over the past years feel that this shows a little of the old imperial approach. It is the wrong way.

"The way to get good relations between the two countries is to admit that the question of Irish policy is a matter for Ireland. There should be agreement on matters of common concern between the representatives of Ireland, on the one hand, and the representatives of Britain, on the other. That's the way to get a lasting result. When approached in that way you have the goodwill of both peoples with you."

"If there are aspects of the defense of the two countries that are of common concern, then the Irish people through their own parliament and in their own interests can be relied on to take the measures considered necessary," he said. "There is no possibility even of discussing this while our country remains divided.

"Mr. Costello has indicated the willingness of his Government to be represented at such a meeting," he said. "The question now is, what is Lord Brookeborough's attitude?"

(Mr. de Valera was in London to attend the funeral yesterday of Mr. John Dulanty, the former Ambassador to Britain.)

REPUBLIC'S ATTITUDE

Mr. Eamon de Valera, T. D., addressing the Manchester branch of the Anti-Partition League in Manchester last night, said he was glad that important papers such as the Yorkshire Post, had shown themselves interested in the question of partition and about what steps might be taken about the reunification of the country. He recalled that Mr. Costello had expressed his willingness to meet the representatives of the six-county government. What one wanted to know now was what would be Lord Brookeborough's attitude.

As far as the people of the 26 counties were concerned, their first objective must be to secure unity with the rest of the country. Until this objective was achieved, they could not regard national independence as having been attained.

The question at the moment was to secure independence, rather than confederation or how to preserve it. If independence was secured, then the people of all Ireland would have the same anxiety to preserve the nation's independence as other nations, and would naturally be ready to consider what steps they might take, in cooperation with other countries, to make their independence secure. An All-Ireland Parliament, completely free, would be able to consider what steps it might take with Britain and other countries toward mutual defense. Defense policies could not usefully be discussed under existing circumstances. That was also the position largely during the last war. If there was to be any reconsideration of Ireland's attitude in a possible future war it could only be done by a united Ireland.

Mr. de Valera told his listeners that the Yorkshire Post had stated that certain British interests were paramount, and that the claim of Britain to use Irish ports, etc., would have to be maintained. "Britain cannot have it both ways," he asserted. "If

this attitude is taken up, Britain must accept her share of the responsibility for the continuation of partition, and cannot wash her hands of it. The claim put up by the Yorkshire Post cannot be admitted. It savors of the old imperialism which we experienced in the past."

Referring to the attitude of those in the six counties who wanted to remain separated from the rest of their fellow countrymen, Mr. de Valera said that the principle on which they demanded separation would equally apply to the majority of the people, of say, Tyrone, Fermanagh, Derry city, South Down and South Armagh, who desired to be separated from the Belfast Parliament and to be attached to the 26 counties. At present the majority in those areas were being held against their will, and coerced to remain under a jurisdiction to which they would not willingly submit.

Prepare To Begin Work on Beardstown's New Seawall

EXTENSION OF REMARKS
OF
HON. SID SIMPSON
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. SIMPSON of Illinois. Mr. Speaker, the Illinois State Journal, of Springfield, Ill., under date of February 27, carried an article dated at Beardstown, Ill., February 26, to this effect, and I quote:

Prepare To Begin Work on Beardstown's New Seawall.

Beardstown, Mr. Speaker, is in Cass County, Ill., and in the 20th Illinois District. Representing that area, it was my privilege to introduce a bill for the original authorization for this work which is just starting as outlined in the Illinois State Journal.

Many years ago at the expense of the city of Beardstown and the State of Illinois, a so-called seawall was constructed. It is my understanding that at that time, the engineers stated this wall was constructed 28 feet and would be high enough to hold back any flood water of the Illinois River that might come in the future. This did not prove to be correct. In 1943, when the Illinois River was at flood stage this same seawall had to be sandbagged to a height of over 32 feet. Even then, their situation was so precarious that older people and children were evacuated from the city.

Last year, the Civil Functions Subcommittee of the Appropriations Committee included funds to start this project which is just now beginning to take shape. The budget this year has additional funds recommended to be allotted for further construction. The total cost of this project, Mr. Speaker, is estimated at $3 million. This is to protect a city of over 6,000 people, factories, flour mills, railroad shops, churches, schools, and homes. It is justified in every way.

I simply wish to take a few moments before the Congress to personally thank the United States Army engineers in Washington, in Peoria, and in the Chicago office for their help and cooperation. I wish to thank the Civil Functions Subcommittee for their fine cooperation as well as the full Appropriations Committee. I wish to thank the entire membership of the House for agreeing to the authorization and the first appropriation.

I am doing this, Mr. Speaker, knowing full well that the citizens of Beardstown agree with my statements here today in thanking the House in their behalf for what they have done.

PREPARE TO BEGIN WORK ON BEARDSTOWN'S NEW SEAWALL

BEARDSTOWN, February 26.—Work of driving the sheet piling, which is a preliminary to the beginning of construction of the new seawall here, will start Monday. Several men started unloading the several large loads of piling Wednesday and 10 men will be on hand Monday.

The Peoria Barge Terminal Co. has the subcontract for putting down the piling. The Myers Construction Co., which has established offices at Main and Jackson Streets, has the contract for building the $3 million wall.

Report of Presidential Committee Regarding Supplies and Reserves of Coal, Oil, and Natural Gas for Defense and Peacetime Requirements

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. VAN ZANDT. Mr. Speaker, early in July 1954 a group of Congressmen representing the soft-coal fields in eastern United States visited the White House and conferred with President Eisenhower regarding depressed conditions in the industry that were having adverse effects on the railroads and related industries.

After our conference with President Eisenhower the Chief Executive appointed an Advisory Committee on Energy Supplies and Resources Policy. The Director of the Office of Defense Mobilization, Arthur Flemming, was designated as chairman with the heads of the following agencies serving as members; Departments of State, Treasury, Defense, Justice, the Interior, Commerce, and Labor.

The White House directive respecting the committee's assignment included the following specific statements:

At the direction of the President the committee will undertake a study to evaluate all factors pertaining to the continued development of energy supplies and resources fuels in the United States, with the aim of strengthening the national defense, providing orderly industrial growth, and assuring supplies for our expanding national economy and for any future emergency.

The committee will review factors affecting the requirements and supplies of the major sources of energy including: coal (anthracite, bituminous and lignite, as well as coke, coke tars, and synthetic liquid fuels), petroleum, and natural gas.

The committee has been aided greatly by an able and representative task force appointed pursuant to the President's instructions. The committee's recommendations are set forth as follows:

THE WHITE HOUSE REPORT ON ENERGY SUPPLIES AND RESOURCES POLICIES

INTRODUCTION

The importance of energy to a strong and growing economy is clear. As conditions of supplies and reserves of coal, oil, and natural gas change and as both defense and peacetime requirements come more clearly into focus, the bearing of Government policies upon energy needs reexamination.

What degree and kind of public regulation is appropriate to the present situation and future outlook? What trade policies for energy supplies will most effectively express the overlapping national needs for adequate protectable supplies in case of war and for encouragement of economic growth of this country and friendly countries elsewhere in the world? What steps may be taken to improve the economic position of the coal industry, now seriously depressed, without penalizing competing industries, as a means of enhancing the ability of that industry to contribute to the national defense? More particularly, should specific changes be made in tax, freight rate, research, Government purchasing, or other policies in the energy field?

These and other policy questions press for careful review and decision.

On July 30, 1954, the President established an Advisory Committee on Energy Supplies and Resources Policy. The Director of the Office of Defense Mobilization was designated as chairman and the heads of the following agencies served as members: Departments of State, Treasury, Defense, Justice, the Interior, Commerce, and Labor.

The White House directive respecting the committee's assignment included the following specific statements:

"At the direction of the President, the committee will undertake a study to evaluate all factors pertaining to the continued development of energy supplies and resources fuels in the United States, with the aim of strengthening the national defense, providing orderly industrial growth, and assuring supplies for our expanding national economy and for any future emergency.

"The committee will review factors affecting the requirements and supplies of the major sources of energy including: coal (anthracite, bituminous, and lignite, as well as coke, coke tars, and synthetic liquid fuels); petroleum and natural gas."

The committee has been aided greatly by an able and representative task force appointed pursuant to the President's instructions. The committee's recommendations are set forth below.

RECOMMENDATIONS

1. Natural gas regulation

We believe the problem of natural gas regulation should be approached from the viewpoint of assuring adequate supplies and the discovery and development of additional reserves to support such supplies, in the interests of national defense, an expanding domestic economy, and reasonable prices to consumers.

To secure these objectives, it is essential to give due consideration to (1) the operations known as the production of natural gas, (2) the transportation of gas in interstate transmission lines, and (3) the distribution of gas in municipalities. Individual companies may engage in more than one of these activities. Each operation of such companies should be treated by like criteria according to its appropriate industry function.

In the production of natural gas it is important that sound conservation practices be continued. This area of conservation management is under the jurisdiction of State conservation commissioners. In the interest of a sound fuels policy and

the protection of the national defense and consumer interests by assuring such a continued exploration for and development of adequate reserves as to provide an adequate supply of natural gas, we believe the Federal Government should not control the production, gathering, processing, or sale of natural gas prior to its entry into an interstate transmission line.

The interstate transmission of natural gas by the interstate transmission lines and the subsequent sale of such gas for resale is a public utility function and should be under the regulation of the Federal Power Commission. In considering the certification of new lines and applications for increased rates based on new or renegotiated purchase contracts, the Commission should consider, in order to provide protection for the consumer, not only the assurance of supply but also whether the contract prices of the natural gas which the applicant has contracted to buy are competitively arrived at and represent the reasonable market field price, giving due consideration, in the interest of competition, to the reasonableness and appropriateness of contract provisions as they relate to existing or future market field prices.

The several States or their political subdivisions should continue to provide the public utility regulation of distributing companies in accordance with usual utility practices.

Thus the complete cycle of natural gas production, transmission and utilization will be appropriately regulated: the production and conservation of natural gas by the State conservation commissions; the interstate transmission of natural gas by the Federal Power Commission; and the distribution by the local public utility commissions.

2. Sales below cost by interstate pipeline companies

The basic principles regarding the regulation of natural gas and the use of alternative energy resources should be as far as possible that of free choice by the consumer and free and fair competition among suppliers. This, it is confidently thought, will provide most effectively for the assurance and flexibility of energy supply, both for economic growth and strong security readiness. But sales either for resale or direct consumption below actual cost plus a fair proportion of fixed charges which drive out competing fuels constitute unfair competition and are inimical to a sound fuels economy.

The committee recommends, therefore, that appropriate action be taken that will prohibit sales by interstate pipelines either for resale or for direct consumption, which drive out competing fuels because the charges are below actual cost plus a fair proportion of fixed charges.

3. Eminent domain for natural-gas storage

The power of eminent domain for the acquisition of surface and mineral rights for the development of underground storage reservoirs should be granted subject to appropriate safeguards to protect the public safety, including the mining industry.

4. Crude oil imports and residual fuel oil imports

An expanding domestic oil industry, plus a healthy oil industry in friendly countries which help to supply the United States market, constitute basically important elements in the kind of industrial strength which contributes most to a strong national defense. Other energy industries, especially coal, must also maintain a level of operation which will make possible rapid expansion in output should that become necessary. In this complex picture both domestic production and imports have important parts to play; neither should be sacrificed to the other.

Since World War II importation of crude oil and residual fuel oil into the United States has increased substantially, with the result that today these oils supply a significant part of the United States market for fuels.

The committee believes that if the imports of crude and residual oils should exceed significantly the respective proportions that these imports of oils bore to the production of domestic crude oil in 1954, the domestic fuels situation could be so impaired as to endanger the orderly industrial growth which assures the military and civilian supplies and reserves that are necessary to the national defense. There would be an inadequate incentive for exploration and the discovery of new sources of supply.

In view of the foregoing, the committee concludes that in the interest of national defense imports should be kept in the balance recommended above. It is highly desirable that this be done by voluntary, individual action of those who are importing or those who become importers of crude or residual oil. The committee believes that every effort should be made and will be made to avoid the necessity of governmental intervention.

The committee recommends, however, that if in the future the imports of crude oil and residual fuel oils exceed significantly the respective proportions that such imported oils bore to domestic production of crude oil in 1954, appropriate action should be taken.

The committee recommends further that the desirable proportionate relationships between imports and domestic production be reviewed from time to time in the light of industrial expansion and changing economic and national defense requirements.

In arriving at these conclusions and recommendations, the committee has taken into consideration the importance to the economies of friendly countries of their oil exports to the United States as well as the importance to the United States of the accessibility of foreign oil supplies both in peace and war.

5. Petroleum refining capacity

The Departments of Defense and the Interior should have studies made by their staffs and expert advisers as to the adequacy of present and prospective refinery capacity, both as to amount and dispersal, as well as other factors, to determine the need for any measures to maintain refinery capacity necessary for defense purposes, particularly the capacity operated by small, independent refineries.

6. Tax incentives

(a) Present tax provisions on coal, oil, and gas production have been an important factor in encouraging development of energy sources at a pace about in keeping with demand. Further analysis and study by the appropriate branches of the Government should from time to time be made to review the amount and method of making such allowances to maintain proper relationships with continuing changes in other features of the tax law. Any changes which may be proposed in the future must be analyzed in terms of their probable effect on development of domestic resources needed for economic progress and national defense as well as the fiscal and tax policies of the Government.

(b) Retroactive tax legislation and special relief provisions should be avoided.

(c) Accelerated amortization should be used only to insure the maintenance of a sound mobilization base for energy supplies.

7. Research and development program for coal

We recognize that coal is a great national asset and endorse a cooperative study to determine what research and development could be undertaken. The coal industry and both Federal and State Governments should participate in this study and its cost.

8. Unemployment and business distress in the coal industry

We recognize that serious unemployment and business distress exist in the coal industry and recommend that the Interdepartmental Committee on the Soft Coal Industry be continued for the purpose of developing for Cabinet consideration specific action programs to alleviate these conditions.

9. Coal freight rates

In order to maintain coal's vitality as an instrument of national defense by improving currently its ability to compete with other fuels, the railroads, by voluntary action, and, in the absence thereof, the Interstate Commerce Commission, by compulsory order, should adjust freight rates to the extent necessary to remove the excessive and disproportionate contribution that coal rates are making to meet the cost of other unprofitable services of the railroad industry. Train load rates should be established to reflect the lower costs of such service.

10. Coal exports

(a) The Government should urge foreign governments to reduce unreasonable discriminatory restrictions against imports of United States coal.

(b) The Government, when making foreign loans, should use its best efforts to obtain provisions to prevent discrimination against United States coal. Discrimination would be judged to exist when United States coal imports are disallowed despite its availability at costs no higher than foreign coal.

(c) The Government should expedite efforts to establish credits through the Export-Import Bank to foreign banking institutions in countries where there is reasonable prospect of repayment so that American coal exporters can offer more competitive payment terms to foreign customers.

(d) Where United States coal can be supplied competitively with other available coal, the Government should use its best efforts to enlarge the participation of United States coal in the foreign aid program.

(e) The Government should compensate for higher shipping costs when incurred as a result of the requirement that 50 percent of all shipments be in United States ships at fair and reasonable United States market rates.

11. Mobilization requirements for coke

The Committee believes that present and prospective rates of shutdown and dismantling of slot-type coke ovens will leave inadequate coking capacity to support full mobilization production of steel and other essential wartime industry.

On the basis of national security, coke requirements can only be met if the Office of Defense Mobilization is directed to prepare plans to make the necessary arrangements and tests to expand coke production rapidly in the case of an emergency.

12. Government fuel purchasing policy

In working out a more consistent and equitable coal purchase policy, the following steps should be taken:

(a) The Secretary of Labor under the Walsh-Healey Act should pursue his present policy of making determinations of wage standards applicable in the coal-producing areas and should establish these standards at the earliest practicable date.

(b) The Government agencies should, to the extent practicable, purchase not less than 75 percent of their estimated annual coal requirements on a contract basis.

(c) All Government agencies purchasing coal should, prior to and after the award of the contract, verify the quality of the coal offered and supplied to the agencies.

(d) All Government contracts for the purchase of coal should contain appropriate escalator clauses which protect the buyer and the seller.

(e) In instances where it is not possible for a Government agency to take all the coal for which it has contracted, the deficit should be apportioned equitably among all participating contract suppliers without penalty to the Government.

(f) Coal suppliers should be required to submit, along with their bids, proof of their ability to produce the requirements at the times specified.

(g) All coal suppliers to the Government, regardless of size, should comply with the Federal Coal Mine Safety Act.

(h) All transactions with the Government relating to coal purchases and supply should be public information.

(i) The domestic fuel purchasing policies set forth above should be applied to purchases of coal by companies acting as agents for the Federal Government, as well as to purchases made direct by Government agencies.

Prior to the purchase of any fuel by a Federal Government agency having a large annual use of fuel, that agency should request advice from the Office of Defense Mobilization as to how this purchase can contribute to the maintenance of a strong mobilization base within the domestic fuels industry. The Office of Defense Mobilization should be directed by Executive order to develop a mechanism for accomplishing this objective.

H. R. 1

EXTENSION OF REMARKS
OF
HON. VICTOR A. KNOX
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1955

Mr. KNOX. Mr. Speaker, on February 18 the House passed the Reciprocal Trade Agreements Act to which I was opposed and voted against because of the domestic market being faced with cheap foreign articles that are imported into this country in direct competition with our industries. Our industries are suffering from the lack of markets, and this ultimately produces unemployment.

My position is well fortified through a news article from the Escanaba Daily Press, a daily newspaper published in my congressional district. The article sets forth conditions that exist in a small industry of the 11th District of Michigan.

Under permission granted, I include the article entitled "Cheap Foreign Plywood Is Threat to United States Industry," and that it become a part of the RECORD so my colleagues may be informed as to how cheap foreign products are threatening small industries in the United States of America:

CHEAP FOREIGN PLYWOOD IS THREAT TO UNITED STATES INDUSTRY

The American hardwood plywood industry, taking an alarmed look at the rising tide of unfair import competition, is asking that tariff concessions be modified and quotas imposed on imports of hardwood plywood.

The story of the import plywood problem and its effect upon the industry in Escanaba, Gladstone, and throughout the Nation was told recently in Escanaba by R. D. Behm, Chicago, director of the trade-promotion program for the Hardwood Plywood Institute. Behm talked to the Escanaba Rotary Club, where he was introduced by Russell Lee, Birds Eye Veneer Co. official.

Behm reported that the domestic industry is being seriously injured by tariff reductions that have resulted in a sharp rise in imports.

LOST 300 JOBS

"The imported plywoods are being sold in America at unfair prices much below those required by domestic producers to remain in business," Behm noted. He said the Hardwood Plywood Institute cited these facts in an application for an investigation by the United States Tariff Commission.

The application to the Tariff Commission to modify tariff concessions on cheaply produced foreign plywood and impose quotas on imports will be heard in Washington on March 22.

Birds Eye Veneer Co. and Northwestern Plywood and Veneer will be among members of the Hardwood Plywood Association represented at the hearing. These 2 local industries, together with related woods and sawmill operations, have lost an estimated 300 jobs to the community because of the cheap foreign imports.

The mounting volume of imports, according to the application, has decreased domestic producers' share of the American market, depressed domestic prices, and caused substantial unemployment and wage losses among American plywood workers.

IMPORTS CLIMBING

Tariff concessions were made in 1936, 1949, and 1950, the application pointed out. The last revision provided for reductions of up to 50 percent from the rates prevailing in 1949.

Detailing the results of the lowered duties, the application asserted that—

Imports rose from 63,362,000 square feet in 1950 to 220,424,000 square feet in 1953, an increase of 348 percent. They have continued to climb in 1954, amounting to 133,750,000 square feet in the first half of the year, compared with 98,831,000 square feet in the corresponding period of 1953. This represented a gain of 35.3 percent. Third quarter totals recently released show imported plywood amounting to 124 million square feet against domestic production of 177 million square feet.

Japan, which accounts for 57.4 percent of the imports, boosted its shipments to this country by 506 percent last year, as compared with 1952. Finland, the second-largest exporter, registered a gain of 583 percent.

FLOODING THE MARKET

Shipments of domestic producers, on the other hand, dropped from 451,663,000 square feet in the first 6 months of 1953 to 337,043,000 square feet in the first half of this year.

In 1951 the ratio of domestic hardwood plywood on the domestic market was 12 square feet to each square foot of imported plywood. By the first half of this year the ratio had shrunk to 2.5 square feet to one. Currently, the rate is closer to 1.4 square feet to one.

The Bureau of Labor Statistics shows that the price index for hardwood plywood declined from 108.4 in 1953 to 101.9 for January and February 1954. The price index for all commodities, however rose from 110.1 in 1953 to 110.8 for January of this year.

HUGE WAGE LOSS

A survey of 43 domestic plywood plants, among the industry's total of 142, revealed that employment was 19.3 percent lower in the first quarter of 1954 than in the similar period of 1953. The reduction in hours worked amounted to 26.8 percent.

Estimated wage losses to American workers as a result of this curtailed output was $2 million Extension of the same rate of reduction to the entire industry would indicate a total wage loss of $5 million to $6 million for that period.

The Institute's membership accounts for about 60 percent of the total domestic production of market hardwood plywood, according to the application.

While Canada is among the larger plywood exporting countries, the application said, production costs of Canadian manufacturers do not permit them to sell at prices comparable to the unfair prices charged by Japanese and Finnish producers.

Stop the Smuggling of Narcotics

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1955

Mr. ANFUSO. Mr. Speaker, since the end of World War II there has been a sharp increase in the crime rate throughout the country, due in large measure to the social upheavals during and after the war, the lack of discipline, and the breakup of many family units. Most deplorable is the growth of juvenile delinquency, particularly the large number of youthful drug addicts.

In recent years narcotic addiction among teen-agers has reached alarming proportions in many of our major cities. These young addicts are often driven to commit serious crimes in order to obtain the necessary funds to purchase drugs. Unfortunately, the American public is not sufficiently aware of the problem and the menace it constitutes to our youth. Our laws are too lax in meting out punishment to those who peddle drugs among teen-agers, and the hand of our Federal Government must be strengthened if we desire to gain control of the situation.

Above all, it is absolutely necessary that we locate the origin and roots of the narcotics trade and expose the evil men who bring this poison into our country for illicit purposes and force it into the hands of inexperienced and thrill-seeking youth. Most narcotics are imported from the Far East, the Middle East, and Africa. They are smuggled into this country by ship and plane as well as across our borders, and then distributed to the dope traffic to continue its deadly work, whose only harvest consists of broken and agonized lives.

If we can succeed in plugging up this evil trade and corrosion of human lives, we will have solved much of the problem. About 2 or 3 years ago, Harry M. Durning, the collector of customs for the port of New York, stated that only 1 of every 5 ships entering the port of New York can be searched for smuggled narcotics because of the lack of sufficient personnel in the customs service. I do not know to what extent this situation has been remedied since then, but the problem is still very much with us.

Congress must take effective action to suppress this vile trade by giving the Bureau of Customs the means and the men with which to operate in the proper enforcement of our antismuggling laws.

For this reason, I have introduced today a bill in Congress which provides for

the establishment of a United States customs port patrol and a United States customs border patrol in the Treasury Department's Bureau of Customs in order to increase the effectiveness of this agency in dealing with the smuggling of narcotics into this country. These are to be law-enforcement bodies with adequate personnel and equipment for use in patrol work in our harbors, airports, along the coasts and borders. Officers of these patrol services shall be empowered to enforce the antismuggling laws of the United States, to make searches of all vessels, as well as seizures and arrests in accordance with our laws.

Mr. Speaker, the customs patrol officer is our best and most effective obstacle to the constant flow of illegal narcotics from our docks, airports, and borders. He is the only law-enforcement officer regularly assigned on a 24-hour basis to apprehend and arrest the dope smugglers. By increasing the ranks of these men and giving them the necessary authority to pursue their antismuggling assignments, we shall be able to root out this evil.

Parents, teachers, welfare agencies, civic organizations, church groups, and most of all, our young people themselves, whose health, morale, and careers are at stake, will heartily endorse this action by Congress. I urge all of my colleagues to support my bill and I call for its speedy enactment. Remember that each day's delay means the additional sacrifice of young American lives.

Ernest Hemingway

EXTENSION OF REMARKS
OF
HON. RICHARD W. HOFFMAN
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. HOFFMAN of Illinois. Mr. Speaker, in 1954, a coveted honor was awarded to a distinguished native of Oak Park, Ill., when Mr. Ernest Hemingway received the Nobel prize for literature. Another tribute, which I am sure was warmly appreciated by Mr. Hemingway, was occasioned by the announcement of this award.

This tribute came from a group of outstanding Pan-American scholars and educators, assembled at the bicentennial conference of Columbia University on Responsible Freedom in the Americas, and was the result of the only resolution approved by the conference. Six former presidents of Latin American Republics were participants in the conference, Dr. Alberto Lleras Camargo, of Colombia; Dr. Eduardo Santos, of Colombia; Dr. Galo Plaza, of Ecuador; Dr. Ricardo Alfaro, of Panama; Dr. Otilio Ulate, of Costa Rica; and Dr. Carlos Davila, of Chile, who is now secretary general of the Organization of American States.

The conference approved a resolution submitted by Dr. Jorge Manach, of Cuba, which called for a commendatory message to be sent to Mr. Hemingway, and the following message was sent in behalf of the conference:

By awarding Ernest Hemingway the literature prize for 1954, the Nobel Prize Committee has rendered a well-deserved tribute to a great novelist whose works have reflected with virile energy a passion for liberty and justice, a love of the heroic in man, and a generous concern for human suffering. Assembled on the occasion of the bicentennial conference of Columbia University on Responsible Freedom in the Americas, writers and teachers of both Americas send their congratulations to the great author of The Old Man and the Sea. In their behalf this message is sent.

American Good Government Society Honors Hon. Howard W. Smith, of Virginia

EXTENSION OF REMARKS
OF
HON. WATKINS M. ABBITT
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. ABBITT. Mr. Speaker, it was my privilege to attend, on Tuesday evening, February 22, 1955, the third annual George Washington awards dinner of the American Good Government Society.

The American Good Government Society was formed in 1942 for the purpose of fostering good government in America and to reinspire a wide and deeper appreciation of the American political system, through a clearer understanding of it.

This organization is endeavoring to bring to our citizens the realization of the importance of maintaining our Government as it was founded and set up under the Constitution. It is rendering a real and important service to the country.

In 1952 the society established the George Washington awards that it presents to outstanding citizens who have rendered distinguished service beyond the call of duty to good government in America.

It has presented two awards for each of the past 3 years. In 1953 the society honored Senator HARRY F. BYRD and the late Senator Robert A. Taft. In 1954 the recipients were the Honorable Herbert Hoover and Gov. Allan Shivers, of Texas. This year, the society honored the Honorable HOWARD W. SMITH, Member of the House of Representatives from Virginia, and Gen. Robert E. Wood.

I am most pleased that the outstanding services that Representative SMITH has rendered our Nation are being recognized by the presentation of this award.

"Judge" SMITH, as he is affectionately called by his colleagues and many friends, is one of the outstanding statesmen of America today. He stands for and represents the highest ideals in public life. He is one of the most beloved as well as one of the most influential Members of the House of Representatives. He is admired for his keen intellect, his ability to grasp a situation quickly and for his determination to do what he thinks is right and best for his country regardless of the political consequences. All of us love and admire him for the statesmanship he has exhibited down through the years and join with the society in its description of his virtues set out in the award which is as follows:

HOWARD WORTH SMITH, statesman, lawyer, farmer and banker, has served the public weal for more than 30 years—as judge and as Representative in Congress, becoming chairman of the Committee on Rules in the 84th Congress.

Among his notable achievements are the Smith Act of 1940, which declared the law under which Communist leaders have been convicted, and the constructive investigation of the National Labor Relations Board which led to the Taft-Hartley Act of 1947.

Law is the eternal sense of justice of the community. Law is because law was, unwritten, unfolding and growing as man moves slowly toward civilization. Spurious edicts, pretending to be law but not law at all, are struck down when the law is restored.

In any early restoration of law the wisdom of Judge SMITH will be a vital influence. We can rejoice in numbering this Virginia gentleman among the Nation's most illustrious sons.

Mr. Speaker, under leave to extend my remarks I herewith include the address delivered by the Honorable HOWARD W. SMITH on the night of February 22, 1955, when the American Good Government Society bestowed upon him its George Washington good government award:

The basic ground rules of good government upon which our Republic was founded was the principle that matters of controversy between the States and relations with foreign governments should be delegated to the Federal Government, while the solution of all domestic and local problems should be reserved to the respective States.

It was the guiding principle of the framers of our Constitution.

It was the very heart of the contract between the Thirteen Original Colonies as expressed in the Constitution and the Bill of Rights. It was implicit throughout every word, every sentence, and every paragraph.

It was summed up so that "he who runs might read," in the brief words of the 10th amendment: "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people."

When that amendment was adopted, as the last and final clause in the Bill of Rights, the American people meant it. The great bulk of the American people, regardless of party affiliation, mean it just as earnestly today.

The difference is that the framers of the Constitution were painfully aware of their recent wrongs that required remedy. As the country grew and prospered, the people became neglectful and indifferent to the basic principles of government that brought about that growth and prosperity.

A spirit of slothful indifference replaced alert determination. Today we have reached a point of centralized government that has swallowed up the reserve States rights. We have transferred the administration of justice away from home into the strange and faraway hands of the Federal Courts.

The legislative department has usurped the power to deal with a multitude of local problems reserved by the Constitution to the States and in doing so has delegated to the executive department the power to fill in the details of administration by regulations having the force and effect of law. While the Chief Executive confronted with a huge and overwhelming mass of administrative detail

has, in turn, delegated the power to make regulations to sundry minor executives not elected by or responsible to the people.

Each such departure from constitutional standards has directly or indirectly deprived the citizen of some constitutional liberty until today the individual American citizen is gradually being placed under compulsion and his daily life and activities controlled by the judgment of the Federal courts, the acts of Congress, and the edicts of the executive department to an extent never remotely conceived by the authors of the Constitution.

Today we have what might be called government by delegation of authority.

Local communities have delegated to State legislatures local problems that could best be solved at home, in return for a mess of financial pottage from the State legislatures.

The State governments have delegated to the Congress problems that could be best solved at home by the States, in return for handouts from the Federal Treasury of their own money. Congress, in turn, catching the spirit of the times, has passed out the appropriations from money derived from taxes imposed upon the citizens of the States and exported to Washington to be, in turn, doled back to the States after deduction of an appropriate but substantial toll. Along with the appropriations and as a condition, go laws curtailing the freedom of the citizen, and then the whole impossible mess is turned over to the Executive to administer, abdicating to him the legislative power to make regulations having the effect of law, a violation of which subjects the citizen to criminal penalties in the Federal courts. But the end of delegation is not yet. The President delegates the authority given him by Congress to the heads of departments and agencies. They, in turn, delegate it to the heads of bureaus; and to whom the bureaus delegate the actual writing of these regulations or laws, only God knows.

Congress finally found it necessary to provide for a daily publication known as the Federal Register, in which the executive departments are required to publish each day all new regulations which now control the lives and activities of our citizens.

I mention this for the information of the unwary citizen, who may prefer what freedom he still enjoys to a Federal jail house, with the advice that he peruse the Federal Register along with his daily paper.

On top of this whole mess of delegation, administration and confusion sits the judicial department, the ultimate and final arbiter of our constitutional rights.

So when the Supreme Court speaks the final word we all, including the present speaker, relieve our blood pressure by exercising our remaining constitutional prerogative of abusing the Court.

What is the remedy?

There is only one.

Congress reflects the will of the people. The will of the people is transmitted to Congress by those who make the loudest noise, and the most convincing threats of political reprisal.

Until and unless the great mass and majority of our thinking people awaken to their responsibility and assert their demands for sound and constitutional government and a return to the constitutional limits upon the functions of the Federal Government, we shall continue the present policy until sometime, some sad day, we find that we have gone too far to retrace our steps.

In a democracy a people get the kind of government they deserve.

If they think little, they deserve little. If they do little about it, they get little results.

If the present trend of government away from the sovereignty and the reserved rights of the States is wrong, as I believe it is tragically wrong, it will continue wrong as long as a slothful and indifferent people remain impervious to, and neglectful of, the danger signals flying all about them.

Block Ike Plan Is Brainchild of Economic Planners

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, Mcrch 2, 1955

Mr. HOSMER. Mr. Speaker, there are people in this country who sincerely believe that the free enterprise economic system is no good and should be replaced either piecemeal or entirely by some form of state socialism.

Why, when all evidence points to the fact that our present system of free enterprise is the greatest system ever devised by the mind of man for his own betterment, these people persist in their beliefs is a mystery to me. They need but look at the result of state socialism wherever it has been tried to see physical evidence of its inadequacies.

An interesting article in the current issue of the U. S. News & World Report detailing the deterioration of Britain's defenses observes that the quantity and quality of that Nation's armaments went into immediate decline during her postwar flirtation with socialism. Under the socialistic scheme of things neither peacetime nor wartime items flowed into Britain's economy as they did under the free-enterprise system.

Nevertheless the economic planners in this country are determined in their efforts "to halt and reverse the Eisenhower administration's counteroffensive on behalf of private enterprise and less Government dictation" as is set forth in the following column by Ray Tucker:

HALT IKE PLAN WELL DESIGNED

(By Ray Tucker)

WASHINGTON.—The most unpublicized conflict at Washington today concerns the attempt of the so-called economic planners of New Deal stamp to halt and reverse the Eisenhower administration's counteroffensive on behalf of private enterprise and less Government dictation.

Opponents of Ike's milder measures have two main objectives: They do not expect to enact their more advanced and radical proposals at this session, awaiting possible return to power in 1956 or 1960. They plan to expand or to kill off his offerings.

They do not want them to be given even a temporary trial lest the success of the measures check their movement for Government intervention and operation in almost every field of human activity.

"ECONOMIC POULTICES"

They argue, for instance, that Eisenhower proposals on Federal aid to health, education, and highways are mere economic poultices. The most spectacular example of the conflict in philosophy is illustrated by the quarrel over Washington's contribution to improvement of national health.

Ike wants the work to be done by private insurance companies with minimum financial assistance from the Government. The "planners," who resemble the British Fabians that led Britain step by step into a Labor-Socialist regime, demand compulsory health insurance. They would finance their bedside scheme along the lines of social security—namely, by direct payments from everybody's pay check.

If Ike's plan is adopted and gives promise of success in its initial stages, their alternative will lose its appeal. There is nothing so difficult to defeat as demonstrated success in politics.

Similar strategy has been applied to the farm problem. Ike believes that flexible price supports will maintain farm income, lower retail prices, dispose of surpluses. The planners still insist on the Brannan plan, with Uncle Sam paying the difference between the market price and the higher Government-financed support figures.

PRIVATE EXPANSION PLAN

Likewise with power. As in the Dixon-Yates contract, the White House seeks to limit the Government's investments and operations in this field, as well as in atomic developments. President Eisenhower advocates private expansion to a maximum degree under a partnership of local, private, and Federal interests.

His enemies demand continued Government production of power, although Uncle Sam and local political units now generate about 20 percent of the Nation's electricity.

The planners want Washington aid in obtaining contracts for a guaranteed annual wage. They demand higher minimum-wage levels, to be policed and enforced by NLRB and the Labor Department. They insist upon greater control of credit by Treasury and the Federal Reserve System.

They urge a vast public-works building blueprint after the pattern of Roosevelt-Ickes-Hopkins programs in the depression. They shout for far larger foreign-aid funds, with the United States economic reforms aboard.

AIM TO DEFEAT IKE'S COMPROMISES

Although recognizing that fulfillment of their dreams and ambitions under Republican rule is impossible, the liberals' main aim is to keep alive agitation for their schemes. When they recapture the White House and Congress, they hope to transform them into reality. Meanwhile, they must defeat Ike's milder compromises.

Ironically, they may get help from GOP conservatives on Capitol Hill, who think that Ike is too radical. They refuse to recognize his program as a holding action.

Let Us Fight Against Multiple Sclerosis

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 2, 1955

Mr. RODINO. Mr. Speaker, for all of us concerned with the health of the Nation, there is a problem of vital urgency—and that is to control the disastrous effects of the crippling disease, multiple sclerosis.

In thousands of households there are young mothers and young fathers stricken with disabling multiple sclerosis. This means that there are mothers who cannot take care of their homes—guide their children—play with their children. That there are fathers who must cease being breadwinners; who are unable to assume their role as the head of the family unit. This also means that there are young men and women throughout the land—some in college, who are forced to give up their education; some just starting on careers they are unable to pursue; because they have been afflicted

with MS, which is the popular abbreviation for multiple sclerosis.

Multiple sclerosis is indeed a matter of pressing import to the Nation for, at this time, the cause and cure of this insidious disease are unknown. It attacks mostly young adults in the prime of youth—those between the ages of 20 and 40—the very best, the most productive years, of any person's life, and it strikes at the very heart of the basic foundations of our society—the home and the family.

Let me try to explain for a moment, for those of you who may not understand the nature of this mysterious illness, just what this is all about. I have tried to find out for myself and I will speak in terms which I have understood, as a layman, from my discussions with doctors who have specialized in this field.

Multiple sclerosis is a disease of the central nervous system. It gets its name from the fact that multiple, or "many," sclerosis, or "scars," form in certain areas of the brain and spinal cord. This results in what may be likened to a short circuit, nerve impulses which usually pass through the central nervous system are blocked by scar tissue which has formed on nerve covering. Then we have the usual symptoms of the disease which may be: paralysis in hands, arms, and legs; blurred or double vision; staggering gait; garbled speech; loss of personal functions. A victim of MS may have one or all of these distressing symptoms. The ordinary dignities with which most of us are privileged—such as washing ourselves, dressing ourselves, taking a walk around the block, reading or watching television—all these private necessities, pleasures, and privileges are often denied sufferers of multiple sclerosis. Some victims are ambulatory; some are on crutches or in wheelchairs; most severe cases are bedridden. There are about one quarter of a million victims of MS in the country.

Because MS is usually progressive, and thus far incurable, it presents a problem of care and financial stress which always goes with chronic long-term illness.

I am glad to say that all is not black in this picture. Something is being done across the Nation to help the victims of multiple sclerosis. In 1946, with the founding of the National Multiple Sclerosis Society, an intensive program of research and patient-care service for MS sufferers was begun. Today the society is a vast organization with some 65 chapters throughout the United States, all supported by public funds. The society is a clearing houses in MS for all up-to-date scientific and self-help information for patients and physicians.

Mrs. Dwight D. Eisenhower, this year, as in the previous year, is honorary chairman of the campaign to raise funds for this very important and worthy organization. In this respect, Mrs. Eisenhower is a real helpmate to her husband, for our own Mr. President has been a stanch ally in helping Congress to appropriate funds for continued and expanded aid in the fight against chronic neurological, crippling illness. President Eisenhower has made magnificent strides throughout the country in the field of rehabilitation of the disabled. The President's Committee on Employment of the Physically Handicapped has worked with nonprofit health organizations, such as the National Multiple Sclerosis Society, in spurring the public's support and industry's support in the help to our disabled.

There is much reason for hope in the multiple-sclerosis problem. Leading scientists in universities and laboratories throughout the land and beyond its borders are engaged in intensive research—about 45 projects in all—to find the answers to the cause and cure of multiple sclerosis. Clinics for the rehabilitation of multiple-sclerosis victims are in operation, teaching independence and self-reliance to the severely handicapped. All this heartening work is being done under the guidance and support of the National Multiple Sclerosis Society, which in turn is dependent upon public funds and governmental appropriations in order to sustain and expand its promising work.

Each year the Government appropriates funds to the National Institute of Neurological Diseases and Blindness. This vast Institute, which is conducted by our foremost research scientists, is at present investigating the causes and treatment of multiple sclerosis. It is one more example of hope in dealing with this problem.

I urge all of my fellow Congressmen to give serious thought to the ways in which each of us, in our own way, may help in the fight against crippling multiple sclerosis. Perhaps we may serve on special committees, perhaps we may be able to fight for bigger and better appropriations in the war against crippling neurological diseases. To be sure, it is, as they say, "all for the good of the country."

HOUSE OF REPRESENTATIVES

THURSDAY, MARCH 3, 1955

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

God of all goodness, we thank Thee for this beautiful day bringing unto us many opportunities to do good and to serve Thee and our fellow men.

May it be a day when we shall be richly blessed with new experiences of Thy presence and power, for we are conscious of our helplessness and insufficiency.

Grant that, in our programs of legislation, we may not only have a clear vision of what is valuable and useful but above all of that which is vital and essential.

Help us daily to grow and gain in vital and victorious living, and may we be inspired and sustained by that faith which will enable us to meet every moral issue without compromise or evasion.

In Christ's name we pray. Amen.

The Journal of the proceedings of yesterday was read and approved.

SPECIAL ORDER GRANTED

Mr. SIKES asked and was given permission to address the House for 30 minutes on Monday next, following any special orders heretofore entered.

FEDERAL OLD-AGE AND SURVIVORS INSURANCE

Mr. SCHENCK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SCHENCK. Mr. Speaker, I am introducing today a bill to extend coverage under the Federal old-age and survivors insurance system to individuals engaged in the practice of dentistry. I am doing this because I am convinced that a majority of dentists, not only in my own district or the State of Ohio, but throughout the country, wish to have the opportunity of benefiting from this insurance program, the same as other self-employed individuals. This conclusion was reached after numerous conferences with and voluminous correspondence from the dentists in my State, including signed petitions from the members of local societies. It does not seem fair to me to exclude the members of this profession from participating in the program if it is their wish to participate in it. The House of Representatives voted to include them in the Social Security Act amendments last year but the other body deleted this group from the bill because, I am told, of representations made by the American Dental Association, which the dentists in my district and State say do not reflect the true wishes of the majority of the profession. Their contention is based on the results of polls taken throughout the country where the individual dentists were given an opportunity to voice their sentiments and in most of the States the polls showed that the dentists want to be included in this insurance program. I hope the Committee on Ways and Means of the House of Representatives will grant these dentists the privilege of expressing themselves again and that they will take appropriate action to report this bill to the floor of the House for consideration. I am convinced the Members of the House will approve it again so that it may receive proper and favorable consideration in the other body.

EXPEL RUSSIA FROM THE UNITED NATIONS

Mr. SMITH of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SMITH of Wisconsin. Mr. Speaker, the United Nations has an obligation to challenge the right of Soviet Russia to membership in that organization. All of the 60 nations who are members of the United Nations are definitely bound to

refrain from the exercise of force in their international relations.

Yet the guilt of Russia in those relationships is beyond all reasonable doubt. Armed aggression in Korea was instigated by the Soviet. Red China could not have forced its belligerent attitude without the military support of their Soviet counterpart.

Mr. Speaker, in February of 1951 the United Nations, by formal resolution, declared Red China as an aggressor, and if that action had any meaning at all, Russia was bound by it. But the masters in the Kremlin chose to ignore it and continue their support to the declared aggressor.

The United Nations, Mr. Speaker, is still in a state of war with the Communist Chinese and the Communist government of North Korea. How much longer are we to consider Red Russia as a bona fide member of the United Nations, pledged to a program of peace? This is a fiction and it is time to call a halt.

Mr. Speaker, I have introduced House Concurrent Resolution 89, which requests the President of the United States to take action through the United States delegation to bring about the expulsion of the Soviet Union from the United Nations.

The basis for that action is article 6 of the United Nations Charter, which provides:

A member of the United Nations which has persistently violated the principles contained in the present charter may be expelled from the organization by the General Assembly upon the recommendation of the Security Council.

Soviet Russia cannot veto this proposed action by the Security Council. Under article 27, "A party to a dispute shall abstain from voting."

Mr. David Lawrence, in the U. S. News & World Report for February 25, put his finger on the nub of this situation in support of action to expel Russia. He states:

The charter declares that membership in the United Nations shall be open to peace-loving states willing to accept the obligations of membership. The Soviet Union, however, has disregarded its obligations to the U. N.

Mr. Speaker, at this point I shall insert a copy of my resolution—House Concurrent Resolution 89—and I urge its prompt adoption as the sense of this Congress:

House Concurrent Resolution 89

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby expresses its profound sense of indignation at the repeated acts of aggression committed by the Soviet Union in violation of the United Nations Charter, at the flagrant disregard shown by the Soviet Union for the principles contained in such charter, and at the persistent attempts of the Soviet Union to frustrate the actions duly taken by the United Nations pursuant to such charter; and the President is accordingly requested to take such steps, through the United States delegation to the United Nations, as may be necessary to bring about the expulsion of the Soviet Union from the United Nations in accordance with article 6 of such charter.

SPECIAL ORDERS GRANTED

Mr. ELLSWORTH asked and was given permission to address the House for 15 minutes on Monday, following the legislative business of the day and any special orders heretofore entered.

Mr. DORN of South Carolina asked and was given permission to address the House for 3 minutes today, following any special orders heretofore entered.

ADJOURNMENT OVER

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

PROGRAM FOR NEXT WEEK

Mr. MARTIN. Reserving the right to object—and of course I am not going to object—would the gentleman tell the House what legislative program he has in mind for next week?

Mr. McCORMACK. I should be very happy to. Monday would be the Consent Calendar day, but there are only 8 bills on the calendar. I had in mind to confer with the gentleman from Massachusetts [Mr. MARTIN] and then ask unanimous consent that the Consent Calendar be called when the next Private Calendar will be called, so we could have them both in one day. That date would be March 15. I intend to ask unanimous consent for that purpose.

There are some resolutions being heard by the Committee on Rules, resolutions of inquiry and investigation. If they are reported out, they will be in order. There is also the resolution on the change of rules in relation to committee procedure. If that is reported out by the Committee on Rules, that will be brought up.

For Thursday, I have reasonable expectation there will be reported out from the Committee on Armed Services, and a rule obtained, on H. R. 2607, which will be brought up on that date. That is a bill providing certain pay and allowances as incentives to the members of the Armed Services. I have been informed by the chairman of the subcommittee that the subcommittee will probably act on it tomorrow and report it to the full committee; and I have been informed by the chairman of the full committee that that committee will meet on Tuesday and act on it. If that is so, they will ask for a rule on Wednesday and it will be in order for next Thursday.

Aside from that I have no further announcement at this time to the Members of the House. I do not expect any other legislation, but I do not want to be bound by a definite commitment.

I might say for the benefit of the Members of the House, so they may govern themselves accordingly in connection with the Easter recess, that the recess this year will be from Monday, April 4, to Wednesday, April 13. As a matter of fact, and in effect, it will be from the close of business on April 1 until we meet on April 13.

I have been informed that we might reasonably expect an appropriation bill on April 13.

Mr. MARTIN. If the gentleman will yield, which bill is that?

Mr. McCORMACK. I have to confess my inability to answer that question. Perhaps the gentleman from Michigan [Mr. FORD] could answer that question?

Mr. FORD. I will say to the gentleman that I think it will be the Treasury-Post Office bill.

Mr. McCORMACK. I understand that is coming in on March 14.

Mr. GARY. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. GARY. The Treasury-Post Office bill will come in the week after next. That bill has been marked up and should be presented to the full committee next week and would be ready the following week for presentation; I do not know just what date.

Mr. MARTIN. I understood that the hearings were available and I was wondering why they were waiting a month.

Mr. McCORMACK. The information I have, which I am glad to give to the House at this time, is that the Treasury-Post Office bill will be in the week of March 14. It is expected that the Second Supplemental Appropriation bill will be in on March 18. The bill covering the Labor Department and the other agencies that come before that particular subcommittee will come up the week of March 21 and the Interior appropriation bill on March 24. There may be a little change here and there, but that is the information I have received the other day from the gentleman from Missouri [Mr. CANNON], the chairman of the Committee on Appropriations.

From the information I have received, on April 13, when we meet again, they will probably be in position to bring in an appropriation bill. As to the question asked by the gentleman from Massachusetts, I cannot tell now what that bill will be, but I will find out. Of course, if a bill is brought in, they will have to get permission to file it earlier, and I assume that will be done.

That is the best information I can give the Members of the House, particularly with reference to the Easter recess this year.

Mr. MARTIN. Returning to the program for next week, I presume if there is any change in the schedule we will all have adequate notice of the change?

Mr. McCORMACK. Yes.

Mr. MARTIN. I am informed there might be a conference report or something come in.

Mr. McCORMACK. I think the gentleman may be optimistic.

Mr. MARTIN. The Senate does sometimes act quickly.

Mr. McCORMACK. Yes; sometimes the Senate conferees do give in to the House.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MARTIN. I yield.

Mr. HOFFMAN of Michigan. The gentleman referred to April 13. As I understand, that is a Wednesday.

Mr. McCORMACK. Yes.

Mr. HOFFMAN of Michigan. Will there be a vote on that day, or Thursday or Friday of that week?

Mr. McCORMACK. I am glad the gentleman asked that question, because I did have in mind discussing it with

the Speaker and the gentleman from Massachusetts. Assuming there were any rollcall votes on that day, it would be agreeable to me for the vote to go over to the next day.

Mr. MARTIN. The gentleman means on the 13th?

Mr. McCORMACK. If on the 13th of April there are any rollcall votes, it would be perfectly agreeable to me that we put them over to the next day.

Mr. MARTIN. Speaking for myself, I would agree to that.

Mr. HOFFMAN of Michigan. The next day would be Thursday, the 14th. I was just wondering whether the vote could go over to the next week. The reason I ask is that I noticed that day before yesterday we had a sort of lull here because there was a primary in Baltimore. Now, we have an election in Michigan in April.

Mr. McCORMACK. Will the gentleman confer with us after this discussion is over and we will see what can be done, rather than have this colloquy on the floor of the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

SEVENTY-FIFTH ANNIVERSARY OF DICKENSON COUNTY

Mr. JENNINGS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. JENNINGS. Mr. Speaker, today, March 3, marks the 75th anniversary of Dickenson County, the youngest in the Commonwealth of Virginia. The county, one of those in the Ninth Congressional District in the great southwest Virginia, will begin today a 6-month diamond jubilee celebration that will touch every phase of community life. The schools of the county will have commemorative programs to start the celebration and it will be concluded next fall with a gigantic old-fashioned gathering and picnic in the beautiful Breaks of Cumberland where a new park will be dedicated.

I believe the Congress should take note today of Dickenson County's 75th birthday. I know of no other group of people who take a greater interest in their local, State, and National Government and in their elected representatives than those living in Dickenson County.

I want to mention, briefly, Dickenson County's history. On March 3, 1880, Dickenson became Virginia's 100th and last county. It was carved from the territories of three other ninth district counties—Wise, Russell, and Buchanan—and was the result of a petition signed by a majority of the area's citizens who wanted another county established.

These petitioners asserted that the territory to be included in the new county was fast becoming heavily populated and that the residents were finding it inconvenient to travel all the way to the other seats of country government to transact their legal and private business. The signers of the petition also wanted to participate more actively in their local government and this desire was being restricted by distance.

I might say here, with considerable pride, that this desire to take an active part in Government has carried down to the present time; in the last congressional election Dickenson County broke its own record as to the number of voters qualified to cast ballots for their Representative and Senator.

The Virginia House of Delegates received the bill for the creation of the new county and designating its name as "Dickenson" on January 12, 1880. The first county seat was to be Ervinton, a town now known as Nora.

The bill was approved by the house on February 12, 1880, but when it reached the Virginia Senate an argument arose over the proposed name. A motion was made to change the name from Dickenson, which was that of a prominent Russell County family, to Stonewall and the county seat to Jackson in honor of Stonewall Jackson. However, the bill finally passed the general assembly with the names as originally proposed, and Gov. W. M. Holliday signed it into law on March 3, 1880.

The county seat was later moved to Clintwood where it is located today.

Dickenson lies almost wholly in the Sandy Basin, a bowl-like depression in the Appalachian Mountain range. Being very mountainous, it was not sought out by the early settlers and remained a hunters' paradise long after the surrounding counties were settled. The first settler was "Fightin' Dick" Colley, who built his three-walled log cabin at Sand Lick about 1810. After him came the Rasnicks, Countses, Fullers, and Deels to that vicinity. Ambrose Harmon settled about 1830 at Nora and he was followed by the Ervins, Blairs, Yateses, Dyers, and Smiths. John Mullins settled at Clintwood about 1830 and was followed by the Flemings, Vanovers, Chases, and Stanleys.

The early industries were hunting and farming. Later lumbering became important and at present the mining of vast deposits of coal is the chief industry. Valuable deposits of natural gas have been tapped recently in the county.

The Carolina, Clinchfield & Ohio Railway penetrated the county in 1915 and provided the transportation necessary to the shipping of the coal produced.

Dickenson today has over 23,000 citizens who are all concerned with the future growth and prosperity of their county. Steady progress is being made in the road and school system of the county; three modern high school buildings are nearing completion at the population centers. These have cost around $2 million and will serve large areas of the county. These new structures will be dedicated as part of this diamond jubilee celebration.

I want to point out that Dickenson County has great natural scenery. Vast panoramas of mountains, hills, and rushing streams can be viewed from the crests of Cumberland Mountain, Sandy Ridge, Big Ridge, and other high points. The most significant natural scenery, which surpasses anything east of the Mississippi, is in the breaks of the Cumberlands where the Russell Fork River has churned a 1,000-foot deep channel through the rocky base of Cumberland Mountain. This area will be dedicated as a State park next fall when Dickenson County ends its diamond jubilee celebration.

The jubilee celebration will include programs in the schools, churches, and community centers. There will be parades and historical pageants and an illustrated county history will be published. Entitled "Meet Virginia's Baby," this publication will be unique in that it is the first known publication of a county history in the United States.

And so, Mr. Speaker, I call attention of the Members to an important event in the history of one of my counties, Dickenson, which I am proud to represent in the Congress. The observance today of its 75th anniversary and the opening of a long celebration means much to my constituents in this county. I would like to invite each Member to join me and my constituents in celebrating Dickenson County's birthday and to ask that they attend any or all of the events connected with this observance. In closing, I wish to make this final remark: should any of you visit us during this jubilee celebration, you will be received most cordially and treated to the heartfelt hospitality of Dickenson County.

CORRECTION OF HEARINGS

Mr. SIEMINSKI. Mr. Speaker, on pages 488 and 489 of the Treasury-Post Office Department hearings for 1956, under the topic "Abandonment of Site Tax Privilege," the Gulf Oil Co. is erroneously referred to. The hearings should have read, "The Tidewater Oil Co."

I make this statement in order that the public may be informed of this error.

SPECIAL ORDER GRANTED

Mr. STAGGERS asked and was given permission to address the House for 5 minutes today, following the legislative program and the conclusion of any special orders heretofore granted.

HAWAIIAN AND ALASKAN STATEHOOD

Mr. ENGLE, from the Committee on Interior and Insular Affairs, reported the bill (H. R. 2535) to enable the people of Hawaii and Alaska each to form a constitution and State government and to be admitted into the Union on an equal footing with the original States (Rept. No. 88), which was read a first and second time and, with the accompanying papers, referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

SUPERCARRIERS AND NATIONAL DEFENSE

The SPEAKER. Under previous order of the House, the gentleman from South Carolina [Mr. DORN] is recognized for 3 minutes.

Mr. DORN of South Carolina. Mr. Speaker, I rise today to call your attention to the fact that hearings will start next week on H. R. 4393. This bill will authorize the construction of a fifth supercarrier.

I have the highest regard for the members of the Armed Forces Committee and I am confident that before they take final action on this bill they will request an opinion of the Joint Chiefs of Staff and the weapons system evaluation group. It is my understanding that the Joint Chiefs have never been called upon for a direct recommendation or approval of this particular part of our defense program. The time has come in America when we must eliminate any unnecessary expenditures concerning national defense or any other spending program by any branch of the Federal Government.

It was my pleasure to work for the passage of the Unification Act of 1947. It was our understanding at that time that the Unification Act would eliminate waste and duplication in the various branches of our national defense. I have been greatly alarmed by recurring reports that supercarriers are being built, and will continue to be built, for the purpose of strategic air bombardment. If this is the real idea behind the supercarriers then their construction is designed for duplication of the role of our Strategic Air Force.

With our immense national debt and burdensome taxation, our people cannot afford the luxury of two strategic Air Forces within our National Defense Department. I do not believe anyone will argue that it is not many times more expensive to launch a strategic air attack from carriers into the heart of Russia if, indeed, it can be done at all. For what other purpose could giant supercarriers be built, other than to duplicate the role of the Air Force? No potential enemy country is constructing aircraft carriers or in any way challenging our supremacy of the seas except by landbased aircraft and submarines. No one would argue that supercarriers are necessary to eliminate a submarine menace.

Mr. Speaker, for what other reason, may I ask, are they being constructed other than as a rival and duplicating force to the strategic air arms?

I believe the supercarrier to be squarely in competition with the Strategic Air Command. There is, of course, no divine law which dictates that strategic air operations are and should be forever the exclusive responsibility of the Strategic Air Command.

To me it is entirely conceivable that the carrier might have a proper role in the conduct of strategic air operations. If it is so, we should recognize that fact and assign them that responsibility. On the other hand, if it is not so, we should limit its responsibility to control of the seas. If it is not so, we should not waste any more of our resources on a weapons' system which is less effective than others which are available.

If the supercarriers were actually in service today they would be incapable of any material contribution to a strategic air campaign. Yet the very first one will not join the fleet until next year. And the last one will not be finished until the 1960's. By that time, with the development of ultrasonic long-range aircraft and a whole new family of guided missiles designed for all kinds of targets, the supercarrier will be as obsolete as the prehistoric mastodon. Thus these behemoths will be obsolete even before we finish appropriating the money for their construction.

But we do not have to look into the crystal ball of the future to judge their ineffectiveness. I understand, for example, that a carrier strike today on a few targets on the periphery of the Soviet Union would cost 8 to 10 times as much as the same mission performed by land-based bombers. Would it not be more appropriate for our strategic aircraft to drop off the necessary bombs as they fly over the enemy's submarine pens rather than build a weapons system for one limited look? If these submarine pens threaten our control of the seas, they must be destroyed. But is there any divine reason why they must be destroyed by planes flown from supercarriers when our Strategic Air Command can do the job more effectively and more economically.

The most important strategic targets, of course, would be completely out of the range of the supercarriers regardless of the expense. It is a simple fact that because of their inherent characteristics, carrier aircraft cannot compete on favorable terms with long-range, landbased planes such as the B–47 and B–52 which can be refueled in the air.

Even more important is the fact that the excessive vulnerability of the supercarrier would make it impossible to do the limited job even at 8 or 10 times the cost. The Navy's concern about the supercarrier's vulnerability was unexpectedly brought to light recently in a statement by an Assistant Secretary of the Navy that they would like to withdraw their carriers from the restricted waters of the Mediterranean. This makes sense in view of the carrier's extreme vulnerability in such narrow waters. Such a withdrawal, of course, drastically reduces the number of targets the carriers can attack.

Apologists for the supercarrier tacitly acknowledge the vulnerability of the supercarrier but attempt to divert attention from these disadvantages by pointing to the supercarrier's mobility. The fact that the supercarrier will be able to travel at 40 knots is truly its strongest point. A speed of 40 knots, however, is insignificant in comparison with the 400-knot speed of the enemy's long-range reconnaissance and bomber aircraft. With modern heavy airborne radar the enemy will be faced with the proverbial sport of shooting fish in a rain barrel.

Despite the serious drawbacks of the excessive vulnerability and limited effectiveness of the supercarrier, it would not make so much difference if they were not prohibitively expensive.

It is not always recognized just how much this supercarrier program will cost us. The Navy has announced that they plan to build a total of 10 supercarriers. The cost for these supercarriers alone will run to more than $2 billion. Any aircraft carrier, of course, is too valuable a piece of equipment to be left without protection. It is this high degree of vulnerability which makes the supercarrier program so very expensive. We might reasonably expect that the combat ships, such as cruisers, destroyers, and submarines necessary to protect these carriers would represent an additional investment of $2 billion. The supply ships needed in direct support would mean an additional investment of more than $1 billion.

Thus, in terms of ships alone, the cost runs to more than $5 billion. This does not include the cost of intermediate logistics units nor shore bases. Nor does it include the aircraft for the carriers. Nor does it include the yearly costs of maintenance—repairs, petroleum, supplies, and costs of personnel. Yearly salaries of personnel alone would be considerable when you consider that a typical 4-carrier task group with its supply ships would consist of almost 50,000 men.

These astronomical sums seem- almost unbelievable. I confess they floored me. However, when you stop to realize that Congress never votes on the whole program, but merely approves the program piecemeal on a year-to-year basis, you can more readily realize how these vast sums can be spent before you realize it.

The point is simply this: I feel that we should take a long look at the whole supercarrier program before we go on to spend any more of the taxpayers' money.

I would like to remind the Members of Congress, and especially the members of the Armed Services Committee, that the Joint Chiefs of Staff have never approved the supercarrier program. What justification then do we have for appropriating billions of dollars for a weapons system which has never been evaluated by our top military organization?

Neither the Joint Chiefs of Staff, the Weapons System Evaluation Group, or any other interservice group has ever conducted a comparative cost study of the carriers as compared with other competing weapons. To me this is inconceivable. It was to make such comparisons possible that the Unification Act was passed.

Before we spend another cent for the supercarriers I think this House should insist that an interservice group undertake an honest, impartial, comparative cost and effectiveness evaluation. Only after we have been given such an evaluation can we be in a position to make the correct decisions on these vital questions of our Nation's security.

CANCER RESEARCH

The SPEAKER. Under previous order of the House, the gentleman from West Virginia [Mr. STAGGERS] is recognized for 5 minutes.

Mr. STAGGERS. Mr. Speaker, yesterday I introduced H. R. 4583, a companion bill to S. 312 sponsored by Senator M. M. NEELY, who has long advocated cancer research and has devoted many years to this humanitarian work. This bill authorizes and requests the President to undertake to mobilize at some convenient place in the United States an adequate number of the world's outstanding experts, and coordinate and

utilize their services in a supreme endeavor to discover means of curing and preventing cancer.

Yellow fever, diptheria, typhoid, smallpox, and other dire afflictions have been conquered by medical science. Yet, in spite of all that physicians, surgeons, chemists, biologists have done, cancer is still unconquered and unconquerable. It is the most defiant foe of the human race. Surgery, radium, and X-ray are the only means of combating this frightful destroyer, yet every passing year adds to the demonstration that cancer cannot be eradicated by those, or any other means, now known.

On the average of every 48 seconds some man, woman, or child dies of cancer in our country. It is more destructive to life, health, and happiness than all the wars that have ever been waged. It is more irresistible than the mightiest armies that have ever marched to battle and has invaded every country in the world.

There is hardly a family in the United States—nay, a Member of this House—who in the realm of his own friendship or in his own immediate family has not felt the swift and silent hand of cancer strike with unrelenting force.

That is why we must make an all-out effort to control this destructive force in human tissue, to solve the mysteries and end the tortures and the terrible mortality rate of the country's dreaded killer. We must not think only in terms of dollars, but in terms of human lives and the great loss we suffer of the hearts and minds of those we cannot ever replace.

What wonders we could develop for the advancement of humanity, if the same skill, money, and effort which is spent on the cold war were diverted in a race of armament against this dreaded disease.

The American Cancer Society and many devoted medical experts are doing a magnificent job in aiding and alleviating the suffering and prevention of cancer, but the effort of this group is all too meager. We must most definitely encourage scientific research and end the nightmarish terror and emotional breakdown suffered by the victims of cancer. We must give suffering humanity a fair opportunity to benefit from the skilled brains of our country.

Now is the time for us to take immediate steps to help the hundreds of thousands of our American men, women, and childen, including members of our Armed Forces and veterans lying in hospitals who are helplessly afflicted by this disease. We must bring about a timely and called-for study by appropriate experts to aid these victims. They look to us in the Congress who have the opportunity to speak for them to do what we can to help them in their helpless condition.

In this great Nation of ours, with its vast resources and tremendous capacity for wealth, I cannot help but wonder if we cannot bring ourselves to provide more funds for research. Through research can be found the answer to the diseases which today have disappeared and which are now academic matters and are contained in the medical volumes. In the same light, by research will we be successful in finding the answer to the problems of cancer, heart diseases, and the other dreaded diseases.

It is my fervent hope and prayer that the wonderful day is not too far in the future, when the energy and skill of science, through research, may bring about the improvement of human health and the advancement of civilization throughout our great Nation and the world.

We have no guarantee that any amount of expenditure will result in the discovery or invention of a cure or preventive of cancer but we must keep trying for some new means as revolutionary as the atomic bomb itself to destroy this all-devouring foe, or it will ultimately rob this planet of human life.

AUTHORIZING SMALL BUSINESS ADMINISTRATION LOANS TO MUNICIPALITIES HAVING A SUBSTANTIAL LABOR SURPLUS

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, I wish to call to the attention of my colleagues a bill which I introduced this date authorizing the Small Business Administration to make loans to any municipality having a substantial labor surplus, as certified by the Secretary of Labor according to the standards established under Defense Manpower Policy No. 4 or any similar rule, regulation, order, or policy.

The purpose of these loans is to assist local communities to promote the establishment and location of new industries and businesses in such communities.

It is also provided that loans may be made with certain restrictions for the purpose of assisting the community in promoting the expansion and modernization of those industries and businesses already located in the community. The restrictions require that no financial assistance be extended unless the financial assistance applied for is not otherwise available on reasonable terms.

All loans require security to assure repayment and shall have a maturity date not in excess of 25 years. No municipality may expend for any one project an amount which exceeds $100,000 or one-half of the total cost of such project whichever is smaller. It is also provided that the total amount of the outstanding loans at any one time shall not exceed an aggregate of $100 million.

Mr. Speaker, since the postwar years of the Second World War, with the exception of the Korean war period, the United States Department of Labor has found it necessary to classify areas having a marked labor surplus into what is known as class IV–A and class IV–B. Class IV–A areas are those having a substantial labor surplus; while class IV–B areas have a very substantial labor surplus.

By way of explanation class IV–A areas are those that have a substantial labor surplus to the extent that from 6 percent to 12 percent of their employables are unemployed, while class IV–B areas have a very substantial labor surplus with 12 percent or more of their employables unemployed. For example, in my home city of Altoona, Pa., we have in excess of 18 percent of our employables unemployed, while in some other cities in the class IV–B category the percentage of unemployed employables is in excess of 22 percent.

As many of you know, there has been a determined effort on the part of communities throughout the Nation that have substantial labor surplus to try to correct the situation by intensive and extensive programs to attract new industries or assist present manufacturing firms to expand and modernize their facilities as a source of providing employment. This community effort has spread to the State and National level as the departments of commerce of the various States, in cooperation with the United States Department of Commerce, have made every possible effort to assist local community groups in their programs to attract new industries.

The various community organizations have sponsored live-wire programs enlisting the active support of business and labor organizations in their drive to make known the advantages a community can offer to a prospective industry.

In addition, funds have been collected through the efforts of these community groups to finance the expenses incurred in aiding a new industry or in moving a plant that is interested in locating in the community.

In my congressional district, which comprises Blair, Centre, and Clearfield Counties in central Pennsylvania, almost every community has a well-organized program in its efforts to attract new industries.

These programs are sponsored by the various trade organizations, such as the chamber of commerce in Altoona, Tyrone, Philipsburg, Clearfield, Curwensville, DuBois, Coalport, Houtzdale, and Beccaria.

From an overall standpoint, there has been organized in Clearfield County an industrial development corporation known as the Clearfield County Moshannon Valley Industrial Development Corp. This nonprofit corporation is designed to coordinate the efforts of all the community groups and has as its common objective the revitalization of the economy of the Clearfield County and Moshannon area by the development and use of available resources.

In trying to solve the unemployment problem in my hometown of Altoona, where over 18 percent of the employables are unemployed, we have had excellent cooperation from every segment of the economic life of the city and surrounding areas. Wage earners, professional people, businessmen, and labor and civic groups, as well as industrial leaders, have worked shoulder to shoulder in trying to find a solution to the problem of unemployment. It is a hard, difficult task with keen competition from hundreds of other areas which are in the same boat.

Whether an area has a textile or some other industry that is at low ebb or like in central Pennsylvania where our coal industry is in the throes of a depression, the same old problem of unemployment is the end result.

When you consider that every 2 months the United States Department of Labor is required to classify 149 major labor-market areas in the Nation and the majority of them are in the substantial or very substantial labor-surplus category, it is evident that the Federal Government, through the Small Business Administration, can lend a real helping hand by extending loans to municipalities who can qualify under the provisions of my bill. After World War II, when efforts were made to return our economy to a peacetime basis, unemployment began to rear its ugly head as contracts for war materiel were curtailed and our industrial plants reduced production because of lack of orders.

Then came the Korean war and war contracts were again awarded with the result that the increased production temporarily suspended judgment day, which came upon us when the shooting ended and the truce talks became a reality.

Now we are back on the same old trail toward an economy based on peace and not on war. It is a difficult transition after so many years of stepped-up production of the materials of war. None of us want to see our national economy permanently dependent on war and its senseless slaughter of human lives. Therefore, to cushion the shock that comes from an all-out effort to turn swords into plowshares, we have as a Nation a solemn duty to make certain that every American wage earner is given an opportunity to earn a living without being dependent upon the ravages of war for his daily bread.

I think that my bill to provide financial aid to the communities in the all-out struggle against unemployment is a bill that deserves the support of every right-thinking American because any legislative measure that will promote employment opportunities and replace sorrow with hope in the hearts of American wage earners is deserving of support.

Therefore, since we are sent here to Washington to represent the best interests of the people of our respective congressional districts, I hope that all of you will take the time to study the potential results that are bound to accrue from my bill and in doing so will join me in a wholehearted effort to have it enacted into law.

Mr. Speaker, I insert at this point the language of my bill:

H. R. 4628

A bill to amend the Small Business Act of 1953 to authorize loans to be made by the Small Business Administration to municipalities having a substantial labor surplus

Be it enacted, etc., That, section 207 of the Small Business Act of 1953 (15 U. S. C., sec. 636) is amended by striking out "and" at the end of paragraph (d); by striking out the period at the end of paragraph (e) and inserting in lieu thereof: "; and"; and by adding at the end of such section the following new paragraph:

"(f) to make loans to any municipality having a substantial surplus of labor (as certified by the Secretary of Labor according to the standards established under Defense Manpower Policy No. 4 (18 F. R. 6995), or any similar rule, regulation, order, or policy), to enable such municipality to promote the establishment and location of new industries and businesses in such municipality, and to enable such municipality to promote the expansion and modernization of those industries and businesses already located in such municipality; except that such loans shall be subject to the following restrictions:

"(1) No financial assistance shall be extended pursuant to (f) above unless the financial assistance applied for is not otherwise available on reasonable terms and all loans made under (f) above shall be so secured as reasonably to assure repayment;

"(2) no loan shall be made which shall have a maturity date in excess of 25 years;

"(3) no municipality may expend for any one project an amount which exceeds $100,000 or one-half the total cost of such project, whichever is smaller."

SEC. 2. Subsection (b) of section 204 of such act is amended as follows:

(1) by striking out "275,000,000" wherever it appears and inserting in lieu thereof: "375,000,000";

(2) by striking out "207 (a), (b), (c), and (d) in the fourth sentence thereof and inserting in lieu thereof: "207 (a), (b), (c), (d), and (f)"; and

(3) by inserting immediately after the seventh sentence thereof the following: "Not to exceed an aggregate of $100,000,000 shall be outstanding at any one time for the purposes enumerated in section 207 (f) of this title."

SEC. 3. Subsection (a) of section 221 of such act (relating to the termination date of the Small Business Administration is amended by striking out "June 30, 1955," and inserting in lieu thereof "June 30, 1957."

CONSENT CALENDAR TO BE CALLED MARCH 15

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the call of the Consent Calendar on Monday, March 14 be dispensed with and that the Consent Calendar be called on March 15 when the call of the Private Calendar takes place.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALENDAR WEDNESDAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday of next week be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ONE HUNDREDTH ANNIVERSARY OF THE ESTABLISHMENT OF ST. ELIZABETHS HOSPITAL

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, today—March 3—is an anniversary of great significance to this body and to the Nation. It was on this day 100 years ago that President Franklin Pierce signed the bill establishing St. Elizabeths Hospital. I need not dwell on the gravity of the problem with which this great institution is concerned; as we all know, mental illness in its various forms claims more victims in this country today than any other single disease.

This is an anniversary of special interest, of course, to those of us who have the good fortune to represent the Commonwealth of Massachusetts, because it was from Massachusetts that the inspiration came which led to the establishment of St. Elizabeths and many other mental hospitals in this country and Canada and some, even, in far-off Japan.

A century ago, there were few institutions devoted exclusively to the care of the mentally ill, and it is probably safe to say that those that did exist at that time were inadequately staffed and equipped. For the most part, the mentally afflicted in those days were kept locked up in jails and almshouses, or, as was usually the case with the more seriously ill, boarded off in barns and other outbuildings. A great many of them, indeed, lived out their days in chains.

How long it might have taken the country to become aroused to these terrible conditions had it not been for the inspired work of the onetime Boston schoolteacher, Dorothea Lynde Dix, no one can say. Interestingly enough, it was by mere chance—or perhaps it would be more accurate to say by good fortune—that Dorothea Dix herself became interested in the plight of the mentally ill.

One day in 1841 Miss Dix was asked if she could recommend someone to teach Sunday school to the inmates of the East Cambridge jail. They were a difficult group to handle, she was told. Although she had only recently been forced to give up schoolteaching because of ill health, or so she thought, she decided to take on the task herself. St. Elizabeths Hospital and many other mental hospitals as we know when today owe their existence to that decision.

Until she got inside the jail Miss Dix was unaware that it was also used to house the insane people of the community. The biography, Dorothea Dix: Forgotten Samaritan, by Helen E. Marshall, describes the incident in the following words:

> It was a raw March day and the wind whipped sharply around the corners and rattled the windowpanes; the mentally ill huddled closer together in their cold, damp quarters; their teeth chattering at times, and they drew their thin garments tightly about them. They looked appealingly at the sad-faced woman in the dark cashmere, and she was moved to compassion.

Miss Dix was 39 years old at this time. From then on until her death in 1887 at the age of 85 she worked continuously, one is prompted to say almost furiously, to improve the lot of the mentally ill. Until the last few years of her life, her own strength finally exhausted, she was almost never still. Back and forth she went, into one State after another, to Nova Scotia and Newfoundland, visiting the mentally ill in their hovels, marshalling her facts, then pleading, cajoling, demanding action—and getting it. Her

memorial to the Legislature of Massachusetts, the first of many such presentations to legislative bodies, is one of the great documents in the annals of mental illness.

Today, just across the Anacostia River to the south, in the District of Columbia, stands one of the great monuments to the work of this remarkable woman, St. Elizabeths Hospital. From the beginning, St. Elizabeths has been a leader in its field. It was the first hospital in the Western Hemisphere to use the malaria treatment for paresis, probably the first American hospital to use the psychoanalytic technique in the treatment of schizophrenia. It was St. Elizabeths that introduced military psychiatry to this country. It has trained thousands of psychiatrists, psychologists, psychiatric nurses and social workers, chaplains, occupational therapists, and others engaged in the care and treatment of the mentally ill.

In all of its 100 years, St. Elizabeths has had but five superintendents, and one of the early superintendents died prematurely after he had held the position only a short time. This is a remarkable tribute, it seems to me, to the devotion of the professional people who helped to found this great institution and who have maintained its great traditions through the past century. The present superintendent, Dr. Winfred Overholser, is well known to many Members of the House. The great advances at St. Elizabeths in the present century are a tribute to his work and that of his immediate predecessor, Dr. William A. White, who served as Superintendent of St. Elizabeths from 1903 until his death in 1937.

The mental hospitals that have been built throughout the land since Dorothea Dix went to teach Sunday school to the inmates of the East Cambridge jail over a century ago are, above all, manifestations of the humanity of the American people. At the same time they stand as constant reminders that we have really traveled only a short distance along the road toward the ultimate solution of the problem of mental illness.

Improved care of the mentally ill, both as a result of better facilities and scientific advances, has removed much of the pain and squalor so commonly associated with diseases of the mind in times past. The fact that today the term "mental illness" has so largely supplanted the term "insanity" is, in itself, an indication of the progress that we have made in our attitudes and understanding of the problem. But the anguish, the economic loss that are concomitants of mental illness remain and are immeasurable.

I am sure that my colleagues in the House and the American people generally join me in wishing the people of St. Elizabeths Godspeed as they enter upon another century of their endeavor.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. O'HARA of Illinois and to include extraneous matter.

Mr. REUSS and to include extraneous matter.

Mr. PELLY and to include extraneous matter.

Mr. WALTER and to include a broadcast.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to a joint resolution of the Senate of the following title:

S. J. Res. 42. Joint resolution to amend the National Housing Act, as amended.

ADJOURNMENT

Mr. McCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 21 minutes p. m.), under its previous order, the House adjourned until Monday, March 7, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

493. A letter from the Secretary of the Army, transmitting a report showing the number of officers on duty with the Department of the Army and the Army General Staff as of December 31, 1954, pursuant to section 201 (c), of Public Law 581, 81st Congress; to the Committee on Armed Services.

494. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to authorize the execution of mortgages and deeds of trust on individual Indian trust or restricted land"; to the Committee on Interior and Insular Affairs.

495. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to authorize the Territory of Alaska to incur indebtedness, and for other purposes"; to the Committee on Interior and Insular Affairs.

496. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (5) of the Immigration and Nationality Act of 1952 (8 U. S. C. 1254 (a) (5)); to the Committee on the Judiciary.

497. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to section 244 (a) (1) of the Immigration and Nationality Act of 1952 (U. S. C. 1254 (a) (1)); to the Committee on the Judiciary.

498. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to provide for the disposal of federally owned property at obsolescent canalized waterways and for other purposes"; to the Committee on Public Works.

499. A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to amend section 37 of the Internal Revenue Code of 1954 so as to remove a discrimination against retired members of the Armed Forces of the United States"; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 100. A bill to permit the mining, development, and utilization of the mineral resources of all public lands withdrawn or reserved for power development, and for other purposes; with amendment (Rept. No. 86). Referred to the Committee of the Whole House on the State of the Union.

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 2535. A bill to enable the people of Hawaii and Alaska each to form a constitution and State government and to be admitted into the Union on an equal footing with the original States; with amendment (Rept. No. 88). Referred to the Committee of the Whole House on the State of the Union.

Mr. CELLER: Committee on the Judiciary. H. R. 780. A bill to prescribe a method by which the Houses of Congress and their committees may invoke the aid of the courts in compelling the testimony of witnesses; without amendment (Rept. No. 87). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H. R. 4613. A bill to establish in the Bureau of Customs the United States Customs Port Patrol and the United States Customs Border Patrol in order to improve the enforcement of the antismuggling laws; to the Committee on Ways and Means.

By Mr. CHUDOFF:

H. R. 4614. A bill to provide that Mikveh Israel Cemetery, in Philadelphia, Pa., shall be a national shrine; to the Committee on Interior and Insular Affairs.

By Mr. HAGEN:

H. R. 4615. A bill to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. KEOGH:

H. R. 4616. A bill to provide that certain caps shall be dutiable under paragraph 1504 of the Tariff Act of 1930; to the Committee on Ways and Means.

By Mr. McMILLAN:

H. R. 4617. A bill to amend the act entitled "An act authorizing Federal participation in the cost of protecting the shores of publicly owned property," approved August 13, 1946; to the Committee on Public Works.

By Mr. MERROW:

H. R. 4618. A bill to amend the act entitled "An act authorizing Federal participation in the cost of protecting the shores of publicly owned property," approved August 13, 1946; to the Committee on Public Works.

By Mr. SCHENCK:

H. R. 4619. A bill to extend coverage under the Federal old-age and survivors insurance system to individuals engaged in the practice of dentistry; to the Committee on Ways and Means.

By Mr. YATES:

H. R. 4620. A bill to amend title II of the Social Security Act to reduce the age at which individuals may become entitled to benefits thereunder from 65 to 55 in the case of widows and from 65 to 60 in the case of other women; to the Committee on Ways and Means.

By Mr. BOGGS:

H. R. 4621. A bill to amend the Internal Revenue Code of 1954 to provide a 30-percent credit against the individual income tax for amounts paid as tuition or fees to certain public and private institutions of higher education; to the Committee on Ways and Means.

By Mr. DELANEY:

H. R. 4622. A bill to amend the act entitled "An act authorizing Federal participation in the cost of protecting the shores of publicly owned property," approved August 13, 1946; to the Committee on Public Works.

By Mr. LOVRE:

H. R. 4623. A bill to increase, in the case of children who are attending school, from 18 to 21 years the age until which child's insurance benefits may be received under title II of the Social Security Act; to the Committee on Ways and Means.

By Mr. McMILLAN:

H. R. 4624. A bill to establish a family court in and for the District of Columbia; to the Committee on the District of Columbia.

By Mr. POWELL:

H. R. 4625. A bill to amend and revise the laws relating to immigration, naturalization, nationality, and citizenship, and for other purposes; to the Committee on the Judiciary.

By Mr. SELDEN:

H. R. 4626. A bill to amend title II of the Social Security Act to provide for the payment of child's insurance benefits to certain individuals who are over the age of 18 but who are incapable of self-support by reason of physical or mental disability; to the Committee on Ways and Means.

By Mr. SILER:

H. R. 4627. A bill to prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. VAN ZANDT:

H. R. 4628. A bill to amend the Small Business Act of 1953 to authorize loans to be made by the Small Business Administration to municipalities having a substantial labor surplus; to the Committee on Banking and Currency.

By Mr. ASHLEY:

H. R. 4629. A bill to authorize the modification of the existing project for the Great Lakes connecting channels above Lake Erie; to the Committee on Public Works.

By Mrs. KNUTSON:

H. R. 4630. A bill to extend the times for commencing and completing the construction of a toll bridge across the Rainy River at or near Baudette, Minn.; to the Committee on Foreign Affairs.

By Mr. HAYS of Arkansas:

H. J. Res. 242. Joint resolution proposing an amendment to the Constitution of the United States providing for the election of President and Vice President; to the Committee on the Judiciary.

By Mr. KLEIN:

H. J. Res. 243. Joint resolution to control the number of licenses issued in the District of Columbia for the operation of motor vehicles for hire (taxicabs); to the Committee on the District of Columbia.

By Mr. SIMPSON of Illinois:

H. J. Res. 244. Joint resolution relating to sales of Commodity Credit Corporation feed grains; to the Committee on Agriculture.

By Mr. WINSTEAD:

H. J. Res. 245. Joint resolution designating the 26th day of May of each year, beginning with the year 1955, as National Country Music Day; to the Committee on the Judiciary.

By Mr. CHUDOFF:

H. Con. Res. 92. Concurrent resolution extending the congratulations of Congress with respect to the celebration of the Jewish tercentenary in America; to the Committee on the Judiciary.

By Mr. KELLEY of Pennsylvania:

H. Res. 166. Resolution to authorize the Committee on Education and Labor to investigate and study the administration of the Buy American Act; to the Committee on Rules.

H. Res. 167. Resolution to authorize the Committee on Education and Labor to investigate and study the problems of the aging and aged; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. HAYS of Arkansas: Memorial of the State of Arkansas Senate, senate concurrent resolution No. 12 urging the Congress of the United States to appropriate money under the Arkansas River multiple purpose plan and the President of the United States to approve such appropriation for the beginning of construction of dams within the State of Arkansas on the said river as set out in the comprehensive plan and recommended by the United States engineers; to the Committee on Appropriations.

By the SPEAKER: Memorial of the Legislature of the State of Washington, memorializing the President and the Congress of the United States to enact legislation and take such appropriate measures that will assure the citizens of the United States and of the State of Washington the adequate use of Mount Rainier National Park through permission to establish and operate such facilities as are required for the use of visitors both summer and winter, etc.; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H. R. 4631. A bill for the relief of Vittoria Alberghetti, Daniele Alberghetti, Anna Maria Alberghetti, Carla Alberghetti, and Paolo Alberghetti; to the Committee on the Judiciary.

By Mr. BOYKIN:

H. R. 4632. A bill for the relief of Mrs. Verbie G. McCrory, Joseph Franklin McCrory, Mildred Childers, and Kenneth W. Andrews; to the Committee on the Judiciary.

By Mr. DEVEREUX:

H. R. 4633. A bill for the relief of Crosse & Blackwell Co.; to the Committee on the Judiciary.

H. R. 4634. A bill for the relief of Lt. Col. George H. Cronin, United States Air Force; to the Committee on the Judiciary.

By Mr. ELLSWORTH:

H. R. 4635. A bill to authorize the Secretary of the Interior to transfer to Robert T. C. Rasmussen the right, title, and interest of the United States in foreign countries, in and to certain inventions; to the Committee on the Judiciary.

By Mr. HAYS of Arkansas:

H. R. 4636. A bill for the relief of Alicia Shapard (Mrs. J. I. Shapard); to the Committee on the Judiciary.

By Mr. LANE:

H. R. 4637. A bill for the relief of William Henry Diment, Mrs. Mary Ellen Diment, and Mrs. Gladys Everingham; to the Committee on the Judiciary.

By Mr. MORANO:

H. R. 4638. A bill for the relief of Fillipo Mastroianni; to the Committee on the Judiciary.

H. R. 4639. A bill for the relief of Vincenzo Santagata; to the Committee on the Judiciary.

By Mr. OSMERS:

H. R. 4640. A bill for the relief of James M. Wilson; to the Committee on the Judiciary.

H. R. 4641. A bill for the relief of Elias Kulukundis; to the Committee on the Judiciary.

By Mr. RUTHERFORD:

H. R. 4642. A bill for the relief of Mrs. Helen Aldridge; to the Committee on the Judiciary.

By Mr. TEAGUE of California:

H. R. 4643. A bill for the relief of Mrs. Lee Shee Yee (also known as Lee Lai Koon); to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

135. Mr. BUSH presented a petition of the Laurel Hill Grange No. 1161, Ulster, Pa., in opposition to universal military training, which was referred to the Committee on Armed Services.

EXTENSIONS OF REMARKS

A Tribute to Thomas Masaryk

EXTENSION OF REMARKS

OF

HON. BARRATT O'HARA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1955

Mr. O'HARA of Illinois. Mr. Speaker, next Monday, March 7, marks the 105th anniversary of the birth of the founder and liberator of the Czech Republic. I am extending my remarks to pay tribute to this great man.

America has always had a warm place in her heart for Thomas Masaryk. Many thousands of Americans either came themselves or are descendants of men and women who came to us from the land of Thomas Masaryk, Czechoslovakia.

Furthermore, Thomas Masaryk had spent some time in the United States, where he had worked toward the final achievement of his goal, the establishment of the Czechoslovak Republic. Here in Washington, he was a close friend of our great wartime President, Woodrow Wilson. And like Wilson, he was a scholar, a statesman, and a great leader of democracy.

Most of all, however, it was in America that Thomas Masaryk saw embodied many of the ideals of democracy which inspired his drive toward the achievement of national independence for Czechoslovakia. It was, therefore, partly upon the same principles which motivate American democracy that Masaryk constructed the Czechoslovak Republic.

On the anniversary of the birthday of Thomas Masaryk, it is fitting that all Americans pause to pay tribute to the memory of this great Czech patriot. In our tributes let us not forget the homeland of Masaryk, a nation which now lies downtrodden beneath the yoke

of the Communist aggressor. The Communists destroyed the Republic of Thomas Masaryk, but they can never destroy the ideals for which he dedicated his life. It is our prayer, as it once was Thomas Masaryk's, that Czechoslovakia will once again be free and independent.

The Leading Question

EXTENSION OF REMARKS
OF

HON. FRANCIS E. WALTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1955

Mr. WALTER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following broadcast:

CBS RADIO PRESENTS THE LEADING QUESTION, FEBRUARY 27, 1955

Participants: Hon. FRANCIS E. WALTER, chairman, House Un-American Activities Committee, and Hon. William F. Tompkins, Assistant Attorney General in charge of Internal Security Division.

They will give their answers to the lead-question: "How effective are former Communists as witnesses?"

Moderator: Dwight Cooke.

Producer: Nancy Hanschman.

Mr. COOKE. How effective are former Communists as witnesses?

Well, gentleman, recent events have raised this whole question of how effective former Communists are as witnesses, and for that matter, how useful they are and how desirable they are.

Of course, I suppose the item of news which has spurred interest in this overall subject has been the recent testimony of one Harvey Matusow, who has now, before the Senate Internal Security Subcommittee, testified that he has been a perpetual and habitual liar, and I believe he was involved in testifying against some 180 persons by name.

Other witnesses also have changed their minds, or decided what they said was not so.

Does this mean, Congressman WALTER, that most former Communists should not be depended on as witnesses?

Mr. WALTER. Of course it does not. To my mind it indicates that the anti-anti-Communist drive is succeeding.

Mr. COOKE. Wait a minute, a double negative is takable, but the pro-Communist drive then——

Mr. WALTER. That's it exactly. It's technically called the anti-anti-Communist drive, Mr. Cooke, but I certainly feel that the American people are quite fortunate in having people who are willing to make the sacrifices that they do make, in order to learn about the machinations of this conspiracy, willing to come forward and assist the agencies of Government in exposing this international conspiracy.

Mr. COOKE. Well now, Congressman WALTER, are we not talking simultaneously about two different groups of people involved here now? First, the former Communist, like Harvey Matusow; and, second, the Americans who never were Communists, but who infiltrated into the Communist movement so that they would help the United States against it.

Mr. WALTER. That is correct.

Mr. COOKE. Do you also have praise for the first group, the former Communists themselves?

Mr. WALTER. I find it very difficult to bring myself around to praising anybody who, at any time, was a member of an organization that had as its purpose the overthrow of this Republic. However, they have apparently seen the light and are willing to atone for the dreadful mistakes that they made.

Mr. COOKE. So far we have only heard from the legislative branch of the Government.

Mr. Tompkins, how about the executive branch?

Mr. TOMPKINS. Mr. Cooke, I'd like to say this: first of all you must remember that former Communists have given very valuable testimony concerning the revolutionary principles of the Communist Party; and you should also bear in mind that their testimony has been subjected, in each instance, to extended and intensive cross-examination by highly competent counsel.

Some of their cross-examination has lasted for several weeks. Now, the testimony of these witnesses, furthermore, has been weighed by numerous American juries, and it has been found credible.

Now, so far, of the 85 defendants that we have tried for conspiring to violate the Smith Act, and in one membership case which recently terminated here in Chicago, 82 have been convicted.

Now, I can't give you a more convincing yardstick of these witnesses.

Mr. COOKE. These witnesses being carefully tested before you present them all, as part of the case?

Mr. TOMPKINS. Very definitely so. In a preparation for a case, a host of reports have to be digested, a lot of material has to be correlated, the witnesses have to be interviewed, and you must remember that in many of these cases the witnesses are going back many years, searching their recollection.

Now, some of them may have notes from the time that they were members of this Communist conspiracy, but others are searching back maybe 10 or 12 years.

Mr. COOKE. And yet, gentlemen, I can hear some of your listeners say, "I have been reading about a character called Harvey Matusow. He says he was a liar when he testified to the things which helped cause court decisions and jury decisions to be made in one way or another. What kind of a witness was he then, or what kind of a witness was he now?"

Mr. WALTER. Well, maybe I could answer that best, Mr. Tompkins, because I heard Matusow testify before the Committee on Un-American Activities, and it seems to me that before I mentioned his testimony, it might be well for me to point out what that committee does in order to attempt to establish the credibility and honesty of the witness before he is called.

In the first place, and, General, may I say that we call on the Department of Justice for information? Is that revealing any secrets?

Well, we obtain a report from the FBI, and its judgment as to whether or not a witness is responsible and trustworthy, reliable, and honest.

Then we turn to the other agencies of Government concerned with people of this sort, and direct the same inquiry to them. Then the witness is interrogated in executive session by an investigator or counsel for the committee.

Then a report is made to the committee, as to whether or not in the judgment of the person who was charged with the responsibility of making this preliminary inquiry, this person is trustworthy.

The committee then acts, usually on the recommendation of the investigator or the attorney.

Now, that's exactly what happened with Matusow. We were of the opinion that the man was trustworthy and reliable. His story to the committee was absolutely straightforward. I saw nothing in it to indicate that it was colored, and having had the experience of trying literally hundreds of cases in the courts, and knowing something about witnesses, I felt positive that this man was telling the truth.

And, let me tell you, Mr. Cooke, I am convinced that he did tell the truth when he testified before our committee.

Subsequently, we heard stories about his recanting, we called Mr. Matusow a second time, took his original testimony and asked him questions on the original testimony, and he reaffirmed everything that he had said originally.

Now, and that is why I am thoroughly convinced that the fellow is now an emissary of the anti-anti-Communist movement, because when he said that he didn't tell the truth before our committee, then I say it was then that he lied.

Mr. COOKE. So in other words you believe now that Matusow is lying in order to help the Communist Party by impugning witnesses who've testified against people they claimed were Communists.

Mr. WALTER. Mr. Cooke, not only to aid the Communist Party, but in order to try to prevent justice from being done in the cases of those conspirators who were convicted and are faced with the serving of terms in the penitentiary.

Mr. TOMPKINS. Mr. Cooke, and Congressman WALTER, I'd like to point out one very fundamental fact: People say why do you have to use these witnesses, and I'd like to quote a very famous jurist, American jurist, Judge Learned Hand, speaking for the court of appeals in the famous Dennis case, wherein the judge said:

"Courts have countenanced the use of informers from time immemorial in cases of conspiracy or in other cases when the crime consists of preparing for another crime. It is usually necessary to rely upon informers or accomplices because the criminals will almost certainly proceed covertly."

Now, the Communists and some of the Soviet apologists and some of the left-wingers have attempted to connote something evil in the term "informer."

In other words, they have tried to cast a shadow over every one of these witnesses who will come forward and testify for the Government.

Now, a second thing that I think you should be mindful of, in the country today, there is an article that appeared in the January 30 issue of the Denver Post, and it was a very blunt announcement that the International Union of Mine, Mill and Smelter Workers, and I think all of us know what kind of an organization that is, and that it was expelled from the CIO——

Mr. WALTER. May I interrupt, Mr. Tompkins, for the benefit of those people who don't know what it is, let me say categorically that it is a Communist-dominated union.

Mr. TOMPKINS. Thank you, Congressman.

The International Union, at any rate, announced publicly that they were going to start a drive to discredit Government witnesses who were appearing against Maurice Travis, the union secretary-treasurer, who is awaiting trial in Denver's Federal District Court.

They have made no bones about it, that they are going to use every means to discredit the Government witnesses.

Mr. COOKE. In your statement——

Mr. WALTER. Well now, may I interrupt at that point?

Mr. COOKE. Go ahead.

Mr. WALTER. And isn't it a fact that this same union has purchased 6,000 copies of Matusow's book, which is now on the presses?

Mr. TOMPKINS. Congressman, if you will accept that amendment, it's gone up. I think it's closer to 10,000 right today.

Mr. WALTER. Well, of course it will go up, as is necessary to maintain this man.

Mr. COOKE. Well now, a minute ago Mr. Tompkins used a phrase I would like to have him expand a little bit.

You have been stressing how you believe people like Matusow are an attempt to impugn witnesses which help you convict Communists.

You used the phrase, Mr. Tompkins, "Communists," and I don't remember it specifically, it doesn't matter, and left-wingers, something to that effect.

Would you like to expand that last part of that phrase a bit, because——

Mr. TOMPKINS. Well, the only way I can expand it is this: We expect to see the Daily Worker come out and denounce these witnesses, but we are very, very much mystified at some apparently respectable writers who have been carrying on a consistent campaign to discredit; and I might say some of these writers had an advance copy of Mr. Matusow's book.

Mr. COOKE. Are you thinking of a certain columnist specifically who said he'd read it, and every page had been signed by Mr. Matusow?

Mr. TOMPKINS. That's correct.

Mr. WALTER. Well, I might inform you gentlemen that I have a copy of the book here, with me, and I brought it over just because I thought that at some time or other in this discussion with the distinguished Assistant to the Attorney General of the United States somebody might raise the question about the loyalty of this man at any time.

And I think that right at the very beginning he makes it very apparent that he has always been a Communist, in addition to his testimony before the Senate the other day, when he questioned whether or not there was any international conspiracy; but here is what he says in his book:

"My second act of political agitation was a violent one. I threw a rock through the window of the Young Communist League headquarters in my neighborhood. I knew nothing about communism, and cared less, because communism was bad and I feared and hated it.

"I lost my fear while in Europe when I met my first Communists face to face, two members of my infantry company were party members and, to my great surprise, I liked them.

"On occasion I went to Paris and there I met a number of French Communists. I found I respected them. They had all been active in the underground movement, fighting on the same side, in the same war, and for the same cause that brought me to Europe."

Now, gentlemen, I submit that as exhibit A of my charge that this man has always been a Communist, because if that isn't the Communist Party line, then I don't know what the Communist Party line is.

Mr. TOMPKINS. Well, I think the Congressman and I have very, very strong suspicions that Mr. Matusow had no such book in mind until he fell afoul of the Communists. I think that one of the publishers of his book pleaded the fifth amendment when questioned before a Senate committee last year in Boston.

Mr. COOKE. Not about this book, though?

Mr. TOMPKINS. Not about this book, no; the book was not in being then, I don't believe.

I think it's also interesting to note, in connection with Mr. Matusow's testimony now, in which he repudiates his testimony concerned with Clinton Jencks, an official of the Mine, Mill, and Smelter Union. It's interesting to note that Mr. Matusow now has retracted his testimony, and I'd like to cite this as an example of whether his present retraction is in good faith.

When a Senate committee had a hearing, I believe it was out in Salt Lake, Mr. Matusow testified that Mr. Jencks, I believe, was a member of the party.

When Mr. Jencks was confronted by Matusow, put under oath and asked whether he was a member of the party, he pleaded the fifth amendment.

Now, I don't think it takes much reasoning to come to the conclusion as to why he pleaded the fifth amendment, and as to whether or not Mr. Matusow was then telling the truth.

Mr. WALTER. Now, General, right at that point, may I ask you this: A number of people have minimized the importance of pleading the fifth amendment. Of course, I recognize the fact that there are some people who have firm convictions about testifying; but don't you—hasn't it been your experience in checking over the people who have used the fifth amendment, that they are Communists and have a Communist background, and are using the fifth amendment instead of admitting that they are Communists?

Mr. TOMPKINS. Oh, I think that's absolutely correct, Congressman WALTER.

Mr. WALTER. Well, it's very interesting to me, in examining Matusow's testimony before the Committee on Un-American Activities with respect to a youth organization. He named a number of people, and I say to you quite frankly that we have subpenaed these people, not for the purpose of corroborating Matusow's testimony but for the purpose of establishing by other means the fact that these youth organizations against which he testified are, in fact, Communist organizations.

And it would be interesting to me to see how many of the people we've subpenaed will plead the fifth amendment.

Mr. TOMPKINS. I think you will have quite a large group of them, Congressman.

Mr. WALTER. I am sure we will.

Mr. COOKE. There is one point I wanted to clear up, Congressman WALTER:

Are you suggesting that anyone who pleads the fifth amendment, namely, that says "I will not answer the question, because it would in some way criminally involve me," is, therefore, necessarily assumed to be a Communist?

Mr. WALTER. No, sir; nothing further from the truth. However, it's important, insofar as the Committee on Un-American Activities is concerned, to bear this in mind: That the people who have advanced the fifth amendment, have pleaded the fifth amendment, to use the vernacular, are people that we know are Communists.

Mr. TOMPKINS. Well, let me clear up one point, Mr. Cooke, in view of the question you just asked Congressman WALTER: Just remember this, you cannot plead the fifth amendment unless you have a reasonable apprehension that a truthful answer will incriminate you or expose you to a criminal charge.

Mr. COOKE. You can't plead it on matters of, so to speak, faith and conviction, that you don't believe that a committee has any right to ask you the question, and therefore you are not going——

Mr. TOMPKINS. I don't think you have any legal ground, so to plead it.

Mr. WALTER. That's right.

Mr. TOMPKINS. And these people are well advised by counsel, they have them outside grand-jury rooms, and next to them at hearings, and next to them at trials.

Mr. COOKE. So that a counsel says, "You can't—look here no matter what your conviction is here, you cannot plead the fifth amendment unless you have something to hide."

Mr. TOMPKINS. That's correct.

Mr. COOKE. Now, let me say——

Mr. WALTER. Wait a minute; I want to interrupt you at that point.

Mr. COOKE. We have two lawyers, and here we go.

Mr. WALTER. No, it isn't "here we go"; but you are overlooking this, Mr. Tompkins: Some of the members of the legal profession—I don't call them lawyers—you know there is a distinction between a member of the bar and being a lawyer——

Mr. TOMPKINS. That's right.

Mr. WALTER (continuing). But some of these members of the profession that you and I are members of, and are proud of, are the kind of characters who would attempt to prevent congressional inquiries from taking their full course, and would impede their work by advising their clients to hide behind the fifth amendment for no reason at all except that they, the lawyers, were desirous of preventing the truth from being known.

Mr. TOMPKINS. Congressman, you are absolutely right. I intended to bring out that point, sir. It's been my experience, in many cases, that you can pick any name out of the air; I've picked famous ballplayers, prizefighters, and people sitting next to me in grand-jury rooms, and the Communists have taken the fifth amendment.

Now, in other words, let me make this clear, and the Congressman, I think, has already made it clear—they don't plead the fifth amendment in good faith.

Mr. COOKE. All right; thank you——

Mr. WALTER. Well, I think the most dramatic instance of that comes from my own community, where a man came down here to testify—came to Washington to testify before a Senate committee—and he was approached in the Senate by a member of the bar who has appeared in a great many of these cases, who offered him his services. This man said he didn't have a lawyer, didn't want a lawyer, because he was going to testify, and this member of the Washington bar advised the man to plead the fifth amendment, which he did; he went back home to Easton, Pa., and lost his job as a steelworker.

Mr. COOKE. Mentioning Pennsylvania brings up another case, Mr. WALTER.

So far, the only witness we've mentioned by name here has been Harvey Matusow. There was a woman who testified in a hearing before the FCC, I believe, she testified first linking the owner of this television station with Communist activities, and then later retestified and said all that was false.

Where does she fall into the general picture here?

Mr. WALTER. Well, Im afraid that the FCC has gotten around to the point where a general investigation of its activities is indicated. I couldn't imagine anybody calling the kind of a witness this woman apparently is, and giving credence to her testimony.

Mr. TOMPKINS. You want to—you brought in the name of another witness now, Mr. Cooke, and I want to bring in the name of still another one that I know the Congressman is familiar with.

Mr. COOKE. I didn't name her, but I referred to her.

Mr. TOMPKINS. Well, I will mention one right now that some of those who seek to undermine the Government's program have attacked—Paul Crouch. They attacked Paul Crouch for his testimony in the Philadelphia Smith Act case which was concluded here last summer. They claimed it was at variance with the testimony that he gave in the Harry Bridges case on the west coast, when he was asked did he know 98 different names, in rapid succession.

Now, let me say this: The Government could have corroborated Mr. Crouch's testimony in Philadelphia with another witness, but for reasons of security we can't, you know, always use all witnesses at a given time, for reasons of security that witness was not used; but I want to make this very clear, that Mr. Crouch's testimony in Philadelphia could be corroborated.

Mr. WALTER. Why was it necessary? One of those witnesses up there, one of the de-

fendants up there, admitted that he was a Communist, but he said it wasn't a crime.

Mr. TOMPKINS. That's exactly right——

Mr. WALTER. Now, they are going to try to impeach Crouch's testimony because he testified against a man who admitted he was guilty.

Mr. TOMPKINS. Well, of course, as you know, Congressman, the Communists and their supporters want to confuse and mislead the American people.

Mr. COOKE. There's one area you gentlemen, I know, are interested in, we haven't had a chance to focus on.

Mr. WALTER mentioned it for a minute, and that's the area of witnesses who have gone into the Communist Party for you, or gone into other organizations to infiltrate and then report back. There are people who have accused them of being tattlers, spies, un-American, all kinds of things.

Mr. WALTER. Yes, that term "tattlers" reminds me of my own hometown newspaper where the editor describes a great patriotic American's testimony as tattling.

I want to tell you that it takes a great deal of courage to do what these people have done, to go into the Communist Party, lead the kind of lives that they lead when they are in it, only in order to make a contribution to the preservation of our institutions; and I think that they are deserving of a great deal of credit.

They are really the unsung heroes of this cold war.

Mr. TOMPKINS. Well, that's exactly right. I want to reiterate what the Congressman has said about these citizens who—he and I, I know, feel very strongly—are patriotic citizens. For example, one of these informants had to discontinue attending his church functions because of the antagonism shown toward what were believed to be his Communist activities. The children of his neighbors were not permitted to play with his boys and girls because their father was considered a Communist.

Now, when they come and testify, editorials—they have gotten editorial support and help in everything. Now, why is it that certain people now see fit to call them "stool pigeons"?

I disagree.

Mr. COOKE. All right, gentlemen; thank you for being with me today and giving us the benefit of your knowledge and your experience in this very tricky subject of former Communists as witnesses for the Government of the United States.

Price Increases in Shotgun Shells

EXTENSION OF REMARKS

OF

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1955

Mr. REUSS. Mr. Speaker, I represent a district whose inhabitants burn up more powder than those of almost any other district in the Nation. In recent months, I have received many protests from hunters and trap shooters at the sweeping price increases imposed by the manufacturers of shotgun shells in the last 10 years. In the case of 12 gauge trap loads alone, the increase in this period has been 147.6 percent. I am further informed that price changes are generally announced by all manufacturers on the same, or practically the same, date. Typical of the many protests I have received is the following letter of February 25, 1955, from Mr. J. W. Whitehill, president of the Milwaukee Gun Club:

DEAR MR. REUSS: I am writing to you this morning in the interest of the many shooters from Wisconsin who participate in shooting trap and skeet at the Milwaukee Gun Club, Lake Park, Milwaukee, Wis.

The greatest number of shooters are from the Milwaukee area; however, at times shooters from all over the State shoot on our grounds. A considerable number of teams from the large industrial plants also shoot with us and we all are very much disturbed over the raising of the price of shotgun shells during the past year.

Earlier in the year of 1954, these prices were raised and at this time both the shooters and the manufacturers felt that by the elimination of some of the variety of shells being loaded we could agree upon simplifying our requirements by adopting a lighter load in a few specific types. It was our feeling that this would in some degree assist the manufacturers in stabilizing the price. Shortly after this, however, the manufacturers again raised the price 6 percent.

These continuing raises in price are most discouraging to the average citizen who derives pleasure and recreation in shooting of shotguns and in a very sincere effort to help ourselves we are experimenting at this time in the reloading of shells already shot and in this way we are reducing the cost to the shooters who are turning to this reloaded shell in desperation. The Milwaukee Journal has already written a story about this situation and we are finding more and more clubs around the country very much interested in doing something to cut down shooting costs, even importing foreign shells which can be delivered here for 10 percent less than the cost of American shells. We believe this is a most unfortunate situation, Mr. Reuss, and something should be done to stop it.

Shortly after these complaints came to my attention, I asked the Legislative Reference Service of the Library of Congress to obtain for me the price history of shotgun shells in the last 10 years. On February 11, 1955, the Legislative Reference Service wrote the Shotgun Shells Manufacturers Trade Association, the Sporting Arms and Ammunition Manufacturers Institute at 250 East 43d Street, New York, requesting a list of price changes in shotgun shells for the postwar period. When no reply was received, the Legislative Reference Service sent a followup telegram on February 25, 1955, saying, "Information urgently needed for Member of Congress."

Finally, a letter dated March 1, 1955, has been received by the Legislative Reference Service from the Sporting Arms and Ammunition Manufacturers Institute:

This will acknowledge receipt of your letter requesting a list or table showing price changes in sporting ammunition.

We regret that we are unable to comply with your request, but the Institute does not collect or publish information of any kind in regard to prices and has no such list or table. It is a definite policy of the Institute not to engage in any activity in respect to prices. Thus, the Institute has nothing whatsoever to do with prices charged by any of its member companies. Each member company determines its own pricing policy on whatever basis it sees fit and does not report its prices to the Institute. Therefore, we do not have and are not able to furnish any information as regards price changes for sporting ammunition over any period.

The activities of the Institute are concentrated in the fields of research, promotion, safety, and conservation. With the thought that they might be of some interest in connection with your survey of the industry, we are enclosing copies of various Institute publications, which will give you an idea of the important types of activity engaged in by the Institute.

RICHARD F. WEBSTER,
Secretary.

I have communicated to an official of one of the sportsmen's clubs in my district the position of the Sporting Arms and Ammunitions Institute that "We do not have and are not able to furnish any information as regards price changes over any period," and asked him for his comment. His comment was "applesauce."

I have today directed to Mr. Edward F. Howrey, Chairman of the Federal Trade Commission, the following letter:

MARCH 3, 1955.

Mr. EDWARD F. HOWREY,
Chairman, Federal Trade Commission,
Washington, D. C.

DEAR MR. CHAIRMAN: I wish to bring to your attention a situation existing in the shotgun shell industry which is working great hardship on the millions of Americans who enjoy the sport of hunting and of trap and skeet shooting.

For some time, I have been receiving complaints from both within and without my district complaining of the steady price increases in shotgun shells and noting that these price increases have quite generally come at precisely the same time and in precisely the same amount. The following appears to be the price history of the larger shotgun shell manufacturers for 12-gauge trap load shotgun shells during the past 10 years:

Year:	*Price per thousand shells*
1942–46	$32.41
March 1946	37.21
July 1946	40.00
January 1947	48.00
March 1947	50.90
July 1947	53.45
January 1948	53.52
April 1948	58.82
July 1948	64.50
November 1948	67.70
May 1949	64.50
January 1950	65.10
August 1950	71.10
December 1950	78.60
January 1953	75.60
December 1954	80.25

Although trap loads are only some 20 percent of the total shotgun shells sold, the same percentage raises have been made over the years for all varieties of field loads.

You will note that the increase in price is 147.6 percent in under 10 years. I am further informed that these increases by the various manufacturers have been practically simultaneous.

You are, of course, familiar with the numerous cases establishing that horizontal price-fixing practiced in concert by manufacturers is violative of the Federal antitrust laws:

Federal Trade Commission v. *Pacific Paper Association* ((1927) 273 U. S. 52, 62); *United States* v. *Socony-Vacuum Oil Company* ((1940) 310 U. S. 150); *American Tobacco Company* v. *United States* ((1944) 147 F. 2d 93); *United States* v. *Paramount Pictures* ((1946) 66 F. Supp. 323, 337).

On the question whether concerted action can be inferred from a long-standing uniformity of prices charged for a given product by the various manufacturers, coupled with almost simultaneous announcements periodically of identical price increases, the

Federal court in the *United States* v. *Paramount Pictures* case had the following to say:

"Such uniformity of action spells a deliberately unlawful system, the existence of which is not dispelled by the testimony of interested witnesses that one distributor does not know what another distributor is doing; and there can, in our opinion, be no reasonable inference that the defendants are not all planning to fix minimum prices" (*United States* v. *Paramount Pictures*, op. cit., p. 337).

On the facts, it seems to me that a thorough investigation of whether the Sherman and Clayton Acts have been or are being violated is in order. In this connection, the question of mergers in the shotgun-shell industry, and of possible relationships between domestic producers and foreign manufacturers of shotgun shells in restraint of trade should also be investigated.

I shall appreciate being informed of such public action as the Federal Trade Commission undertakes.

Sincerely,

HENRY S. REUSS,
Member of Congress.

Indefinite Status

EXTENSION OF REMARKS
OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 3, 1955

Mr. PELLY. Mr. Speaker, under leave to extend my remarks, I call to the attention of the House a very disturbing situation which has arisen in my district in connection with the new civil-service appointment system, referred to, I believe, as the career conditional appointment system, which went into effect in January.

On the surface the technical features of this program point to a definite improvement of the system. However, as is so often the case, when put into practical operation many grave inequities immediately become apparent. I am referring in particular to the unfortunate position in which over 1,000 employees of the Puget Sound Naval Shipyard have been placed through no fault of their own. Many of these employees, having a record of from 3 to 8 years' continuous employment in the yard and with excellent performance records, now find themselves with an indefinite classification, and as such will fall victim to the first reduction in force that comes along, simply because at the time of employment the civil-service register had either been exhausted or was not established. Conversely many other employees with much less length of service and perhaps a lower efficiency rating have been classified as career conditional or in some cases given career status, with all the benefits and protection attendant to these categories.

I have received scores of letters protesting the arbitrary enactment of this new system. Many of the authors of these protests are known to me personally as fine craftsmen and would represent a serious loss to the defense effort should they fall victim to this ill-conceived order. I am asking the Civil Service Commission to review this program to the end that these glaring inequities be corrected.

As further proof of the disturbed condition of the Puget Sound Naval Shipyard, I offer by way of explanation an editorial entitled "Indefinite Status," which appeared on Friday, February 25, 1955, in the Salute, a weekly publication of the Puget Sound Naval Shipyard:

INDEFINITE STATUS DISCUSSED

The retention of PSNS employees junior in length of service to shopmates who recently received reduction-in-force notices has given rise to questions about the regulations that authorize this apparent inequity.

In January the Civil Service Commission directed the Navy to replace the indefinite system of appointment with the career system. Under the new regulations indefinite employees who had been hired from the civil-service register were automatically converted to a career or career-conditional status. Other indefinites who may have been hired for similar work but were hired instead by recruiting (off the street), remained in an indefinite status and with lower retention rights. Because indefinite employees are in the lowest retention status they are usually the first to be affected by a reduction in force.

Prior to the adoption of new regulations the Civil Service Commission made no distinction between persons hired off the register and those hired by recruiting. During the Korean buildup registers were exhausted and many employees were hired off the street.

When notice of the new regulations was received the shipyard took every step possible to convert indefinite employees to career or career-conditional status. The conversion procedure requires that the indefinite employee who did not receive appointment from the register must now file and be within reach for appointment before he can be changed to retention group II.

The shipyard is doing little hiring at present and as current registers have many outside applicants it is not expected that conversion of all indefinite employees will be accomplished in the near future.

SENATE

FRIDAY, MARCH 4, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O Thou Kindly Light, amid the encircling gloom, o'er moor and fen and crag and torrent still lead us on. We do not ask to see life's distant scenes; one step enough for us. We grope forward with uncertain step in a tense time, dark and filled with fears; as men in mad fury, oblivious to the precious prizes of a thousand years, would fain lead the race back to the law of the jungle as they crucify good will. In all the tumult and the shouting and the confusions of these days help us to trust the faithful stars above us and the glow on the far horizon where the gates of dawn await the day of global brotherhood.

Grant us honesty in dealing with our own besetting sins, humility in confessing them, and determination in overcoming them. At this high altar in the temple of public service maintain in us the fidelity of those to whom much has been given, and from whom much will be required. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, March 2, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXTENSION OF RENEGOTIATION ACT OF 1951—MESSAGE FROM THE PRESIDENT

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Finance:

To the Congress of the United States:

I recommend extension of the Renegotiation Act of 1951, as amended, to make its provisions applicable for an additional period of 2 years. I make this recommendation because I believe the welfare of the country requires it.

In spite of major improvements which we have achieved in our contracting and price redetermination operations, there nevertheless remains an area in which only renegotiation can be effective to assure that the United States gets what it needs for defense at fair prices. In addition, I believe that the entire period of defense expansion and rebuilding which the United States has undertaken since the beginning of the Korean hostilities should be considered as a whole insofar as renegotiation treatment is concerned.

Continuation of the renegotiation authority is necessary for several reasons. Because of the complex nature of modern military equipment, the lack of experience in producing it and the frequent necessity for alterations during the life of a contract, it is impossible for the Government to determine, when the procurement contract is made, what constitutes a fair price and for the supplier

to forecast accurately his costs. Moreover, because of limited sources of supply in many cases, there are situations in which the Government is unable to obtain the price benefits that accrue from normal competition.

Furthermore, in the interest of broadening and strengthening the mobilization base, we have encouraged the extensive use of subcontracting. Because the United States has no direct contractual relations with the subcontractors, the only protection against unreasonable prices by them is through the process of renegotiation.

All these factors become particularly important when it is recognized that expenditures by the Government during the next 2 calendar years will include paying the bills for the completion of the expansion of the Air Force to 137 wings. The next 2 years also will see an introduction into the Air Force program of the latest type of supersonic aircraft. New types of equipment also are being ordered for the Army, and Navy, and Marine Corps.

As a nation, we recognize that so long as defense expenditures represent more than half of the national budget, we must do everything in our power to see to it that the maximum return is received for each dollar spent. On the other hand we must also be careful not to interefere unwisely in the traditional commercial relationship between the Government and its suppliers. In extending the Renegotiation Act last year, the Congress instituted new statutory exemptions. These have lessened the burden imposed on industry by renegotiation and, more important, have concentrated renegotiation in the areas where it is most needed.

I strongly urge that the Congress take action as promptly as possible so that both Government and business will know that this important adjunct to speedy and effective defense contracting will remain available, at least until December 31, 1956.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *March 4, 1955.*

Mr. DWORSHAK. Mr. President, I have just heard with profound interest the President's message which urges the extension of the Renegotiation Act for a 2-year period.

On February 9, 1955, I introduced a bill to accomplish that very purpose, to extend the Renegotiation Act until December 31, 1956. The bill was referred to the Senate Committee on Finance. I have discussed this subject with the chairman of that committee. I certainly hope favorable action will be expedited.

MESSAGE FROM THE HOUSE—ENROLLED JOINT RESOLUTION SIGNED

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the Speaker had affixed his signature to the enrolled joint resolution (S. J. Res. 42) to amend the National Housing Act, as amended, and it was signed by the President pro tempore.

The message also announced that the House had passed a bill (H. R. 1573) to repeal section 348 of the Agricultural Adjustment Act of 1938, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 1573) to repeal section 348 of the Agricultural Adjustment Act of 1938, was read twice by its title, and referred to the Committee on Agriculture and Forestry.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, March 4, 1955, he presented to the President of the United States, the enrolled joint resolution (S. J. Res. 42) to amend the National Housing Act, as amended.

CORRECTION — ADDITIONAL COSPONSORS OF SENATE JOINT RESOLUTION 38

Mr. DIRKSEN. Mr. President, I ask to have the CONGRESSIONAL RECORD of February 4, 1955, corrected on page 1134, so as to include the names of the Senator from Kansas [Mr. SCHOEPPEL], the Senator from Florida [Mr. SMATHERS], the Senator from Alabama [Mr. SPARKMAN], the Senator from Mississippi [Mr. STENNIS], and the Senator from North Dakota [Mr. YOUNG], as cosponsors of Senate Joint Resolution 38, consenting to an interstate compact to conserve oil and gas.

The PRESIDENT pro tempore. Without objection, the RECORD will be corrected as requested by the Senator from Illinois.

COMMITTEE MEETING DURING SENATE SESSIONS

Mr. CAPEHART. Mr. President, at the request of the chairman of the Committee on Banking and Currency, the distinguished Senator from Arkansas [Mr. FULBRIGHT], I ask unanimous consent that the Committee on Banking and Currency may sit during the next 2 weeks while the Senate is in session, to conduct hearings in respect to the stock exchanges of the United States.

The PRESIDENT pro tempore. Without objection, it is so ordered.

VISIT TO THE SENATE BY DR. HORACE KING, MEMBER OF THE PARLIAMENT OF GREAT BRITAIN

Mr. KNOWLAND. Mr. President, I am very pleased to have as my guest today Dr. Horace King, a member of the British Parliament from the Southampton district, and a member of the British Labor Party. Under the rules of the Senate, as a member of a national legislative body, Dr. King is entitled to the privileges of the floor. I am very happy to have him present, and I am sure the Members of the Senate will be delighted to meet Dr. King individually. [Applause, Senators rising.]

VISIT TO THE SENATE BY HON. RICHARD WOOD, A MEMBER OF THE PARLIAMENT OF GREAT BRITAIN

Mr. MONRONEY subsequently said: Mr. President, it is a distinct honor to be permitted to introduce to the Members of the Senate a very distinguished visitor from England. He is distinguished in his own right and as being the son of a very distinguished gentleman, Lord Halifax, who, during a visit to some 40 States of the Union, called on disabled veterans in various hospitals and did much to bring them hope and cheer. Thus we had, in effect, two ambassadors from England, instead of only one. It is a great pleasure and honor to introduce the Honorable Richard Wood, a member of the Parliament of Great Britain. [Applause, Senators rising.]

The PRESIDENT pro tempore. We are delighted to welcome to the Senate this distinguished visitor from the British Parliament.

Mr. KNOWLAND. Mr. President, I wish to join in the remarks of the distinguished President pro tempore and also those of the Senator from Oklahoma in welcoming to the Senate Chamber this distinguished member of the British Parliament, the second one present today. I think it is quite fitting and appropriate that we have present a representative of the British Conservative Party, who has just been introduced, since earlier I had the pleasure of introducing a member of the British Labor Party, both of whom are distinguished representatives of their constituencies and of their country. I hope that as the years go by more representatives of both of those great parties may be able to visit this country and that perhaps more of our people may visit England, so that in the years ahead there may be brought about an even better understanding and closer relationship between the two great nations.

PRINTING OF MEMORIAL ADDRESSES ON THE LATE SENATOR MAYBANK

Mr. CLEMENTS. Mr. President, on last Wednesday, during the memorial services held for Senator Maybank, our late departed colleague, numerous eulogies were handed to me by Members of the Senate, and unanimous consent was obtained to place them in the RECORD. It was my intention at that time to make a request, at the instance of other Members of the Senate, including the President pro tempore, to the effect that other Members who could not be present on the floor that afternoon would have several days in which to submit for the RECORD remarks or statements on the life, character, and public services of the late Senator Maybank.

I now ask unanimous consent that such remarks or statements may be submitted and that they may be printed in the permanent RECORD as of Wednesday last, following the other eulogies delivered on that day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

EXTENSION OF PERIOD FOR EMERGENCY ASSISTANCE TO CERTAIN FARMERS AND STOCKMEN

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation to amend the act of April 6, 1949, to extend the period for emergency assistance to farmers and stockmen (with an accompanying paper); to the Committee on Agriculture and Forestry.

PROMOTION OF AGRICULTURAL DEVELOPMENT PROGRAM

A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation to promote an agricultural development program under title III of the Bankhead-Jones Farm Tenant Act, and for other purposes (with an accompanying paper); to the Committee on Agriculture and Forestry.

REPORT OF OFFICERS ON DUTY WITH DEPARTMENT OF THE ARMY AND ARMY GENERAL STAFF

A letter from the Secretary of the Army, transmitting, pursuant to law, a report of the number of officers on duty with the Department of the Army and Army General Staff on December 31, 1954 (with accompanying reports); to the Committee on Armed Services.

REPORT ON BORROWING AUTHORITY, OFFICE OF DEFENSE MOBILIZATION

A letter from the Director, Office of Defense Mobilization, Executive Office of the President, transmitting, pursuant to law, a report on Borrowing Authority, for the quarter ended September 30, 1954 (with an accompanying report); to the Committee on Banking and Currency.

AMENDMENT OF INTERNAL REVENUE CODE RELATING TO DISCRIMINATION AGAINST CERTAIN MEMBERS OF ARMED FORCES

A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation to amend section 37 of the Internal Revenue Code of 1954 so as to remove a discrimination against retired members of the Armed Forces of the United States (with an accompanying paper); to the Committee on Finance.

AUDIT REPORT ON BUREAU OF NARCOTICS, TREASURY DEPARTMENT

A letter from the Assistant Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Bureau of Narcotics, Treasury Department, for the fiscal year ended June 30, 1954 (with an accompanying report); to the Committee on Government Operations.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949, AS AMENDED, RELATING TO SURPLUS PROPERTY

A letter from the Administrator, Federal Civil Defense Administration, Battle Creek, Mich., transmitting a draft of proposed legislation to amend further the Federal Property and Administrative Services Act of 1949, as amended, to authorize the disposal of surplus property for civil defense purposes (with accompanying papers); to the Committee on Government Operations.

REPORT ON DEPARTMENT OF THE AIR FORCE FOREIGN EXCESS PERSONAL PROPERTY DISPOSAL

A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting, pursuant to law, the annual report of the Department of the Air Force covering the disposal of Air Force excess personal property located in areas outside the continental United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, for the calendar year 1954 (with an accompanying report); to the Committee on Government Operations.

REPORT OF MONEYS RECEIVED AND EXPENDED UNDER OUTER CONTINENTAL SHELF LANDS ACT

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, the amounts of all moneys received and expended in connection with the administration of the Outer Continental Shelf Lands Act of August 7, 1953, for the period August 7, 1953, to July 1, 1954; to the Committee on Interior and Insular Affairs.

AUTHORIZATION OF MORTGAGES AND DEEDS OF TRUST ON CERTAIN INDIAN OR RESTRICTED LANDS

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize the execution of mortgages and deeds of trust on individual Indian trust or restricted land (with an accompanying paper); to the Committee on Interior and Insular Affairs.

AUTHORIZATION FOR TERRITORY OF ALASKA TO INCUR INDEBTEDNESS

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize the Territory of Alaska to incur indebtedness, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

AMENDMENT OF COMMUNICATIONS ACT OF 1934, RELATING TO AUTHORITY OVER CERTAIN COMMON CARRIERS

A letter from the Chairman, Federal Communications Commission, Washington, D. C., transmitting a copy of proposed legislation to amend sections 212, 219 (a), 221 (a), and 410 (a) of the Communications Acts of 1934, as amended, submitted by the Federal Communications Commission (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

THEODORE J. HARRIS

A letter from the Postmaster General, transmitting a draft of proposed legislation for the relief of Theodore J. Harris (with an accompanying paper); to the Committee on the Judiciary.

GRANTING OF APPLICATIONS FOR PERMANENT RESIDENCE TO CERTAIN ALIENS

Two letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders granting the applications for permanent residence filed by certain aliens, together with a detailed statement of the facts and pertinent provisions of law as to each alien, and the reasons for granting the applications (with accompanying papers); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation, together with a detailed statement of the facts and pertinent provisions of law as to each alien and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

AUTHORIZATION FOR FURNISHING SUBSISTENCE AND QUARTERS TO CERTAIN EMPLOYEES OF CORPS OF ENGINEERS

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to authorize the furnishing of subsistence and quarters without charge to employees of the Corps of Engineers engaged on floating plant operations (with an accompanying paper); to the Committee on Post Office and Civil Service.

DISPOSAL OF FEDERALLY OWNED PROPERTY AT OBSOLESCENT CANALIZED WATERWAYS

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to provide for the disposal of federally owned property at obsolescent canalized waterways, and for other purposes (with an accompanying paper); to the Committee on Public Works.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of the Selective Service System, which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the Territory of Alaska; to the Committee on Appropriations:

"House Joint Memorial 10

"To the President of the United States; the Congress of the United States; Director of Defense Mobilization; Secretary of Defense; Secretary of the Interior; the Governor of Alaska; the Delegate to Congress from Alaska; the Bureau of Public Roads; and the Alaska Road Commission, Juneau, Alaska:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d session assembled, respectfully represents that:

"Whereas the connection by road of Unalakleet and Kaltag, Alaska, is important to the defense of Alaska and the development of river commerce on the Yukon River; and

"Whereas such road would approach the Kateel River area in which approximately 500,000 acres of land are under oil leases; and

"Whereas the distance from St. Michael to Kaltag, the usual shipping route, by river is approximately 500 miles; and

"Whereas the distance from Unalakleet to Kaltag by proposed road is approximately only 90 miles; and

"Whereas navigation from Kaltag up the Yukon River as far Galena is open at least 30 days before navigation of the same river is open from St. Michael to Kaltag; and

"Whereas the proposed site for said road is a natural roadbed conducive to easy construction; and

"Whereas the construction of said proposed road would make it possible to get supplies into Galena by a much shorter route than that now followed in shipping down river from Nenana.

"Now, therefore, your memorialist, the Legislature of the Territory of Alaska, respectfully urges the President of the United States, the Congress of the United States, Director of Defense Mobilization, Secretary of Defense, Secretary of the Interior, the

Governor of Alaska, the Delegate to Congress from Alaska, the Bureau of Public Roads, and the Alaska Road Commission, Juneau, Alaska, to appropriate sufficient funds to construct this proposed road between Unalakleet and Kaltag, Alaska, in the construction year of 1956.

"And your memorialist will ever pray.

"Passed by the house February 15, 1955.

"WENDELL P. KAY,
"Speaker of the House.

"Attest:

"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Passed by the senate February 21, 1955.

"JAMES NOLAN,
"President of the Senate.

"Attest:

"KATHERINE T. ALEXANDER,
"Secretary of the Senate."

A joint resolution of the Legislature of the Territory of Alaska; to the Committee on Finance:

"House Joint Memorial 6

"To the Honorable DWIGHT D. EISENHOWER, PRESIDENT OF THE UNITED STATES; TO THE PRESIDENT OF THE SENATE AND THE SPEAKER OF THE HOUSE OF REPRESENTATIVES OF THE CONGRESS OF THE UNITED STATES; TO THE HONORABLE DOUGLAS MCKAY, SECRETARY OF THE INTERIOR; AND TO THE HONORABLE FELIX WORMSER, ASSISTANT SECRETARY OF THE INTERIOR:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d regular session assembled, respectfully submits that:

"Whereas domestic deposits of many vital metals and minerals are not nearing exhaustion; and

"Whereas heavy taxation has depressed the mining industry to the point where the chance of making a fair return on a new mining investment has all but disappeared:

"Now, therefore, your memorialist, the Legislature of the Territory of Alaska respectfully urges that to encourage and promote active search for, and exploitation of, domestic mineral resources, the Congress of the United States legislate into effect a tax incentive program, applicable to all States, Territories and possessions, embodying the following principles:

"1. Exemption from income tax liability of a newly launched mining enterprise for a period of 3 years after the property has begun commercial operations;

"2. Removal of the existing limitations on deductibility of exploration expenditures;

"3. Deductions for percentage depletion should not be denied a taxpayer either in a year of loss or the year against which the loss is applicable;

"4. Depletion should be allowed to stockholders owning stock in a corporation that derives 75 percent or more of its profits directly from the operation of mines; and

"5. A mining taxpayer should be allowed to write off up to 25 percent of his depreciable capital annually.

"And your memorialist will ever pray.

"Passed by the house February 4, 1955.

"WENDELL P. KAY,
"Speaker of the House.

"Attest:

"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Passed by the senate February 21, 1955.

"JAMES NOLAN,
"President of the Senate.

"Attest:

"KATHERINE T. ALEXANDER,
"Secretary of the Senate."

ACREAGE ALLOTMENTS FOR SPRING WHEAT—CONCURRENT RESOLUTION OF NORTH DAKOTA LEGISLATURE

Mr. LANGER. Mr. President, on behalf of myself and my colleague, the junior Senator from North Dakota [Mr. YOUNG], I present, for appropriate reference, a concurrent resolution of the Legislature of the State of North Dakota relating to the unwarranted, unfair discrimination in acreage allotments for spring wheat.

The PRESIDENT pro tempore. The concurrent resolution will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The concurrent resolution was referred to the Committee on Agriculture and Forestry, as follows:

Senate Concurrent Resolution 5

Concurrent resolution memorializing Congress, the President, and the Secretary of Agriculture to take appropriate steps to correct unwarranted and unfair discrimination in respect to acreage allotements for hard spring wheat farmers in North Dakota

Whereas there has never been and there is not now a surplus or oversupply of hard spring wheat; and

Whereas the allotement of hard spring wheat acreage throughout the State of North Dakota is so low in many instances that many farmers cannot operate their farms successfully and produce sufficient agricultural products and livestock to provide a livelihood for themselves and their families; and

Whereas there is unquestionably an unfair discrimination against the small hard spring wheat farmers in North Dakota as compared with soft wheat farmers in other States: Now, therefore, be it

Resolved by the Senate of the State of North Dakota (the House of Representatives concurring therein), That Congress, the President of the United States, and the Secretary of Agriculture are hereby urged and requested to take all necessary and appropriate steps to establish a minimum of 100 acres for each hard spring wheat grower in the State of North Dakota, as well as in such other States as may be producing hard spring wheat and which are now faced with the hardship resulting from such unfair discrimination; be it further

Resolved, That the secretary of state is hereby directed to forward properly authenticated copies of this resolution to the President of the United States, to the Presiding Officers of the United States Senate and House of Representatives, to the Secretary of Agriculture, and to each of the Senators and Representatives of the State of North Dakota in Congress.

Mr. YOUNG. Mr. President, I ask unanimous consent that I may make a statement of not to exceed 1 minute in support of the resolution adopted by the Legislative Assembly of North Dakota, and presented by my senior colleague [Mr. LANGER].

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the junior Senator from North Dakota may proceed.

Mr. YOUNG. The resolution very properly calls attention to the fact that the United States today does not have a surplus of high quality hard spring wheat. The spring wheat farmers of America have constantly strived to produce the very best-quality wheat. They have refrained from the temptation to produce low-quality wheats which are a much higher producer. To a large extent many of our low yields, and sometimes our crop failures because of rust, are due to the fact that our farmers have planted only top-quality wheat. This is not true of many other wheat-producing areas of the United States.

We do not believe our farmers should be penalized, as they are now, because they have continued to produce top quality but lower producing wheats.

By Mr. LANGER (for himself and Mr. YOUNG):

A resolution of the Senate of the Legislature of the State of North Dakota; to the Committee on Public Works:

"Senate Resolution 6

"Resolution to the Honorable Dwight D. Eisenhower, President of the United States; to the Congress of the United States; to the Honorable Sinclair Weeks, Secretary of the Department of Commerce; to the Honorable Charles E. Wilson, Secretary of Defense; to the Honorable C. D. Curtiss, Chief of Administration for the Bureau of Public Roads; to the Honorable Milton R. Young and the Honorable William Langer, United States Senators from the State of North Dakota; to the Honorable Otto Krueger and the Honorable Usher L. Burdick, Congressmen from the State of North Dakota; requesting a reallocation and increased strategic mileage in the Federal Aid Highway Act of 1944 to add United States Highway No. 2 to the National Interstate highway system

"Whereas the Federal Aid Highway Act of 1944, which act amended the Federal Road Act, approved July 11, 1916, as amended and supplemented, provided that 'There shall be designated in the continental United States a national system of interstate highways not exceeding 40,000 miles in extent, so located as to connect by routes as direct as practicable the principal metropolitan areas, cities, and industrial centers, to serve the national defense and to connect at suitable border points with routes of continental importance in the Dominion of Canada and the Republic of Mexico;' and

"Whereas the act further provided that 'The routes of the national system of interstate highways shall be selected by joint action of the highway departments of the several States and the adjoining States,' and in another provision required approval by the Federal Works Administrator; and

"Whereas Phillip B. Fleming, major general, United States Army, Administrator of the Federal Works Agencies, caused to be entered a certificate of approval of the national system of interstate highways, dated the second day of August 1947, which adopted a national system of interstate highways, selected by the joint action of the State highway departments of each State and adjoining States, and

"Whereas the national system of interstate highways selected, modified, and revised, as aforesaid, is comprised of routes totaling approximately 37,800 miles in extent; and

"Whereas there is a balance of 2,200 miles within the 40,000-mile limit provided for in the Federal Aid Act of 1944 which can be placed on the interstate system; and

"Whereas United States Highway No. 2 is the shortest route through arterial highway link between Sault Ste. Marie, Mich., and Seattle, Wash., and runs parallel to the northern border of the United States and intercepts all highway communications with Canada in the State of North Dakota, as well as the several other boundary States; and

"Whereas said United States Highway No. 2 plays an ever increasing integral and necessary role in the tremendous development of the country's natural resources, namely, oil, coal, gas, iron ore, nuclear, and other minerals, as well as the vast timber industry, and in the vast development of power being generated by the dams constructed and being constructed in the Northwest, and in the expanding industrial development potential in the several States and in Canada, notably in the Provinces of Manitoba and Alberta, all of which demands a revision and an increase in our vital defense needs; and

"Whereas the said United States Highway No. 2, which can without any difficulty be linked from east coast to west coast through the States of New York, Vermont, New Hampshire, and Maine, and connected with Canada's Highway No. 9 from New York to Montreal and Highway No. 17 from Montreal to Sault Ste. Marie, which are of importance in Dominion of Canada, is the only connection between our air defense bases, the number of which and the personnel involved are known only to Congress, and Department of Defense officials, along the entire northern defense perimeter of the continental United States; and

"Whereas, under the hourly maximum traffic classifications, the interstate designation of the United States Highway No. 2 to be determined by the Bureau of Public Roads, can be the classification of interstate rural, under the specification for the interstate system set out by the Bureau, this could call for a two-lane highway with a 100-foot right-of-way, and

"Whereas the total mileage involved in this petition is approximately 2,178 miles in length and connects at points in seven States from the City of Sault Ste. Marie, Mich., to the city of Everett, Wash., and

"Whereas, while this is a petition from the State of North Dakota, it is contemplated the joining by the several other States with similar petitions, action having already been started in the States of Montana, Idaho, and Washington, this is especially true in view of the gigantic growth and expansion of the areas served by, contiguous to and adjacent to United States Highway No. 2, because such areas, at their accelerated progress, resulting from a shift of population and industry to the Northwestern States, and increasing industrial expansion in all areas, demand a revision of the transportation needs; and

"Whereas this request that the designation of the United States Highway No. 2 be placed on the national system of interstate highways is made without prejudice to existing interstate highways in the State of North Dakota, and in the other States served by the United States Highway No. 2: Now, therefore, be it

"Resolved by the Senate of the State of North Dakota, that the senate does hereby, most earnestly and respectfully, request that the Congress of the United States recognize the strategic importance of United States Highway No. 2, and through the proper Federal agencies take immediate action to have United States Highway No. 2 designated an integral part of the national system of defense highways, and that it be placed on the national system of interstate highways; be it further

"Resolved, That copies of this resolution be transmitted by the Honorable Norman Brunsdale, Governor of the State of North Dakota, and by the Honorable Ben Meier, secretary of state of North Dakota, to the Honorable Dwight D. Eisenhower, President of the United States; to the Congress of the United States; to the Honorable Sinclair Weeks, Secretary of the Department of Commerce; to the Honorable Charles E. Wilson, Secretary of Defense; to the Honorable C. D. Curtiss, Chief of Administration for the Bureau of Public Roads; to the Honorable Milton R. Young and the Honorable William Langer, United States Senators from North Dakota; and to the Honorable Otto Krueger and the Honorable Usher L. Burdick, Congressmen from North Dakota.

"C. P. DAHL,
"President of the Senate.
"EDWARD LENO,
"Secretary of the Senate."

By Mr. SALTONSTALL (for himself and Mr. KENNEDY):

A resolution of the House of Representatives of the Commonwealth of Massachusetts; to the Committee on Interior and Insular Affairs:

"Resolution memorializing the Congress of the United States to take action to admit Alaska and Hawaii to statehood

"Whereas the matter of the admission to statehood of Alaska and Hawaii has been under consideration for a long time; and

"Whereas both Alaska and Hawaii by the democratic processes prevailing therein and the actions of their people, have shown that they are entitled to become states of the United States of America: Therefore be it

"Resolved, That the Massachusetts House of Representatives respectfully urges the Congress of the United States to take such action as may be necessary to admit both Alaska and Hawaii to statehood; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the State secretary to the President of the United States, to the presiding officer of each branch of Congress and to each Member thereof from this Commonwealth."

By Mr. CHAVEZ:

A joint resolution of the Legislature of the State of New Mexico; to the Committee on Agriculture and Forestry:

"Senate Joint Memorial 1

"Joint memorial by the 22d Legislature of the State of New Mexico memorializing the Congress of the United States of America to provide adequate sources of farm credit to agricultural enterprises in New Mexico, particularly those stricken by the drought and other disasters

"Whereas drought and disaster have created in many areas in New Mexico a critical financial condition for farmers and businessmen; and

"Whereas sound and adequate credit facilities are urgently needed to preserve the economy of many sections of the State and to prevent needless suffering on the part of those family enterprises hardest hit by drought and other disaster: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be, and it hereby is, memorialized to enact new legislation and broaden existing legislation that will authorize or provide for the following:

"1. Extension of the authority and time limit for making emergency loans beyond the present 2-year period which expires in July 1955;

"2. Orderly liquidation of the above emergency loans over periods up to 10 years;

"3. A relatively low interest rate on such emergency loans;

"4. A loan program set up through the Farmers' Home Administration to enable farmers and ranchers to consolidate all of their financial obligations, excluding real estate mortgages, but including provision for interest on real estate loans and for taxes;

"5. A provision allowing the borrower, where necessary, to make reasonable land payments from sale of farm products;

"6. Additional farm-mortgage credit comparable to the former Land Bank Commissioner loans in such disaster and drought areas;

"7. Streamlining of Farmers' Home Administration loan procedures, including removal of regulations requiring personal financial responsibility of Farmers' Home Administration personnel except where fraud or gross negligence is clearly indicated;

"8. Broadening and extension of the feed and livestock use provisions of the emergency feed-relief program so that this program will be better adapted and more workable in each area, to include a provision that necessary precautions be taken to see that the feed is used for the purpose for which it was intended; be it further

"Resolved, That certified copies of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each Member of the New Mexico delegation in Congress.

"JOE M. MONTOYA,
"President, Senate.
"EDWARD G. ROMERO,
"Chief Clerk, Senate.
"DONALD D. HALLAM,
"Speaker, House of Representatives.
"FLOYD CROSS,
"Chief Clerk, House of Representatives.

"Approved by me this 18th day of February 1955.

"JOHN F. SIMMS,
"Governor, State of New Mexico."

Two joint resolutions of the Legislature of the State of New Mexico; to the Committee on Finance:

"Senate Joint Memorial 5

"Joint memorial memorializing the Representatives and Senators of the State of New Mexico in the Congress of the United States to support and undertake legislation limiting the importation of foreign petroleum

"Whereas to the best information available to the legislature of this State the following considerations pertaining to the petroleum industry should be held paramount in any public policy concerning the industry:

"Item I. There exists no reasonable and economic means of stockpiling petroleum for the national defense; therefore, large proven and developed reserves must be maintained through the investment of vast amounts of labor and capital and through the continuous application and development of new methods of discovery and recovery of petroleum reserves.

"Item II. The United States Department of Interior has urged that the petroleum industry maintain a production capacity far above the Nation's average daily production.

"Item III. In the interest of conservation of petroleum as a basic natural resource it is essential that the depletion of any pool or area be done in a methodical and orderly manner to conserve the resource and to attract new capital.

"Item IV. Most of the Nation's petroleum producing States have joined in creating and maintaining a voluntary and effective means of regulating production to serve the ends of national security and the conservation of this highly essential resource by providing a venturesome but, for the aggregate

of investors, a sound investment opportunity, and by providing for the Nation a rapidly growing quantity of proven reserves and highly productive capacity; and

"Whereas national policy now permits the importation of foreign crude petroleum or refined products at a rate which jeopardizes the continued development of domestic sources and production facilities and so endangers the Nation's defense as well as the economic welfare of New Mexico and her sister petroleum producing States; and

"Whereas New Mexico and her sister oil-producing States are contributing to and becoming essential parts of a great industrial complex founded largely upon petroleum as an economic and easily transported source of energy; and

"Whereas the continued growth and well-being of these States and the Nation depend upon the continuing development of petroleum resources: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be, and hereby is, urged to act at the earliest opportunity to restrict the present excessive rates of imports of oil to a level which will prevent injury to the national security and the general economy and welfare of the Nation; be it further

"Resolved, That copies of this joint memorial be transmitted to Members of this State's delegation in Congress.

"JOE M. MONTOYA,
"President, Senate.
"EDWARD G. ROMERO,
"Chief Clerk, Senate.
"DONALD D. HALLAM,
"Speaker, House of Representatives.
"FLOYD CROSS,
"Chief Clerk, House of Representatives.

"Approved by me this 18th day of February 1955.

"JOHN F. SIMMS,
"Governor, State of New Mexico."

"Senate Joint Resolution 10

"Joint resolution to the United States Treasury Department regarding the sale of foreign and imported potash in the United States at less than fair market value

"Whereas the United States Treasury Department has reportedly ascertained that potash is being imported from foreign sources and sold in the United States at less than fair market value; and

"Whereas such action appears to be in violation of the Federal antidumping laws; and

"Whereas such action tends to damage the American potash industry, and particularly the potash industry of the State of New Mexico; and

"Whereas the potash industry is of vital concern to the economy of the State of New Mexico and its citizens: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the United States Treasury Department be urged to take necessary action to investigate and enforce compliance with the letter and spirit of the antidumping laws of the Federal Government insofar as such laws pertain to potash and the potash industry; be it further

"Resolved, That copies of this resolution be transmitted to the Secretary of the Treasury of the United States, and to each Member of the United States Senate and the United States House of Representatives from the State of New Mexico, and the United States Tariff Commission.

"JOE M. MONTOYA,
"President, Senate.
"EDWARD G. ROMERO,
"Chief Clerk, Senate.
"DONALD D. HALLAM,
"Speaker, House of Representatives.
"FLOYD CROSS,
"Chief Clerk, House of Representatives.

"Approved by me this 18th day of February 1955.

"JOHN F. SIMMS,
"Governor, State of New Mexico."

A joint resolution of the Legislature of the State of New Mexico; to the Committee on Interior and Insular Affairs:

"Senate Joint Memorial 3

"Joint memorial memorializing the Congress of the United States to enact legislation granting 2 million acres of land in trust to this State for the purpose of providing public school buildings

"Be it resolved by the Legislature of the State of New Mexico:

"Whereas the United States Government and the agencies thereof own over 40 percent of the total land in the State of New Mexico; and

"Whereas such land is not subject to taxation by the State and results in a hardship to the people of this State in raising sufficient revenue for the support of public schools; and

"Whereas a grant of 2 million acres in trust to the State for public school buildings would greatly alleviate such hardship; and

"Whereas such a trust would be of permanent and enduring benefit and would provide a more stable support for the public schools than appropriations by Congress for such purposes: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be and it hereby is memorialized to enact legislation granting 2 million acres of land in this State in trust to the State for public school buildings and providing that only the income from such trust may be expended for such school buildings; and be it further

"Resolved, That a duly enrolled and engrossed copy of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each Member of the New Mexico delegation in Congress.

"JOE M. MONTOYA,
"President, Senate.
"EDWARD G. ROMERO,
"Chief Clerk, Senate.
"DONALD D. HALLAM,
"Speaker, House of Representatives.
"FLOYD CROSS,
"Chief Clerk, House of Representatives.

"Approved by me this 18th day of February 1955.

"JOHN F. SIMMS,
"Governor, State of New Mexico."

A resolution of the Senate of the State of New Mexico; to the Committee on Interior and Insular Affairs:

"Senate Memorial 4

"Memorial memorializing the Senate and House of Representatives of Congress of the United States to pass Senate bill No. 500 to authorize the Secretary of the Interior to construct, operate, and maintain the Colorado River storage project

"Whereas there is a pressing need for the most beneficial use of natural resources in the United States of America; and

"Whereas the citizens of New Mexico are especially interested in, and dependent upon the natural resources represented by life-giving waters of our rivers and streams; and

"Whereas Senate bill No. 500, now before the Congress of the United States, would, in the considered opinion of the people of New Mexico, and the 22d legislature of the State of New Mexico authorize an extremely vital project: Now, therefore, be it

"Resolved by the legislature of the State of New Mexico, That the Congress of the United States be urged to give their earnest consideration to, and pass Senate bill No. 500, which would authorize the Secretary of the Interior to construct, operate, and maintain the Colorado River storage project; be it further

"Resolved, That certified copies of this memorial be transmitted to both Houses of Congress, to the chairman of the Committee on Interior and Insular Affairs, and to Senators CLINTON P. ANDERSON and DENNIS CHAVEZ.

"JOE M. MONTOYA,
"President of the Senate.
"EDWARD G. ROMERO,
"Chief Clerk of the Senate.

"Approved by me this 8th day of February 1955.

"JOHN F. SIMMS,
"Governor, State of New Mexico."

A resolution of the Senate of the State of New Mexico; to the Committee on the Judiciary:

"Senate Memorial 6

"Memorial memorializing the Congress of the United States to prohibit the issuance of Federal liquor licenses in counties of States having exercised local option prohibiting sale of intoxicants within its boundaries

"Whereas certain counties in New Mexico have elected by the local option process to prohibit the sale of intoxicants in their boundaries; and

"Whereas certain individuals obtain Federal liquor licenses and distribute liquor in violation of the local laws, a condition has developed which tends to contribute to juvenile delinquency. Lack of adequate police supervision in remote rural areas encourages youths to purchase alcoholic beverages from federally licensed persons and in violation of the New Mexico law; and

"Whereas the problem of law enforcement in counties of large area and small population is materially increased it is felt the denial of Federal liquor licenses in local option dry counties will reduce violation of local laws: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be and is hereby respectfully urged to enact legislation prohibiting the issuance of Federal liquor licenses in counties of the State of New Mexico which have by local option process elected to prohibit the sale of alcoholic beverages; and be it further

"Resolved, That the enrolled and engrossed copies of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each Senator and Representative in Congress from New Mexico.

"JOE M. MONTOYA,
"President of the Senate.
"EDWARD G. ROMERO,
"Chief Clerk of the Senate.

"Approved by me this 18th day of February 1955.

"JOHN F. SIMMS,
"Governor, State of New Mexico."

LETTER AND CONCURRENT RESOLUTION OF INDIANA LEGISLATURE

Mr. CAPEHART. Mr. President, I present for appropriate reference, and ask unanimous consent to have printed in the RECORD a letter from William C. Brummett, principal clerk of the Indiana State House of Representatives and the enclosed copy of the House Concurrent Resolution 9, of the Indiana Legislature, relating to the investigation of corrupt operations of the Federal Housing Administration.

The PRESIDENT pro tempore. The letter and resolution will be received and appropriately referred; and, without objection, will be printed in the RECORD.

The letter and resolution were referred to the Committee on Banking and Currency, as follows:

STATE OF INDIANA,
Indianapolis, February 24, 1955.

Senator HOMER E. CAPEHART,
Senate Office Building,
Washington, D. C.

DEAR SENATOR CAPEHART: The House Concurrent Resolution 9 commending the Senate Banking and Currency Committee of the United States Senate and you for your efforts in investigating the corrupt operations of the Federal Housing Administration is enclosed.

We are indeed proud to know that our own Senator is doing such fine work in the Senate.

Very truly yours,
WILLIAM C. BRUMMETT,
Clerk.

House Concurrent Resolution 9

Concurrent resolution commending the Senate Banking and Currency Committee of the United States Senate and Senator HOMER E. CAPEHART for their efforts in investigating the corrupt operations of the Federal Housing Administration

Whereas shocking proof of wholesale misuse of the people's money under the loose or corrupt operation of the Federal Housing Administration has been revealed by the coast-to-coast investigation by the Banking and Currency Committee of the United States Senate; and

Whereas these revelations are resulting in the correction of the laws and regulations which permitted this multi-million-dollar abuse to grow into a scandalous racket: Therefore be it

Resolved by the House of Representatives of the General Assembly of the State of Indiana (the Senate concurring):

SECTION 1. The members of the 89th General Assembly of the State of Indiana do hereby extend congratulations to the Banking and Currency Committee of the United States Senate for what it has done, and they especially commend the Honorable HOMER E. CAPEHART for his tireless and thorough work as the chairman of that committee and for his fearless exposure of the Federal Housing Administration mess.

RESOLUTION OF GUAM LEGISLATURE

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Maria C. Duenas, Executive Secretary of the Third Guam Legislature, Territory of Guam, together with Resolution No. 25, adopted by the Guam Legislature, relating to the special housing finance fund for Guam.

There being no objection, the letter and resolution were ordered to be printed in the RECORD, as follows:

THIRD GUAM LEGISLATURE,
TERRITORY OF GUAM,
Agana, Guam, February 14, 1955.

Hon. HOMER CAPEHART,
House of Senate,
United States Congress,
Washington, D. C.

SIR: As directed, I am enclosing a certified copy of Resolution No. 25, relative to expressing the appreciation of the people of Guam to the Honorable HOMER CAPEHART, Senator from the State of Indiana, for his cooperation and his conscientious consideration and representations leading to the provision of a $15 million special housing finance fund for Guam, duly and regularly adopted by the Guam Legislature on January 19, 1955.

Very truly yours,
MARIA C. DUENAS,
Executive Secretary.

Resolution 25

Resolution relative to expressing the appreciation of the people of Guam to the Honorable HOMER CAPEHART, Senator from the State of Indiana, for his cooperation and his conscientious consideration and representations leading to the provision of a $15 million special housing finance fund for Guam

Be it resolved by the Legislature of the Territory of Guam:

Whereas the Honorable HOMER CAPEHART, Senator from the State of Indiana and members of the staff of the distinguished Senator did cooperate fully and were instrumental in assisting the people of Guam to obtain a special assistance $15 million housing fund for the rehabilitation of this Territory: Now, therefore, be it

Resolved, That the Third Guam Legislature does hereby express on behalf of the people of Guam their deep and sincere appreciation to the Honorable Senator HOMER CAPEHART from Indiana for his sympathetic understanding of the housing problems of Guam and his constructive and effective aid in helping to partially solve the same through special assistance financing; and be it further

Resolved, That the executive secretary be and she hereby is directed to transmit copies of this resolution to the Honorable HOMER CAPEHART, Senator from the State of Indiana, and to the Governor of Guam.

F. B. LEON GUERRERO,
Speaker.
A. S. N. DUENAS,
Legislative Secretary.

RESOLUTIONS OF ASSOCIATION OF AMERICAN PHYSICIANS & SURGEONS, INC., CHICAGO, ILL.

Mr. LANGER. Mr. President, I present for appropriate reference, and ask unanimous consent to have printed in the RECORD, resolutions adopted by the delegates of the Association of American Physicians & Surgeons, at their meeting in Chicago, Ill., on October 2, 1954, relating to the treatymaking power, and tax-exempt foundations.

There being no objection, the resolutions were received, appropriately referred, and ordered to be printed in the RECORD, as follows:

To the Committee on the Judiciary:

"RESOLUTION ON THE NEW BRICKER AMENDMENT

"Whereas the Association of American Physicians & Surgeons, in regular session assembled in the past, have adopted resolutions favoring passage of Senator BRICKER'S amendment which would limit future treaty commitments to such areas as (1) those which would not abridge individual freedom, and (2) those which would not be unconstitutional if passed as domestic law; and

"Whereas a new Congress (the 84th) will convene on January 5, 1955, and many Members of it will not be cognizant of the association's previous actions; and

"Whereas Senator BRICKER has declared his intentions of introducing his new amendment (S. J. Res. 181 of the 83d Cong.) on the 1st day of the 84th Congress, January 5, 1955: Therefore be it

"Resolved, That we, the members of the Association of American Physicians & Surgeons, in regular session assembled this 2d day of October 1954, do hereby reaffirm our support of Senator BRICKER'S Senate Joint Resolution 181 (83d Cong.), or equivalent legislation to be introduced; be it further

"Resolved, That a copy of this resolution be spread upon the minutes of this meeting and that copies be sent to (1) the President of the United States, (2) all Members of Congress, and (3) all State and county medical societies."

To the Committee on Finance:

"RESOLUTION ON TAX-EXEMPT FOUNDATIONS

"Whereas the Reece subcommittee of the 83d Congress to investigate the activities of tax-exempt foundations is a temporary committee; and

"Whereas the Reece subcommittee was unable to complete its work and ceased to exist with the end of the session of the 83d Congress; and

"Whereas its preliminary investigations have revealed the urgent necessity of further investigation of the activities of the tax-exempt foundations: Therefore be it

"Resolved, That the Association of American Physicians & Surgeons commend the Reece subcommittee for its work and petition the House of Representatives of the United States Congress to extend the life of this subcommittee with power and resources to complete its probe of the tax-exempt foundations."

TRANSFER OF NARCOTICS BUREAU—RESOLUTION OF AMERICAN PHARMACEUTICAL MANUFACTURERS' ASSOCIATION

Mr. WILEY. Mr. President, as my colleagues know, I have long been deeply interested in doing everything possible to combat and destroy the dreadful narcotics menace in our Nation.

I have cosponsored legislation to battle against this grim problem and will continue to do so until dope addiction is slashed to the irreducible minimum in our land.

But we must always exercise sound judgment in evaluating actions which are proposed to meet this problem, particularly because narcotics are an indispensable arm of medical science wholly aside from the fact that narcotics are unfortunately misused in illicit channels.

I was interested recently to receive from Dr. J. O'Neil Closs, executive vice president of the American Pharmaceutical Manufacturers' Association, a message rightly conveying the judgment of that association in opposition to the proposed transfer of the Narcotics Bureau from the Treasury Department to the Department of Justice.

The narcotics laws of our country are inextricably related to the administration of selected tax laws. The logical place of the Narcotics Bureau remains within the Treasury Department. Merely shuffling a Bureau which has been doing an outstanding job—shuffling it from one department to another is no answer to the narcotics challenge, as such. What is needed is better understanding of legitimate and illegitimate uses of narcotics, allocation of more agents for the Narcotics Bureau, more effective enforcement at State and local levels, tighter penalties and firmer rehabilitation of addicts.

I ask unanimous consent that the resolution be printed in the RECORD, and be

referred to the Senate Finance Committee.

There being no objection, the resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

AMERICAN PHARMACEUTICAL MANUFACTURERS' ASSOCIATION,
New York, N. Y., February 18, 1955.

Hon. ALEXANDER WILEY,
United States Senate, Senate Office Building, Washington, D. C.

DEAR SIR: The board of directors of the American Pharmaceutical Manufacturers' Association has given thoughtful consideration to the proposal for transfer of narcotic control from the Treasury Department to the Department of Justice, as provided by Senate Joint Resolution 19. Because such transfer appears to be against the public interest at this time, our board has passed the following resolution opposing it, and it urges that Senate Joint Resolution 19 be not adopted:

"Whereas governmental supervision of narcotic problems involves not only questions of criminal enforcement but also national and international social problems of addiction, and regulation of the affected drug and pharmaceutical industries; and

"Whereas the sound and effective execution of governmental narcotic control will be disturbed and impaired detrimentally to the public and to industry by its transfer to a different agency not presently organized to deal with the narcotic problem as a whole: Therefore be it

"Resolved, That the American Pharmaceutical Manufacturers' Association opposes the transfer of narcotic control from the Bureau of Narcotics of the Treasury Department to the Department of Justice."

Sincerely,

J. O'NEILL CLOSS,
Executive Vice President.

UNEMPLOYMENT IN CARPET INDUSTRY—MEMORIAL

Mr. LEHMAN. Mr. President, a fortnight ago I received from the chamber of commerce of Amsterdam, N. Y., a petition signed by over 16,000 citizens of Amsterdam protesting against any further cuts in tariff as applied to carpets and rugs.

Mr. President, there is a tragic condition of unemployment in Amsterdam. It is a truly distressed area. One of the largest carpet manufacturers in America has closed its plants in Amsterdam and is moving elsewhere. There are, however, other carpet mills in Amsterdam. It is one of the great carpet-manufacturing centers of this country. The workers in the carpet mills, their families, and all the citizens of Amsterdam are deeply concerned over the impact of possible tariff reductions on their industries. I am concerned, likewise, although I have always been in favor of the greatest possible expansion of trade consistent with our national interest.

Without committing myself on proposed legislation that will come before us on this subject, I think that these petitions are of sufficient importance—representing the viewpoint of a large number of people in my State—that note of them should be made in the CONGRESSIONAL RECORD.

I ask unanimous consent that one of these petitions be printed in the RECORD at this point. I shall transmit the remaining petitions to the Senate Finance Committee, which is considering this proposed legislation.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

We, the undersigned workers and residents of the city of Amsterdam, N. Y., and immediate vicinity, who are preponderantly dependent on our local manufacturers of machine-made rugs and carpets (Mohawk Carpet Mills, Inc., and Bigelow-Sanford Carpet Co., Inc.), do hereby respectfully petition United States Senators HERBERT H. LEHMAN and IRVING M. IVES, and Representative in Congress from the 32d Congressional District BERNARD W. KEARNEY, to exert every effort to prevent any Federal legislation which would further reduce tariff rates on machine-made rugs and carpets.

Foreign, cheap-wage machine-made carpets are coming into the United States at the rate of 2,800,000 square yards a year.

For every yard of carpet imported, 1 hour's work is lost to an American workman.

Foreign imports meant loss in 1954 of 2,800,000 man-hours of work, or an average of almost 3 weeks' work for each of the 30,000 United States carpet workers. Lost wages of American workers curtailed purchasing power which affects all segments of the community.

Since 1946 annual rate of growth of imports of machine-made carpets and rugs has averaged 26 percent per year.

Average wage for industrial workers in Belgium, 48 cents an hour; in Britain, 47 cents; in France, 46 cents; and in Japan, 19 cents.

It is against such wage levels that many American industries—including carpets—are being forced to compete.

The carpet industry firmly believes in, and makes a considerable contribution to, world trade. The industry is a vital part of our economy and contributes to world trade through $100 million a year in imports of raw materials, which is a very large proportion for a $400 million a year industry. All wools used in carpets are imported.

The city of Amsterdam, N. Y., is now classified as a critical labor area. The reduction of tariff rates on machine-made rugs and carpets will further increase unemployment, and such reduction will in all probability destroy our only industry in the city of Amsterdam, N. Y.

We petition that, in any trade-agreements act that may be passed, such legislation contain a provision excluding machine-made carpets and rugs from further tariff reduction.

(Signatures omitted).

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RUSSELL, from the Committee on Armed Services:

S. 804. A bill to amend section 201 (e) of the Career Compensation Act of 1949, as amended, to provide for advance payments of certain pay and allowances of members of the uniformed services, and for other purposes; without amendment (Rept. No. 45).

By Mr. STENNIS, from the Committee on Armed Services:

S. 802. A bill to amend the Universal Military Training and Service Act, as amended, to remove the requirement for a final physical examination for inductees who continue on active duty in another status in the Armed Forces; without amendment (Rept. No. 46).

By Mr. SALTONSTALL, from the Committee on Armed Services:

S. 829. A bill to authorize personnel of the Armed Forces to train for, attend, and participate in the second pan-American games, the seventh Olympic winter games, games of the XVI Olympiad, future pan-American games, and Olympic games, and certain other international amateur sports competitions, and for other purposes; with amendments (Rept. No. 44).

By Mr. ANDERSON, from the Committee on Agriculture and Forestry:

S. 72. A bill to provide that certain lands acquired by the United States shall be administered by the Secretary of Agriculture as national-forest lands; without amendment (Rept. No. 43).

EXPENDITURES BY COMMITTEE ON ARMED SERVICES—REPORT OF A COMMITTEE

Mr. RUSSELL, from the Committee on Armed Services, reported an original resolution (S. Res. 72) which was placed on the calendar, as follows:

Resolved, That in carrying out the duties imposed upon it by section 136 and authorized by section 134 (a) of the Legislative Reorganization Act of 1946, as amended, the Committee on Armed Services, or any duly authorized subcommittee thereof, is authorized during the period from April 1, 1955, ending January 31, 1956, to make such expenditures, and to employ upon a temporary basis such investigators, technical, clerical, and other assistants as it deems advisable.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $160,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

EXECUTIVE REPORT OF COMMITTEE AN ARMED SERVICES

Mr. SALTONSTALL. Mr. President, as in executive session, from the Committee on Armed Services, I report, favorably, the nomination of Chester R. Davis, of Illinois, to be Assistant Secretary of the Army, vice Charles C. Finucane, who has been appointed Under Secretary of the Army. I ask that the nomination be placed on the Executive Calendar.

The PRESIDENT pro tempore. The nomination will be placed on the Executive Calendar.

EXECUTIVE REPORT OF COMMITTEE ON FOREIGN RELATIONS

Mr. GEORGE, as in executive session, from the Committee on Foreign Relations, to which was referred Executive R, 83d Congress, 1st session, the International Telecommunication Convention, with annexes, and the final protocol to the Convention, signed at Buenos Aires on December 22, 1952, reported it favorably, with two understandings, and submitted a report (Ex. Rept. No. 5) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NEELY (by request):

S. 1289. A bill to establish a family court in and for the District of Columbia; to the Committee on the District of Columbia.

By Mr. CHAVEZ:

S. 1290. A bill to provide for the construction of certain Government buildings in the District of Columbia; to the Committee on Public Works.

By Mr. ROBERTSON:

S.1291. A bill for the relief of Ioannis Gerasimos Christoforatos (otherwise known as Ioannis Gerasimu Christoforatos or John Christoforatos or Jon Christoforatos); to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina (for himself and Mr. CARLSON):

S. 1292. A bill to readjust postal classification on educational and cultural materials; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. JOHNSTON of South Carolina when he introduced the above bill, which appear under a separate heading.)

By Mr. KEFAUVER:

S. 1293. A bill relative to the payment of salaries to recess appointees;

S. 1294. A bill for the relief of James William Turner;

S. 1295. A bill for the relief of Vera Ivanovich; and

S. 1296. A bill for the relief of Maria Anna Coone; to the Committee on the Judiciary.

By Mr. KEFAUVER (for himself and Mr. CHAVEZ):

S. 1297. A bill to amend title 18, United States Code, so as to regulate the transportation and shipment of fireworks; to the Committee on Interstate and Foreign Commerce.

By Mr. BUSH:

S. 1298. A bill for the relief of Pericles G. Callimanopoulos and his family; and

S. 1299. A bill for the relief of Mrs. Esteni Rodriguez Estopinan de Witlicki; to the Committee on the Judiciary.

S. 1300. A bill to declare a certain portion of the waterway at Greenwich, Conn. (in which is located the Greenwich Harbor), a nonnavigable stream; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. BUSH when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. DIRKSEN:

S. 1301. A bill to limit the acquisition and use by agencies of the Federal Government of equipment for reproducing documents, drawings, papers, and so forth, on sensitized materials; to the Committee on Government Operations.

By Mr. KILGORE:

S. 1302. A bill to amend section 490 of title 14, United States Code, relating to the settlement of claims of military and civilian personnel of the Coast Guard, and for other purposes;

S. 1303. A bill to amend section 4004, title 18, United States Code, relating to administering oaths and taking acknowledgments by officials of Federal penal and correctional institutions;

S. 1304. A bill to provide for the relief of certain Army and Air Force nurses, and for other purposes.

S. 1305. A bill to further amend the act of July 3, 1943 (ch. 189, 57 Stat. 372), relating to the settlement of claims for damage to or loss or destruction of property or personal injury or death caused by military personnel or certain civilian employees of the United States, by removing certain limitations on the payment of such claims and the time within which such claims may be filed; and

S. 1306. A bill for the relief of Robert Burns DeWitt; to the Committee on the Judiciary.

(See the remarks of Mr. KILGORE when he introduced the above bills, which appear under a separate heading.)

By Mr. SMITH of New Jersey (for himself, Mr. IVES, Mr. PURTELL, Mr. BENDER, and Mr. ALLOTT):

S. 1307. A bill to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes; and

S. 1308. A bill to amend the Longshoremen's and Harbor Workers' Compensation Act to authorize more effective use of the special fund provided for in section 44; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. SMITH of New Jersey when he introduced the above bills, which appear under a separate heading.)

By Mr. SMITH of New Jersey (for himself and Mr. SALTONSTALL):

S. 1309. A bill to amend the Federal Employees' Compensation Act, approved September 7, 1916, as amended, by providing for reimbursement of expenditures from the Employees' Compensation Fund by Federal employing agencies, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. SMITH of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. GEORGE (by request):

S. 1310. A bill to amend the International Claims Settlement Act of 1949, as amended, and for other purposes; to the Committee on Foreign Relations.

By Mr. ERVIN (for himself, Mr. HOLLAND, and Mr. MARTIN of Pennsylvania):

S. 1311. A bill to authorize the incorporation of Army and Navy Legion of Valor of United States of America; to the Committee on the Judiciary.

By Mr. MARTIN of Iowa:

S. 1312. A bill for the relief of Mrs. Santina Reichardt; to the Committee on the Judiciary.

By Mr. LANGER:

S. 1313. A bill to increase the insurance protection of depositors in federally insured banks from $10,000 to $20,000; to the Committee on Banking and Currency.

(See the remarks of Mr. LANGER when he introduced the above bill, which appear under a separate heading.)

By Mr. CAPEHART:

S. 1314. A bill for the relief of Reuben Nichols and Andrew Nichols; to the Committee on the Judiciary.

By Mr. HUMPHREY (for himself, Mr. DOUGLAS, Mr. KENNEDY, and Mr. MCNAMARA):

S. 1315. A bill to amend the Immigration and Nationality Act; to the Committee on the Judiciary.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. ELLENDER (by request):

S. 1316. A bill to amend subsection 216 (c), part II, of the Interstate Commerce Act to require the establishment by motor carriers of reasonable through routes and joint rates, charges, and classifications; to the Committee on Interstate and Foreign Commerce.

By Mr. KNOWLAND:

S. 1317. A bill for the relief of Yao Chung Hsuan; to the Committee on the Judiciary.

By Mr. MONRONEY (for himself and Mr. KERR):

S. 1318. A bill to authorize construction of a highway crossing over Lake Texoma, Red River, Tex. and Okla.; to the Committee on Public Works.

By Mr. ALLOTT (for himself, Mr. ANDERSON, Mr. BARRETT, Mr. CARLSON, Mr. CHAVEZ, Mr. KERR, Mr. MILLIKIN, Mr. MONRONEY, Mr. O'MAHONEY, and Mr. SCHOEPPEL):

S. 1319. A bill to make available unexpended balances of funds heretofore appropriated for the agricultural-conservation program for wind-erosion control measures, and for other purposes; to the Committee on Appropriations.

(See the remarks of Mr. ALLOTT when he introduced the above bill, which appear under a separate heading.)

By Mr. GREEN:

S. 1320. A bill for the relief of Peter N. Vandoras; to the Committee on the Judiciary.

S. 1321. A bill creating a Federal commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents, and a music, drama, fine arts, and mass communications center; to the Committee on the District of Columbia.

By Mr. HILL:

S. 1322. A bill for the relief of Maria Ioannou Karvelis and her three minor daughters, Martha Karvelis, Boeleta Karvelis, and Euterpi Karvelis; to the Committee on the Judiciary.

By Mr. HILL (for himself, Mr. THYE, Mr. DOUGLAS, Mr. DUFF, Mr. KENNEDY, Mr. MURRAY, Mr. NEELY, Mr. LEHMAN, Mr. MCNAMARA, Mr. HUMPHREY, Mr. KEFAUVER, Mr. LANGER, and Mr. JACKSON):

S. 1323. A bill to authorize a 5-year program of grants for construction of medical educational and research facilities; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HILL when he introduced the above bill, which appear under a separate heading.)

By Mr. PURTELL:

S.1324. A bill for the relief of Salvatore di Morello; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. J. Res. 53. Joint resolution proposing an amendment to the Constitution of the United States providing for the direct popular election of President and Vice President; to the Committee on the Judiciary.

(See the remarks of Mr. HUMPHREY when he introduced the above joint resolution, which appear under a separate heading.)

READJUSTMENT OF THE POSTAL CLASSIFICATION OF EDUCATIONAL AND CULTURAL MATERIALS

Mr. JOHNSTON of South Carolina. Mr. President, on behalf of myself, and the Senator from Kansas [Mr. CARLSON], I introduce, for appropriate reference, a bill to readjust the postal classification of certain educational and cultural materials. I ask unanimous consent that the bill, together with a statement prepared by me, explaining the purposes of the bill, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and statement will be printed in the RECORD.

The bill (S. 1292) to readjust postal classification on educational and cultural materials, introduced by Mr. JOHNSTON of South Carolina (for himself and Mr. CARLSON), was received, read twice by its title, referred to the Committee on Post Office and Civil Service, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That sections 204 (d) and (e) of the Postal Rate Revision and Federal Employees Salary Act of 1948 (39 U. S. C., sec. 292a (d) and (e)), are amended to read as follows:

"SEC. 204. (d) The following materials when in parcels not exceeding 70 pounds in weight may be sent at the postage rate of 8 cents for the first pound or fraction thereof and 4 cents for each additional pound or fraction thereof, and this rate shall continue until otherwise provided by the Congress: (1) Books permanently bound for preservation consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for students' notations and containing no advertising matter other than incidental announcements

of books; (2) 16-millimeter films and 16-millimeter film catalogs except when sent to commercial theaters; (3) printed music whether in bound form or in sheet form; (4) printed objective test materials and accessories thereto used by or in behalf of educational institutions in the testing of ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark; (5) manuscripts for books, periodical articles, and music.

"SEC. 204. (e) (1) The following materials when in parcels not exceeding 70 pounds in weight when loaned or exchanged between (A) schools, colleges, universities, or public libraries and (B) religious, educational, scientific, philanthropic, agricultural, labor, veterans', or fraternal organizations or associations not organized for profit and none of the net income of which inures to the benefit of any private stockholder or individual, or between such organizations and their members or readers or borrowers, shall be charged with postage at the rate of 4 cents for the first pound or fraction thereof and 1 cent for each additional pound or fraction thereof, and this rate shall continue until otherwise provided by the Congress; (a) Books consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for students' notations and containing no advertising matter other than incidental announcements of books; (b) printed music whether in bound form or in sheet form; (c) bound volumes of academic theses in typewritten or other duplicated form and bound volumes of periodicals; and (d) other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.

"(2) The rate provided in paragraph (1) for books may apply to 16-millimeter films, filmstrips, projected transparencies and slides, microfilms, sound recordings, and catalogs of such materials when sent in parcels not exceeding 70 pounds in weight to or from (A) schools, colleges, universities, or public libraries, and (B) religious, educational, scientific, philanthropic, agricultural, labor, veterans', or fraternal organizations or associations, not organized for profit and none of the net income of which inures to the benefit of any private stockholder or individual."

SEC. 2. It is the sense of the Congress that every reasonable encouragement should be given as a matter of Government policy to the export through private commercial and eleemosynary channels of American publications and literary, artistic, and scholarly works and therefore the United States Government should take advantage of the optional provision of the Universal Postal Convention of 1952 to reduce by 50 percent the regular printed matter rate in the international mails for newspapers, periodicals, books, pamphlets, music, and maps as other leading countries of the world have done.

The statement presented by Mr. JOHNSTON of South Carolina is as follows:

STATEMENT BY SENATOR JOHNSTON OF SOUTH CAROLINA

This bill is designed to correct the principal anomalies and inequalities in the classifications governing postal rates applicable to educational and cultural materials. It has long been national policy to encourage the dissemination of such materials through the postal system; but in the many years since the matter of mail classifications has been considered as such, a number of relatively small but important types of material have been overlooked.

This is a particularly appropriate time to make these adjustments. Our educational institutions and libraries are struggling with the problems of maintaining educational and cultural standards for a vastly expanded school and college population. The continued growth of our intellectual, cultural, and artistic life is important not only for its own intrinsic value here at home but as a factor in international relations during this era of competition for the minds and spirits of men throughout the world.

I. SUMMARY OF PROVISIONS

Section 1. Domestic rates: The first provision of this section adds to the materials eligible for the general rate on books and educational films the following additional items: (1) scholarly bibliography; (2) sheet music; (3) educational tests; and (4) authors' manuscripts. The second provision of this section removes the geographical limit on the library rate on books and educational films and makes the following additional items eligible for this rate: (1) scholarly bibliography; (2) sheet music; (3) bound academic theses and bound periodicals; and (4) other library materials including manuscripts.

Section 2. International rates: This section is an expression of congressional opinion that the United States should encourage the international exchange of American educational, cultural, and artistic materials by adopting the optional reduction in international postal rates for books, newspapers, periodicals, music, and maps authorized by the Universal Postal Convention, as many other leading countries of the world have done.

II. DETAILS OF THE BILL

Application of general book rate to additional materials

There has existed since 1938 a separate rate for books which is not zoned for distance. This rate is patterned on the nationwide rate for reading matter in newspapers and magazines (second-class mail) which dates from 1879. The objective in both cases has been to facilitate the dissemination of educational and cultural materials and not to penalize the citizens, the libraries and the educational institutions more remote from publishing centers with higher rates merely because of the accident of geography. In 1953 the book rate was also extended to educational films by Public Law 141, 83d Congress.

This general rate for books and educational films now stands at 8 cents for the first pound and 4 cents for each succeeding pound, and this bill suggests no change in this rate, which is still twice as high as the 1.95 cents per pound rate now applicable to the reading matter in general second-class publications. The bill merely permits this rate to apply to the following four additional small categories of educational and cultural materials:

Scholarly bibliography: By scholarly bibliography is meant lists of books and articles, frequently annotated, in a particular field sponsored or published by a professional society or other disinterested group for the guidance of scholars, students, librarians, professional practitioners and others interested in the field. At present such works are not admitted to the book rate if the name of the publisher and the price are listed, the Post Office Department having ruled that this makes the bibliography an advertising catalog. Thus works such as Winchell's Guide to Reference Books of the American Library Association, which is a critical guide for librarians on the encyclopedias and reference works of most use for particular purposes, is ruled to be a catalog and therefore not eligible for the book rate. These bibliographic guides are essential tools of the librarian, scholar, educator, and researcher, and are fully as deserving of favorable treatment as the periodicals and books to which they refer. Catalogs of individual publishers are not covered.

Sheet music: Printed music in sheet form is now severely penalized as compared with music in bound form in the domestic mails, and music in any form in the international mails. Printed music in bound form, such as songbooks and hymnals, qualifies for the book rate within the United States and is not zoned for distance; but the same music in sheet form is classed as parcel post if over 8 ounces, with considerably higher rates and rates increasing with distance. In the international mails, on the other hand, music qualifies for the favorable printed matter rate along with books, magazines, newspapers, and maps. By far the greatest volume of sheet music—some 84 percent—which is sold in the United States today is standard music, that is, religious, classical, or semiclassical. Only 16 percent of all music sold at retail consists of current popular songs. The bulk of this standard music is sold to public and private schools and colleges, to churches, and to private teachers of music: 88 percent of the music sold by dealers and 94 percent of the music sold directly to the ultimate consumer by publishers goes to these classes of consumers. The customary practice in the trade is that the consumer pays the postage. Almost half of the music sold by dealers is forwarded by mail to their customers and practically all of the music sold directly to the consumers goes through the postal system. The bill provides that sheet music shall qualify for the general book rate as bound music now does.

Educational tests: With the progress of education have come certain valuable new educational materials that have taken an important place alongside books: namely, films, pupil workbooks, and objective tests. The place of films and workbooks in the postal rate structure has been recognized by the Congress: these instructional materials may now be shipped to educational institutions under the same postal classification as books. This bill accords printed tests used by or in behalf of educational institutions the same treatment.

Use of tests is now one of the indispensable procedures in the improvement of teaching and guidance and in the discovery of talent. A significant aspect of a student's education today is measurement and appraisal of his status, development, and aptitudes by means of such tests. This procedure is to be encouraged, for tests contribute to the school's understanding of the student and his own understanding of himself, and thus to educational and vocational guidance to enable him to make the full use of his potentialities.

The bill provides that these test materials that are employed by or in behalf of educational institutions to determine abilities, aptitudes, achievement, interests, and other mental or personal qualities of their pupils be classified for shipment at the general book rate. This includes both (1) new test booklets and answer sheets and (2) those that have been marked by pupils.

1. The shipment of new or unmarked test material from the publisher or distributor to educational institutions: If the major premise is accepted that postal rates should apply equally to all forms of educational communication, then it seems clear that tests should be accorded the book rate. Tests and their associated materials (e. g. answer sheets, scoring keys, directions) seem to have been inadvertently excluded from the current book classification in part because of the arbitrary definition that a book must contain 24 pages. Transportation costs are borne by the educational institutions and this now imposes a special hardship under zoned parcel post rates for schools remote from the publishing centers for these materials.

2. The shipment to and from central scoring and research agencies for test materials with pupils' answers, scores, or identifying information recorded thereon: Many schools and colleges have come to rely heavily on cooperative educational testing programs that may be statewide, regional, or national in scope. The scoring or marking of the tests and the statistical analysis of test scores is frequently done by a central agency, usually on a nonprofit basis, with the results reported to the participating schools. Thus, the teachers and guidance personnel in the schools are relieved of the heavy clerical burden of marking tests, and the work is done faster and more accurately than it could be done at the school.

According to an interpretation of the present postal statutes by the Solicitor of the Post Office Department, test booklets or answer sheets on which pupils have indicated the answers they believe to be correct are technically classified as letters and must be transported by first-class mail. Shipment by parcel post or by means of private transportation agencies, such as Railway Express, would thus be in violation of the law because of the Federal Government's monopoly on first-class mail.

The operation of the present postal law seriously retards the development of cooperative testing programs involving central scoring and statistical service. Hence, it has a restrictive effect upon the obtaining and use of objective data in the improvement of the instruction and guidance of individual boys and girls. Funds available for testing are small in numerous schools and, under present financial conditions, it seems unlikely that they can be increased. The cost of transportation of marked test material to a test service center may now, in many situations, actually be greater than the service costs. Many schools must either refrain from participation in testing programs or require their teachers to use time in scoring tests that ought to be devoted to more important professional activities. This kind of use of teacher time for clerical purposes is particularly unfortunate at present when the teacher shortage is very acute.

High postage costs deter schools from obtaining for their pupils the full benefits of objective measurement, and especially is this true in districts that have low financial resources. It is the schools themselves that must pay the transportation costs; and the schools particularly in need of objective test data oftentimes are the ones least able to pay those costs. The provision of the bill to permit the shipment of test materials at the book postal rate will benefit children and youth at all educational levels throughout the United States.

Authors' manuscripts: Authors' manuscripts for books, periodical articles and music are now required to be sent by first-class mail unless they accompany corrected printers' proof sheets, in which case they may be sent as third- or fourth-class. This is a burden on authors and composers, who pay postage charges both ways in submitting manuscripts to publishers, and especially on authors of books and long serious works of music. Book manuscripts frequently weigh from 4 to 10 pounds and an average figure would be about 6 pounds, or $2.88 in first class postage. Thus the submission of a manuscript of 6 pounds to 10 publishers before acceptance would cost $54.72. Express is often somewhat cheaper but even express involves high minimum charges. In the 19th century our domestic postal rates gave more consideration to authorship—manuscripts were then not classified as first-class mail. Nor at the present time is the burden of letter rates imposed in the international mails governed by the Universal Postal Convention, under which manuscripts may be sent at the favorable commercial paper rate. An American author can now submit a book manuscript to a British publisher in London for about one-third the postage charges required to send the same manuscript to a publisher in the United States. It is one of the anomalies in our domestic postal classifications that the original form of literature and music and the original creator are penalized as compared with the more favorable rates granted on the manuscript in proof form or in final printed form, or even in its original form in the international mails.

Application of the library-book rate to additional materials

The special library rate dating from 1928 is 4 cents for the first pound and 1 cent for each succeeding pound on books exchanged in interlibrary loans, or in loans by libraries to their readers, within the first three postal zones or within the limits of any one State. In 1953 the Congress extended this rate to educational films and other audio-visual materials in Public Law 141, 83d Congress.

This bill extends the library rate to several additional small categories of library materials and removes the geographical limitations and the present requirement of securing permits. No change is proposed in the level of the rate itself.

Scholarly bibliography and sheet music: The bill adds scholarly bibliography and sheet music to the materials eligible for the library-book rate, consistent with their coverage by the general book rate in the preceding section.

Academic theses and bound volumes of periodicals: Institutions of higher learning at one time frequently required that academic theses submitted for higher degrees be published in printed form, but with the growth in higher education this requirement became impractical and most such theses are now typewritten, but in bound form. There is a considerable volume of interlibrary loans of academic theses as a service to researchers, to scholars, and to students preparing other theses. Despite the fact that this traffic is almost entirely between libraries and especially college and university libraries, these theses are not eligible for the library book rate, and are required to carry first-class postage because they are in typewritten form. This is a considerable burden on scholars and students who must reimburse the libraries for the postage required in securing the loan of these materials. It is entirely consistent with the philosophy of the library book rate, and would be a considerable benefit to higher education and scholarship, to include theses in the general rate applicable to library materials.

Bound volumes of periodicals, when exchanged between libraries or between libraries and their borrowers, are not eligible for the library book rate although these materials serve exactly the same purpose as library service on books. Library loan of bound periodicals now takes place in relatively small volume because of the development of photostating arrangements and microfilming but the application of the library book rate would contribute substantially to library service and to scholarly research.

Other library materials: In addition to books, theses, and periodicals, modern libraries make available to their readers a considerable variety of a number of other materials. One of the most important of these, educational films and other audiovisual materials, was assimilated to the library book rate in 1953. Miscellaneous other library materials should be added in order to carry out the broad purposes of this special rate for library interchange.

Removal of geographical limits and permit requirement: When the library-book rate was established in 1928, library service by mail was confined largely to readers in the local area or to interlibrary loans between institutions in the same general locality. In the years since that time regional library services for scholarly and research materials have been established; and a nationwide network now exists for the interchange of materials needed for research. It seems appropriate, therefore, to recognize these changed conditions. There seems no reason why the library rate should be subject to a narrow geographical limitation now that the general book rate has been on a nationwide basis for some 18 years. Much the same considerations apply to the requirement of permits. No permit is necessary under the terms of Public Law 141, which extended the library-book rate to audiovisual materials in 1953. The permit system hardly seems necessary for administrative purposes since the institutions eligible for this rate are clearly identifiable by their names on the addresses or return addresses.

Educational and cultural materials in the international mails

The Universal Postal Convention, which was last revised at Brussels in 1952, permits national postal authorities to reduce the rates charged for books, magazines, newspapers, music, and maps to 50 percent of the required rates for other printed matter in order to encourage the international exchange of educational and cultural materials. This optional provision has now been adopted in its entirety by the following countries: Austria, Western Germany, Greece, Italy, Luxembourg, the Netherlands, Portugal, Spain, Switzerland, Turkey, the United Kingdom, and Venezuela, plus several other countries which restrict the 50-percent reduction to books alone or to other more limited classes of materials. The United States has not yet taken similar action and the result has been to place American materials of this type at an economic disadvantage in competing with the publications of other countries. For example, a book weighing 2 pounds may be sent from London or Frankfort to Pakistan, Japan, or the Philippines for about 10 cents in postage, whereas to send a book of the same weight from New York requires 25 cents in postage, or 2½ times as much. American-published materials, although much in demand, are already under a severe handicap of foreign-exchange restrictions limiting dollar imports in many countries as compared with similar materials from soft-currency countries; and this differential on transportation charges, which are paid by the purchaser, further adds to the competitive disadvantage of American materials. In view of the governmental efforts being made through the United States overseas information program and the technical-assistance program to encourage the use of American educational, cultural, technical, and scientific materials abroad in the national interest, it would be sound public policy to eliminate the existing differential in postal rates which handicaps distribution through private commercial and eleemosynary channels. The cost to the United States in reduced postal revenue would be small as compared with the cost of achieving similar results by direct governmental expenditures.

III. ORGANIZATIONS SUPPORTING THE BILL

The following is a partial list of organizations endorsing and supporting the bill or one or more of its several provisions: American Academy of Teachers of Singing; American Educational Research Association; American Guild of Organists; American Library Association; American String Teachers Association; American Textbook Publishers Institute; Association of College and Reference Libraries; Association of Research Libraries; Authors' League; Church and Sunday School Music Publishers Association; College Entrance Examination Board; Committee on Diagnostic Reading Tests; Committee on Reading Development, American Book Publishers Council; Educational Records Bureau; League of Composers; Music Educators National Conference; Music Library Association; Music Publishers Asso-

ciation; Music Teachers National Association; National Association of Educational Broadcasters; National Association of Teachers of Singing; National Audio-Visual Association, Postal Committee; National Catholic Music Educators Association; National Council on Measurements Used in Education; National Federation of Music Clubs; National Guild of Piano Teachers; Sigma Alpha Iota; State Testing Leaders Conference; the American Accordionists Association.

Mr. CARLSON subsequently said: I am glad to join in the sponsorship of the bill—S. 1292—dealing with postal classifications on certain educational and cultural materials, especially as they affect our educational institutions and public libraries. As a result of a special study of the educational use of the mails which was made last year for the Committee on Post Office and Civil Service, a number of situations have come to light which should be adjusted. Congress has always recognized the vital importance of the postal system as an instrument of education in the broadest sense; and the bill will serve to bring certain details of postal classification into line with established congressional policy.

DESIGNATION OF WATERWAY AT GREENWICH, CONN., AS A NONNAVIGABLE STREAM

Mr. BUSH. Mr. President, I introduce, for appropriate reference, a bill to declare a certain portion of the waterway at Greenwich, Conn., a nonnavigable stream.

This proposed legislation is needed because the layout of the Greenwich-Killingly Expressway crosses over a portion of the marshland and a portion of the dredged basin, both of which are within the officially established limits of Greenwich Harbor. I have introduced the bill at the request of the Connecticut State Highway Department.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1300) to declare a certain portion of the waterway at Greenwich, Conn. (in which is located the Greenwich Harbor), a nonnavigable stream, introduced by Mr. BUSH, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

SUNDRY BILLS FOR CONSIDERATION OF JUDICIARY COMMITTEE

Mr. KILGORE. Mr. President, I introduce, for appropriate reference, five bills which have been submitted by the Department of the Treasury, the Department of the Army, the Department of the Air Force, and by the Bureau of Prisons, Department of Justice.

I ask unanimous consent that there be printed in the RECORD to accompany each of these bills the letters forwarded with these proposals by the Department of the Treasury, the Department of the Army, the Department of the Air Force, and by the Bureau of Prisons, Department of Justice, recommending the enactment of such legislation.

The PRESIDENT pro tempore. The bills will be received and appropriately referred; and, without objection, the letters will be printed in the RECORD.

The bills, introduced by Mr. KILGORE, were received, read twice by their titles, and referred to the Committee on the Judiciary, as follows:

S. 1302. A bill to amend section 490 of title 14, United States Code, relating to the settlement of claims of military and civilian personnel of the Coast Guard, and for other purposes.

(The letter accompanying Senate bill 1302 is as follows:)

TREASURY DEPARTMENT,
Washington, January 10, 1955.

The PRESIDENT OF THE SENATE.

SIR: There is transmitted herewith a draft of a proposed bill "To amend section 490 of title 14, United States Code, relating to the settlement of claims of military and civilian personnel of the Coast Guard, and for other purposes."

The purpose of this proposed legislation is to give the Secretary of the Treasury the same authority to settle claims of Coast Guard military and civilian personnel as is now held by the Secretaries of the Military Departments with respect to similar claims in their departments.

Section 490 of title 14 was based on the provisions of the Military Personnel Claims Act of 1945 (59 Stat. 225), which had been applicable to the Coast Guard prior to the enactment of title 14 into positive law. Subsequent to the enactment of title 14, the Military Personnel Claims Act of 1945 was amended by act of Congress approved July 3, 1952 (66 Stat. 321).

By adding a new subsection to section 490, the proposed legislation would authorize the Secretary of the Treasury to settle claims made by survivors of personnel whether or not the incident giving rise to the claim occurred simultaneously with or subsequent to the death of such personnel. This authority is now held by the Secretaries of the Military Departments under the act of July 3, 1952. Moreover, the proposed legislation would change the time allowed for filing claims from 1 year to 2 years, which is the time limit now applicable to the other services. Finally, the proposal would suspend for 1 year all time limitations on filing of such claims to allow for the consideration of new claims arising under section 490, as amended, and for the reconsideration of claims previously disapproved as not having been filed within the legal time. This provision is similar to that included in the similar amendatory legislation of the armed services.

It would be appreciated if you would lay the proposed bill before the Senate. A similar proposed bill has been transmitted to the Speaker of the House of Representatives.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

COMPARATIVE TYPE SHOWING CHANGES IN EXISTING LAW MADE BY PROPOSED BILL

Changes in existing law made by the proposed bill are shown as follows (existing law proposed to be omitted is enclosed in brackets; new matters in italics):

"SECTION 490 OF TITLE 14 OF THE UNITED STATES CODE

"(a) The Secretary, and such other officer as he designates for such purposes and under regulations prescribed by him, may consider, ascertain, adjust, determine, settle, and pay any claim against the United States, including claims not heretofore satisfied arising on or after December 7, 1939, of military personnel and civilian employees of the Coast Guard, when such claim is substantiated, and the property determined to be reasonable, useful, necessary, or proper under the attendant circumstances, in such manner as the Secretary may by regulations prescribe, for damage to or loss, destruction, capture, or abandonment of personal property occurring incident to their service, or to replace such personal property in kind, if the damage to or loss, destruction, capture, or abandonment of property shall not have been caused in whole or in part by any negligence or wrongful act on the part of the claimant, his agent, or employee, and shall not have occurred at quarters occupied by the claimant within the continental United States, excluding Alaska, which are not assigned to him or otherwise provided in kind by the Government.

"*(b) In the event of the death of any person among the military personnel or civilian employees enumerated in subsection (a), the Secretary is hereby authorized to consider, ascertain, adjust, determine, settle and pay any claim, otherwise cognizable under this section, presented by the survivor of such person for damage to or loss, destruction, capture, or abandonment of the personal property of such person, regardless of whether such damage, loss, destruction, capture, or abandonment occurred concurrently with or subsequent to such death. For the purposes of this section, the term 'survivor' means surviving spouse, child or children, parent or parents, or brothers or sisters or both, of the decedent, and claims by survivors shall be settled and paid in that order of precedence.*

"[b] (*c*) No claim shall be settled under this section unless presented in writing within [one year] *two years* after the accident or incident out of which such claim arises shall have occurred; if such accident or incident occurs in time of war [.] *or in time of armed conflict in which the Armed Forces of the United States are engaged,* or if war *or such armed conflict* intervenes within [one year] *two years* after its occurrence, any claim may, on good cause shown, be presented within [one year] *two years* after [termination of the war.] *such good cause ceases to exist, but not later than two years after peace is established or such armed conflict terminates. The dates of commencement and termination of an armed conflict for the purpose of this subsection shall be as established by concurrent resolution of the Congress or by determination of the President.*

"[c] (*d*) Any such settlement made by the Secretary, or his designee, under the authority of this section and such regulations as he may prescribe hereunder, shall be final and conclusive for all purposes, notwithstanding any other provision of law to the contrary.

"[d] (*e*) Such appropriations as may be required for the settlement of claims under the provisions of this section are authorized. Coast Guard appropriations shall be available for the settlement of claims by the Secretary or his designee under the provisions of this section."

S. 1303. A bill to amend section 4004, title 18, United States Code, relating to administering oaths and taking acknowledgments by officials of Federal penal and correctional institutions.

(The letter accompanying Senate bill 1303 is as follows:)

UNITED STATES DEPARTMENT OF JUSTICE,
Washington, February 14, 1955.

Hon. HARLEY M. KILGORE,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: I am enclosing draft of a bill together with a memorandum of explanation, which would authorize the Attorney General to designate additional officers and employees of our Federal penal

and correctional institutions, as the need may be, who would have authority to administer oaths and take acknowledgments of officers, employees, and inmates without charge. If you feel that this proposed amendment has merit, I would appreciate it very much if you would sponsor it in the Senate.

I have sent another draft of the bill and the explanatory memorandum to Congressman CELLER for introduction in the House, if he feels that the proposed amendment has merit.

While this proposed bill has not been made a part of the formal departmental-legislative program, I am sure that the Department will be glad to support it.

Yours very truly,

JAMES V. BENNETT,
Director.

S. 1304. A bill to provide for the relief of certain Army and Air Force nurses, and for other purposes.

(The letter accompanying Senate bill 1304 is as follows:)

DEPARTMENT OF THE AIR FORCE,
Washington, January 3, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation, to provide for the relief of certain Army and Air Force nurses, and for other purposes.

This proposal is part of the Department of Defense Legislative Program for 1955 and the Bureau of the Budget has advised that there is no objection to the presentation of this proposal for the consideration of the Congress. The Department of the Air Force has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

Under the provisions of section 208b of the Army-Navy Nurses Act of 1947 (Public Law 36, 80th Cong.) as interpreted by the Comptroller General of the United States (pp. 242–244, vol. 28, Decisions of the Comptroller General of the United States), Navy nurses are permitted to count civilian service as nurses with the United States Public Health Service as creditable service for the computation of longevity pay. However, there is no provision in the above-cited law which permits Army and Air Force nurses to count such service as that noted above as creditable service for the computation of longevity pay. This inequity was corrected in 1949 upon the enactment of the Career Compensation Act of 1949 (Public Law 351, 81st Cong.). It is deemed a matter of equity to provide legislation which would validate payments of longevity pay made to Army and Air Force nurses on the basis of civilian service as nurses with the United States Public Health Service from the effective date of enactment of the Army-Navy Nurses Act of 1947 to the day prior to the effective date of the Career Compensation Act of 1949. This proposal would allow credit in the accounts of disbursing officers for such payments and would authorize repayment of any amounts which have been collected by the United States in settlement of claims arising from such payments.

LEGISLATIVE REFERENCES

This proposal was submitted to the 83d Congress by the Department of the Army on June 24, 1954, as a part of the Department of Defense legislation program for 1954. It was introduced as H. R. 9740 and S. 3806. H. R. 9740 was reported to the House on July 20, 1954, Report No. 2300, and passed the House on August 3, 1954.

COST AND BUDGET DATA

Any additional cost resulting from the enactment of this proposal would be small and will be absorbed in existing appropriations.

Sincerely yours,

HAROLD E. TALBOTT.

S. 1305. A bill to further amend the act of July 3, 1943 (ch. 189, 57 Stat. 372), relating to the settlement of claims for damage to or loss or destruction of property or personal injury or death caused by military personnel or certain civilian employees of the United States, by removing certain limitations on the payment of such claims and the time within which such claims may be filed.

(The letter accompanying Senate bill 1305 is as follows:)

DEPARTMENT OF THE AIR FORCE,
Washington, January 3, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation, "To further amend the act of July 3, 1943 (ch. 189, 57 Stat. 372), relating to the settlement of claims for damage to or loss or destruction of property or personal injury or death caused by military personnel or certain civilian employees of the United States, by removing certain limitations on the payment of such claims and the time within which such claims may be filed."

This proposal is part of the Department of Defense legislative program for 1955 and the Bureau of the Budget has advised that there would be no objection to the presentation of this proposal for the consideration of the Congress. The Department of the Air Force has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

Section 1 of the act of July 3, 1943, as amended (31 U. S. C. 223b) authorizes the settlement of claims based on loss of or damage to property or personal injury or death resulting from noncombat activities of the Armed Forces. Ordinarily, there is a 1-year statute of limitations on these claims. However, if the accident or incident on which the claim is based occurs during or within 1 year before a war, the claim may, for good cause shown, be presented within 1 year after peace is established. Section 2 (c) of Public Law 450 of the 82d Congress amended the basic statute to provide that claims arising after June 23, 1950, and before the termination of the emergency proclaimed by the President on December 16, 1950, may be presented within 1 year after the termination of that national emergency or April 1, 1953, whichever is earlier. By Public Law 12, 83d Congress, the termination date was changed from April 1, 1953, to July 1, 1953, and, by Public Law 96, was changed to August 1, 1953.

This proposal would amend the basic law to provide a 2-year statute of limitations for filing claims thereunder instead of the 1 year now provided. This change would be consistent with a similar change made in the Military Personnel Claims Act by Public Law 439, 82d Congress, approved July 3, 1952, and is considered advisable in the interest of creating uniformity with respect to the statute of limitations in these claims laws.

The basic law allows an extension of the statute of limitations only if there is a war. The conflict in Korea did not constitute a war within the technical sense used in the statute. This statute is used to settle claims such as those which occur to property during maneuvers or on training grounds which may be closed to the owner until after the time for presentation of the claim has expired. It also allows settlement of claims for losses that result from parcels sent through the mails. The addressee of the parcel may suffer a loss which he does not know about until the statute of limitations has run. Even though an armed conflict prevents claims of this nature from being presented within the period ordinarily applicable, no extension of the statute of limitations is authorized under existing law. This proposed legislation would also eliminate this inequity by extending the statute of limitations upon the occurrence of armed conflict.

Another inequity under the act of July 3, 1943, arises because, in the case of personal injury or death, the amount is limited to "reasonable medical, hospital, and burial expenses, actually incurred, * * *." No recovery is permitted for the loss of earnings, diminished earning capacity, permanent injury, pain and suffering, and death benefits. This proposal would allow settlement under the act of claims based on those reasons; however, the amount of payment would continue to be limited to $1,000. The amendment would apply to claims accruing after the date of its enactment. The proposed amendment would eliminate many costly lawsuits, reduce the number of private relief bills, and expedite the settlement of claims.

LEGISLATIVE REFERENCES

Two proposals containing amendments to the act of July 3, 1943, were submitted to the Congress as a part of the Department of Defense legislative program for 1953. One was introduced as H. R. 2977 and the other was introduced as H. R. 5108. Subsequently, H. R. 5108 was incorporated into H. R. 2977 and was passed by the House of Representatives. No further action was taken on that proposal. This proposal is identical with H. R. 2977, as it passed the House, except for a change in the title of the bill.

COST AND BUDGET DATA

It is estimated that the enactment of this proposal would result in an increase in cost to the Army of $35,000 and to the Air Force of $100,000 for fiscal year 1956; however, no worthwhile estimate of the increase in cost to the Navy or the Marine Corps is possible.

Sincerely yours,

HAROLD E. TALBOTT.

S. 1306. A bill for the relief of Robert Burns DeWitt.

(The letter accompanying Senate bill 1306 is as follows:)

DEPARTMENT OF THE ARMY,
Washington, D. C., January 10, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation for the relief of Robert Burns DeWitt. This proposed legislation is submitted by the Department of the Army in accordance with the procedures prescribed by the Secretary of Defense.

The purpose of this proposed legislation is to provide for the payment of a claim by Mr. DeWitt, which cannot be settled administratively by the Department of the Army, but which has been determined by the Department to be meritorious and worthy of payment.

During World War I, Mr. DeWitt was county auditor of Limestone County, Tex. He was approached at Groesbeck, Tex., by one Maj. Chester H. Machin, representing the United States Army, and asked to sponsor the raising of a company of recruits for war service. Mr. DeWitt patriotically agreed after discussing the matter with Judge J. E. Bradley and Judge C. S. Bradley, both of Groesbeck, who, in turn, agreed to advance him any funds necessary. Under the terms of the informal agreement made with Major Machin, Mr. DeWitt was to bear all expenses, including transportation from the place of recruitment to Groesbeck, meals and shelter for the recruits, until a minimum of 150 men had been accepted by the Army. At that time the group was to be sent to San

Antonio, Tex., for training, and, upon acceptance of the group into the service of the United States, Mr. DeWitt was to be reimbursed for the expenses borne by him during the period of recruitment. After 156 men were so recruited, there was a delay of some 30 days before an Army representative arrived in Groesbeck, where the recruits had been collected, to inspect and accept them.

It was after a 5-month period of recruitment that these men were finally accepted into the Army and sent to San Antonio for training, where Mr. DeWitt entered the officers' training camp. During such period Mr. DeWitt had borne their expenses in accordance with his agreement with Major Machin. To secure funds for this purpose, he personally borrowed substantial sums of money from Judge J. E. Bradley and Judge C. S. Bradley. Although a number of unrecorded expenses appear to have been incurred, those known at the present time consist of the following:

Rent of building used as headquarters and sleeping quarters for 5 months at $75 monthly	$375
Hire of labor for laundry for 5 months at $30 monthly	150
Installation and use of telephone for 5 months (estimated)	125
Transportation of recruits from various towns (place of enlistment) to Groesbeck (estimated)	150
Meals for soldiers from time of enlistment until departure for San Antonio	3,300
Total	4,100

Until his release from the service early in 1919 Mr. DeWitt repaid the Judges Bradley at the rate of $100 per month out of his salary as a first lieutenant. Following his release, he returned to his position as county auditor and continued the $100 monthly payments. Some time later he accepted a position with the Internal Revenue Bureau at Dallas, Tex., and before leaving Groesbeck liquidated his indebtedness to the Bradleys by selling his automobile, his equity in a house at Groesbeck, and his equity in a farm.

Following his release from the service, Mr. DeWitt requested that he be furnished the proper forms for filing his expense account and had several conferences with respect to the matter. It appears that the military authorities could not determine whether the claim should be filed with the Texas National Guard or with the United States Army, and as a result no claim was actually filed at the time, and no reimbursement was made to Mr. DeWitt. However, it appears that Mr. DeWitt's dealings at the time were, in fact, entirely with the United States Army. These men were supplied with equipment by the Army, the enlistment blanks used were furnished by the Army and two Army enlisted men assisted Mr. DeWitt in his recruiting drive. It also appears that Major Machin made speeches in the area to assist in the recruiting. The entire benefit of the money expended by Mr. DeWitt and for which he requests reimbursement in the amount of $4,100 (or $26.28 per man) was received by the United States Army.

The Department of the Army first became aware of this matter through a letter dated June 25, 1953, from Mr. DeWitt to the Honorable LYNDON B. JOHNSON, United States Senate, inquiring as to the possibility of recovery. A formal claim was filed in September 16, 1953. The claim cannot be considered under the provisions of the act of July 3, 1943 (57 Stat. 372), as amended (31 U. S. C. 223b), because it is not based on a tortious act or omission of military personnel or civilian employees of the Department of the Army and because the cause of action arose more than 1 year prior to submission of the claim. Similarly, it may not be considered under the provisions of the Federal Tort Claims Act (60 Stat. 843), as codified and amended (28 U. S. C. 921–934), because it is not based on negligence and because it was submitted more than 2 years after the cause of action arose. There is no other statute available to the Department under which a claim of this nature may be processed administratively. However, Mr. DeWitt clearly made expenditures totaling at least the amount of $4,100 for the raising of troops. His motives in doing so were patriotic, and the beneficiary of his acts was the United States Army. Under the circumstances it would be entirely inequitable to deny him reimbursement of the amount so expended.

The total cost of this bill, if enacted, will be $4,100.

The Bureau of the Budget advises that there is no objection to the submission of the proposed bill for the consideration of the Congress.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

AMENDMENT OF LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

Mr. SMITH of New Jersey. Mr. President, on behalf of myself, the Senator from New York [Mr. IVES], the Senator from Connecticut [Mr. PURTELL], the Senator from Ohio [Mr. BENDER], and the Senator from Colorado [Mr. ALLOTT], I introduce, for appropriate reference, two bills to amend the Longshoremen's and Harbor Workers' Compensation Act.

It will be recalled that in both his state of the Union address and his budget message President Eisenhower referred to improving the Longshoremen's and Harbor Workers' Compensation Act. These bills follow up the President's recommendations and are a part of the current legislative program of the Department of Labor.

The Longshoremen's and Harbor Workers' Compensation Act, in addition to being the workmen's compensation law which applies to longshoremen and employees of Government contractors at defense bases or on public works outside of the United States, is also the basic workmen's compensation law for the District of Columbia.

The first of these bills, Mr. President, would modernize the benefit provisions of the existing law by increasing in both injury and death cases the maximum weekly compensation limit from $35 to $50 a week and by increasing the minimum weekly compensation limit from $12 to $15 a week. Also, the period of disability required before the waiting time become compensable would be reduced from 49 to 28 days.

The second bill would improve the existing act by extending the uses of the special fund set up under section 44. This fund is derived from nondependency payment requirements and from fines and penalties. In recent years the fund has been receiving over three times as much money as has been disbursed. Among the new uses for which this money would be available are the extension of rehabilitation services and the relief of employees who have no recourse because of the insolvency of the employer.

Mr. President, I am hopeful that there may be early and favorable action on these bills by the Labor and Public Welfare Committee. The Federal Government which constantly, and properly, urges the State to improve their workmen's compensation acts should certainly see that its own statutes on the subject keep pace with general economic and social advances.

I ask unanimous consent that the text of each bill and short explanatory statements thereof, be printed in the RECORD at the conclusion of my remarks.

The PRESIDENT pro tempore. The bills will be received and appropriately referred; and, without objection, the bills, together with the explanations, will be printed in the RECORD.

The bills, introduced by Mr. SMITH of New Jersey (for himself and other Senators), were received, read twice by their titles, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, together with the explanations thereof, as follows:

S. 1307. A bill to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes.

Be it enacted, etc., That section 6 of the Longshoremen's and Harbor Workers' Compensation Act, as amended (44 Stat. 1424; 33 U. S. C. 907 et seq.), is amended to read as follows:

"SEC. 6 (a) No compensation shall be allowed for the first 7 days of the disability, except the benefits provided for in section 7: *Provided, however,* That in case the injury results in disability of more than 28 days the compensation shall be allowed from the date of disability.

"(b) Compensation for disability shall not exceed $50 per week and compensation for total disability shall not be less than $15 per week; *Provided, however,* That if the employee's average weekly wages, as computed under section 10, are less than $15 per week he shall receive as compensation for total disability his average weekly wages."

SEC. 2. Section 9 (e) of the Longshoremen's and Harbor Workers' Compensation Act, as amended, is amended to read as follows:

"(e) In computing death benefits the average weekly wages of the deceased shall be considered to have been not more than $75 nor less than $22.50, but the total weekly compensation shall not exceed the weekly wages of the deceased."

SEC. 3. The provisions of this act shall be applicable only to injuries and death occurring on or after the effective date of its enactment. The amendments to section 6 and section 9 of the Longshoremen's and Harbor Workers' Compensation Act shall not affect the payment of any benefits heretofore adjudicated under the act of December 2, 1942, as amended (56 Stat. 1028; 42 U. S. C. 1701, et seq.) prior to the enactment of this act.

EXPLANATION OF PROVISIONS OF SENATE BILL 1307

This legislation is intended to modernize the benefit provisions of the Longshoremen's and Harbor Workers' Compensation Act, which have remained unchanged since 1948. This would be accomplished by increasing in both injury and death cases, the maximum weekly compensation limit from $35 to $50 a week and by increasing the minimum

weekly compensaion limit from $12 to $15 a week. Also the period of disability required before the waiting time becomes compensable would be reduced from 49 to 28 days.

This proposal is intended to carry out the objective of the President expressed in his recent budget message to liberalize the benefits of the Longshoremen's and Harbor Workers' Compensation Act. The proposal has been approved by the Bureau of the Budget as being in accord with the program of the President.

THE LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

The Longshoremen's and Harbor Workers' Compensation Act, which is administered by the Department of Labor, is a workmen's compensation law which applies to longshoremen and other maritime employees who are not within the jurisdiction of the States and to employees of Government contractors at defense bases or on public works outside of the United States. This act is also the basic workmen's compensation law for the District of Columbia. Further, the compensation rate under the act is the measure of compensation paid by the Federal Government under the so-called War Hazards Act for injuries arising out of war hazards to Government contractors' employees working on defense bases and on contracts outside of the United States. The total coverage of the law is estimated to be between 500,000 and 600,000 employees.

THE PRESENT BENEFIT LIMITATIONS AND AMENDMENTS PROPOSED BY THE BILL

The act specifies that benefits shall be based on 66⅔ percent of the employee's average weekly wage. This specified ratio of compensable wage loss, however, at present is subject to a maximum dollar limit of $35 a week. When extended on an annual basis, this weekly sum aggregates only $1,820. This benefit limit, therefore, prevents the percentage from operating in the case of wage earners whose wages exceed the dollar maximum. As the level of wages rises, the compensation which is received sinks far below the two-thirds of the employee's wage intended by the law.

Congress set the weekly compensation limits of this law in 1948 in relation to the prevailing wage rate in the industry and the prevailing cost of living at that time. Since the limit was set in 1948 on the basis of a $52.50 weekly wage average wages earned by longshoremen for a 40-hour week have advanced substantially and, in some areas, are approximately $90. On the basis of current earnings, therefore, the weekly maximum compensation of $35 equals only about 40 percent of the wage loss.

It is of utmost importance that these compensation standards within Federal authority be revised in the light of changes in the economic factors which guided their establishment. The bill takes cognizance of the increases in average earnings in the employment affected and in the cost of living which have occurred since the present compensation limits were established. While a compensation limit of $50 a week will not authorize adequate restitution in the case of injuries or death of employees with high earnings, the increased limit will cover a proportion of wage loss which is more nearly commensurate with the intended compensation ratio of 66⅔ percent of the average weekly wage for injury and death benefits which the act specifies than the present outmoded limits. The proposed increase in the minimum compensation under the act from $12 to $15 a week is proportionate to the increase in the maximum limitation.

CHANGE IN WAITING PERIOD

At the present time no compensation is allowed under the act for the first 7 days of disability unless disability continues for more than 49 days. This restriction means that in the large majority of injuries sustained by employees covered by the act the employee must suffer more than a week's complete wage loss. The provision of the bill allowing payment of compensation retroactively after 28 days of disability is more in accord with the modern legislative pattern of workmen's compensation laws than the longer periods now required by the act.

RETROACTIVITY BAR

This bill also provides that the increase in benefits which would be authorized prospectively for longshoremen will not be applied retroactively to cases already adjudicated under the so-called War Hazards Act of December 2, 1942.

S. 1303. A bill to amend the Longshoremen's and Harbor Workers' Compensation Act to authorize more effective use of the special fund provided for in section 44.

Be it enacted, etc., That section 8 (g) of the Longshoremen's and Harbor Workers' Compensation Act, as amended (44 Stat. 1424; 33 U. S. C. 901, et seq.) is amended by striking out "$10" and inserting in lieu thereof "$25."

SEC. 2. Section 18 of the Longshoremen's and Harbor Workers' Compensation Act is amended by inserting "(a)" after "18" at the beginning of the section and by adding a new subsection (b) to read as follows:

"(b) In cases where judgment cannot be satisfied by reason of the employer's insolvency or other circumstances precluding payment, the Secretary of Labor may, in his discretion and to the extent he shall determine advisable after consideration of current commitments payable from the special fund established in section 44, make payment from such fund upon any award made under this act, and, in addition, provide any necessary medical, surgical, and other treatment required by section 7 of the act in any case of disability where there has been a default in furnishing medical treatment by reason of the insolvency of the employer. Such an employer shall be liable for payment into such fund of the amounts paid therefrom by the Secretary of Labor under this subsection; and for the purpose of enforcing this liability, the Secretary of Labor for the benefit of the fund shall be subrogated to all the rights of the person receiving such payment or benefits, including the right of lien and priority provided for by section 17 of this act, as against the employer and may by a proceeding in the name of the Secretary of Labor under section 18 or under subsection (c) of section 21 of this act, or both, seek to recover the amount of the default or so much thereof as in the judgment of the Secretary is possible, or the Secretary may settle and compromise any such claim."

SEC. 3. (a) Section 39 (c) of the Longshoremen's and Harbor Workers' Compensation Act is amended by striking out "education" at the end of the first sentence and inserting in lieu thereof "rehabilitation."

(b) Section 39 (c) of such act is further amended by striking out the last sentence and inserting in lieu thereof the following two sentences:

"Where necessary rehabilitation services are not available otherwise, the Secretary of Labor may, in his discretion, use the fund provided for in section 44 in such amounts as may be necessary to procure such services, including necessary prosthetic appliances or other apparatus. This fund shall also be available in such amounts as may be authorized in annual appropriations for the Department of Labor for the costs of administering this subsection."

SEC. 4. (a) Section 44 (a) of the Longshoremen's and Harbor Workers' Compensation Act is amended by striking out "of this act" at the end of the first sentence and inserting in lieu thereof a comma and the following: "of subsection (b) of section 18, and of subsection (c) of section 39 of this act."

(b) The second sentence of paragraph (1) of section 44 (c) of such act is amended to read as follows:

"The proceeds of this fund shall be available for payments under subsections (f) and (g) of section 8, under subsection (b) of section 18 and under subsection (c) of section 39: *Provided,* That payments authorized by subsection (f) shall have priority over other payments authorized from the fund."

EXPLANATION OF PROVISIONS OF SENATE BILL 1308

This legislation is intended to make the Longshoremen's and Harbor Workers' Compensation Act, administered by the Department of Labor, more effective by extending the uses of the special fund established under section 44 of the act.

The bill authorizes the special fund to be put to additional constructive uses in areas where expenditures will produce particularly beneficial results.

This is one of the measures within the objective stated by the President in his state of the Union and budget messages to improve the provisions of the Longshoremen's and Harbor Workers' Compensation Act. The proposal has been approved by the Bureau of the Budget as being in accord with the program of the President.

THE LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

The Longshoremen's and Harbor Workers' Compensation Act applies to longshoremen and other maritime employees who are not within the jurisdiction of the States and to employees of Government contractors at defense bases or on public works outside of the United States. This act is also the basic workmen's compensation law for the District of Columbia. Further, the compensation rate under the act is the measure of compensation paid by the Federal Government under the War Hazards Act for injuries to Government contractors' employees working on defense bases and on contracts outside of the United States. The total coverage of the Longshoremen's and Harbor Workers' Compensation Act, as extended, is estimated to be between 500,000 and 600,000 employees.

THE SPECIAL FUND

This special fund is not established by appropriations from the Congress but is derived from amounts paid by employers in the stevedoring industry covered by the act, and from fines and penalties collected.

In cases of fatal injury where there are no survivors eligible for benefits under the act, the employer of a deceased employee is required to pay $1,000 into a special fund in the Treasury. These nondependency-payment requirements, which are usual in compensation systems, tend to equalize the liability of all employers under a particular system. Under the existing law, the sums so paid in, together with fines and penalties collected for infractions of the act, are authorized to be spent for specified purposes.

Receipts into the fund under the Longshoremen's and Harbor Workers' Compensation Act for the past few years have averaged approximately $35,000 a year and disbursements have averaged only $10,000. The principal of the fund, therefore, increases constantly and on June 30, 1954, totaled $734,522.

COMPARISON OF PRESENT AND PROPOSED USES OF SPECIAL FUND

When an injury compensable under the act occurs to an employee who had a previous injury, and the combined result of the two injuries is to create permanent total dis-

ability, payment from the special fund is authorized with respect to the total disability, after the employer has completed the payments for which he is liable in connection with the second injury. The present law requires that 50 percent of the amount paid by each employer into the fund shall be made available for payments in connection with second injuries. The bill establishes a priority for payments from the entire fund for this purpose but it does not freeze any portion of the fund for one use.

Payment from the special fund is also authorized up to $10 a week for the maintenance of employees undergoing vocational rehabilitation. The maximum allowance now authorized for payment from the fund for this purpose would be increased under the proposal from $10 a week to $25 a week. The present maximum is too meager to be a worthwhile supplement to the economic resources of employees undergoing training to refit them for gainful employment.

The Secretary of Labor is authorized to use the fund, in addition, for the limited purpose of furnishing prosthetic appliances or other apparatus to refit an injured employee for employment. The bill also authorizes the Secretary of Labor to use the special fund to procure rehabilitation services in those cases where necessary services are not otherwise available through existing facilities. The expanded Federal-State rehabilitation program authorized by the Vocational Rehabilitation Act of 1954 may be expected to reduce to a minimum the number of rehabilitation cases requiring services supplementary to those offered by the program. It is important, however, to take care of the unusual cases where by reason of extraordinary circumstances, rehabilitation would otherwise be foreclosed.

Despite the safeguards of the Longshoremen's and Harbor Workers' Compensation Act for the securing of compensation protection by employers for employees, a few cases occur in which the insolvency of the employer or his estate precludes the collection of compensation awarded under the act. The bill authorizes the payment of awards in the discretion of the Secretary of Labor in such cases from the special fund to provide relief to employees who otherwise would have no recourse to payments from their employers.

Further, the Secretary of Labor would be permitted to use the special fund, in such amounts as may be authorized in annual appropriations, for administrative expenses involved in aiding employees to obtain rehabilitation and encouraging their use of available facilities.

AMENDMENT OF FEDERAL EMPLOYEES COMPENSATION ACT

Mr. SMITH of New Jersey. Mr. President, I introduce, for appropriate reference, a bill amending the Federal Employees' Compensation Act, to provide that the various Federal agencies shall be charged with their share of the cost of workmen's compensation.

I am particularly gratified to have the senior Senator from Massachusetts [Mr. SALTONSTALL] as a cosponsor of this bill.

President Eisenhower said, in his budget message:

> At present all workmen's compensation payments to Federal employees are provided from a single appropriation. To encourage better safety practices, I shall recommend legislation to shift the financing of some of these benefit payments to the employing Federal agency.

This bill is designed to carry out that part of the President's budget message, and is a part of the current legislative program of the Department of Labor.

I desire, Mr. President, to pay full tribute to my colleague and cosponsor, the Senator from Massachusetts [Mr. SALTONSTALL], for his long record of interest, imagination, and activity in the field of promoting industrial and office safety, especially as it affects the workers of our Federal Government. As a matter of fact, the bill we are now introducing is essentially the same as one title of a broader Federal Government safety bill introduced in the last Congress by the Senator from Massachusetts.

As President Eisenhower noted, presently the cost of injuries to Federal Government workers, or death benefits, is met by a single direct appropriation. This bill would intensify the effort of employing agencies to reduce their accident rate, by assessing premium charges against each of the agencies based on manual rates as modified by the accident experience of that agency. The cost of these premium charges will be met from the appropriations of the individual agencies.

Mr. President, when an agency comes before the Appropriations Committees of Congress for its annual appropriation, the premium rate assessed against it will immediately be evident. If, by reason of a high accident rate, an agency is charged a high premium rate, it is obvious that there will be an additional and powerful incentive to reduce accidents. I hope that the Congress will provide this incentive by enacting this legislation expeditiously.

I ask unanimous consent that the text of this bill and a short explanatory statement be printed at the conclusion of my remarks.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and explanation will be printed in the RECORD.

The bill (S. 1309) to amend the Federal Employees' Compensation Act, approved September 7, 1916, as amended, by providing for reimbursement of expenditures from the employees compensation fund by Federal employing agencies, and for other purposes, introduced by Mr. SMITH of New Jersey (for himself and Mr. SALTONSTALL), was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, together with the explanation, as follows:

Be it enacted, etc., That section 9 of the Federal Employees' Compensation Act, as amended (5 U. S. C. 1952 edition, sec. 759) is further amended by adding at the end thereof a new subsection reading as follows:

"(c) The Secretary is authorized to enter into agreements with other Federal agencies for the furnishing of medical and other services of the kind provided for by this section, and for reimbursement to the agency furnishing the services of the approximate cost thereof as shall be agreed upon. The cost of furnishing such services shall be reimbursed or paid from the Employees' Compensation Fund."

SEC. 2. Section 24 of such act as amended (5 U. S. C. 1952 edition, sec. 774) is further amended by inserting before the first sentence thereof the designation "(a)" and by adding at the end of such section a new subsection reading as follows:

"(b) Whoever, being an officer or employee of the United States knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device, a material fact in relation to the injury or death of a person compensable under the provisions of this act or any extension or application thereof, or makes any false, fictitious, or fraudulent statement or representation, or makes or uses any false writing or document knowing the same to contain any false, fictitious, or fraudulent statement or entry, in relation to such an injury or death, or induces or compels any person to forego the filing of any claim for compensation or other benefits provided under this act or any extension or application thereof, or retains any notice, report, claim, or paper which is required to be filed under this act or any extension or application thereof, or regulations promulgated thereunder, shall be fined not more than $5,000 or imprisoned not more than two years, or both."

SEC. 3. Section 35 of such act, as amended (5 U. S. C. 1952 edition, sec. 785) is further amended to read as follows:

"SEC. 35 (a) There is established in the Treasury a separate fund to be known as the Employees' Compensation Fund which shall consist of the unexpended balances of moneys heretofore appropriated for the purposes thereof, together with such sums as the Congress may from time to time appropriate therefor or transfer thereto, and amounts otherwise accruing thereto under this section. Such fund, including all additions that may be made to it by appropriation or otherwise, shall be available without time limit for the payment of the compensation, medical benefits, sums advanced as costs for enforcement of liability in third-party cases as required or as undertaken by the Secretary pursuant to section 26 of this act, and such other benefits and payments as are provided for by this act or any extension or application thereof, except as may otherwise be provided by this or other acts.

"(b) Except as otherwise provided in subsection (e) of this section, each executive department and each agency or instrumentality of the United States, or other establishment, having employees who are or may be entitled to compensation under this act or any extension or application thereof (hereinafter called "agency") shall contribute to the maintenance of the employees' compensation fund by the payment of premium charges based upon manual rates computed in a manner consistent with commercial insurance practice on the basis of experience under this act as applied to payrolls. The Secretary of Labor from time to time shall determine and promulgate such rates which shall be fair, reasonable, and adequate. As to all risks involving similar kinds and degrees of hazards the basic rates charged shall be the same: *Provided, however*, That in determining premium charges such rates may be adjusted to reflect an agency's loss experience by merit or experience rating. Premium charges may be made on the basis of employment in a particular officer, bureau, or other constituent unit of an agency for which annual or other appropriations are made for personal services, or in such other manner as the Secretary of Labor may determine will best assist in the evaluation of trends with respect to safety at the various operational levels. Premium charges shall be determined prospectively on an annual basis, and readjustment of such charges may be made at any time on account of errors, changes in classifications of employments or extent of payroll exposure, or because of other similar factors which distort proper premium charges: *Provided*, That there shall be no retroactive readjustment of the manual rates.

"(c) The respective premium charges shall be determined by the Secretary of Labor together with a charge for administrative expenses, and billed by him annually, quarterly or such other times as may be requested by the head of each agency concerned. The head of the agency concerned shall cause the said charges to be paid promptly from the respective appropriations and funds of the agency and its constituent units, such payments to be placed to the credit of the employees' compensation fund, to remain available thereafter for the payment of benefit costs and other payments heretofore or hereafter authorized by statute.

"(d) The Secretary of Labor is authorized to expend from such fund, for the necessary administrative expenses of his Department and within such limitations as may be set in appropriation acts annually. Premium charges and charges for administration of claims shall be subject to such readjustment and correction as may be found necessary, including repayment from the employees' compensation fund to the appropriation against which such charge was made. Should the Secretary of Labor determine at any time that there has developed in such fund a surplus of premiums over losses, which in his judgment is larger than is necessary adequately to safeguard the solvency of the fund, the Secretary shall cause such excess to be transferred into miscellaneous receipts of the Treasury.

"(e) Each agency required by this act to contribute through the payment of premium charges to such fund shall, at such time, and in such manner and form as may be determined by the Secretary of Labor, furnish the Secretary with payroll reports. Each agency shall upon request make its payroll records available to the Department of Labor for inspection and audit for premium-making purposes.

"(f) The provisions of this section in respect of the fixing and charging of premiums shall not apply to any agency, other than an executive department, with respect to any fiscal year if on June 30 of the second preceding fiscal year it had less than 5,000 employees in its employ or in the cases of members of any Reserve components of the military forces of the United States (including Reserve and auxiliary of the Coast Guard) while serving as such members or persons engaged in emergency relief employment, or to persons to whom the benefits under this act or any extension or application thereof are payable from sources other than the Employees' Compensation Fund. Loss experience under this act arising from war-risk hazard (as defined by the Secretary of Labor) shall be excluded from the experience which is used under subsection (b) for ratemaking and premium rates shall not include any loading for war-risk hazard as so defined.

"(g) Payments to the Employees' Compensation Fund under this section shall be made from the respective appropriations and funds which are used for payment of the salaries, wages, or other compensation of the covered employees of the several agencies."

SEC. 4. All provisions of law, other than those included in this act, which require contribution or payment by any agency to the Employees' Compensation Fund are hereby superseded as to any agency required to comply with the provisions of section 35 of the Federal Employees' Compensation Act as amended by this act: *Provided*, That this provision shall not be construed as in any way affecting the liability of an agency for contributions in respect to compensation and other benefits for injury (or death from injury) where the injury occurred prior to the effective date of this act.

SEC. 5. Section 4 of this act shall take effect January 1, 1956, and the first period for which charges shall be made as provided in section 3 of this act shall commence on January 1, 1956.

EXPLANATION OF THE PROVISIONS OF SENATE BILL 1309

These provisions are intended to reduce the personal accident toll in Federal service by amending the Federal Employees' Compensation Act to charge the various Federal employing agencies with their workmen's compensation costs.

This particular legislation is intended to carry out the objective of the President expressed in his recent budget message to encourage better safety practices in Federal employment by shifting the financing of benefit payments in employment injury cases from a single appropriation to the appropriations of the employing agencies. These provisions have been approved by the Bureau of the Budget as being in accord with the program of the President.

It is of utmost importance that the Federal Government should intensify its effort to reduce the accident rate among its employees. If the various departments and agencies are made more aware of the incidence of accidents in employments within their responsibility more effective safety measures should be adopted and the number of accidents in the employments reduced.

PREMIUM FIXING

Premium costs will be fixed and charged to the various agencies in accordance with accident experience under the Compensation Act. The assessment of premium charges upon each agency based on manual rates, as modified by the accident experience of that agency, is designed to make the agencies aware of their injury records and the success of their efforts in accident prevention. Further, when appropriations are sought by the individual agencies to defray premium costs, the premium rate will furnish a concise indication to the Congress of their accident records.

The shifting of accident costs to the employing agencies is a good business practice, consistent with business methods followed in underwriting workmen's compensation. This financing should also result in better safety practices for the Nation's largest employer.

CONTINUING AUTHORITY FOR INTERAGENCY MEDICAL SERVICE

The Secretary of Labor would be authorized to enter into agreements with other Federal agencies for the furnishing of medical and related services required under the act and for the reimbursement to the cooperating agencies of the approximate cost of the services rendered. At the present time it is necessary for the annual appropriation acts to carry this authorization.

SANCTIONS FOR MAINTAINING FALSE RECORDS OF SAFETY

A section would be added imposing sanctions for concealing material facts relating to injury or death. This section is intended to discourage any tendency by any agency official to establish a false record of safety.

The following is a section-by-section analysis of the "charge-back" provisions:

"SECTIONAL ANALYSIS OF SENATE BILL 1309

"SECTION 1. REIMBURSEMENT TO GOVERNMENT AGENCIES FOR MEDICAL SERVICE

"This section would add to an existing section of the Federal Employees' Compensation Act (sec. 9) a new subsection which would authorize the Secretary of Labor to enter into agreements with other Federal agencies for the furnishing of medical and other services required under the act and for the reimbursement to the cooperating agency of the approximate cost of the services rendered.

"A provision of this kind has for years been carried in appropriation acts for the Bureau of Employees' Compensation, Department of Labor. It more appropriately belongs in the act itself.

"SECTION 2. SANCTIONS FOR CAUSING INACCURATE ACCIDENT RECORDS AND HAMPERING THE FILING OF CLAIMS

"This section would amend section 24 of the Federal Employees' Compensation Act by inserting a new subsection, the purpose of which is to impose sanctions for concealing material facts in relation to injury or death; or for making false statements or representations; or for making or using false writings or entries in relation to injury situations; or for inducing or compelling a person to forego the filing of a claim or for retaining a claim or other paper required to be filed under the act.

"In the administration of the Federal Employees' Compensation Act, it has been alleged over the years that some individuals have discouraged employees and dependents from filing claims in bona fide injury and death situations, merely to make a showing of an apparently good—though fictitious—safety record. This proposed section is intended to discourage any such actions and to impose sanctions where the forbidden acts are done.

"SECTION 3. PREMIUM CHARGING METHOD

"This is the principal section setting up the premium charging method.

"Compensation funds

"Subsection (a) embodies largely the basic content of the present section 35 of the Compensation Act; namely, it provides for the establishment of the employees' compensation fund. The additions to the old statutory language are those necessary to integrate the section with the new charging system. Included in subsection (a) is a provision with respect to advancement of costs for enforcement of third party liability, a provision that has appeared in the annual appropriation acts of the Bureau for many years, but which more appropriately belongs in this section.

"Payment of premium charges

"Subsection (b) contains the requirement that agencies contribute to the maintenance of the employees' compensation fund by the payment of premium charges. It is intended that the premium charges will be determined in the same manner as premium charges are determined in the United States under other workmen's compensation laws; that is, the loss experience will be tabulated and premium rates will be established from this experience and published in manual form with appropriate rates for the various classifications of employments. The several classifications will reflect the relative hazards of the employments covered. The manual rates for the various classifications will then be applied to the appropriate payrolls in the generally accepted manner, and the resulting premium will represent the charge against the agency as its annual contribution to the upkeep of the employees' compensation fund.

"The basic manual rates will apply to all agencies alike. However, in determining the premium charges, adjustments will be made to reflect a particular agency's loss experience. Premiums will thus reflect an agency's merit or experience rating. This means, for example, that if an agency is able to hold down its losses, a favorable premium adjustment will be made reflecting that ability. An agency's premium will thus be a barometer to gage the extent to which it operates safely.

"The bill contemplates that the premium charges will be made at operational levels within departments and large agencies, particularly at levels at which appropriations are made for personal services by the Congress. In this connection the bill provides that the Secretary of Labor may approve any

other manner of making the premium charges if the manner selected will best assist in the evaluation of safety trends at the various operational levels. Provision has been included for correcting errors in premium charges, for example, where there is a fluctuation of employment or extent of payroll exposure or other similar factors not known at the time the premium charge was made.

"Administrative expenses

"Subsection (c) authorizes adding to the pure premium charge a charge for administrative expenses. The premium charge and the loading for administrative expenses would be billed on a periodic basis and would be paid from appropriated or other funds of the agency.

"Disbursement for administrative expenses

"Subsection (d) would authorize the expenditure from the employees' compensation fund by the Secretary of Labor of amounts necessary for administration, within such limitations as Congress may set in appropriation acts annually. Included in this subsection is a provision the effect of which is to authorize the transfer to miscellaneous receipts of the Treasury any accumulation in the employees' compensation fund of a surplus of premiums over losses.

"Payroll inspection

"Subsection (e) is designed to give the Secretary of Labor authority to make the usual inspection of payroll records necessary for the audit of payrolls for premium-making purposes. This is the usual kind of authority and function which insurance companies exercise in checking an employer's records to verify the accuracy of the premium charge.

"Exceptions from premium payments

"Subsection (f) contains such exclusions of agencies and types of employments from premium charging as are deemed appropriate. The first of these is the exclusion of the smaller agencies, that is, those having less than 5,000 employees. The next exclusion is of members of the Reserve components of the military forces. The basis for compensation eligibility for such members differs from that applicable to the ordinary civilian employees. To include military loss experience would distort the rate basis for civilian employments. Other reasons exist for eliminating this class of covered individuals from the premium-charging plan.

"In addition, relief employments, if any, would be excluded. Where benefits under the act are paid to persons from sources other than the employees' compensation fund, no premium charge would be made with respect to the employments of such persons. In order that the premiums may reflect true occupational injury hazards and no other, a provision has been added to exclude from the basic experience used for rating-making purposes those losses which can be identified as due to war risks. (During World War II, the insurance purchased by the Government for Government contractors' employees was written without a factor for war-risk hazard so as not to distort the proper premiums.)

"Agency personnel

"Subsection (g) is an authorizing subsection under which the several agencies would be permitted to use their appropriations and funds for salaries, wages, or other compensation, for the purpose of making payments for the charges billed to them by the Secretary.

"SECTION 4. SUBSTITUTION FOR PRESENT METHODS OF FUND REIMBURSEMENT

"This section is designed to provide for the substitution of the premium-charging method for the other methods by which at present the employees' compensation fund may be reimbursed. There are at present four statutory provisions requiring agencies to contribute to the employees' compensation fund on the basis of annual billings. (These four statutes provide for the inclusion in the billing of a fair portion of the cost of administration.) The statutes are: Civil Aeronautics Act of 1938 (sec. 1306 (e)); Small Business Act of 1953 (sec. 206 (b)); Virgin Islands Corporation Act (sec. 7 (c)); and the act incorporating the Panama Railroad (sec. 252, Canal Zone Code).

"SECTION 5. EFFECTIVE DATE

"This section would make section 4 of the act effective January 1, 1956. On that date the first period for which charges are to be made would commence. The other provisions of the act would go into effect upon enactment so that work could get under way to establish the manual rates and the necessary procedures well in advance of the effective date for charging purposes."

Mr. SALTONSTALL. Mr. President, I am certainly glad to have this opportunity to join my distinguished colleague, the senior Senator from New Jersey [Mr. SMITH], in sponsoring this bill, which is designed to improve the performance of the Federal Government and its workers in the field of accident prevention and general safety.

To date, the Government's performance in this field is shockingly bad. Every year preventable accidents to Government employees are causing untold human suffering. In compensation payments, medical care, and loss of work, they are costing American taxpayers millions and millions of dollars.

According to Labor Department records, 486,062 civilian Federal employees were injured in the 6-year period from 1947 to 1952. Fatal accidents took the lives of 1,547 Federal workers. Man-days lost totaled 17,725,358. Direct and indirect accident costs to the Federal Government during the 6-year period amounted to more than $563 million for occupational accidents alone.

Production time lost as the direct result of disabling injuries was the equivalent of the loss of 77,066 workers. In man-hours, the cost to the taxpayer totaled more than $217 million, at an average hourly rate of $1.54.

In March of last year, I introduced a bill to provide for the establishment in the Department of Labor of a Federal Safety Division, and for other purposes. Several valid objections were registered to this bill, relative to the establishment at this time of such a Federal Safety Division; but other provisions of the bill, now contained and amplified in the bill being introduced today by the Senator from New Jersey [Mr. SMITH] and myself, have the complete approval of the Secretary of Labor and the Bureau of the Budget. They represent a very sound and promising implementation of existing safety programs within the Federal Government, and should, we feel, have the complete support of the Congress.

As the Senator from New Jersey has said, President Eisenhower in his budget message has recommended passage of this measure, in order that improved safety practices throughout the Federal Government may be encouraged.

Mr. President, this bill is a product of discussions and study with the Department of Labor, the Bureau of the Budget, the Social Security Administration, and the National Safety Council, in company with representatives of Government employees' unions. I hope very much that hearings on the bill will be scheduled soon, for I believe it represents another forward step toward a real improvement in the safety record of the Federal Government, a record which is very much less effective than that of private industry. Only as thoughtful steps such as this are taken can we achieve the objective we seek; namely, that of reducing and, whenever possible, preventing accidents, injuries, and fatalities among our Federal workers.

INCREASED INSURANCE PROTECTION OF DEPOSITORS IN FEDERALLY INSURED BANKS

Mr. LANGER. Mr. President, I introduce for appropriate reference a bill to increase the insurance protection of depositors in federally insured banks from $10,000 to $20,000.

In my State there are many counties which have only 1, 2, or 3 banks; and it is a matter of much inconvenience to depositors who desire to have their deposit guaranteed by the Federal Deposit Insurance Corporation to be limited to the inadequate amount of $10,000.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1313) to increase the insurance protection of depositors in federally insured banks from $10,000 to $20,000, introduced by Mr. LANGER, was received, read twice by its title, and referred to the Committee on Banking and Currency.

AMENDMENT OF IMMIGRATION AND NATIONALITY ACT

Mr. HUMPHREY. Mr. President, on behalf of myself, the senior Senator from Illinois [Mr. DOUGLAS], the Senator from Massachusetts [Mr. KENNEDY], and the junior Senator from Michigan [Mr. MCNAMARA], I introduce for appropriate reference a bill to amend the Immigration and Nationality Act. It is a bill designed to reintroduce the spirit of humanitarian compassion and democracy into our immigration laws. It is my hope that the Senate Judiciary Committee will look upon this effort kindly and will report the bill to the Senate floor favorably.

The Immigration and Nationality Act of 1952 was not a controversial issue in the recent election campaign. Candidates of both majority political parties made clear their understanding that our present laws were in some respects discriminatory and undesirable. The President of the United States has declared that to be his position. Our effort with this bill is to correct some of those discriminatory and undesirable portions.

Our bill does not constitute a complete revision of the present Immigration and Nationality Act. It does not go so far as I would like it to go. However, it is a fair beginning on which reasonable men of both parties can agree at this

time. It would ameliorate some of the harsh provisions of existing law, making the law more flexible and adaptable to change in world conditions. It would aid us in carrying out our foreign-policy objectives and thus help us to combat communism. It will also go far toward relieving the continuous pressure for emergency immigration legislation.

We introduce the bill in the spirit of modest progress and progressive change. We introduce it in the hope that it can represent a consensus of nonpartisan opinion designed to help democratize our immigration and nationality laws.

More specifically, the bill accomplishes the following:

First. Section 1 restores to professors eligibility for nonquota status—which they enjoyed prior to the McCarran Act—if a university requests their services. This proposed change is based on a feeling of confidence that our universities will select only well-qualified persons for employment on their teaching staffs. It, therefore, abolishes the unnecessary red tape and delay involved in requiring universities to obtain clearance orders from the local employment service and then proving to the Immigration Service that the professor whose immigration is being sponsored is needed urgently in the United States. My amendment in no way changes the security requirements of our laws as they concern all who wish to enter the United States.

Second. Section 2 would grant to certain adopted children the immigration status enjoyed by natural children. This change would have 2 important effects: (a) it would make it unnecessary for adopted children of American citizens, in many instances of servicemen, to wait their turn on the quota or, as happens so often, to require that Congress pass a special bill on their behalf; (b) it would make adopted children of aliens eligible for the same quota status or quota preference as that enjoyed by natural children, thus avoiding the heartbreaking situations in which adopted children force their family to delay their trip to the United States or have to be left behind.

As section 2 applies only to children adopted prior to their reaching the age of 14 years, and as it specifically excepts children adopted solely for the purpose of obtaining immigration preference for them, the danger of abuse is avoided.

Third. Section 3 repeals the provision of the present law under which some quotas, generally those which are needed most urgently, are mortgaged for decades, in some cases even for centuries.

Fourth. Section 4 ends one of the racially discriminatory features of the present law. It abolishes the racial ancestry blood test for persons "attributable by as much as one-half of their ancestry to a people or peoples indigenous to the Asia-Pacific triangle." Henceforth, all visa applicants would be classified only according to their place of birth.

Fifth. While section 4 still retains the national-origins principle, sections 5 and 6 would go far toward ameliorating its harsh effects. They do that without raising the existing overall quota ceiling of about 154,000. They simply provide that if, in any given year, no takers are found for any portion of these 154,000 numbers, that portion is not declared forfeited, as under present law, but is made available during the following year, without regard to national origins to (a) persons of special skills, (b) close relatives of citizens or alien residents, (c) persecutees, and (d) other groups of persons whose emigration to the United States would further our foreign policy.

Another change effected by this section concerns the problem of family unification. Under present law, a person qualifying under the national-need preference may enter this country with his wife and minor children, all of whom are covered by the preference. A person qualifying for preference as the brother of an American citizen, however, must leave his wife and children behind and can get a preference for them only after he has arrived in this country. Under the change provided for by this section, the preference right shall apply not only to the person directly affected, but also to his spouse and minor children so as to enable families to enter this country as single units.

Sixth. It has often been said that a man who tries to import a sack of beans into the United States and finds that it has been excluded, has the right of appeal, but a man who wants to bring his mother over, and finds that she has been denied a visa, has no such right. Section 7 of my bill is designed to change that situation. It is designed to modify the anomaly of the present Immigration Act under which authority for the acts of the Immigration Service—which acts in many instances through the Board of Immigration Appeals—is concentrated in the hands of the Attorney General, while authority for the acts of the Consular Service is diffused among the numerous consuls, each of whom is the final arbiter in the visa application cases before him. Section 7 concentrates responsibility in a visa review board appointed by the Secretary of State, to which the sponsors of prospective immigrants may be allowed to appeal. This board would assure that visa regulations are enforced uniformly throughout the world and would also safeguard against irresponsible and capricious acts by individual consular officers.

Seventh. The concept of justice tempered with mercy is a part of our administration of law. It is deeply imbedded in our religious traditions. It was in conformity with that concept that Congress long ago gave the Attorney General discretionary authority to suspend deportation in deserving cases. That authority was severely curtailed by the Immigration and Nationality Act of 1952, the Senate majority report on which states harshly and cruelly:

> Hardship or even unusual hardship to the alien or to his spouse, parent, or child is not sufficient to justify suspension of deportation.

Under section 8 of this bill the standards for suspension of deportation contained in the law in effect prior to the adoption of the MrCarran Act are restored. As suspension of deportation will only be granted in the discretion of the Attorney General and only with the concurrence of Congress, I am certain that there is no danger of this humanitarian provision being abused.

Eighth. Sections 9 and 10 are purely procedural.

Our proposal is a reasonable one. It provides a meeting ground on which those of us who oppose the 1952 act can unite with those who support it with certain reservations.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1315) to amend the Immigration and Nationality Act, introduced by Mr. HUMPHREY (for himself, Mr. DOUGLAS, Mr. KENNEDY, and Mr. MCNAMARA), was received, read twice by its title, and referred to the Committee on the Judiciary.

FUNDS FOR WIND EROSION CONTROL MEASURES

Mr. ALLOTT. Mr. President, on behalf of myself, the junior Senator from New Mexico [Mr. ANDERSON], the senior Senator from Wyoming [Mr. BARRETT], the junior Senator from Kansas [Mr. CARLSON], the senior Senator from New Mexico [Mr. CHAVEZ], the senior Senator from Oklahoma [Mr. KERR], my colleague, the senior Senator from Colorado [Mr. MILLIKIN], the junior Senator from Oklahoma [Mr. MONRONEY], the junior Senator from Wyoming [Mr. O'MAHONEY], and the senior Senator from Kansas [Mr. SCHOEPPEL], I introduce, for appropriate reference, a bill to make available unexpended balances of funds heretofore appropriated for the agricultural conservation program for wind erosion control measures.

Mr. President, I ask unanimous consent to speak briefly with reference to this bill.

The PRESIDENT pro tempore. Does the Senator desire to speak more than 2 minutes?

Mr. ALLOTT. My remarks will take slightly more than 2 minutes and less than 4 minutes.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the Senator may proceed.

The bill (S. 1319) to make available unexpended balances of funds heretofore appropriated for the agricultural conservation program for wind erosion control measures, and for other purposes, introduced by Mr. ALLOTT (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Appropriations.

Mr. ALLOTT. Mr. President, many of my colleagues will remember that last session the senior Senator from Colorado [Mr. MILLIKIN] was joined by 15 other Senators, in presenting to the Congress a resolution asking that special funds be set aside for the use in areas suffering from excessive wind erosion.

This money was appropriated in the amount of $15 million under the heading "Department of Agriculture, Agri-

cultural Conservation Program" in the Third Supplemental Appropriation Act of 1954.

At the time the authority for the use of these funds expired on December 31, 1954, there remained approximately $7,147,000 in the fund. It is that amount which we ask the Congress to authorize the Secretary of Agriculture to have available.

The facts of the situation are that in many of the areas where an emergency existed last year, there has been no moisture in quantities which will assure as favorable a situation as in 1954. At that time, much of the land did have some submoisture which is not present today. We hope that we will have rain or snow and that none of this money may be needed, but we must be prepared to cope with the situation when the spring winds commence.

Unfortunately, the conditions that make possible these wind erosion disasters are largely beyond human control. Lack of normal rainfall and severe winds in the spring months comprise the raw material of soil erosion.

The area chiefly affected has been suffering drought or near drought conditions for the past 4 years. The situation has become progressively worse. In eastern Colorado, precipitation, rainfall, and snow are from 30 to 60 percent of normal for the past 6 months. Similar conditions exist, at least to some extent, in southwestern Nebraska, Kansas, Oklahoma, and northern Texas, with some areas in Wyoming in the danger zone. Unfortunately, Colorado seems to be in the worst condition.

Much wind damage has occurred durin December and January. In the States of Colorado, Wyoming, Nebraska, Kansas, New Mexico, Oklahoma, and Texas more than 4 million acres have been damaged, of which number all but a million acres are in Colorado. Numerous letters and telegrams inform me that land is now blowing and eroding in southeastern Colorado. As of February 1, Department of Agriculture figures show that in these same States more than 20 million acres are classified as in a condition to blow. This includes cropland and rangeland, as well as other land.

Needless to say, we hope that we shall not need to use this money, but my colleagues and I are asking that this program be reinstituted so that in the event of calamity, rapid rescue operations can begin.

Another example of the seriousness of the situation for the farmers in Great Plains States can be best exemplified by these figures for Colorado. The receipts from the sale of farm products in Colorado have been reduced $163 million during the past 2-year period. This is $163 million less that the farmer has to spend, not only in Colorado, but to buy the products of industry all over the country. A great portion of this loss of income can be attributed to the drought. Multiply this by like figures in other States of the Great Plains, and the impact upon our farm economy is plain to see.

Official reports reaching me indicate that farmers have had to borrow over $7 million in my State from the Farm Home Administration alone. They have reduced their foundation herds of livestock chiefly for the lack of feed and pasture. In Colorado since the drought and duststorm of 1954, the farmers have reduced their foundation herds as follows: Beef cattle, down 70,000 head; stock sheep, down 58,000 head; dairy cattle, down 4,000 head.

I urge the Members of the Congress to go on record quickly and to empower the Secretary of Agriculture to put into effect the assistance so necessary to protect the farmlands of the West.

In many areas this is already an emergency. It must not become a catastrophe.

Mr. CARLSON subsequently said: Mr. President, I wish to associate myself with the remarks made by the distinguished junior Senator from Colorado [Mr. ALLOTT], who spoke on the need for sufficient funds to be made available immediately in areas where there is danger of soil erosion because of wind.

It seems to me that the important factor in connection with the bill is to have the funds made available quickly to the Secretary of Agriculture, for use at the earliest opportunity, because the funds will be most effective when they are used promptly.

CONSTRUCTION OF MEDICAL EDUCATIONAL AND RESEARCH FACILITIES

Mr. HILL. Mr. President, on behalf of myself, the senior Senator from Minnesota [Mr. THYE], the Senator from Illinois [Mr. DOUGLAS], the Senator from Pennsylvania [Mr. DUFF], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from West Virginia [Mr. NEELY], the Senator from New York [Mr. LEHMAN], the Senator from Michigan [Mr. MCNAMARA], the junior Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from North Dakota [Mr. LANGER], and the Senator from Washington [Mr. JACKSON], I introduce for appropriate reference, a bill to authorize a 5-year program of grants to accredited medical schools to be used for expanding, remodeling, or constructing facilities needed for the training of doctors.

The bill was worked out in a series of conferences with the committee on financing of the Association of American Medical Colleges and has been unanimously endorsed by the executive council of the association. The bill conforms to the principles approved by the house of delegates of the American Medical Association.

All the approved medical schools in the Nation today number but 74. Many are housed in buildings half a century or more old. To establish one new medical school can cost as much as $25 million. The costs involved in reconstructing and modernizing old facilities are likewise great. Almost without exception, our medical schools are today confronted with serious financial problems. Through the fine efforts of private groups, the National Fund for Medical Education has raised some $7 million since 1949. Yet even if the fund succeeded in attaining its goal of $10 million a year for the support of medical education, such an amount would be no more than our medical schools must have to meet necessary costs of operation and maintenance.

The medical schools on which we rely to provide the Nation with an adequate supply of properly trained doctors must have assistance for the construction of new facilities and for the expansion and rehabilitation of existing facilities.

The bill which we have today introduced authorizes $250 million over a 5-year period, to be used for construction grants. The bill contains specific guaranties against any Federal interference with or control over the schools. Such guaranties are essential to preserve our free system of American medicine, the best in the world.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1323) to authorize a 5-year program of grants for construction of medical educational and research facilities, introduced by Mr. HILL (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. THYE. Mr. President, as a cosponsor of the bill which has been introduced by the Senator from Alabama [Mr. HILL], I wish to make a few brief remarks.

The bill to authorize a 5-year program of grants for construction of educational and research facilities for our medical schools, in which I have joined as a cosponsor, involves a recognition by Congress not only of an important public need but also of assistance by the Government in a program of the highest potential value to the future well-being of the people of this country.

Our medical schools, despite generous private gifts and endowments and the contributions of various States, have not been able to meet their most urgent requirements for buidlings and facilities.

Without such facilities we cannot hope to have an adequate number of properly qualified and trained physicians, teachers, and research scientists.

The proposed legislation would make $50 million available in each of the next 5 years for grants for construction to accredited medical schools.

In most cases the grant would represent 50 percent of the cost of construction, although larger shares would be provided where enrollment increases warrant it or in the case of new schools.

No grant or grants to any medical school for the total 5-year program would exceed $3 million for construction, exclusive of grants up to $25,000 for preparing initial plans.

While the main emphasis in the bill is placed on construction, it is provided that up to 20 percent may be allocated to permanent endowment for maintenance.

During the past 2 years when I was chairman of the Subcommittee on Appropriations for Health, Education, and Welfare, I made a special study of the needs of our medical schools for expansion of their educational and research facilities.

I visited the University of Minnesota during the course of this survey and found that despite the establishment of the Mayo Memorial and greatly expanded medical and research facilities there was need for surgical research laboratories, a clinical cancer research building, additions to the Heart Hospital, for a faculty and student medical library, and for a residence hall for graduate medical students engaged in research.

These needs are typical of many of our medical schools.

Last fall, Dr. Harold S. Diehl, dean of the medical sciences at the University of Minnesota, wrote me as follows:

> If we are to provide more and better trained personnel in medicine, dentistry, nursing, medical technology, physical therapy, occupational therapy, and other health service fields, one of the fundamental and basic needs is for improved and expanded facilities.
>
> The same basic necessity applies to the expansion of medical research activities.

Emphasis on the need for added facilities in our medical schools was also emphasized in a letter which I received from Dr. Owen V. Wangensteen, chief of the department of surgery at the medical school of the University of Minnesota.

Dr. Wangensteen wrote me as follows:

> Ideas and men are, of course, of the greatest importance in any research venture.
>
> Nevertheless these men must have a place to work.
>
> A year ago Surgeon General Scheele's office had indications of requests for help running into millions of dollars for medical schools throughout the country.
>
> In many areas, that need is urgent.
>
> I have the definite feeling that one to two million dollars could be employed usefully and immediately in a large number of medical schools throughout the country to give helpful impetus to medical research work now in progress in the area of cancer and heart disease alone.

Mr. President, I reported my observations last year in a letter to the chairman of the Committee on Appropriations.

I ask unanimous consent that this letter, dated July 16, 1954, be printed in the RECORD at this point as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *July 16, 1954.*

The Honorable STYLES BRIDGES,
Chairman, Appropriations Committee,
United States Senate,
Washington, D. C.

DEAR SENATOR BRIDGES: This is in reference to your communication of July 1 wherein you made further mention of our conversation concerning the applications that have been received by myself as chairman of the Subcommittee on Health, Education, and Welfare appropriations and that some of the college and university officials had recommended that the Federal Government appropriate funds to assist them in developing the research activities of these educational institutions to the maximum. At my earliest opportunity I visited the University of Minnesota as I had received a communication from Dr. Owen H. Wangansteen, of the University of Minnesota, setting forth their research activities and also their great need of assistance as it is impossible to obtain sufficient funds to continue expanding not only the necessary space but the laboratory equipment.

It is at the University of Minnesota that a young surgeon, Dr. C. Walton Lillehei, is making it possible to open the heart in man for more than a half-hour to repair congenital defects within the heart. He is making it possible to enlarge the scope of surgery of the heart considerably. This is a monumental contribution—perhaps the most importan surgical contribution in this area of work in our generation. Dr. Lillehei had the idea of how to do it; he worked it out in the experimental laboratory. He then applied it to patients. I would say that the nature of this contribution could not be estimated in money—yes, not even in millions or billions. It is that important.

I was privileged last Saturday, July 10, to witness such a surgical performance on a dog, where the second dog was used as the host for the purpose of purifying the blood while the arteries were separated from the other dog's heart that was under surgery. It was unbelievable, and yet research has accomplished it. Only through this intensified research activity at this University of Minnesota has this been accomplished. Think of the thousands into the hundreds of thousands of blue babies and others afflicted with a defective heart who can be saved and be permitted to lead a normal life.

A university or college that has developed in this manner in the field of research cannot possibly find the means to finance itself. It is for that reason that I definitely believe that the Federal Government should make a very careful study of this question. I am taking the matter up with Mrs. Hobby, the Secretary of the Department of Health, Education, and Welfare. I have already discussed it with her assistant, Mr. Nelson Rockefeller, in the hopes that this appropriations need can be brought to the attention of the Budget Bureau in order that this Bureau may give consideration to such an appropriation and that we in Congress may have the benefit of a recommendation from the Budget Bureau as we reconvene in the 84th Congress.

I believe that it would be better if we handle the funds for such research facility construction in much the same manner as we now appropriate and make available funds for cancer, heart, mental health, and the other health research assistances. By handling the funds in such a manner, the specific worthy projects that were proven and approved by the national health authorities would be granted the funds to continue in their research.

Now again referring to the activities at the University of Minnesota, where I made this specific investigation and study of what their needs are, both Dr. Wangensteen, one of the noted surgeons of this Nation, and Dr. Harold S. Diehl, the Dean of the Medical School of the University of Minnesota, discussed every phase of their needs and what their future plans are. It would be my surmise that the University of Minnesota at the present moment could well use somewhere in the area of $3 million and even possibly $4 million immediately and directly to satisfy present existing urgent needs for laboratory space to give momentum to research which is now in progress.

I am certain were we to visit other educational institutions that have proven their ability and scientific leadership in this field of medical and surgical research that we would find a need much similar to what exists at the University of Minnesota.

Sincerely yours,

EDWARD J. THYE,
United States Senator.

Mr. THYE. Mr. President, the basic problem that needs to be considered, aside from the obvious benefits to the people of this country of enlarged medical education and research facilities, is the number of doctors that are needed for an expanding population.

Since 1910, the population has increased 75 percent yet the annual number of medical-school graduates has increased only 54.5 percent.

An accepted ratio is 1 active doctor for every 750 people.

Our net rise in population in 1954 demanded a net increase of 3,333 new doctors, yet our actual increase of new doctors was only 2,816.

Beginning with an estimated shortage of 20,000 doctors in this country, it is apparent that if this trend is not changed the ratio of doctors serving our people will be reduced still further.

In fact, the report of the President's Commission on the Health Needs of the Nation, made 3 years ago, stated that by 1960 the United States will need 30,000 additional physicians over and above the predicted supply for that year for reasonably comprehensive medical care to the whole civilian population, for the pressing needs of public-health services, industrial medicine, mental and tuberculosis staffs, faculties of medical schools and schools of public health, and to meet all the requirements of the Armed Forces.

The principal barrier to increasing the number of physicians is actually the limited capacity of our medical schools.

The Journal of the American Medical Association of September 11, 1954, states:

> Medical schools indicate that large sums are still needed for construction of new buildings, remodeling and modernization of existing facilities, and the purchase and installment of new permanent equipment.

It is to help in meeting these basic needs, which loom so large in any consideration of the health and well-being of our people, that the proposed legislation to authorize Federal grants for construction of educational and research facilities for our medical schools is directed.

I believe this is a most constructive bill, and I am confident it will have serious and favorable consideration by Congress.

AMENDMENT OF CONSTITUTION RELATING TO ELECTION OF PRESIDENT AND VICE PRESIDENT

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, a joint resolution proposing an amendment to the Constitution of the United States providing for the direct popular election of the President and Vice President. I ask unanimous consent that an explanatory statement prepared by me in connection with the resolution be printed in the RECORD.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the explanatory statement will be printed in the RECORD.

The joint resolution (S. J. Res. 53) proposing an amendment to the Constitution of the United States providing for the direct popular election of President and Vice President, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on the Judiciary.

The explanatory statement, presented by Mr. HUMPHREY, is as follows:

STATEMENT BY SENATOR HUMPHREY

For 160 years, the United States has been hampered by an obstacle in the path of democratic selection of the Chief Executives. The system has persisted in spite of oft-repeated efforts to substitute more rational and democratic methods. Now, in a time when democracy is enduring its severest trial before the peoples of the world, the United States must perform the duties which it has assumed, and lead the free nations of the world in demonstrating that democracy is the best way.

The fundamental principle on which any democracy is founded is that the people governed shall have a voice, a controlling voice in their government. This means that they shall elect their public servants by popular vote, so that the servants are responsible to the people in the most direct way possible. It is also inherent in any democracy that all citizens shall have an equal voice in choosing their public servants. It is inconsistent with our principles that the votes of some of our citizens are worth twice, 5 times, or 10 times as much as others, merely due to their geographic distribution. It is even more inconsistent that in every presidential election, millions of votes are not counted at all. These inconsistencies are difficult to justify in the eyes of the world. The United States should meet the challenge, and reform its outmoded election system in order that it may better reflect the will of the people.

The electoral college system has many defects. Not only is it possible for a man to be elected President of the United States even though more Americans may have voted for his opponent, but this has happened three times in the short history of our country. In 1824, Andrew Jackson polled 50,000 votes more than his nearest rival, John Quincy Adams, but lacked a majority due to the votes received by two other candidates. The election was thrown to the House of Representatives under the provisions of the Constitution. There, through pressure and influence, Adams was chosen to be President.

Again in 1876, Samuel J. Tilden received almost 265,000 votes more than Rutherford B. Hayes. Hayes won the election, however, through a vote in the electoral commission set up to decide the contest.

In 1888, Grover Cleveland received 375,000 votes more than Benjamin Harrison but lost to Harrison through the peculiar distribution of votes in the electoral college.

These three men, Adams, Hayes, and Harrison, were all defeated in the popular election, but nevertheless became President. More voters preferred another candidate in each instance, but due to our election arrangement, the also-ran became the Chief Executive. How can we justly say we believe in majority rule unless we correct the situation which allows this possibility?

There are three factors which contribute to the possibility of a President being chosen without receiving more votes than any other candidate. The first of these factors is that all the electoral votes of a State are cast for the candidate that polls the greatest number of votes in the State. Thus, it makes no difference in the result of an election whether a candidate wins a State by a narrow margin or by a sweeping majority. The votes cast for the losing candidates in a State might just as well not have been cast at all. It is as if all the voters who did not vote for the winning candidate had been disfranchised. They might just as well have stayed at home. This may well be the cause of much apathy at election time in this country, particularly in the States which consisently vote one ticket year after year. There are an estimated 37 million people in the United States qualified to vote who do not choose to exercise this fundamental prerogative.

There are further statistics to show the unfortunate effects of the "all-or-nothing" rule, not as spectacular as electing the wrong President, but important nonetheless because they show that the electoral vote does not reflect the will of the people. In 1884, Cleveland received 563,084 popular votes in the State of New York and all of its electoral votes. In the same election, Blaine received 562,001 popular votes, only 1,083 fewer than Cleveland, but got none of the State's electoral votes. The electoral vote cast by the State seemed to indicate that New York was 100 percent behind Cleveland when in actuality, the margin between his support and Blaine's amounted to less than a tenth of a percent of the total vote cast.

In 1932, Herbert Hoover had 15,800,000 popular votes and of these, 13,600,000 brought no electoral votes due to their distribution among the States. Of Mr. Hoover's nearly 16 million votes, only 2 million were reflected in the electoral vote. In 1924, John W. Davis polled 6 million votes which were worthless to him for they brought no electoral votes, while 2 million other popular votes brought him 136 electoral votes. These 2 million votes were infinitely more valuable to Davis than the votes of 6 million other people who happened to be living in the wrong States to make their votes effective.

The second factor which contributes to the possibility of an also-ran becoming President of the United States is the fact that under the present electoral college system, each State is given a bonus of two electoral votes over the votes it has due to its population. There are 96 of these bonus votes distributed among the 48 States, and they give an unfair advantage to the voters who reside in the smaller States.

In 1950, the census showed the United States population to be 150,697,361. Thirty-eight States contained 70,453,399 people; the remaining 10 States contained 80,243,962 or 9,790,563 more than the 38 smaller States. But the 10 States have 20 automatic electoral votes while the 38 have 76 automatic votes. The 10 large States have over 6 million more people but 56 fewer electoral votes. The voters in the large States are penalized in that their votes don't count as much as those from the smaller States due to the two-vote bonus.

The third factor that contributes to the possibility that a President may be elected without having polled the most votes is the fact that a State casts the same number of electoral votes regardless of the number of people who turn out to vote. In the extreme case, a thousand people in New York could cast 47 electoral votes so long as no one else in the State bothered to vote. We don't have to go to the extreme case, however, to find extraordinary situations which actually existed. In the 1952 election, 1 electoral vote in Mississippi represented less than 36,000 popular votes due to the small election-day turnout, while in Minnesota 1 electoral vote represented more than 125,000 popular votes. The voter in Minnesota had less than one-third the importance in the final result as the voter in Mississippi. I am sure we all revere and respect the Mississippi voter, but there are few among us, I think, who will maintain that his judgment concerning who should be President is more than three times as astute as that of the Minnesota or Massachusetts voter.

The following table represents other instances of unequal representation which have actually occurred:

In 1912 Wilson received 1 elector per 14,500 votes; Taft received 1 elector per 435,000 votes.

In 1928 Hoover received 1 elector per 48,180 votes; Smith received 1 elector per 172,602 votes.

In 1932 Hoover received 1 elector per 267,149 votes; Roosevelt received 1 elector per 48,351 votes.

In 1948 Truman received 1 elector per 78,123 votes; Dewey received 1 elector per 113,990 votes.

In 1952 Stevenson received 1 elector per 306,646 votes; Eisenhower received 1 elector per 76,764 votes.

The best way to eliminate the possibility that a man will be elected President in spite of the will of the people is to conduct a general popular election for the position. This does away with all the factors which might contribute to the election of a man who has lost the general election. Under the constitutional amendment which I am introducing today, every voter casts one vote, a whole vote, which is just as good and just as important as the vote cast by any other voter in the country. This is the democratic way. This is what we are trying to convince the people of the world to do. This is, in reality, what is implied in the spirit of our Government. This is the final step in the constitutional evolution which began with the declaration that all men are created equal, and continued with the assertion that no man or woman may be denied the right to vote for arbitrary reasons. Now we must make the suffrage an equal suffrage, and repudiate arbitrary and discriminatory geographical bases for denying or reducing the importance of the votes of some of our citizens.

The electoral college also permits the majority will within a State to be ignored. The best an individual member of the electoral college can do is perform a function which could more efficiently be performed without him. The worst he can do is to refuse to vote as instructed by the voters of his State and substitute his own will for theirs. In 1948, electors of four States repudiated the Democratic candidate and cast ballots for the States rights candidate. One elector out of eleven from a fifth State, Tennessee, did the same in spite of an overwhelming victory of the Democratic candidate over the States rights candidate in that State. The electors are not legally bound to follow the dictates of their State's electorate, and are free to exercise their discretion as they see fit.

In 1796 three electors disregarded the mandate of the general election, with the result that John Adams rather than Thomas Jefferson was elected.

A whole State's citizenry may be disfranchised by the action of a handful of men. The sooner this possibility is removed from our election procedures, the better for the American people.

From the voters' point of view, the electoral college only adds to the confusion of election day. The voter wants to vote for the President and Vice President, not for a list of electors whose names he doesn't recognize. Yet in 10 States, only the names of the electors appear on the ballot. In 16 other States, the ballot includes both the names of the candidates and of the electors.

Another reason for abolishing the electoral college is the possible confusion which would result if an elector is unable to carry out the function for which he was chosen. Suppose he dies, or fails to cast his vote on the proper

day and in the proper way. Or suppose the presidential candidate to whom he is pledged becomes ineligible and the elector is freed from his pledge. All of these circumstances have occurred in our history and all of them could have been avoided if the electoral college had been abolished.

Direct popular election of the President and Vice President are not new concepts in our political philosophy. The father of the Constitution, James Madison, strongly favored direct popular election. The man whose counsel and philosophy guided the creation of the Constitution, Benjamin Franklin, also supported this form of election. Andrew Jackson, one of the great Presidents of our history who was more closely in touch with the will of the people than most emphasized in his first message to Congress the need for direct popular election as a method of democratizing the election process. At best, the electoral college system is the result of a crude compromise, a matter of necessity in order to unite the States at the time of the constitutional convention. At worst, it is a device originally created to remove from the hands of the people the selection of the country's Chief Executive. Do we still believe that we must compromise on an issue so basic in a democracy? Do we still believe that the people are not to be trusted in choosing their President?

The answer to both of these questions is clear and it is "No." We have shown countless times that we recognize that the country is strong when the voice of the people is heard. We have removed restrictions on the suffrage three times by constitutional amendment, in amendments 14, 15, and 19. In reality, these amendments did not extend the suffrage; they merely recognized contradictions of democracy in our country and removed the contradictions.

We must now continue in the pattern set by our enlightened predecessors, in the tradition of democracy. We must support a direct election of the President and Vice President, recognizing that the present system is defective in guaranteeing the democratic equality of all voters, and that this anachronism must be eliminated.

The process of election as it exists today, promotes an unusual and unfortunate emphasis in presidential campaigning. In the first place, most candidates concentrate on winning majorities in a few large States, realizing that even if these majorities are very slight, they will carry with them all the electoral votes in the States. These large States contribute a disproportionate number of votes in the electoral college and for this reason the campaigns are disproportionately directed toward these States. The voters in the smaller States are neglected and must choose between the candidates on insufficient evidence. Proof of this campaign emphasis exists in the fact that 17 out of 27 major party candidates for the Presidency since 1900 came from Ohio or New York. In the past 50 years, we have had 3 Presidents from New York and 3 from Ohio. In the past 70 years, only twice has a President been elected without winning a majority in the State of New York.

I don't mean to detract from the caliber of the Presidents and candidates produced by New York and Ohio, and several of the other large States. However, I would venture to say that there have been other possible candidates from smaller States who weren't given the consideration that might have been due them because of their geographic position. On the other hand, citizens of the smaller States who are not the beneficiaries of vigorous campaigning are often apathetic about voting. We have a nonvoting population of 37 million, an extraordinarily large percentage for a free Republic.

Another factor in the peculiar emphases of our campaigns is the unusual importance of minority groups in large doubtful States. Often, Presidential candidates must give these groups far more consideration than is healthy in a democracy where the majority is supposed to rule. That minorities can exert an important influence is clearly shown in the election of 1948, when the Progressive Party polled enough votes to swing two important States to the Republican candidate. I use this example because it is one of the few cases where the effect of the vote of a political minority group can be accurately shown. It is more difficult to study the voting patterns of other minority groups because under the secret ballot these votes cannot be separated in the final election returns. However, there is no doubt that certain minority groups receive special treatment in Presidential campaigns, and we can be sure that this is not without good reason.

A direct Presidential election is needed, then, for many reasons, but all of the reasons are derived from the principle that all votes cast should have equal importance in deciding who is to be President. This principle is basic in our democracy as well as in any other democracy. It means not only that all the votes case will have the same mathematical importance, but that all votes will be the end product of virtually the same opportunity of choice, as far as possible.

It is our duty to the world as well as to our citizens to perfect our form of democracy until it is beyond the criticism of principle without execution. We must be the example to the free world not only in our words and ideas, but in our actions and our conduct. We must mean what we say when we dedicate ourselves to a government in which its strength, integrity, and sovereignty are those of its people, as expressed in free, untrammeled elections.

ANNUAL CONSOLIDATED GENERAL APPROPRIATION BILL

Mr. BYRD. Mr. President, on behalf of myself, the Senator from Kentucky [Mr. CLEMENTS], the Senator from New Mexico [Mr. ANDERSON], the Senator from Wyoming [Mr. BARRETT], the junior Senator from Ohio [Mr. BENDER], the Senator from Utah [Mr. BENNETT], the junior Senator from Nevada [Mr. BIBLE], the senior Senator from Ohio [Mr. BRICKER], the Senator from New Hampshire [Mr. BRIDGES], the senior Senator from Connecticut [Mr. BUSH], the Senator from Maryland [Mr. BUTLER], the senior Senator from Indiana [Mr. CAPEHART], the junior Senator from Kansas [Mr. CARLSON], the junior Senator from Nebraska [Mr. CURTIS], the Senator from Texas [Mr. DANIEL], the junior Senator from Illinois [Mr. DIRKSEN], the senior Senator from Illinois [Mr. DOUGLAS], the junior Senator from Pennsylvania [Mr. DUFF], the senior Senator from North Carolina [Mr. ERVIN], the Senator from Vermont [Mr. FLANDERS], the Senator from Arizona [Mr. GOLDWATER], the senior Senator from Missouri [Mr. HENNINGS], the Senator from Iowa [Mr. HICKENLOOPER], the senior Senator from Nebraska [Mr. HRUSKA], the Senator from New York [Mr. IVES], the junior Senator from Indiana [Mr. JENNER], the Senator from Tennessee [Mr. KEFAUVER], the junior Senator from Massachusetts [Mr. KENNEDY], the Senator from California [Mr. KUCHEL], the senior Senator from Nevada [Mr. MALONE], the senior Senator from Pennsylvania [Mr. MARTIN], the Senator from Wisconsin [Mr. MCCARTHY], the Senator from South Dakota [Mr. MUNDT], the junior Senator from Maine [Mr. PAYNE], the junior Senator from Connecticut [Mr. PURTELL], my colleague the junior Senator from Virginia [Mr. ROBERTSON], the senior Senator from Massachusetts [Mr. SALTONSTALL], the senior Senator from Kansas [Mr. SCHOEPPEL], the junior Senator from North Carolina [Mr. SCOTT], the senior Senator from Maine [Mrs. SMITH], the Senator from New Jersey [Mr. SMITH], the junior Senator from Missouri [Mr. SYMINGTON], the Senator from South Carolina [Mr. THURMOND], the Senator from Minnesota [Mr. THYE], the Senator from Idaho [Mr. WELKER], and the Senator from Delaware [Mr. WILLIAMS], I submit, for appropriate reference, a concurrent resolution providing for annual consolidated appropriation bills. I ask unanimous consent that a statement prepared by me in connection with the concurrent resolution be printed in the RECORD.

The PRESIDENT pro tempore. The concurrent resolution will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The concurrent resolution (S. Con. Res. 15), submitted by Mr. BYRD (for himself and other Senators), was received and referred to the Committee on Rules and Administration, as follows:

Resolved by the Senate (the House of Representatives concurring), That effective on the first day of the second regular session of the 84th Congress, the joint rule of the Senate and of the House of Representatives contained in section 138 of the Legislative Reorganization Act of 1946 is amended by adding at the end thereof the following new subsections:

"(c) (1) All appropriations for each fiscal year shall be consolidated in one general appropriation bill to be known as the Consolidated General Appropriation Act of —— (the blank to be filled in with the appropriate fiscal year). The consolidated general appropriation bill may be divided into separate titles, each title corresponding so far as practicable to the respective regular general appropriation bills heretofore enacted. As used in this paragraph, the term 'appropriations' shall not include deficiency or supplemental appropriations, appropriations under private acts of Congress, or rescissions of appropriations.

"(2) The consolidated general appropriation bill for each fiscal year, and each deficiency and supplemental general appropriation bill containing appropriations available for obligation during such fiscal year, shall contain provisions limiting the net amount to be obligated during such fiscal year in the case of each appropriation made therein which is available for obligation beyond the close of such fiscal year. Such consolidated general appropriation bill shall also contain provisions limiting the net amounts to be obligated during such fiscal year from all other prior appropriations which are available for obligation beyond the close of such fiscal year. Each such general appropriation bill shall also contain a provision that the limitations required by this paragraph shall not be construed to prohibit the incurring of an obligation in the form of a contract within the respective amounts appropriated or otherwise authorized by law, if such con-

tract does not provide for the delivery of property or the rendition of services during such fiscal year in excess of the applicable limitations on obligations. The foregoing provisions of this paragraph shall not be applicable to appropriations made specifically for the payment of claims certified by the Comptroller General of the United States and of judgments, to amounts appropriated under private acts of Congress, to appropriations for the payment of interest on the public debt, or to revolving funds or appropriations thereto.

"(3) The committee reports accompanying each consolidated general appropriation bill, and and conference report thereon, shall show in tabular form, for information purposes, by items and totals—

"(A) the amount of each appropriation or other budgetary authorization for expenditure including estimates of amounts becoming available in the fiscal year under permanent appropriations;

"(B) estimates of the balances of appropriations and other budgetary authorizations for expenditure as of the beginning of the fiscal year, other than the obligated balances of expired appropriations;

"(C) estimates of the net amount to be expended in the fiscal year from each appropriation or other budgetary authorization for expenditure referred to in clause (A);

"(D) estimates of the net amount to be expended in the fiscal year from the balances of appropriations and other budgetary authorizations for expenditure referred to in clause (B);

"(E) estimates of the net amount to be expended in the fiscal year from revolving and management funds, other than expenditures referred to in clauses (C) and (D);

"(F) the totals of the amounts referred to in clauses (C), (D), and (E); and

"(G) estimates of the total amount which will be available for expenditure subsequent to the close of the fiscal year from the appropriations and other budgetary authorizations for expenditure referred to in clause (A).

The committee reports accompanying each deficiency and supplemental appropriation bill containing appropriations available for obligation or expenditure during the fiscal year, and each appropriation rescission bill, and any conference report on any such bill, shall include appropriate cumulative revisions of such tabulations.

"(4) The information reported under paragraph (3) shall be accompanied by (i) data on revolving and management funds (including the funds of wholly owned Government corporations) which shall show the gross amounts from which the net amounts estimated to be expended are derived, and information on estimated investments, repayment of capital, payment of dividends, and other cash transactions which do not affect net expenditures; and (ii) such supplemental data as may be considered desirable by the committee making the report.

"(5) The provisions of paragraphs (2), (3), and (4) shall not be applicable to appropriations of trust funds or to transactions involving public-debt retirement.

"(6) No general appropriation bill shall be received or considered in either House unless the bill and the report accompanying it conform with this rule.

"(7) The Appropriations Committees of the two Houses may hold hearings simultaneously on each general appropriation bill or may hold joint hearings thereon.

"(d) The consolidated general appropriation bill for each fiscal year, and each deficiency and supplemental general appropriation bill containing appropriations available for obligation during such fiscal year, shall at the time the bill is reported to the House of Representatives and to the Senate contain in the body of the bill or in a preamble thereto, as the respective committees may deem appropriate, a current estimate of the Secretary of the Treasury of the overall Federal receipts for such fiscal year."

The statement presented by Mr. BYRD is as follows:

STATEMENT BY SENATOR BYRD

Forty-six Members of the Senate today joined in the introduction of a bill to establish procedures by which Congress could regain control of annual obligations for Federal expenditure.

This approach to the recapture of fiscal control would be accomplished by provisions in the bill under which Congress annually would fix limitations on obligations for expenditure by Federal agencies from balances they have built up in appropriations previously enacted for them as well as obligations against new authorizations in current appropriation bills.

The importance of expenditures from balances in old appropriations, over which Congress has been exercising virtually no control, is emphasized by the following facts to be found in the Federal Budget Document of January 17:

1. The President estimated expenditures in the next fiscal year, beginning July 1, at $62.4 billion.

2. The President estimated that, of the $62.4 billion total expenditures, only $37.9 billion will be from the $58.6 billion he requested in new appropriations and other authorizations to be enacted this year.

3. The President estimated that $24.5 billion of the total expenditures will be from the $82 billion in balances of old appropriations and other authorizations, enacted in previous years, which are to be carried over into the new year.

Under present practices, Congress ordinarily acts only on new appropriations requested, without exercising control over expenditures from balances in old appropriations which are to be carried over.

To attempt to balance the budget by action only on that part of new appropriations for expenditure in the coming year would require excessively heavy reductions on half of the expenditure budget, while that part to be spent from old appropriations would be largely exempt even from review for reduction.

Sponsors of this bill do not claim it is the complete solution to the tail-wagging-the-dog situation created by uncontrolled expenditure from tremendous carryover balances, but, among other reforms in fiscal legislative procedure, it is largely directed at this problem.

Provisions of the bill may be divided generally into three parts:

1. They would provide that Congress consider all appropriations in one package, instead of a dozen scattered, unrelated bills as at present, so Members and the public can see the whole picture as the spending side of the budget is enacted.

(The so-called single appropriation bill of 1950 merely collected all of the regular appropriations between two covers of the bill, and that was as far as its similarity to this proposal went.)

2. They would provide that Congress shall write into the appropriation bill, against all items involved, limitations on annual obligations for expenditure from all appropriations—those previously enacted as well as those currently under consideration.

(The importance of provisions in this category may be seen from the fact that as of next June 30 the build-up of unexpended balances in old appropriations and authorizations will exceed $80 billion. While a large part of this total will be called "obligated," the validity of some of the so-called obligations should be subject to scrutiny in review.)

(It should be noted also that it is annual expenditure—not annual appropriations—against annual revenue which result in annual deficits or surpluses; and that it is annual deficits which pile up public debt.)

3. They would provide also that committee reports on appropriation bills shall show annual expenditure estimates which could be compared with revenue estimates, and that revised revenue estimates shall be requested from the Treasury from time to time during the consideration of the bill, so that the budget may be kept in balance during the process of appropriation bill enactment.

The language of this bill is practically identical with that of Senate Concurrent Resolution 8 of the past session of Congress, frequently referred to as the "single appropriation bill."

This bill originally was drafted in 1947 when it first became evident that, even under peacetime conditions, Congress was losing annual control over Federal expenditures.

The bill is designed to recapture a measure of that control, through its obligation limitation features, and at the same time provision would be made for necessary long-term contracts such as those required for heavy and intricate military equipment.

The language of the bill has been carefully worked over by fiscal experts and drafting technicians, and it has been approved four times by the Senate Rules Committee, twice with a Republican majority, and twice with a Democratic majority. It has been passed twice by the Senate as a whole.

EXTENSION OF TRADE AGREEMENTS ACT—AMENDMENT

Mr. CAPEHART submitted an amendment, intended to be proposed by him to the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, which was referred to the Committee on Finance, and ordered to be printed.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. HILL:

Address entitled "Education: Democracy's Indispensable Weapon," delivered by him before the convention of the American Association of School Administrators, at St. Louis, Mo., on February 28, 1955.

By Mr. KEFAUVER:

Address delivered by him before the Rotary Club of Memphis, Tenn., on Tuesday, March 1, 1955.

By Mr. WILEY:

Address delivered by him at Stephens College, Missouri, on February 22, 1955.

By Mr. CURTIS:

Statement prepared by him entitled "The Republican Valley Conservation Association."

By Mr. CARLSON:

Address entitled "Peace Through Power," delivered by the Assistant Secretary of Defense Fred A. Seaton at Kansas State College, Manhattan, Kans., February 9, 1955.

By Mr. CAPEHART:

Statement in commemoration of centenary of St. Mary's College, near South Bend, Ind.

NOTICE OF HEARING ON SENATE JOINT RESOLUTIONS 3, 9, 10, 27, 30, AND 31, PROPOSING AMENDMENTS TO THE CONSTITUTION RELATIVE TO THE ELECTION OF PRESIDENT AND VICE PRESIDENT

Mr. KEFAUVER. Mr. President, on behalf of the Standing Subcommittee on Constitutional Amendments of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Wednesday, March 16, 1955, beginning at 10 a. m., in room 424, Senate Office Building, on Senate Joint Resolution 3, Senate Joint Resolution 9, Senate Joint Resolution 10, Senate Joint Resolution 27, Senate Joint Resolution 30, and Senate Joint Resolution 31, resolutions proposing an amendment to the Constitution relative to the election of President and Vice President. At the indicated time and place all persons interested in this legislation may make such representations as may be pertinent. The subcommittee consists of myself, chairman, the Senator from Missouri [Mr. HENNINGS], the Senator from Texas [Mr. DANIEL], the Senator from North Dakota [Mr. LANGER], and the Senator from Illinois [Mr. DIRKSEN].

NOTICE OF HEARING ON SENATE JOINT RESOLUTION 8, TO AMEND THE CONSTITUTION TO AUTHORIZE GOVERNORS TO FILL TEMPORARY VACANCIES IN THE CONGRESS CAUSED BY A DISASTER

Mr. KEFAUVER. Mr. President, on behalf of the standing Subcommittee on Constitutional Amendments of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Tuesday, March 15, 1955, at 10:30 a. m., in room 424, Senate Office Building, on Senate Joint Resolution 8, a resolution to amend the Constitution to authorize governors to fill temporary vacancies in the Congress caused by a disaster. At the indicated time and place all persons interested in the proposed legislation may make such representations as may be pertinent. The subcommittee consists of myself, chairman; the Senator from Missouri [Mr. HENNINGS]; the Senator from Texas [Mr. DANIEL]; the Senator from North Dakota [Mr. LANGER]; and the Senator from Illinois [Mr. DIRKSEN].

NOTICE OF HEARINGS ON CERTAIN NOMINATIONS BY COMMITTEE ON FOREIGN RELATIONS

The PRESIDENT pro tempore. As a Senator and chairman of the Committee on Foreign Relations, the Chair desires to say that the Senate received today the nomination of William A. Kimbel, of South Carolina, to be the representative of the United States of America to the Tenth Session of the Economic Commission for Europe of the Economic and Social Council of the United Nations. Notice is hereby given that this nomination will be considered by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

The Senate also received today the nomination of Kingsley Davis, of New York, to be the representative of the United States of America on the Population Commission of the Economic and Social Council of the United Nations for a term of 3 years expiring December 31, 1957. Notice is also given that this nomination will be considered by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

NINETEEN HUNDRED AND FIFTY-FOUR AWARDS OF FREEDOM'S FOUNDATION

Mr. WILEY. Mr. President, I know that the Congress read with pleasure on Saturday, February 20, the news from historic Valley Forge, Pa., of the 1954 Freedom's Awards, made by the Freedom's Foundation.

This distinguished foundation has given tremendous new impetus to patriotic observance and rededication throughout our country.

I have prepared a statement on this subject, and ask unanimous consent that it be printed at this point in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WILEY

Under its charter, Freedom's Foundation at Valley Forge exists for the following purpose:

"To create and build an understanding of the spirit and philosophy of the Constitution and Bill of Rights and of our indivisible bundle of political and economic freedoms inherent in them.

"To inspire love of freedom and to support the spiritual unity born of the belief that man is a dignified human being, created in the image of his Maker, and by that fact possessor of certain inalienable rights."

NOTABLE OFFICERS, TRUSTEES, AND DIRECTORS

The distinguished officers, trustees, and board of directors of the foundation indicate the high caliber of this great organization. I should like now to list these outstanding individuals:

FREEDOM'S FOUNDATION AT VALLEY FORGE

Honorary Officers

Hon. Dwight D. Eisenhower, honorary chairman; Hon. Herbert Hoover, honorary president.

Officers and Trustees

Kenneth D. Wells, president and trustee; Don Belding, chairman of directors and trustee; Charles E. White, trustee; Fred Maytag II, trustee; William C. McCord, treasurer and trustee.

Board of Directors

Kenneth W. Akers, Cleveland, Ohio; Dr. Raymond B. Allen, Los Angeles, Calif.; George D. Bailey, Detroit, Mich.; Mrs. Olive Ann Beech, Wichita, Kans.; Don Belding, Los Angeles, Calif.; Mrs. Lewis H. Brown, New York; Erwin D. Canhan, Boston, Mass.; Colby M. Chester, New York; Paul Foster Clark, Boston, Mass.; William Robertson Coe, New York; James Cope, Detroit, Mich.; James W. Cothran, Bishopville, S. C.; Nathan L. Dauby, Cleveland, Ohio; Edward M. Dealey, Dallas, Tex.; George S. Dinwiddie, New Orleans, La.; Dr. Milton S. Eisenhower, State College, Pa.; Dr. Fred D. Fagg, Los Angeles, Calif.; Adrien Falk, San Francisco, Calif.; Hon. James A. Farley, New York; Walter D. Fuller, Philadelphia, Pa.

Fred G. Gurley, Chicago, Ill.; Dr. John Robbis Hart, Valley Forge; Maj. Gen. Harlan N. Hartness, Ophelia, Va.; Hon. Charles R. Hayes, Deadwood, S. Dak.; Rev. Theodore M. Hesburgh, C. S. C., Notre Dame, Ind.; Conrad N. Hilton, Beverly Hills, Calif.; Mrs. Clifford F. Hood, Pittsburgh, Pa.; Edward F. Hutton, New York; Dr. Raymond E. Jackson, Buffalo, N. Y.; Dr. Albert C. Jacobs, Hartford, Conn.; Dr. Robert L. Johnson, Philadelphia, Pa.; Dr. Clarence A. Manion, Chicago, Ill.; Fred Maytag II, Newton, Iowa; Dr. Kevin McCann, Defiance, Ohio; William C. McCord, Detroit, Mich.; Rt. Rev. Msgr. John S. Middleton, New York; Thomas E. Millsop, Weirton, W. Va.; Clint W. Murchison, Dallas, Tex.; John P. Murphy, Cleveland, Ohio; Graham Patterson, Philadelphia, Pa.

Mrs. James B. Patton, Columbus, Ohio; Mrs. J. Howard Pew, Ardmore, Pa.; Henning W. Prentis, Jr., Lancaster, Pa.; Sid. W. Richardson, Fort Worth, Tex.; Jackie Robinson, New York; Miss Ginger Rogers, Beverly Hills, Calif.; Hon. George Rossman, Salem, Oreg.; Dr. Guy M. Rush, Los Angeles, Calif.; Dr. Norman Salit, New York; Alfred P. Sloan, Jr., New York; Herbert E. Smith, New York; Faustin J. Solon, Toledo, Ohio; Dr. Harold E. Stassen, Washington; Arthur W. Steudel, Cleveland, Ohio; Reese H. Taylor, Los Angeles, Calif.; Hon. William Glenn Terrell, Tallahassee, Fla.; Mrs. Robert A. Vogeler, Bedford Hills, N. Y.; Kenneth D. Wells, Valley Forge; Hon. Carl V. Weygandt, Columbus, Ohio; Charles M. White, Cleveland, Ohio.

SOME OF THE TOP AWARDS

The awards themselves were numerous.

Their very comprehensiveness indicates how clearly the foundation's guiding hands have understood that the challenge to America must be met in every field of endeavor, in every media of communication, in every phase of American society—religion, education, business, labor, civic activity, and many others.

While I cannot, of course, attempt to list all of the awards, I should like to mention just a few highlights of them without in any way detracting from all the other groups and individuals who were honored by other prizes.

SPLENDID AWARDS JURY

I may say that these annual awards are a highlight each year of patriotic American's admiration of noble contributions to the cause of service of country.

I have been pleased to be in contact down through the years with Mr. W. C. "Tom" Sawyer, vice president in charge of the national awards program and former director of the Americanism division of the American Legion.

I am happy to note that the 1954 national and school awards jury represented as usual a cross-section of outstanding American organizations and individuals. Among them, I am glad to say was a notable jurist of my own State, member of the Supreme Court of Wisconsin, the Honorable Roland J. Steinle.

The list of the awards jury now follows:

THE DISTINGUISHED 1954 NATIONAL AND SCHOOL AWARDS JURY OF FREEDOMS FOUNDATION AT VALLEY FORGE

Chairman: Dr. George D. Humphrey, president, the University of Wyoming.

Coordinator: Hon. Charles R. Hayes, retired presiding judge, Supreme Court of South Dakota.

Col. Walter C. Bowman, national commander, Military Order of the Purple Heart.

Mrs. Theodore S. Chapman, president, General Federation of Women's Clubs.

Mr. Thomas J. Cuite, national commander, Catholic War Veterans of the U. S. A.

Col. William B. Freeland, member, National Council, Reserve Officers Association of the United States, Inc.

Hon. Frederick G. Hamley, Chief Justice elect, Supreme Court of Washington.

Hon. W. W. Harvey, Chief Justice, Supreme Court of Kansas.

Hon. W. Marion Hendry, past national commander, Coast Guard League.

Mrs. Mae Holmes, national commander, Disabled American Veterans Auxiliary.

Mrs. Thomas F. Holz, national president, Ladies Auxiliary to the Veterans of Foreign Wars of the U. S.

Hon. Ernest A. Inglis, Chief Justice, Connecticut Supreme Court of Errors.

Mrs. Pauline M. Kelly, national commander, Navy Mothers' Clubs of America.

Miss Bertha M. Luckey, president, Quota Club International.

Mr. Tag Manning, first vice president, 20–30 International.

Hon. James Morris, Chief Justice, Supreme Court of North Dakota.

Mr. Nicholas C. Mueller, international vice president, Optimist International.

Hon. M. T. Phelps, Chief Justice, Supreme Court of Arizona.

Mr. Jay A. Pound, national president, American War Dads, Inc.

Dr. Dorothea F. Radusch, international president, Zonta International.

Dr. Carl J. Rees, vice commander, the American Legion.

Mr. George K. Shamgochian, national commandant, Marine Corps League.

Hon. Roland J. Steinle, Justice, Supreme Court of Wisconsin.

Mrs. Sara E. Stone, national president, National Ladies Auxiliary, Jewish War Veterans of the U. S.

Mrs. Louise Tegeler, national vice councilor, Daughters of America.

Mr. Lloyd Thurston, commander, United Spanish War Veterans.

Hon. Walter L. Tooze, Acting Chief Justice, Supreme Court of Oregon.

Hon. Frank L. Wilkinson, general president, the General Society, Sons of the Revolution.

Mr. R. Clarence Williams, president-elect, Civitan International.

Here then are a few of the fine awards:

A special award went to Rev. Billy Graham for his famed evangelistic efforts, and to St. John's University, whose faculty group has written the volume Concept of Freedom.

Top general awards went to the All-American Conference to Combat Communism (composed of America's leading fraternal, veterans, womens, patriotic, civic, religious, and other groups) for the AAC's Know Your America Week program; to the Hawaiian Residents' Association, Inc., for its three-fold program of combating communism, promoting racial harmony, and demonstrating and maintaining the American way of life; and to Kiwanis International for its Minutemen for Americanism program.

Top magazine article award went to Henry Lee, of Stamford, Conn., and of the New York Daily News, for his memorable article in Collier's magazine entitled "Our Lives, Our Fortune, and Our Sacred Honor." The article depicted the ultimate fate of the patriots who risked everything in their signing of the Declaration of Independence.

Top award in 16-millimeter motion pictures went to the Chamber of Commerce of the United States for its splendid film, It's Everybody's Business.

Top television award went to America's electric light and power companies for one of the programs in their highly esteemed CBS series, You Are There. This program, Resolve of Patrick Henry, reenacted the scene on March 23, 1775, when the indomitable Patrick Henry led the gallant sons of Virginia in taking their stand on behalf of separation from the crown.

WISCONSIN WINNERS

We, of Wisconsin, are pleased to note the numerous winners from our own State, and I should like now to include the text of an article which appeared in the February 20 Milwaukee Journal listing the seven Wisconsin award recipients:

"FREEDOM AWARDS TO SEVEN IN STATE

"Mrs. Florence V. Beadle of 3057 N. Sherman Blvd., was one of seven Wisconsin residents who won 1954 Freedom awards, the Freedoms Foundation announced Saturday at Valley Forge, Pa. Eight Wisconsin companies, schools, and corporations also were honored.

"Mrs. Beadle won an honor certificate award for her work as editor of the Geuder, Paeschke & Frey Co. publication, As We See It. Her company also won an honor certificate.

"Other Wisconsin award winners:

"George B. Thacher, Madison, honor award certificate for work as editor of Wisconsin Power & Light Co. publication. The company also won an honor certificate.

"Rita Middleton, Germantown, second place award for untitled essay, $50 and George Washington medal; Kaukauna High School, honor award certificate; Wisconsin department, American Legion, George Washington medal award for community programs; Rodney Jonathan Crook, Mineral Point, second place in general category, $50 and George Washington medal; Laboratory School, Platteville State College, George Washington medal.

"Elaine M. Kitto, Racine, honor certificate award for work as editor of Belle City Malleable Iron Co. publication. The company also won an honor certificate.

"William Johnson, Racine, honor certificate award for work as editor of J. I. Case Co. publication. The company won the same award.

"The Reverend Edwin Jaster, Racine, George Washington honor medal for 16-millimeter motion picture, An Adventure in Freedom, and Waupaca city schools, George Washington medal.

"The foundation also announced a series of awards, totaling $20,000, for college journalism students. There will be 100 awards of $100 each and 20 fellowship awards of $500 each. Students aiming at a career in journalism will be invited to submit two papers for judging by the Freedoms Foundation. The first will be a monograph on the American way of life, the second an editorial on some facet of the American way of life."

CONCLUSION

To all the individuals who were honored by awards, as well as to those whose efforts were considered but did not receive a prize, I want to convey best wishes for their patriotic resolve.

And I want to renew my greetings to all the participants in the work of Freedom's Foundation.

They are carrying on today the noble traditions which were first established by George Washington and his valiant soldiers of the Continental Army in the dark days of 1777–78, when the very life of America hung in the balance.

Today, once more, the same type of dedication is necessary in the face of a challenge even greater to our own country and to the world—the challenge of aggressive, atheistic, international communism.

Just as the enemies of America would like to assault us from abroad and to try to divide us at home by their alien propaganda in every segment of society, so the protectors of America, the sustainers of America, the guardians of America, must protect us to the limit of their ability in every sphere. They must encourage eternal vigilance, must generate right thinking and right action, promote the brotherhood of man and faith in the Fatherhood of God.

FIFTIETH ANNIVERSARY OF JOURNALISM SCHOOL OF UNIVERSITY OF WISCONSIN

Mr. WILEY. Mr. President, last Saturday in Madison, Wis., there occurred a memorable dinner marking the 50th anniversary of journalism teaching at the University of Wisconsin. The dinner climaxed a 2-day golden anniversary program, which included seminars on news reporting, circulation, and advertising. The program honored what is generally regarded as the oldest continuously operated school of journalism in American higher education.

There were many scoffers and skeptics when the late Dr. Willard Grosvenor Bleyer opened the first journalism class in the fall of 1905. Many outstanding leaders in journalism of that day scoffed at the idea that journalism could be taught in school; they insisted it had to be taught in a city room, or on the police beat, or only in other actual practice.

But in the half century which has followed, the teaching of journalism has become an indispensable segment of the American fourth estate, and of higher education as well.

The 50th anniversary dinner at Madison heard a significant address on the subject of Secrecy in Government delivered by the noted newspaper columnist, an alumnus of the university's school of journalism, Mr. Marquis Childs. Mr. Childs, a 1923 graduate, was 1 of 6 alumni who received citations for distinguished achievement. The citations were presented by the university president, E. B. Fred.

Others who received the awards were: Irwin Maier, publisher of the Milwaukee Journal; Lloyd Lehrbas, Assistant to the Secretary of the Army; Kenneth W. Payne, executive editor of the Reader's Digest; Louis P. Lochner, author and former foreign correspondent; and Walter Seiler, president of Cramer-Krasselt Co., Milwaukee advertising agency.

I desire to convey to the faculty and students of the school of journalism my warmest wishes and, in particular, to the editors and staff of the Daily Cardinal, my special greetings for their actual demonstration, famed throughout the Nation, of modern university journalism.

May the next 50 years be as rich with achievement as the past 50 have been for this great school, and may the American fourth estate continue to prosper as one of the great sentinels of American freedom and a vital check and balance in the American process.

THE FORMOSA SITUATION

Mr. LEHMAN. Mr. President, like most of the people of our country and many of our friends abroad, I continue to be deeply concerned with regard to the Formosa situation. I have made my views and my fears clear in several speeches in the Senate when the Formosa resolution and the treaty with Chiang Kai-shek were before us. For the reasons set forth in my remarks, I voted against both the resolution and the treaty.

The situation is so explosive and dangerous that it should, and must, continue to engage the attention and study of all our people. Unfortunately, however, our people have so little knowledge of what our policy actually is that they are thoroughly confused and greatly disturbed. Last Tuesday night I listened to a telecast on the Edward R. Murrow See It Now program. It was an interview with Chiang Kai-shek, by our colleague the senior Senator from Maine. General Chiang Kai-shek made it completely clear that the aim of this country and that of Chiang Kai-shek were in wide divergence. Our announced policy is to defend Formosa and the Pescadores Islands. Chiang's intention, which he again announced is to seize and return to the mainland of China. I do not believe that these conflicting aims can be reconciled without our courting serious danger, and possibly disaster.

I ask unanimous consent to have printed at this point in the body of the RECORD, as a part of my remarks, an article, written by the distinguished columnist and author, Joseph Alsop, entitled "The Fix We're In," and an editorial, which appeared in the Washington Post and Times Herald on February 26, entitled "What's Clear About It?" The article and the editorial are thoughtful and highly important analyses of the dangerous situation which we are confronted. I commend them to the careful reading and study of the Members of the Senate and of the people of the country generally.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

[From the New York Herald Tribune of February 25, 1955]

THE FIX WE'RE IN

(By Joseph Alsop)

TAIPEI, FORMOSA.—It is high time for people at home to face the full seriousness of the fix we are in out here in Asia. The leaders of world communism are now conducting an elaborate nerve war on the Formosa issue. It may be the prelude to a decisive showdown. Or it may only be intended to put the courage of the members of the Western Alliance to an acid test.

Either way, the danger to the United States is incalculably great. For the Eisenhower administration's foreign and defense policies have painted the United States into an almost inescapable corner in Asia.

For 2 years, Washington has paid no attention to the prejudices that hagride the Formosa issue in Britain and Western Europe. Only last week, Secretary Dulles' important speech received the usual acknowledgments—jubilation from Senator KNOWLAND and doleful cries from London.

Even now, no serious effort is being made to form a united front in Asia with our allies. Thus the Communist nerve war has an excellent chance of isolating America on the issue of this controversial island.

This would not be so disturbing, if the Eisenhower administration had ever bothered to match its bold talk with an equally bold defense policy. From Korea onward, there has been a good case for going it alone to halt Communist aggression in Asia. But going it alone costs a lot of money for defense; and our defense policy has been made in the Treasury Department.

The result of simultaneous efforts to please Senator KNOWLAND and Secretary of the Treasury Humphrey is the fix we are in. The key to that fix, well known to the world Communist leaders but concealed from our own people, is the present status of the American Strategic Air Command.

Our main weapon and almost our only offensive weapon squarely depends upon its trans-Atlantic bases. The Strategic Air Command's trans-Atlantic bases are controlled, not by us, but by our allies. If our allies part from us over Formosa, the bases will be denied to SAC. And if the bases are denied, SAC will still be able to fight, but SAC will be unable to strike the immediate, decisive blow that it is SAC's vital job to strike.

In fact you can express the practical effects of the successful isolation of America in a crude equation. It equals denial of the trans-Atlantic bases which equals the destruction of about half of General LeMay's airplanes before the shooting even starts.

Consider the shock, if the news came over the radio that half the great SAC force had just been destroyed by saboteurs. Imagine how the country would then feel about a final show-down with Red China and the Soviet Union. And despite the loud denials that will be heard from the Defense Department, remember that this will approximate the real situation if the Communists win their nerve war.

These are the points that must be borne in mind, in weighing the present crisis. It is certainly conceivable that the Communist leaders seriously want a final show-down on Formosa, if they can just contrive to isolate America and thus to bend and blunt our main weapon.

Molotov's grim speech seemed to say as much. German rearmament provides a possible motive. And if the masters of the Kremlin really prefer fighting America to seeing Germany rearmed, the ideal place to start the war is here in Asia, where there is such a gaping hole in the Western Alliance.

It is much more likely that the Communist leaders mean to carry their nerve war only as far as the nerve-shattering brink of final catastrophe. Even so, as matters stand now, they will still have a good chance of isolating America. And how will President Eisenhower choose, when he is not quite sure the enemy is really bluffing, and he has to make the choice between backing down on Formosa or risking a big war with his main weapon half broken in his hand?

There would be no need to ask such questions if we had pursued a different defense policy. But the only course now open is to take out disunity insurance. Let the American Government, then, make a little speech to the British Government:

"We will not abandon Formosa, because Formosa is strategically vital and such a surrender would bring the loss of all of Asia in its train. But if you can get a cease-fire down the middle of the Formosa Strait in exchange for Quemoy and the Matsus, we will back you all the way. You have carte blanche to make a trade. On the other hand, if you cannot make a trade, we think it means the enemy intends to fight anyway. Then we see no reason to give away the offshore islands. And we hope you will back us."

This would outrage Senator KNOWLAND, not to mention the same newspapers and magazines which have professed to see perfection in the defense policy that has put us in our present fix. But it would also get us out of the fix. For such a gesture would give Prime Minister Churchill and Foreign Secretary Eden just the help they need in their rather courageous efforts to cope with British public opinion. It would almost certainly prevent the isolation which is now the great danger. And in the end, even those who dislike the cease-fire idea would probably be happy. For there is no reason to suppose that the terms which would restore Western unity would be accepted by the Communists.

[From the Washington Post and Times Herald of February 26, 1955]

WHAT'S CLEAR ABOUT IT?

The frequency with which the Chinese Communists are warning sundry diplomats in Peking that they intend to invade Formosa has all the earmarks of a war of nerves. If the threat is a bluff, it is a rather foolish one; for either the Communists will have to produce or they will have to acknowledge that it is a bluff and thereby lose face. Most observers seem to feel that the Communists do not want a conflict in advance of the Afro-Asian conference in April. It is, of course, more than possible that what they have in mind is a subversive coup on Formosa stimulated by propaganda and intimidation—a problem that was not contemplated in the Formosa defense pact.

Admiral Radford says flatly in an interview in U. S. News & World Report that the Chinese "do not have the military capability" to carry out a successful invasion of Formosa at this time. This judgment would be more convincing if it were not accompanied, in the same interview, by a lot of misleading gloss about the relationship of the Joint Chiefs of Staff to other aspects of national policy—particularly the proposed intervention at Dien Bien Phu last spring. Let us hope that Admiral Radford's estimate of the Chinese capabilities is right. Even if the Chinese do not mean what they say about Formosa, however, this does not rule out an attack on the Quemoys and Matsus that could lead to larger war.

In the event of an attack on Formosa, the United States probably could count on at least the moral support, and perhaps some physical support, from the western allies. Prime Minister Churchill intimated as much the other day at the same time that he made clear Britain's disagreement with the American position respecting the Quemoys and Matsus. These islands are the immediate problem. What will the United States do in the event of a Communist attack on these coastal outposts?

The Quemoys and Matsus have none of the collective guarantees of the SEATO pact, which the conferees at Bangkok seem to have made some solid progress in defining. The islands are, in fact, only obliquely related to the defense of Formosa, and they are poor places to fight. Unhappily, the administration has maneuvered itself into a position in which, it seems to us, it will have to defend the Quemoys and Matsus. The alternative now would be to weaken whatever determination there is in the free world to prevent a forcible Communist takeover of Formosa, and to deal an extremely serious blow to American prestige.

This predicament stems directly from the attempt of the administration to carry

water on both shoulders—to buy off Senator KNOWLAND and guarantee Chiang Kai-shek's morale at the same time it was trying to effectuate a basic change of policy. Evidently administration spokesmen have been telling different stories to different audiences about the coastal islands; and Chairman RICHARDS, of the House Foreign Affairs Committee, is justified in questioning the ambiguity. Far from being a precise statement of American intentions, the much-touted clarification of policy has turned out to be exactly the opposite. Congress and the American public, as well as the Communists, have been left in the dark.

Hindsight, however, will not extricate us. The best course now seems to be to rely on the British and our other friends to clarify matters by emphasizing to Peking that the United States will fight if the coastal islands are attacked, even though it might relinquish the islands in a peaceful settlement. This is a highly risky situation in which the burden on the President is immense. The country has no choice now but to rely on his good sense and restraint. As Marquis Childs observes, it is a decision between war and peace, delegated to him by Congress, such as few Presidents have ever faced.

THE PRESIDENT'S FOREIGN ECONOMIC POLICY

Mr. BUSH. Mr. President, recently I had the privilege of discussing trade and tariff matters with Hon. Joseph E. Talbot, Vice Chairman of the United States Tariff Commission. Our discussion was filmed for broadcast this week by Connecticut stations WKNB, New Britain; WGTH, Hartford; WNHC, New Haven; WICC, Bridgeport; and WATR, Waterbury.

Mr. Talbot formerly practiced law in Naugatuck, Conn., and for three terms represented Connecticut's Fifth District in the House of Representatives. Our Fifth District in Connecticut is a highly industrialized area, and one of many in our State in which industries have grown up behind tariff protection.

In the belief that Mr. Talbot's views on H. R. 1, and his explanation of the procedure involved in tariff negotiations will be of interest to Members of the Senate and to the public generally, I ask unanimous consent that a transcript of our discussion be printed in the RECORD at the conclusion of these remarks.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

TRANSCRIPT OF A DISCUSSION OF PRESIDENT EISENHOWER'S FOREIGN ECONOMIC POLICY BY UNITED STATES SENATOR PRESCOTT BUSH AND THE HONORABLE JOSEPH E. TALBOT

Senator BUSH. Hello everybody, I'm glad to be able to bring my friends in Connecticut another report from Washington, today, as we did 2 weeks ago. And I'd like you to consider with me President Eisenhower's foreign economic policy, and more specifically his recommendations for authority to negotiate moderate reductions in tariffs.

Our guest in our previous report from Washington on this subject was Clarence Randall, who pointed out the importance of the President's program in contributing to America's strength in the cold war against international communism in which we, with other free nations, are engaged.

In our discussion with Mr. Randall, who served as Chairman of the President's Commission on Foreign Economic Policy, we also emphasized that moderate tariff cuts can be made safely if the principles of gradualness, selectivity, and reciprocity are followed. They can have a stimulating effect on our whole economy, and create new opportunities for jobs.

Those principles have been insisted upon by President Eisenhower, who additionally has strongly recommended that we keep the so-called peril point and escape clause provisions of the present Trade Agreements Act.

With us today we are very fortunate to have an expert on those matters in the person of Joseph E. Talbot, Vice Chairman of the United States Tariff Commission. Of course, Joe Talbot is well known to the people of Connecticut. He is a former treasurer of our State, and for three terms he represented Connecticut's Fifth District in the Congress of the United States. Joe, it's good to have you with us today.

Mr. TALBOT. Thank you, Senator. I am delighted to visit again with our friends in Connecticut and to join you in an explanation of the technical details concerning our present and future trade agreements.

Senator BUSH. Joe, in my experience with tariff matters, which is not as extensive as yours, I've found that there's lot more heat than light generated by those who take the extremes on both sides of this issue. The freetraders represent one extreme; the highest protectionists the other.

The President's program has been under attack from both sides. It's my conviction, from the study of this problem over a period of the past 2 years, in particular, that his program will open up opportunities for increased trade among the free nations, have a stimulating effect upon our domestic economy and avoid serious injury to any of our industries, if it's properly administered. It will increase Connecticut's prosperity, and create new opportunities for jobs in this State and elsewhere. Based on your experience, do you agree with that point of view?

Mr. TALBOT. Yes, I do, Senator. The tariff-reduction provisions of the so-called Cooper bill, H. R. 1, are quite mild, and the record of Mr. Eisenhower's—President Eisenhower's—first 2 years in the White House indicates that when he uses them he uses them with restraint, especially as the Cooper bill does not seek in any way to modify the present peril point or the escape clause—which are the chief checks on cutting present tariff rates too deeply.

Senator BUSH. Joe, in the wide range of products produced by American industry, there are those on which tariffs can be safely reduced and others which are more vulnerable, and may need the protection they now have. Then, still others, indeed, may be in need of more protection. We see that from time to time. That's why the principle of selectivity has been insisted upon by the President. Let's discuss, for a minute or two, how we go about selecting the products on which tariffs may be negotiated.

Mr. TALBOT. Well, after the United States and let's say country X decide to negotiate a trade agreement, the first step in the selection of products for modification of import duties is a survey made by the Tariff Commission of past United States imports from that country. Meanwhile country X usually makes a list of products on which it desires modification of United States import duties. The data thus prepared by the Tariff Commission and the request list of country X are then studied by a committee of representatives of various Government agencies, including the Departments of State, Commerce, Agriculture, Treasury, Defense, Labor, and Interior, the United States Tariff Commission, and the Foreign Operations Administration.

Senator BUSH. That's Governor Stassen's group, isn't it?

Mr. TALBOT. That's right, Senator. This Country Committee, so-called, also considers all the factors known to it which are pertinent to the future composition and magnitude of the trade between the two countries. It is the general policy not to consider granting a concession on a particular product to a given country unless that country has been or is likely to be the principal, or a major supplier. In addition, the Country Committee carefully considers the competition between imports and domestic goods. On the basis of all these facts, the committee prepares a tentative list of articles on which the United States should consider granting concessions to country X.

Senator BUSH. The reason for all that procedure, Joe, I suppose, is to be certain we enter negotiations with our eyes open. Is that right?

Mr. TALBOT. That's correct, Senator. We want to make certain we have all the essential facts. But that's not the whole process we go through. The list is next sent for review by the Trade Agreements Committee, another interdepartmental committee, whose members represent the same Government departments as the Country Committee, I spoke about before. After careful study of all the facts, the Trade Agreements Committee transmits to the President a list of products for consideration in the negotiations. If the President accepts the Trade Agreements Committee's recommendations, as he usually does, the public is advised of this list and is entitled to supply at a public hearing information that may be useful in the conduct of the negotiations.

Senator BUSH. The Tariff Commission comes into the picture then by making peril-point findings. Does this come next?

Mr. TALBOT. Yes, Senator, after public hearings, the Tariff Commission makes its peril-point findings and sends them to the President. This places a floor below which the President and the Trade Agreements Committee cannot go; and if the President should go below that floor, he must justify his position to Congress. The inclusion of an item in the published list of products does not necessarily mean that a concession will actually be made on that. The information supplied by the manufacturers, and parties interested, may convince the Trade Agreements Committee that a concession should not be granted. Moreover, before the negotiations are completed, the Trade Agreements Committee must conclude that the United States will itself obtain concessions equivalent to those which it is prepared to grant, or to give away.

Senator BUSH. That's reciprocity.

Mr. TALBOT. That's right. In order to obtain a balanced agreement, the Trade Agreements Committee may conclude that certain concessions it was prepared to approve in the first instance should not be made by the United States.

Senator BUSH. That's why they are called reciprocal trade agreements, I presume, and why the President emphasizes reciprocity—which, of course, is as it should be. Now, Joe, we've been talking about the peril point, but I don't think we've defined just what it is, so how about telling us just what the law says about the peril point.

Mr. TALBOT. In plain language, the peril-point provision makes it the duty of the Tariff Commission to determine the lowest rate necessary to protect the domestic industry from serious injury from imports. This rate, which is called the peril-point rate, would ordinarily be expected to be a lower rate than the now existing rate in view of the nature of trade-agreement negotiations. However, if the Commission should find that

a higher rate than the existing rate is necessary to protect the domestic industry, it must name that higher rate as its peril-point rate, and the President is required to either negotiate at the increased rate in the trade agreement or explain to the Congress why he did not do so.

Senator BUSH. Some of our friends in Connecticut, Joe, have been advocating repeal or modification of the peril point. I haven't been able to agree with that. I think that the President's insistence on retention of this safeguard is wise. It offers the only sound method by which we can determine the facts before we enter tariff negotiations. Its the only way we can know the safe limits beyond which we should not go in cutting tariffs. Don't you think so?

Mr. TALBOT. Senator BUSH, even if the present method of establishing peril points and the safeguard of the escape clause were completely eliminated and abolished, some new method would have to be devised immediately to put on the brakes. We cannot sail the ship recklessly, without rudder or anchor. But more important than that, and I say this to those who are asking their Senators and Representatives to vote for abolition of the present peril-point and escape-clause provisions—I say to them, once you begin amending H. R. 1 with this, that, and the other thing, you're bound to end up with a great conglomeration of amendments that will result in the Randall Commission's report and the President's recommendations becoming almost meaningless. The escape clause is the only remedy left to the domestic industry for its protection after the trade agreement has been entered into and it also is a further safety valve in the event that the Tariff Commission may have been in error in the first place in finding a proper peril point.

Senator BUSH. Yes, Joe; I think we should certainly keep the escape clause, too. Now I see that our time is up so I want to thank you again for being with us and to my friends in Connecticut, see you in 2 weeks at the same place, same time. Goodby.

BIPARTISAN CONSULTATIONS ON FOREIGN-POLICY MATTERS

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a compilation of the meetings and appearances of the Secretary of State with bipartisan congressional groups for the years 1953, 1954, and 1955, to date, together with a list of bipartisan consultations on foreign-policy matters with congressional leaders and committees.

There being no objection, the compilations were ordered to be printed in the RECORD, as follows:

MEETINGS AND APPEARANCES OF THE SECRETARY OF STATE WITH BIPARTISAN CONGRESSIONAL GROUPS, 1953, 1954, AND 1955

1953—39 MEETINGS

January 22, 1953: House Foreign Affairs.
January 29, 1953: Congressional leadership.
February 10, 1953: Senate Foreign Relations.
February 13, 1953: Senate Far East Subcommittee.
February 17, 1953: House Foreign Affairs.
February 18, 1953: Senate Appropriations.
February 24, 1953: Senate Banking and Currency.
February 26, 1953: House Foreign Affairs.
February 26, 1953: Senate Foreign Relations.
March 18, 1953: Senate Foreign Relations.
March 18, 1953: House Appropriations.
March 24, 1953: Senate Foreign Relations Subcommittee.
March 25, 1953: Congressional leadership.
April 6, 1953: Senate Judiciary.
April 7, 1953: Senate Far East Subcommittee.
April 17, 1953: House Foreign Affairs.
April 17, 1953: Senate Foreign Relations.
April 28, 1953: House Foreign Affairs.
April 29, 1953: Senate Foreign Relations.
April 30, 1953: Senate Appropriations.
May 2, 1953: Senate Far East Subcommittee.
May 4, 1953: House Ways and Means.
May 6, 1953: House Foreign Affairs.
May 6, 1953: Senate Foreign Relations.
May 9, 1953: House Foreign Affairs and Senate Foreign Relations.
June 2, 1953: House Foreign Affairs.
June 3, 1953: Senate Foreign Relations.
June 8, 1953: Senate Far East Subcommittee.
June 12, 1953: Senate Agriculture.
June 15, 1953: House Agriculture.
June 19, 1953: Congressional leadership.
June 29, 1953: Senate leaders.
June 30, 1953: House Foreign Affairs and Senate Foreign Relations (Far East Subcommittee).
July 7, 1953: Senate Far East Subcommittee.
July 7, 1953: House Appropriations.
July 9, 1953: Congressional leadership.
July 9, 1953: Senate Appropriations.
July 25, 1953: House and Senate Far East Subcommittee.
October 14, 1953: House Foreign Affairs and Senate Foreign Relations.

1954—42 MEETINGS

January 5, 1954: Congressional leadership.
January 7, 1954: Senate Foreign Relations.
January 13, 1954: Senate Foreign Relations.
January 18, 1954: Senate U. N. Subcommittee.
January 19, 1954: House Foreign Affairs.
February 22, 1954: Congressional leadership.
February 23, 1954: House Foreign Affairs.
February 24, 1954: Senate Foreign Relations.
March 19, 1954: Senate Foreign Relations.
March 23, 1954: House Foreign Affairs.
April 3, 1954: Congressional leadership.
April 5, 1954: House Foreign Affairs.
April 6, 1954: Senate Minerals Subcommittee.
April 20, 1954: Congressional leadership.
May 5, 1954: Congressional leadership.
May 11, 1954: House Foreign Affairs.
May 12, 1954: Senate Foreign Relations.
May 17, 1954: Senate Appropriations.
May 21, 1954: Senate Appropriations.
May 21, 1954: House Judiciary leaders.
May 24, 1954: House leadership.
May 25, 1954: Senate Foreign Relations.
June 3, 1954: Joint Committee on Atomic Energy.
June 4, 1954: Senate Foreign Relations.
June 17, 1954: Senate Far East Subcommittee.
June 23, 1954: Congressional leadership.
June 24, 1954: House Appropriations Subcommittee.
June 28, 1954: Congressional leadership.
July 2, 1954: Senate Foreign Relations.
July 2, 1954: Senate Judiciary.
July 12, 1954: Senate Foreign Relations.
July 16, 1954: Senate Foreign Relations.
July 17, 1954: House Appropriations.
July 19, 1954: Senate Appropriations.
July 21, 1954: House Appropriations.
July 21, 1954: House Foreign Affairs.
July 22, 1954: Senate Appropriations.
July 22, 1954: Senate Foreign Relations.
July 27, 1954: Senate Foreign Relations.
August 20, 1954: Congressional leadership.
November 10, 1954: Senate Far East Subcommittee.
November 11, 1954: Senate Foreign Relations.

1955—7 MEETINGS

January 13, 1955: Senate Foreign Relations.
January 17, 1955: House Ways and Means Committee.
January 20, 1955: Congressional leadership.
January 24, 1955: House Foreign Affairs.
January 24, 1955: Senate Foreign Relations.
February 7, 1955: Senate Foreign Relations.
February 8, 1955: House Appropriations.

1953	39
1954	42
1955 (to date)	7
Total (to date)	88

Meetings held by the Secretary or the Under Secretary of State with congressional leaders and other Members of both Houses of Congress to consult on current foreign policy matters

Date	Subject	Members	Department
1953			
Apr. 17	Forthcoming Paris meeting of NATO Ministers.	Senators H. A. Smith, Hickenlooper, Taft, Langer, Ferguson, Knowland, George, Green, Gillette, Mansfield; Representatives Chiperfield, Vorys, Bolton, Judd, Jackson, LeCompte, Radwan, Adair, Bentley, Battle, Brooks Hays, Roosevelt, Kelly.	The Secretary.
May 9 (at Department of State).	Communist proposal on prisoners of war not desiring repatriation.	Senators H. A. Smith, Hickenlooper, Knowland, George, Sparkman; Representatives Chiperfield, Richards.	Do.
May 22 (at Department of State).	Far East	Senators Wiley, H. A. Smith, Hickenlooper, Ferguson, Knowland, George, Sparkman; Representatives Chiperfield, Vorys, Judd, Richards, Lanham.	The Under Secretary.
June 19 (at Department of State).	Korea	Senators Knowland, L. B. Johnson, H. A. Smith, George, Sparkman; Speaker Martin; Representatives Chiperfield, Vorys, Judd, Richards, Lanham.	The Secretary.
June 30 (at Department of State).	Korea	Senators Wiley, H. A. Smith, Hickenlooper, Knowland, Sparkman; Representatives Chiperfield, Vorys, Judd, Lanham.	The Secretary.
July 9 (at Department of State).	Proposed Foreign Ministers meeting	Senators Knowland, Millikin, Saltonstall, L. B. Johnson, Wiley, Bridges, George, Russell; Speaker Martin; Representatives Halleck, McCormack, Chiperfield.	Do.
July 25 (at Department of State).	Korean armistice and relations with the Republic of Korea.	Senators Wiley, H. A. Smith, Knowland, Sparkman; Representatives Chiperfield, Vorys, Judd, Richards, Lanham.	Do.
Oct. 14 (at Department of State).	London trip and special problems	Senators Wiley, Ferguson, Green, Sparkman; Representatives Vorys, Judd, Burleson, Zablocki.	Do.

Meetings held by the Secretary or the Under Secretary of State with congressional leaders and other Members of both Houses of Congress to consult on current foreign policy matters—Continued

Date	Subject	Members	Department
1954			
Jan. 22 (at Department of State).	Iranian oil situation	Vice President Nixon, Senators Knowland, L. B. Johnson, Wiley, Saltonstall, George; Speaker Martin; Representatives Priest, Halleck, Short, Rayburn.	The Under Secretary.
Feb. 8 (at Department of State).	Hoover Commission recommendations on Foreign Service.	Senators Wiley, Ferguson, George, Mansfield; Representatives Vorys, Bentley, Richards, Chatham.	Do.
Feb. 22 (at Department of State).	Berlin Conference	Senators Knowland, Saltonstall, Ferguson, L. B. Johnson, Clements, Wiley, George, Russell; Speaker Martin; Representatives Arends, Rayburn, McCormack, Chiperfield, Richards.	The Secretary.
Apr. 3 (at Department of State).	International security problems and Indochina.	Senators Knowland, Millikin, L. B. Johnson, Clements, Russell; Speaker Martin; Representatives McCormack, Priest.	The Secretary, also Deputy Secretary of Defense Kyes, Secretary Anderson, and Admiral Radford.
Apr. 20 (at Department of State).	Recent discussions in Europe and plans for Geneva Conference.	Senators Knowland, Ferguson, Millikin, Saltonstall, L. B. Johnson, Clements, Wiley, Bridges, Hickenlooper, Green, Russell, Fulbright; Representatives Arends, Chiperfield, Brooks Hays, Fisher.	The Secretary.
Apr. 26 (at Department of State).	Indochina	Senators H. A. Smith, Hickenlooper, Langer, Fulbright, Gillette, Mansfield; Representatives Chiperfield, L. H. Smith, Fulton, Carnahan, Zablocki.	The Acting Secretary.
May 5 (at Department of State).	Report on Geneva Conference	Senators Knowland, Ferguson, Millikin, Saltonstall, L. B. Johnson, Clements, Wiley, Bridges, H. A. Smith, George, Russell, Green; Speaker Martin; Representatives Halleck, Arends, Rayburn, McCormack, Chiperfield, Short, Vorys, Judd, Gordon, Vinson, Lanham.	The Secretary.
July 20	Germany	Senators Knowland, Ferguson; Representatives Martin, Halleck	Do.
1955			
Jan. 20	Far eastern situation	Senators George, Wiley, Byrd, Saltonstall, Clements, Knowland; Representatives Richards, Chiperfield, Arends, McCormack, Martin, and Vinson.	The Secretary, Under Secretary, Mr. Robertson, Admiral Radford, Mr. Morton.

Meetings held by the Secretary or other principal officers of the Department with the Senate Foreign Relations Committee or subcommittees of that committee to consult on current foreign policy matters

Date	Subject	Committee	Department
1953			
Feb. 10	Recent European trip with Mr. Stassen	Foreign Relations Committee	The Secretary; Mr. Stassen.
13	Far eastern policy	Subcommittee, Far Eastern Affairs	The Secretary.
18	Situation in the Far East	Subcommittee, Near Eastern and African Affairs	Assistant Secretary Byroade.
26	German debt settlement agreements	Subcommittee, Economic and Social Policy Affairs	Legal Adviser Phleger; Mr. Riddleberger.
Mar. 13	Situation in Latin America	Subcommittee, American Republic Affairs	Assistant Secretary Cabot.
25	Korea	Subcommittee, Far Eastern Affairs	The Secretary.
Apr. 2	Proposed German cultural convention and revival of Treaty of Friendship, Commerce, and Consular Rights of 1923 with Germany.	Subcommittee, European Affairs	Mr. Riddleberger.
7	Soviet proposals	Subcommittee, Far Eastern Affairs	The Secretary.
10	Palestine refugees	Subcommittee, Near Eastern and African Affairs	Assistant Secretary Byroade.
13	Problems before United Nations; Korea; selection new Secretary General; security United States employees.	Subcommittee, United Nations Affairs	Assistant Secretary Hickerson.
24	Reactivation of Treaty of Friendship, Commerce, and Consular Rights of 1923 with Germany.	Subcommittee, European Affairs	Mr. Riddleberger.
29	Paris NATO meeting	Foreign Relations Committee	The Secretary.
May 2	Far eastern situation	Subcommittee, Far Eastern Affairs	Do.
26	Permanent representative on North Atlantic Council	Subcommittee, State Department Organization	Assistant Secretary Merchant.
27	Situation in Latin America	Subcommittee, American Republic Affairs	Assistant Secretary Cabot.
June 3	Trip to Middle East and South Asia	Foreign Relations Committee	The Secretary.
4	European Coal and Steel Community	Subcommittee, Economic and Social Policy Affairs	Mr. Moore with Mr. Monnet.
5	do	Foreign Relations Committee	Miss Camp with Mr. Monnet.
8	Korea	Subcommittee, Far Eastern Affairs	The Secretary.
9	Spanish base agreement	Subcommittee, European Affairs	Assistant Secretary Merchant.
July 7	Korea	Subcommittee, Far Eastern Affairs	The Secretary.
16	Situation in Korea	Foreign Relations Committee	Assistant Secretary Robertson.
23	Problems before the U. N.	do	Ambassador Lodge.
28	International Tin Conference	Subcommittee, Economic and Social Policy Affairs	Assistant Secretary Waugh.
1954			
Jan. 7	World developments	Foreign Relations Committee	The Secretary.
Feb. 3	Situation in Guatemala	do	Mr. Fisher.
16	Indochina	do	The Under Secretary.
18	Military assistance to Pakistan	Subcommittee, Near East and African Affairs	Assistant Secretary Byroade.

AMENDMENT OF SECTION 2 (A) OF THE ROBINSON-PATMAN ACT

Mr. CAPEHART. Mr. President, there are now pending before the Committee on the judiciary bills to amend section 2 (b) of the Robinson-Patman Act having exactly opposite purposes. These bills are S. 780, introduced by me, and S. 11, introduced by the Senator from Tennessee [Mr. KEFAUVER] and other Senators.

Throughout the past 5 years interested Government agencies, and the White House, have frequently, and with consistency, expressed themselves on these bills. I sent to each member of the Judiciary Committee a memorandum of the actions by Government agencies during the past 5 years on this subject. This documented history seems so persuasive to me that I ask unanimous consent to have it included in the body of the RECORD as a part of my remarks so that it may be available to the entire Senate.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM RE KEFAUVER (S. 11) AND CAPEHART (S. 780) BILLS (84TH CONG.)

Senator KEFAUVER (and 29 other Senators) introduced S. 11 on January 6, 1955, to amend section 2 (b) of the Robinson-Patman Act to provide that the defense of good faith meeting of the equally low price of a competitor should not apply whenever its effect may be substantially to lessen competition or tend to create a monopoly in any line of commerce. Senator KEFAUVER's statement acompanying the bill was a repetition of a previous statement that the Federal Trade Commission found it necessary to challenge almost in its entirety. On January 27, 1955, Senator CAPEHART introduced S. 780 to make the good faith meeting of an equally low price of a competitor a full defense to a charge of price discrimination. Senator CAPEHART accompanied introduction of his bill with a letter from the White House saying that that bill was in accord with President Eisenhower's program. These bills are for opposite purposes.

History of proposals: Beginning in the Truman administration, and continuing in the Eisenhower administration, the Kefauver proposal has been opposed, and the Capehart proposal approved by the Department of Justice, Department of Commerce, and the President's Council of Economic Advisors. In the Truman administration the Federal Trade Commission at one time supported the Kefauver proposal and at another time supported the Capehart proposal. The present Commission has supported the Capehart proposal.

In the Truman administration the White House advised that a bill similar to the Capehart proposal (S. 1008, 81st Cong.) was in accord with the President's program. President Truman later vetoed that bill; but for the reason that confusion might follow from its legislative history, which included adoption of an amendment following the Kefauver proposal, that was later modified in conference.

The Kefauver bill would enact into law a construction of the present act which the Federal Trade Commission, without the support of the Department of Justice, had argued in the Standard Oil case and which was expressly rejected by the Supreme Court

in that case (340 U. S. 231; 1951). Senator KEFAUVER, in spite of objections from the Department of Justice, has attempted to write this concept into bills dealing with this subject that have been before the Congress in the past 5 years.

Since the purpose of the Kefauver bill is to overrule the Supreme Court decision in the Standard Oil case, it is necessary to consider both the pertinent provisions of the Robinson-Patman Act and to understand what the Supreme Court held in that case.

The statute: Section 2 (a) of the Robinson-Patman Act makes unlawful discrimination in price "where the effect of such discrimination may be substantially to lessen competition, or tend to create a monopoly in any line of commerce, or to injure, destroy or prevent competition with any person who either grants, or knowingly receives, the benefit of such discrimination, or with customers of either of them."

Section 2 (b) provides that a seller may rebut a charged violation of section 2 (a) "by showing that his lower price * * * was made in good faith to meet an equally low price of a competitor."

In the absence of a price discrimination having the adverse effect on competition provided for in section 2 (a) there is no occasion for the defense in section 2 (b) ever to be invoked. However, as shown below, the Kefauver bill would make that defense not available whenever there was present the very competitive effect required to bring the pricing practice within the condemnation of the act in the first place. This is the equivalent of eliminating the meeting of competition defense from the act entirely because it is made inapplicable to every case in which it might ever be invoked.

Section 2 (a) applies to price discriminations that may lessen competition, tend to create a monopoly, or injure competition with any person, etc. The Kefauver bill would make the section 2 (b) defense inapplicable only where there may be a substantial lessening of competition, or a tendency toward monopoly. It might appear on the surface that the defense would still be available whenever its effect might only be to injure competition with any person, etc. However, the courts have not distinguished between substantially to lessen competition and to injure competition with any person, etc. Both the courts and the Commission have treated those phrases as having the same meaning. Therefore, the proposed bill would make the defense of good faith meeting of an equally low price of a competitor meaningless; and the bill has been so construed by all responsible officials of the Government concerned with the act.

The Standard Oil case: Despite the plain language of section 2 (b), in the Standard Oil case the Federal Trade Commission ruled that the defense of good faith meeting of a lower price of a competitor did not apply if the Commission found an injury to competition among resellers.

That case involved gasoline marketing in the Detroit area where there were 130 licensed jobbers—gasoline buyers taking delivery in tank car quantities, who had their own bulk storage plants, and had truck distribution facilities for deliveries to retail stations. Standard had had 7 of those jobber customers but had lost 3 to competitors. The case involved the legality of Standard's trying not to lose those accounts by giving its remaining 4 customers the tank car price at which all other jobbers were buying from other suppliers. That price was 1½ cents a gallon below the price to retail service station customers. The Commission charged that it was unlawful for Standard to get a higher price from its retailer customers who purchased in small quantities delivered by truck to their retail stations.

Standard admittedly could not have retained those 4 customers unless it sold to them at the jobber tank car price. It was recognized that the statute could not be applied to other competing suppliers who sold only at one price level to jobbers and offered those customers the same jobber price. Since Standard also sold to retailers in the same area and because one or more of those jobbers resold at cut prices, the Commission contended that Standard had no right to retain its jobber customers.

The Commission's trial examiner made the finding that, "the lower prices allowed these four customers were in fact granted to meet equally low prices of competitors."

In reviewing the Commission's ruling, the court of appeals found that, "it may be assumed to be conclusive" that Standard "made its low price" to the four jobber customers "in good faith to meet the lower price of a competitor."

The Commission's own findings are that: "It may well be that respondent was convinced that if it ceased granting tank car prices to (the four jobber customers) it would lose those accounts. It had substantial reason for believing this to be the case."

The Supreme Court stated the Commission's position, and its effect upon the statutory defense, as follows: "The proviso in section 2 (b), as interpreted by the Commission, would not be available when there was or might be an injury to competition at a resale level. So interpreted the proviso would have such little if any, applicability as to be practically meaningless."

The Supreme Court rejected the Commission's view that the statutory defense was not available whenever there might be an injury to competition. The Court said:

"It must have been obvious to Congress that any price reduction to any dealer may always affect competition at that dealer's level as well as at the dealer's resale level whether or not the reduction to the dealer is discriminatory."

Of the pricing rigidity that would be required if a seller had only the alternatives of reducing his prices to all of his customers, or to none of them, the Court said:

"There is nothing to show a congressional purpose, in such a situation, to compel the seller to choose only between ruinously cutting its prices to all its customers to match the price offered to one, or refusing to meet the competition and then ruinously raising its prices to its remaining customers to cover increased unit costs. There is, on the other hand, plain language and established practice which permits a seller, through section 2 (b), to retain a customer by realistically meeting in good faith the price offered to that customer, without necessarily changing the seller's price to its other customers."

That decision was by a divided Court, 5 to 3. However, the Justices were unanimous in their view that the construction urged by the Commission, and now embodied in the Kefauver bill, would weaken competition. The premise of the dissenting Justices, however, was that Congress had intended so to do.

The minority opinion stated:

"Nondiscriminatory pricing tends to weaken competition in that a seller, while otherwise maintaining his prices, cannot meet his antagonist's price to get a single order or customer. But Congress obviously concluded that the greater advantage would accrue by fostering equal access to supplies by competing merchants or other purchasers in the course of business."

The majority of the Court refused to believe that the Congress had intended to thus restrict the right to compete, saying:

"It is enough to say that Congress did not seek by the Robinson-Patman Act either to abolish competition or so radically to curtail it that a seller would have no substantial right of self-defense against a price raid by a competitor."

The majority opinion also quoted (in a footnote) from a TNEC monograph written in 1941 by members of the Federal Trade Commission staff. That monograph said of this provision:

"The amended act now safeguards the right of a seller to discriminate in price in good faith to meet an equally low price of a competitor, but he has the burden of proof on that question. This right is guaranteed by statute and could not be curtailed by any mandate or order of the Commission. * * * The right of self defense against competitive price attacks is as vital in a competitive economy as the right of self defense against personal attack."

The ultimate conclusion of the majority opinion of the Supreme Court, apparently the primary basis of its decision, was that:

"The heart of our national economic policy long has been faith in the value of competition. In the Sherman and Clayton Acts, as well as in the Robinson-Patman Act, 'Congress was dealing with competition, which it sought to protect, and monopoly, which it sought to prevent.' "

Concerning the statement by Senator KEFAUVER on his bill: In a letter to the chairman of the Senate Judiciary Committee dated June 16, 1953, the Chairman of the Federal Trade Commission said that the Commission felt "compelled to comment for the record" in order "to avoid any misunderstanding, and to avoid any misconstruction," which might result from Senator KEFAUVER's statements about the similar bill he introduced in 1953. The Commission referred to glaring errors in a statement released by Senator KEFAUVER which appears in large part in the CONGRESSIONAL RECORD of March 18, 1953, volume 99, part 2, pages 2045–2046.

Senator KEFAUVER's statement says that the good faith defense, "permits any price discrimination, regardless of its effect upon small business or competition as long as it is made in good faith." The Commission's comment is: "The defense is in fact available only to meet an equally low price that a competitor offers to a customer. It does not permit any other price discriminations."

Senator KEFAUVER's statement says, "the burden is upon enforcement agencies to prove the discrimination was not in good faith—which is almost impossible as a practicable matter." The Commission's comment is: "The burden is in fact upon the seller to show his good faith. The Court so held in the Standard Oil case. It is for the Commission to decide whether the seller has proved that he acted in good faith. The Commission does not have to prove the seller's bad faith."

The statement says that, "the Court held that good faith is a complete defense to a charge of price discrimination under the Robinson-Patman Act." The Commission's comment is: "The Court in fact concluded that a seller is permitted to meet 'in good faith a lawful and equally low price of its competitor'."

The statement says:

"The big supplier can drive these smaller competitors out of business by reducing his price in one market at a time, making up any losses through higher prices charged elsewhere."

The Commission's comment is:

"This is in fact not possible under the defense in question for it would not be meeting the equally low price of a competitor. More important, such conduct has frequently been held unlawful under the Sherman Act and we think it inconceivable that conduct which violates the Sherman Act could be said to be in good faith. Certainly this Commission would never find such conduct in good faith. That type of predatory price cutting, which had been held unlawful by this Commission before the enactment of the Robinson-Patman Act, is certainly an attempt to monopolize and is thus specifically excepted from the Capehart bill."

The statement says:

"As the law now stands, there is no limit on discriminations, as long as they are made in good faith. Once this simple test is met the big firm is given carte blanche to drive his smaller competitors out of business and to create monopolies."

The Commission's comment is:

"We do not believe that such is the existing law. As noted above, the defense applies only to meeting an equally low price which a competitor is already offering to the customers. The seller must affirmatively prove his good faith and this is not a simple matter (as is inferred in the statement quoted above). Creating—or even attempting to create—monopolies is never good faith, nor is the carte blanche destruction of others. The Commission does not consider good faith as a meaningless requirement. It means that the seller must convince the Commission that he acted for proper competitive purposes, and not in a predatory manner."

The statement further says that under that bill:

"The good-faith defense would still be a complete defense in all cases except where the effect of the discrimination fell short of probable injury to competition."

The Commission's comment is:

"As we have shown above, the exception would include virtually every possible case. Under the decisions in the Morton Salt and Standard Oil cases, it is unlikely that any price difference to meet the equally low price of a competitor would fall short of probable injury to competition."

Nevertheless, on January 6, 1955, Senator KEFAUVER again repeated the same statements previously challenged by the Federal Trade Commission in introducing the pending bill. Except for a paragraph on the legislative history of his proposal, Senator KEFAUVER's statement in introducing S. 11 is verbatim the officially challenged statement he made in 1953.

Perhaps the most glaring extent to which Senator KEFAUVER has been misadvised is with respect to the burden of proof. The statute makes clear, as does the Supreme Court opinion, that the burden of showing good faith is upon the seller who seeks to avail himself of the defense. This is repeatedly emphasized by the Court. The existing statutory language is "that nothing herein contained shall prevent a seller rebutting the case made against him by showing that his lower price * * * was made in good faith to meet an equally low price of a competitor."

Referring to two prior cases in which the defense was denied to a seller, the Court said in the Standard Oil case: "The decision in each case was based upon the sufficiency of the seller's evidence to establish its defense." The Court also quoted from an earlier case in which it said that "petitioner [seller] failed to sustain the burden of showing that the price discriminations were granted for the purpose of meeting competition" (emphasis added by the Court).

The Court quoted from an earlier case the conclusion that:

"We agree with the Commission that the statute at least requires the seller, who has knowingly discriminated in price, to show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor. Nor was the Commission wrong in holding that respondents failed to meet this burden."

Finally the Supreme Court said in the Standard Oil case that:

"In a case where a seller sustains the burden of proof placed upon it to establish its defense under section 2 (b), we find no reason to destroy that defense indirectly, merely because it also appears that the beneficiaries of the seller's price reductions may derive a competitive advantage from them or may, in a natural course of events, reduce their own resale prices to their customers."

After identifying the bill's cosponsors, the opening paragraphs of Senator KEFAUVER's statement introducing his pending bill are:

"I am today offering a bill to plug a glaring loophole in the Robinson-Patman amendment. * * * The loophole is the so-called good-faith defense which permits any price discrimination, regardless of its effect upon small business or competition as long as it is made in good faith. * * * The loophole stemmed from the decision of the Supreme Court in the *Standard Oil of Indiana* case (340 U. S. 231)."

Certainly the statute does not permit "any price discrimination, regardless of its effect, * * * as long as it is made in good faith." As the Supreme Court said in the Standard Oil case, "the defense in subsection (b), now before us, is limited to a price reduction made to meet in good faith an equally low price of a competitor." The Court quoted from an earlier case that the proviso required the seller to show "that the granting of a lower price would, in fact, meet the equally low price of a competitor." And the Court said that section 2 (b) permits a seller "to retain a customer by realistically meeting in good faith the price offered to that customer without necessarily changing the seller's price to its other customers."

The Court's opinion makes clear that the proviso does not apply to any discrimination made in good faith, but that it applies only to a price reduction by a seller to meet a lower price which his competitor is offering to the customer. Section 2 (b) does not permit a seller to reduce his price to meet an unlawful price of a competitor, to grant a price which he does not have reason to believe is in fact offered to the customer by his competitor, or to meet a price which bona fide competition does not require him to meet.

Official Government views: Since the Truman administration, the Department of Justice has opposed the principle of the Kefauver bill. The same is true of the Department of Commerce and the President's Council of Economic Advisers. President Truman in 1949 supported the principle of a bill by Senator O'MAHONEY directly contrary to the Kefauver proposal, although in 1950 he vetoed that bill on the ground that amendments adopted in the Congress might cause confusion and therefore not succeed in clarifying the law. The Federal Trade Commission, during the preceding administration, shifted back and forth; but at the present time the Federal Trade Commission is firmly on record in opposition to the Kefauver bill.

In 1949 the Department of Justice spokesman, opposing the Kefauver proposal, told the House Judiciary Committee:

"First we would recommend deletion of the parenthetical phrases in sections 2 and 3, the so-called Kefauver amendment. * * * While we recognize the competitive problem which arises when one purchaser obtains advantages denied to other purchasers, we do not believe the solution to this problem lies in denying to sellers the opportunity to make sales in good faith competition with other sellers."

The Supreme Court's opinion shows that opposition of the Department of Justice to the Kefauver amendment was a factor considered by the Court in reaching its decision.

In a letter dated November 27, 1953, to the chairman of the Senate Judiciary Committee the Department of Justice again opposed the Kefauver proposal, giving the same reasons for its conclusion that it "does not favor the enactment of this (Kefauver) bill."

The June 16, 1953, letter of the Chairman of the Federal Trade Commission to the chairman of the Senate Judiciary Committee analyzed and opposed the Kefauver bill. That letter expresses the views of the majority of the Commission as:

"The Kefauver bill would have the effect of overturning the Supreme Court decision in the *Standard Oil* case (340 U. S. 231). A majority of the Commission believes that it should not be enacted into law. * * *

"Our free enterprise system requires competition in all areas. In fact, our whole theory of trade regulation is based upon the existence of competition in every market. If such regulation is to remain effective, a seller must be permitted, when acting fairly and in good faith, to meet the equally low price of a competitor. We think the Supreme Court reaffirmed this fundamental principal in the case of *Standard Oil* v. *Federal Trade Commission* (340 U. S. 231), but if a legislative restatement seems necessary or desirable we believe the Capehart bill will accomplish this. The view recently, but no longer, urged by a majority of the Commission, and which is the basis for the Kefauver bill, is that meeting the equally low price of a competitor should not be a defense whenever it injures competition. As a practical matter this completely nullifies the defense, and it would then never be available to any seller, for the Supreme Court has already held that every substantial difference in price may injure competition."

The Secretary of Commerce wrote the chairman of the Senate Committee on the Judiciary on October 9, 1953, opposing the Kefauver bill. He said that—

"S. 1357 adopts the minority opinion of the Supreme Court in the Standard Oil case. In our opinion, S. 1357 would invalidate the defense of meeting in good faith a lower competitive price whenever the effect 'may be substantially to lessen competition or tend to create a monopoly in any line of commerce.' This would, in our opinion, destroy the availability of this defense for all practical purposes and in effect prevent real competition."

Conclusions: It may be urged, as noted earlier, that the Kefauver bill would only prohibit good faith meeting of an equally low price of a competitor when its effect might be substantially to lessen competition; and it would not prohibit doing so when the effect might only be to injure competition with any person, etc.

But as interpreted by the courts and by the Commission, "substantially to lessen competition" and "to injure competition with any person" are one and the same.

In one Commission case the order goes so far as to find that:

"These arguments [that prices were made for the purpose of meeting competition] show that respondent's discriminatory prices were made to retain the business of certain customers or to secure the business of others and that they were largely successful in doing so. To the extent that business is held by or diverted to respondent from its competitors by its discriminatory prices and unfair practices, competition has been adversely affected within the meaning of the law." (FTC Docket 4920; reversed on other grounds by the court of appeals, seventh circuit.)

The Kefauver bill is generally referred to as the equal-opportunity bill. Its avowed purpose is to give every buyer an equal opportunity to buy at the same price. The difficulty with this concept, as noted by the Supreme Court, is that it eliminates price competition and materially weakens our competitive system.

Dr. John D. Clark, a member of President Truman's Council of Economic Advisors, testifying in favor of an earlier proposal contrary to the Kefauver bill, told a congressional committee that:

"All competitive effort is burdensome and harmful to those who cannot keep pace, but if we said it must stop short before it hurts anyone we would completely abandon the policy of competition."

On May 25, 1954, the Director of the Bureau of the Budget wrote Senator CAPEHART transmitting a draft bill slightly revising his prior bill to reaffirm the Supreme Court decision in the Standard Oil case. That letter advises that it was, "agreed upon by you, us, and the Chairman of the Federal Trade Commission, the Assistant Attorney General in charge of the Antitrust Division and the representatives of the Secretary of Commerce, and the Council of Economic Advisors." That letter concludes, "I am authorized to inform you that enactment of the draft bill [to reaffirm the Standard Oil decision] would be in accordance with the program of the President" (CONGRESSIONAL RECORD, volume 100, part 7, pages 8561–8562). This bill is now pending as S. 780 (84th Cong.).

The Supreme Court, in rejecting the Commission's prior construction of existing law and the proposal of the Kefauver bill, said:

"We need not now reconcile, in its entirety, the economic theory which underlies the Robinson-Patman Act with that of the Sherman and Clayton Acts. It is enough to say that Congress did not seek by the Robinson-Patman Act either to abolish competition or so radically to curtail it that a seller would have no substantial right of self-defense against a price raid by a competitor."

This is what the Kefauver bill is designed to do.

COMPARISON OF PRESENT WAGES OF CITY LETTER CARRIERS WITH INCREASES PROVIDED IN H. R. 1592 AND H. R. 2987

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a letter addressed to me under date of February 21, 1955, by William C. Doherty, president of the National Association of Letter Carriers, relating to the proposed pay increase for postal employees, and also a table enclosed with the letter.

There being no objection, the letter and table were ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF LETTER CARRIERS,
Washington D. C., February 21, 1955.

Hon. WILLIAM LANGER,
United States Senate,
Senate Office Building,
Washington, D. C.

DEAR SENATOR LANGER: As a member of the Committee on Post Office and Civil Service, the enclosed chart should be helpful in comparing present postal wages for city letter carriers with the increases provided for in H. R. 1592 and in H. R. 2987.

The chart was prepared primarily to present a comparison of city letter carrier wages only, all of whom are assigned to salary level 4 in H. R. 2987. However, an exactly identical comparison is applicable to another large group of postal employees.

According to the figures furnished your committee by the Post Office Department (Salary Plan, Schedules and Statistical comparisons, 1955, p. 2), a total of 300,371 carriers and clerks now in the salary range $3,270 to $4,070 under Public Law 134, as amended, are all assigned to salary level 4 under H. R. 2987. These 300,371 represent by far the great bulk of employees in the field postal service—exclusive of rural carriers and postmasters at fourth-class offices, these 300,371 employees represent 72.8 percent of those occupying key positions under H. R. 2987.

Many among this large group are long-time career employees now in longevity grades A, B, or C, acquired after 13, 18, and 25 years' service. The column on the extreme right side of the chart indicates that among city letter carriers alone, 55.3 percent of the regular force are in the longevity grades. Under the terms of H. R. 2987, these veteran employees would receive from 4.81 to 5.04 percent in salary increases.

Trusting this chart will be helpful in your consideration of the salary bills before you, and with every personal good wish, I am

Sincerely,

W. C. DOHERTY,
President.

National Association of Letter Carriers—Effect of pending postal pay legislation on letter carrier salaries

Present		Proposed by H. R. 1592—S. 1				Proposed by H. R. 2987—S. 773 (salary level 4)							Number regular carriers [9] [10]

USE OF SECRET ACCUSERS IN GOVERNMENT SECURITY CASES

Mr. NEUBERGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an article written by Mr. Murrey Marder and published in the Washington Post and Times Herald of March 4, 1955, bearing on the use of secret accusers in Government security cases.

It is significant that the distinguished Solicitor General of the United States, Simon E. Sobeloff, has not joined in the appeal of the Government's case to the Supreme Court.

Mr. President, I think that the right of an accused person to face his accusers is one of the things which, throughout history, has distinguished liberty-loving lands from tyrannies like Nazi Germany and Soviet Russia.

The star chamber is more appropriately associated with the Nazi swastika and the Soviet hammer and sickle, than it is with the free-flying American eagle.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES PLEADS FOR SECRET ACCUSERS—BROWNELL URGES SUPREME COURT TO UPHOLD POLICY IN SECURITY CASES

(By Murrey Marder)

The Eisenhower administration told the Supreme Court yesterday that to grant accused persons the right to confront secret accusers in loyalty-security cases might endanger the national security.

In a new test case, the Government said that the same procedure employed under the Truman administration must be maintained to preserve the identity of confidential informants.

This position was vigorously set forth in a 120-page brief signed by Attorney General Herbert Brownell, Jr., and three Assistant Attorneys General.

They urged the High Court to uphold the 1953 dismissal of Dr. John P. Peters as a consultant to the United States Public Health Service, on grounds that there was "reasonable doubt" of his loyalty.

The case arose under the Truman loyalty program. But the confrontation-of-accusers issue is also basic to the Eisenhower Federal employees security program, and the industrial security and other present programs. Three years ago, in the Dorothy Bailey case, the Supreme Court split 4 to 4 on this point, upholding the Government.

There had been considerable speculation about the position the Government would take in the present brief. Its filing was delayed several weeks, with reports of a split in official opinion.

Significantly, the name of Solicitor General Simon E. Sobeloff, the Government's chief spokesman before the Supreme Court, does not appear on the brief, and he will not participate in the arguments.

When asked for comment, Sobeloff issued a carefully worded statement which was most meaningful in what it failed to state. He said:

"The Attorney General and I are in complete understanding about the matter.

There is no requirement that the Solicitor General shall sign a brief filed in the Supreme Court, particularly when the Attorney General signs. There are precedents for this."

He added, "If you wish further comment, you might see the Attorney General." A spokesman for Brownell said he felt no further statement was necessary.

The "understanding" clearly did not mean "agreement" on the case. Sobeloff, who has spoken frequently on constitutional rights, has in the past expressed concern about the concept of "averting national dangers by surrendering some of our liberties to save the rest."

In the Supreme Court the case is expected to be argued by Assistant Attorney General Warren E. Burger, Chief of the Civil Division, who signed the brief along with Assistant Attorneys General William F. Tompkins, head of the Internal Security Division, and J. Lee Rankin.

Dr. Peters, who is senior professor of medicine at Yale University, had occupied a Government consultant job that was nonsensitive from a security standpoint.

He was twice cleared of loyalty charges, including the charge that he was a Communist. But in May 1953, just before the present program went into effect, he was notified that the Loyalty Review Board had adjudged him a loyalty risk.

ANONYMITY DEFENDED

In his case—as in the Bailey case and most cases under these programs—he was not given the names of his accusers or permitted to cross-examine them.

The Justice Department said in its brief: "A large area of vital Government intelligence depends on undercover agents, paid informers, and casual informers who must be guaranteed anonymity.

"Thus, evidence which would be rejected under established legal doctrine in a criminal proceeding could well be the compelling reason for dismissal of an employee on loyalty grounds. An agency head or a loyalty board which would not give weight to information satisfactorily evaluated would be derelict in their respective duties."

"In addition to information from confidential informants," the brief continued, "a large percentage of the material included in the reports under the loyalty and security program is derived from the use of extremely delicate and confidential techniques."

DEPARTMENT'S ARGUMENT

This means, the Department said, that such information, often developed as by-products of major espionage and sabotage investigations, is frequently included in reports on employee cases.

Therefore, said the brief, "professional" and "casual" sources of information "might well dry up, to the detriment of the basic security of the country, if petitioner's contention as to his overriding rights of confrontation and cross-examination were to be honored."

The Department said that "Never in our history has a Government employee been granted a judicial trial or a quasi-judicial administrative hearing upon his dismissal from office."

"Insofar as petitioner has been injured by the stigma to his reputation," it said, "we see no basis for holding that stigma is a thing apart, which gives rise to constitutional rights not applicable to other dismissals from Government service."

"The difference in harm resulting from a dismissal on loyalty grounds and a dismissal for offenses of serious moral turpitude is a difference in degree, not in kind.

"It might be equally difficult for one dismissed because of the acceptance of bribes, theft, sex offenses, or even incompetence, to obtain suitable employment elsewhere."

The Department said that "it is well settled that due process is not a technical conception with a fixed content unrelated to time, place, and circumstances."

POLICY HELD REASONABLE

The Government's program has been "reasonable," said the brief, and must be looked at in respect to the possible espionage and fifth column activities which the techniques of the Communists threaten.

Unlike a criminal trial, the Department said, the Government in dealing with the Federal service "is not required to wit for proof; it may properly insist that Government employees be above suspicion."

Dr. Peters, in his brief filed by the Washington firm of Arnold, Fortas & Porter, contended:

"The issue is solely the use of star-chamber methods to impose on nonsensitive employees the stigma of a dishonorable discharge and disqualification from Government service."

In the 3 years since the Bailey case, Dr. Peters' attorneys said, the consequences of this procedure have become clear.

PROCESS CALLED LOTTERY

"A trial without due process," they said, "is at best a lottery on which no man should be asked to stake his career and reputation. But this particular lottery is not even a fair gambling device."

The CIO, which has filed a friend of the court brief, said in it that, "What began as a Federal employees loyalty program has * * * found its way into all types of employment throughout the land" with repercussions on millions of citizens, which it asked the court to weigh in reaching its decision."

Other briefs have been filed in the case by the American Civil Liberties Union and the Engineers and Scientists of America. No date has yet been set for oral arguments.

SENATOR WALTER F. GEORGE, OF GEORGIA

Mr. MANSFIELD. Mr. President, I am somewhat embarrassed in what I am about to say, but I think now is as good a time as any to say it. I wish to take a few moments today to pay tribute to one of the truly great men of our time, a man we all have the honor to be associated with, and to call our colleague. I refer to the President pro tempore, WALTER F. GEORGE, senior Senator from Georgia.

Senator GEORGE is at the height of a brilliant career of service to his Nation and State. Chairman of the Committee on Foreign Relations, and a Senator for 32 years, he holds an almost unique position in this great legislative body. He is a symbol of everything fine in the traditions of the United States Senate.

WALTER GEORGE is a man to whom we all, Democrats and Republicans alike, look for advice and counsel in times of crisis. When he speaks, we listen. It is rare, indeed, to have a man of such great qualities in our midst, the undisputed dean among his Democratic colleagues, and a true bipartisan in matters of foreign policy and national security.

At this point in my remarks, I ask unanimous consent to have printed in the RECORD a fine tribute paid to a great man, taken from the St. Louis Post-Dispatch of February 27, 1955, entitled "GEORGE, of Georgia."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GEORGE, OF GEORGIA, FOREIGN RELATIONS CHAIRMAN, A SENATOR FOR 32 YEARS—THE MAN ROOSEVELT WANTED TO PURGE NOW AT PINNACLE OF HIS CAREER—AT AGE 77 HE IS AN INSTITUTION IN WASHINGTON—GOT CONGRATULATIONS, THANKS FROM PRESIDENT EISENHOWER FOR BIPARTISAN SUPPORT

(By Edward F. Woods)

WASHINGTON, February 26.—When courtly WALTER FRANKLIN GEORGE, of Georgia, moves down the center aisle of the United States Senate Chamber he leaves the impression that he owns the place, or at least is about to bid on it.

If GEORGE exudes something of a proprietary interest in the meeting place of the world's greatest legislative body, he may be pardoned. For 32 years and 3 months as of Washington's birthday the Chamber has periodically trembled at the impact of his powerful voice.

In that time he has become the undisputed dean of his Democratic colleagues. He is credited with being the only man in the Senate who can switch votes by making a speech. He has collided openly with two Presidents within his own party and today is openly a favorite of a Republican Chief Executive.

Now, in the twilight of his career, the 77-year-old Georgian has reached the pinnacle. He no longer is regarded as just another Senator. He has become an institution, taking his place in history along with the late Senators William E. Borah and Hiram Johnson. In a sense he has become the custodian of Senate traditions and the Senate's way of doing things.

As the Democratic chairman of a Democratic-controlled Foreign Relations Committee he is the Nation's most important instrument for effectuating the foreign policy of President Eisenhower. In this, he has inherited the role of the late Arthur H. Vandenberg, the Republican Senator from Michigan, who was an effective collaborator in the Roosevelt-Truman foreign policy.

GEORGE now is above legislative pulling and hauling. He is not what is known here as a cloakroom trader. Lobbyists shrink in horror at the thought of buttonholing him. While he is not a member of the Democratic policy committee, Senator LYNDON JOHNSON, of Texas, the majority leader, confers with him for 20 minutes to a half hour each noon hour as the Senate convenes, clearing with him such decisions as the policy committee may have reached on pending business.

His influence is such that it is hard to conceive of a coalition of which he was a member being beaten on any issue, though it did happen once. That was last year when Senator THOMAS C. HENNINGS, JR., of Missouri, a warm admirer of GEORGE, led a floor fight against the George amendments to limit the power of the President to make executive agreements with foreign governments.

To the amazement of his colleagues, Senator HENNINGS engaged in toe-to-toe debate with the distinguished Georgian and the amendment was beaten by the margin of one vote.

Senator GEORGE'S hold on his colleagues stems from two major sources: His age and tenure—and his voice and imperiously paternal bearing.

He makes a speech only when he has something very important to say, a rare quality in the Senate. On these occasions he could spellbind a rooster. He generally opens on a conversational tone, his pleasant southern accent washing soothingly over his listeners.

Then without warning, his voice hardens into a thundering rumble, one fist goes high

over his head, soon followed by the second and then down they both come as scorn and passionate indignation are commingled in a harsh finale intended to cast into outer darkness the issue or the person which is his target.

Senator GEORGE actually began to achieve the status of an institution in the last Congress, which was Republican-controlled, fashioning an astounding unity among the diverse Democratic elements on two major issues.

In one instance, Senator GEORGE did not approve of the way an Eisenhower appointee to the National Labor Relations Board, Albert C. Beeson, had failed to fully and frankly inform the Senate Labor Committee of a private pension arrangement he had with his former employer. GEORGE let it be known that he would vote against Senate confirmation of Beeson. On the rollcall only two Democrats failed to fall in line with him.

Later he likewise made known that he was in favor of recommitting to committee, or killing off, the administration-sponsored revisions in the Taft-Hartley law. On this rollcall every Democrat joined him. It was the first time in history of their party that the Democrats, who usually claw each other on labor union issues, voted unanimously on such a question.

His crowning achievement, however, came last January 28 when, as chairman of the Foreign Relations Committee, he guided the administration's resolution on defense of Formosa to a whopping 85-to-2 victory in the Senate. Nary a Democrat strayed on the rollcall and GEORGE achieved a noteworthy milestone in the conduct of bipartisanship in the cold war.

Senator GEORGE used forceful language in support of that resolution, declaring:

"I hope that no Democrat will be heard to say that because the President of the United States came to Congress he is thereby subject to criticism.

"He chose a courageous course, a course which would be taken only by a prudent man who knows the pitfalls along the course and who knows the horrors of war.

"No person can guarantee the results of any important public act. We cannot. But there is no man who is worth his salt * * * who is not willing to exercise his best judgment, his honest judgment in response to the President."

It is no secret that many Democrats found the calling for the defense of Formosa and its current tenant, Chiang Kai-shek, grossly unpalatable. And while the resolution undoubtedly would have passed anyway, the opinion here is that GEORGE alone was responsible for the overwhelming assent. GEORGE's vigorous support of the resolution was viewed by some as justifying claims during the 1954 campaign that a Democratic congressional victory would help rather than hinder Mr. Eisenhower in foreign policy matters.

President Eisenhower was so elated over the vote that he sent GEORGE a note describing his leadership on the Formosa resolution as superb and offering his congratulations and grateful thanks. The following day, Secretary of State Dulles personally conducted GEORGE from his suite at the Mayflower Hotel to the White House to take part in the signing ceremonies. It was GEORGE's 77th birthday.

There are some here who say privately that Eisenhower and Dulles are simply using GEORGE to push projects which are not compounded on a true bipartisan basis. He rejects such contentions, asserting that the Eisenhower-Dulles approach to bipartisanship on foreign policy is genuine and complete. He attributes to the White House no disposition to confront the Democratic leadership with decisions already made.

Senator GEORGE's influence is by no means confined to passage or defeat of legislation. In this city where foot-in-mouth disease is rampant, 44-year-old Majority Leader JOHNSON frankly exults that some of the dean's aloofness and reserve has rubbed off on him, thus restraining him from popping off to the press as does the minority leader, Senator WILLIAM F. KNOWLAND, of California.

With more than 32 years tenure behind him, Senator GEORGE is the fourth most durable man in Senate history. Ranking him in this respect were South Carolina's Ellison D. Smith and Iowa's William B. Allison, each of whom served 35 years and 5 months, and Wyoming's Francis E. Warren, who was a Senator for 37 years and 5 days.

Some of the Senator's critics regard him as an arch conservative. He calls himself a liberal, but a liberal within the Constitution.

GEORGE was born January 29, 1878, at Preston, Ga., the son of a tenant farmer. His childhood was one of hard work and privation. He acquired a one-room-schoolhouse elementary education and eventually went through Mercer University and into a successful law practice.

He became a judge and rose from the lower courts to the State supreme court. A studious and scholarly man, he devoted long hours to the history of the Constitution and its interpretation, strengthening his concept of the rights of the States and localities against potentially oppressive powers of a central government.

In 1922, firebranding Senator Tom Watson, of Georgia, died and GEORGE got the nod from Georgia business and utility interests to run for the vacant seat. His views have undergone some startling changes since then.

In a scorching 1922 campaign, GEORGE roundly denounced the League of Nations and all such foreign entanglements. He criticized the soldier bonus and proposed liberalization of immigration laws. The Volstead Act, he preached, should have stiffer penalties for illicit dealing in spirits.

Four years later, however, in the next primary campaign, his enemies attacked him for having voted for the World Court and, in 1928, after receiving 52½ national convention votes for the Democratic presidential nomination, he was supporting that implacable foe of prohibition, Al Smith, for President, and was denouncing the Volstead Act as a Federal invasion of a domain where it has no business to be—the regulation of a private citizen's habits and wishes.

In 1932, GEORGE opposed the nomination of Franklin D. Roosevelt for President, a misdeed which Roosevelt never forgot. However, after Roosevelt's election, GEORGE voted for NRA, AAA, TVA, SEC, and social security. He bridled against regulation of utility holding companies, the New Deal housing bill, and Roosevelt's plan to enlarge or as some put it, to pack, the Supreme Court. He energetically, but without success, fought the 1936 tax bill which included a levy on the undistributed profits of corporations.

His opposition to so much New Deal legislation earned him the hostility of the White House and President Roosevelt marked him for a political purge.

The President journeyed to Gainesville, Ga., in 1938 and with GEORGE seated behind him on the speaker's platform he informed the Peach State's citizens that he wanted GEORGE defeated in the upcoming primary. When the President finished, George got up, shook his hand, expressed his regrets over the President's position, and added:

"Mr. President, I accept the challenge."

He fought the President up and down his State in the best southern political tradition. He denounced outside interference, carpetbaggers, and another march to the sea. When he concluded his speeches a brass band rendered Dixie, and tears flowed.

In the voting, GEORGE won, thus becoming the hero of the anti-New Dealers. He polled 141,922 votes to 102,264 for Eugene Talmadge and 78,223 for Roosevelt's hapless candidate, Lawrence Camp.

In 1949, GEORGE found himself at loggerheads with another Democratic President; Harry S. Truman, over the President's plan to raise taxes to cover spending contemplated in the Fair Deal program and still keep the budget balanced. GEORGE thought the budget could be balanced by slashing Truman's spending plans and leaving taxes at their current levels.

GEORGE concedes that during the war years he was reputed, undeservedly, to have been unduly tender with corporations and wealthy people in tax matters as chairman of the Senate Finance Committee.

But a year ago he rose in wrath against the whittling away of tax exemptions for lower bracket income taxpayers, and he horrified his more conservative followers with a proposal that exemptions for dependents be increased immediately from $600 to $800 and eventually to $1,000. This bombshell failed to detonate.

When he is not fulfilling his function as pivot man in legislative and policy matters, GEORGE confines himself to his Mayflower Hotel rooms where he and his wife, whom he calls Miss Lucy, watch television and read. His habits are simple and he regards even White House receptions as above and beyond the call of duty.

In view of GEORGE's advanced age, it is no secret that several Georgia politicians are wondering when he will step down and give somebody else a chance, because no one will have the chance unless he gives it to him.

Asked if he might quit in 1956 and support Herman Talmadge as his successor, GEORGE replied:

"I do not know if I can support anybody at that time. I am somewhat in the position of an old friend of mine in Savannah who said that when he died he wished to be carried back to Savannah to be buried because every 2 years they would resurrect him at election time so he could vote. I do not know who would be my redeemer in such circumstances, and, therefore, I do not know whom I would vote for."

Mr. THYE. Mr. President, I wish to associate myself with the remarks of the distinguished Senator from Montana [Mr. MANSFIELD] paying tribute to the distinguished President pro tempore of the Senate, the Senator from Georgia [Mr. GEORGE], who is now occupying the chair.

Mr. SYMINGTON. Mr. President, I should like to say that the junior Senator from Missouri is most gratified that the St. Louis Post-Dispatch had the wisdom to pay deserved tribute, as it did in the article presented by the junior Senator from Montana, to the distinguished senior Senator from Georgia and President pro tempore of the Senate, WALTER F. GEORGE.

The PRESIDENT pro tempore. If the Chair may be permitted to do so, he desires to thank both the Senator from Montana, the Senator from Minnesota, and the Senator from Missouri for their generous references to him.

MEETING IN WASHINGTON OF NATIONAL BOARD MEMBERS OF FEDERATION OF REPUBLICAN WOMEN

Mr. DIRKSEN. Mr. President, I should like to take about a minute to call attention to a meeting which took

place in Washington during the past 3 or 4 days of a very dedicated group of women who are the national board members of an organization known as the Federation of Republican Women. They operate through 4,000 units or chapters and represent 500,000 women in the Republican Party.

While, of course, they are affiliated with a political institution, the Republican Party, they, nevertheless, serve an extremely useful purpose in that they direct the attention of people everywhere to issues that constitute challenges at home and abroad. So I think I should commend the service they render to our country and their fellow citizens.

They held a very constructive conference and seminar in the Nation's Capital, which included, among other things, addresses by Members of the Senate, visits to agencies of Government, and also a visit with the President of the United States.

The PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

AMENDMENT OF AGRICULTURAL TRADE AND ASSISTANCE ACT OF 1954

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 43, Senate bill 752.

The PRESIDENT pro tempore. The bill will be stated by title, for the information of the Senate.

The LEGISLATIVE CLERK. A bill to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture and Forestry with an amendment.

SENATOR MAGNUSON, OF WASHINGTON

Mr. JACKSON. Mr. President, on Friday last my distinguished senior colleague, Senator WARREN G. MAGNUSON, was given a testimonial dinner at our State capital, Olympia, Wash. The dinner was in honor of Senator MAGNUSON'S 25 years of devoted public service, and was arranged by distinguished members of the State legislature. It was attended by outstanding leaders from all over the State. On this occasion he received congratulatory messages from national leaders in business, labor, and civic affairs.

Mr. President, it has been my distinct honor to be closely associated with Senator MAGNUSON during 15 of his 25 years of brilliant public service. He first entered public life in 1930, when he was appointed special prosecuting attorney for King County, Wash. Two years later he was elected to the State legislature, where he quickly became one of the leaders of that body. In 1934 he was elected prosecuting attorney of his home county. In 1936 he became the second Democrat ever to have been elected to the Congress from what is now the First Congressional District. He served continuously in the House of Representatives until he was elected to the Senate in 1944. He was reelected in 1950, and is now 13th in seniority in the United States Senate.

At the present time, Senator MAGNUSON is serving as chairman of the Interstate and Foreign Commerce Committee. This is the first major chairmanship a Senator from the State of Washington has held since 1931, at which time Senator Wesley Jones terminated his service as chairman of the old Senate Commerce Committee.

Senator MAGNUSON is the senior member of the delegation from our State, and members of both parties in the State of Washington owe a debt of gratitude to him for his leadership, inspiration, and constant help.

Mr. President, I know of no one who has been more cooperative in working for the interests of our State and the Nation than has WARREN MAGNUSON. His long years of public service constitute one of the most valuable assets the people of the State of Washington have. As the junior Senator from Washington, I am honored indeed on this occasion to join with the people of our State in extending to him every good wish.

Mr. CLEMENTS. Mr. President, will the Senator from Washington yield to me?

Mr. JACKSON. I am happy to yield to my distinguished colleague from Kentucky.

Mr. CLEMENTS. Mr. President, I desire to join with my colleagues in this well-deserved salute to our good friend and able public servant from Washington, the senior Senator from that State, WARREN MAGNUSON.

It is not without reason that he is celebrating his silver anniversary in public life. Such celebrations do not just happen. In our democracy the voice of the people is heard, and when they find wanting a public servant whom they have elected they retire him from public service long before he has completed 25 years of service.

The people of Washington have not found WARREN MAGNUSON wanting. He is an outstanding western legislator. He loves the West and fights for the West, as he fights for the Nation. Instinctively he is on the side of the people. His service to the Nation during the past 25 years covers the most tumultuous period in our history. Through depression, war, and cold war, WARREN MAGNUSON has measured up in every way to the public trust.

Mr. HILL. Mr. President, will the Senator from Washington yield to me?

The PRESIDING OFFICER (Mr. EASTLAND in the chair). Does the Senator from Washington yield to the Senator from Alabama?

Mr. JACKSON. I am very happy to yield to the distinguished senior Senator from Alabama.

Mr. HILL. Mr. President, I wish to say how happy I am to have heard these fine tributes to the distinguished senior Senator from Washington [Mr. MAGNUSON], both the tribute by his colleague, the distinguished junior Senator from Washington [Mr. JACKSON], and that couched in the eloquent words of our acting Democratic leader, the distinguished senior Senator from Kentucky [Mr. CLEMENTS].

For a number of years it has been my pleasure and my privilege to serve with the senior Senator from Washington in the Senate, and previously I served with him in the House of Representatives. I know how able, how devoted, and how brilliant he is. I know the fine leadership he displays in working, laboring, and fighting for the advancement of the programs designed to promote the welfare and the happiness of all the people.

I congratulate the State of Washington on having two such brilliant and outstanding Senators as Senator MAGNUSON and Senator JACKSON.

Mr. MANSFIELD. Mr. President, will the Senator from Washington yield to me?

Mr. JACKSON. I yield to my distinguished colleague the junior Senator from Montana.

Mr. MANSFIELD. Mr. President, I wish to join with my colleague and longtime friend the junior Senator from Washington [Mr. JACKSON], as well as with the acting majority leader, the senior Senator from Kentucky [Mr. CLEMENTS], and the senior Senator from Alabama [Mr. HILL] in the compliments they are bestowing this day on the senior Senator from Washington [Mr. MAGNUSON].

I, too, have had the pleasure of serving in the House of Representatives with him, and I wish to say that, in my opinion, he is one of the great men the Northwest has produced, and that those of us who come from that area in particular look to him for leadership, advice, and counsel.

I am happy that he has completed 25 years of public service in the public good; and I only hope that the next 25 years will see a continuation of the outstanding activities of this man, who has represented so well his State and the Nation.

The PRESIDING OFFICER (Mr. EASTLAND in the chair). Let the present occupant of the Chair state that for many years he has served on the Judiciary Committee with the senior Senator from Washington [Mr. MAGNUSON], who has been an outstanding member of that committee.

From the Chair's observation, the Chair does not believe that any other Member of Congress has succeeded in having passed more legislation of benefit to his people and the people of the Nation than has the senior Senator from Washington. Senator MAGNUSON is a distinguished Member of this body who has made great accomplishments for his State, for the great western region, and for the Nation; and the Chair hopes for him many more years of successful public service.

Mr. NEUBERGER. Mr. President, will the Senator from Washington yield to me?

Mr. JACKSON. I am glad to yield to the junior Senator from Oregon [Mr. NEUBERGER].

Mr. NEUBERGER. I thank the Senator from Washington very much.

Mr. President, I should like to speak very briefly and associate myself with the tribute being paid to the senior Senator from the State of Washington, WARREN MAGNUSON.

Mr. President, no other two States have problems which are more closely related and are more in common than do the States of Oregon and Washington, which share the great Columbia River, the principal resource of the Pacific Northwest.

Whenever there has been a question of whether the resources of that area should be developed in the public interest or for special interests, the senior Senator from Washington, WARREN G. MAGNUSON, has always been found fighting for the public interest. For example, within the next 2 weeks there will be introduced proposed legislation, bearing the names of many Members of this body, providing for the public, Federal multipurpose development of Hells Canyon, the greatest hydroelectric-power site left on the North American Continent. Everyone knows, so it is almost unnecessary to state, that in the forefront of that battle will be found the senior Senator from Washington. Long before I came to this body, I was writing about such developments in the Pacific Northwest; I believe I wrote the first magazine article about Grand Coulee Dam, in Harper's magazine. Even then, I found WARREN MAGNUSON, as a member of his State legislature, taking wise leadership in the fight for the proper development of the resources of the Pacific Northwest.

I wish to say that my senior colleague from the State of Oregon [Mr. MORSE] has asked me to express for him, as well as on behalf of myself, our gratitude to the State of Washington, our neighboring State across the Columbia River, for sending to the Senate so able a senior Senator as WARREN G. MAGNUSON, who has taken such keen and outstanding an interest in the problems of both States.

I appreciate very much indeed, Mr. President, the courtesy of the junior Senator from Washington [Mr. JACKSON] in yielding to me at this time.

Mr. JACKSON. I now yield to the distinguished junior Senator from Tennessee [Mr. GORE].

Mr. GORE. Mr. President, it is worthy of consideration by his colleagues in the Senate that the State of Washington has recognized in a formal way the outstanding service, noble character, and fine talents of its distinguished senior Senator [Mr. MAGNUSON]. Such recognition certainly has the approval of all his colleagues.

Having served with WARREN MAGNUSON in both Houses of Congress for 17 years, I feel that I know the man, and know the statesman.

The junior Senator from Oregon [Mr. NEUBERGER] has just referred to his consistent fight for the development of the resources of the Northwest in the public interest. I can testify to the correctness of the statements of the junior Senator from Oregon; but I should like to broaden the scope of the description of the service of the senior Senator from Washington. I have seen him fight for the development of the resources of the entire country, for the benefit of all the people. In 17 years I have never known of WARREN MAGNUSON, either as a Representative in Congress or as a Senator, taking either a niggardly or a niggling attitude. He possesses the ability to recognize the national interest. It is his philosophy that a program which is good for the New England section of the United States is likewise good for his section of America, and, indeed, for all America. He has viewed the problems confronting him and his colleagues during the vexatious years of his service in that light, and has brought to both Houses of Congress and to the leadership of his State the kind of vision, courage, and warm human compassion that we seldom see.

The senior Senator from Washington is a proper subject of honor, and it is well that his service should be accorded proper honor. As he goes on through the years in the fullness of his manhood, serving still further and with greater ability and increased strength, we shall see him become more renowned. The able assistance, fine enthusiasm, and outstanding ability of his brilliant junior colleague will add not only to his stature, but the stature and renown of the State of Washington.

Mr. JACKSON. Mr. President, I now yield to the distinguished senior Senator from Tennessee [Mr. KEFAUVER].

Mr. KEFAUVER. Mr. President, I am honored to follow my colleague from Tennessee in saying a few words about the distinguished senior Senator from Washington, WARREN MAGNUSON.

I became a Member of the House of Representatives in 1939, and came to know the then Representative MAGNUSON. We have been very close personal friends since those days, both in the House of Representatives, and later in the United States Senate.

Senator MAGNUSON knows how to get along with his colleagues in both Houses of Congress, and he always maintains a very friendly attitude toward members of the executive department of the Government.

One thing which should be pointed out is that the two Senators from Washington constitute a wonderful team, working not only for the welfare of the Nation, but for the development of the great Pacific Northwest. They have always worked together. They have supported each other as Representatives from the State of Washington, and they have stood together as Senators for the advancement of that great area.

No section of the United States has made more remarkable progress agriculturally than has the Pacific Northwest. Land is being reclaimed, irrigated, and developed. Large areas, which not many years ago were arid, have come into cultivation. Rivers are being harnessed. Mineral resources are being utilized. New industries have been brought to the Pacific Northwest.

I think one of the main reasons why this great development has taken place has been the excellent leadership which the senior Senator from Washington has given in all efforts looking toward a greater Northwest. In these efforts, he has been joined by his distinguished colleague, the junior Senator from Washington [Mr. JACKSON].

As my junior colleague [Mr. GORE] has said, the senior Senator from Washington not only thinks about the Pacific Northwest but appreciates the importance of developing all the resources of the entire Nation. In our fight for the Tennessee Valley Authority, we have had no better friends than the Senators from Washington and their associates from the State of Oregon.

I have served on several committees with the senior Senator from Washington. He knows how to get things done. He presents his facts in a quiet but forceful way. Many times in committees and on the floor of the Senate, as well as the House of Representatives, I have seen him present an amendment which might have seemed minor, but which would prove to be very important in promoting the development and progress of a great section, and his point would usually prevail.

It should also be pointed out that he has always been a great friend of Alaska. I think the Alcan Highway and the development of many of the resources of Alaska, bringing this great Territory closer to our country, have been the result of his foresight, his devotion, and his energy.

I feel that the important Committee on Interstate and Foreign Commerce of the Senate, with its wide jurisdiction over the transportation and communication systems of our country, is very fortunate in having as its chairman this young man of great ability, energy, and experience, with the know-how which he has acquired over the years. In my opinion, he will be one of the great chairmen of all time of the Committee on Interstate and Foreign Commerce.

Not only have the people of the Pacific Northwest been fortunate in having the two present Senators from Washington representing them in legislative bodies in the Nation's Capital during all these years, but I think they have made a notable contribution to the general welfare of the United States.

Mr. JACKSON. Mr. President, I now yield to the distinguished Senator from Oklahoma [Mr. MONRONEY].

Mr. MONRONEY. Mr. President, I thank the distinguished junior Senator from Washington.

Mr. President, it is always a great satisfaction to realize that a State which has been ably served for a quarter of a century officially recognizes the distinguished and outstanding service of one of its public servants. It is even more gratifying to note that the distinguished servant so honored is in the legislative branch of the Government, because in that field it is sometimes harder to leave a lasting impact than it is in the other two branches of Government, the judiciary and the executive.

We who serve with Senator MAGNUSON, the senior Senator from Washington, are gratified to know that the people of his home community, of his home State, in

the great Northwest, recognize and appreciate his greatness as much as do those of us who have served with him in the House of Representatives and in the Senate.

It has been my privilege to serve with Senator MAGNUSON for 17 years. I know the great impact he made in his efforts to give America a first-rate merchant marine, in order to provide the ships that were necessary for us to win victory in World War II. I know what he has done for the development of the natural resources of the Pacific Northwest.

I also know of the great faith and understanding he has in the leadership that has come to him officially in the present Congress through the chairmanship of one of the most important committees of the United States Senate. I refer to the Committee on Interstate and Foreign Commerce, which has widespread jurisdiction over many important resources and developments, including communications and transportation.

Senator MAGNUSON is well qualified to perform those tasks. He has been well qualified to perform all the other great services he has rendered in Congress, as a member of the Committee on Appropriations and of other committees. His work has been outstanding. Therefore, I am glad to join with my colleagues in expressing appreciation of the wonderful recognition, deservedly due him, accorded him by the people of his home State on the 25th anniversary of his legislative service.

Mr. JACKSON. Mr. President, I now yield to the junior Senator from Missouri.

Mr. SYMINGTON. Mr. President, it has been my privilege to know Senator MAGNUSON for many years. Ever since I became a junior Member of the Senate, he has gone out of his way to show kindness to me and to give me the benefit of wise counsel, for which I have always been very grateful.

I am glad to note that the people and the legislature of his home State are according him the honor which is justly his due.

Although Senator MAGNUSON is perhaps known primarily in the Northwest as one who is interested in such outstanding projects as public power and the development of American maritime interests, I first knew him when he was interested equally as much in airpower.

Few people realize that most of the bombers which have helped to build up our airpower in recent years were designed and most of them built in Seattle, Wash. The greatest bomber of its day, the B–17, followed by the B–29, which was built toward the end of World War II, then the B–50, and now the new intercontinental jet bomber, the B–52, were all either designed or built in the State of Washington.

I believe that Senator MAGNUSON has shown as much understanding of airpower as has any other Member of the Senate.

When I was connected with the Air Force, his advice and assistance were of great help to all in that branch of the service.

For these and many other reasons, it is with a great deal of pleasure and respect that I join my colleagues in extending congratulations to our dear friend and colleague, Senator WARREN MAGNUSON.

Mr. JACKSON. Mr. President, I now yield to the distinguished junior Senator from Georgia.

Mr. RUSSELL. Mr. President, I wish to avail myself of this opportunity to associate myself with the Senators who have spoken words of congratulation and of commendation to the distinguished senior Senator from Washington upon the completion by him of a quarter of a century of public service.

It has been my privilege to serve on the Committee on Appropriations with Senator MAGNUSON and to have been associated with him on the floor of the Senate since he first became a Member of the Senate. I know of his earnest and unfaltering interest in the development and conservation of the natural resources of the United States. I worked with him on legislation which affects the agricultural interests of the Nation. I know that no one would refer to his public service without mentioning his contribution to the maritime industry and the development of electric power.

It is unusual for one to have served 25 years and still to be a comparatively young man. It is even more unusual for one of Senator MAGNUSON'S age to have attained the seniority he has attained in the Senate. I believe he is 13th in seniority in the Senate. His long service has brought to him increasing responsibilities in the form of the chairmanship of one of the most important committees of the Senate, as well as by way of membership on other committees. All of us understand what seniority means in this body.

I congratulate Senator MAGNUSON, and I commend those in his home State who have honored him on this eventful anniversary. I congratulate the great State of Washington and the great Northwest and these United States upon the assurance that they will have the benefit of Senator MAGNUSON'S service, predicated, as it is, upon broad experience in the Senate, for many years to come.

Mr. JACKSON. Mr. President, I yield to the senior Senator from Oregon.

Mr. MORSE. Mr. President, it is a high privilege and a great pleasure for me to join in paying tribute to Senator MAGNUSON, of Washington. The State of Washington is very fortunate in being represented in the Senate of the United States by two such distinguished and aggressive men as Senator MAGNUSON and Senator JACKSON.

In the tributes which have been paid, enumeration has been made of the legislative enactments to which Senator MAGNUSON has made notable contributions during his 25 years of public service.

I wish to say a word concerning his activities on behalf of the farmers of the State of Washington. I do not know of anyone in the Senate who has been more cognizant of the problems of the farmers, particularly those of the great Northwest, than has Senator MAGNUSON, ably assisted by his colleague, Senator JACKSON. I wish particularly to refer to the work he has done in the field of the fruit industry in the Pacific Northwest—legislation of benefit to the fruit industry he has introduced and has had passed. He has insisted invariably that in connection with our foreign trade program we should not follow a course of action which would amount in effect to uprooting thousands of acres of orchards. That is what would happen if the profits were taken out of that enterprise; and it would have happened except for the very effective work done by Senator MAGNUSON and his colleague and other Senators, one of whom I see on the floor, the Senator from Florida [Mr. HOLLAND], all of whom have worked together on the problems which have confronted the fruit industry of the Nation. Senator MAGNUSON has a great record of true friendship for the farmers of his State and of the country, but always on the merits of the issue, not on the basis of seeking to get something to which the farmers are not actually entitled.

The Senator from Missouri [Mr. SYMINGTON] has mentioned the fact that the senior Senator from Washington has made notable contributions in the field of aviation. I have worked with him, as the junior Senator from Washington knows, in connection with aviation problems pertaining to Alaska and the Hawaiian Islands. His fine record on that issue speaks for itself, as does his record in regard to Air Force defense. He and his colleague [Mr. JACKSON] represent a great State of the Pacific Northwest, the State of Washington, as the junior Senator from Oregon [Mr. NEUBERGER] and I represent the State of Oregon. We are aware of the threat posed by the tongue of Siberia which is sticking out at us across the very narrow martime area near Nome, Alaska. We know who would be hit first if the Russian air might should ever leave Siberia or Big Diamede, and start toward the United States. When we read the RECORD we become cognizant that the senior Senator from Washington recognizes the importance of strong defenses in that area as well as of strong defenses in the entire Pacific Northwest. The people of our section of the Nation are greatly indebted to the senior Senator from Washington for the work he has done in the field of air defense.

As was mentioned by the Senator from Georgia [Mr. RUSSELL], the senior Senator from Washington has made very valuable contributions with reference to maritime problems. For a long time thousands of workers in the State of Washington have owed a great debt to the senior Senator from Washington so far as their livelihood is concerned. It is my opinion that the shipyards there would not have been developed to the importance which they now have had not the senior Senator from Washington worked so hard in their behalf and in behalf of the workers employed by them.

In the field of power development and irrigation and the maximum development of the natural resources of the Pacific Northwest, he has no peer in the Senate of the United States. It is a great pleasure to me to work shoulder to shoulder with him, as we shall be working together on the floor of the Senate next week on a matter involving a great

natural resource development for the improvement of our section of the country, because the senior Senator from Washington recognizes, as do the junior Senator from Washington [Mr. JACKSON], the Senator from Montana [Mr. MURRAY], and other Senators, that the economic value of our section of the United States depends upon the development of the maximum potential of its great rivers, such as the Columbia and the Snake.

The senior Senator from Washington has become a symbol, a personification, of the maximum of development of the potentialities of the vast resources of the great Northwest. The people of the State of Washington owe him a very great debt, because his statesmanship has brought benefits to the State of Washington, not in the millions of dollars, Mr. President, but actually in the billions of dollars, when we begin to evaluate his public service over a quarter of a century.

Therefore, Mr. President, because of his record and because it is thrilling to pay tribute to the living, and always sad to pay tribute to the dead, I particularly enjoy this opportunity to pay tribute to a great living statesman, the senior Senator from Washington.

Mr. JACKSON. Mr. President, I now yield to the distinguished senior Senator from Montana [Mr. MURRAY].

Mr. MURRAY. Mr. President, I deem it a great honor to have this opportunity to participate in the tributes which are being paid to our distinguished colleague, the senior Senator from Washington [Mr. MAGNUSON]. I have known him for a great many years. My association with him commenced many years before I came to the Senate of the United States. I visit his State frequently, and when he visits Montana I wish to say that no Senator of the United States is more sincerely welcome in Montana than is the distinguished senior Senator from Washington. We have worked together over the years on problems concerned with the development of the natural resources of the great West. The notable progress which has been made in the Columbia Basin in recent years can be attributed largely to the splendid work of the able senior Senator from Washington and his colleague.

I recall my association with former Senator Bone, of Washington. We traveled through the State of Montana and the State of Washington on many occasions and in the Congress we worked together on power and reclamation projects. In like manner I have been associated with the present senior Senator from Washington and no one has worked more diligently, more effectively, and more efficiently for the program providing for the development of the Columbia Basin, which has brought about such tremendous growth and progress in that section of the country, than has the senior Senator from Washington.

I remember, Mr. President, when I first used to visit Seattle, 50 years ago. The situation was then entirely different from what it is now. There is now a huge power development there which has brought industry into that area in such large volume that it has become one of the great industrial sections of the United States. It is one of the marvels of American industrial growth.

Mr. President, the work of the senior Senator from Washington in the Senate has had the commendation of every Senator who knows of his able work and effective contributions in connection with the great power, reclamation, and irrigation programs which we have had under consideration here in the Senate over the years.

I deem it a great honor to be able to say these few words in support of my good friend the senior Senator from Washington; and while I am on my feet I wish to extend to his colleague, the junior Senator from Washington [Mr. JACKSON], my sincere felicitations on the splendid work he is doing.

I am proud to be associated with both of those great Senators, Mr. President. They are making vital contributions, not only to the development of their own State, but to the development of the Nation.

Mr. JACKSON. Mr. President, I now yield to the distinguished Senator from Mississippi [Mr. STENNIS].

Mr. STENNIS. Mr. President, I have enjoyed the complimentary statements which have been made concerning the senior Senator from Washington on the anniversary of the start of his public service. He was one of the most active Members of this body when I first came to the Senate. He attracted my attention because of his fine energy, his efforts, his persistence, and insistence on everything pertaining to the development of his particular area and of the country as a whole. Later, as a member of the Public Works Committee, I traveled through portions of that great area including several stops in his wonderful home State, and saw some of the fine results which have been achieved and various projects in which he had had a part.

My impression is that he has been one of the most active Members of the Senate. After all, Mr. President, results are the real test of a Senator; results are what count.

I used jokingly to say to him that I believed he carried around a pocketful of amendments. Regardless of what bill might be under consideration, he could pull an amendment out of his pocket that would change a bill somewhat more to his thinking and his ideas. That is my way of saying that he is active and diligent. There have been a great number of Magnuson amendments, and many of them have prevailed.

I am very glad to join with other Senators who are paying these deserved tributes. I consider the senior Senator from Washington to be a very valuable Member of the Senate.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. JACKSON. I yield to the distinguished senior Senator from North Dakota.

Mr. LANGER. I have been delighted to hear so many of my Democratic colleagues pay tribute to the distinguised senior Senator from Washington [Mr. MAGNUSON]. Senator MAGNUSON is not a Democrat at all; he is a Theodore Roosevelt-Bob La Follette-George Norris Republican, and has been such all his life.

Senator MAGNUSON was born at Moorhead, Minn., less than half a mile across the Red River from Fargo, N. Dak., and about 24 miles from where I was born. I have known him for most of his life.

Senator MAGNUSON was a student at the University of North Dakota, where he attended the agricultural college. He played quarterback on the football team of the Agricultural College of the University of North Dakota.

Most important of all, when he was practically an orphan, by whom was he educated? By the Republican national committeeman from North Dakota, Mr. William Stern. Mr. Stern was not only chairman of the Republican National Committee, but also for many years was Republican national committeeman from North Dakota, and for a long time Senator MAGNUSON was his protege.

Mr. Stern was responsible not only for Senator MAGNUSON's academic education but also trained him along political lines. The views which Senator MAGNUSON holds about public power, rural electrification, conservation, and similar programs, he received from William Stern, the former head of the Republican Party in North Dakota.

Senator MAGNUSON has done a magnificent job in connection with Alaska. Some time ago he was a member of a subcommittee investigating Federal penitentiaries, and was himself in charge of the investigation of penitentiaries in Alaska and Hawaii. That is a subcommittee which never receives any headlines. A Senator who is a member of that subcommittee will sometimes get up at 3 or 4 o'clock in the morning, go to a penitentiary, and learn at first hand what kind of food the prisoners or inmates are receiving. He investigates the living conditions; he determines whether there has been any discrimination among inmates in connection with their civil liberties. He investigates also the conditions of solitary confinement to which inmates may be subjected.

Senator MAGNUSON did excellent work in the investigation of prisons in Alaska, particularly the prison at Anchorage, a wooden building in which the lives of the inmates were endangered during their entire terms of confinement. The structure was a disgrace to the United States. Senator MAGNUSON succeeded in having the present fireproof building erected.

Senator MAGNUSON performed magnificent work in the development of Northwest Airlines, which started at Minneapolis and St. Paul and continued across the Pacific Ocean to Alaska and Hawaii. I was delighted to learn a few days ago, after the President had issued an order practically barring Northwest Airlines from flying to Hawaii, that through the diligent efforts of the distinguished senior Senator from Minnesota [Mr. THYE], who was assisted by the distinguished senior Senator from Washington, the Executive order was revoked. That great airline is now continuing to fly passengers to Alaska and Hawaii.

Senator MAGNUSON, who was a poor boy when he was reared in North Dakota and Minnesota, did every kind of work imaginable on a farm. He shucked corn and bundled wheat. He was an expert operator of a threshing machine. He hauled grain to the elevator. He plowed and harrowed and did every kind of farm work imaginable. Therefore, as a Senator he is intimately acquainted with the problems of farmers, which is perhaps one important reason why he has been so earnestly engaged in trying to solve their problems.

I am delighted that his colleague, the distinguished junior Senator from Washington, has called to our attention the fact that the people of the State of Washington honored Senator MAGNUSON a few days ago by tendering him a dinner commemorating 25 years of distinguished public service. I know that if the people of North Dakota and also, I believe, the people of western Minnesota, had realized that such a dinner was to be given for Senator MAGNUSON, they would have flooded the banquet with telegrams expressing their appreciation for the many things which the senior Senator from Washington has done for the rank and file of the people of those two States.

PROGRAM FOR TUESDAY, MARCH 8

Mr. CLEMENTS. Mr. President, I should like to state the program for next Tuesday, as it is the intention of the acting majority leader to move that the Senate adjourn until that day. On Tuesday, in addition to the call of the Executive Calendar, it is the intention to take up Calendar No. 40, Senate bill 941; Calendar No. 41, Senate bill 942; and Calendar No. 42, Senate bill 1051.

The bills referred to by Mr. CLEMENTS are, respectively, as follows:

S. 941, to amend section 13 of the Federal Farm Loan Act, as amended, to authorize the Federal land banks to purchase certain remaining assets of the Federal Farm Mortgage Corporation;

S. 942, to repeal Public Law 820, 80th Congress (62 Stat. 1098), entitled "An act to provide a revolving fund for the purchase of agricultural commodities and raw materials to be processed in occupied areas and sold; and

S. 1051, to amend section 8a (4) of the Commodity Exchange Act, as amended.

Mr. LANGER. Mr. President, will the Senator yield for a question?

Mr. CLEMENTS. I yield.

Mr. LANGER. May I inquire when House bill 4259, the Revenue Act of 1955, is to be taken up?

Mr. CLEMENTS. I am not in a position at this time to tell the Senator a specific date. However, it is certainly the intention of the acting majority leader to move that bill along as rapidly as possible.

Mr. LANGER. Would the distinguished Senator say that it might be taken up sometime next week?

Mr. CLEMENTS. I do not wish to be placed in that position at present, because there are some other measures on the calendar which likewise have certain priority. However, I can assure the Senator that the revenue bill will not be unduly delayed. It is the intention and the hope of the acting majority leader that action can be taken on that measure, which is of such vital importance to so many, at the earliest date consistent with the wishes of those on both sides of the aisle with respect to it, and also another bill on the calendar.

AMENDMENT OF AGRICULTURAL TRADE AND ASSISTANCE ACT OF 1954

The Senate resumed the consideration of the bill (S. 752) to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks.

Mr. EASTLAND. Mr. President, the unfinished business is S. 752, a bill to repeal the buy-back provision of Public Law 480, which was passed last year. The measure is noncontroversial. It largely affects—in fact, it solely affects—the United States cotton industry.

Under Public Law 480, a cotton shipper, when he sold cotton, was obligated to repurchase from the stocks of the Commodity Credit Corporation the same number of bales of cotton, of the same grade, and of the same staple.

The bill under consideration repeals the buy-back provision for the reason that that provision cannot work in the case of cotton.

The world price of cotton and the American price of cotton are about the same. American cotton shippers have found that when they have to buy back from the stocks of the Commodity Credit Corporation an amount of cotton equal to that which they have sold, frequently the prices of the Commodity Credit Corporation cotton are 2 or 3 cents a pound above the selling price. That prevents the sale of the cotton.

Then, too, it has been found that frequently the stocks of the Commodity Credit Corporation do not contain the same grade and staple of cotton as that which has been exported; therefore, the Commodity Credit Corporation cannot make the sale.

The bill has been endorsed by the Department of Agriculture. Assistant Secretary of Agriculture James A. McConnell testified in favor of it before the Committee on Agriculture and Forestry.

The bill has been endorsed also by the American Farm Bureau Federation, the National Cotton Council, the National Grange, and the Cotton Textile Institute. In fact, all the farm organizations and all other organizations concerned have endorsed the bill.

The subcommittee held extensive hearings, and not a single witness appeared in opposition to the measure. The bill is noncontroversial, and I urge its enactment.

The PRESIDING OFFICER. The amendment will be stated.

The amendment of the Committee on Agriculture and Forestry was, on page 2, line 11, after the word "amended.", to insert:

The commodity set-aside established for any commodity under section 101 of the Agricultural Act of 1954 (68 Stat. 897), shall be reduced by a quantity equal to the quantity of such commodity financed hereunder which is exported from private stocks.

So as to make the bill read:

Be it enacted, etc., That section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954 is amended to read as follows:

"SEC. 102. (a) For the purpose of carrying out agreements concluded by the President hereunder, the Commodity Credit Corporation, in accordance with regulations issued by the President pursuant to subsection (b) of this section, (1) shall make available for sale hereunder to domestic exporters, surplus agricultural commodities heretofore or hereafter acquired by the Corporation in the administration of its price-support operations, and (2) shall make funds available to finance the sale and exportation of surplus agricultural commodities, whether from private stocks or from stocks of the Commodity Credit Corporation. In supplying such commodities to exporters under this subsection the Commodity Credit Corporation shall not be subject to the sales price restrictions in section 407 of the Agricultural Act of 1949, as amended. The commodity set-aside established for any commodity under section 101 of the Agricultural Act of 1954 (68 Stat. 897), shall be reduced by a quantity equal to the quantity of such commodity financed hereunder which is exported from private stocks."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SCHOEPPEL. Mr. President, I ask unanimous consent to have printed in the RECORD, immediately following the passage of S. 752, the report on the bill.

There being no objection, the report (No. 40) was ordered to be printed in the RECORD, as follows:

The Committee on Agriculture and Forestry, to whom was referred the bill (S. 752) to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks, having considered the same, report thereon with a recommendation that it do pass with an amendment.

This bill which would repeal the buy-back provision of the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83d Congress, was favorably considered by a subcommittee. The subcommittee's report is attached hereto and fully explains the bill and the amendment:

"REPORT OF THE SUBCOMMITTEE ON AGRICULTURAL EXPORTS OF THE COMMITTEE ON AGRICULTURE AND FORESTRY ON S. 752

"Your Subcommittee on Agricultural Exports, to whom was referred the bill (S. 752) to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks, having considered the same report thereon with the unanimous recommendation that it pass with an amendment.

"The report of the Department of Agriculture recommending enactment of this bill as amended by the subcommittee amendment is set out at the end of this report. Representatives of the American Farm Bureau Federation, the National Grange, and the National Cotton Council as well as representatives of the Department of Agriculture testified in support of the bill at the hearings held by your subcommittee, and it has

also been endorsed by the American Cotton Shippers Association, the American Cotton Manufacturers Institute, and the National Grain Trade Council. No witnesses testified in opposition to the bill.

"This bill would remove the requirement that exporters of privately owned stocks under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480, 83d Cong.) acquire an equivalent quantity of Commodity Credit Corporation stocks. At present such acquisition is required by section 102 (a) of that act whenever the Corporation is in a position to supply the commodity.

"The necessity of locating and purchasing replacements from stocks owned or under loan to the Corporation (which in the case of cotton, for most qualities, is currently priced above the market) hampers trade by delaying sales, increasing prices, and adding unnecessary administrative detail. Since generally under the price-support program surplus stocks flow to the Corporation, there does not appear to be any advantage to the Government in requiring replacement from Corporation stocks. Rather such requirement may cause the Government additional expense by increasing the Corporation's volume of loans, acquisitions, and sales. For example an exporter of privately owned cotton under Public Law 480 must now replace that cotton with cotton owned or under loan to the Corporation. Under these circumstances it may be expected that the cotton coming out of CCC owned or loan stocks will be replaced by new cotton going under loan so that the net result of the present requirement is the addition of unnecessary redtape. On February 1 the market price for Middling 15/16-inch cotton at Memphis was 34 cents per pound, while the price for CCC-owned cotton was 36.21 cents and CCC-loan cotton of the same quality was somewhere between 34 and 37 cents, depending on the amount the producer gets for his equity. While under the law, CCC could sell its cotton to replace that exported under title I of Public Law 480 at any price it might see fit, it has set such price at the price prescribed by Congress for sales for domestic use in order to encourage use of loan stocks rather than owned stocks and thereby reduce the quantity of loan cotton required to be taken over August 1, 1955. The exporter must take this difference in market price and replacement costs into account in determining the export price of the cotton to be delivered against the sale, and if it results in a higher export price for the cotton, transactions under Public Law 480 will be made that much harder to negotiate.

"The amendment recommended by your subcommittee would add at the end of the bill the following new sentence:

" 'The commodity set-aside established for any commodity under section 101 of the Agricultural Act of 1954 (68 Stat. 897) shall be reduced by a quantity equal to the quantity of such commodity financed hereunder which is exported from private stocks.'

"This would require the set-aside under section 101 of the Agricultural Act of 1954 to be reduced by the quantity of private stocks exported under title I of Public Law 480. This is in keeping with the original purposes of the Agricultural Act of 1954, section 103 (a) (2) of which provides for reduction of set-aside through disposition of Commodity Credit Corporation stocks under title I of Public Law 480. While many witnesses who testified at the hearings on the Agricultural Act of 1954 pointed out how useful the set-aside might be to meet emergency needs, the principal purpose of the set-aside was to insulate the existing surplus from the market so as to permit the new price-support program to function properly. Disposition of the set-aside as rapidly as possible by means designed to avoid interference with the price-support program was always intended and provided for by the act. As is pointed out in the report of the Department of Agriculture title I sales constitute the only means of appreciably reducing the quantities of wheat and cotton in the set-aside; and it is therefore desirable that all title I sales, whether from public or private stocks, be applied to such reduction.

"The Department's report on the bill is set out below.

"JAMES O. EASTLAND, *Chairman.*
"SPESSARD L. HOLLAND.
"W. KERR SCOTT.
"MILTON R. YOUNG.
"ANDREW F. SCHOEPPEL.

"DEPARTMENT OF AGRICULTURE,
"Washington, D. C., February 17, 1955.

"Hon. ALLEN J. ELLENDER,
"Chairman, Committee on Agriculture and Forestry, United States Senate.

"DEAR SENATOR ELLENDER: This is in reply to your request of January 27, 1955, for a report on S. 752, a bill to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks.

"Subject to revision in accordance with the recommendation set out below, the Department would favor enactment of S. 752.

"Section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954 currently provides that the Commodity Credit Corporation shall make available for sale, under the act, surplus agricultural commodities acquired by the Corporation in the administration of its price-support operations, and shall make funds available to finance the sale and exportation of such commodities from its owned stocks, from loan stocks, or, if the Corporation is not in a position to supply the commodity out of its owned stocks, from privately owned stocks. That section also provides that to facilitate the use of private trade channels the Corporation, even though it is in a position to supply the commodity, may finance the sale and exportation of privately owned stocks under arrangements whereby the private exporter acquires the same commodity of comparable value or quantity from CCC stocks.

"The bill, S. 752, would amend section 102 (a) to provide that the CCC shall make its stocks of surplus agricultural commodities available for sale under the act and shall make funds available to finance the sale and exportation of surplus agricultural commodities, whether from private stocks or from stocks of the CCC. As amended by S. 752, section 102 (a) would enable United States exporters making sales under the program to ship private stocks without making corresponding purchases from CCC stocks.

"The operation of this amendment would affect cotton primarily at this time. Because the world price and the domestic market price of cotton are approximately the same, exporters can sell private stocks for export at competitive prices. Where this price relationship exists, and especially where these two prices approximate the support price as in the case of cotton, the overall advantages, including the net effect in reducing CCC holdings, will be equally as great whether surpluses are financed for export directly from private stocks or taken or replaced from CCC owned or loan stocks. The amendment would be helpful in eliminating the redtape involved in the replacement procedure and the operation of the program would be facilitated both from the administrative standpoint and from the standpoint of efficient operation of the program through private trade channels.

"It must be noted, however, that title I sales constitute a major means of reducing the commodity set-aside, and are the only means of appreciably reducing the quantities of wheat and cotton in the set-aside. If S. 752 were enacted in its present form, title I sales from private stocks would not result in reduction of the set-aside. It is, therefore, recommended that the bill be amended by adding at the end thereof the following new sentence:

" 'The commodity set-aside established for any commodity under section 101 of the Agricultural Act of 1954 (68 Stat. 897) shall be reduced by a quantity equal to the quantity of such commodity financed hereunder which is exported from private stocks.'

"Enactment of S. 752 would require no additional administrative or program funds.

"The Bureau of the Budget advises this Department as follows:

" 'It is understood that amendment of section 102 (a) of Public Law 480 is necessary to remove from the language of this section an unforeseen impediment to the export of cotton under title I of the act. On this basis, you are advised that there would be no objection to enactment of S. 752 amended as recommended by the Department.'

"Sincerely yours,

"TRUE D. MORSE,
"Under Secretary."

CHANGES IN EXISTING LAW

In compliance with subsection (4) of rule XXIX, of the Standing Rules of the Senate, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

"AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

* * * * *

"SEC. 102. (a) For the purpose of carrying out agreements concluded by the President hereunder, the Commodity Credit Corporation, in accordance with regulations issued by the President pursuant to subsection (b) of this section, (1) shall make available for sale hereunder [at such points in the United States as the President may direct] *to domestic exporters,* surplus agricultural commodities heretofore or hereafter acquired by the Corporation in the administration of its price support operations, and (2) shall make funds available to finance the sale and exportation of surplus agricultural commodities [from stocks owned by the Corporation or pledged or mortgaged as security for price support loans or from stocks privately owned if the Corporation is not in a position to supply the commodity from its owned stocks: *Provided,* That to facilitate the use of private trade channels the Corporation, even though it is in a position to supply the commodity, may finance the sale and exportation of privately owned stocks if the Corporation's stocks are reduced through arrangements whereby the private exporter acquires the same commodity of comparable value or quantity from the Commodity Credit Corporation], *whether from private stocks or from stocks of the Commodity Credit Corporation.* In supplying *such* commodities to [private] exporters under [such arrangements] *this subsection the* Commodity Credit Corporation shall not be subject to the sales price [restriction] *restrictions* in section 407 of the Agricultural Act of 1949, as amended. *The commodity set-aside established for any commodity under section 101 of the Agricultural Act of 1954 (68 Stat. 897) shall be reduced by a quantity equal to the quantity of such commodity financed hereunder which is exported from private stocks."*

NOTICE OF AVAILABILITY OF HEARINGS ON HOUSE BILL 4259

Mr. KNOWLAND. Mr. President, I understand the acting majority leader

is about to move that the Senate adjourn until Tuesday next. Before that is done, I should like to call to the attention of Members of the Senate the fact that the hearings before the Senate Committee on Finance on House bill 4259, to provide a 1-year extension of the existing corporate normal tax and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption, have been printed and are now available to all Senators. I have requested that the secretary for the minority make available to each Member on this side of the aisle a copy of the hearings. I hope that majority Members on the other side of the aisle will also have the hearings made available to them and that each will receive a copy, in order that the hearings may be studied over the weekend. Sometimes a point is raised that there has not been a sufficient time to read the hearings. The hearings are now available, and I hope that fact will expedite consideration of the tax bill next week.

ADJOURNMENT TO TUESDAY

Mr. EASTLAND. Mr. President, I move that the Senate adjourn until 12 o'clock noon on Tuesday next.

The motion was agreed to; and (at 2 o'clock and 1 minute p. m.) the Senate adjourned until Tuesday, March 8, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 4, 1955:

UNITED NATIONS

William A. Kimbel, of South Carolina, to be the representative of the United States of America to the 10th session of the Economic Commission for Europe of the Economic and Social Council of the United Nations.

Kingsley Davis, of New York, to be the representative of the United States of America on the Population Commission of the Economic and Social Council of the United Nations for a term of 3 years expiring December 31, 1957.

FEDERAL MARITIME BOARD

Clarence G. Morse, of California, to be a member of the Federal Maritime Board for the remainder of the term expiring June 30, 1956, vice Louis S. Rothschild.

SUBVERSIVE ACTIVITIES CONTROL BOARD

John Stephens Wood, of Georgia, to be a member of the Subversive Activities Control Board for the term of 3 years expiring March 4, 1958, vice Watson B. Miller, term expired.

UNITED STATES CIRCUIT JUDGE

Warren L. Jones, of Florida, to be United States circuit judge, fifth circuit, vice Louie W. Strum, deceased.

EXTENSIONS OF REMARKS

The Fourth Object of Rotary

EXTENSION OF REMARKS
OF

HON. ESTES KEFAUVER
OF TENNESSEE

IN THE SENATE OF THE UNITED STATES

Friday, March 4, 1955

Mr. KEFAUVER. Mr. President, I ask unanimous consent to have printed in the RECORD an address which I delivered on Tuesday of this week at the Memphis Rotary Club. As Senators know, I have been concerned by the manner in which our policy has been proceeding in the Far East. I am glad that the President clarified it publicly to some extent this week when, at his press conference, he assured all that this Nation will not help Chiang invade the mainland. I am glad also that the Secretary of State this week did not give Chiang assurances of help in support of the offshore islands. How I feel about this situation is expressed in my address to the Rotary Club.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

It is a great honor that you have invited me to participate in your golden anniversary of Rotary. I have been rereading the object of Rotary. I want to talk with you briefly today about the fourth object. As all of you know, it is: "The advancement of international understanding, goodwill, and peace through a world fellowship of business and professional men united in the ideal of service."

There is no greater need in the world today than just such organizations truly dedicated to just such an object. I am told that there are now 8,431 Rotary clubs, composed of 396,000 Rotarians in 89 different countries. Your Rotary foundation is contributing much toward international understanding by sending students all over the world for a year's study.

The activities of such an international group as yours, really working at the job of effectively carrying out the fourth object can contribute magnificently toward international understanding.

I feel that we Americans today face three major problems. Broadly stated they are these:

1. To preserve the peace.
2. To preserve our constitutional liberties and our free way of life, and
3. To preserve our economic health and prosperity.

All three of these blend together and are really aspects of the same problem—the problem of preserving a free society.

It is the first of these—the problems involved in preserving the peace—which I wish to discuss with you today and which fit in so well with your fourth object.

Anyone would be less than frank to say that we are not today in a very delicate situation in our international relations. Our world is balanced precariously between peace and war.

We want peace—but what has caused me so much concern is the fear that we are forever on the verge of stumbling into war, with the very best of intentions to be sure but with disastrous consequences nevertheless.

I think it is time that we raise our sights. We owe it to ourselves and to posterity to do so. We have been losing the forests in the trees. We haven't been able to see India for Matsu—we haven't been able to see Japan for Quemoy.

If a major war is to be avoided we cannot blink at the fact that the position of the United States in Asia generally is deteriorating steadily and that the Communists are gaining strength through improved tactics. If this trend continues the bulk of free Asia may follow China behind the Iron Curtain within the matter of a decade or so. Long before then, moreover, we may have lost whatever ability we now have to influence events.

An Asian policy broad enough, bold enough, and flexible enough to reverse this dangerous drift must have the support not only of a preponderant majority of the people here at home, but also of our free allies in Europe. Like it or not, there is a situation in the world in which the only alternative to coexistence may be no existence, which could be the result of an atomic or hydrogen war. And coexistence is a two-way street—there has to be give and take on both sides.

I don't think we have been proceeding in a very sophisticated way. For instance, we have just entered into a mutual defense treaty with Chiang Kai-shek. I was one of a minority who voted against it. In this treaty we mutually agree that if anyone attacks Formosa we will help Chiang and if anyone attacks the United States he in turn will help us.

What's mutual about that? I have no objection to defending Formosa. I think that the United States has both a moral and a legal obligation to do so. Formosa and the Pescadores were liberated from Japan largely by our arms during World War II. Pending their final disposition we are in what amounts to a sort of trustee position. Chiang is there by our forbearance.

We are, therefore, under obligations to defend Formosa, but let's not kid the world or ourselves by keeping up the fiction that Chiang is a great, dynamic force in Asia, and that he will be rushing over to defend the United States should anyone attack us in mutual exchange for our defense of Formosa.

I thought my colleague, from Tennessee, ALBERT GORE, put it very well when he said:

Of course, I have no sympathy whatsoever with the Red Chinese claim to Formosa, but I believe that until final disposition of the islands is determined, neither Chiang nor the Reds have sovereign rights to them. In this respect the Formosa treaty falls short of meeting the definition of a treaty, because treaties are agreements between sovereign nations. Chiang's government is not a sovereign nation, but a government in exile.

Furthermore, Formosa, doesn't include Matsu and Quemoy. These offshore islands are within 5 miles of the China coast. To say that their defense is necessary to the defense of Formosa is about like saying that the defense of Staten Island, in front of the harbor of New York, is necessary to the defense of Bermuda. They may be important to the morale of Chiang Kai-shek but one cannot really expect the Chinese Communists to lie down and play dead with his forces that close to their harbors.

I doubt if the administration intends to defend these islands. We are told that they must keep this unclear in order to confuse the Chinese Communists. The trouble is that it confuses us here at home, too, and it certainly confuses our allies. Thus during this past week we have seen Mr. Eden at the SEATO conference trying to clarify the situation as far as these islands are concerned and Mr. Dulles keeping it unclear.

I had hoped that the administration had given up its go-it-alone policy. However, when we had the Formosa resolution before Congress, it was obvious that it took the

British, our strongest ally, by surprise. Evidently there had been no consultation.

Unless the administration has a very firm rein on Chiang this is very dangerous business. His goal is to return to the mainland. I would rather see him there than Mao, but to be realistic I must say that he can't get there unless we put him there and that brings into play the Sino-Soviet defense treaty, which really is mutual. And I'm not willing to pay that price, particularly when I believe that if the Chinese people ever successfully throw over the Communist regime they will not be looking to Chiang for leadership, but will be looking to some new force.

One disturbing thing is that immediately after ratification of the Formosa treaty, Chiang announced that this meant the United States would defend Quemoy and Matsu even before Dulles indicated we would. At the very least, I prefer to have our policy announced by our own State Department, rather than by the Generalissimo.

A Far Eastern policy tied to Chiang is almost certainly doomed to fail, and by the time the failure is recognized it may be too late to disengage ourselves without grave loss of prestige.

The key to the security of Asia lies instead in the development of dynamic centers of indigenous stability and power which will lend their own growing strength to that of their neighbors—with the military and economic power of America and the Western Alliance discreetly in the background.

The two major potential sources of such stability are Japan and India. The history of our generation in Asia may be written around what happens in these two nations, with one-fifth of the world's population.

If they remain free, there is every reason to believe that the bulk of Asia will remain free. If they go under, the Communists are likely to take over from Tokyo to Cairo. We must continue to defend and support the smaller nations now favorable to us, but we should not assume that they constitute a decisive, effective anti-Communist force.

We must remember also that the real bulwark of our strength in the world is the Western Alliance. For the past 2 years while the administration has fought the so-called war party within the Republican Party the Western Alliance has taken a back seat. The doctrine of massive retaliation enunciated for domestic political purposes along with the unleashing of Chiang Kai-shek frightened our allies. They would stand exposed to massive annihilation.

Now the administration is again showing awareness of the Atlantic concept, but here, too, we have got to drop outworn theories and plan big things. My own strong conviction is that NATO must be more than just a military alliance. It must have political and economic ties as well in order to operate effectively. We will be effective neither in Europe nor in Asia as long as the free world itself is divided on its approach, for the Communist world is not.

Problems of American Foreign Policy

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Friday, March 4, 1955

Mr. WILEY. Mr. President, I ask unanimous consent to have printed in the RECORD an address which I was pleased to deliver on Washington's Birthday at Stephen's College in Columbia, Mo.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

PROBLEMS OF AMERICAN FOREIGN POLICY

(Address by Senator ALEXANDER WILEY at Stephen's College, Columbia, Mo., February 22, 1955)

I am grateful to you for asking me to speak on the problems of American foreign policy instead of on the answers. It is a great deal easier to recognize the problems than it is to find the solutions to them, and I will frankly confess at the outset that I do not know the answers to many of the problems I am going to discuss with you.

Still, it is helpful if one knows the problem to which one is looking for an answer. Indeed, a precise definition of the problem may point to an answer. And in this field defining the problem is not so easy an exercise as some people apparently think. There is a great temptation to oversimplify, and oversimplified problems lead to oversimplified solutions.

Let us begin, however, by attempting to define our objective. What is it that we are really trying to achieve through our foreign policy?

The answer to this question, I think, is fairly simple. We want a world in which the American people can live securely, peacefully, prosperously, and happily. That is what is at the bottom of our foreign policy—so far to the bottom that sometimes we lose sight of it and talk about the means by which we try to achieve it as if they were ends in themselves.

Some of us may have strong cultural and sentimental ties with Western Europe, but the preservation of democracy in Western Europe is properly an objective of American foreign policy, not for these reasons, but because the communization of Western Europe would immeasurably reduce the chances for the American people to live as they want to live.

Some of us may have strong emotional feelings about the righteousness of the cause of Chiang Kai-shek and the iniquity of Chou En-lai, but the defense of Formosa is properly an objective of American foreign policy, not for this reason, but because the occupation of Formosa by an unfriendly power would make the defense of the United States more difficult.

Some of us may feel called upon in a spirit of Christian charity to feed the hungry and clothe the naked of Asia, but the success of the Indian 5-year plan is properly an objective of American foreign policy, not for this reason primarily, however appealing it may be, but because a prosperous India can contribute to the peace and well-being of the American people while an impoverished India represents a positive threat to that peace and well-being.

Keeping our eye on the end and not on the means will help us to limit our activities and commitments somewhat, but even so our objective is a pretty big one and our national resources are limited.

Despite our great wealth and power, we are not strong enough to arrange the world precisely as we would like it. Neither are we strong enough or secure enough to ignore the rest of the world.

This seeming paradox sets the upper and lower limits of our foreign policy. Regardless of our likes or dislikes, there are many things which we cannot do, and at the other end of the scale there are some things which we must do.

Although we still occasionally hear voices urging upon us the doctrine of isolationism, I think the suicidal implications of that doctrine have by this time been pretty well established.

It is rather a curious thing, however, that some of the people who have been emotionally inclined toward isolationism have now swung to the other extreme. Whereas formerly they wanted to have nothing at all to do with the rest of the world, they are now clamoring for all kinds of impossible intercessions. I am sure you are familiar with the type. They have what we might call ultimatum mentality. They demand that we tell the Soviet Union and Communist China to behave themselves or else. What is even worse, they demand that we have the effrontery to tell one of our sovereign allies to do as we say "or else." Apparently they are not at all concerned that the "else" in one case might be hydrogen warfare and in the other case the loss of a valued ally.

One extreme is as bad as the other. The ostrich, which hides its head in the sand, is not particularly more stupid than the rhinoceros, which charges at every noise it hears.

Both of these extremes fail to take adequately into account four major international facts of this mid-20th-century world. These facts are:

1. The existence of aggressive communism with sufficient resources and power to constitute serious threat to all free societies.

2. The development of technology at an ever-increasing tempo.

3. The dynamic urge for political independence and economic development which characterizes most of the non-Communist world.

4. A shrunken world due to man's ingenuity.

Any one of these facts, taken alone, would present a challenge to American foreign policy. But they are interrelated, and the problems presented by each become more acute and more difficult because of the existence of the others.

NATURE OF COMMUNIST THREAT

Let us consider some of the implications of these facts, and let us begin with the nature of the threat posed by aggressive communism.

This threat is only in part military. It is also in part economic and political. It has been most immediate, however, in its military aspects, and this is the form in which it is easiest to meet.

Compared to our other problems, it is a relatively simple matter to draw a line around the Western Hemisphere or around Western Europe and to generate, in concert with our allies, enough military strength to create doubts in the minds of the potential aggressor as to his ability successfully to breach that line.

In his first annual message to Congress in 1790, George Washington, whose birthday we celebrate today, said: "To be prepared for war is one of the most effectual means of preserving peace."

Well-meaning people have sometimes criticized our policy as being too heavily militaristic; but when you are confronted with overwhelming military power, you necessarily have to devote first attention to building some sort of a defense structure. While doing this we have by no means neglected the political and economic aspects of the Soviet threat, but I think the time has now come when we must give these aspects even greater attention.

IMPLICATIONS OF HYDROGEN WEAPONS

One reason for this is found in the second major international fact which I mentioned earlier—the ever-increasing tempo of technological development. This is one of the factors which seems to me to make allout war a remote possibility, if, indeed, it is any longer possible at all. In the cobalt-coated hydrogen bomb, technology has given us something which, if it is not the absolute weapon, is at least so close to it as to raise grave questions as to whether its use would be self-defeating. Both the United States and the Soviet Union may very well at this moment have the mutual power of total

destruction. This includes, of course, self-destruction.

In dealing with nuclear weapons, you very quickly reach a point beyond which superiority becomes meaningless. If each side has the power to inflict a mortal blow upon the other, then it doesn't matter if one side has twice as much power as the other.

I once heard this point made in terms of less awesome weapons. For example: If I am pointing a .38-caliber pistol at you, and you are pointing a B–B gun at me, I have a very great superiority. But if we each increase our strength, so that I am pointing a .45-caliber pistol at you and you are pointing a .38-caliber pistol at me, then, although I would still have a superiority of sorts, it wouldn't really do me very much good in and of itself.

GROWTH OF TECHNOLOGY

As the military applications of technology make allout war more nearly impossible, and as the defensive strength of the free world increases in other respects, aggressive communism tends to shift its tactics from overt military action to other means. These other means cannot be met by military measures. They require a good deal of imaginative, constructive thinking on our part.

The United States has risen—one might almost say it has been thrust—to its present extraordinary position of wealth and prestige with only 6 percent of the world's land area and only 7 percent of the world's population. Other countries have more natural resources. Other countries have more people. But none has approached the United States in either total or per capita production.

There is an old saying that "It's what you do with what you have that counts." Americans have done the most with what they had. The atmosphere of political and economic freedom which has always prevailed in the United States has had a great deal to do with it, but there is more to it than that.

One of the great advantages which the United States has in world competition—perhaps at this moment in history the greatest single advantage—is our superior technology. This superiority is so marked that we are apt to take it for granted. But it is not inherent. There is nothing peculiarly American about genius. Indeed, there is evidence to suggest that genius occurs with no more frequency per million Americans than per million non-Americans. The difference lies in the fact that the American system of education and of social organization makes possible a greater development of the talents which are inherent in all people.

Recent studies, however, indicate that the Soviet Union is bending every effort to close the technological gap between itself and the United States. More scientists, engineers, and technicians are being trained in the Soviet Union than in the United States. And the evidence is that they are being well trained. This to me is an alarming fact, and one that we had better do something about.

It seems to me, for example, extremely wasteful of talented manpower to draft bright young scientists into the Armed Forces. These people can make a greater contribution to the security of the United States by working in laboratories than by carrying a gun.

We would also be well-advised to take steps to train more high school and college teachers in mathematics and the physical sciences. Our position in the world dictates such a course, quite apart from considerations of domestic policy and aid to education generally.

I would not want it inferred from this, however, that our schools should emphasize science and technology to the exclusion, or even to the neglect, of the humanities and other fields of learning. As short as we are of technicians, it could still be argued that our technological progress has outstripped our social progress. One need only look at the impressive fact that although scientists have discovered how to blow us up, statesmen haven't discovered how to keep them from it.

It is important, therefore, that we maintain, or if possible widen, the technological and economic gap between ourselves and the Soviet Union. At the same time, it is equally important that we narrow that gap between ourselves and the underdeveloped countries of the free world.

The economic disparity between the United States and these countries is great—and it is growing at an increasing rate. This trend is not in our national interest.

I have frequently said that the world today is one big neighborhood. Now, no matter how well off you may be yourselves, you cannot have a really good neighborhood if most of the families in it are on the verge of starvation. And the United States cannot continue rich and growing richer in this world neighborhood today so long as a majority of the human race, in the words of Fairfield Osborn, is "living in a crisis whose monotone is interrupted only by catastrophe."

People in this condition make poor customers. They also make poor suppliers—and more and more of the materials our industry uses come from abroad.

Thus, it is our national interest to encourage the economic development of underdeveloped countries on economic grounds alone. Given the existence of the Soviet threat, it is also in our national interest on political and military grounds. From the military point of view, highly developed countries are better able to defend themselves, and to join in measures of collective defense against overt aggression. From the political point of view, they are better able to defend themselves against subversion.

The matter takes on particular urgency at this moment in history because of the third of the major international facts which I mentioned at the beginning; the drive for political independence and economic development in these underdeveloped countries. These twin urges pose different problems for American foreign policy.

DRIVE FOR POLITICAL INDEPENDENCE

The United States itself was born in a revolution against colonialism, and it has traditionally been anticolonial. Most Americans can easily understand the desire of other people to govern themselves.

Our history confirms that we sympathize with that desire. We set a target date for the independence of the Philippines and stuck by it. We allowed the people of Puerto Rico to work out their own destiny, and they freely chose to become a self-governing commonwealth in association with the United States. We have turned down many opportunities to acquire overseas colonies and possessions.

We have used our good offices, through the United Nations and in direct contacts, to hasten the withdrawal of colonial powers from other territories, many of which are now sovereign states. At the same time, however, we have found some of our principal allies in the world struggle against aggressive communism among the colonial powers of Europe. Because of our close relations with these powers, we have been tarred throughout much of Africa and Asia with a kind of colonial guilt by association.

For understandable, but also, I fear, ill-founded, reasons, we have too frequently sought to steer a middle course, torn between military logic which dictated that we support our European allies on the one hand, and on the other hand our historic sympathies which dictated that we support the colonial peoples. After much travail of spirit, we have usually alined ourselves in the end with the colonial peoples.

Speaking now with the benefit of hindsight over the last 10 years, I think we should have been much less equivocal about our position in these matters. I do not say that in any spirit of criticism of those who have been in charge of our policies, because I am not prepared to say that I would have done it differently myself—given the circumstances which existed at the time. I am not one of those who believes in using hindsight to take an unfair advantage of someone in public office. Hindsight is useful only to the extent that it helps us to avoid mistakes in the future. But if we had it to do over, I would advocate a much stronger policy in favor of freedom and independence for the colonial areas of the world. It is not yet too late to adopt such a policy, and I believe we are moving in that direction. Actually, of course, more people have achieved political independence in the last decade than at any other comparable period of history.

DRIVE FOR ECONOMIC DEVELOPMENT

The record of economic development does not, unfortunately, show as much progress. A start—and on the whole, an encouraging start—has been made, but the difficulties are so complex that we do not as yet thoroughly understand the problem. Here, especially, we must guard against the tendency toward oversimplification against which I warned at the outset. There is a proneness in some quarters, and not least in some of the underdeveloped countries themselves, to think that massive doses of capital investment, administered by the United States, will bring about the desired results. The problem is not that simple, nor is the cure that expensive.

This is another field in which what the United States can do is limited, not only by our own resources but also by the attitudes of the people with whom we are dealing. After all, it is their countries we are talking about, and they can do as they please with them. We should—and we do—stand ready to help insofar as we properly can, but the initiative and most of the effort must come from the people who are being helped.

Economic development is an exceedingly intricate process, consisting of many things, but one of its most important aspects is psychological. Economic development—or economic stagnation to look at the other side of the coin—is in part a state of mind. It is the result of a combination of circumstances which can rarely, if ever, be induced from without. The urge for economic development must be self-generated.

At this point, it is important to distinguish between the urge for economic development and the simple desire for automobiles, air conditioners, and steel plants. Economic development is closely related to cultural attitudes and social organization. Before a country can economically have automobile factories, it must have enough people with enough money to buy the automobiles, and it must have highways for the automobiles to run on. It must have an agricultural production efficient enough to feed the persons who will have to give up farming themselves in order to work in the automobile factories. If it wants greater agricultural production, is it willing to change its system of land tenure which, in at least some underdeveloped countries, breeds inefficiency? If it wants greater industrial production, is it willing to step on the toes of the privileged few who have a vested interest in monopoly and restrictions on output—a privileged few who are usually in positions of great political power? Finally, if it wants eventually to have a complex corporate economy, is it willing to revise its social ideas about the position of women, without whom the American economy could not operate a single day?

These are all questions which can be answered only by the country itself. What its

answers are will indicate whether it really has the urge to develop or whether it merely wants the material results of economic development without the social and cultural reorganization which such development implies.

Economic development is only in part the result of capital investment. It is also an aggregate of technical skills—the knowledge and capacity to make efficient use of capital and capital goods. This is the field in which, in my judgment the United States can make the most worthwhile contribution to the economic development of underdeveloped countries.

In this context, then, it seems to me that the proper course for the United States to follow is to adopt, on a long-term basis, a policy of furnishing technical assistance to countries which are genuinely interested in making efficient use of it. You can get more results in work of this kind from a billion dollars spent over 10 years than from a billion dollars spent in 1 year. Indeed, if we tried to spend that much in 1 year in the areas I am talking about, it would be largely wasted. Among other things, it would cause a severe inflation and leave the country which was supposedly being helped worse off than before.

I would not rule out entirely funds for capital investment. But such activities should be limited to specific situations in which a clear and compelling case can be made.

The problem is further complicated by the fact that results are required quickly. Throughout Asia, Communist propaganda is telling people that communism offers a short-cut to economic development. The short-cut, of course, is slave labor but sometimes a people may not realize the implications of this until it is too late.

PEACEFUL USES OF ATOMIC ENERGY

We may now, thanks again to technology, have found a way to speed up the process within the framework of a free society. As atomic energy provided the weapons which may have made war impossible, so atomic energy may also have provided the materials which will make peace durable. Potentially the most hopeful development of the atomic age is the movement through the United Nations to establish an international pool of atomic energy materials for peaceful uses. Growing out of the President's great speech before the U. N. General Assembly in December 1953, this movement has made slow but nonetheless real progress and there are grounds for encouragement that more progress may be made in the next several months.

This promises, indeed, to be one of the great imaginative triumphs of American diplomacy. The Soviet reaction indicates that the Kremlin is fully aware of the danger which is posed to its own schemes. The first reaction of the Soviet delegate to the U. N. was automatic—he criticized the President's speech. Within 48 hours, his bosses in Moscow had taken a new reading on world opinion and instructed him to make noises of cooperation. In the intervening period, the Soviet Union has tried to block the project without giving the appearance of doing so—and without being wholly successful on either count. All in all, the last 14 months must have been a very trying time for the Communists. They have used it, however, to push feverishly ahead on their own research into the peaceful applications of atomic energy.

It is just as important that we stay ahead of the Soviets in regard to the peaceful use of atomic energy as it is that we stay ahead of them in regard to the military applications. It is perhaps not too much to say that the uncommitted world of Asia will go to the side that first develops a feasible means of using atomic energy for peaceful purposes on a large scale. For that reason, we can welcome the recent decision to supply heavy water to India.

It may very well be that the benefits of atomic energy can be made available in underdeveloped countries before they become practicable in countries such as the United States. In a country with a shortage of electric power and with fuel resources which are either insignificant or underdeveloped, for example, it would be economical to generate electricity from atomic energy at higher costs than in a country with abundant and well-developed supplies of other fuels.

We can only guess at what large quantities of atomic-generated electric power would mean in the underdeveloped countries of the world. Irrigation projects would become feasible to bring vast new areas of land into cultivation with all that that would mean in terms of an increased food supply, a better diet for the people, and improved distribution of land ownership. Multitudinous new light industries could be established.

There are undoubtedly other uses which we cannot now foresee. The potentialities are so vast that any sort of analogy with known experience is dangerous. But one comparison which suggests itself and which may be indicative, if not precise, is that the atomic powerplant may very well do for Asia what the steam engine did for Europe—and that, of course, is to remake totally the economy and society of the area.

We must not allow ourselves to become so preoccupied with day-to-day crises that we lose sight of these underlying, long-range problems that I have been talking about. But at the same time, of course, we have to deal effectively with today—or else tomorrow may never come. So let us now examine briefly 2 or 3 of our more pressing immediate crises. There are, unfortunately, a large number from which we can choose, but let us take two on opposite sides of the world—one in the Far East and one in Europe.

SITUATION IN FAR EAST

Paradoxically, it seems to me that both the chances of war and the chances of peace have increased in the Far East in the last month. This results primarily from the fact that both military and diplomatic activity in the area of Formosa have been stepped up, and the situation, which had been in something of a stalemate, has become more fluid. It is now off dead center, but we do not yet know which way it will move. This is another instance in which the power and influence of the United States are limited, and we must frankly admit that the decision is to a large degree up to the Communists. If they want war, there will be war. If they want to avoid war, they can do so very easily.

So far as the United States is concerned, our basic position is quite simple. Our national interests do not permit us to tolerate the occupation of Formosa by an unfriendly power. The island is an integral part of the chain which runs north and south in the Western Pacific from the Aleutians through Japan, the Ryukyus, Formosa, the Philippines, Australia, and New Zealand. World War II provided a vivid demonstration of what even some of these islands in unfriendly hands can mean to the United States. Formosa provides a potential enemy a means to outflank the Philippines, as well as our bases on Okinawa in the Ryukyus. The Philippines and Ryukyus, in turn, provide stepping stones to other islands and so on, until we reach Hawaii and the west coast.

Since the end of World War II, Formosa has been in friendly hands—namely, the Republic of China headed by Generalissimo Chiang Kai-shek. But its status in international law is not entirely clear. Prior to the 1890's, Formosa was occupied by the Chinese, and it was ceded by China to Japan some 60 years ago. In the Cairo Declaration of World War II, President Roosevelt, Prime Minister Churchill, and Generalissimo Chiang agreed that it should be returned to China. In the Japanese Peace Treaty, Japan renounced all claims to the island, but no affirmative disposition of it was made. It should be noted that the Soviet Union was a party neither to the Cairo Declaration nor to the Japanese Peace Treaty.

Since 1950 there have in effect been two Chinas—one on the mainland, which is Communist, and one on Formosa and a few other islands, which is not Communist. The United States, the United Nations, and most of the nations of the world have recognized the non-Communist regime on Formosa as the legitimate Republic of China.

As long as these two Chinas spar with each other across the Straits of Formosa there exists an area of international tension which is in constant danger of erupting into full-scale war. The situation has become increasingly acute since last September as the Communists have stepped up their attacks on the Nationalist-held islands and as they have filled the air with loud declarations of their firm resolve to capture Formosa.

Two other new elements have also been added. First, the United States has made it as clear as possible—we hope beyond the possibility of misinterpretation even in Peiping—that we will use American Armed Forces to protect Formosa and the Pescadores. We have already used our Armed Forces to protect the withdrawal of Chinese Nationalists from the Tachen Islands in a redeployment which will not only strengthen the overall Nationalist position but will also remove a potential trouble spot.

Second, the United Nations Security Council has taken cognizance of the situation, and efforts are under way to arrive at a cease-fire which will introduce at least some measure of stability into the situation. I do not know what the outcome of those efforts will be. So far as the U. N. itself is concerned, the prospects do not at this moment look particularly favorable. But at least the question has been opened up, and it is a matter of active concern to the world's statesmen, not only in Washington but also in London and New Delhi, and we may hope in Moscow and Peiping.

The United States should support these efforts to achieve a cease-fire, insisting only that our vital interests be protected. We can protect those interests without becoming involved in a war on the mainland of China. The prevention of such a war should be one of the primary objectives of our policy.

SITUATION IN EUROPE

Let us look now at Europe, where the stakes are, in some ways, even higher than they are in the Far East.

Western Europe contains the world's greatest aggregation of industrial capacity and technical skills outside the United States. With Western Europe a part of the free world, our preponderance of economic strength over the Soviet bloc is overwhelming. With Western Europe behind the Iron Curtain, our economic strength and that of the Soviet bloc would more nearly approach parity.

Through the Marshall plan, we strengthened Europe economically so that it could resist subversion and at the same time support a military effort of its own. Through the North Atlantic Treaty Organization, the military defenses of Europe have been further built up.

But one more tremendously important step remains to be taken, and that is to make the skills, the energies, and the resources of the people of Western Germany available for the common defense of Western Europe. We thought a way had been found to do that through the European Defense Community, but national jealousies were still too great, and the memories of three German occupations of France were still too vivid.

Now, through wise statesmanship, an alternative has been worked out to admit the Federal Republic of Germany to NATO, to restore German sovereignty, and to provide for the rearmament of Germany.

The London and Paris agreements which make provision for these steps have been approved by the French National Assembly, but we still wait for action by the French Council. We wait, also, for action by the German Bundestag.

Meanwhile, we see a political deterioration in both France and Germany. In France, one government crisis follows another. In Germany, delay brings with it increasing opposition to the agreements.

Actually, what is involved is more than simply adding German strength to our system of collective security in Western Europe. What is really involved is the integration of Europe—a dream of a thousand years that is now so close and yet apparently still so far from realization.

If we fail this time, we may not again soon have another chance. Yet here we have another instance of a situation beyond the control of the United States. We can only watch and wait and pray—and remind our friends in Europe that this is a time for responsibility, for rising—as Lincoln said—with the occasion, and for putting aside petty jealousies in the interests of the whole community.

UNITED NATIONS

No discussion of the problems of American foreign policy would be complete without considerable emphasis on the United Nations. It is perhaps not a very great exaggeration to say that no organization has ever accomplished so much in the face of so many difficulties. By any standard, the list of what the U. N. has done is impressive. It becomes positively astonishing when one remembers that the U. N. was founded on the principle of Big Five unanimity in the Security Council and that that unanimity hardly survived the San Francisco Conference.

To mention only a few of the U. N.'s accomplishments, it got Russian troops out of Azerbaijan, it ended the Israeli-Arab fighting, it preserved the integrity of South Korea, and through its technical assistance program it has made a modest but hopeful beginning toward improving standards of life in underdeveloped countries.

But it has done more than this. It has provided an international forum where nations can talk out their problems and differences, where the whole world can see the obstructionist tactics of the Soviet Union and the constructive efforts of the free nations. It has provided an excellent means of clarifying the issues in the cold war.

That the United Nations has accomplished as much as it has despite the abuse of the Soviet veto is a clear indication of the powerful, underlying desire of the nations and the people of the earth for an international organization to keep the peace.

The United Nations deserves our full support. I do not have very much patience with people who criticize the U. N. because it falls somewhere short of perfection. No human institution will ever be perfect; nor will one ever be improved by carping complaints.

CONCLUSION

Now, in conclusion, let us try to sum up by formulating some principles which can serve as guideposts for the United States to follow in making and carrying out its foreign policy.

First, we must measure up to the position of leadership which we occupy in the world, but we must at the same time remember our own limitations.

Second, the foremost of these limitations is that we cannot live alone. We must have allies. The only real security lies in collective security.

Third, although the Soviet veto in the U. N. has made it necessary for us to develop a series of regional security alliances, we must remember that the best instrumentality for developing a real system of collective security is the United Nations.

Fourth, although we must not neglect the military aspects of our security, we must pay increasing attention to the political and economic aspects.

Fifth, we must continue technical and other assistance to promote the economic development of underdeveloped countries.

Sixth, we must continue and strengthen our overseas information programs, not merely to counteract Soviet lies about us, but more importantly to present an affirmative story of freedom.

Seventh, and possibly most important of all, we must keep faith with ourselves and our allies. Let the Communists entangle themselves in devious Machiavellian plots. In foreign relations, as in personal relations, honesty and frankness are the best policies.

With our minds so much on the Far East, I cannot help but recall the teaching of Confucius (and this the Chinese Communists would do well to recall) that there are three essentials to a state—a revenue, an army, and good faith. Of these three, he said, "the greatest is good faith. Without a revenue and without an army, a state may still exist, but it cannot exist without good faith."

Education: Democracy's Indispensable Weapon

EXTENSION OF REMARKS
OF
HON. LISTER HILL
OF ALABAMA
IN THE SENATE OF THE UNITED STATES
Friday, March 4, 1955

Mr. HILL. Mr. President, I ask unanimous consent to have printed in the RECORD an address which I delivered before the convention of the American Association of School Administrators, at St. Louis, Mo., on Monday, February 28, 1955.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

EDUCATION: DEMOCRACY'S INDISPENSABLE WEAPON

(Address of Hon. LISTER HILL, United States Senator from Alabama, before the convention of the American Association of School Administrators, St. Louis, Mo., February 28, 1955)

The public school, conceived in a frontier settlement more than three centuries ago, is one of the great rocks on which our Nation has been built. In the early days of this Republic, learning, reason, and faith in the people's capacity to govern themselves inspired that adventurous spirit which dared trust the future of an infant nation to the judgment of the many instead of the dictates of the few. The lives and fortunes of individual Americans, the nature of our institutions, the quality of our industry, commerce, and agriculture, the conservation and use of our natural resources, the nature of our law—the destiny of the Nation itself—depend on decisions rendered by all the people. The public school was created to inform the popular wisdom.

The magnitude of the responsibility resting on public education was forcefully described by Jefferson when he declared: "If a nation expects to be ignorant and free in a state of civilization, it expects what never was and never will be."

The frontiers of our forefathers have faded from the American scene. Today we live among busy lanes of commerce, mighty industries, complex networks of communications, productive farms, great hydroelectric plants, and, now, the harnessing of nuclear power.

These are achievements of generations of American men and women educated in our system of free public schools—achievements wrought by a nation grounded in belief in the supreme worth of the individual man, his dignity, his freedom, his capacity to meet the challenge of each new age.

These are the values and traditions that have led people all over the earth to turn longing eyes toward America, to knock on her door for admittance. These are the values and traditions that have made people in the free nations turn to America for leadership in this time of crisis. These are the values and traditions upon which the greatness of America rests. These are the values and traditions that our schools must preserve and perpetuate.

Our schools, as has been so eloquently stated by your splendid president, Mr. Larson, "are the backbone of our national defense, the bulwark of our free enterprise system, and the foundation of a trained and loyal American citizenship."

Yet, anyone who studies our public schools today, as it has been my opportunity and responsibility to do as a citizen and a Member of your Congress, knows that American education is in serious trouble.

The millions of children attending school on a part-time basis, in makeshift quarters, in overcrowded classrooms, evidence the plight of education in America today. Census figures on the increased millions of children already born who will be crowding through our schoolhouse doors in the years immediately ahead pose an even more desperate situation.

Quantitatively and qualitatively we are possessed of an education deficit that threatens the very capacity of the American people—scientifically, politically, and intellectually—to cope with the most complex and most dangerous problems in the history of freemen.

Educationally speaking, we are still breathing the quiet air of the peaceful years before the wars and revolutions of the first half of the 20th century wrought a world filled with malice and fear.

As we analyze what has taken place in the world, we know that the fall of the Western democracies from their preeminence was due not as much to the designs of evil men as that those nations lacked the clarity of purpose and resolution of mind and heart to deal successfully with the world disorders which made possible the rise to power of the totalitarian warlords.

The world disorder has forced us to adopt a radically higher and different defense concept, employing the most terrible and costly weapons that man can devise, yet we have been willing to limp along on an educational system that is wholly inadequate for turning out sufficient numbers of highly trained citizens and for meeting the multiplied demands for moral discipline and wisdom of great affairs.

The hour demands a radically higher and different concept of education.

Our supreme and ultimate aim is to build a world in which all men may live together in peace. But, if we are to build the peace, we must first be able to survive.

We know that our ability to survive in this era of warlords of aggression rests upon our ability to marshal superior brainpower against the brawn of overwhelming numbers. And our edge is slipping away as our educational system falls further and further behind in the quality and quantity of its product while Russia is pushing her educational effort to unprecedented heights.

One field in which this is clearly apparent is that of the training of engineers and scientists.

Our defense authorities tell us that Russian schools this year will graduate some 54,000 engineers, as compared with only 19,000 to be graduated in the entire United States. This is a ratio of 3 to 1. The ratio is as bad or worse with respect to physicists and scientists of every kind. But this is not the worst of the story of how Russia is outstripping us. Russian facilities will turn out approximately a quarter of a million technicians in nonengineering categories this year, while Americans with comparable training will number but 10,000. This is a ratio of 25 to 1.

Dr. M. H. Trytten, of the National Research Council, and Dr. John R. Dunning, atomic expert and dean of Columbia University School of Engineering, have warned that if present trends continue—that is to say, if our education systems fails to effect a sharp increase in the annual output of engineers and other scientific graduates, the Russians will catch up with us in the next 5 years and after that they will pass us in the race.

The same warning has been echoed by Prof. Joel Hildebrand, president of the American Chemical Society. "In producing scientists," Professor Hildebrand declared, "we need to run very much faster if we intend to win the race for survival."

Today we are reaping the harvest of years of neglect of our educational system—of waste of the talent of our youth. Dr. John K. Norton, head of the department of educational administration, Columbia University, told our committee at our hearings on school-construction legislation that "more than half the children who enter at the first grade fail to finish high school." He added that "even more important in terms of its effects upon our preparedness is the fact that only one-half of our top talent, those who get high marks in high school, who pass intelligence tests, who it is generally agreed could do college work and do it well, actually do so." "We are," Dr. Norton declared, "wasting one-half of our top talent in terms of giving them substantial professional, technical, or vocational training."

We must bring to a halt the 50-percent dropout rate in our elementary and secondary schools. We must make certain that more and more of the top talent among our high-school graduates is fully capitalized through college and university training.

We know that if we are to do these things—if we are to build our professional manpower resources—we must begin in our elementary and secondary schools for it is here that our young people must be trained and prepared to pursue college and university training.

Emphasizing the urgent need for training more scientists, the National Science Foundation in its annual report just submitted to the President and the Congress declared that the fostering of scientific training involves first the matter of incentives.

"The primary and indispensable incentive," the National Science Foundation report declared, "is a deep, personal, and indefatigable interest in scientific discovery. To find ways to promote that interest is," the report concluded, "of first importance and leads directly to the quality of the teaching in the secondary schools."

We must sharply increase our supply of well-trained teachers. To do so, we must lift the level of teachers' salaries from its present rank among the lowest of all employed groups in America to its rightful place.

Indeed, the hour demands a bill of rights for the teacher; a bill of rights guaranteeing a salary which will enable the teacher to enjoy a good standard of living, to permit recreation and travel, continued study and educational growth, and provide security in old age.

The bill of rights must go further. It must recognize the essential worth and dignity of the teacher and assure full opportunity to take part in the life of the community—outside the classroom. The teacher must be free of the petty restraints and interferences with his personal life that are so often imposed in many communities. The teacher must be protected from the unprincipled demagogic attacks that fetter the mind, breed suspicion and fear, and threaten the very destruction of free public education.

Teaching has long been called a profession. We must make it a profession, in fact—appreciated and honored in the community, adequately paid and acclaimed for devoted public service.

The total accumulated needs of our educational system are so great that we cannot, with any reasonable hope of success, attack them all at one and the same time on any major scale.

Today the States and local communities and the across-the-board needs of education are straitjacketed by our $12 billion classroom deficit and the 6-year certainty of continued recordbreaking school enrollments. Our best hope of relieving the deficit and of enabling the States and local communities to turn more of their efforts and resources to raising teacher salaries and to meeting the other needs of education lies in the Federal Government putting its shoulder to the wheel and providing substantial Federal aid for school construction.

As soon as the returns of the elections last November were known and it became evident that I would be chairman of the Senate Committee on Labor and Public Welfare, I pledged to our parents, teachers, and school officials that the very first bill that I would introduce in the new Congress and the very first bill that I would take up in the committee would be for Federal aid for school construction.

On the very first legislative day of the Senate, I, along with 29 of my Senate colleagues, introduced Senate bill 5, providing $1 billion in Federal aid for school construction over a 2-year period.

On the same day the President referred to the school crisis in his state of the Union message and announced he would have more to say in a special message on February 15. This was encouraging but the idea of waiting another 5 or 6 weeks to see what the President might say would—it seemed to me—involve a breaking of faith with our parents, teachers, and school officials to whom I had pledged full speed ahead. So we moved forthwith with hearings and consideration of Senate bill 5 and similar bills that were ready for action.

As we know, the President early this month sent to Congress his education message and the administration bill. Our committee moved promptly to hold hearings and consider the bill.

The administration bill provoked a storm of protests from educators and school officials. Spokesmen for leading educational organizations, experts on school financing problems, State school laws, and State constitutional provisions came before our committee at the hearings and literally took the administration bill apart.

One witness called it Federal aid for investment bankers. Others said they are prohibited by their State constitutions and State laws from complying with the loan provisions of the bill. Still others said their school districts could not afford to go further into debt or pay interest or amortize Federal loans or pay rent on school buildings without seriously reducing the already inadequate funds for salaries to teachers.

Stating that the bill provides "much too little aid and much too much control," Dr. William Carr, executive secretary of the National Education Association, declared that the NEA refuses to "embrace untested and hastily formulated proposals which do not conform to the existing pattern of State and local school administration."

Dr. Carr declared further that the bill while hedged about with unnecessary restrictions and controls, provides only token assistance.

He showed that while Secretary Hobby and Commissioner of Education Brownell have spoken of the administration's bill as a proposal to set in motion a $7 billion school program, analysis of the bill reveals that actually the only Federal expenditure for construction provided is $67 million a year for 3 years—less than 1 percent a year of the huge $7 billion figure Secretary Hobby and Commissioner Brownell have been talking about.

Dr. Edgar Fuller, executive secretary of the Council of Chief State School Officers, told the committee that he had "never seen a bill that had more Federal control. Under the bill," Dr. Fuller declared, "there would be General Accounting Office people, tax attorneys, estimators of building values, and a horde of Federal officials in local school districts. The bill," Dr. Fuller declared, "is written with the tone of a mortgage banker who is lending money to a pauper and is going to tie him down just as solidly as he can to make sure he gets back every cent plus a good rate of interest. As this bill is written," Dr. Fuller declared, "the Federal Government will eventually make a profit at the expense of the school districts of the county most in need. The Chief State School Officers," Dr. Fuller declared, "would not favor the bill because it would set up separate State agencies and because it would be too expensive and because it would be an example of Federal discrimination against schools in contrast with generous Federal grants to highways, hospitals, and other physical facilities in the States. It would," he continued, "make education an orphan, deny it broad sources of income that every other service has and throw the schools back on real estate taxes as a permanent policy."

Our committee heard either in person or by telegrams and other communications from 40 out of the 48 State superintendents of education. Not one favored the bill.

Dr. Carr and other educators cited as the proper kind of approach to school construction legislation the bills developed and sponsored by the late Senators Elbert Thomas, of Utah, and Robert Taft, of Ohio, and myself. The bills embodied these fundamental principles:

1. Direct grants to all the States;
2. Allocation of funds on an objective formula;
3. Administration of the funds by the established State and local agencies.

We have twice passed in the Senate by overwhelming vote, bills containing these principles. These are the principles of Senate bill 5.

Every day of delay deepens the crisis in our schools.

The testimony before our committee made clear that with the passage of Senate bill 5 at least 42 States, under authority of State statutes already on the books, can begin at once to put Federal funds to work along with State and local funds to build schoolhouses for our children.

I am urging that Senate bill 5, strengthened and fortified in every possible way be quickly brought to the Senate floor that we may pass it now. With your splendid help, we shall win the battle.

Please let me take this opportunity of telling you how helpful the support of your association has been in the fight for our Oil for Education amendment, which will dedicate to education the income from the oil wealth of the Outer Continental Shelf. With your help we won adoption of the amendment in the Senate in the last Congress. We have reintroduced the amendment and are carrying on the fight for final victory.

From these oil resources $150 million has already come into the Treasury and the Department of the Interior has predicted that the revenues will ultimately exceed $6 billion.

The $150 million that has already been derived and the revenues that will follow should be put to work to help meet the financial crisis in our schools and colleges.

Here is nontax revenue for relieving the financial straits of our elementary and secondary schools, for providing more and better schools and better trained teachers, and for scholarships, fellowships, and training and research grants. With your continued help, my friends, these revenues will become education's endowment for the future.

As we provide for the education of our children, we nourish the wisdom of America at its roots, we strengthen the well-springs of our democracy, we build the strength and security of our country and build for the peace of the world.

Centenary of St. Mary's College, Near South Bend, Ind.

EXTENSION OF REMARKS
OF
HON. HOMER E. CAPEHART
OF INDIANA
IN THE SENATE OF THE UNITED STATES
Friday, Mareh 4, 1955

Mr. CAPEHART. Mr. President, I ask unanimous consent to have printed in the RECORD a statement in commemoration of the centenary observance this year of St. Mary's College, near South Bend, Ind.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

CENTENARY OBSERVANCE OF ST. MARY'S COLLEGE, NEAR SOUTH BEND, IND.

St. Mary's College for women, the first Catholic women's college in the United States empowered to grant degrees and the first to confer bachelors' degrees continuously, celebrates the centenary of its establishment at its present site just north of South Bend, Ind., during 1955.

The college began as an academy for girls in Bertrand, Mich., in 1844 and held its first commencement 4 years later. Four young French Sisters of the Holy Cross, members of the order established 2 years previously, came to the Indiana frontier in 1843 to assist the priests and brothers who had founded the University of Notre Dame only a year before.

The Sisters began their work in America by assuming housekeeping duties for the new mission school of Notre Dame, but soon established their own girls school at Bertrand, 6 miles north of Notre Dame, and the school was chartered by the State of Michigan in 1851.

As the decade of the 1850's opened, the Sisters came to realize that Chicago was fast replacing Bertrand as the area's population and trading center.

Early in 1855, the Sisters of the Holy Cross moved their young school to its present location north of South Bend, Ind., and west of the University of Notre Dame. The State of Indiana promptly granted an academic charter to the school (February 28) "for the education of young ladies in the various branches of arts and sciences * * * and to confer such degrees upon scholars as are usual." In April 1855 the cornerstone was laid for the first building.

The convent and novitiate later (1868) became the motherhouse of the United States Sisters of the Holy Cross.

Under Mother M. Angela, first directress of studies, who guided the school until 1870, St. Mary's developed a curriculum acclaimed by both Catholic and non-Catholic educators.

While emphasizing the study of the liberal arts—still the foundation of a St. Mary's education—the college curriculum continued to add specialized courses.

The most memorable event for the young science department at St. Mary's came in 1899 when the first long distance wireless transmission in the United States was received at the college.

Prof. Jerome Green, of the University of Notre Dame, unaware of Marconi's achievements in Europe a few months before, amazed a group of newsmen by successfully sending a message from the Notre Dame campus to St. Mary's, more than a mile away, on April 19, 1899.

The physical growth of the campus has kept pace with the academic development of St. Mary's. Magnificent LeMans Hall, a tasteful combination of administrative offices, resident rooms, and classrooms, was built in 1926 at a cost of $1,250,000 and a home economics practice home was erected in 1939.

The college marked the centenary of the founding of the Sisters of the Holy Cross with the building of a 90,000-volume library in 1941. A new 30-room science hall will be dedicated on April 23, 1955, as one of the major events of the year's centenary program and a modern fine arts building and auditorium will be begun on February 26, 1955, as a centenary project.

Sister M. Madeleva, CSC, current president of St. Mary's, succeeded to the presidency of the college in 1934. A world-renowned poet and educator, Sister Madelava has had a strong influence on the intellectual and physical growth of St. Mary's.

Under her guidance, St. Mary's in 1944 established the Nation's first graduate school of sacred theology for laywomen and sisters. This pioneering graduate school, under papal approbation, offers the master's degree and doctorate in religion and a number of summer schools of theology have been opened throughout the country as a result of Sister Madeleva's inspiration.

St. Mary's College, in its centenary year, now ranks as the largest resident Catholic women's college in America.

St. Mary's offers courses leading to the degree of bachelor of arts, bachelor of music, and bachelor of science.

The Republican Valley Conservation Association

EXTENSION OF REMARKS
OF
HON. CARL T. CURTIS
OF NEBRASKA
IN THE SENATE OF THE UNITED STATES
Friday, March 4, 1955

Mr. CURTIS. Mr. President, I ask unanimous consent to have printed in the RECORD a statement prepared by me, entitled "The Republican Valley Conservation Association."

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE REPUBLICAN VALLEY CONSERVATION ASSOCIATION

(Statement by Senator CURTIS)

I should like to take a few minutes today to call the attention of this body to a very important development which is taking place out in Nebraska. I refer to the reorganization of the Republican Valley Conservation Association, which has made great strides during the past 15 years, and has built a reputation for effective promotion of flood control and irrigation in the upper Republican River watershed.

Many Senators will recall the disastrous flood of 1935, when 112 persons were drowned and tens of millions of dollars of property loss sustained in southwestern Nebraska. It is interesting to note that the numerous flood-control conferences which were called through the years, to deal with the perennial flood threat, found Gov. Arthur Weaver, of Nebraska, among the most active advocates of a complete program of flood control from the headwaters down. Congressman PHIL WEAVER, who succeeded me in that great First District of Nebraska, is the son of the illustrious Governor, and has taken up the campaign where his father left off, determined to complete the job that is so nicely under way. The whole decade of the thirties witnessed repeated droughts and floods. Frequently, as in 1935, heavy floods would be suffered in the spring, then the crops would be lost that fall as a result of drought. Clearly, the only possible method of stabilizing agriculture in that area lay in a program involving the storage of floodwaters in the spring, which could subsequently be spread upon the land in the summer months in the form of supplemental irrigation. For instance, during the year just passed (1954), this territory received less than 10 inches of moisture. To meet this challenge, many of the State's outstanding citizens have come forward and put their shoulders to the wheel.

Nebraska has furnished many outstanding workers in the field of reclamation. C. Petrus Peterson, of Lincoln, is currently serving as president of the National Reclamation Association and one of the greatest authorities nationally on irrigation from ground water sources is Dr. E. C. Condra of the State University, Lincoln. Also, the lower Republican River has had its share of illustrious leaders who have unselfishly devoted their efforts to the furtherance of such a program. Any such list would have to include Oswin Keifer, of Superior, the late Paul Spence, of Red Cloud; Ben Harrington, Leon Sprague, and Halpert Thomas. Also, northwestern Nebraska, and the Platte River territory generally, have brought forward their own group of men who have helped mightily to make our State a better place in which to live.

But no group has ever launched a program of action with as many strikes against them as did the Republican Valley Conservation Association. The organization was formed in McCook in 1940 under the vigorous presidency of Harry D. Strunk, who himself served as director for many years, representing Nebraska on the board of the National Reclamation Association. The Republican Valley group was told by the United States Corps of Engineers that no flood protection was possible in the upper Republican, inasmuch as the valley possessed no satisfactory sites for dams and reservoirs. This would have stopped men of lesser courage. I am rather proud that, responding to a request of that body, I personally urged a review of the reports on the upper Republican by the Engineers Corps. Also, the association sent representatives out into the field, and recorded detailed statements of landowners, setting forth the actual property losses which they had sustained in 1935 and subsequent floods. These sworn statements helped the Engineers Corps reappraise the potential flood damages, and increase its estimate of benefits which could flow from the construction of flood-control reservoirs. And, fortunately, a review of the upper Republican enabled the corps, and the Bureau of Reclamation, to come up with a list of about a dozen reservoir sites. Here, then, was the

basis for a sustained drive by which the people of that area could appeal to the Congress to reclaim their lands and usher in an era of irrigation farming.

Many other headaches confronted this little group of citizens. They immediately discovered that, because of State and Federal statutes, it would be necessary to negotiate an interstate compact between Nebraska, Kansas, and Colorado, legally apportioning, for consumptive purposes, the flow of the Republican River and its tributaries. And such a compact had to be ratified by the Congress. With the everlasting help and guidance from the late Senator Hugh Butler, together with all other members of the Nebraska congressional delegation, these initial legislative hurdles were cleared.

Then World War II broke loose. It was apparent that the United States would be fighting for its very life, and all critical materials were to be diverted to defense purposes. So it was that a good many of the members, and some of the officers of the Republican Valley Conservation Association, took the view that it would actually be unpatriotic for the organization to carry on its activities during the war period. It was proposed that they suspend their efforts until the war was over, but level heads prevailed and the group decided to carry on for, after all, a stepup in the production of food supplies comprised one of the methods by which such areas could make their maximum contribution to the Nation's welfare during that emergency period.

It was well that they continued active, because they were able to bring about Federal appropriations sufficient to complete investigations by technical agencies of the Federal Government. Thus it was that they were ready to have included in the Flood-Control Act of 1944 authorization of 10 or 12 upstream projects. Since Congress passed that measure, Enders, Medicine, Bonny, and Culbertson Dams and Reservoirs have been constructed, one by one, together with several diversion dams. This is a tremendous beginning toward a basinwide program, which will ultimately enrich that area immeasurably. Senator Butler used to say that completing the flood-control and irrigation program in the upper Republican Basin would mean more, economically, than striking oil in southwestern Nebraska.

But as the years went by, some of the original band of loyal sponsors of the program, including Dr. M. Campbell, of McCook, treasurer, and P. N. Foster, director, from Imperial, passed away. The organization encountered considerable difficulty in meeting its moderate financial requirements. Some of the leaders have been obliged to invest substantial amounts of their own money in order to keep a vigorous program running. McCook, the headquarters of the organization, has always contributed a good deal more than its proportionate share among the 32 member towns. But with the firm backing of the McCook Chamber of Commerce, under the presidency of Joe Rothmeier, a special committee has now been named, including Ralph G. Stevens, John Van Auken, Elwood C. Ackerman, and Ben Hormel.

Also, a few of the forward-looking business firms in Lincoln, Omaha, Kansas City, and Denver have made modest contributions through the years. Unquestionably, it is to their enlightened self-interest that they do so. After all, more than $100 million of Federal funds alone have been expended to date in the upper Republican, and $50 million to $75 million remain to be spent before the job is finished. This will treble the farm production in that area. Supplemental irrigation brings in sugar beets, potatoes, increased corn crops, and multiplies materially all phases of livestock production. Growth of these crops also brings, in its wake, the processing plants needed to handle such products. Further, completion of the job will step up the population and the buying power materially, and it will provide permanent protection against recurring floods. All of these things are important within the market area of Omaha, Denver, and Lincoln. By the way, irrigation is universally conceded to be the biggest single factor which has caused population in the 17 States to increase nearly 2½ times as fast as population in the 31 Eastern States during the last 50 years. Without irrigation, western Nebraska would undoubtedly have lost population heavily in the decade of the thirties and subsequently.

One of the principal reasons that I wished to speak today was to urge that the Congress give sympathetic consideration of the proposal for appropriations for investigations by the Engineers Corps and the Bureau of Reclamation, not only in Nebraska but elsewhere in the Nation. It seems to me that we should have a reservoir of projects built up, from those which are found practical and feasible, so that construction can be inaugurated at the earliest possible date. You are all undoubtedly aware of the fact that President Eisenhower himself has said, "I am recommending increased funds for general investigations by the Bureau of Reclamation to insure a proper basis for project authorization." We must have investigational moneys from which detailed investigations can be undertaken on the Red Willow, the Pioneer, either Wray or Parks, and along those three Kansas tributaries, the Beaver, Sappa, and Prairie Dog, which enter the Republican below Oxford. It has already been 11 years since these projects were authorized by the Congress, but no detailed investigations have yet been undertaken.

I want to emphasize today that I am especially ambitious for this program because of the great record which the Republican Valley Conservation Association has made in its efforts to develop southwestern Nebraska, northwestern Kansas, and southeastern Colorado. Not only has Harry Strunk continued to serve as president in the intervening 15 years, giving unselfishly of his time and energies, but he has been surrounded by other good citizens who, likewise, have made a great contribution.

Mr. Strunk has stepped aside now, and become chairman of the board of directors of his organization, welcoming to the presidency H. E. Robinson, who just retired as director of the Kansas River District, Bureau of Reclamation. It was he who built these projects that today stand as a monument to them, and to the farsighted Members of this Congress who have appropriated the necessary funds. And it is Harold Sutton, one of McCook's real leaders, who today serves as treasurer of the organization. And there is another man who has served the group extremely well through the years. He is M. O. Ryan, who served as executive secretary of the organization from 1940 until World War II struck, in 1942. Since 1943, while being otherwise employed in Washington, his extensive knowledge of the entire area and of the complex problems involved has made his judgment invaluable to the Federal agencies and to the Nebraska congressional delegation as they sought to push this program forward.

There are some who maintain that Federal appropriations for development of western areas must be reduced. Let me point out that W. A. Dexheimer, Commissioner, Bureau of Reclamation, states that for the fiscal year of 1954, all appropriations for reclamation construction through the 17 Western States comprised only one-fourth of 1 percent of the national budget. Geographically that is more than one-third of the land area of this country. Of course, President Eisenhower has already asked Congress for a somewhat larger allocation of funds for the fiscal year beginning next July 1. In addition to funds to step up navigation facilities on the Missouri River, which runs through eastern Nebraska, and for the construction of agricultural levees at numerous points, an appropriation is asked for a multiple-purpose power project at Gavins Point, Nebr. And then, in the field of reclamation, the President is asking more than $10 million in appropriations for the Bostwick, the Frenchman-Cambridge, and the Sargent projects in Nebraska.

Appropriations alone do not meet the total needs, however. Refinements in our Federal statutes must be made from time to time. Already, during the 84th Congress, I have joined hands with 11 other Senators from the Great Plains, including my colleague Senator HRUSKA, in introducing S. 787, which paves the way for the negotiation of a compact to achieve maximum conservation and development of water resources throughout the Missouri Basin. Also, I have joined with seven other Republican Senators from west of the 100th meridian, in introducing S. 863, which strengthens the control of the individual Western States over navigable and unnavigable waters within their boundaries. Such a bill appears necessary in order to clarify the nebulous area between State and Federal jurisdiction over reclamation and flood-control activities.

Also, my esteemed colleague, Congressman A. L. MILLER, of Nebraska, who is the ranking Republican member of the House Committee on Interior and Insular Affairs, has reintroduced a bill which he proposed in the last session, which is now numbered H. R. 1824, clarifying national policy in regard to the development of certain water resources. These are among the measures which Congress will need to enact if we are to meet our full responsibility in paving the way for maximum development of arid lands throughout the West.

A watershed like the Republican is honeycombed with many small creeks and streams. In between the major tributaries, upon which larger projects can be built by the Engineers Corps and the Bureau of Reclamation, lie innumerable smaller streams, each of which provides a flood threat. The Soil Conservation Service, an integral part of the United States Department of Agriculture, is geared to treat these areas with small retardation dams. My mind goes back to 1950, when Senator Kenneth Wherry, an active member of the Senate Appropriations Committee, personally inspired the first appropriation of $500,000 for the Soil Conservation Service to undertake surveys to ascertain those watersheds where feasible projects existed. Our late Congressman Karl Stefan, who was simultaneously serving on the House Appropriations Committee, put his shoulder to the wheel, and both bodies of Congress approved that appropriation. From the resulting survey, the first of a number of pilot projects are ready for construction in 1955. The McCook Gazette of January 26 gave a map, in complete detail, of Dry Creek watershed project, the first in that area to be constructed under the Hope-Aiken Watershed Protection Act, which was passed by the 83d Congress. These projects do take time, but once constructed, they last a lifetime.

Commissioner Dexheimer offers concrete evidence of the national value which reclamation projects offer to our United States economy. He reports that Federal-tax revenues from reclamation areas, since 1916, have exceeded $3 billion. This sum alone exceeds by 25 percent the total cost of all Bureau-constructed projects in the past 50 years, or since the Reclamation Bureau was established. Not only do landowners on reclamation projects enjoy enhanced revenues, as a result of irrigation, but the adjoining urban areas share substantially in the increased revenue. As an example, in 1953 reclamation project farmers had an income of $550 million, whereas the nonfarming urban areas, which had these projects

in their immediate vicinity, enjoyed total income of approximately $786 million.

We have reason to rejoice this year over the fact that hundreds of additional acres of fertile land in the Missouri basin will be brought under supplemental irrigation for the first time. Completion of the last 50 miles of irrigation canals on the Frenchman-Cambridge project, east of Cambridge, and the 13-mile Franklin Canal on the Bostwick project, jointly account for very substantial acreage in southwestern Nebraska which will be irrigated this year for the first time.

To my way of thinking, these groups like the Republican Valley Conservation Association are the only device by which 32 member communities, or whole sections of a State, can pull themselves up by their own bootstraps. I think that the modest support required from chambers of commerce, city councils, and county commissioners, to maintain such organizations, comprise one of the best possible investments in the future welfare of any State.

As I stand here today, I am concerned about the fact that the Department of Agriculture reports more than 26 million acres of farm land in the whole dust bowl area are in condition to blow this spring. In many areas the Great Plains are experiencing the worst drought since the decade of the thirties. Without adequate snow cover, and frequent spring rains, the Dust Bowl could be revived before root fiber from the 1955 crop affords protection against wind erosion. This perennial threat will be with us constantly until we have brought the benefits of supplemental irrigation to the maximum acreage possible, and stepped up the volume of cover crops and legumes which effectively anchor the soil.

Let me confide something to this great body, the United States Senate. The very last day he was alive, our beloved Hugh Butler spent the afternoon in his office conferring with top level officials, seeking ways and means to step up the tempo of this program in the upper Republican watershed in Nebraska. I was there, as were Secretary McKay and other officials of the Department of the Interior. That night he was stricken, and died 24 hours later. To Mr. Strunk and Mr. Robinson, and the directors from the individual cities and towns that comprise the association, I send greetings, confident that they will continue to enjoy the support of all city, county, and State officials. Their efforts will forever remove the threat of repeated floods, and will temper the droughts, and thus stabilize the economy as nothing else in that whole area can do.

I trust that this important program may go forward to completion.

Peace Through Power

EXTENSION OF REMARKS
OF
HON. FRANK CARLSON
OF KANSAS
IN THE SENATE OF THE UNITED STATES

Friday, March 4, 1955

Mr. CARLSON. Mr. President, I ask unanimous consent to have printed in the RECORD a speech entitled "Peace Through Power," delivered by the Assistant Secretary of Defense, Fred A. Seaton, at Kansas State College at Manhattan on February 9.

On this occasion Secretary Seaton was awarded by Kansas State College at Manhattan the honorary doctor of laws degree.

Manhattan is the home town of the Secretary and he is a graduate of Kansas State College.

Secretary Seaton is a successful businessman and newspaper publisher who has had an outstanding career in public life. At the present time he publishes newspapers in Kansas, Nebraska, Colorado, Wyoming, and South Dakota. Through these mediums he wields great influence for the building of our Nation and the strengthening of our democracy.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

PEACE THROUGH POWER

You are all familiar with the general aspects of our present world situation. You know the story of the spread of Communist influence and power from a numerically insignificant Russian political party prior to the October 1917 revolution to its present dominion, over 800 million people arranged over one-fourth the land area of the world.

In response to the common threat to their security, more than 40 of the nations of the world, including our own have allied themselves in several regional defense agreements.

The two blocs—the Communists and the free world alliance—now face each other across a narrowing world, and compete for the support of those nations which have not as yet committed themselves to the struggle.

The seat of military power of the Communist bloc is the Soviet Union. In terms of ground strength, this amounts to a standing army of 175 divisions, to which must be added the 70 divisions of the European satellites. Communist China, furthermore, has more than 2 million men under arms. The amount of manpower the two principals could eventually mobilize is suggested by the fact that during the latter part of World War II, the Soviet Union had on its western front an active strength of over 400 divisions, and, further, on conservative estimates, that the Chinese military manpower pool amounts to over 20 million men. In contrast, at the peak of its military strength in 1945, the United States had 95 divisions (89 Army and 6 Marines) under arms.

On the sea, the Soviet Union commands virtually all the effective strength of the Communist bloc. Its submarine fleet consists of at least 375 vessels, 75 of which are long-range fleet types. It possesses 125 modern destroyers, and 24 cruisers, 15 of which are known to be modern, combatworthy types. So far as we know, the Russians possess no aircraft carriers but we cannot dismiss the possibility that some may be under construction. Since World War II, the Soviet Union has built more combatant ships—destroyers, cruisers, and submarines—than all of the free world put together.

In the matter of air strength, we estimate the Soviet Union to have an inventory of over 1,000 TU–4 bombardment aircraft, which are copies of our own B–29's. If we credit the Soviet air commands with the capability of in-flight refueling, which seems reasonable, it means that a substantial number of our vital cities and installations come within their range. And, of course, on a one-way mission, they could reach almost any target in the United States, if confronted with no opposition. We know also that the Soviet has an undisclosed but growing number of medium and long-range jet bombers, and that they are producing a better fighter than the MIG 15, which was used in Korea. Their total number of aircraft of all kinds exceeds 20,000, most of them tactical types—fighters, interceptors, and light bombers.

As you know, this brief recital of military means at its disposal in no way describes the true dimension and nature of the threat which comes from the Soviet sphere. Policy decisions in the Kremlin have resulted in a world situation which has influenced us to allocate since June 1950, a staggering portion of our national substance and effort valued at $220 billion to the economically unproductive purposes of defense. Today, 60 percent of your Federal taxes go for the equipping and maintenance of a 3-million-man armed force.

The Communists know as well as we that the physical basis of all our military power is our economy, and that if this economy can be undermined and sabotaged, the effect may well be as disastrous to us as a major military defeat. We must not permit this to occur.

Moreover, we must also contend with the insidious threat of subversion, sabotage, and espionage within our own country and the countries of our allies, which can sap the strength and vigor of the most enlightened democracy. Externally, there is the continuous pressure of political and psychological warfare, of deceit and bluff and blackmail. All these are also part of the total threat, physical and moral, which militant communism poses to freemen.

Obviously this threat, total as it is in scope, cannot be successfully countered by military means alone. But the provision of adequate military strength, particularly for the years immediately ahead, is an indispensable prerequisite to every other action which we must undertake. We must maintain military forces in being sufficient to deter aggression, either limited or unlimited, or in the event we are attacked, to preserve the minimum territorial and military security essential to successful mobilization and subsequent prosecution of the war. Moreover, we must be organized for smooth and rapid mobilization of our material and human resources.

This military capability to handle ourselves under any and all possible situations is the essential shield upon which we must rely to provide the protective sanction to the political, economic, and psychological pressures we must continue to exert against the Communist regimes.

To this end we have developed over the past 4 years a very potent military force. It is in fact, the most powerful we have ever maintained in time of peace. We have a Navy second to none, with its own steadily growing atomic striking potential. Our large and growing Air Force now consists of 119 wings which will increase steadily toward an ultimate goal of a minimum of 137 wings by 1957. We have a mobile amphibious striking force of 3 Marine divisions and 3 Marine air wings. With the cessation of fighting in Korea, our Army has gradually been reoriented toward a June 1956 strength objective of approximately 1,027,000 men. This represents a decrease of about one-third from the average strength during the Korean operations, but it remains well over 80 percent above the pre-Korean level.

And here I would like to talk briefly about this matter of ground strength, if I may. One of the foundation stones of our military policy is that our strength shall be integrated with that of our allies in such a way that the maximum power potential is made available to the community of allies. Throughout all these alliances there runs the understanding, written or otherwise, that each partner will contribute to the common cause those elements of strength which it is best able to supply, and to the limit that it is able to supply them.

In this great global system of alliances in which we participate, our Nation is peculiarly well suited to supply two vital elements—sea power and the striking capability of long-range land based air power. Our contribution in these particular categories is by all odds the preponderant one. We also have made a substantial contribution in ground strength, but in the very nature of things we cannot hope to supply more

than a small part of the total number of troops required. The basic accounting unit of a land army is the man. Which suggests that within the special situation obtaining in each strategic area, the contribution in ground strength must bear a general relationship to the population of each interested nation. So we greatly understate the total ground strength available for our common defense effort if we do not count the very substantial contributions of our allies.

To our own 19 divisions should be added at least a hundred more which the free world could count on in any major war undertaken by the Soviet bloc. NATO presently has available to it an active ground strength equivalent of 48 divisions. The Republic of Korea has approximately 19 battle-tested divisions within a total force of 400,000 men. Japan has initiated the formation of its national security police force, and the Philippines have reestablished internal order and are rapidly building up their strength. The 12 West German divisions are to come. We feel, militarily, well able to take care of ourselves in the event of actual physical attack, provided we conduct our operations along lines which permit us to oppose our own factors of strength against the Soviet factors of weakness.

And this, I think, is the key to the success of our whole defense effort. There are certain areas in which we are greatly superior to the Soviet—our powerful and versatile economy, the depth and breadth of our technology, the enormous fire power and mobility assured by our intensive development of atomic weapons and our control of the seas. Most important of all, there is the universal appeal of the great system of values we have moved to defend, as contrasted to the total disregard for human life and liberty which necessarily underlies the Communist philosophy.

It is of great significance to me that in 1952 United States produced half again as much coal as the Soviet, 2½ times as much steel, 4 times as much electric power, 7 times as much oil, and 20 times as many automobiles and trucks. While free American agriculture was bringing in record crops, the Soviet staggered lamely along at about its level of 25 years ago. I am sure you would be interested as I was, in knowing that the USSR, still largely an agricultural nation, consumes more grain than it harvests, that its cattle population is 10 million below what it was in 1928, that its pork production has dropped by 5 million tons since 1940; that by its own admission the supply of meat, potatoes, and vegetables is unsatisfactory.

Our allies, on the other hand, have set remarkable records of food production. England now produces a surprising 56 percent of her food needs whereas she formerly imported about 80 percent. France and Turkey are now producing surpluses of wheat. Wherever free enterprise operates free men always win the battle of production.

I derive a keen sense of satisfaction in the marvelous technology which both supports and depends upon our economic system—the same technology which daily enriches our lives in its thousands of peacetime applications, but which when the chips were down could bring forth such vital weapons of war as radar, the VT fuze, and the atomic bomb.

But, most of all, I sense the great latent strength of a society whose goals represent the highest hopes and greatest expectations of men throughout the world—values which men the world over have repeatedly shown themselves ready to lay down their lives to obtain and defend—a sense of dignity for the individual, the right to worship, to speak, and to think as freemen, to have the love of family and friends, to enjoy the love of the land, and of one's ancestral home, the right to participate freely in a government of their own choosing, and to stand as equals before the eyes of the law. These deep and abiding aspirations we hold in common with all people, and in no way can the barren, atheistic philosophy of communism claim them as basic or even a fundamental part of its ideology.

In contrast, the Soviet has nothing to rely upon except force—force of the most brutal and callous sort. Many of you have read of our President's account of his deep shock when, as General Eisenhower, he learned from a high-ranking Soviet officer the Russian Army technique of clearing minefields. "When we come to a minefield," the Soviet officer told him, "our infantry attacks exactly as if it were not there. The losses we get from personnel mines we consider only equal to the losses we would have gotten from machine guns and artillery if the Germans had chosen to defend that particular area with strong bodies of troops instead of with minefields." This may be logical from a coldly analytical military viewpoint, but it is hardly logical in light of the fact that any regime, even a dictatorship, depends for its existence over the long term upon a certain minimum degree of acceptance by the people over which it exercises its authority. To me it shows weakness, not strength.

Nevertheless, there are certain areas in which we must concede the advantage to the Soviet bloc. Their numbers far exceed the combined strength of ourselves and our allies in sheer military manpower. Moreover, a differential population increase is presently weighing the manpower balance further in their favor, so that it may be expected to become more and more unfavorable to us as time goes by, unless we can associate ourselves with additional allies. In World Wars I and II, our side had a very substantial numerical superiority, and this advantage had its influence in shaping our strategy and tactics in those two great conflicts. But the reverse will be true of any conflict which may be fought out on the present alinement of world power and this tremendously important fact demands our close and continued study.

The only logical remedy for a situation in which we cannot match the enemy man for man lies in the development of capabilities which nullify this enemy advantage. Fortunately, the controlling element in military operations is not mere manpower, but effective firepower, delivered at the time and place of decision. And in the development of such firepower, and the means of its effective delivery, our technology and our massive economy give us a long lead over our nearest competitors. Our arsenal of atomic weapons ranges from giants in the megaton range, which is to say the equivalent of 1 million tons of TNT, down to small tactical weapons which can be fired from guns for relatively limited effect. We have them in increased supply. The Army, Navy, and Air Force all are busily engaged in perfecting the tactics and techniques of employing these tremendous new additions to our military capability.

In the battlefield employment of atomic weapons the effectiveness of our Army has been enormously increased by the 280-millimeter atomic gun, the Honest John rocket, and the Corporal guided missile. All these powerful innovations are now available to our ground forces in Europe, and the recent North Atlantic Council meeting in Paris gave its approval to the proposal that atomic weapons be fully integrated into the basic strategic concept for the defense of Western Europe. It is our deep and earnest belief that the devastating curtain of fire which we shall be able to call down upon the enemy hordes will enable us to keep any would-be invader out of Western Europe and thus deny him his prize.

Measured in our capability to project destruction in the form of rockets, missiles, and bombs, our firepower in the air increases daily. The last B–29 has been retired from active service, and our long-range bombers now are mainly the jet B–47's and the combination jet and propeller-driven B–36's. The B–52's, a superb long-range jet bomber, is being received in increasing numbers and will eventually replace the B–36.

A point frequently overlooked is the fact that the capability of delivering massive firepower is not confined to the Strategic Air Command alone. Our Tactical Air Command also has a tremendous atomic capability. All the fighters and light bombers of the TAC will be able to carry either high explosives or atomic bombs, depending on what the target requires. All of its wings are modern, and all of its fighters are jets, in the high subsonic speed ranges. Our new fighter interceptor aircraft now in production, beginning with the F–100, will have supersonic speeds. Moreover, our great mobile airfields, the Navy aircraft carriers, have comparatively unrestricted access to the seven-tenths of the earth's surface which is covered by water, and can bring their seaborne atomic striking forces to bear upon targets deep in the interior of the enemy's homeland.

We review this vast power which is ours with mixed feelings.

We can derive great satisfaction and confidence from the enormous increase which it represents over the power which was available to us even a scant 10 years ago. Yet we are sobered by the contemplation of where our weapons technology may lead us in the decade which lies ahead. Moreover, our problem is complicated by the fact that we neither can nor will prepare for initiating war as a conscious act of national policy. Adhering to our moral code, as a nation we can only prepare for the eventuality that war may be forced upon us under unknown conditions at an uncertain future date. Thus, the element of chance in the preparatory phase of war is inherently larger in the case of democracies than it is with dictatorships, for we cannot with certainty predict when war will occur, if at all. We cannot predict, except within the general limits, the method of attack, or the exact direction from which it may come. Nor can we now foresee very far into the future the political arrangements which may result from the use of military pressures exerted by an aggressor prior to the outbreak of hostilities. These things we cannot know. We can know only that in this lawless world we must be prepared to fight at any time, with weapons that are better than those which will be used against us.

As a result, in the area of weapons procurement, we dare not put all, or even most of our eggs, in one basket. We dare not load our Armed Forces down with weapons which may, at best, have begun to be or become obsolescent even before the last lot has been delivered. The best that we can possibly hope for is to keep our weapons stocks at a level which will enable us to fight effectively with what we have, meanwhile pushing out the older versions with newer, more efficient models as they become available from an economy that has never been known to stand still.

There are those who constantly agitate for more of everything now—more planes, more guns, more of this and more of that. Sincere as they may be, they fail to take into account either the economic or the military problems involved. To over-burden our economy is to risk losing the struggle against communism without firing a shot. To overload the services with obsolete equipment is to risk defeat in battle. True war readiness consists in being able not only to fight today's war with today's weapons, but of being ready to fight tomorrow's war with tomorrow's weapons. This requires a sensible balance in weapons programing. And that, we now believe we have achieved.

This, I think, is the thing which we must keep always in mind in all our defense considerations. For our national security is

not tied to a date on a calendar, or to a certain specified number of divisions, ships, planes, or men. It is not to be identified with any one type of weapon or any one strategic approach. Rather, it depends upon our continuing and increasing ability to meet successfully a variety of challenges—military, political, and economic—while maintaining the essential soundness and health of our economy and our political system. And this we must be prepared to do perhaps for 50 years to come.

There is nothing transitory about the threat to our Nation and our way of life, and there is nothing cheap or easy or simple about the things which we must do to protect and preserve them. These difficult and costly measures which we must undertake in our defense will demand the very best that is in us, the people of America. Among these responsibilities will be your own part in the great common effort we all must make to maintain our military readiness, our political solidarity, and our industrial and technological superiority over that of any possible enemy.

If we can do these things, we have an excellent chance for peace, and an accommodation between the free world and the Communist bloc which will effectively serve our interests.

From a plateau of great strength we can negotiate for the easing of tensions and the reduction of trouble areas dangerous to world stability. For many years, it may be a peace, not of good will, but of power, in which our national strength will be the validating factor. But it will be a peace in which free men can live and breathe, and pursue those ends which tend to lessen the misery and increase the sum of human happiness in the world. It can, at the least, be a peace which will stop the flow of the Red tide which has engulfed so much of the world, and the opening of a more hopeful prospect for democracy than the one it has faced these past 20 years.

This is the peace which we must have, and can have, provided we remain patient, united, and strong.

HOUSE OF REPRESENTATIVES

MONDAY, MARCH 7, 1955

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Almighty God, the sovereign ruler of the universe, Thy wise and beneficent laws are the inspiration and foundation of every just and righteous human law.

Grant that the laws, which are made and adopted here in this Chamber by the legislative branch of our Government, may always be in accord with the plan and pattern of Thy divine law.

May we daily be inspired with a lofty sense of respect and reverence for the sacred office of the Chief Executive of these United States.

We beseech Thee that our President, our Speaker, and all who are engaged in the high vocation of statecraft may be richly endowed with special gifts of wisdom and understanding and leadership.

May the citizens of our beloved country be great in loyalty and obedience to law, in righteousness and in peace and may our national strength and resources be used for the good of mankind.

Hear us in the name of the Prince of Peace. Amen.

The Journal of the proceedings of Thursday, March 3, 1955, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 752. An act to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks.

The message also announced that the Vice President has appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 55–8.

The message also announced that the Vice President has appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 55–9.

SPECIAL ORDERS GRANTED

Mr. PATMAN asked and was given permission to address the House for 20 minutes today, following any special orders heretofore entered and to revise and extend his remarks and include certain statements and extraneous matter.

Mrs. PFOST asked and was given permission to address the House for 25 minutes tomorrow, following the legislative business of the day and any special orders heretofore entered.

Mrs. GREEN of Oregon asked and was given permission to address the House for 25 minutes tomorrow, following any special orders heretofore entered.

THE HONORABLE MARY T. NORTON

Mr. TUMULTY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. TUMULTY. Mr. Speaker, I rise to call the attention of the House to the fact that today is the 80th birthday of that distinguished lady, Mary T. Norton, who represented the 13th District of New Jersey for so many years so gloriously and so well. As a resident of the city of Jersey City and one who lived in her district so many years, I felt it would be a great honor and privilege to remind you of her great work, which you all know, her wonderful achievements in the field of labor.

All of us in Jersey City remember her affectionately and I thought the House would be very much pleased to know that she is celebrating her 80th birthday today, that she is in excellent health, and that she thinks many times of the great friendships she made here, and of her friends in this body.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. TUMULTY. I yield.

Mr. McCORMACK. I wish to associate myself with the remarks of my good friend from New Jersey [Mr. TUMULTY]. I sent Mary Norton a letter of congratulation on her birthday anniversary today. I am very happy that the gentleman from New Jersey made the remarks he did.

Those who served with Mary Norton remember her not only as a sweet lady, but also as a great American, one of the outstanding Members of this body. She served with devotion and courage the people of her district, of her State, and of our country, and I join with her many friends in congratulating Mrs. Norton on her birthday anniversary. I hope that God will continue to shower upon her for many years to come an abundance of His choicest blessings.

Mr. TUMULTY. I thank the gentleman from Massachusetts, for whom Mrs. Norton had great affection, as well as for the Speaker of this House. I may say that my first knowledge of this House came from Mrs. Norton and from her praise of the work done by you, Mr. Majority Leader, and the Speaker [Mr. RAYBURN], as well as by the minority leader [Mr. MARTIN].

Mr. Speaker, the Honorable Mary Theresa Norton was born and brought up and lives today in the congressional district she represented. She is a widow, having lost her husband, Robert Francis Norton, a businessman of Jersey City, several years ago.

Mrs. Norton attended parochial and public high school in Jersey City and business college in New York. Previous to her marriage, she was a secretary and businesswoman, and believes that this experience has been of great help to her during her public career. She became interested in welfare work in 1912 upon the death of her only child, a son. She was one of the founders of the Queen's Daughters Day Nursery, a volunteer nonsectarian day nursery, furnishing care during World War I to thousands of children of working mothers. She was president of the nursery for more than 12 years, resigning a few years following her election to Congress. Through her knowledge of welfare work and its de-

mands on citizenship she became interested in politics.

She was appointed to represent Hudson County on the Democratic State Committee in 1920, and was elected vice chairman of the State committee the following year. She served continuously until 1932 when she was elected chairman. In 1923 she was the first woman of the Democratic Party to be elected freeholder in Hudson County and in the State. In 1924, 1928, 1932, 1936, 1940, 1944, and 1948 she was elected delegate at large to the national Democratic conventions. She was cochairman of the platform committee in 1944 and chairman of the credentials committee in 1948.

In 1924 she was elected to the House of Representatives, reelected each succeding Congress, including the 81st. She is the first Democratic woman ever to be elected to Congress and the first woman ever to head a legislative committee of the House of Representatives of the United States. She was chairman of the House Committee on the District of Columbia from 1930 to 1937, and chairman of the House Committee on Labor from 1937 to the opening of the 80th Congress, when all chairmanships went to Republicans, since they held the majority of seats in the House. The House was organized by the Democrats again in the 81st Congress and Mrs. Norton became chairman of the Committee on House Administration.

Mrs. Norton's best known work was her sponsorship of the wage and hour law, legislation in which she herself got the greatest satisfaction. She worked ardently for passage of the law to benefit thousands of American workers, although it was necessary to file a petition, requiring the signatures of 218 Members of the House of Representatives to permit it to be brought to the floor for action. Brought to the floor, it was recommitted to the Committee on Labor, and Mrs. Norton again had to sponsor a second petition to allow it to be presented for consideration on the floor. She has consistently done all that she could to maintain gains made by labor during the Democratic administrations. She sponsored and actively worked for legislation to establish the Fair Employment Practice Committee as a permanent agency.

Because of her broad knowledge and experience in labor problems in 1945, she was appointed by the President to attend the International Labor Conference at Paris as an advisor and alternate delegate.

Mrs. Norton has always stood for constructive, liberal, and good government. She was a strong advocate of adequate defense of our country even before the war. She has always been very much interested in the problems of veterans, and is keenly and vitally interested in the problems of our present day veterans. The first large and constructive measure which she sponsored in Congress was the building of a veterans' hospital in New Jersey, which institution has been enlarged many times.

As a woman, she is greatly interested in child welfare programs. During the war she was sponsor of an amendment to the Lanham Act, which provided funds for the care of children whose mothers were engaged in war work.

Mrs. Norton was dean of the New Jersey delegation. At times, when New Jersey had no Democratic representative in the Senate, Mrs. Norton handled matters not only for her own constituents, but for citizens of New Jersey as a whole who had no Democratic representation in Congress. She was concerned not only with general legislation, but hundreds of letters cross her desk dealing with individual cases, all of which required immediate attention. She is well known in the various Government agencies for the personal work that she did in behalf of individual constituents.

In 1930, Representative Norton received the first degree of doctor of laws ever conferred by St. Elizabeth's College, the oldest woman's college in New Jersey, in recognition of service in welfare and Government. In 1937, she received the degree of doctor of laws from Rider College, Trenton, N. J. The Women's National Press Club awarded her a citation for the most important contribution to Government in 1946. In 1947, she was awarded the Theta Phi Alpha medal—National Catholic University Women—as the outstanding Catholic woman of the year. An award for outstanding service was presented by the International Relations Club, St. Elizabeth's College, to Mrs. Norton in 1949. On June 4, 1950, she was awarded the degree of doctor of laws by St. Bonaventure's College, St. Bonaventure, N. Y.

Mr. Speaker, I ask unanimous consent that all Members who care to do so may extend their remarks at this point on the birthday anniversary of Mrs. Mary Norton.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. SIEMINSKI. Mr. Speaker, today former Congresswoman Mary T. Norton is 80 years old. Each of us joins in wishing her a happy birthday.

A COMMON CIVIL-MILITARY SYSTEM OF AIR NAVIGATION AND TRAFFIC CONTROL

Mr. PRIEST. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. PRIEST. Mr. Speaker, I wish to make a brief announcement for the benefit of Members interested in the current controversy over the development of a common civil-military system of air navigation and traffic control.

The Transportation and Communications Subcommittee of the Interstate and Foreign Commerce Committee of the House will hold hearings in executive session at 10 o'clock next Thursday morning to make a thorough investigation of the facts in this dispute.

As stated by the gentleman from Arkansas [Mr. HARRIS], chairman of the subcommittee, last Wednesday, the Interstate and Foreign Commerce Committee of the House has fostered the development of a common system of air navigation. The common system grew out of recommendations made by a subcommittee of the Interstate and Foreign Commerce Committee in the 80th Congress, of which the gentleman from California [Mr. HINSHAW] was chairman. That subcommittee, in House Report No. 885, 30th Congress, urged the establishment of a single system which will safely and economically serve the requirements of both commerce and the national defense simultaneously.

Subsequently, the Air Navigation Development Board, representing civil and military agencies, was formed, and it developed a common system known as VOR/DME. This system now is almost completed.

As a result of developments during the Korean hostilities, the military pushed ahead with the development of a tactical navigational system now known as TACAN.

TACAN and DME/VOR are not compatible. If we are to have a common civil-military system, it must be one or the other.

Recently, ANDB voted to complete the development of TACAN and clear the way for its adoption as the common system. This action has brought numerous protests.

We must have a common system. That is essential for national defense and also for the orderly growth of civil aviation. In addition, there is the very important consideration of economy. It would cost the country a lot of money to support two systems.

For those reasons, your committee proposes to make a complete investigation of this problem in an effort to resolve this conflict. We cannot permit this conflict to develop to the point where it threatens the very concept of a common system.

The committee questioned the Administrator of Civil Aeronautics about this on February 11 in open session but because details of the TACAN system are classified, it was decided to postpone the investigation until an executive session could be held. On next Thursday morning, the subcommittee will hear Dr. Donald A. Quarles, Assistant Secretary of Defense for Research and Development, and others familiar with the facts in the case. Also, to appear are representatives of the Army, Navy, and the Air Force, the Department of Commerce, the Coast Guard, the Air Navigation Development Board, the Air Transport Association, the Aircraft Owners and Pilots Association, and the National Business Aircraft Association.

PRESIDENTS' DAY

Mr. DOYLE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DOYLE. Mr. Speaker, in view of the fact that at my request our distinguished chaplain gave a prayer this morning for Presidents' Day, I think it appropriate that I call your attention to the fact that it originated in the great 23d District of California, which I have the honor to represent this my ninth year in the House; through the efforts of a very distinguished American, Mr. Hal Fischer, in the important city of Compton, Los Angeles County, Calif.

I call your attention to the fact that on March 4, in the daily CONGRESSIONAL RECORD, at pages A1404 and A1405 in my extension of remarks, I gave a brief history of the origins and processes of Presidents' Day as furnished me by Mr. Hal Fischer, the director of the Committee for Presidents' Day.

I think the prayer by our distinguished Chaplain, Reverend Braskamp, this morning was certainly most beautiful, appropriate, and pertinent. I wish to thank our distinguished chaplain for the beautiful prayer he gave this noon at the convening of this great legislative body.

Here is the proclamation which, according to Mr. Fischer, was used by some 41 governors of 41 States for Presidents' Day, 1954:

PROCLAMATION

Whereas the office of the President of the United States of America is the highest and most important that a citizen may attain, and it is the living and working symbol of the American flag and our Constitution; and

Whereas free peoples everywhere today face their greatest trials for the survival of their democratic way of life, which makes it incumbent upon citizens of this Nation to accept their just responsibilities in preserving the general welfare of this land; and

Whereas religion is our most vital asset, as it was with our Founding Fathers, and it is essential to remember and reaffirm our faith in God and our system of delegated authority under him:

Now, therefore, as governor of the State of ————, I do hereby proclaim March 4 as Presidents' Day in and for this State, and urge that prayers be said in all churches and places of worship for the President of the United States of America, and urge that the opportunity be given our schoolchildren to acquire a better understanding of the American way of life by studying the lives of our Presidents and their wives and presenting special programs appropriate to the observance in the schools of this State on this date.

And, in 100,000 schools in our Nation last year particular emphasis was given to the study of the Constitution and the office of the President of the United States.

MILK DISPENSER MACHINES

Mr. LAIRD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. LAIRD. Mr. Speaker, at 11:30 this morning, members of the House Agriculture Committee, representatives of dairy districts, and the leadership officially christened the two milk dispenser machines which have been installed in the Republican and Democrat cloakrooms.

I made arrangements to install these machines through the cooperation of the National Milk Producers Federation so that the Members of this House could actually see a milk dispenser in operation. These milk-vending machines have been installed during the past year throughout the United States. At installations of the Defense Department where they have been installed, they have become the most popular type of vending machine in operation.

Milk and its products have been and continue to be the best food bargain in America today. The difficulties which the dairy industry has faced during the past 2 years have grown from underconsumption of milk and milk products. Here in our Nation's Capital, we can show the way to better health and longer life through the greater consumption of dairy products.

These milk-vending machines being installed in the Capitol symbolize the effective efforts which are being made by organizations such as the National Milk Producers Federation and the American Dairy Association to increase the consumption of dairy products. Since I have been a Member of Congress, I have worked for and have promoted the increased consumption of dairy products by the armed services and the Veterans' Administration. In my original testimony before the Agriculture Committee last year, I suggested the increased use of milk in our Nation's school-lunch program. Currently I am sponsoring legislation to further increase the use of milk and dairy products in schools throughout the United States. I particularly call attention to my bill H. R. 675 which provides for the continuation of the school-milk program for the next 2 years.

At the present time all 48 States have signed up under the school milk program and the latest figures available show an increase of 55 percent in the consumption of milk in our schools as compared with last year. This volume is increasing rapidly as more and more schools get started on the program. Under the new program, schools in Wisconsin and other States are being reimbursed for a large portion of the cost of the additional milk which they serve to schoolchildren. Our State was the first to go under this program and it is interesting to note that the milk consumption in Wisconsin schools has increased by 114 percent—more than double the amount of milk which was consumed by Wisconsin schools last year.

A survey which was recently released by the American Dairy Association shows that the per capita consumption of butter has increased over 5 percent during the past year. This survey showed that during the 9-month period of April to December 1954, butter purchases by householders was up 12 percent. The per capita consumption of fluid milk and cheese also showed a marked increase and the total consumption of milk and cheese is up even more because of our growing population.

I invite my colleagues to help me raise these consumption figures even further by promoting the sale and use of dairy products in each of their individual districts. I thank the National Milk Producers Federation for their cooperation and it is my hope that each of you will enjoy the fresh, cold milk which is available as of today in the cloakrooms of both the Democrats and Republicans.

SPECIAL ORDERS GRANTED

Mr. TOLLEFSON asked and was given permission to address the House today for 30 minutes, following any special orders heretofore entered.

Mr. HILL asked and was given permission to address the House for 30 minutes on Thursday next, following any special orders heretofore entered.

THE 105TH ANNIVERSARY OF THE BIRTH OF CZECHOSLOVAKIAN PATRIOT, T. G. MASARYK

Mr. McDONOUGH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. McDONOUGH. Mr. Speaker, today is the 105th anniversary of the birth of the great Czechoslovakian patriot, T. G. Masaryk, and it is an event celebrated by all Americans of Czechoslovakian origin, and by the Czechoslovak people all over the world.

Thomas Masaryk was a true patriot. He was a man who dedicated his life to the realization of freedom, democracy, and independence for his native Czechoslovakia. And Masaryk lived to see his fondest dreams fulfilled.

However, shortly after his passing in 1937, the republic to which he had contributed so much, fell victim to Nazi tyranny. After enduring the hardships of Nazi rule during the war years, Czechoslovakia regained its freedom briefly, only to lose it again to the advancing tide of Red communism which has engulfed that nation.

The Communists have attempted to destroy the ideals of freedom and democracy in the hearts of the Czechoslovakian people, but in this they have not succeeded. The words of Thomas Masaryk still inspire his people, and give them renewed courage to withstand Communist tyranny.

Thomas Masaryk is an inspiration not only to the people of Czechoslovakia, but to all the free world. His words and deeds bring a message of the blessings of democracy and independence, and inspire unceasing struggle to achieve the ideals of liberty for which he stood throughout the world.

REGULATION OF NETS IN ALASKA WATERS

Mr. BONNER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 456) relating to the regulation of nets in Alaska waters. A similar House bill (H. R. 249) has been reported by the Committee

on Merchant Marine and Fisheries and is now on the House Calendar.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina [Mr. BONNER]?

Mr. MARTIN. Mr. Speaker, reserving the right to object, will the gentleman from North Carolina kindly explain the bill?

Mr. BONNER. Yes. The necessity for the bill arises from a recent court decision in Alaska which classified gill nets as fixed fishing appliances, the location of which is specified by law.

For the past 25 years the Fish and Wildlife Service has treated gill nets as a type of fishing gear subject to its regulation and has made regulations governing their use based upon the particular conservation needs of each area. In the absence of this bill, gill nets as well as salmon traps would be governed by the law covering the latter. Not only would this require a prompt and drastic revision of the rules of the Service but it would work hardship on various groups of fishermen without any compensating advantage.

Mr. MILLER of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. MARTIN. I yield to the gentleman from Nebraska.

Mr. MILLER of Nebraska. I should like to inquire whether this bill is the one that was referred to the Committee on the Interior and Insular Affairs?

Mr. BONNER. This bill was referred to the Committee on Merchant Marine and Fisheries which committee has jurisdiction over fishing matters in Alaskan waters.

Mr. MILLER of Nebraska. We had a bill before the Committee on Interior and Insular Affairs last year regarding the same problem, which was quite controversial, as I recall it.

Mr. BARTLETT. Mr. Speaker, will the gentleman yield?

Mr. MARTIN. I yield.

Mr. BARTLETT. I should like to inform the gentleman from Nebraska [Mr. MILLER] that this bill had no relationship to the one to which he referred. This is a separate matter entirely.

Mr. MARTIN. This bill was not necessary until the court decision, is that correct?

Mr. BONNER. That is what brought it about. I will say to the gentleman from Nebraska [Mr. MILLER] that there was no opposition to the bill.

Mr. MILLER of Nebraska. I will say to the gentleman that when the Committee on Interior and Insular Affairs dealt with a similar subject, there was considerable opposition.

Mr. BONNER. I can only tell the gentleman what took place in the Committee on Merchant Marine and Fisheries when we set it for hearing, and it had been set some time for hearings.

Mr. MILLER of Nebraska. Mr. Speaker, I do not want to be in the position of holding up an important bill, but I was wondering if it would be possible to let this matter go over until tomorrow so that I may have an opportunity to examine it.

Mr. BARTLETT. If the gentleman will yield further to me, I should like to say that this bill has been agreed to by the Department of the Interior, by the Alaska salmon industry and by the fishermen in the areas concerned. It has no relationship whatsoever to the proposed legislation which was formerly in the Committee on Interior and Insular Affairs.

Mr. MILLER of Nebraska. The gentleman understands that the bill that was before the Committee on Interior and Insular Affairs did have some opposition?

Mr. BARTLETT. That is true, but I assure the gentleman that this is an entirely different subject and that there is general unanimity as to the desirability, the purposes, and even the necessity of the bill now before the House.

Mr. BONNER. Mr. Speaker, I will say further to the gentleman that the reports on the bill were all favorable.

Mr. MARTIN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the reqeust of the gentleman from North Carolina [Mr. BONNER]?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the last sentence of section 3 of the act entitled "And act for the protection and regulation of the fisheries of Alaska," approved June 26, 1906, as amended (48 U. S. C., sec. 233), is hereby amended to read as follows: "It shall be unlawful to lay or set any seine or net of any kind within 100 yards of any other seine, net, or other fishing appliance which is being or which has been laid or set in any of the waters of Alaska, or to drive or to construct any trap or any other fixed fishing appliance, except a set gill net, stake gill net, or anchored gill net, within 600 yards laterally or within 100 yards endwise of any other trap or fixed fishing appliance."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

On motion of Mr. BONNER, a similar House bill (H. R. 249) was laid on the table.

THOMAS GARRIGUE MASARYK: A GREAT MAN AND A GREAT WORLD CITIZEN (1850–1937)

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, Thomas Garrigue Masaryk, who was the founding father and the first President of the Czechoslovak Republic, probably worked longer and harder than anyone else for its creation. No one was more patriotic, more persevering, and more devoted to the Czechoslovak cause than this scholar and philosopher. Consequently, it is not difficult to understand why the celebration of his birthday had become a national event in the Czechoslovak Republic before the advent of the Communist regime.

This great man was endowed with many talents, and he would have been a shining success in a number of professions. His learning, his mellowed wisdom, and above all his forthrightness and forceful character served him supremely well in his chosen task, that of recreating the idea of Czechoslovak independence among his countrymen. It served him equally well when he was presenting the Czechoslovak cause to the governments of other countries. Through sheer force of character he enlisted the support of the Allied governments for the Czechoslovak cause. Our Government, always sympathetic to the struggling underdog, gladly followed suit. In 1918 when Czechoslovak independence was proclaimed and Czechoslovakia was recognized as a democratic republic, it was not only a victory for the deserving and brave Czechoslovaks, but it was also a personal achievement of that great and gifted man, Thomas Garrigue Masaryk.

Unfortunately, today, because of the treachery of the Communists, this Republic is far from what he had hoped it would be, and his compatriots are now suffering a tragic fate. We in the free world honor his memory on this day and devoutly hope that soon the Republic which was his own creation and for whose well-being he devoted his life, will arise once more and regain that freedom which it enjoyed under Masaryk's leadership.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. RODINO] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. RODINO. Mr. Speaker, Thomas Garrigue Masaryk, the founder-architect of the post-World War I Czechoslovak Republic and its President for more than 15 years, is rightly regarded as one of the great men of Europe. He was a man of many talents; he was distinguished as a teacher, as a journalist-editor, as a philosopher-statesman, and as a national leader. This son of a humble coachman, through hard work and sheer force of character, became the leading figure in a movement for reviving the idea of national independence among his coutrymen. He probably did more than any other one man in securing that independence.

Profoundly grateful for his almost superhuman efforts in the cause of their freedom, he is regarded as the father of his country. He was elected to the Presidency of the Republic, and was reelected until 1935. At the ripe age of 85 he retired from office. Two more years of peace and tranquility brought him to rest on September 14, 1937, not long before his dearest work, the Czechoslovak Republic, was visited with destruction.

Thomas Masaryk doubtless would have been eminently distinguished in any land or in any age. His wide learning made him temperate and wise. He was a kind man and believed in the goodness of humanity. He was a stanch advocate of freedom for all, and was an undaunted champion of political democracy.

Today when we see many of the things for which this great man stood in danger of destruction, when we see them being sneered at and attacked by the leaders of the so-called people's democracies, we are dismayed but not discouraged. For we know that the principles of freedom and humaneness which Masaryk represents can never be destroyed even by the most ruthless tyrant. Today we pay tribute to his memory and pray that our generation will emulate Masaryk's strength and courage. If we do, we will certainly be victorious over those who seek to enslave mankind.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. ADDONIZIO] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ADDONIZIO. Mr. Speaker, on this 105th anniversary of the birth of Thomas Masaryk it might be well for us to restate the views of this great statesman of Czechoslovakia on the subject of religious toleration; for he was above all else a disciple of religious freedom.

Thomas Masaryk firmly believed that in a truly democratic republic "freedom of conscience and toleration must not merely be codified but realized in every domain of public life."

Truly this is an ideal to which all mankind can well aspire. But it is perhaps the greatest tragedy and at the same time the greatest paradox that the nation which gave the world Thomas Masaryk is today part of that world which denies the democratic concept of religious toleration and freedom of conscience. Czechoslovakia, like all States within the Communist orbit of power, has been undergoing a sustained attack upon its institutions of religion. Armed with total power, the Communists have denied religious freedom; they have decreed freedom for only the Communist creed. They have, in fact, even set out to destroy religion completely and in its stead infuse the philosophy of materialism and atheism into the structure of the Czechoslovak nation.

In Czechoslovakia today religion is under attack. Like all other nations in the Communist world, the light of religious belief in Czechoslovakia, as a consequence of sustained Communist persecution, might well slowly fade away. It is well, therefore, that on this anniversary commemorating the birth of Thomas Masaryk that we hold high the ideal of freedom of conscience and religious toleration which this great statesman advocated in the hope that its light may give some hope to the world's oppressed and perhaps do something to drive back the shadows of intolerance and religious persecution that have been enveloping the world.

EXTENSION OF THE RENEGOTIATION ACT OF 1951—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101)

The SPEAKER laid before the House the following message from the President of the United States, which was read, referred to the Committee on Ways and Means and ordered to be printed:

To the Congress of the United States:

I recommend extension of the Renegotiation Act of 1951, as amended, to make its provisions applicable for an additional period of 2 years. I make this recommendation because I believe the welfare of the country requires it.

In spite of major improvements which we have achieved in our contracting and price redetermination operations, there nevertheless remains an area in which only renegotiation can be effective to assure that the United States gets what it needs for defense at fair prices. In addition, I believe that the entire period of defense expansion and rebuilding which the United States has undertaken since the beginning of the Korean hostilities should be considered as a whole insofar as renegotiation treatment is concerned.

Continuation of the renegotiation authority is necessary for several reasons. Because of the complex nature of modern military equipment, the lack of experience in producing it and the frequent necessity for alterations during the life of a contract, it is impossible for the Government to determine, when the procurement contract is made, what constitutes a fair price and for the supplier to forecast accurately his costs. Moreover, because of limited sources of supply in many cases, there are situations in which the Government is unable to obtain the price benefits that accrue from normal competition.

Furthermore, in the interest of broadening and strengthening the mobilization base, we have encouraged the extensive use of subcontracting. Because the United States has no direct contractual relations with the subcontractors, the only protection against unreasonable prices by them is through the process of renegotiation.

All these factors become particularly important when it is recognized that expenditures by the Government during the next 2 calendar years will include paying the bills for the completion of the expansion of the Air Force to 137 wings. The next 2 years also will see an introduction into the Air Force program of the latest type of supersonic aircraft. New types of equipment also are being ordered for the Army and Navy and Marine Corps.

As a Nation, we recognize that so long as defense expenditures represent more than half of the national budget, we must do everything in our power to see to it that the maximum return is received for each dollar spent. On the other hand we must also be careful not to interfere unwisely in the traditional commercial relationship between the Government and its suppliers. In extending the Renegotiation Act last year, the Congress instituted new statutory exemptions. These have lessened the burden imposed on industry by renegotiation and, more important, have concentrated renegotiation in the areas where it is most needed.

I strongly urge that the Congress take action as promptly as possible so that both Government and business will know that this important adjunct to speedy and effective defense contracting will remain available, at least until December 31, 1956.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *March 4, 1955.*

STRENGTH OF UNITED STATES ARMED FORCES

The SPEAKER. Under previous order of the House, the gentleman from Florida [Mr. SIKES] is recognized for 30 minutes.

Mr. SIKES. Mr. Speaker, the Congress has been asked to approve an unanticipated cut in the strength of the Army. It is a cut which, from testimony before committees of Congress in recent weeks, was decided on last December after Army budget figures already had been prepared calling for a larger number of troops. The original estimate of troop strength for which budget figures had been prepared was more in line with the recommendation of the Army Chief of Staff Gen. Matthew B. Ridgway, and the recommendations of the key Army planners who have first-hand knowledge of the Army's worldwide responsibilities. The new figures on Army strength now before us do not have the approval of those men. In order for these figures to be submitted to Congress an entire new set of budget figures had to be hurriedly assembled. As a matter of fact, this adjustment of Army budget figures is still in process, attesting to the unusual manner in which the presently projected Army strength was arrived at. With this in mind, I feel that the Congress should take a long and careful look at the situation which now confronts this Nation defensively, and I urge that we be very certain of our ground before we place our blessings on the current estimate. There is no similar reduction of Communist army strengths anywhere in the world. There is ample evidence that Communist armies have been materially improved in recent years in firepower, mobility, equipment, and supply.

I am continually impressed with the scope and complexity of Army missions, with the number and importance of the tasks which the Army is expected to carry out, at the same time Army strength is being reduced. Particularly am I concerned when I contemplate the possibility of war and the nature of the prodigious job the Army will be called on to do in war.

Regardless of how popular the notion is that we can win a quick, cheap war without the extensive use of soldiers, whether they be allied or our own, and that we can win it in a few days, let us not be wholly committed to that notion, lest we learn too late that we were wrong. History has demonstrated clearly enough that there is no easy, impersonal way to win a war without getting your hands dirty. The inescapable truth is that war is a dirty business and we are not likely to win it without fighting the enemy's fighters, without enduring all the sweat and pain and hardships that war entails.

The premise of various new and untried military policies, in accordance with the perennial search for a machine

that will do our fighting for us, appears to be that nuclear weapons delivered by airplanes will be decisive, if we are forced to go to war. This assumption may or may not be true. But it is dangerous for a great nation such as ours to stake its security upon the accuracy of that one premise, yet untested by history, even if the premise were supported by all the military experts, which indeed this particular premise is not, by any means.

No matter how much we seize the diplomatic initiative, it will still be beyond our power to prevent the development of situations such as Indochina, Korea, and possibly Formosa—which is the crux of the matter today—if we have tailored our strength to a single concept and have relied on that single concept, even for total war. I cannot help believing with all my conviction that our best life insurance is versatile military strength, in which a highly mobile and hard-hitting United States Army is firmly in the foreground. This Army must be able to reinforce our overseas garrisons promptly, whenever and wherever they may be threatened, in local wars or total conflict. I do not mean to deprecate the roles of the other services, which are vitally essential. In fact, I believe that certain Air Force programs, for example, should be expanded, particularly in the air transport field, where our military experts say we need to accrue some of the strategic mobility necessary for the movement of hard-hitting combat Army forces in coping with Communist aggressions.

No matter how much we would like to substitute machines for men, there is so far no evidence that we can afford to do so. As far as can be foreseen at this time, the numbers of ground fighters required in future wars will not be less than in recent wars, despite the presence of nuclear weapons in the arsenals of nations. In fact, there is a real possibility that nuclear weapons will never be used in a future war. Although nuclear weapons have been available since 1945, everyone knows that they were not used in Korea, and that it took large numbers of the fighting ground troops of the United States Army and United States allies, powerfully supported by air and naval forces, to stop the Communist armies.

But especially if nuclear weapons are used in a future war, there is good reason to foresee requirements for more, not fewer, troops. In the first place, the great normal characteristic of the atomic battlefield will be dispersion, sporadically interrupted by rapid concentration after atomic blows to exploit the power of the nuclear weapon and then followed again by rapid dispersion. Dispersion does not mean that an army can do the same job with fewer men. While, as a simple illustration, ground forces are dispersed laterally to avoid presenting massed linear targets, there will be urgent requirements for dispersion in greater and greater depth, to prevent enemy infiltration between the dispersed forward units and to prevent atomic breaches in the defensive areas.

Units will probably be smaller and more mobile than formerly, but many more units will be required. When you disperse units over wider areas, you increase the problem of control and communications. More and better communications equipment will be required, which, in turn, means more and better trained communications personnel.

Replacements will be needed in higher ratios and greater numbers than heretofore, for the destruction possible by nuclear weapons may destroy large numbers of men, including whole units, at one time. The same increased effects will be felt in the enormous and vital logistical complex backing up the fighting field armies. For the evacuation and treatment of greater numbers of casualties, more medical personnel will be needed. All logistical operations will require greater dispersion. Great ports, for example, will be more vulnerable than heretofore; to avoid these vulnerable bottlenecks, we may have to use many small ports and beaches, which is a system expensive, not economical, in the use of manpower.

These are only a few of the considerations which provide the basis for considering that the Army, as I have said, may well need more rather than fewer men.

On purely pragmatic grounds, it would be an error of great magnitude to become overcommitted to untried strategies which leave the enemy's combat forces relatively unhampered. I do not know of any example in history of a great nation at war losing its will to resist until its armed forces have been decisively defeated. It is sometimes said that Japan's surrender in 1945 was brought about by strategic bombing on Japan's home islands, or even that the two atomic bombs alone brought about Japan's capitulation. This argument ignores the destruction of Japanese armies in New Guinea, in Burma, in the Philippines, and other areas; it ignores the strangling of Japan's naval forces and economic lifelines, primarily accomplished by United States naval power; it ignores the destruction of Japanese airpower, largely by United States carrier-based airpower; it ignores the fact that Japan put out surrender feelers before the atomic bombs were dropped—before, in fact, any strategic bombing attacks were made in force on the home islands; and, among still other factors, it ignores the fact that overwhelming land, sea, and air forces were poised outside the door, ready to apply the final invasion blows.

The missions and responsibilities assigned to the Army today are many, varied, and comprehensive. Mostly, they are missions which cannot be performed by any other organization or force, but must be performed by formidable organized land forces of adequate size and strength.

Among the missions and responsibilities assigned to our United States military forces, the Army has primary responsibility for all operations on land. In support of national objectives, the Army must defend the territorial integrity of the United States, establish and support strategic bases in vital overseas areas, and be prepared to assume an early offensive against the sources of Soviet power. These are tremendously complex responsibilities whose full requirements are difficult to grasp. At the risk of repetition, the following list of general responsibilities officially assigned to the Army may give a somewhat more detailed understanding of what the Army must be prepared at all times to do:

First. To organize, train, and equip Army forces for the conduct of prompt and sustained combat operations on land. Specifically, this means to defeat enemy land forces, and to seize, occupy, and defend land areas.

Second. To organize, train, and equip Army antiaircraft artillery units.

Third. To provide Army forces, properly organized and equipped, for joint amphibious and airborne operations.

Fourth. To develop, in coordination with the other services, tactics, technique, and equipment of interest to the Army for amphibious operations.

Fifth. To provide an organization capable of furnishing adequate, timely, and reliable intelligence for the Army.

Sixth. To provide Army forces as required for the defense of the United States against air attack.

Seventh. To provide forces for occupation of territories abroad, to include initial establishment of military government.

Eighth. To develop, in coordination with the Navy, the Air Force, and the Marine Corps, the doctrines, and equipment employed by Army and Marine forces in airborne operations.

Ninth. To formulate doctrines and procedures for the organization, equipping, training, and employment of forces operating on land, at division level and above, including division, corps, Army, and general reserve troops.

Tenth. To provide support for the administration and operation of the Panama Canal; river and harbor projects in the United States, its Terirtories, and possessions; and certain other civil activities prescribed by law.

The Army, along with the other services, carries out its responsibilities in support of United States policies, interests, and commitments. In order to understand how far-reaching these worldwide interests are, the following roster lists the numerous countries with which the United States has commitments which may involve United States military action of one kind or another:

First. Through NATO: Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, Netherlands, Norway, Portugal, Turkey, and United Kingdom.

Second. Through the RIO pact: Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, El Salvador, Guatemala — pending — Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay, and Venezuela.

Third. Through the ANZUS and Manila pacts: Australia, France, New Zealand, Pakistan, Philippines, Thailand, the United Kingdom, Cambodia, Laos, and Free Vietnam. Okinawa in this area has equal strategic importance.

Fourth. Through occupation: Germany and Austria.

Fifth. Through military assistance agreements: Spain, Yugoslavia, Iraq, and Iran.

Sixth. Through various bilateral mutual defense treaties: Canada, Japan, Formosa, Philippines, and the Republic of Korea.

Seventh. In addition, the United States is the principal bulwark of the United Nations, with its many member nations and numerous responsibilities.

In addition to these general missions, the Army must provide definite forces to accomplish certain specific missions:

The Army must provide certain forces which the United States has promised to NATO. The Army must garrison the outposts protecting the Western Hemisphere, such as those in Hawaii, Panama, the Caribbean, Alaska, Greenland, and Iceland. The Army must provide forces for defense of the continental United States. Mindful of the harsh fate of our forces left without reinforcement for months on Bataan, we want no more Bataans. Nor do we want any more Koreas, where a handful of troops, rushed onto the beaches, fought desperately to keep a toehold, hoping for early and strong reinforcements. Therefore, the Army must maintain combat-ready forces as part of our strategic reserve located in or near the United States ready to be deployed quickly to trouble spots, before disaster overtakes our side. There is no magic known by which trained forces can be created overnight. To create the additional powerful, trained forces required in emergencies, the Army must maintain in readiness a nucleus of training units, a nucleus of training installations, a nucleus of mobilization requirements of all kinds and a nucleus of the logistic structure to support the expansion that will be inevitable should war come.

In support of United States interests, and particularly in support of the specific responsibilities assigned, the Army is stretching its resources to accomplish its combat-ready mission, its training mission, its continental defense mission, its mobilization-base mission, and all its other missions in the United States, as well as maintain half its strength overseas in support of its overseas missions. In addition to Army attachés, there are Army personnel in more than 40 foreign nations, ranging in scope from small groups to the great field armies, the Eighth United States Army in the Far East and the Seventh United States Army in Europe. The presence of sizable United States Army forces stationed in key overseas areas on the ground, where the peoples of the countries concerned can see them every day, has been a strengthening factor in the determination of our allies to resist aggression, and the Army's presence has made a major contribution to such stability as exists in those areas of the world today. It is significant, I think, that there has been no Communist aggression against countries in which United States Army forces have been stationed.

The United States needs its entire arsenal of versatile, powerful forces sufficient to meet the many possible situations that may have to be faced in the cold war as well as in general war. The Army's role is indispensable. The Army must, in the interest of United States security, be maintained at strength adequate to carry out the missions which the Army is expected to perform. It is a proud, successful, forward-looking Army which deserves the best of support from the Nation which it defends.

Mr. JOHNSON of California. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I yield to my able friend from California.

Mr. JOHNSON of California. I have listened to what the gentleman has to say and it is very interesting. But, we have had some hearings in the Committee on Armed Services of the House where it was pointed out that the decrease in the armed strength was O. K.'d by the Joint Chiefs of Staff, and, of course, the Chief of the Army is Gen. Matthew B. Ridgway, himself, and he did tentatively say that he felt he ought to have more men than were allotted to him. But, I understand the final decision was based on this theory: That they balanced the capabilities of the groups, and that is not entirely measured by numbers. You made the point a while ago, it is true, that the Army has a great many commitments that it cannot shuffle aside, like the Army engineers, for instance, and others. But I received the distinct impression from the testimony before our committee that the total force we hoped to maintain, which includes deduction from the Army, is adequate to take care of any situation that might arise. But I do want to compliment the gentleman on raising this problem with other Members of Congress who have not heard the testimony given before committees.

Mr. SIKES. The gentleman's interest certainly is understandable and commendable because of his long service on the great Committee on Armed Services. I can tell you that I made careful inquiry into this matter during the hearings before the Committee on Appropriations on the defense budget for fiscal 1956. At that time I made very thorough inquiries of the Secretary of Defense, the Joint Chiefs of Staff, the Secretary of the Army and of the Army Chief of Staff, General Ridgway. It was clearly brought out that this is not a cut which has the approval of the Army Chief of Staff or of the Army's planners who must do the job which has been assigned to the Army. It was difficult to tie down responsibility for the cut in Army strength to any one particular person. Treasury Secretary Humphrey is credited by some as insisting that cuts be made somewhere in the military organization in order to present a stronger budget picture. The President himself is credited with accepting responsibility as Commander in Chief. The Secretary of Defense has assumed primary responsibility. But that does not mean that the Army's leaders who must do the job assigned to the Army, approve of it. I believe the testimony in our hearings bears that out in detail and I believe further that budget considerations were given more weight than they previously have carried where national defense is concerned.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I yield to my distinguished friend, the gentleman from Oklahoma.

Mr. EDMONDSON. I think the gentleman is performing a great service by alerting the House of Representatives to what is taking place with regard to our national defense on the Army level. I think the point is well made when the gentleman emphasized the fact that we are not seeing a corresponding decrease in Army strength on the part of the Communists or their satellites. As a matter of fact, is it not correct to say that the proposed cut in the Army strength of the United States is more drastic than any cut being sought by any other major power in its Army strength at the present time?

Mr. SIKES. In my belief, that is true. Further, it is a cut which is not balanced by a proportionate buildup in our allied forces. There is a dangerous gap in Army strength where Communist forces have a definite advantage.

DEVELOPMENT OF NATURAL RESOURCES

The SPEAKER. Under previous order of the House, the gentleman from Oregon [Mr. ELLSWORTH] is recognized for 20 minutes.

Mr. ELLSWORTH. Mr. Speaker, a subject which is of utmost importance to Members of this Congress is the development of the natural resources of our country. One of the basic plans for comprehensive resource development lies in the program of construction of multiple purpose water resources projects. This is especially important in the Pacific Northwest where the Federal Government and local, non-Federal interests have constructed billions of dollars worth of dams and water control reservoirs. A vital part of these projects is the development of electric power.

The need for electric power is nowhere more urgent than in my own Pacific Northwest. Unless new power projects are started within the next 2 years, the Northwest will face a serious power shortage by 1960. In fact, in the winter of 1952–53 we experienced brownouts and temporary shutdowns of industries. At present the creation of new industries is awaiting power from projects now being completed.

The people of my State and of the entire Pacific Northwest, however, realize that the responsibility for constructing new power projects does not rest solely on the Federal Government. They have wholeheartedly accepted the principle that local agencies should aid in the construction of multiple-purpose projects.

This principle was long ago outlined by President Eisenhower. In Seattle during the election campaign of 1952 the President sketched in a few words what is now the policy of the administration:

> We need resource development, and we need it on a river basin basis. We need resource development not to the limit of the whim of any administration in power, but to the limit of the capacity of the region to

benefit. And to do that, we need partnership to the limit of everyone's ability.

This principle strikes me as being a sound, efficient method to develop our natural resources. This is particularly apparent when such projects are small in nature and located within the service area of a locally owned utility. It seems entirely reasonable to me that such utilities should be allowed to relieve the Government of the power-generating and distribution costs of the project on a partnership basis.

I have today introduced a bill which represents an ideal partnership arrangement of this sort.

In the Willamette Basin in Oregon there have been authorized by Congress, two important multiple purpose water-resources projects. Both projects are primarily flood-control structures.

During the second session of the last Congress, however, both were authorized for the installation of power-generating facilities.

These projects are located in the heart of the territory served by two of Oregon's most successful electric utilities. One of these is publicly owned and the other is privately owned. These utilities are the Eugene Water and Electric Board, an arm of the city of Eugene, Oreg., and the Pacific Power & Light Co., a privately owned company whose service area includes a large section of the Willamette Valley.

The municipally owned utility was organized in 1911. It serves the parent city and a portion of the surrounding area. The total population in the area served is approximately 80,000. The board which administers the utility operation has made an outstanding record in the United States of efficiency, economy, and vision in the construction and operation of its electric system. In the 1954 report of the Federal Power Commission, the city of Eugene was cited as having the lowest residential electric rates of any city in the United States of over 2,500 population. The city owns and operates hydroelectric and steam generating facilities which supply the bulk of the community's power needs. This city's system is in need of the power which will be generated at the Cougar Dam. The city already has transmission lines which run close to the Cougar Dam site. It is logical, therefore, that the city of Eugene should be allowed to pay for and use the power facilities at the Cougar Dam.

The Pacific Power & Light Co. has been in business since 1910 and today serves 261,000 customers in a large area. It supplies electric service to all the principal communities affected by the flood-control problem on the Santiam River. In view of the fact that this company is at present the only electric utility serving the area and since it too has transmission lines in the vicinity, it is the logical utility to become the local participant in the construction of Green Peter project. The power that will be produced at the Green Peter Dam will not only benefit the region but also will materially strengthen the local power supply of a section of the State which has experienced tremendous growth in the wood products industries during recent years.

Both of these utilities have done a complete and thorough job in engineering and planning for the future power needs of their customers. It has become imperative that these utilities develop additional electric-generating facilities due to the rapid increase in the population of their service areas and the continuing industrial development of the Pacific Northwest.

When the present administration announced its policy of encouraging local participation in multiple-purpose projects, both the city of Eugene and the Pacific Power & Light Co. made separate engineering studies of the projects I have mentioned.

The bill I have introduced today permits the Federal Government through the Corps of Army Engineers to make contracts with local utilities, either publicly or privately owned, for participation in the Cougar and Green Peter projects. The local interests would pay for and operate the power facilities, including the reregulating dams. The participating utilities would also share such proportionate costs of construction, operation, and maintenance of the two flood-control dams and reservoirs as may be charged to power development in accordance with the separable cost remaining benefits method of cost allocation, as set out in the report made by the Federal Interagency Basin Subcommittee on Benefits and Costs, dated May 1950. The participating utilities will, of course, be licensed by the Federal Power Commission and will be subject to the provisions of the Federal Power Act as well as to the provisions of the bill I have introduced. The power generated at both dams will be sent into the Northwest power pool and thereby become a part of the power resource of the whole region.

Although the additional power which will be obtained from these two flood-control dams is badly needed in the area, the flood-control benefits to be obtained from the dams are of far greater importance to the communities. The people there realize that the passage of the bill I have introduced will hasten the time when the urgently needed flood-control benefits can be realized by reducing the amount of Federal appropriations required.

Both of these projects are fundamentally flood-control structures. They were originally authorized by Congress for that purpose. These two dams are the only major units in the Willamette Basin flood-control system which are not either completed or under construction. Flood-control damage which these projects will eliminate annually amounts to more than $2 million.

Under the terms of the partnership proposal which this bill authorizes, the non-Federal agencies would pay the total cost of the power features and would also contribute a portion of the cost of the flood-control structure. In the case of Cougar this means a payment of the city of Eugene of $11 million toward a total cost of $37 million. In the Green Peter-White Bridge project, the company would pay about $29 million toward a total cost of $58 million.

The two projects would have a total capacity of 135,000 kilowatts and would annually produce 436 million kilowatt-hours of energy. The power from these projects will integrate perfectly with all other power developments in the Pacific Northwest. Lines of both the city of Eugene and the Pacific Power & Light Co. are tied in with the Northwest power pool and their system operations are geared to the benefit of the entire region.

These projects are vitally needed by my State. The partnership proposal, with local agencies contributing $40 million of the total cost, will lead to their early completion.

This proposal represents a forward step in the thinking of the people of my State. In this bill we have a public agency and a private power company joined in a common endeavor to provide power for their customers and, at the same time, to hasten the development of two critically needed flood-control projects.

This proposal has received the overwhelming endorsement of both houses of the Oregon Legislature. A memorial seeking partnership construction of the projects was overwhelmingly approved within recent days and has been presented to the Congress.

During the second session of the 83d Congress a bill authorizing the participation of the city of Eugene in the Cougar project was unanimously approved by this House and was favorably reported by the Senate Committee on Public Works. Due to the last minute press of business in the Senate, it did not receive final action.

These specific projects received unqualified support from President Eisenhower in his January 17 budget message. I now quote from page M65 of that message:

> My recommendations are intended to encourage States and local public and private groups to take the initiative in developing our valuable water resources with Federal cooperation where national interests are involved. This budget includes $20 million under proposed legislation to enable the Bureau of Reclamation and the Corps of Engineers to participate, in 1956, in partnership water developments. Five million dollars of this amount is proposed for three multiple-purpose projects with power facilities in the Pacific Northwest. It is expected that local interests will install and operate the power facilities of the Cougar and Green Peter-White Bridge projects in Oregon and that the Corps of Engineers will build the flood control and other facilities in which there is a national interest.

This plan is a straightforward proposal which will give the State urgently needed power and flood control. It is a partial answer to the critical power problem which faces the Pacific Northwest. Under the partnership, everything is accomplished that could be accomplished by all-Federal development, and at a cost saving to the Federal Treasury of $40 million.

We have before us an opportunity to do exactly what the President of the United States has suggested as a sound basis for public improvement, where the Government undertakes to supply the

money for that portion of the improvement which is of national interest, and local interests are prepared to put up every dollar of the cost where they and they alone can use the resulting benefit. I am hopeful that this legislation will receive early and favorable consideration at the hands of Congress.

Mr. Speaker, under unanimous consent I include the text of the bill at this point in the RECORD on this subject:

H. R. 4662

A bill to reduce the cost to the United States for the development of flood control, navigation, and irrigation in the Willamette River Basin, Oreg., by providing for the construction, operation, and maintenance of power facilities and appurtenances at the Cougar Dam and Reservoir on the South Fork of the McKenzie River, Oreg., and the construction, operation, and maintenance of power facilities and appurtenances at the Green Peter Dam and Reservoir and construction, operation, and maintenance of the White Bridge Dam and Reregulating Reservoir (including power-generating facilities and appurtenances) on the Middle Santiam River, Oreg., to be done with funds advanced by licensees; said facilities, to the extent of local participation therein to be subject to the licensing provisions of the Federal Power Act

Be it enacted, etc., That the comprehensive plan for the improvement of the Willamette River Basin, Oreg., as authorized by act of Congress, approved June 28, 1938 (52 Stat. 1215), as amended and supplemented by subsequent acts of Congress, including the act of Congress approved September 3, 1954 (68 Stat. 1265), is hereby modified to provide for the construction, operation, and maintenance of the power-generating facilities and appurtenances at the Cougar Dam on the South Fork of the McKenzie River, Oreg., and for the construction, operation, and maintenance of the power-generating facilities and appurtenances of the Green Peter Dam together with the construction, operation, and maintenance of the White Bridge Dam and Reregulating Reservoir (including power-generating facilities and appurtenances) on the Middle Santiam River, Oreg., under licenses issued in accordance with the terms of the Federal Power Act and with this act.

SEC. 2. The power-generating facilities and appurtenances including White Bridge Dam and Reregulationg Reservoir (as described in sec. 1, hereof) of the respective projects may be constructed by the respective licensees hereunder, or, in the alternative, such facilities may be constructed by the Corps of Engineers as agents for the respective licensees with funds advanced therefor by such licensees. Construction pursuant to this section shall be in accord with the provisions of licenses to be issued by the Federal Power Commission in accordance with the Federal Power Act and this act. The respective licensees shall operate and maintain the power-generating facilities and appurtenances including White Bridge Dam and Reregulating Reservoir at their own cost and expense subject to the provisions of this act.

SEC. 3. The Cougar Dam and Reservoir and the Green Peter Dam and Reservoir shall remain the property of the United States and shall, except as specified in section 2 above, be operated and maintained by the Corps of Engineers. The respective licensees shall pay to the United States, through the Department of the Army, such proportionate shares of the cost of construction, operation, and maintenance of the Cougar Dam and Reservoir, and the Green Peter Dam and Reservoir as may be appropriately allocated to power development by the Chief of Engineers under the direction of the Secretary of the Army in collaboration with the Federal Power Commission, in conformity with the separable-cost-remaining-benefits method of cost allocation as recommended by the Federal Inter-Agency River Basin Subcommittee on Benefits and Costs in its report dated May 1950 or by such other method as may be mutually agreed upon by the licensees and the Secretary of the Army and approved by the Federal Power Commission.

SEC. 4. The Chief of Engineers, under the direction of the Secretary of the Army, is authorized to enter into agreements with the respective licensees for the operation of the dams and reservoirs insofar as such operation affects the production of power so as to secure the maximum multiple benefits from the operation of the dams and reservoirs as set out in the comprehensive plan of improvement for the Willamette River Basin, Oregon, referred to in section 1 hereof, and for the advancement of funds by the respective licensees, in accordance with the provisions of this act, and for other matters incident to the construction, operation, and maintenance of said projects. Such agreements shall be for such periods as may be consistent with the terms of the licenses issued by the Federal Power Commission, and any renewals or extensions thereof, and may be amended from time to time by mutual agreement.

SEC. 5. (a) If no application for a license to construct the power facilities at the Cougar Dam and Reservoir is filed with the Federal Power Commission within 2 years from the date of approval of this act, or if such application for a license is denied, or if construction is not commenced and carried out within such reasonable period of time as may be fixed by the Federal Power Commission, the entire Cougar Dam and Reservoir, including power facilities, shall be constructed, operated, and maintained by the Department of the Army, as provided in the act of Congress approved June 28, 1938 (52 Stat. 1215), as amended and supplemented by subsequent acts of Congress, including the act of Congress approved September 3, 1954 (68 Stat. 1265), as though this act were not enacted.

(b) If no application for a license to construct the power facilities at Green Peter Dam and Reservoir and to construct the White Bridge dam and reregulating reservoir is filed with the Federal Power Commission within 2 years from the date of the approval of this act, or if such application for a license is denied, or if construction is not commenced and carried out within such reasonable period of time as may be fixed by the Federal Power Commission, the entire Green Peter Dam and Reservoir and the White Bridge dam and reregulating reservoir, including power facilities at both sites, shall be constructed, operated, and maintained by the Department of the Army, as provided in the act of Congress approved June 28, 1938 (52 Stat. 1215), as amended and supplemented by subsequent acts of Congress, including the act of Congress approved September 3, 1954 (68 Stat. 1265), as though this act were not enacted.

Mr. ELLSWORTH. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include copy of a bill I am introducing today.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

SPECIAL ORDER GRANTED

Mr. HOFFMAN of Michigan asked and was given permission to address the House for 3 minutes today, following any special orders heretofore entered.

THE HOOVER COMMISSION REPORT

The SPEAKER. Under previous order of the House, the gentleman from Texas [Mr. PATMAN] is recognized for 20 minutes.

Mr. PATMAN. Mr. Speaker, I have asked and have been given permission to revise and extend my remarks and to include extraneous matter. I expect to speak today on the Hoover Commission and encouraging the family-sized farm and concerning a bill that has been introduced and also to include some correspondence in opposition to the proposal to sell the synthetic rubber plants. Some action must be taken pretty soon or they will be sold. I also expect to speak on credit unions.

Mr. Speaker, during the last week there has been a lot of publicity that has not been helpful to Members of Congress. This publicity leaves the impression that Members of Congress have permitted some great scandals to grow up and that the Members of Congress are not making any effort to correct these scandals. The information comes from the Hoover Commission.

One bit of information came out last Friday, published in the Washington Daily News, which stated in effect that the Government is wasting $4 billion a year on red tape documents and correspondence. It was stated that this is costing the people $100 a year per family to cover the cost of this unnecessary and wasteful paper work. I think that is very bad publicity for the Congress. I cannot believe it is true. I am ready to be convinced if there is any evidence to convince me because I certainly do not want $4 billion spent in wasteful correspondence. I do not want even $1 spent in wasteful correspondence. So I shall await with interest any proof that may be submitted.

On Saturday, March 5, 1955 the picture of a very intelligent looking, and I may say charming looking, lady was shown in the Washington Daily News. Under the picture it was stated that she has been appointed by the Hoover Commission to study ways and means of shortening and cutting down the 4 million letters that are being mailed daily by the United States Government at a cost of $1 a letter. It is rather startling to me to think we are mailing 4 million letters a day at a cost of $1 a letter. That runs into a lot of letters and a lot of money very soon, about $20 million a week, which in the course of 12 months would add up to considerably over $1 billion. Even that large estimate does not jibe with another Hoover Commission estimate of $4 billion a year.

The thought occurs to me, Why should not congressional committees look into this? Why should we be told by an outside group, that is not elected by the people, about these things when it has not been presented to a congressional committee? Why should an outside group appoint someone to find out something for Congress? And then, in the district I am privileged to represent, last week more than one weekly newspaper mentions an item which must have been sent out to weekly newspapers generally, or it would not have appeared in more

than one of the papers, but the item says that when "750,000 people are employed to do a job that Herbert Hoover says could be handled by 10,000, it is high time some sort of a change should go into effect." Well, I never heard of 750,000 people being employed to do a job that 10,000 could do. I never heard that here in Washington, D. C., or in the United States Congress. But, that is rather sensational and borders on emotional propaganda.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to my distinguished friend from Michigan.

Mr. HOFFMAN of Michigan. Well, the gentleman said that he did not understand why the Hoover Commission should be called upon to do that. Now, perhaps there are two answers. One is—and I recall this very distinctly—when the Hoover Commission was created the argument was that the Congress could not do it, and another reason, perhaps, was that when we did suggest something to the executive departments, they did not follow along. But, unless I am mistaken, did not the gentleman vote for that approximately $2 million to create the Hoover Commission and have it carry on its activities?

Mr. PATMAN. I did the first time.

Mr. HOFFMAN of Michigan. Yes.

Mr. PATMAN. And the gentleman correctly stated there that the argument was made that the Executive was lax in making these changes, but I think he is incorrect in saying that the Executive would not make the changes when called to his attention, because the very resolution itself calls for the Executive to make the changes that they recommend, where it can be done under reorganization, so certainly we would not be placed in the inconsistent position of voting for a resolution to cause changes to be made, because the Executive would not make them, and yet call upon that same Executive to make the changes that are recommended. That part does not seem to be very consistent to me.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield further?

Mr. PATMAN. I yield.

Mr. HOFFMAN of Michigan. First I want to thank the gentleman, and I appreciate very deeply that concession of yours that I may be 50 percent right. That is a little above the average, perhaps. And, again, as part of your criticism, it cannot be due to the fact that these suggestions were made by a commission headed by Mr. Hoover, could it?

Mr. PATMAN. No; that would not necessarily enter into it. Look at the facts.

Mr. HOFFMAN of Michigan. Yes. There have been so many, many things charged up to the Hoover administration.

Mr. PATMAN. That is right. Well, Mr. Hoover said himself that he was honored by having the Hoover depression named for him.

Mr. HOFFMAN of Michigan. And he did recall, too, that the Democratic Congress had rejected practically everything of any value in his recommmendations.

Mr. PATMAN. Of course, he did not correctly state that. I do not agree with the gentleman there. The Democratic Congress tried to help save the country, and he even refused to cooperate.

Mr. HOFFMAN of Michigan. And you just came along and closed the banks, did you not?

Mr. PATMAN. Mr. Hoover caused it. But, they were, in effect, closed when Mr. Hoover went out, because his policies had been very damaging to our country, and his policies were devastating to our country.

Mr. HOFFMAN of Michigan. Yes, and if that was true, you recall that Mr. Roosevelt said that that was not Mr. Hoover's baby. He would not even wet nurse it a little bit.

Mr. PATMAN. I would rather discuss that some other time with the gentleman, if he would like to do that. It would be a pleasure to do it, because there is another side to what the gentleman has brought up, I assure you.

Referring again to the Hoover Commission—yes, I voted for it. That was in 1947, the beginning of the 80th Congress, when President Truman was persuaded that if he would just bring ex-President Hoover back into the Government—Mr. Hoover had been President, he had served under Woodrow Wilson, who had started Mr. Hoover out pretty well, he had been Secretary of Commerce, had held all these poistions, and was in a good position to know something about the executive branch of the Government—it would serve a good purpose. Mr. Truman agreed to the creation of the Commission, with Mr. Hoover to be Chairman of the Commission, and for an outstanding Democrat to be vice chairman. They wanted it to be bipartisan; 7 Democrats and 7 Republicans. He thought that would be a fine thing. Congress voted for it unanimously. I voted for it. It sounded like a reasonable thing. During the first Hoover Commission, with their first reorganization plan, it was strictly bipartisan; there is no question about that. The Democrats had as much power as the Republicans. But in 1953 another Hoover Commission was set up and strange as it may seem, the word "bipartisan" was taken out of the resolution creating it. I discovered just recently that we do not have a Hoover bipartisan commission any more. It is a partisan commission. There are more Republicans on it than Democrats and they do not represent themselves to be a bipartisan commission.

If this was going to be a bipartisan matter under Mr. Truman, we should have had some outstanding Democrat as vice chairman—somebody like Mr. Acheson who was selected. Then when the Republicans came in, if they wanted to continue its work as bipartisan, they should have had an outstanding Democrat as chairman with Mr. Hoover as vice chairman. That is the way bipartisanship should work, as I see it. But instead of having the Commission with Mr. Hoover as vice chairman and an outstanding Democrat as chairman under the Republican administration, they struck out the word "bipartisan," indicating thereby that it was going to be a partisan commission. They made Mr. Hoover chairman and had no vice chairman at all.

The gentleman from Michigan [Mr. HOFFMAN] is a great believer in carrying out the strict letter of the law. The resolution providing for a second Hoover Commission said that the Commission "shall" select a chairman and a vice chairman. The language was mandatory. Ordinarily people carry out the plain letter of the law. Oftentimes they will debate whether the spirit of the law is so and so or such and such, but they never debate on the question of the strict letter of the law. But the Hoover Commission did debate on the strict letter of the law and elected Mr. Hoover chairman but refused—I will not say refused, but they have never had an opportunity to vote on a vice chairman. They do not have any vice chairman. They never have had any although the law says that they shall select a chairman and a vice chairman.

The gentleman agrees that they should not have done that, does he not?

Mr. HOFFMAN of Michigan. They should have done what?

Mr. PATMAN. They should have had a vice chairman and carried out the law, should they not?

Mr. HOFFMAN of Michigan. If the gentleman is yielding to me, I think they should.

Mr. PATMAN. That is right; I know the gentleman agrees.

Mr. HOFFMAN of Michigan. Will the gentleman permit me to finish my answer to his question?

Mr. PATMAN. Surely.

Mr. HOFFMAN of Michigan. Will not the gentleman acknowledge that the way things are going now it is pretty difficult to find anyone to serve as a Democrat or a Republican? There are so many New Deal Republicans and there are so many conservative Democrats that it is rather difficult to find a person to fill the bill. Moreover, does not the gentleman think that the way it is going along now it is all right?

Mr. PATMAN. No; I do not think so.

Mr. HOFFMAN of Michigan. What about that report that came in by this task force?

Mr. PATMAN. I was just referring to this sensational, emotional propaganda that is being sent out by the Hoover Commission.

Mr. HOFFMAN of Michigan. I agree with the gentleman; that is all wrong. They should not have anything emotional in it.

Mr. PATMAN. To continue, President Eisenhower selected some mighty good men in his Cabinet. I do not take any issue with him on his selections. He selected one of the ablest business men in the United States of America when he selected Mr. Wilson, the head of General Motors, as Secretary of Defense. I have Mr. Wilson's statement right here.

Mr. Wilson got out a pamphlet, You and Your USA—Your Representative in Government—It Is Your Town Council, Your State Government in Washington—Your Government Depends on You—Study the Issues and Study the Candidates, Then Vote.

That is a wonderful pamphlet, and I want to commend Mr. Wilson for getting it out. It is 11 pages long. This

pamphlet is intended for servicemen, who vote, of course. In this pamphlet, it says here on page 6:

Most pressure groups are watching out for the interests of some group of people. However, there are two phases we should know about. First, we should not permit a pressure group to force through a proposal which will benefit one group at the expense of all the rest of us. Second, pressure groups sometimes use unethical means to achieve their objectives. In trying to win public support they often arouse emotions and avoid the appeal to good judgment. Any organization which attempts to influence people by taking advantage of their prejudices is employed un-American methods of persuasion. The American way is through an appeal to the intelligence.

What confused me is that when Mr. Wilson, the Secretary of Defense, who got out this very excellent pamphlet, and he correctly described un-American activities, I am just afraid he is going to call the Hoover Commission an un-American group for putting out this emotional, highly prejudicial material, and I do not want him to do that.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Who published that pamphlet?

Mr. PATMAN. It is published at Government expense. The Secretary of Defense put it out.

Mr. HOFFMAN of Michigan. If the gentleman will yield further, I do not quite understand how this Hoover Commission can be so partisan when it or a commission created at the President's request came out the other day with a report on the public housing bill that the President had sent down. The gentleman noticed that, did he not?

Mr. PATMAN. Now, listen. I know the gentleman is one of the cleverest lawyers in this House.

Mr. HOFFMAN of Michigan. Answer that question, please.

Mr. PATMAN. I know, but I want to make this statement first.

Mr. HOFFMAN of Michigan. The gentleman has the floor. He can do anything he pleases.

Mr. PATMAN. The gentleman from Michigan is one of the cleverest Members of this House.

Mr. HOFFMAN of Michigan. Mr. Speaker, I protest. The gentleman is assailing me.

Mr. PATMAN. When a humble Member of Congress like myself gets up to talk about something that I know a little something about——

Mr. HOFFMAN of Michigan. Mr. Speaker, I object. The gentleman is just saying that because I am helping to furnish him an audience.

Mr. PATMAN. The gentleman has a habit of changing the subject to something that I do not know anything about from what I do know something about. So I am not going to yield to get clear off the subject. I will yield on this subject for anything the gentleman wants to ask.

Mr. HOFFMAN of Michigan. The gentleman was charging the Hoover Commission with being partisan in its activities. I asked the gentleman if he did not realize that just the other day the task force or a commission created at the President's request brought out a report which has since, I understand, been suppressed, condemning the Eisenhower school bill, Federal aid to education. That does not look as though it was very partisan.

Mr. PATMAN. Of course the gentleman might pick out things here and there, because those task forces are composed of nearly as many members as we have members of the House and Senate. We have farmed out to them a lot of our legislative work. They even have subpena power. They go out and have hearings. They have a conflict of interests, too. They have a right under the law to do that.

Mr. HOFFMAN of Michigan. We authorize them to do that.

Mr. PATMAN. That is right. I say they have a right under the law to have fellows sitting up there as Members of Congress who have a personal interest. The conflict-of-interest statute does not provide anything against that in view of the exemption. They call them up and ask questions, then they get out the record. They probably might fix the record so that it would make it look pretty good the way they want it to go.

Mr. McCORMACK. Do I understand correctly that the gentleman from Michigan said the task force made a recommendation that was suppressed?

Mr. PATMAN. I heard him say that, but I do not know anything about it.

Mr. HOFFMAN of Michigan. Either suppressed or the publication limited. I have not been able to get one yet.

Mr. McCORMACK. I do not think there is anything partisan about that. It is strange to say the least.

Mr. PATMAN. The point I am getting at next is this.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield once more?

Mr. PATMAN. I will be glad to yield to the gentleman.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. HOFFMAN of Michigan. The gentleman has been complaining about this Hoover Commission and apparently its desire to advance the interest of the Eisenhower administration. Is not the State of Texas partly to blame or to be congratulated for Mr. Eisenhower's election? Did not your State cast its vote for Mr. Eisenhower?

Mr. PATMAN. Yes; under a misconception.

Mr. HOFFMAN of Michigan. Oh, yes.

Mr. PATMAN. I do not think they will do it any more.

Mr. HOFFMAN of Michigan. But you will admit you made one mistake.

Mr. PATMAN. We sure did, we sure did, that is a majority did, and a lot of your people made that mistake too. I did not.

Mr. HOFFMAN of Michigan. No; we do not think it is a mistake on our part.

Mr. PATMAN. As to this second part of this Hoover Commission, it is not right for the Members of Congress to farm out their duties anyway. Let us go back to fundamentals. The legislative branch of the Government, I think, is the greatest of the three branches of Government because it has all of its power directly from the people. You know under our system, everyone of the 435 Members of the House is elected every 2 years. No person who sits in the House of Representatives comes here unless it is as the result of a free election by direct vote of the people. No Member of this legislative body is an appointed Member. No Member has ever been appointed or ever will be appointed. They are all elected. If they are here as Representatives of the people, they are elected by the people, and that is a fine thing. Thus, the people have control and they can change the trend in the Government every 2 years, if there is the desire to change the trend in Government. Furthermore, the Founding Fathers made it possible under the constitution for this body, the House of Representatives, which is so close to the people, to have certain powers over the purse strings which the other body does not have. The reason is obvious. The people want the House of Representatives which is the body closest to them to have charge of the purse strings. Therefore, certain bills cannot be introduced except in the House of Representatives. Certain bills cannot be introduced in the other body at all. The Founding Fathers were wise in having that provision so that this body which is so close to the people would enable the people to control their Congress and the Government by controlling the purse strings. They control the purse strings of the Nation by controlling the House of Representatives. It was a wise thing to do.

We should not farm out these legislative duties. Here we have people under the Hoover Commission, with almost as many Members of the Congress representing special private interests and selfishly interested going out and holding hearings just like Members of the Congress with almost as many people as there are Members in the Congress, getting out reports and getting up legislative bills for us, and naturally they have a lot of steam behind them by the time they get to the Halls of Congress. Should that be allowed at all? Should not Congress do this work? The other day Congress properly provided extra pay for the Members of Congress. It should have been done a long time ago. We are getting a man-sized salary for the work we do. The Members of Congress are honest and sincere people. I do not believe that the people could improve on the Members we have here, and I am not now talking from the point of view of partisan politics, but I make that statement because I feel that the people in the long run always make a wise choice in selecting people to come to the Congress in both the House and the other body to represent them. That salary increase was not voted for, at least by myself, in the hope that the people could improve their representation from any district in the United States. That was not the object at all. It was just to pay people a salary comparable to what other people get in similar or like work in business and industry. It was a well

deserved and a long deserved raise. But now since we have that raise, I think we ought to increase it a little bit and have an administrative assistant who could help us. Last year, we saw a tax bill go rushing through the Congress. The bill was 900 pages long. It might have had 900 loopholes in it. I do not know. We have had testimony that there are a lot of loopholes in it since that time.

If we had had 435 administrative assistants looking over that bill, pulling it apart when it reached the floor of the House, we would have had some intelligent discussion of that bill and would have knocked out some of these loopholes; but the Members have not been equipped to do that. They should be equipped to do that. They should be equipped to do a good job. We should not have these Hoover Commissions. We should not have these commissions appointed by the President looking into veterans' benefits. Why does he not refer it to the people who are elected by the people? Why pick out the head of some big life insurance company or the head of Standard Oil and ask them to look into veterans' benefits? Why not turn it over to the people in the United States Congress who are responsible to the people? If they make a mistake the people will penalize them for it. We should not have these commissions. We should stop them, and the Congress should do the work itself.

ENCOURAGE THE FAMILY-SIZE FARM

Mr. PATMAN. Mr. Speaker, almost a year ago I called the attention of the Congress to the disastrous rate at which we are destroying our family farms. I pointed out how we are building up the huge, absentee-owned and operated factories in the field, and displacing nearly 75,000 small farm families each year.

We have just concluded the joint committee hearing on the President's Economic Report, and soon will have a report of our own ready for the Congress. I hope every Member will read it.

Surveying the American scene today, what do we find?

Giant banks are merging in the great cities, concentrating the financial power to hitherto undreamed of extent.

Industrial concerns are being merged faster than ever before, as small business struggles unequally to maintain itself in an economy that is more and more passing into fewer and fewer hands. It used to be that when we spoke of a billionaire corporation we were talking in theoretical possibilities; today we speak of such corporation in terms of actual fact. There are 68 billionaire corporations today, and they control over one-half of American business, according to testimony before our joint committee.

And finally, we see more and more small, independent farmers, 75,000 a year, forced from their land, their holdings swallowed up in big corporate farms, and themselves forced to go to the cities, there to hunt for jobs. This matter is of urgent concern to all of us, and that includes organized labor, which is increasingly pressured for jobs by the augmentation of the working force. It is not improbable that another 30,000 or 40,000 tradesmen, servicemen, and small merchants leave the small rural towns each year to go to the cities. The departure of the farm population strikes a continuing and deadly blow at the small town and the small merchant.

According to the latest figures I have been able to obtain, farm population has decreased more than 8 million since 1930, while our overall population has increased by some 41 million.

CONSIDERABLE INTEREST MANIFESTED

I confess that when I first spoke of this alarming situation a year ago, I feared that I might not even be heard, but the public reaction to what I said then has been overwhelming. Labor groups, churches, farm organizations, the Catholic Rural Life Conference, the National Council of Churches of Christ in America are concerning themselves most seriously with the condition—the blight, if you please—that has stricken our farm economy.

We cannot go on destroying our independent family farmers and hope to remain a strong Nation. History teaches us that. Every upheaval and political dissolution in recorded history has proceeded from the amalgamation of land and natural resources in a few hands, and the denial of those blessings to their rightful owners, the people. We can no more escape this fact than we can escape the law of gravitation. The Communists built the Russian revolution of 1917 on the campaign to take the land away from the nobility and give it to the peasants; the Chinese most recently have built their own revolution, and their subversive campaigns throughout southeast Asia, on the same program of propaganda. In Italy, Germany, Japan, and now in southeast Asia, we have taken the lead in effecting a redistribution of the land to give the people farms upon which to work and earn or grow a living.

But at home, despite the disastrous rate at which the family farm is being wiped out, we have chosen pretty much to ignore the whole problem.

I should like to remind the Members of what Thomas Jefferson, who saw very clearly the value of a family farm population, wrote to John Jay in 1785:

> Cultivators of the earth are the most valuable citizens. They are the most vigorous, the most independent, the most virtuous, and they are tied to their country, and wedded to its liberty and interests, by the most lasting bonds.

The English historian, Arnold Toynbee, has this to say of the dissolution of Greece and Rome, which began on the farms:

> The next stage of technical advance was an increase in the scale of operations through the organization of mass production based on slave labor. Here the technical advance was offset by a grave social lapse, for the new plantation slavery was a far more serious social evil than the old domestic slavery. It was worse both morally and statistically. It was impersonal and inhuman, and it was on a grand scale. The social consequence was the depopulation of the countryside and the creation of a parasitic urban proletariat in the cities and more particularly in Rome itself. * * * Thus this social cancer eventually extinguished itself by causing the death of the society upon which it had fastened.

History furnishes us with no example by which we may console or lull ourselves in the thought that political upheaval and time of trouble does not inevitably follow the dissolution of a family farm society.

LIMIT GOVERNMENT BENEFITS

That was why I proposed more than a year ago that we act to devise a program of support for the family farm, and that we limit the Government benefits which might be derived by the big, absentee-owned factory farms. That is why I proposed that we limit the Government payments to the family farm level of gross annual product, and that we allow all farmers to participate in the benefits up to that level of $7,000 gross product, and thereafter cut off any benefit payments. I renew that proposal today. I said then, and I repeat it, that after the farmer has received benefit payments up to the family-farm level of gross annual product, $7,000, he should receive no benefits above that level of product; and if he should produce $25,000, or $50,000, or a million dollars' worth of cotton, corn, wheat, or any other product, he should not be allowed to draw Government benefits for that amount. He should sell on the free market without the benefit of Government assistance any amount of product above $7,000.

Thus I would provide full parity price support up to that level of production. Thus we would give full support to the 80 percent of farmers who sell $7,000 or less of product each year, and we would immediately cut off the operators of enormous farms who are producing for the Government market in enormous quantities and swamping us with surpluses.

We have been and are still paying enormous and undeserved Government subsidies to these factory farmers, encouraging them to produce more and paying them more Government money with which they can expand at the expense of the general taxpayer. Since I first spoke, I have found that great numbers of citizens are becoming aware of this situation and will support a program designed to limit benefits to the family-sized farm. I have literally hundreds of letters testifying to this fact.

SPARKMAN-PATMAN BILL

I am advised that the President soon will submit his farm recommendations to Congress. It is my earnest hope that the program will include positive measures to provide family-farm supports without allowing at the same time an undue enrichment of mass-production farmers; and second, that the program will provide measures for assisting with credits, technical assistance, and other means the more than 1 million farmers who produce and sell less than $1,000 of product each year. I hope the measures will be along the lines of the credit assistance bills introduced recently by Senator SPARKMAN and myself. By limiting the benefit payments to the average family-farm income level, to sustain that income; by giving assistance to our underprivileged farmers; and by cutting out unjust enrichment of the huge farmers, we can have a realistic and sound farm program.

Some of our economists and others tell us that we simply have to have consolidations and elimination of the small farmer in the name of efficiency. I take it they mean technical efficiency. I am waiting for them to speak up in the name of social efficiency, which means keeping a healthy economy, providing the greatest good for the greatest number of persons, including farmers. We know for a surety that the age of automation is upon us; we cannot possibly foresee the vast developments of automation that will come within the next 10 years; nor the possible effects on employment. But we can foretell without any difficulty that whatever the effects of automation may be, they will be compounded by the steady displacement of some 150,000 small farmers, artisans, and merchants each year, and their addition to the surplus-labor pool. It will simply create more unemployment pressure, more relief loads, more unemployment compensation payments.

How much better it would be then—for the farmer, for labor in the city, for small business, and even for big business, too—to have a workable family-farm program that would enable the family farmer to stay where he wants to be and where he belongs—on his own farm—and a program that would enable those in the city who might wish to return to the farm to do so with a reasonable surety of being able to make a living.

I believe that, if we enacted the program I have proposed, this objective would be achieved.

Lower prices—without hurting the family farmer in the least, who comprises over 80 percent of all our farm families—would enable us to regain in part our foreign markets. Lower prices would amount to an automatic wage increase for all of our wage and salary earners.

The factory farmer would be given a direct and compelling incentive to cease production for Government market and to break up and sell or rent his vast holdings to those families who now need and want land but cannot have it under our present system.

I have been asked what the family farm - production payments program would cost, based upon providing full parity for gross annual product up to $7,000 per year. The question is a fair one, and the only answer is that it is impossible to tell with any finality. I have made rough calculations which show that it might be as low as three-fourths billion dollars per year, and as high as $3 billion. A great part of the cost of the program could be borne by funds derived from the liquidation of our present surpluses down to reasonable stockpile levels. We need a stockpile as insurance against wars, droughts, floods, and other emergencies. But a part of the cost could be taken up by liquidation of our present surpluses to those reasonable levels.

In our capitalistic system which we all approve velocity of money helps the country as much as volume of money. Every dollar placed in the hands of a person who spends it causes $1 more to enter the blood stream of business and commerce. It will travel and travel fast from hand to hand and from business to business. If it only reaches 20 people in a year who pay the equivalent of 5 percent on it in income taxes to the Federal Government the dollar will be entirely repaid to the Federal Treasury.

Interestingly enough, Secretary Benson has submitted a report on the use of production payments in the dairy industry. It is printed as House Document No. 57, 84th Congress, 1st session, and is dated January 5. On page 9 of that report, it shows—and the Secretary's staff prepared the study—that the substitution of production payments instead of loan-purchase storage would greatly increase consumption of milk products, bring down food prices without depleting the farmer's income, and that the total overall cost increase to the Government by production payments would be $350 million at 75 percent of parity, and $1,225,000,000 at 90 percent of parity. I have had some other calculations prepared on the basis of the Department of Agriculture report.

These figures show that consumers would buy 3.2 billion pounds more of milk and milk products. The payments program would cost them $350 million more as taxpayers, but their milk products would cost them $100 million less as consumers. The studies show that as consumers the public would benefit, while as taxpayers the public would pay slightly more to sustain the programs. This, too, is without any limitation of benefits to family-sized producers such as I have proposed. Such a program would have the advantage of reducing food costs generally, but of particular importance to the low income, large-sized worker families which form the mass consuming base of the country; while the added cost, $1,225,000,000 at the most without any limitations of production payments, would be borne by the groups which pay income taxes in accordance with their earnings.

Such a program should be undertaken for a trial run, and then improved upon as our experience directed.

I am glad that the Department of Agriculture is coming around to see some merit in such a program, and in fact, it has adopted just this program—again without limitations—in respect to wool production.

This program of payments plus limitations was first proposed more than a year ago by one of the finest Americans I have ever known, Mr. E. G. Shinner, of Chicago, a retired successful businessman. I believe that we will have to come to such a program; if we do not do so willingly and with foresight, we will be forced to do so by the stern logic of social efficiency, and the necessity to maintain a strong farm economy.

Some economists, as I said, disagree with the suggested program on the ground that it would subsidize or underwrite inefficiency. I do not agree with this. The factory farms, employing seasonal hired labor, would not make such a mark of efficiency if they were required to pay minimum wages, unemployment compensation, and other benefits commonly required of factory-type production.

Recently Mr. Shinner sent out letters explaining his program to many members of the National Grange. You will note that in his original letter he suggested the possibility of a graduated-support system. I make that point because this is an effort to reach an equitable and workable program that supports the family farm, sustains our economy, and proposes to withdraw the benefits from those only who do not need them.

Mr. Speaker, I place Mr. Shinner's original letter in my remarks at this point:

THE SHINNER FOUNDATION,
Chicago, Ill., December 17, 1954.

Nearly everyone agrees that some form of farm-price support is necessary to insure our whole economy against the effects of an agricultural depression, and that neither the present flexible supports nor high rigid supports are the final answer.

Your organization, the National Grange, has advocated a two-price system for wheat which would permit it to drop to the market price but provide that the farmer get a payment on that portion of his wheat used for domestic food; payments to the farmers to be made from money collected from the processors who use the wheat for domestic food products.

Your organization, likewise, is a valiant defender of the family-type pattern of agriculture.

I would like to have your reaction to a proposal that uses the adjustment-payment principle in your wheat plan to accomplish a little different end—family income support instead of a particular commodity price support. The suggestion is:

That new farm legislation be enacted which would provide for direct payments to farmers, in the place of a general price support, for the entire crop; that support be limited to the family-size farm on a graduated basis substantially along the following lines: 100 percent of parity on the first $7,500 of gross production, 90 percent of parity on the next $2,500 of gross production, 80 percent of parity on the next $2,500 of gross production, 70 percent of parity on the next $2,500 of gross production; thereby bringing the total amount of farm products on which a farmer could earn a payment up to a maximum of $15,000; any production beyond this amount to be sold in the open market without benefit of Government support.

Payments would be the difference between the support level and the open-market price. Any payment which a given farmer may have earned during a calendar year would be paid to him in accordance with a report filed with his annual income-tax return. It is suggested that the Government maintain the ever-normal-granary idea, both to moderate commodity price fluctuations and to provide a reserve against floods, droughts, wars, or other emergencies.

Very sincerely yours,

E. G. SHINNER,
Chairman, the Shinner Foundation.

P. S.—The writer spent many years of his life on a farm and is seeking to advance this idea purely on his belief that it is in the interest of the general welfare.

E. G. S.

A great many of these letters were sent to the National Grange headquarters here in Washington for comment, as the members were plainly impressed by the equity of the Shinner program. So many letters were sent in that on January 26, 1955, the Grange economist, Dr. Lloyd C. Halvorson, replied directly to Mr. Shinner. Mr. Speaker, I place Dr.

Halvorson's reply in my remarks at this point:

NATIONAL GRANGE,
Washington, D. C., January 26, 1955.

Mr. E. G. SHINNER,
Chairman, the Shinner Foundation,
Chicago, Ill.

DEAR MR. SHINNER: We have received a number of letters from you. Many letters were forwarded to us by our members. We also acknowledge receipt of the two enclosures.

If we want to maximize the utility of farm products already produced, or if we want to maximize the potential utility-producing capacity of our agricultural resources, we should allow the free market to reign. (This is generally true, but possibly not in all cases). The problem is, of course, that if we so rely on the free market, farm income is unsatisfactory. Now we can raise farm income either by interfering with the free market so as to increase the gross and net income of farmers, or we can leave the free market alone and raise farm income by direct subsidies.

As you may know, for farm products with an inelastic[1] demand it is possible to raise the gross and net income by curtailing the supply. In some cases production is not curtailed and instead the surplus is in effect bought by the Government. Here the taxpayer's money is used to buy the surplus, and in such cases, we believe, the Government has a responsibility to see that the surplus is not wasted but it is used to some advantage. When the production of a commodity has not been curtailed and the surplus is at hand, the attainment of a certain producer's income might not cost the taxpayers any more through the direct payment route than through the nonrecourse loan or purchase agreement route. However, if the demand for the product was very inelastic, the direct payment route would cost taxpayers considerably more than the nonrecourse or purchase agreement route. However, the total cost of the direct payment route to the American people (taxes plus consumer expenditures for the commodity) would be no greater and the people would be ahead by having the product to consume rather than to pay storage on.

Aside from economics, many people consider it a political evil for farmers to be dependent upon the Treasury, that is upon politicians for part of their income, and for consumers to have food at low free-market prices, below a price which would reflect an American standard of living to farmers.

There is and always will be some stigma upon those citizens of our country who receive a direct subsidy from our Government. Direct subsidies will always be looked upon as a dole or handout. Farmers are a self-reliant group and want to earn their income in the market place. If the free market does not give them a return for their labor and investment comparable to that received in industry and commerce, they want to see adjustments made in the market place. Farmers feel that the main reason for their low income is that the small size of farms and the large number of them puts them at a disadvantage in the market place, and that this situation needs some remedy.

A direct payment program for all farm commodities, or just the major ones including livestock and livestock products, would have cost the Treasury several billion dollars a year during the 1930's. Of course, the total cost to the American people of raising farm income this much above the free market level would be the same by either the price or subsidy method, but in the one case most of it comes from taxpayers, and in the other through the price system. The incidence of the cost of raising farm income is much different in the two cases and some feel it is morally wrong to put the cost upon our taxpayers rather than upon the consumers. Raising farm income through the direct payment route, because it increases taxes, may have more of a stultifying effect on our national economy than doing it through the price system.

The school of thought which favors the direct payment route points out that to raise farm income through the price route involves a curtailment of production or the withdrawal of supplies from the market. This reduces the supply of food and fiber available for consumption, and this is contrary to a rising standard of living. It is, they say, a philosophy of scarcity. Also, this school of thought points out that if we try to raise farm income through the price or market route, we regiment farmers in their production and we get Government into business, and, even worse, we destroy the resource allocating function of price. However, even the compensatory payment method, unless done in a particular way, would also be guilty on this charge.

If Congress implemented your farm program with its schedule of support prices (100 percent of parity on first $7,500 gross production down to 70 percent of parity for $15,000 gross), it would likely get production more out of balance with consumer demand than anything I can imagine. The support level has to be related somehow to the commodity's doing in the market place or else there has to be production control. For example, under your schedule, the farmers could all shift to producing cabbage, if that parity price were especially attractive. Your schedule of supports from 100 percent of parity for small farms down to 70 percent for large farms would continue in existence, even if we raised enough cabbage to make a stone wall all around our country 20 feet high and 10 feet wide.

Apparently you would abolish the tobacco program and let anyone grow tobacco. Any small farmer (under $7,500 gross) would get 100 percent of parity. What would you do with all the tobacco that would be produced?

We recognize that the policy of using restriction of production (beyond simple adjustment or balance within agriculture itself) as a means of raising net farm income is of debatable soundness, because of the often repeated indictment that it is a philosophy of scarcity. Our two-price plan on wheat would not require production control after the present accumulated surpluses were disposed of, but the amount of wheat that would be supported at or near parity would be directly related to the quantity sold for cereal food uses, rather than according to size of farms as you propose.

I could go into the direct-payment plans proposed by farm economists, starting about 1945 to show how they are more realistic than your proposal, but I cannot take the time.

Some people doubt that a direct-payment system would be administratively feasible. They feel that farmers should, in collusion with local buyers, show larger sales, the basis of subsidy, than they really had. Also, it would not make sense to pay a direct subsidy of a few dollars to millions of farmers if the purchase of a few hundred carloads of the product at a certain time would have obviated the need of this gigantic administrative task.

The direct-payment method would mean cheap food for those who are employed, and even those with good jobs. Some argue that these people should pay farmers a price in the market place reflecting a fair rate of return for labor and investment and that the surplus should be disposed of to people who are unemployed, are handicapped, or are unable to afford an adequate diet for some reason or other. In other words, these people feel the stamp plan is superior to the direct-subsidy plan.

For storable commodities it may be wise for the Government to carry some reserve, but for perishables this is rather impractical or unwise.

The Grange program does not favor the direct-payment method as a general method of supporting farm income for the reasons advanced against it above, but we do recognize that in some cases it may be the best method of supporting the income of some commodity producers, especially in the perishable field. Even then we believe it should be used as a last resort if other methods are unsatisfactory.

You favor reducing payments for farms with a gross income over $7,500. About 800,000 farmers do have gross sales in excess of $7,500. We know that many of these are efficient family-sized farms. I do not think we should discriminate against efficiency nor put a ceiling on opportunity in agriculture. Some businessmen have Cadillacs and vacation in Florida. We should allow capable people to prosper in agriculture just as people in other fields than agriculture are allowed to prosper.

We do believe it is sounder for America to have her food and fiber supply produced by people who largely own or rent the land they operate rather than by people who are only employees with indefinite tenure. Our agricultural communities would be lacking much if they were not made up of independent owners with enough security of tenure to have community pride and to take an active part in civic affairs. We probably get a more equal distribution of income with a family-type agriculture than we would with a corporate-type agriculture seeking cheap labor.

Another point of view is that society does not really sanction the subsidization of the income of people who are really well-to-do. A taxpayer of small means really wonders why he should pay taxes so that someone with a $200,000 wheat or cotton crop can have even more income. Especially this is true when some big farmers say they can produce for less than the support price. Of course, on this premise we really get to the question of why do we subsidize the income of family-sized farms and not the income of city people no better off or even worse off than family farmers.

To a large degree we can defend the farm program on the basis that it provides (1) needed reserves, (2) eliminates extreme and harmful price fluctuations, (3) promotes technological progress, (4) gives agriculture better merchandising methods, and, more nearly, equal bargaining power (we do not look upon the large Government acquirements of surpluses in recent years under the loan program as normal), and (5) promotes soil conservation. If these devices raise farm income, even for the better farmer, maybe it is fully justified.

As for the low-income farmer, we believe there are better ways to help him than give him a subsidy for being poor. We must try to get them into situations where they can make more productive use of their efforts, in particular combine their brains and brawn with more land and capital. We need more education and credit to aid them to reach desirable income levels based on their own productivity. What we need is equal opportunity—not a handicap race.

We believe in more equal distribution of income, not by taking from the productive and giving to the poor by subsidy, but rather by making our economic machine reflect fairness in income distribution for equal effort and by raising the productivity of those who lack knowledge or capital, or lack opportunity for their labor to be used productively.

In the CONGRESSIONAL RECORD excerpt entitled "The 1953–54 Recession, the Paradox

[1] "Inelastic demand" means that even though a larger quantity is sold, the price drop is so great that less income is received for the larger volume.

of Efficiency," you seem to think that efficiency caused the recession. You seem to be practically against increased efficiency. We can hardly agree with this thinking. We agree that as our society becomes more productive and further above the level of necessities, we can well give thought to sacrificing efficiency for some other values. For example, we may want to preserve and promote the family-sized farms, even if they should not be as efficient as large corporate farms. Similarly, we might feel that small-business people are the bulwark of democracy and the kingpin of community welfare and improvement. As such, we might want to preserve them, even if big business and chains are so efficient as to drive them out. However, we need considerable sociologic research before we decide that some forms of business organization are so good that we should sacrifice efficiency to preserve them. Big business is showing more and more recognition of the necessity of the company itself and their top executives contributing to the welfare of the community and its development educationally, esthetically, and culturally.

We are in full accord with the objective of preserving a fair basis of competition between small and big business. It is vicious and unsound to allow a big business to put out of existence a small and more efficient business if it does so by lowering its prices only in the territory of this small, efficient business. It is also unsound to allow big business to grow bigger simply because of its greater bargaining power in buying from manufacturers, but if this benefits consumers, we must allow it to continue, and small business must find some way to also buy from manufacturers at favorable prices. Many small businesses have formed buying cooperatives in order to get the same advantages of large-scale purchases from manufacturers that big chains already have. There are certain economies in large-scale purchasing that we need to preserve.

We believe that by preserving an equality of opportunity, and by preserving the right of cooperative marketing and purchasing, without unfair taxes or other burdens, that family-sized farms will meet the competition of corporation farms very well. Family-sized farms are getting larger and should even grow larger because with mechanization a family can farm more land than ever before. To try to preserve a larger number of people on farms than is needed with present technology is to divide the national farm income among more people than necessary with the result that the per capita income in agriculture would be much too low. If we tried to force consumers to pay more for food than the free market would charge, we would probably have to go in for curtailed agricultural production or for direct payments from the Treasury. All this, in order to keep more people on farms than necessary at satisfactory incomes, hardly makes sense. The fewer people any nation has in food and fiber production, the more people it has for producing television, cars, etc.

You apparently believe that we can produce more than we can consume and that our productivity will be our undoing. It is true that we can produce too much of some things, but it is obvious that most American families could spend at least $10,000 to $20,000 a year with little difficulty. Because the average annual family income in this country is around $4,000, it is clear we are not anywhere near overproduction, nor are we too efficient. It is true that if we increased our output per man 100 percent and if we produced just twice as much of everything as we now have, we would be in an overproduction mess, but if we tailored our production to what people with a $8,000 or $10,000 income would buy, we would all be living probably on a level closer to what you, Mr. Shinner, are now enjoying.

In your CONGRESSIONAL RECORD excerpt you say: "Much has been said and much lip-service has been paid to the subject of small and independent business and its value to the Nation, with all of which I am in full accord. However, as long as we cling to the theory that what we need is an ever and ever greater productivity per man-hour, more efficiency, with constantly lower prices to the consumers—to create a bigger and cheaper pie so that all may share in it—we are in reality paying lipservice to small business and fighting it at the same time. Once we get a general recognition of the fallacy of this theory, we shall then be in a position to really contribute something to the welfare of independent business—the real mortar that holds the economic bricks together."

We disagree with this statement in two respects. First of all, we are not fighting small business if we let the free market decide who is most capable of producing efficiently. Many small businesses are more efficient than big business, and it is wrong to say that we are fighting anyone who cannot keep up with the pace of competitors. Secondly, we see no right in protecting inefficiency or handicapping the efficient and thereby increase the cost of goods to consumers. We in agriculture have promoted efficiency in farming in spite of the surplus problem, because it is obvious that not only farmers, but consumers also would be much worse off if we had not encouraged research and education to increase productivity.

I could comment on many other statements made by you, but I have indicated our fundamental concerns. It seems to me, offhand at least, that you are willing to enhance small business for the sake of small business, even if it stops progress and retards living standards for millions of American families.

Sincerely yours,

LLOYD C. HALVORSON,
Economist.

Subsequently, Mr. Shinner replied to Dr. Halvorson, and I place Mr. Shinner's letter at this point in my remarks:

FEBRUARY 7, 1955.

Mr. LLOYD C. HALVORSON,
Economist, National Grange,
Washington, D. C.

DEAR MR. HALVORSON: I wish to acknowledge receipt of and thank you for your letter of January 26, wherein you comment upon my proposed solution to the farm problem.

I am highly pleased to note that you favor legislation designed to protect the family sized farm, that you favor a free and open market on farm products, and that you are opposed to paying subsidies or making outright purchases of unlimited quantities of products produced by corporate or factory-in-the-field type of agriculture.

While your letter raises many theoretical arguments which I shall answer presently, I think the crux of it lies in these sentences, regardless of the other arguments (excerpts quoted from pp. 1 and 3 of your letter):

"If we want to maximize the utility of farm products already produced, or if we want to maximize the potential utility-producing capacity of our agricultural resources, we should allow the free market to reign.

* * * * *

"When the production of a commodity has not been curtailed and the surplus is at hand, the attainment of a certain producer's income might not cost the taxpayers any more through the direct-payment route than through the nonrecourse-loan or purchase-agreement route.

* * * * *

"We do believe it is sounder for America to have her food and fiber supply produced by people who largely own or rent the land they operate than by people who are only employees with indefinite tenure. Our agricultural communities would be lacking much if they were not made up of independent owners with enough security of tenure to have community pride and to take an active part in civic affairs. We probably get a more equal distribution of income with a family-type agriculture than we would with a corporate-type agriculture seeking cheap labor."

I cannot forebear pointing out to you that these are the identical things at which my program is aimed. My program, I believe, is more certain than any other program yet proposed or tried, to accomplish exactly the results which, according to your letter, you and I are both seeking.

It is encouraging to know that you endorse and approve of the objectives which I have proposed, in spite of arguments thereafter given as to why these objectives are theoretically unattainable. Since our aims apparently are identical, I deem it proper to comment upon the objections which you have raised:

1. It is your contention (p. 3) that my program would be too difficult to administer. First of all, let me remind you that the most worthwhile objectives in life are often beset with difficulties and we must not let minor or even major difficulties deter us; as a matter of fact, I have discussed the situation with many capable students of the subject and they agree that my proposal would be less complex than the present law. It is one of the first laws of nature that remedial action of every name and nature is virtually always both difficult and unpleasant, and frequently opposed for that reason alone. That applies to our personal physical well-being, economic, political, and sociological problems; hence, we cannot and should not cast a possible solution aside because of the mere fact that it looks difficult. Certainly, it would be no more complicated than a system of (a) acreage allotments, (b) marketing quotas, (c) cross-compliance regulations, (d) loan and/or purchase, (e) storage.

Speaking quite humbly, I do not see how administration of my program could be made more complicated or difficult than the present law.

2. You raise the question of honesty in connection with reporting the amount of products that a given farmer might sell and on which he might be entitled to compensatory payments, or a subsidy if you will (p. 3). I do not recognize this as a problem. Certainly there is no more opportunity or incitement to commit fraud than there is in filing the ordinary income-tax report, and the matter of checking the amount of a given product produced by a farmer would be vastly more simple than checking the average businessman's overall income. Or for that matter, a farmer's abiding by the cross-compliance rules.

3. You express a fear that my program would result in a glut of certain products. You state: "For example, under your schedule, the farmers could all shift to producing cabbage, if that parity price were especially attractive. Your schedule of supports from 100 percent of parity for small farms down to 70 percent for large farms would continue in existence, even if we raised enough cabbage to make a stone wall all around our country 20 feet high and 10 feet wide" (p. 2). I find it hard to believe you are serious in this argument of reductio ad absurdum.

Let me remind you that, first of all, cabbage is not a basic crop, is not in Government storage, has not and presumably will not receive price support. Furthermore, any law which we enact cannot be regarded as a final solution nevermore to be amended. In case of uncontrollable gluts of any commodity the parity price would, of necessity, have to be readjusted. You, of course, are well aware of what happened in connection with support for the potato market and you are likewise familiar with the fact that the glut was not the result of the potatoes raised

by the family-sized farmer. On the contrary, the glut resulted from vast operations set up by financiers from the money centers of the country, on factory farms.

4. You are fearful of the cost of my proposed program and state: "A direct-payment program for all commodities, or just the major ones, including livestock and livestock products, would have cost the Treasury several billion dollars a year during the 1930's" (p. 2).

In this respect, let me remind you that the great depression of the thirties really started on the farm and, had farm products been given a reasonable amount of support, the depression, which it has been estimated cost the Nation some $600 billion, could have been largely avoided or at least greatly alleviated. Even several billions of expense, say $10 billion annually, would have been a rare bargain had it resulted in relieving the depression even to a minor degree. If we act in time, in emergencies, the costs are always lower than if we let the emergency grow to major proportions before acting. To make a homely analogy: it is cheaper to inoculate an entire community against polio or smallpox than wait until the disease is epidemic before acting. Furthermore, it seems to me that your argument conflicts with your statement, quoted on page 1 of this reply, that "the attainment of a certain producer's income might not cost the taxpayers any more through the direct payment route than through the nonrecourse loan or purchase agreement route." I find these two statements somewhat conflicting.

5. You recommend a stamp plan as a means of disposing of our unmanageable surpluses. Presumably, you would be willing to make such a program permanent (p. 3).

I submit, Mr. Halvorson, that such a plan is un-American in concept and I cannot help but feel that both you and I are unwilling to create and maintain a permanent class of poverty-stricken citizens which the stamp plan would surely create.

You state: "There is and always will be some stigma upon those citizens of our country who receive a direct subsidy from our Government." What is the stamp plan but that? I should also like to point out, in this respect, that under my plan farmers would get nothing unless they produce. Under your stamp plan, persons would receive a subsidy for remaining in idleness. Moreover, the stamp plan, on every marketing day, would stigmatize an entire section of our population; it would become a publicly displayed badge of pauperism. Also, I am more impressed with your statement on page 1 of your letter, "if we want to maximize the utility (use) of farm products already produced * * * we should allow the free market to reign."

My concept of our free enterprise system is that as goods and services move in trade and commerce, and this most certainly applies to all farm products, that it should be accomplished via the cash register. The Government's buying and giving away of products even in small quantities should be avoided. Our energies should be directed, rather, toward improving the economic climate in which our underprivileged people now exist.

They don't want Government stamps; they want a decent, livable income and the chance to buy in the marketplace.

6. On the subject of free markets, the United States as a leading exponent of the capitalistic system should, above all things, attempt to demonstrate by example what it advocates—yes, fights for in theory. Our European cousins look upon us aghast as we talk free enterprise, free markets, and in turn legislate these concepts right out of existence. For our own good, we ought to be consistent in these things.

7. You state on page 2: "I do not think we should discriminate against efficiency nor put a ceiling on opportunity in agriculture."

I fail to see where supporting the family-sized farm in any sense discriminates against efficiency. I regard it, instead, as exactly comparable to the minimum wage law. Limiting support to family-size farms on the basis of sales) would in nowise prevent the ambitious and efficient farmer from producing an income of $100,000 a year or even more. It would simply place him in a position where he must do it in the open market (the American way) and not at the expense of the taxpayer. I see nothing wrong with that. As a matter of fact, the family-farm support program should encourage efficiency, and expand opportunity.

As you state, there are some 800,000 farmers who have gross sales in excess of $7,500 and, accordingly, there must be, roughly, 4½ million farmers with annual incomes of less than this amount. (Actually, 45½ percent of farms in 1950 had annual gross incomes of less than $5,000.) My theory of sound Government policy is that laws should be enacted which will result in the greatest good to the greatest number, without abrogating the rights of the minority; hence, our concern is for the 4½ million, rather than for the 800,000. It is not necessary to make an extended argument that the 800,000 with large holdings and great volumes of production are well able to take care of themselves.

8. You speak of the ease with which farmers might spend an annual income of $10,000 or $20,000, or 2½ to 5 times the average income for the Nation (p. 5). I know of no one, least of all myself, who has proposed a limitation on income. I am and always have been in favor of good wages, good salaries, and a high income level as necessary to a healthy economy. But surely you cannot be serious in presuming that such an increase in income would be possible without a corresponding rise in the price structure throughout the economy; in other words, pure inflation. It is a fundamental principle of our capitalistic society that income for the average citizen is derived from the sale of his services, or the product of his labor.

Mechanics presently employed in the building trades in Chicago are earning $25 per day for 8 hours' labor. Increase their pay either 2½ or 5 times and it would not be difficult to calculate what that would do to the price of homes. What we are seeking to do is to stabilize our economy, rather than indulge in wild inflation. I feel that I can safely assume that you are not serious when you suggest the possibility of an average income of $10,000 or $20,000 per person for the entire Nation. If you are serious, how are you going to achieve it without inflation of the most serious and flagrant type?

9. You suggest that the low-income farmers need access to better and more liberal credit (p. 4) and again, I find myself in disagreement with you. I disagree because I think this ignores the real heart of the matter. My 15 years as a banker have taught me that the basis of all credit is the ability to repay. Extending credit to underprivileged farmers would simply increase their burdens. What they do need is an improved economic condition—an opportunity to market whatever products they are able to produce at a fair market price; and once they are able to demonstrate a given earning power, credit will flow to them as a matter of course. The problem is not one of increasing debts; but increasing the ability to repay debts.

You point to the title of my article, "The 1953–54 Recession: The Paradox of Efficiency," which appeared in the CONGRESSIONAL RECORD and you comment that I seem to think that efficiency caused the recession.

Mr. Halvorson, I mean just that. I believe it is very easily susceptible to proof, and I would point to the condition in your industry. Efficiency has removed some 12 million people from the farms in the last generation and you and I are both aware of the fact that through purely improved technological conditions (efficiency) the present farm population can supply the food and fiber for a population approximately double that which we have today. Through purely efficiency measures, if we should see fit to apply them, we can dispense with another 2 million families, or roughly 10 million people now living on farms. The traditional academic economist will contend that these displaced persons should find employment in the urban centers in industry, and in case they do not find such employment, that becomes a sociological problem, rather than an economic one.

It is my observation that sociological, economic, and political problems are so interrelated that they are impossible of separation. The traditional economist will further point out that industry has been able to absorb this vast array of people who were technologically displaced from the farms but the economist fails to analyze and state how this came about.

During the past 60 years, which is all well within my memory, the only real prosperity with full employment has resulted either from war or a war economy, bitter as that fact may be. During the depth of the depression, we had some 15 million people unemployed and it took a world war to give our economy sufficient momentum to restore our citizenry to a decent standard of living and a reasonably prosperous condition. The great sustaining factor in our present economy is the $40 billion presently being spent each year by the Government for national defense. No one wants war, but we cannot blink the fact that it has stimulated our economy. Reduce our defense expenditures by one-half and I believe you will agree with me that our economy would almost overnight go into a disastrous tailspin.

Again, on the subject of efficiency against waste: I cannot forebear pointing out that few, if any, thinking people will deny that we are presently living in a war prosperity and have been for the past 15 years; neither will they deny that war is a total waste—a waste, which it so happens, we have been well able, economically speaking, to afford.

I repeat, we prosper by waste (Webster defines waste as a useless or unnecessary expense). We Americans are the greatest wastrels on earth. And therein lies the secret of our high standard of living. Compare, if you will, our prodigal use of food, clothing, autos, liquor, cigarettes, cosmetics, sporting goods, money spent for travel, etc., to say nothing of the huge amount of war munitions (tanks, planes, etc.) which lie rusting out in the open fields; yes, compare these with other nations of the earth and you have the answer to our national well-being. It should now become our goal to help the 4½ million low-income farm families to improve their economic position so they, too, can afford to indulge themselves in a reasonable amount of "waste," rather than that we go about shedding crocodile tears for the 800,000 top-bracket group of which you speak. Supplying our underprivileged urban population with food stamps and advising our so-called submarginal farmers to throw in the sponge—get off the land—is in my humble judgment, the epitome of unsound economic reasoning.

On this subject of waste versus efficiency, I would conclude with the statement that every man has a right to his opinion but no man has a right to be wrong in his facts. And I believe that the facts point directly to one of the greatest problems with which we have ever been faced; namely, technological unemployment. Unemployment, from whatever cause it may result, is the basis of all depressions.

No one is suggesting that we subsidize inefficiency. Even your letter implies that many small family farmers are efficient and are capable of being more so (given the incentive). It so happens that, involved in this problem, we have a way of life for some 10 millions of American citizens. On page 4, you say: "What we need is equal opportunity—not a handicap race." I say, "Amen," and that is what I propose.

If we are seeking only efficiency and cheapness of production, why not then rub out the fences and consolidate the land into vast factory enterprises? Then General Motors, Ford, International Harvester, and like companies could take over operation and management of these vast farms. By supplying their own machinery and buying other necessities in great bulk at cheaper prices, they could greatly increase efficiency and lower costs. But I submit that more is involved than mere efficiency. On page 5, you seem to take the position that it is better to have fewer people in food and fiber production, and more people in the factories. With this also, I disagree.

Overproduction is not peculiar to farms alone. The capacity of our industry, with its present labor force, to produce vastly in excess of our consumption is too well known to require any debate. It does not require much imagination to see what would happen to the 2 million families if they were driven off the farm, into urban centers where according to the latest Government figures there are already 3.3 million unemployed.

I trust, Mr. Halvorson, that you will accept the above remarks in the spirit in which they are intended, and as I have accepted yours, as constructive criticism and as an effort to explore and resolve this, one of our most difficult national problems.

Yours very truly,

E. G. SHINNER,
Chairman, the Shinner Foundation,
Chicago, Ill.

I believe you will agree that this is a most interesting exchange of thoughts on one of the great and vital problems facing Congress. I hope that the Members will study this correspondence, for I know that they, like I, are seeking all possible light on this problem.

Personally, I regard the family farm program as exactly comparable to the minimum wage law and the benefits which unions provide for their members; it puts a floor underneath the farmer, and provides benefits only in accordance with the amount of his production up to a maximum gross product of $7,000 per year. In my opinion, this is workable and fair.

I cannot accept Dr. Halvorson's arguments. I recall that in the early 1930's economists argued against the social security law, old-age pensions, the railroad, bank, stock exchange, and utility holding company legislation. And some argued for these bills. We were told by some that we were on the way toward wrecking the economy, or that we were going Socialist. Actually, nothing like that happened. We gave our economy the firmest base it had had in 130 years of our national history; we built in economic stabilizers into our law that have been a major factor in preventing the 1949 and 1954 recessions from sliding into depressions.

We have provided stabilizers for business, wage-hour laws and union guaranties for labor, insurance for the banks, unemployment compensation for the jobless, pensions for the aged; we have yet to build a set of sound and workable economic stabilizers for the family farm.

I do not for a moment argue that our farm programs have not benefited the family farmers; they have. But the lion's share of the benefits have gone to the 484,000 factory farmers who produce more than half of our gross annual farm output, while a minor trickle has gone to the millions of farmers who produce $7,000 or less each year. The record of family farm displacement since 1935, and growth of the huge factory farms, proves that we have not done the job. I do not believe we are doing the job so long as we are permitting 75,000 family farmers to be "washed out" each year, and another 40,000 or 50,000 or more of small townspeople to be driven with them into the city labor forces.

Such a process, if carried to the only possible conclusion, means ruin. I believe it means ruin just as surely as night follows day, just as surely as an ever-increasing concentration of business into fewer and fewer gigantic corporations means ruin.

There is a point at which such concentration passes purely economic significance, and becomes socially and politically significant. I believe we have long since passed that point.

That is why I desperately hope that the President and his advisers will resolutely come to grips with this program and submit a realistic program, a program that provides for family farm supports along the line of the Shinner program, and that will not allow the rich, vast, factory farmers to enrich themselves further at Government and the taxpayers' expense.

In my own mind, I believe there is only one answer: That is to work out a realistic family farm support program with a limitation on the amount that any farmer may produce for the benefit payments. Only then will we really get at the "cancer" which Historian Toynbee described. I would further favor limiting the total payment any farmer might receive in any year to $2,000. I urge the Members to read the correspondence I have placed in the RECORD.

SYNTHETIC RUBBER PLANTS TO BE SOLD UNLESS CONGRESS ACTS QUICKLY

Mr. PATMAN. Mr. Speaker, it looks like the big rubber companies are going to get the synthetic rubber plants built by the Government at a price that will give them a 3-year payout on their investment. The price is not as important to the general welfare as the privileges and opportunities it will give the purchasers of these plants.

On June 25, 1953, the House had before it a rule providing for the consideration of a bill to permit these plants to be sold under certain terms and conditions, with Congress only given the veto power if exercised in certain ways, in which Congress is greatly handicapped, retarded and almost wholly prevented from effectively considering the matter. At that time, I made a speech in opposition to the rule, in which I stated:

POSSIBLY NEED THE FACILITIES AGAIN

Mr. PATMAN. Mr. Speaker, I am opposed to this rule and to the bill. The first reason why I am opposed to this rule and to the bill is because it is possible we will need these facilities again and we should not have them in hands where they will be out of our control. We have been embarrassed in the past by reason of the lack of production of rubber. We should not again place ourselves in a vulnerable position.

No. 2. The big rubber companies or a few of them—there are just a few—would like to have these facilities disposed of now in this tight-money, hard-money, policy. No one will be able to bid on these facilities except the big rubber companies. The committee has been rather generous in its bill in that it does not require a deposit of more than 10 percent on a bid, or more than $500,000 per bid. But, the little fellows cannot put up that kind of money.

LITTLE FELLOWS WILL SUFFER

Now, the people who will suffer under this proposal, when the big rubber companies buy these plants, are the little fellows, and under this proposal and under the present situation they cannot go any other place except to the large rubber companies. The small independent producer and fabricator of goods using rubber as a basic material will be dependent upon these large companies as a source of supply. Well, these large companies have similar fabricating facilities which they own, and naturally the large companies are not going to be very sympathetic and generous to the little fellows across the street from their own facilities in allocating rubber from their plants. This is a serious proposition. It will destroy the little rubber fabricators throughout the United States except those who will live by sufferance, because the big fellows will own them.

One word of warning I have for the Federal Reserve Board. They have caused half a dozen major and minor depressions in this country. They are very insecure. Another depression, and the Board of Governors and the Federal Reserve System are both gone. They are out, because people are tired of their going in and causing depressions at every opportunity they have. They have started now to plan a depression. They had better stop it, and they had better use some weapons and vehicles a little bit different from the ones that they are using to help a selfish few.

Mr. MCCORMACK. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Massachusetts.

Mr. MCCORMACK. I notice on page 6, paragraph (e), with relation to the payment of the purchase price, that they can take a purchase-money mortgage in an amount not to exceed 75 percent of the purchase price, and that the rate of interest is 3 percent. We are paying 3¼ percent ourselves on the last long-term bond issue.

Mr. PATMAN. That is right.

Mr. MCCORMACK. They ought to pay at least 4 percent, it would seem to me.

Mr. PATMAN. That will be of help to the little big rubber companies. The little big rubber companies are the only ones that can bid on this. Look at the testimony. Look who testified for this. The big rubber companies. They want it done, of course. Get it out in the open, and they are going to buy. When they buy, they can punish every competitor they have in the business. They can withdraw the supplies from the competitors of their subsidiaries. They cannot do it now, but they will be able to do it when they buy. As the distinguished acting minority leader just pointed out, they will have

an interest rate of 3 percent. The Government bond going rate is 3¼ percent on a 30-year term right now. Of course, that is a small matter, but it just goes to show the opportunity that is given to them. I am not impugning anybody's motives in doing it—it just happens that way. But the big companies are the only ones that can buy these facilities. Now is not the time to sell them.

CREDIT UNIONS ARE THE ANSWER FOR UNMERCIFUL LOAN SHARKS AND RUTHLESS SHOTGUN LOAN OFFICES

Mr. PATMAN. Mr. Speaker, a recent article in the New York Times—January 17, 1955—tells how household workers, tradesmen, and Government employees in Pakistan are burdened by excessively high interest rates. A Hindu launderer pictured in the Times with his family is reported to have paid over $1,200 interest on $30.58 borrowed in 1941.

It was not too many years ago that Americans faced with emergencies of one sort or another, and in need of credit to finance payment found themselves in somewhat similar circumstances.

Even today there are many individuals who are not accommodated by their local banks. They turn to the small loan and finance companies where they pay large sums of interest on their borrowings.

However, unlike the Pakistani, these people can avoid excessive borrowing costs. This has been made possible by the organization of credit unions. I insert in the RECORD the remarkable story of the credit union which appeared in the September 1954 issues of Changing Times, the Kiplinger magazine.

I also insert the article from the New York Times of January 17, 1955, entitled "Poor of Pakistan Sorely Burdened."

[From Changing Times of September 1954]

YOU CAN START A CREDIT UNION—THE PROCEDURE IS SIMPLE AND YOU WILL GET PLENTY OF HELP—THEN YOU HAVE A GOOD PLACE TO PUT MONEY AND TO BORROW FROM

By starting a credit union, a group of people solve two common problems—where to borrow money at reasonable rates and where to save it at profitable rates.

If this idea appeals to you, and you do not already belong to a credit union, you may want to get one going. But first you will want to know more about what a credit union is, how it operates, and how much work is needed to set it up.

The simplest definition of a credit union is this: An organization of people—usually people employed together—who agree to save their money together and to make loans to each other at low rates of interest.

Members of a credit union deposit money, preferably on a regular basis, in any amount from 25 cents on up, for which they receive shares in the credit union. Usually a share is worth $5. The money they deposit becomes a fund, available to all members for borrowing. The maximum rate of interest on borrowed money is 1 percent a month on the unpaid balance. In some credit unions the rate is a bit lower.

Loans are made on the approval of an elected credit committee, and no security is required on loans under $300 to $500, depending upon the operating charter of the credit union. Amounts in excess of the unsecured limit may also be borrowed on a car or some other security. Loans are granted quickly with a minimum of red tape.

The credit union will, of course, show a profit from its lending operations if everything works out O. K. After expenses are paid and a small reserve for bad debts is set up, the remaining money is returned to the shareholder members as dividends. The amounts of dividends vary, but they average 3 percent a year.

How can a credit union lend money at lower rates and pay its members higher dividends than most comparable commercial organizations? Because the credit union is a nonprofit cooperative organized among a selected group of people—which means that it pays less in taxes, in salaries, in credit investigation and collection costs, and in general overhead.

NINE MILLION MEMBERS

Because the credit union is such a simple device and is so successful in meeting the financial needs of a large number of people, credit unions are springing up all over the United States and Canada at a rate that has surprised even their most enthusiastic supporters.

At this moment there are roughly 9 million credit union members in the United States and Canada. There are some 18,000 credit unions with assets of more than $2½ billion. It is estimated that credit unions were the source of roughly 11 percent of all consumer borrowing last year.

Some of the largest credit unions with assets of millions of dollars employ a large staff of paid clerical help. Others operate with no paid help whatsoever. (Officers always serve without pay, except the treasurer, who may get a salary.) Credit union operation is fairly standardized, and experts in bookkeeping and accounting, although desirable, are not necessary to the successful operation of a small association. As few as 50 people actually can have a credit union.

IT'S EASY TO GET GOING

You will be pleasantly surprised to learn how easy it is to form a credit union. You don't need a lot of money and a battery of lawyers or accountants, and it doesn't take much time. A credit union can be organized in a month with the work of only a few people, and you can get expert help in organizing one without any charge whatsoever.

But first ask yourself which group of people would be the most logical to organize. Would it be the people you work with, the members of your union, the members of your church, or the people who live in your neighborhood? Credit unions have been established under the sponsorship of all kinds of groups. One credit union limits its membership to descendants of certain families, and another was formed by members of a poker club.

Most credit unions, however, are established by groups of employees in factories, offices, banks, schools or government. About 80 percent of credit unions are based on occupational groups, some of them under trade union auspices and some under employer auspices.

If you are a member of a group that is likely to be interested in organizing a credit union, here is a step-by step outline showing how one can be set up.

1. Your first move is to get in touch with the Credit Union National Association, Filene House, Madison 1, Wis. Ask for literature describing credit unions and for the help of an organizer. His services are free. CUNA has a staff of 19 such men, and many State credit union leagues also employ organizers. If a regular organizer isn't available, someone from an existing credit union in your area will be asked to help you get started.

2. The organizer will go directly to the employer, the minister or the union president, depending upon the group to be organized, and explain the way a credit union works and how it can help its members. He will request and will usually get the cooperation of the sponsoring organization. In most cases, the company, church or union provides small office space for the credit union. Employers sometimes sanction payroll deductions for the purchase of credit union shares.

With cooperation assured, the organizer will then ask the sponsoring organization to call together a group of 15 or 20 people from all ranks of the organization. The purpose of this meeting is to sell the credit union idea and to get the charter application signed.

3. At this charter meeting, the organizer will again explain the aims and usefulness of the credit union and will answer questions. And in order to get things going, he will then ask whether the group is really ready to go ahead and file an application for a charter.

4. Seven or more members are required to sign the application, and each of them may be asked to contribute a small amount, usually about $5, toward the charter fee. Later on, these signers of the charter application will be given shares in the credit union to reimburse them for their initial contribution.

5. With your application for charter you will also have to file a set of bylaws for the operation of the credit union. Copies of a standard set of bylaws are available from the organizer or directly from CUNA.

6. At this same charter meeting you will select a committee to nominate a slate of officers for the credit union, including a president, a vice president, a treasurer, 3 members of the credit committee and a 3-man supervisory committee.

7. With the slate of officers ready, the next step is to call an organization meeting. All members of the union, church or neighborhood or fellow workers will be informed of the meeting and asked to attend. At this meeting officers will be elected, and a general summary of credit union aims and methods will be given to all prospective members.

Immediately after this meeting an open meeting of the newly elected board of directors and officers will be held to accomplish the following jobs:

Apply for a bond for the treasurer so that he may handle the funds; select a bank in which credit-union funds shall be deposited; set a limit, if any, on the amount of shares that any one member may hold; establish the rate of interest to be charged (not more than 1 percent on the unpaid balance); authorize the expenditure of enough money to buy supplies—a set of books, membership cards, etc. (usually it takes from $60 to $150, including the charter fee, to get a credit union going); set the time and place at which deposits may be made and loan applications received; approve all applications for membership; set the time and place of the monthly meetings of the board.

After these preliminaries, the credit union is ready to begin operation.

TAKES TIME TO GROW

Typically, only a small percentage of the potential membership will join the credit union at its earliest stages. Within the first year fewer than 10 percent of the group may sign up. But as a rule, credit-union membership doubles every year for the first 5 years, and assets do, too.

The number of participants in the credit union depends largely upon the kind of group you have and their experience with cooperative activities. In a plant where there are bowling and baseball leagues or in an office where there are frequent social affairs, a credit union will usually attract a large share of the potential members. Sometimes, however, the credit union itself is the magnet that draws people together.

During the first year of operation, credit union officers and committee members should be in close contact with the organizer

or with officers of a nearby credit union. Difficulties are bound to arise, and experienced help will be a blessing.

OBSTACLES YOU MAY ENCOUNTER

Sometimes, of course, organizing a credit union turns out to be difficult. Here are some of the stumbling blocks.

Lack of leadership: The organizer and others interested in forming a credit union should be careful to pick as leaders people who are respected and who have influence among the members of the group that will form the credit union. The election should not be a popularity contest. The office of treasurer is particularly important. He or she should be a person to whom other people can bring their troubles—and a person of excellent reputation.

General or specific opposition: Occasionally the sponsoring group for the credit union will oppose the organization on principle. And in some cases, opposition comes because the credit union may interfere with an existing and profitable loan-shark racket.

Most often it is simply a lack of understanding of how a credit union works that causes friction. A good organizer can overcome most of that opposition. As a matter of fact, there are far more credit-union supporters among company presidents and union leaders than there are critics.

Poor timing: A successful credit union cannot be organized unless there is some live, current need for it and some willingness—at the crucial time—on the part of a small group of people to do the organizing job.

If your efforts are successful, you will have created an organization that is truly a help to many people. As the credit union grows, you will notice that more and more of its members develop regular habits of thrift and that fewer and fewer of them become overburdened with heavy debts at high rates of interest—in short, that the members begin to learn how to manage their money wisely.

HOW A CREDIT UNION STACKS UP FOR BORROWING AND FOR SAVING

As you can see, it is a better-than-average place to get a loan and a good place to keep your money.

If you borrow $100 and repay it in 12 monthly installments you will pay this much interest or carrying charge:

Personal loan from a bank: $4 to 12; most loans range between $6 and $8.

Life insurance policy loan: $2 to $3 if repaid monthly.

Auto loans from banks or finance companies: $3 to $6 on new cars; $5 to $18 on used cars.

Carrying charges on installment purchases: No common rate; may cost from $3 up to $25 or more.

Small-loan company: $13 to $24.

Credit union: $6.50 most common; may be a bit lower.

If you have $100 in savings you will get this much in annual dividends or interest:

Bank savings account: $1.50 to $2.50.

Savings bonds: $3 if held 10 years; interest first year about 1 percent.

Savings and loan associations: $2 to $4.

Credit union: Usually $3.

[From the New York Times of January 17, 1955]

POOR OF PAKISTAN SORELY BURDENED—SOME VICTIMS COMMIT SUICIDE AND ALMOST ALL ARE FORCED TO PAY INTEREST FOR YEARS

KARACHI, PAKISTAN, January 11.—Organized moneylenders, the bane of Pakistan's poverty-stricken millions, are driving victims to suicide.

These giant Pathans, who hail from the rugged northwest frontier province and are recognized by their heavy, steeltipped walking sticks, black-turbaned heads, and mercurial tempers, work with brutal efficiency.

Here in the capital of a Moslem state where usury is forbidden by Islamic law, they prowl day and night, striking terror in the hearts of household servants, tradesmen, and Government employees from whom they collect interest at the rate of 25 percent a month on loans of 100 rupees ($30.58) to 500 rupees ($152.95) made 10 and 15 years ago.

The Pathan has never been known to insist on repayment of principal, and a borrower's offer to repay a loan is refused with a gesture of magnanimity that discourages a second try.

Attempts to escape or to enlist the support of the law are thwarted.

INFORMAL NEGOTIATIONS

Negotiations are most informal, yet most binding. They usually begin in the dimly lighted corner of a fly-ridden tea stall, the office of the ubiquitous Pathan. A potential client is conspicuous, his worried facial expression reflecting the delayed but unavoidable decision that there is no one else to whom he can turn.

Timidly he takes an adjoining table and smiles nervously across to the usurer. Sometimes, a borrower will tell you, he wanted to turn and run. The memory of a suicide who could find no other way out of the Pathan's debt, the thought of not being able to repay the loan if he lost his job—these almost deterred him. But the need for money to pay his child's doctor bill or to buy a peddler's cart or clothes for the clerical job he finally got, these outweighed his fears.

The gambit acknowledged, the Pathan invites the victim to join his table. In the unhurried custom of the East they chat with apparent amiability for a few minutes and then, in the din of native song from a radio, get down to business.

The client needs 300 rupees ($91.74). He signs a note for 600 rupees ($183.53), a cautious procedure insisted upon by the moneylender for his own protection should the case get to court. The borrower receives 225 rupees (68.80), the 75 rupees ($22.94) withheld representing interest payment for the first month.

LEGAL ACTION DISCOURAGED

The practice of recording the loan at double the amount gives the Pathan a possibility of assurance that if the client dares bring the matter to the claims court, the magistrate would recommend settlement by payment of half the principal. There are few instances of this; the borrower knows that resort to the law usually is followed by violence against him by goondas, hired thugs who beat him between the Pathan's temporarily unsuccessful collection visits.

One loan victim, Mohan, a Hindu dhobi (launderer), was freed by the usurers last week after an association that began in December 1941. In addition to holding a receipt for the original loan of 100 rupees ($30.58) that he borrowed 13 years ago, the jubilant dhobi showed a collection of 157 receipts that represented interest payments of 25 rupees ($7.64) a month since December 1941—a total of 3,925 rupees ($1,200.30) paid for the loan of 100 rupees.

Mohan, his wife and their 4 children occupy a squalid hut, rent-free, on the grounds of a wealthy landlord in exchange for washing and ironing the clothes of his master's family of eight.

Now that he is out of debt to the loan-shark, Mohan thinks of him as a friend.

Among the hundreds who share bitter memories of the vengeful Pathan is the family of a late victim "dealt to death" according to police reports, "and eyes removed."

Apparently unable to prosecute the Pathans for flouting the religious injunction against usury, legislators in at least one province are trying to enact a civil statute that would end the moneylenders' racket. In the meantime they flourish.

CARGO PREFERENCE ACT

The SPEAKER pro tempore (Mr. ELLIOTT). Under previous order of the House, the gentleman from Washington [Mr. TOLLEFSON] is recognized for 30 minutes.

Mr. TOLLEFSON. Mr. Speaker, I have been somewhat disturbed, if not quite irked, at the efforts of some misinformed people to undermine the Cargo Preference Act which Congress approved last year. This is Public Law No. 664 of the 83d Congress, and has commonly been referred to as the 50–50 shipping legislation. It provides in effect that not less than 50 percent of Government-sponsored cargos shall be carried in American-flag ships, if such ships are available at reasonable rates. Whenever American-flag vessels are not available at reasonable rates, then foreign-flag vessels may be used.

Particularly am I disturbed at the efforts, direct or indirect, of foreign nationals to undermine that legislation. Such efforts come with ill grace from those nations to whom we have rendered considerable assistance during the past few years through our foreign-aid programs. For instance, since 1945, we have supplied Great Britain some $7 billion worth of relief. Other nations were the recipients of our largesse in varying huge amounts. Altogether, we have, since the end of World War II, dispensed about $48 billion abroad.

In 1954, Congress approved Public Law No. 480 which authorizes the gift of some $300 million of our surplus agricultural products to needy nations. It also provides for the sale of $700 million of surplus products to friendly foreign nations, with payment to be made in the soft currency of the purchasing nation. In oher words, foreign nations are enabled to obtain or buy surplus agricultural products which they otherwise could not. The United States would spend the soft currency in the nations which purchased the products. The Cargo Preference Act simply provides that 50 percent of such products shall be carried on American-flag ships.

It might be well to point out at this time how the United States is spending the soft currency it receives from surplus agricultural products. I have here a statement from the Secretary of Agriculture made to the House Committee on Agriculture on February 17. According to his statement out of $337 million worth of surplus agricultural products disposed of under Public Law 480 only 24.3 percent represents reimbursable funds for United States use.

The bulk of the soft currency spent in those countries will go for nonreimbursable United States use, and better than 50 percent of it is in the nature of foreign relief. I quote two items: The program for military equipment other than for the United States, $42 million, or 12.6 percent. Loans from multilateral trade and economic development, $128 million, or 38.1 percent. So in effect this program is in the nature of a relief program somewhere between the outright relief programs of the past and an enlargement of the trade-not-aid programs of the present.

Now, the rates on American-flag liner vessels are the same as those of foreign liner vessels. American tramp ships, which are not subsidized, charge a slightly higher rate than foreign tramp ships—less than 20 percent higher according to testimony presented to the House Merchant Marine and Fisheries Committee. But the foreign nations do not pay that cost differential—it is absorbed by the United States. Some United States citizens object to the Government absorbing this cost differential because, first, they term it an indirect subsidy; or second, it adds to the cost of the surplus disposal program and is an undue expense. I shall refer to that aspect of the matter at a later point.

Foreign nations object to the 50–50 legislation, saying that it is discriminatory. They complain to the Department of Agriculture which handles the surplus products disposal program and to the State Department with whom they constantly deal. They intimate that they will buy no surplus products if the Cargo Preference Act must be complied with. In at least one instance, representatives of a foreign nation have approached a Member of Congress and stated that products of his State will be purchased if such can be shipped on their own flag vessels. The inference is that unless they can use their own vessels they will not purchase the surpluses. And therein perhaps lies the reason for their objection to our law. They want the transportation business for their own ships, but at the same time say it is discriminatory and wrong for us to want only 50 percent of the business for our vessels.

The General Council of British Shipping in January 1955, issued a statement in which it said several things:

British shipowners have protested to the British Government against the acceptance of what is known as the 50–50 rule.

Another statement:

The results * * * are bound to undermine the ability of British shipping to continue to make its present vital contribution to our national earnings of foreign currency.

Again:

Shipowners of all major maritime countries of Europe have entered protests against the 50–50 rule, and the Norwegian Government only recently declined to purchase American coal, even for payment in Norwegian currency.

The Organization for European Economic Cooperation, an organization of European nations, according to the British shipping periodical called the Siren and Shipping, reported that an understanding had been reached between member countries to the effect that they would not take American surplus products if the transportation of them was made subject to the 50–50 rule.

Other news items indicate the desire of foreign nations to undermine and scuttle our Cargo Preference Act. The most vocal are those with merchant marines of their own which they want to help and support. According to their point of view, apparently, it is all right for them to support their own shipping, but wrong for us to support ours. I am afraid they are making their point of view felt by some people in departments of our own Government, and I suspect that these people would also like to scuttle our 50–50 law. Recent hearings before the House Committee on Merchant Marine and Fisheries convinced me that such was the case. The committee's report on the hearings directed some criticism at Government departments, and recommended, among other things, that the State Department should maintain the national policy of the United States as reflected in the Cargo Preference Act in our relations with foreign nations.

This act was designed to help bolster our faltering merchant marine by supplying some cargoes for our ships, subsidized or not. Ships cannot operate without cargoes. Our United States merchant marine is truly our fourth arm of defense and is just as important to our national security as our other arms of defense. Military spokesmen recognize the importance of our merchant ships and have not hesitated to say so on many occasions. We have been able to conduct wars on foreign soil only because we have had ships to transport our fighting forces and war materiel to distant lands. Our allies have never been able to supply ships for this purpose. In World War II, for instance, we supplied our allies with eight times as many ships as they supplied to us. We furnished them with about 5½ million tons of ships whereas they furnished us about 700,000 tons.

Congress has for many years recognized the worth and need of merchant ships, and has through various acts declared a policy of maintaining a merchant marine in the interests of national defense. This policy has necessitated the payment of subsidies. However, the history of that policy has proved not only its worth but also the insignificant cost of the subsidies when compared to other defense expenditures. For instance, the Navy has this year requested $1.3 billion for combat vessels. It has requested similarly huge sums in other years. One might properly inquire as to the effectiveness of combat vessels without supply lines; or, for that matter, of the effectiveness of any military machine without supply lines. When we fight elsewhere than on United States soil, those supply lines are merchant-type vessels.

Congress annually appropriates billions of dollars for strictly military purposes without much question or debate. About the only question which arises is that which asks, "Are we appropriating enough?" And yet when we are not fighting a war our whole military machine valued at countless billions of dollars is more or less on a standby basis. People, both in and out of Congress, accept such a situation as necessary even though the cost is terrific. But some of them cannot understand the necessity of maintaining on a similar standby basis at least a nucleus American merchant marine. They complain of the cost to the Government, even though that cost is insignificant in comparison with other military costs.

I can understand the attitude of our agriculture friends in this country with respect to our whole agriculture program, and also with respect to our surplus agriculture disposal projects. Under Public Law 480 of the 83d Congress, it was proposed to dispose of $1 billion surplus products abroad over a 3-year period. Seven hundred million dollars worth of products is to be sold for soft currency. These agriculture friends have been led to believe that it will cost our Government $25 million per year more—or $75 million over the 3-year period—to transport those products by American flagships. I hasten to assure them that such is not the case. The most that the use of American flag vessels could add to transportation costs over the 3-year period is $14 million, using the most liberal estimates. This figure would be reduced by the extent to which United States liner services were used. A witness for the Department of Agriculture so admitted in testimony before the House Committee on Merchant Marine and Fisheries. It is a small sum, indeed, to help maintain our merchant fleet.

To offset this additional cost I need only call attention to the fact that by using United States flag vessels to carry only 50 percent of these surplus products cargoes, the Government will collect a greater amount back in taxes. These taxes would be lost to Uncle Sam if all the cargoes were carried in foreign flag vessels. I need not call attention, I am sure, to the additional benefits to our economy which would accrue through seamen's wages, ship supplies, and ship repairs for United States flag vessels.

As I indicated earlier, the thing that disturbs me most is the effort on the part of foreign nationals to scuttle our Cargo Preference Act. We have enough difficulty convincing our own people of the necessity of maintaining an American merchant marine without having our foreign friends add to our problems. I respect their desire to maintain their own fleets. Let them respect our desire to maintain ours. They needed our ships desperately on a couple of occasions. They might need them again.

Mr. BONNER. Mr. Speaker, will the gentleman yield?

Mr. TOLLEFSON. I yield to the gentleman from North Carolina.

Mr. BONNER. Mr. Speaker, I take this opportunity to compliment the gentleman on the splendid address he has given the House with reference to our American merchant marine. It might do well for industry, the farmer, and other segments of our national economy to pay some attention to the necessity of our American merchant marine, for if the foreign nations who are now so opposed to this 50–50 program have their way and were to drive our fleet from the high seas, I do no know what would become of our export business. They would so arrange their sailings as not to be beneficial to the American exporter but would so operate their flagships entering our ports to best serve their commerce. It has come with poor grace, Mr. Speaker, from one of the great nations of the world, the recipient of untold benefits from this Government, the recipient of our generosity. They have received benefits from us, and we have responded to their call when

their national life was at stake. They are the ones, sir, today who are bringing the greatest pressure against this 50–50 program, and it is with poor grace, in my opinion, that they take the position they do and stoop to the practices they are so bold in. I have always been one of those who have supported our foreign-aid program and have been willing and anxious to help our allies, but I cannot understand what is happening; whether those who have received from us the great assistance, the great aid that we have given, have no recollection of what has taken place in the past and what may take place in the future. I hope the people of this Nation will listen to the words of wisdom that have been spoken here by the distinguished gentleman from Washington [Mr. TOLLEFSON] and give aid and assistance to the perpetuation and the maintenance of the American merchant marine. The 50–50 maritime program is very similar to the crop-support program, so enjoyed by our farmers.

Mr. TOLLEFSON. I thank the gentleman from North Carolina [Mr. BONNER] for that contribution. The gentleman is the chairman of our House Committee on Merchant Marine and Fisheries. He has served on that committee for many years. No one in the House knows better than he the value and importance of the American merchant marine. No one in the House has contributed more to the welfare of the American merchant marine and thus to American national defense than our present chairman, the gentleman from North Carolina [Mr. BONNER].

Mr. PELLY. Mr. Speaker, will the gentleman yield?

Mr. TOLLEFSON. I yield to my colleague from Washington.

Mr. PELLY. Mr. Speaker, I, too, would like to express my appreciation to the gentleman from Washington [Mr. TOLLEFSON] of his very fine statement. I think it has added a great deal to the understanding of the Members of this body of the importance of the merchant marine to our Nation. I do not know any one in the last year or so, since I have been in Congress, who has done more to preserve our merchant marine than my colleague from Washington. I am very proud to be associated with him in this interest.

I should like to ask the gentleman one question. That has to do with statements he made regarding the cost to the American taxpayer of using our American liners. Did the gentleman in his figures give credit to the fact that our experience has been that we recapture from the subsidized lines considerable in the way of profits during certain years?

Mr. TOLLEFSON. First, let me thank the gentleman for his kind comments. Coming from a gentleman who has had a great interest in the welfare of our American merchant marine, I appreciate that very much.

I did not say anything about recapture as far as our subsidized lines are concerned. I devoted most of my discussion to this program as it was applied to the American tramp ships. The tramp ships are those which do not operate on schedule. They are not subsidized. They are the only ones that charge more than the foreign-flag ships.

When we talk about liner service, we are talking about a regularly scheduled service. The rates on foreign-flag liner ships and American-flag liner ships are exactly the same. When we use our United States liner-flag vessels and they get additional business, that puts them in what we call a recapture or possible recapture bracket as far as the Government is concerned. They are subsidized lines. If they earn a profit in excess of 10 percent of their capital necessarily employed, then 50 percent of that profit comes back to Uncle Sam. There have been many years when their subsidy program did not cost Uncle Sam very much, if anything, because of the recapture provision. As a matter of fact, during the war years there were no subsidies, because there was so much business there was not any need for them. I am glad the gentleman brought that fact out, because it is important.

Mr. PELLY. The gentleman mentioned that we recover a great deal in the way of income taxes, and the recapture of profits would be in addition, would they not?

Mr. TOLLEFSON. That is right; the recapture profits would be in addition to that. The CONGRESSIONAL RECORD of last year carries a study of the returns to Uncle Sam by way of income tax from shipping lines which carried 50 percent of our relief cargoes. As I have already indicated, although over the period of 6 or 7 years it cost the Government, it is said, about $125 million more to use American-flag ships than foreign-flag ships, yet in the process Uncle Sam collected over $160 million. So again I say that we operated on that basis at a profit.

I have not said as much as could be said about the benefits to our economy by keeping our sailors employed, our shoreside operations going, keeping our ship-repair yards employed, all of which add to the welfare of our general economy.

Mr. PELLY. If the gentleman would yield further to me, am I correct in understanding from what the gentleman has said that if it were not for this 50–50 preference today, our merchant marine would be practically off the seas?

Mr. TOLLEFSON. That would be true, as far as the tramp vessels are concerned. I think the gentleman is absolutely correct, so far as these ships are concerned. If they were not permitted to participate in the carriage of shipments under this surplus agricultural-production program, practically all of our tramp ships today would have to be laid up, in my opinion.

Mr. PELLY. In the event, then, of an emergency, if we had trouble over in Formosa, we would be hardput to supply the needs of our armed services?

Mr. TOLLEFSON. We would not have the same number of ships available for immediate use. Those tramp ships undoubtedly would be put up in laidup status, and it would take some time to get them out. I think it is absolutely imperative, and all the military spokesmen feel the same way, that we have a nucleus number of ships ready for immediate use in the event of an emergency, and that we seek in every way to avoid the mistakes of World War I and World War II, when we were caught short of ships to such an extent that there are those in military circles who say we almost lost the war.

Mr. PELLY. May I ask the gentleman if it is not so that for military purposes it has been testified by the Bureau of Ships that we actually do not have enough ships at the present time in layup and in active service to take care of our military needs?

Mr. TOLLEFSON. Spokesmen for the military feel that we are deficient a certain number of ships in addition to ships in our laidup fleet and in addition to the active American merchant marine. We are still deficient several hundred of certain types of vessels. We are at the same time concerned about the bloc of obsolete ships now in the laidup fleet, most of which are the old Liberty-type vessel built during World War II. They are at least 10 years old, or possibly older. They will be completely obsolescent within another 10 years. The military are concerned about that fact. What with the Russians having seven times as many submarines today as the Germans had at the outbreak of World War II, submarines of greater speed and greater range, the bulk of the ships in our laid-up fleet would fall easy prey to those submarines in the event of an emergency.

Mr. PELLY. I do think the gentleman has made a very timely and important statement, and I know that the Members of the House have been greatly interested.

Mr. TOLLEFSON. I thank the gentleman.

PROCUREMENT OF MILITARY DOCTORS AND DENTISTS

Mr. BENNETT of Florida. Mr. Speaker, I ask unanimous consent to address the House for 4 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. BENNETT of Florida. Mr. Speaker, I am today introducing a bill to facilitate procurement of military doctors and dentists by providing scholarships and grants for medical and dental students. This bill was recommended by the Department of Defense in an executive communication over the signature of Army Secretary Robert T. Stevens dated February 23, 1955.

One of the most serious health problems in America today is the doctor shortage. We simply must recruit more doctors if we are to improve medical services for service personnel. As helpful as the proposed military pay increase would be, it is not the complete answer to service morale problems. It needs to be supplemented by improved medical and other fringe benefits. All plans for improved medical care in the services depend upon an adequate number of military doctors and dentists. This bill would help to break this bottleneck at a remarkably low cost of only $2,542,000 for its first fiscal year.

The bill would not only help service personnel. It would also help meet the medical needs of our civilian population. More doctors and dentists would be left at home to minister to civilian health needs, as fewer doctor draft calls would be necessary. Some of the scholarship recipients would eventually go into civilian practice, thus further helping to relieve the civilian doctor shortage.

In his executive communication, Secretary Stevens points out that there is a shortage of 2,300 regular medical officers in the 3 military departments, and that current methods of procuring career medical officers are inadequate to stop the growing deficit of career personnel of this type. He estimates that these scholarships will provide a maximum of 300 new doctors and 126 new dentists at the end of the second year of the operation of the plan.

One of the appealing features of this proposal to me, Mr. Speaker, is that it provides a military expenditure which is bound to be a sound investment for America's future, whether or not we eventually obtain the peace we are all so earnestly seeking. We hope the day will come when we can safely scrap our armaments. If that day comes, we would not lose the value of the doctors educated as the result of this bill's modest expenditures. We could look forward to many more years of our civilian populations benefitting from their training. Moreover, this is a military expenditure which is not subject to obsolescence. Today's munitions are rapidly out-dated, but today's new doctor can expect 40 or more years of significant service to our people, in peace or in the wars which we hope will never come.

Mr. TUMULTY. Mr. Speaker, will the gentleman yield?

Mr. BENNETT of Florida. I yield.

Mr. TUMULTY. Would the gentleman be kind enough to inform us how these scholarships may be obtained, and whether or not the scholarships will be paid by Federal money through the medical schools. In my own district, in Jersey City, we are for the first time starting a medical school combined with a private university. We are very anxious to get the scholarships and to get the school going. Could the gentleman explain whether or not your program envisages Federal help to the medical schools themselves?

Mr. BENNETT of Florida. In order to conserve time, I will say that it will be allowed on a competitive basis. Very definitely it will help the medical schools because it will be on a scholarship basis for the individual and the scholarships will be apportioned out among the schools so there will be a chance for helping the various schools in that way.

Mr. TUMULTY. I thank the gentleman. I think his plan is most commendable.

Mr. BENNETT of Florida. I thank the gentleman very much.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks was granted to:

Mr. PRIEST in connection with a bill he is introducing today that will form the basis for a review of our civil air policy.

Mr. DOYLE and to include appropriate material.

Mr. HOFFMAN of Illinois (at the request of Mr. MCVEY).

Mr. BALDWIN and to include a bulletin.

Mr. FJARE and to include a speech by Mr. Ancher Nelson, notwithstanding the fact it exceeds the limit and is estimated by the Public Printer to cost $200.

Mr. HOSMER and to include extraneous matter.

Mr. MCCARTHY.

Mr. THOMPSON of New Jersey (at the request of Mr. MCCORMACK) and to include extraneous matter.

Mr. KLEIN (at the request of Mr. MCCORMACK).

Mr. ZABLOCKI (at the request of Mr. MCCORMACK).

Mr. CELLER.

Mr. HÉBERT (at the request of Mr. CELLER) and to include extraneous matter.

Mr. ROGERS of Texas.

Mr. BURDICK in three instances.

Mr. TUMULTY.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mrs. ROGERS of Massachusetts (at the request of Mr. ARENDS), on account of illness in the family.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 752. An act to amend section 102 (a) of the Agricultural Trade Development and Assistance Act of 1954, so as to eliminate the requirement that privately owned stocks exported thereunder be replaced from Commodity Credit Corporation stocks; to the Committee on Agriculture.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on March 1, 1955, present to the President, for his approval, a bill of the House on the following title:

H. R. 3828. An act to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes.

ADJOURNMENT

Mr. BOWLER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 37 minutes p. m.) the House adjourned until tomorrow, Tuesday, March 8, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

500. A communication from the President of the United States, transmitting a draft of a proposed provision pertaining to the fiscal year 1955 for the Department of Agriculture (H. Doc. No. 102); to the Committee on Appropriations and ordered to be printed.

501. A communication from the President of the United States, transmitting a supplemental appropriation for the fiscal year 1955 in the amount of $10,000 for the John Marshall Bicentennial Celebration Commission (H. Doc. No. 103); to the Committee on Appropriations and ordered to be printed.

502. A communication from the President of the United States, transmitting a proposed supplemental appropriation to pay claims for damages, audited claims, and judgments rendered against the United States, as provided by various laws, in the amount of $6,269,842, together with such amounts as may be necessary to pay indefinite interest and costs and to cover increases in rates of exchange as may be necessary to pay claims in foreign currency (H. Doc. No. 104); to the Committee on Appropriations and ordered to be printed.

503. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "a bill to amend the act of April 6, 1949, to extend the period for emergency assistance to farmers and stockmen"; to the Committee on Agriculture.

504. A letter from the Acting Secretary of Agriculture, transmitting a draft of proposed legislation entitled "a bill to promote an agricultural development program under title III of the Bankhead-Jones Farm Tenant Act, and for other purposes"; to the Committee on Agriculture.

505. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to define service as a member of the Women's Army Auxiliary Corps as active military service under certain conditions"; to the Committee on Armed Services.

506. A letter from the Assistant Secretary of the Army, transmitting a report on the Department of the Army research and development contracts for $50,000 or more which were awarded during the period from July 1, 1954, to December 31, 1954, pursuant to section 4 of Public Law 557, 83d Congress; to the Committee on Armed Services.

507. A letter from the Administrator, Federal Civil Defense Administration, transmitting the quarterly report of property acquisitions for the quarter ending December 31, 1954, pursuant to subsection 201 (h) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

508. A letter from the Acting Secretary of State, transmitting a draft of proposed legislation entitled "A bill to authorize the Secretary of State to evaluate and to waive collection of certain financial assistance loans, and for other purposes"; to the Committee on Foreign Affairs.

509. A letter from the Assistant Comptroller General of the United States, transmitting the report of the General Accounting Office on the operation of the national school-lunch program by the Agricultural Marketing Service, Department of Agriculture, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act, 1950 (31 U. S. C. 67); to the Committee on Government Operations.

510. A letter from the Assistant Comptroller General of the United States, transmitting the General Accounting Office report on the audit of the Bureau of Narcotics, Treasury Department, for the fiscal year ended June 30, 1954, pursuant to the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67); to the Committee on Government Operations.

511. A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting the annual report of the Department of the Air Force covering the disposal of Air Force excess personal property located in areas outside the continental United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, for the calendar year 1954, pursuant to section 404 (d), title IV, 1949 (Public Law

152, 81st Cong.); to the Committee on Government Operations.

512. A letter from the Archivist of the United States, transmitting a request for authority to dispose of records, transmitted by the Selective Service System, being of certain importance relative to selective service World War II records; to the Committee on House Administration.

513. A letter from the Chairman, Federal Communications Commission, transmitting a draft of proposed legislation entitled "A bill to amend sections 212, 219 (a), 221 (a), and 410 (a) of the Communications Act of 1934, as amended"; to the Committee on Interstate and Foreign Commerce.

514. A letter from the Assistant Secretary of the Interior, transmitting a proposed concession permit with Mrs. Elsie F. Campbell which, when executed by the regional director, Region No. 3, National Park Service, will authorize Mrs. Campbell to provide accommodations, facilities, and services for the public within Timpanogos Cave National Monument, Utah, during a 5-year period beginning January 1, 1955, pursuant to the act of July 31, 1953 (67 Stat. 271); to the Committee on Interior and Insular Affairs.

515. A letter from the Chief Commissioner, Indian Claims Commission, transmitting a report showing that proceedings have been concluded with respect to the following claim: *Felix McCauley, a member of the Kaw Tribe of Indians, on the relation of all members of the Kaw Tribe of Indians, plaintiff, v. The United States of America, defendant* (Docket Nos. 33, 34, and 35), pursuant to section 21 of the Indian Claims Commission Act of August 13, 1946 (60 Stat. 1055; 25 U. S. C. 70); to the Committee on Interior and Insular Affairs.

516. A letter from the Attorney General, transmitting a draft of proposed legislation entitled, "A bill to amend title 18, United States Code, chapter 79, to add a new section, 1623, to extend the law relating to perjury to the willful giving of contradictory statements under oath"; to the Committee on the Judiciary.

517. A letter from the Postmaster General, transmitting a draft of proposed legislation entitled "A bill for the relief of Stanley Rydzon and Alexander F. Anderson"; to the Committee on the Judiciary.

518. A letter from the Secretary, Federal Prison Industries, Inc., Department of Justice, transmitting the annual report of the directors of Federal Prison Industries, Inc., for the fiscal year 1954, pursuant to the act approved June 23, 1934, (18 U. S. C. 4127); to the Committee on the Judiciary.

519. A letter from the Assistant Secretary of the Interior, transmitting a report detailing the amounts of all moneys received and expended in connection with the administration of the Outer Continental Shelf Lands Act, pursuant to section 15 of the Outer Continental Shelf Lands Act of August 7, 1953 (67 Stat. 470; U. S. C. sec. 1343); to the Committee on the Judiciary.

520. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

521. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 4 of the Displaced Persons Act of 1948, as amended; to the Committee on the Judiciary.

522. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to Public Law 863, 80th Congress, amending subsection (c) of section 19 of the Immigration Act of February 5, 1917, as amended (8 U. S. C. 155 (c)); to the Committee on the Judiciary.

523. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill to authorize the furnishing of subsistence and quarters without charge to employees of the Corps of Engineers engaged in floating plant operations"; to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 2126. A bill to amend the act of July 3, 1952, relating to research in the development and utilization of saline waters; without amendment (Rept. No. 89). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MURRAY of Tennessee:

H. R. 4644. A bill to increase the rates of basic salary of postmasters, officers, supervisors, and employees in the postal field service, to eliminate certain salary inequities, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BENNETT of Florida:

H. R. 4645. A bill to facilitate the procurement of doctors of medicine and doctors of dentistry for the Armed Forces by providing grants and scholarships for education in the medical and dental professions, and for other purposes; to the Committee on Armed Services.

By Mr. BONNER:

H. R. 4646. A bill to amend section 4421 of the Revised Statutes, in order to remove the requirement as to verifying under oath certain certificates of inspection, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. THOMPSON of Texas:

H. R. 4647. A bill to amend the rice marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture.

By Mr. PRIEST:

H. R. 4648. A bill to amend the Civil Aeronautics Act of 1938, as amended, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BONNER:

H. R. 4649. A bill to amend the Migratory Bird Hunting Stamp Act of March 16, 1934 (48 Stat. 451; 16 U. S. C. 718d), as amended; to the Committee on Merchant Marine and Fisheries.

H. R. 4650. A bill to amend the Canal Zone Code by the addition of provisions authorizing regulation of the sale and use of fireworks in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

H. R. 4651. A bill to authorize biennial inspection of the hulls and boilers of cargo vessels, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H. R. 4652. A bill to authorize the Secretary of the Treasury to transfer certain property to the Panama Canal Company, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H. R. 4653. A bill to amend section 4482 of the Revised Statutes, as amended (46 U. S. C. 475), relating to life preservers for river steamers; to the Committee on Merchant Marine and Fisheries.

By Mr. BRAY:

H. R. 4654. A bill to provide that prices charged for barber services at certain Army and Air Force installations shall not be less than 80 percent of the prices charged for barber services in the nearby civilian trade area, and for other purposes; to the Committee on Armed Services.

By Mr. BURDICK:

H. R. 4655. A bill to authorize the expansion of post-office facilities at Williston, N. Dak.; to the Committee on Public Works.

By Mr. CARLYLE:

H. R. 4656. A bill relating to the Lumbee Indians of North Carolina; to the Committee on Interior and Insular Affairs.

H. R. 4657. A bill to amend section 403 (b) of the Civil Aeronautics Act of 1938 so as to permit air carriers and foreign air carriers to grant free or reduced-rate transportation to ministers of religion; to the Committee on Intestate and Foreign Commerce.

By Mr. DAVIS of Georgia:

H. R. 4658. A bill to amend section 602 of the National Service Life Insurance Act of 1940 to provide an optional method of settlement of certain contracts of insurance which matured prior to September 30, 1944; to the Committee on Veterans' Affairs.

H. R. 4659. A bill to amend section 16 of the act entitled "An act to adjust the salaries of postmasters, supervisors, and employees in the field service of the Post Office Department," approved October 24, 1951 (65 Stat. 632; 39 U. S. C. 876c); to the Committee on Post Office and Civil Service.

By Mr. DAWSON of Illinois (by request):

H. R. 4660. A bill to amend further the Federal Property and Administrative Services Act of 1949, as amended, to authorize the disposal of surplus property for civil defense purposes; to the Committee on Government Operations.

By Mr. EBERHARTER:

H. R. 4661. A bill to provide that all United States currency shall bear the inscription "In God We Trust"; to the Committee on Banking and Currency.

By Mr. ELLSWORTH:

H. R. 4662. A bill to reduce the cost to the United States for the development of flood control, navigation, and irrigation in the Willamette River Basin, Oreg., by providing for the construction, operation, and maintenance of power facilities and appurtenances at the Cougar Dam and Reservoir on the South Fork of the McKenzie River, Oreg., and the construction, operation, and maintenance of power facilities and appurtenances at the Green Peter Dam and Reservoir and construction, operation, and maintenance of the White Bridge Dam and Reregulating Reservoir (including power generating facilities and appurtenances) on the Middle Santiam River, Oreg., to be done with funds advanced by licensees; said facilities, to the extent of local participation therein to be subject to the licensing provisions of the Federal Power Act; to the Committee on Public Works.

By Mr. ENGLE:

H. R. 4663. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Trinity River Division, Central Valley project, California, under Federal reclamation laws; to the Committee on Interior and Insular Affairs.

By Mr. ENGLE (by request):

H. R. 4664. A bill to authorize the Secretary of the Interior to acquire certain rights-of-way and timber access roads; to the Committee on Interior and Insular Affairs.

By Mr. FINO:

H. R. 4665. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, to provide that employees with at least 30 years of service may retire with full

annuities at 55 years of age; to the Committee on Post Office and Civil Service.

By Mr. FJARE:

H. R. 4666. A bill authorizing the restoration to tribal ownership of certain lands upon the Crow Indian Reservation, Mont., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FOGARTY:

H. R. 4667. A bill to authorize a 5-year program of grants for construction of medical and dental educational and research facilities; to the Committee on Interstate and Foreign Commerce.

By Mr. FORAND:

H. R. 4668. A bill to amend section 4021 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mrs. GREEN of Oregon:

H. R. 4669. A bill to provide for assistance to and cooperation with States in strengthening and improving State and local programs for the control of juvenile delinquency; to the Committee on Education and Labor.

By Mr. GWINN:

H. R. 4670. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer may deduct amounts paid to acquire, improve, or repair a home, to the extent that such amounts do not exceed 5 percent of his adjusted gross income for the taxable year; to the Committee on Ways and Means.

By Mr. HARRISON of Virginia:

H. R. 4671. A bill to amend certain provisions of the Tariff Act of 1930 relating to import duties on wool; to the Committee on Ways and Means.

By Mr. HÉBERT:

H. R. 4672. A bill to increase the annuities of certain retired civilian members of the teaching staffs of the United States Naval Academy and the United States Naval Postgraduate School; to the Committee on Armed Services.

By Mr. HILLINGS:

H. R. 4673. A bill to amend the Japanese-American Evacuation Claims Act of 1948, as amended, to expedite the final determination of the claims, and for other purposes; to the Committee on the Judiciary.

By Mr. HINSHAW:

H. R. 4674. A bill to amend Veterans Regulation No. 9 (a), as amended, so as to provide for the payment of an additional amount to cover the cost of a burial lot in connection with the funeral and burial of deceased veterans; to the Committee on Veterans' Affairs.

H. R. 4675. A bill to amend the Natural Gas Act, as amended; to the Committee on Interstate and Foreign Commerce.

H. R. 4676. A bill to provide for a national cemetery in the vicinity of Los Angeles in the State of California; to the Committee on Interior and Insular Affairs.

H. R. 4677. A bill to amend the Civil Aeronautics Act of 1938, as amended, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. IKARD:

H. R. 4678. A bill to require the Secretary of the Army under certain circumstances to offer land in reservoir areas for sale to the former owners thereof; to the Committee on Public Works.

By Mr. JOHANSEN:

H. R. 4679. A bill to retrocede to the State of Michigan concurrent jurisdiction over that portion of former United States Highway No. 12 (Dickman Highway) traversing Fort Custer, Mich.; to the Committee on Armed Services.

By Mr. JOHNSON of California:

H. R. 4680. A bill affirming that title to a certain tract of land in California vested in the State of California on January 21, 1897; to the Committee on Interior and Insular Affairs.

By Mr. KELLEY of Pennsylvania:

H. R. 4681. A bill to amend the National Labor Relations Act in order to permit supervisors to be considered as employees under the provisions of such act, and for other purposes; to the Committee on Education and Labor.

By Mr. McDONOUGH:

H. R. 4682. A bill to authorize the General Services Administrator to construct a new Federal office building at Los Angeles, Calif., on land now owned or hereafter acquired by the United States, and for other purposes; to the Committee on Public Works.

H. R. 4683. A bill to amend section 101 of the River and Harbor Act of 1954, approved September 3, 1954 (ch. 1264, Public Law No. 780, 83d Cong.), to extend the time for work done by local interests on dredging project at Los Angeles and Long Beach Harbors, Calif., from July 1, 1953, to November 7, 1953, and authorizing the Secretary of the Army to make reimbursement therefor; to the Committee on Public Works.

H. R. 4684. A bill to increase the monthly rates of pension payable to widows and former widows of deceased veterans of the Spanish-American War, including the Boxer Rebellion and the Philippine Insurrection; to the Committee on Veterans' Affairs.

H. R. 4685. A bill to provide for the purchase of a site for a new Federal office building at Los Angeles, Calif.; to the Committee on Public Works.

By Mr. METCALF:

H. R. 4686. A bill to amend the Rural Electrification Act of 1936 so as to provide greater flexibility in making rural electrification loans, by eliminating the requirement that half of the funds for such loans be allotted among the States, and removing the limit on the amount of unallotted funds which may be loaned in any State or in the Territories; to the Committee on Agriculture.

By Mr. MORRISON:

H. R. 4687. A bill to authorize the Administrator of General Services to dispose of certain real property in the District of Columbia; to the Committee on Public Works.

By Mr. MURRAY of Tennessee:

H. R. 4688. A bill to increase the rates of compensation of certain officers and employees of the Federal Government; to the Committee on Post Office and Civil Service.

By Mr. NELSON:

H. R. 4689. A bill adopting and authorizing the improvement of Rockland Harbor, Maine; to the Committee on Public Works.

By Mrs. PFOST:

H. R. 4690. A bill for the relief of the city of Priest River, Idaho; to the Committee on the Judiciary.

By Mr. PRIEST (by request):

H. R. 4691. A bill to amend the act entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," approved March 4, 1907; to the Committee on Interstate and Foreign Commerce.

By Mr. RADWAN:

H. R. 4692. A bill to amend title II of the Social Security Act to provide that old-age and other monthly insurance benefits shall be payable at age 62 in lieu of at age 65, and for other purposes; to the Committee on Ways and Means.

H. R. 4693. A bill to amend the Social Security Act to provide that in the case of women the term "retirement age" shall mean age 60; to the Committee on Ways and Means.

By Mr. REED of New York:

H. R. 4694. A bill to extend the Renegotiation Act of 1951 for 2 years; to the Committee on Ways and Means.

By Mr. SHORT:

H. R. 4695. A bill to authorize the Secretary of the Army to make a monetary allowance in lieu of providing a headstone or marker for the unmarked grave of a soldier or a member or former member of the Armed Forces; to the Committee on Armed Services.

By Mr. SIKES:

H. R. 4696. A bill to amend title I of the Social Security Act to provide that the cost of certain age searches, made by the Bureau of the Census to aid in determining the eligibility of applicants for old-age assistance under approved State plans, shall be paid from funds generally available for payments to States under such title; to the Committee on Ways and Means.

By Mr. SMITH of Virginia:

H. R. 4697. A bill to amend the Alcoholic Beverage Control Act of the District of Columbia of 1934, as amended; to the Committee on the District of Columbia.

By Mr. THOMPSON of New Jersey:

H. R. 4698. A bill to establish a program of grants to States for the development of fine arts programs and projects, and for other purposes; to the Committee on Education and Labor.

By Mr. UTT:

H. R. 4699. A bill to amend the act entitled "An act authorizing Federal participation in the cost of protecting the shores of publicly owned property," approved August 13, 1946; to the Committee on Public Works.

H. R. 4700. A bill to provide for extension of terms of patents where the use, exploitation, or promotion thereof was prevented, impaired, or delayed by causes due to war, national emergency, or other causes; to the Committee on the Judiciary.

By Mr. WAINWRIGHT:

H. R. 4701. A bill to amend the act entitled "An act authorizing Federal participation in the cost of protecting the shores of publicly owned property," approved August 13, 1946; to the Committee on Public Works.

By Mr. WEAVER:

H. R. 4702. A bill to authorize modification of the flood-control project for Missouri River Agricultural Levee Unit 513–512–R, Richardson County, Nebr.; to the Committee on Public Works.

By Mr. WILLIAMS of Mississippi:

H. R. 4703. A bill to amend the Interstate Commerce Act, as amended, with respect to the issuance of certificates of public convenience and necessity, and relating to railway property; to the Committee on Interstate and Foreign Commerce.

By Mr. WINSTEAD:

H. R. 4704. A bill to provide for the examination preliminary to promotion of officers of the naval service; to the Committee on Armed Services.

By Mr. ZABLOCKI:

H. R. 4705. A bill creating a Federal commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents and a music, drama, fine arts, and mass communications center; to the Committee on the District of Columbia.

By Mr. GWINN:

H. J. Res. 246. Joint resolution proposing an amendment to the Constitution of the United States relative to prohibiting the United States Government from engaging in business in competition with its citizens and limiting debts and expenditures; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mrs. CHURCH: Memorial of the State of Illinois, 69th General Assembly, senate resolution No. 19, resolving that industry be encouraged to take immediate steps to effectuate the dispersal of its facilities in the State of Illinois and urging that similar steps be initiated at the national level; to the Joint Committee on Atomic Energy.

By Mr. WICKERSHAM: Concurrent resolution by the Senate of the 25th Legislature of the State of Oklahoma, the House of Representatives concurring therein, memorializing the Congress of the United States to act

promptly and favorably upon the Washita Basin (Okla.) project report; to the Committee on Interior and Insular Affairs.

By the SPEAKER: Memorial of the Legislature of the State of Arizona, memorializing the President and the Congress of the United States relative to requesting the establishment of a national cemetery in Arizona; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States relative to requesting an increase in acreage allotments for Montana's premium high protein milling wheat; to the Committee on Agriculture.

Also, memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States relative to requesting the introduction and enactment into law of the necessary and proper legislation authorizing that sufficient appropriations be provided the Bureau of Reclamation for the immediate construction of Yellowtail Dam located on the Big Horn River in Big Horn County in southeastern Montana; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States relative to requesting the introduction and early enactment into law of the necessary and proper legislation authorizing sufficient appropriations be provided the Corps of Army Engineers for early construction of the Libby Dam located on the Kootenai River in Lincoln County in northwestern Montana; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States relative to requesting a reallocation and increased strategic mileage under the Federal Aid Highway Act of 1954 to add United States Highway No. 2 to the interstate system in accordance with the needs existing in 1954; to the Committee on Public Works.

Also, memorial of the Legislature of the State of Nevada, memorializing the President and the Congress of the United States to give attention to the development of Lehman Caves National Monument and to take such action as is deemed necessary to bring this national monument to the standard of other national monuments; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States relative to urging that sufficient funds be appropriated to construct a proposed road between Unalakleet and Kaltag, Alaska, in the construction year of 1956; to the Committee on Appropriations.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States relative to urging that to encourage and promote active search for, and exploitation of, domestic mineral resources, the Congress of the United States legislate into effect a tax-incentive program, applicable to all States, territories and possessions; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADDONIZIO:

H. R. 4706. A bill for the relief of Heinrich Carl Adolf Stein; to the Committee on the Judiciary.

By Mr. SIKES:

H. R. 4707. A bill for the relief of Duncan McQuagge; to the Committee on the Judiciary.

By Mr. KING of California:

H. R. 4708. A bill for the relief of Roger Eugene Caillaud; to the Committee on the Judiciary.

By Mr. RODINO:

H. R. 4709. A bill for the relief of Margaret M. McCullin; to the Committee on the Judiciary.

By Mr. RABAUT:

H. R. 4710. A bill for the relief of Ramon Gullon; to the Committee on the Judiciary.

By Mr. COON:

H. R. 4711. A bill for the relief of Pedro Savala; to the Committee on the Judiciary.

By Mr. JOHANSEN:

H. R. 4712. A bill for the relief of Alina Kosmider; to the Committee on the Judiciary.

By Mr. WAINWRIGHT:

H. R. 4713. A bill for the relief of Caterina Lueder; to the Committee on the Judiciary.

By Mr. LANE:

H. R. 4714. A bill for the relief of Theodore J. Harris; to the Committee on the Judiciary.

By Mr. BROYHILL (by request):

H. R. 4715. A bill to authorize Maj. Gen. Robert W. Grow, United States Army, retired, to accept the Homayun Decoration, 2d Class, and supporting documents conferred upon him by the Government of Iran; to the Committee on Armed Services.

By Mr. BERRY:

H. R. 4716. A bill authorizing the issuance of a patent in fee to Ruth Long Crow Running Horse; to the Committee on Interior and Insular Affairs.

By Mr. WAINWRIGHT:

H. R. 4717. A bill to authorize the Secretary of the Army to quitclaim all right, title, and interest of the United States to certain lands, to the village of Sag Harbor, N. Y.; to the Committee on Armed Services.

By Mr. BARTLETT:

H. R. 4718. A bill to authorize and direct the issuance of patent to Robert W. Retherford, of Anchorage, Alaska, to certain land in Alaska; to the Committee on Interior and Insular Affairs.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

136. By the SPEAKER: Petition of the president, Retired Officers Association, Washington, D. C., transmitting 16 resolutions adopted by the association at its biennial convention on November 29, 1954; to the Committee on Armed Services.

137. Also, petition of the recording secretary, Nashville Industrial Union Council, Nashville, Tenn., requesting enactment of a Federal minimum wage of $1.25 an hour; to the Committee on Education and Labor.

138. Also, petition of the chief clerk, City Council of Baltimore, Baltimore, Md., requesting the Congress of the United States to increase the salaries paid to postal employees; to the Committee on Post Office and Civil Service.

139. Also, petition of the general president, International Union of Operating Engineers, Washington, D. C., relative to the allocation of Federal automobile and related excise taxes exclusively for the use of highway planning and building and otherwise expanding the highway construction program; to the Committee on Public Works.

140. Also, petition of the president, the Estonian National Committee in the United States, New York, N. Y., requesting continued support of the cause of Estonia, which is aimed at the liberation of Estonia; to the Committee on Foreign Affairs.

141. Also, petition of the president, Lithuanian American Community of Omaha, Omaha, Nebr., expressing appreciation to the United States for its ever-increasing support of the cause of free Lithuania; to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

Review of Civil Air Policy

EXTENSION OF REMARKS
OF

HON. J. PERCY PRIEST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. PRIEST. Mr. Speaker, I have just introduced a bill containing a number of amendments to the Civil Aeronautics Act of 1938. In its examination of this bill, along with other amendments of the act which may be proposed by others, the Interstate and Foreign Commerce Committee will conduct a review of the civil air policy of the United States.

Through the years this committee has been responsible for developing and presenting in legislative form the present civil air policy, both as it relates to purely domestic operations and as it affects the operations of our aircraft abroad and foreign aircraft to this country. This committee wrote and recommended to the House the legislation which became the Civil Aeronautics Act of 1938, the basic statute under which civil aviation operates today. The committee is proud of that statute. Under it, civil aviation has made the magnificent progress with which all of us are familiar—progress which permits us to say that we maintain, under the American flag, the finest air transport system in the world, both at home and abroad.

During the years since 1938 there have been few changes in the Civil Aeronautics Act. The problems of civil aviation have been adequately dealt with, notwithstanding the vast changes which have come about in those 17 years. However, the time has come when it is necessary to review that statute to determine whether some changes need to be made in order to make it a more effective instrument for the continued development and regulation of this great industry.

The bill which I have just introduced will serve as the basis on which this inquiry will be made. In it I have sought to present the major legislative issues which are under discussion at this time. However, if there are other issues which the Members of this body feel should be

reviewed as they affect civil aviation, I hope they will be promptly presented to the Interstate and Foreign Commerce Committee in order that they may be resolved.

My bill provides for the regulation of contract carriers by air. At the present time these carriers are not subject to economic regulation under the Civil Aeronautics Act. The bill would impose limited economic regulation upon them along the lines presently prescribed for c ntract motor carriers and contract water carriers. Since contract carriers compete with both scheduled and nonscheduled carriers by air for the best traffic available, the regulation of contract carriers is designed, among other things, to prevent discrimination in regulation. Your committee will expect to call upon its knowledge of civil aviation, as well as its experience in regulating other forms of transportation, in determining whether contract carrier regulation is necessary, and if so, the manner in which this regulation should be carried out.

My bill also includes provisions which more clearly define the relationship between the State and Federal Governments in the regulation of civil aviation, both safety and economic. Unfortunately, in the past few years there has been quite a bit of litigation in which it has been sought to draw the line under the existing law between the jurisdiction of State and Federal Governments in aviation regulation. Here again the committee will call upon its experience in dealing with other forms of transportation, as well as on its knowledge of the special characteristics of aviation, in working out this particular problem.

My bill also deals with the problem of the proper regulation of nonscheduled air carriers. Some years ago the Civil Aeronautics Board issued certain exemptions from regulation for the benefit of carriers conducting nonscheduled or, as we call them in the motor-carrier field, irregular route operations. Ever since that time the Board has expended great efforts in seeking to enforce its regulation which restricts these carriers to nonscheduled operations. While most of the carriers who are beneficiaries of the Board's exemption successfully conduct operations within the regulation, a few have sought to conduct elaborate scheduled operations between major cities in the country. The Board's efforts to enforce its regulation have resulted in violent controversy, some indications of it having appeared in statements on the floor of the House. Members have been concerned by reason of the charges made by some of the nonscheduled lines that a monopoly exists in air transportation, to the detriment of the sound development of air transportation. Similarly, members have been concerned by reason of the countercharges that the Civil Aeronautics Act is being subjected to wholesale violations. These fears, of which Members of this body have spoken, must be inquired into by the Interstate and Foreign Commerce Committee of the House. The facts must be ascertained, and if legislative remedies are necessary, they must be recommended to the House by your committee. This will be done.

My bill provides for the extension to international operations of the Board's present powers to regulate cargo and passenger rates. At the present time the Board's powers to regulate international rates are very limited. A number of times the Board has recommended that its ratemaking powers be extended in the way provided for in my bill. This is a controversial subject. Your committee studied this same question very carefully prior to recommending legislation which became the Civil Aeronautics Act of 1938. At that time the committee rejected the proposal for complete rate regulation in the international field, because it was fearful that this would cause retaliation and place the carriers in such an inflexible position that they would not be able to compete effectively with their foreign competitors. Times have changed greatly since that decision was made. The committee should explore the controversy and settle this question as to the scope of the Board's rate regulation.

In reviewing this proposed legislation I have touched upon only the major issues with which the bill deals. Many significant, though less important, changes appear in the bill and will be subjected to review. My reason for making this lengthy statement upon the introduction of this bill is to inform the Members of the House that this review of civil aviation policy is to be conducted by the Interstate and Foreign Commerce Committee. Thus the members will be afforded an opportunity to inform the committee of any problems affecting civil aviation which are giving them concern. Based upon its knowledge not only of civil aviation, but related fields of transportation, the committee will then consider these problems and make a report to the House, accompanied by such legislation as seems required to meet the problems presented.

Thomas Masaryk: The First Czechoslovak President

EXTENSION OF REMARKS
OF
HON. RICHARD W. HOFFMAN
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. HOFFMAN of Illinois. Mr. Speaker, today is the 105th anniversary of the birth of Thomas G. Masaryk, and under leave to extend my remarks, I wish to pay tribute to an outstanding leader of our time.

Great nations have produced great men who have shaped the destiny of their peoples. America has men like Washington and Lincoln; Czechoslovakia has Thomas G. Masaryk. He was born on March 7, 1850, in Moravia, under humble conditions, and died as the first president of the Czechoslovak Republic.

Throughout his life Masaryk was a seeker and protector of the truth. He abhorred violence and terror in social life and politics. His intense feeling for democracy is evident from his statement: "The ideal of democracy is so high, so valuable, so dignified, that it is worth believing in, living for, fighting for." A champion of the oppressed, he constantly fought for the rights of minority groups.

Believing the Hapsburg monarchy to be incompatible with democratic self-government he worked for a free and independent Czechoslovakia. He continued the struggle after the outbreak of World War I, by traveling abroad to gain support for the Czechoslovak cause and with the aid of Edward Benês formed the Czechoslovak National Council, which was recognized, during the war, as the de facto government of Czechoslovakia. On November 14, 1918, when the Austro-Hungarian monarchy collapsed, he was elected president of the newly formed Czechoslovak Republic, and being on American soil at that time he visited President Wilson to express his gratitude for America's aid in the creation of the infant nation.

The Czechoslovak state which he founded was based on democratic freedom and recognized the rights and duties of the individual. Under Masaryk's firm leadership Czechoslovakia became one of the foremost democracies in Europe. He was reelected to the presidency in 1920, 1927 and 1934 and resigned, due to ill health, in 1935.

His spirit lives on in Czechoslovakia, despite the tragic experiences of the Czechoslovak people under the present Communist regime. This was appropriately expressed by President Benês at Masaryk's funeral in 1937 when he said:

> Though he passes on Masaryk is still with us. * * * President-Liberator, we will remain faithful to the heritage which you have laid in our hands.

Although this heritage has, at least for the present, been betrayed by the Communists, we know that the Czechoslovak people remain faithful to it in their hearts.

Thomas G. Masaryk: The Spirit of Democracy

EXTENSION OF REMARKS
OF
HON. WALTER ROGERS
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. ROGERS of Texas. Mr. Speaker, this 105th anniversary of the birth of Thomas G. Masaryk, founder and first President of the Czechoslovak Republic, ought to remind us all of the great American heritage of democracy.

Thomas Masaryk was the embodiment of those same concepts that have made our Nation a great Nation. And it is not without significance that it was in America that Thomas Masaryk found much of the spiritual inspiration for creating the Czechoslovak Republic in 1918. Thus,

Thomas Masaryk represents a link between America and his own native Czechoslovakia.

On this anniversary of the great Czech statesman let us, therefore rededicate ourselves to those higher ideals of democracy which are exemplified so well by the spirit of Thomas Masaryk. We are living in an epoch of trial; and the firmness of our convictions, the steadfastness in the righteousness of our cause, and the determination to preserve Western democracy—all are the elements which will insure ultimate victory.

Thomas Garrigue Masaryk: Scholar and Educator

EXTENSION OF REMARKS
OF
HON. CLEMENT J. ZABLOCKI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. ZABLOCKI. Mr. Speaker, on this 105th anniversary of the birth of Thomas G. Masaryk it is fitting that we pay tribute to the man, to his life, and to his work.

At this critical juncture of civilization, the name of Thomas Masaryk has a special meaning; for next to Woodrow Wilson, perhaps no statesman of World War I had a greater appreciation of the importance of knowledge and education in relation to a democracy and to the continued growth of Western culture than Thomas Masaryk. Like Wilson, Masaryk was a scholar, statesman, and philosopher well grounded in the ideals of our Christian civilization. Christian democracy was to Thomas Masaryk the highest ideal to be achieved in the building of a state: A state inspired by, and based upon, the ideals of both Christianity and democracy.

A statesman convinced of the necessity for a sound educational system in a democracy, Thomas Masaryk infused into the newly constructed Czechoslovak Republic his own spirit of democracy and humanism. As a cure for political evils, Masaryk wrote:

> Democracy demands the political education of citizens and electors.

Education, he pointed out, was not to be solely erudition or one-sided and exclusive school education because they alone cannot bestow understanding, talent, or political sense. A nation needs a "strong and healthy brain," he said, and thus the objective of education in a democracy is "to teach the young to think."

Education did flourish in the Czechoslovakia of Thomas G. Masaryk, and it aided in molding the new Republic in the spirit of true democracy and humanism.

Since the Communist seizure of Czechoslovakia in February 1948, the Communists have made a concerted effort to destroy the structure of the educational system of once free and independent Czechoslovakia. They have endeavored to build a structure based entirely upon the philosophy of communism. Knowing that education can mold the generations to come, the Communists have tried to mold the entire Czechoslovak system in the image of Marx, Engels, Lenin, and Stalin, and to produce a new type of man, the so-called Soviet man.

This communistic system of education, presently operating behind the Iron Curtain, is atheistic; it is materialistic; it is antidemocratic and antihumanistic.

Fundamentally, the Communist educational system is the very antithesis of everything Thomas Masaryk stood for.

Today Czechoslovakia is a participant in the universal struggle against totalitarian, atheistic communism. Unfortunately, Czechoslovakia is now within the Soviet orbit of power, and thus it is a nation in slavery.

On this 105th anniversary of the birth of Thomas Masaryk, let us, therefore, call the attention of all the world to the dedication and to the principles of this great statesman. Let us also reassert and reemphasize our Christian and democratic principles, for it is in the strength and the vitality of these principles that the salvation of mankind may well rest in this global struggle with materialistic and totalitarian communism.

Upper Colorado River Project

EXTENSION OF REMARKS
OF
HON. JOHN F. BALDWIN, JR.
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. BALDWIN. Mr. Speaker, Dinosaur National Monument is an important part of our national-park system. It straddles the Utah-Colorado border up near Wyoming, and contains in it some of the most livable and beautiful river scenery in the entire Colorado system.

Right now, Dinosaur is under a serious threat. There is a multi-billion-dollar reclamation project before Congress to build a series of huge dams in the upper Colorado River system, so that Utah, Colorado, Wyoming, and New Mexico can make use of their half of the Colorado River's water. Conservationists would like to see a good Colorado River development plan. But they do not want to destroy our enviable, priceless reserves of parks and scenic wilderness unless there should be a compellnig national need for such destruction. There is not.

The proposed Echo Park Dam, which is part of the proposed upper Colorado River project, would destroy the best of Dinosaur. All over the country conservation organizations have vigorously protested this plan because national parks and monuments were set aside to be left unimpaired for the enjoyment and use of present and future generations. In the course of compiling their protests, they have discovered from the Bureau of Reclamation's own figures that alternate dam sites can do the job that needs to be done.

The conservationists oppose it for one reason: It violates both Dinosaur and the whole national-park idea. If a place is set aside for use as a dam site, the building of a dam will change it for all time. It is only fair, then, that if a place is set aside as a park or monument, it should be left as it is for just as long a time—forever unavailable for conflicting types of use.

I am a life member of the Sierra Club, which is an organization dedicated to the purpose of preserving our national parks and monuments. Last summer I spent 6 days in a rubber boat traveling 80 miles of the Yampa River Gorge through Dinosaur National Monument and past the proposed site of Echo Park Dam. The Yampa River Gorge is truly one of the most spectacular and unusual river canyons in the United States. It would be changed materially and adversely by the proposed Echo Park Dam. The destruction of the beauty of Dinosaur National Monument for the construction of such a dam would violate every principle upon which our great system of national parks and national monuments was built.

I am strongly opposed to the Echo Park Dam and therefore must be and am opposed to the upper Colorado River project, unless this project is modified to eliminate the Echo Park Dam and to use some alternate site which will not destroy Dinosaur National Monument.

The Sierra Club, in its bulletin for February 1955, has published the following analysis of the weaknesses of the upper Colorado River project as now proposed:

WHAT'S WRONG WITH THE COLORADO PROJECT?
A BRIEF STATEMENT OF DISPUTED QUESTIONS

CONCERNING PROPOSED ECHO PARK DAM

1. Advocates insist, even after demonstration that their figures were wrong, that this dam would save loss by evaporation that would supply water for "a city the size of Denver." This is incorrect. Alternate plans would result in less loss by evaporation.

2. Advocates imply that land nearby in Utah and Colorado would derive irrigation benefits. This is misleading. No water will be available for irrigation or domestic use from this dam.

3. Secretary McKay has stated that the dam would alter but not destroy the scenic beauty of Dinosaur National Monument. This is an error in judgment. The National Park Service was correct when it said the effect would be deplorable. The reservoir would periodically retreat nearly 40 miles, exposing 30,000 acres of silted landscape.

4. Some advocates claim that a reclamation withdrawal in the 1938 proclamation enlarging Dinosaur justifies constructing Echo Park Dam. It does not. This withdrawal is specific to Brown's Park, where a dam would flood a mile of canyon. The Dinosaur dams would flood 100 miles.

5. Advocates promise recreation for millions. Such choice is unnecessary and would be tragic. We need not flood an irreplaceable scenic sanctuary to provide reservoir recreation which can be had in abundance outside the national park system.

6. Advocates deny the damaging precedent, but precedent means "that which goes before"; and there now exist plans to build dams in nine national parks and monuments. The future will need more parks, not fewer.

CONCERNING THE ENTIRE DEVELOPMENT

1. The administration's local-State-Federal partnership plan for conserving small water-

sheds will alter the flow of the Colorado River. The effect on big-dam requirements is not yet known and needs to be considered.

2. The present storage project encompasses only part of a river basin and tends to duplicate rather than to complement existing costly development.

3. Premature authorization of so questionable a project would prejudice the emerging national water policy.

4. The project is likely to require major redesigning to accord with the pending Supreme Court interpretation of the 1922 Seven State Compact.

5. Financing, based on estimating procedures now proved unreliable, places undue faith on assumed hydroelectric-power revenues for repayment decades hence in an atomic-power age.

6. Excessive water is committed to more agricultural production—and at high altitudes—at the cost of upper basin industrial development and national decentralization.

7. Proponents have not given a frank estimate of the ultimate cost—probably to exceed $13 billion exclusive of interest subsidy.

A Common Intellectual Tradition Needed

EXTENSION OF REMARKS
OF
HON. FRANK THOMPSON, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. THOMPSON of New Jersey. Mr. Speaker, there is a weakness in our colleges and universities. It lies in the failure to keep intact as a unifying reference point for the students a common intellectual tradition, a sense of an intellectual community leading to a sense of the continuity of human experience. One used to find all this in the old prescribed courses of the humanities before a rampant, free-for-all, excessively individualist elective system ripped everything apart. But now we live with a situation where doctors only know how to make their meaning plain to other doctors; or engineers to other engineers; or lawyers to other lawyers, or businessmen to other businessmen, and so on. Each of these talks, and talks well within the range of a profession. But they do not talk up and down and across their professions. They do not talk up and down and across the whole range of human experience, stimulating and stimulated by that experience, to perfect the spirit of their age in the light of the spirit of all ages. They do not and they cannot do this, because they do not have in common a vocabulary they all understand—a vocabulary that was once drawn from the common fund of knowledge embraced by the humanities.

This point was well and brilliantly made in a recent speech at the National Conference on Higher Education by Senator J. WILLIAM FULBRIGHT, Democrat, Arkansas. I include this speech here. I do this in connection with a bill I am introducing today which I trust will help to correct a situation which is growing progressively worse.

The speech follows:

After the many taxing hours you've spent in discussion groups, I think I can best thank you for the invitation to speak here in this final hour, by speaking briefly. I shall try to do just that. In fact, the heart of what I have to say is expressed in but one story.

Some time ago, so this story goes, a warden at the Joliet penitentiary played host to a conference of criminologists, called to consider ways and means of reducing the crime rate. One speaker seemed to carry the day with his thesis that the way to do this was by requiring all young people to study mathematics intensively. For the discipline gained in this way, so the speaker claimed, would lead the young to think logically, and so make them virtuous when they came of age.

There was great applause when he reached the end and sat down. The warden alone seemed unimpressed. He asked an aide to fetch a certain prisoner, introduced him to the meeting, and then at once sent the prisoner back to his cell. "That man you just saw," the warden explained to the criminologists, "is the most brilliant mathematician in the whole prison. So brilliant, in fact, that it took bank examiners 10 years before they found that he was embezzling funds by juggling bank ledgers. That man was not deficient in mathematics. What he lacked was a sense of grammar and rhetoric. He simply didn't know the difference between the words 'mine' and 'yours'."

You will agree, I think, that the criminologist who saw in the science of mathematics the means to create a nation of moral men and good citizens, is not alone in his approach. He is joined by a chorus of voices, each with a special educational emphasis leading to the magic formula. To one person, it is training in physics, or medicine, or plant life. To another, it is training in business, or homemaking, or athletics. Let this or that be the cornerstone for higher education—so they say—and the arrangement of its own force will meet every danger, solve every problem, remove every evil, and gain every good.

As for myself, I am inclined to favor the warden's theory of education, if I may call it that. I am inclined to favor it, subject to three qualifications.

First, no system of higher education, however arranged, can bear the whole load of cultivating what lies in the human spirit. For that spirit, as the ancients taught us long ago, is a mixed thing. It is formed and ruled not alone by reason. It is also formed, and it is all too often ruled, by the will and by the passions. And if there are those who may deny this ancient fact, the rule of Adolph Hitler in Germany, and Mussolini in Italy, and the careers of a variety of imitators in the United States—each in a land preeminent for its literacy and enlightenment—are case studies of how reason can be set on its head by willful men who know how to play on passions, and so make the worse cause appear to be the better one.

The second qualification follows from the first. It is that if the education of the individual is viewed in its entirety, then disciplined hearts must dwell in the same body as disciplined minds. And in this light, not the schools alone can carry the burden of the work that needs to be done. Nor can they be charged—as they now often are—with full responsibility for any defective products. Our homes, our churches, our political institutions, our economic enterprises—all our media of communication—are, and must be considered, a part of what educates the individual. None can absolve itself from the end result. All are jointly responsible for what it is like.

The third qualification is addressed to those who would have the schools and colleges emphasize this or that specialized science and art. Let me say here that I have the utmost respect for the specialist. It is plain, for example, that we urgently need scientists and technicians who can lend their expertness to the defense of America and the free world. So, too, as a further example, do we need men, skilled in the art of economic management, who can perfect the way we organize production and distribution. This work is of supreme importance; for though it is true enough that man does not live by bread alone, at least he lives by bread. And we need places specifically set aside for the purpose of cultivating the science and art of making bread, and defending it.

Yet divorced from all else, this specialization in art and science—and here I come to my point—is not an education for a democracy. There is nothing to distinguish it from an educational system in a totalitarian state. Men like Hitler, Mussolini, and Stalin may have boasted of a Nazi, or a Fascist, or a Communist science and technology. Yet these bits of knowledge are not political or moral by nature. The same textbooks dealing with them can be used by students in both democracies and tyrannies. For the subjects themselves are equally useful to freemen and slaves alike; and indeed, in ancient times, they were cultivated chiefly by slaves.

I repeat that this specialization does not form an education for a democracy. It does not create an atmosphere in which the mind can be opened to every intimate impulse and voice, meshed with other minds of a like sort. Specialization, by definition, focuses on only a small part of the human battleline. It orients no one toward a view and a place in the battleline as a whole. It orients no one toward the whole intellectual life and tradition of a country. It orients no one toward an understanding of man as he appears in a particular moment of current history, and in the history of the ages.

And it is precisely at this point—as I shall try to make plain in a moment—that the comment of the warden at Joliet seems to apply on all fours. Here, let me digress to say that from what I have seen of our colleges and universities, their key weakness is not that they breed Communists. It is arrant nonsense to say that they do. Not one of our enlisted men who went over to the Communist side during the Korean war and refused repatriation, cited as his reason any Marxist indoctrination while in college. Many of them never went to more than the primary grades, and in fact, were illiterate. As for the officers who were court-martialed for aiding the enemy, not one of these pointed an accusing finger at some university professor under whom they had studied at West Point or elsewhere.

Yet there is weakness in our colleges and universities. And now, in this hour of grace, we ought to turn our thoughts inward, and seek where this weakness lies. In my view, at least, it lies in our failure to teach grammar and rhetoric—to teach the difference between "mine" and "yours." In the largest sense for which this difference in words is but a symbol, it lies in our failure to keep intact as a unifying reference point for the undergraduate body, a common intellectual tradition, a sense of an intellectual community leading to a sense of the continuity of human experience.

One used to find all this in the old prescribed courses of the humanities before a rampant, free-for-all, excessively individualist elective system ripped everything apart. But now we live with a situation where doctors only know how to make their meaning plain to other doctors; or engineers to other engineers; or lawyers to other lawyers; or businessmen to other businessmen, and so on. Each of these talks, and talks well within the range of a profession. But they do not talk up and down across their professions. They do not talk up and down

and across the whole range of human experience, stimulating and stimulated by that experience, to perfect the spirit of their age in the light of the spirit of all ages. They do not and they cannot do this, because they do not have in common a vocabulary they all understand—a vocabulary that was once drawn from the common fund of knowledge embraced by the humanities.

All of this lends an air of paradox to our commitment to democracy. On the one hand, we assert our devotion to a system of government that is based on free and intelligible communication between citizen and citizen, and between the leaders and the led. On the other hand, we weaken the effectiveness of that system by a prevailing educational process that tends to narrow down communication by limiting it to an "Information Please" program and a Readers Digest, or by rendering meaning altogether meaningless. This paradox, let me add, is made to order for exploitation by the demagogs. For I noticed that when our higher institutions of learning came under attack from that quarter, all too many of them were bewildered by what they were called on to defend. They seemed at times to flounder in an inner darkness of their own making, equal in density to the darkness the demagogs meant to impose on them from without. The best that many of them could do was to raise the rallying cry of academic freedom. Yet academic freedom, while of supreme importance in the educational process, is not the end aim of the process. It is but a means to an end. And under conditions where so many of our institutions of higher learning lacked any coherent, general, and organized body of knowledge they meant to impart to their students, they were at a loss how to define the end they meant to preserve through academic freedom.

In saying this, I am not implying that our colleges and universities ought now to sit down in a solemn convention and agree on a body of doctrine which they will then impose as a new orthodoxy on their student bodies. In common with all of you, I see in any such proposal the death of all education; of an education, at least, whose aim ought to be the infusion of the spirit of learning among students, and whose method ought to be not indoctrination, but the constant exercise of the mind in meaningful arguments. In common with all of you, also, I see in any such proposal for orthodoxy, something of the ludicrous outlook of a university trustee who strongly objected to the text of a university president's commencement address. And when the president said to the trustee, "Well, don't you want your students to hear the truth?" the trustee answered, "Of course. But can't you print the truth on the back of the convocation program, and hand it to the graduates as they file out of the chapel?"

The tradition of the humanities, for whose restoration I am pleading as the heart of any educational system that can best serve democracy, is not a tradition of orthodoxy. It is a tradition of continuous disagreement between parties in a great dialogue extending back over the ages. All that these parties agreed upon was the topics they felt were worth talking about. And beyond this, the sense of unity that is present in their great dialogue was hinged to the fact that when they disagreed, they knew what they were disagreeing about. Today, by contrast, we are inclined to rush ahead pellmell with our solutions, without first asking what the question is we want to solve. Today, also, it happens all too often that people disagree violently without recognizing that they are talking about different things in the first place.

In the long retrospect, I think it is fair to say that the strength of our political institutions, is a strength drawn originally from men who shared the common heritage of education in the humanities. Indeed, in this respect, there probably was no institution of higher learning in history equal to the community of men who formed the Constitutional Convention. All were preeminent in practical affairs. Yet they were also men who knew how to speculate, who brought a broad range of human experience to bear first on their thoughts and then on their practical work. This is not to say that they agreed with each other. They disagreed sharply. But when they did, they shared a common vocabulary which made the eventual agreement possible. So, also, in later years, a Thomas Jefferson and an Alexander Hamilton, whose thoughts form the basic fabric of our national life, disagreed sharply. Yet they were children of the same tradition. And because they were, each in the act of disagreeing, brilliantly served the Nation so that we can now turn to Jefferson for guidance under one set of circumstances, and to Hamilton under a different set. And in this way, we profit from both.

I am saying here that tradition does not mean uniformity. It means diversity within an embracing unity. And it is to this end, I feel, that we must reconceive and reorganize the life that is lived in our schools of higher learning. We must make of those schools the home for a new spirit of learning. We must make them, as Woodrow Wilson pleaded in 1909, "a community of scholars and pupils—a free community but a very real one, in which democracy makes its reasonable triumphs of accommodation, its vital process of unity. I am not suggesting," Wilson continued, "that young men be dragooned into becoming scholars or tempted to become pedants, or have any artificial compulsion whatever put upon them, but only that they be introduced into the high society of university ideals, be exposed to the hazards of stimulating friendships, be introduced into the easy comradeship of the republic of letters. By this means the classroom itself might some day come to seem a part of life."

A final remark. I have no illusion that even if all this is done, all will be well with us in a present and future hour. For we face the fact that what we are educating, is, after all, the son of old Adam. And like his ancestor who rebelled against a teaching from the highest possible quarter, so can the son of old Adam rebel against what he is taught, and reach for forbidden fruit. Yet this much, at least, can be hoped for: That a familiarity with what the many generations of man have talked about and experienced in their career on earth, can, by pointing up the consequences, reduce the danger of such a rebellion, though it may not eliminate it altogether. Indeed, without this heroic hope that education can inch humanity forward toward the vision of human perfectibility, life itself would have no purpose.

In all that touches existence, free men everywhere look to America for leadership. When we wobble, they feel unsteady. When we creak, they groan. When we slip, they fall. But when we act with the clarity of a great purpose, they feel braced and uplifted. Our schools of higher learning must view themselves as the heart within the heart of what it is that can enable America to give free men the leadership they want. Yet America cannot exercise that leadership if, within the borders of our own land, we are in danger of losing the ability to talk to one another. It is to the restoration of that lost art, in all its admitted difficulties, that I hope our schools of higher learning will bend their chief energies.

"Just the Facts, Ma'am"

EXTENSION OF REMARKS
OF

HON. F. EDWARD HÉBERT

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. HÉBERT. Mr. Speaker, there is hardly among us anyone who has not at one time or another heard over the radio or the television, the expression which has become almost a household phrase, "Just the facts, ma'am."

Of course you recognize the phrase as that of Sergeant Joe Friday in the radio-television series "Dragnet."

Facts have always been a fetish with me.

For long years I dealt with the facts as a newspaper reporter. In those days I always attempted to portray the facts in the pieces which I wrote, as reliably and accurately as I knew them.

But facts, like statistics, are a rather tricky medium in the hands of individuals.

It has been said that statistics can prove anything.

I have always made the assertion that the same set of facts in the hands of an adroit and able reporter can be used for any purpose.

Give any reporter a set of facts and he can write a piece in any one of three ways: up, down, and in the middle. Facts can be slanted with adjectives and phrases to convey an idea or a conclusion which the reporter desires instead of what the cold facts actually are.

Give me a page 1 story and you can have 50 editorials on the editorial page of a newspaper and I will direct your conclusions.

An individual approaches an editorial page in one of three different attitudes.

If he is in agreement with the policy of the newspaper which he reads he approaches the editorial with a kindly and sympathetic feeling.

If he disagrees with the policy of the newspaper then he approaches the editorial with an antagonistic attitude and in a resentful mood.

If he has no feelings on the policy of the newspaper then he approaches the editorial with an open, but certainly argumentative frame of mind.

With the news story it is entirely different.

The average American newspaper reader accepts a news story at its face value as he does the remarks of the radio commentator, who in turn has gotten his information from the newspaper story.

Without suspicion the clever and adroit reporter can make his reader believe anything he wants him to believe. He can mold him like clay in the hands of a sculptor. And the very first to indignantly deny that he is being led by the average news article is the very individual himself who was affected.

Now what does all this lead to?

Having worked the other side of the street and with cause, believing that I know most of the tricks of the trade,

it has annoyed me considerably to read some of the so-called objective and unbiased news articles which have appeared in the Nation's press on the recent congressional and judicial salary boosts.

Objectivity—or the lack of it—in news reporting has always intrigued me and I am sure it would intrigue all of you if you ever stopped long enough to analyze some of these objective reports.

Seldom has there been such clever misrepresentation of the facts as during the consideration of the congressional and judiciary pay raise bills. In fairness to the press it must be stated that they were given very able assistance by some of our own Members.

I had hoped that these misrepresentations would cease with the final action on the measure. It was indeed a forlorn hope.

The most annoying thing about the whole business is that these misleading articles do deal in factual statements and in the facts but they are presented in such a manner and fashion that a completely erroneous conclusion is drawn from such articles.

I have a case in point.

Under the Associated Press credit line an article appeared in the Washington Post and Times Herald of Friday March 4 under the heading "Congressmen To Get Big Pension Hike."

Now that is true. Under the recent pay boost Members of Congress will get a big pension hike. But there is still more truth to such a statement—that part of the truth and the facts which have not been printed and which are necessary to complete the picture.

Any individual reading the article would immediately come to the conclusion that Members of Congress boosted their retirement pay by $5,625 to $16,875.

The article did not say that in order to receive such a retirement payment a Member would have to serve 30 years beginning March 1, 1955, through March 1, 1985, that he would have to pay a total of $40,500 from his paycheck and that he would have to have reached the age of 62 years.

In order to demonstrate what I have been talking about I have used this article and headline as an example of how a certain set of facts can be used to distort conclusions.

I am reproducing the article as it appeared in the Washington Post and Times Herald under the Associated Press credit line. I then have taken the same story and written another story around the same set of facts but painting an entirely different and favorable picture. In order to be most accurate and to clearly and vividly demonstrate my point I have taken the exact words of the Associated Press story and incorporated them into my rewritten story and see what you have.

Here is the original story by the Associated Press:

CONGRESSMEN TO GET BIG PENSION HIKE

The $7,500 annual pay raise Congress voted its Members this year adds $5,625 a year to maximum congressional pension benefits.

The maximum payment goes only to those who complete 30 years or more of congressional service. To qualify for the new top pension of $16,875 a year, a Member would have to serve 30 years under the new pay scale.

Pension payments to Congressmen are based on average annual salary during a Member's tenure in office, with a limit of 75 percent of full pay.

President Eisenhower signed into law Wednesday a bill raising Congress Members' salaries from $15,000 to $22,500 a year as of March 1.

The top pension any Member could draw under the salary scale in effect when the present Congress convened was $11,250.

Pension payments are at the rate of 2½ percent of average pay multiplied by the number of years of service.

Contributions to the pension fund also will increase as a result of the pay raise, since Members pay 6 percent of their salary into the fund. Participation is voluntary.

Now here is the same story around which has been written all the facts in the case.

For the purpose of emphasis I have quoted those portions of the following story which appeared in the original Associated Press story. I have also written a new headline which is also as factual as the original headline but which carries a different suggestion and most certainly has a different flavor.

Here is the story which will never be printed except in these columns.

CONGRESSMEN MUST PAY HEAVY ADDITIONAL TAX

(Disassociated Press)

As a result of the recent $7,500 congressional pay raise, Members of Congress will be compelled to pay out of their checks an additional $3,300 annually, reducing the "take-home pay" of the new amount by approximately 40 percent.

Part of the deductions from the monthly paycheck of Members of Congress are compulsory, part of it voluntary.

The compulsory withholding sum for income-tax purposes will amount to $2,850 more annually assuming that the new pay raise, exclusive of other income, places a Member of Congress in the 38-percent bracket. In at least one instance the new pay raise will result in only $75 a year additional "take-home pay." The Member affected is already in the 90-percent bracket and voted against the pay raise.

The voluntary deduction, which qualifies a Member for participation in a retirement fund only after he has reached the age of 60, at a lesser rate, or the age of 62, at full rate, after he has served at least 5 years, will amount to $450 additional annually. Those Members of Congress who have elected to participate in the retirement fund are now paying annually $900 per year. The new pay raise will bring this contribution up to $1,350 annually, the highest it has ever been in congressional history.

"The annual pay raise Congress voted its Members this year adds $5,625 a year to maximum congressional benefits."

"The maximum payment goes only to those who complete 30 years or more of congressional service. To qualify for the new top pension of $16,875 a year, a Member would have to serve 30 years under the new pay scale." No present Member of the House could, therefore, qualify for the maximum figure unless he is reelected to the next Congress and serves 30 years after that. Because the pay raise did not become effective until March 1, 2 months short of a complete year for service in the 83d Congress, no Member of the House would be eligible until 1984 for the maximum.

"Pension payments to Congressmen are based on average annual salary during a Member's tenure in office with a limit of 75 percent of full pay."

Pension payments are also made to members of the judiciary who were given pay raise in excess of the amount given Members of Congress. Unlike Members of Congress who elect to participate in the retirement plan, judges do not contribute anything to their retirement payments which are automatic at retirement age regardless of years of service.

While the retirement amount for Members of Congress is based on the average salary during tenure of office the retirement pay of other Government workers coming under retirement plans is based on the 5 years' highest salary during Government service.

Members of the armed services, who also do not contribute to their retirement fund, receive an amount based on the pay of rank at their retirement regardless of age.

"President Eisenhower signed into law Wednesday a bill raising Congress Members salary from $15,000 to $22,500 a year as of March 1."

"The top pension any Member could draw under the salary scale in effect when the present Congress convened was $11,250." Only a relatively few Members of the present Congress could qualify for this amount, however, since it is based on 30 years' service at a salary of $15,000. For retirement purposes the $15,000 salary figure became applicable during the 82d Congress, thus only those elected to the last Congress and who serve for 30 years, to the year 1983, would have become eligible for this amount. "Pension payments are at the rate of 2½ percent of average pay multiplied by the number of years of service." Any Member to qualify for the maximum retirement pay under the recent pay rise must voluntarily contribute from his salary the sum of $40,500, serve 30 years, and reach the age of 62 years.

"Contributions to the pension fund also will increase as a result of the pay raise bill, since Members pay 6 percent of their salary into the fund. Participation is voluntary."

To further illustrate exactly how misleading the Associated Press story is, there are men serving in the present Congress for 30 years and over who never, never could or will qualify for the maximum retirement pay. These men, if they are in the retirement plan, will have their retirement computed on the basis of a salary ranging from $7,500 to $22,500 per year. A provision which would have enabled Members of Congress to enjoy the same privilege as all other Government civil service workers in the retirement plan by basing the retirement pay on the 5 highest consecutive years was knocked out of the proposed legislation.

To be specific take my own individual case. I could remain here 30 years and never receive either the new maximum of $16,875 or the most prior maximum of $11,250. When I first came to Congress the salary was $10,000, then it became $12,500 and then $15,000 for retirement purposes and now $22,500. I am in my 15th year. I will qualify when I become 62 years of age which is 8 years away. Then I would have had 22 years service and my retirement would be computed on the average ranging between $10,000 and $22,500. And incidentally I had to pay $3,000 cash in order to qualify for retirement when the system was opened to Members of Congress. There are many other cases similar to mine. I only cite it for example.

Anybody, however, reading this Associated Press article would come away with the conclusion that every Member of Congress just had to wait until he retired to collect this handsome sum of money.

Oh yes; "Just the facts, ma'am" are rather confusing when presented by some people who really do not want you to have all the facts about the facts.

What good will all this do?

None.

At least I have gotten it off my chest.

Supreme Court and U. N. Charter

EXTENSION OF REMARKS
OF
HON. USHER L. BURDICK
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. BURDICK. Mr. Speaker, every day adds cumulative evidence to the proposition that we should get out of the United Nations at the earliest possible moment. This we can do by an act of Congress, as I have explained heretofore. We do not need any constitutional amendment to do it, although that would accomplish the purpose and further would make future so-called treaties like the Charter of the United Nations impossible.

The question came up squarely in the Steel Seizure case, where an attempt was made to declare the Charter of the United Nations superior to the provisions of the Constitution. Five Justices of the Supreme Court said "No," but the Chief Justice and three others said "Yes" or took no part. This decision saved the Constitution, and I thought it not likely that another attempt would be made to assault its authority. But it came up in the Iowa Supreme Court, where the decision declared unequivocally for the Constitution, and held that the Charter of the United Nations could not override the State laws of Iowa.

That decision was appealed to the Supreme Court of the United States, where 4 Justices declared for the Charter of the United Nations and 4 declared against it. One vacancy on the Court caused this 4-to-4 decision, and, there not being a majority of the Court ready to declare the charter superior to a law of Iowa, the Constitution was saved again.

This last case was a close call, for if it had gone the other way the Charter of the United Nations would have been declared superior to any law in any State.

You cannot, therefore, blame the Members of the Senate of the United States for being suspicious of the appointment of John Marshall Harlan, for, being a Rhodes scholar, and knowing the purpose of the Rhodes scholarships from their own definition, the chances are that this new Judge would be more apt to uphold the Charter of the United Nations as being superior to any State law. Senator EASTLAND, in opposing the confirmation of Mr. Harlan, has put his finger on the danger to the Constitution that could easily arise from the confirmation.

Thomas Garrigue Masaryk

EXTENSION OF REMARKS
OF
HON. T. JAMES TUMULTY
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. TUMULTY. Mr. Speaker, on March 7, 1850, Thomas Garrigue Masaryk was born in southeastern Moravia. He later became the first President of Czechoslovakia. A Slovak by birth and the son of poor parents, he entered the University of Vienna in 1869. There he studied and later lectured on philosophy. In 1891 he was elected to Parliament as a member of the Young Czech—Liberal—Party. However, soon thereafter he resigned his seat and during the next 15 years wrote a series of books on the Czech question, the principles of nationality, and social philosophy. In 1900 he founded the small but influential Realist, or Popular, Party.

At the outbreak of the First World War he envisaged the breakup of Austria and the emergence of the Czechoslovak state. He fled to Italy and then to France, England, Russia, and the United States. In May 1917 Masaryk founded the Czech National Council, with its headquarters in Paris. He then went to Russia and created the Czech Legion out of Czech deserters from the Austrian Army. After the Bolshevik Revolution he secured the consent of the Soviet government for the exit of the legion through Siberia.

He came to the United States, and to a great extent through President Wilson's support for the Czech cause, the Republic of Czechoslovakia was recognized in 1918 by Italy, Great Britain, Japan, and the United States. The Czechoslovak Declaration of Independence was formally published at Washington, D. C., on October 18, 1918, and the Republic was formally proclaimed at Prague on October 28, 1918. Masaryk was elected the first President of the Republic. As President-Liberator, he wisely guided his country's affairs until 1935, when he resigned for reasons of health. Two years later Masaryk died, beloved by all his countrymen.

Masaryk ranks among the great as a philosopher and a statesman. Above all, he will take his place in history as a devoted Czechoslovak patriot who dedicated both himself and his country to the ideals of liberty and democracy. He was a friend and admirer of the United States and the principles for which it stands. He was an enemy of tyranny and a friend of freedom. As long as his memory and his teachings endure in the minds and hearts of the Czechoslovaks, the Communist regime which now oppresses them is doomed to fail. The Czechoslovaks can be sure that they have the sympathy and support of the American people in the trials through which they are passing.

Atomic Energy Progress Confronts Upper Colorado River Project With New Obstacle

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. HOSMER. Mr. Speaker, the age of nuclear power has arrived and electric power companies are now building at their own expense new plants which will supply electricity produced by atomic fission.

What does this mean to conscientious legislators who must evaluate proposals to invest large sums of money in new Federal hydroelectric projects?

Simply that they must look at them, not only in the light of all factors heretofore considered, but with this additional question in mind: In the foreseeable future will nuclear power be transformed into electric energy at cheaper rates than electric energy can be obtained from water power?

If the answer is "Yes," then our vast hydroelectric plants may become obsolete white elephants, giving way to more efficient nuclear-electric plants just as the horse and buggy gave way to the more efficient automobile. If this should happen, the Federal Treasury would never recover the millions it might pour into hydroelectric and related developments.

With millions, and possibly billions at stake, consideration of this possibility is absolutely essential if Congress is to act with responsibility in this day of swiftly moving scientific progress.

The proposed multi-billion-dollar upper Colorado River storage project is a specific instance.

Bills now before the Congress call for a spending authorization ranging from $1 billion to $1.8 billion on the upper Colorado River. They would construct numerous irrigation projects, the revenues from which could repay only 10 percent of their cost. Tied in the bills are expensive hydroelectric projects, the power revenues from which would be expected

to repay not only the cost of the power dams and installations, but also 90 percent of the cost of the irrigation projects.

Planning figures show that it may take up to 100 years to pay for these projects out of the hydroelectric power cash register.

Thus, for financial success, nuclear-electric energy must not be produced more cheaply than hydroelectric energy for at least 100 years.

What are the prospects in this regard?

Simply, that not in 100 years, not in 50 years, but in a much shorter time nuclear-electric energy will be produced much cheaper than hydroelectric energy.

Remember, just 15 years ago, in 1940 nuclear power was practically unheard of. By 1945, 5 short years later, the first A-bomb had exploded over Hiroshima. Research for peacetime use was so concentrated during the subsequent 10 years that today commercial nuclear-electric energy generating plants actually are being constructed.

The British Government announced a 10-year program for building 12 atomic power stations at an estimated cost of $840 million. The British say these plants will produce electricity at a cost of 6 mills per kilowatt-hour in comparison with their present convention generating cost of 7.2 mills.

United States cost figures prepared by James A. Lane, of Oak Ridge National Laboratory, show the average figure in this country for producing electricity in conventional steam plants is 7 mills per kilowatt-hour, while the cost in a nuclear plant would be 6.7 mills.

That is without considering that nuclear-electric plants can actually produce plutonium as a byproduct which can be sold for a high price, in the neighborhood of $100 a gram.

If this be done, there is little cost left for power generation to bear, and a reactor plant could put on the transmission line 1 or 2 mill current instead of 6.7 mill current. Even if the military demands become satisfied and the price of plutonium eases back to its fuel value of about $20 a gram, the sale of byproduct plutonium can be a substantial source of operating revenue.

That is why Representative CARL T. DURHAM, of North Carolina, Vice Chairman of the Joint House-Senate Atomic Energy Committee, just a few days ago predicted that atomic experts will develop a reactor in the next 2 years that will produce power as cheaply as oil, coal, or water.

Within 5 years, he said, atomic powerplants should be commercially competitive with present lower cost sources of power, which, of course are the hydroelectric plants.

During a speech in Los Angeles on February 15, Floyd B. Odlum, financier and president of Atlas Corp., predicted that by 1975 all electricity in the United States will be generated by uranium-based powerplants. He, too, said that even at present atomic energy is practically competitive with other fuels for the generation of electric power.

Using a cubic-inch block of wood as a symbol representing a similar block of uranium 235, Odlum said that 20 such little blocks of U–235 would supply enough energy to provide New York City with all its electrical needs for a 24-hour period.

Of course, there are numerous technical difficulties yet to be overcome in the production of nuclear electricity. But the fact is they are being overcome and sometimes in the very process of building nuclear-electric facilities.

Consolidated Edison of New York, one of the Nation's leading power producers, boldly announced only a month ago that it will soon build a nuclear-electric generating plant to add to its system.

Thus the problem is facing us squarely, and we cannot dodge it in connection with the Upper Colorado proposal. The Bureau of Reclamation and the Congress must have their eyes open to these facts of modern day life. There must be a clear-cut determination as to whether or not nuclear-electric energy developments will turn this proposed multi-billion-dollar expenditure into a dead loss. We cannot inflict such an enormous new burden on the Nation's taxpayers for several generations to come.

Therefore, Congress must hold thorough hearings on this point. It must even delay consideration of the legislation for a year or two, if need be, so that it may be evaluated in the light of results of nuclear-electric energy research and development now under way.

So that the Congress may be further informed I am backing up this plea by citing additional information collected over the past few weeks.

On March 27, 1954, the Joint Committee on Atomic Energy said in a report that—

> Economically competitive atomic power will be a reality in the United States within the next 10 years.

On March 9, 1954, Henry D. Smyth, member of the Atomic Energy Commission, said in an address:

> It is evident that we can build powerplants which will convert the energy released in nuclear fission into electrical energy to be fed into transmission lines.

The electric companies public information program said in a 1953 report:

> Nuclear power looms on the horizon as an energy source which might well become competitive with coal, oil, gas, or falling water in the next few years. Within the past 2 years nuclear heat has converted water to steam, from which electricity was generated.

In a report to Congress in July 1954, the AEC stated it could be reasonably expected that nuclear fuel would be economical enough to compete with conventional fuels in the foreseeable future. Atomic material costs have been brought to a record low, and ore processing developments have resulted in major reductions in the cost of fissionable materials and paid for themselves many times.

Thorium, which can be converted by atomic reactions into a fissionable material, is 3 or 4 times as plentiful as uranium, the report said.

Dr. John R. Dunning, dean of engineering at Columbia University, said on June 3, 1954:

> The important conclusion from the data is that already, with only about 10 years of any appreciable searching for uranium, we have completely reversed our position held in the immediate postwar period when most so-called experts were saying we couldn't possibly have enough uranium to build an atomic power economy.
>
> In this short space of time, there has come general agreement that our uranium reserves constitute the major fuel reserves in the world for the future. A figure something like 25 times as much energy in uranium as in coal, oil, and gas is now usually quoted.
>
> There, again, this figure has to be viewed as a tentative figure. It wouldn't surprise some of us too much to find there were 100 times as much energy in the form of atomic fuels as future progress develops in atomic energy release methods, atomic fuel recovery methods, raw material prospecting, and so on down the line.
>
> The important lesson is that our future energy reserves are abundant in the atomic field.

On December 20, 1954, the Associated Press reported from Washington in the Salt Lake Tribune:

> Within 20 years about twice as much electric power will be furnished by the atom as is now generated by waterpower, according to a private study prepared for the use of investor groups.
>
> The growth will represent conservatively a private investment of about $6 billion in nuclear-powered electric plants, it was estimated, of which more than $1 billion will go into reactors alone.
>
> The survey was made by H. Dewayne Kreager, metal and power specialist associated with John R. Steelman. Steelman, a top assistant to former President Harry S. Truman, now is an industry consultant here. Kreager until mil-1953 was the executive officer of the Office of Defense Mobilization.
>
> Labeled "an economic timetable," the survey predicted that from 1975 to the end of the century, 80 percent of all new generating capacity installed in this country will be atom-powered.
>
> * * * * *
>
> "The first 10 years should be regarded as an experimental period," the study says. "Nineteen hundred and sixty-five is the estimated and somewhat arbitrary date at which power from nuclear reactors is expected to become economically competitive with existing thermal (coal- or oil-fueled) plants.
>
> "However, 1965 is an outside date; competitive electric power from nuclear energy may come as early as 1960."

A 5-year program of the AEC will embrace 5 different reactor projects costing a total of $241 million.

The projects are:

First. A full-scale nuclear powerplant to be built by Westinghouse Electric and Duquesne Light near Pittsburgh.

Second. A boiling-water reactor to be built by the Argonne National Laboratory. This reactor promises to cut power costs substantially.

Third. A sodium-graphite reactor to be built by North American Aviation, Inc. This reactor may produce more atomic fuel than it burns.

Fourth. A fast breeder reactor to be built by Argonne.

Fifth. A homogeneous reactor to be built at Oak Ridge.

In March 1954 a report of the Joint Committee on Atomic Energy stated:

> There is real confidence that atomic power can be produced at a cost competitive with fossil fuels such as coal and oil within the next decade by exploring these five approaches.

Lawrence R. Hafstad, Director of Reactor Development for the AEC, said, on July 21, 1954:

In uranium we have what promises to be both a compact and a cheap source of energy. * * * One pound of uranium, about a cubic inch, contains as much energy as * * * 1,500 tons of coal. That this energy promises to be cheap, we can see by calculating the cost of the 1,500 tons of coal. At $8 a ton, this would be in the neighborhood of $10,000, whereas the cost of 1 pound of uranium is more like $20.

A story in the New York Times, December 12, 1954, said:

Leaders of the Nation's $25 billion electric light and power industry have come to the conclusion that they must build nuclear reactors. This decision has been reached despite the greater efficiency of coal at present for generating steam for power.

In a private report being sent to the executives and engineers of the country's power companies, emphasis is placed on atomic fission as the future source of energy. * * *

Some of the finest atomic engineering minds in the country put the findings together after considerable research. The report is being issued by the electric power companies information program (PIP).

"The consensus of opinion is that within 10 years, or possibly sooner, private industry will cross the threshold of economic nuclear power," the study says.

Congress has appropriated more than $13 billion for atomic energy activities.

The Atomic Energy Commission already is the world's third largest business. Only Metropolitan Life Insurance and American Telephone & Telegraph have greater assets. Physical assets owned by the AEC are considerably larger than such assets of General Motors and Standard Oil of New Jersey. If the present expansion program continues, the AEC will soon be the world's largest single enterprise.

More than 150,000 persons were given employment under the AEC program in 1953.

Faced with a growing shortage of coal for power generation, Great Britain has turned to the development of commercial nuclear power reactors as before noted. "This is a historic day for Britain," declared Geoffry Lloyd, Minister of Fuel and Power, when he announced the plan to Parliament February 15. He spoke of tremendous prospects that offer possibility of a new industrial revolution.

Canada is completing a big reactor, after which private enterprise will be permitted to develop commercial nuclear power.

Norway and Sweden are engaged in extensive work to develop nuclear power for commercial use.

Brazil, Australia, and India are at work to develop nuclear power for commercial use.

The Edison Electrical Institute said in its 1953 report:

Commercial utilization of nuclear energy * * * could result in important conservation of the Nation's reserve of fossil fuels, a highly desirable long-range objective. Moreover, this potential sources of fuel may ultimately provide a means for reducing fuel costs at central stations.

On February 17, 1954, President Eisenhower said in a message to Congress:

In 1946, too, economic industrial power from atomic energy sources seemed very remote; today, it is clearly in sight * * * largely a matter of further research and development.

Foreign Aid Cost to the United States for 1953 Exceeded All Payments to Operate Our Government, Including Checks to Individuals, by $831,061,737

EXTENSION OF REMARKS

OF

HON. USHER L. BURDICK

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. BURDICK. Mr. Speaker, the following tables will point out just how our Government expense account audits up, and shows how much money we spent and on what project spent, during 1953. We hear many complaints about the cost for old-age assistance, assistance to dependent children, the crippled and the blind, aid to veterans and hospitals for veterans, the agricultural conservation program, unemployment compensation, readjustment benefits to veterans.

Here is the actual accounting sheet:

Grants to States and local units

ACTIVITY AND TOTAL AMOUNT TO ALL STATES	
Agricultural experiment stations, grants	$12,285,308
Cooperative agricultural extension work	31,485,726
National school-lunch program, grants	81,665,047
National forest fund, shared revenues	17,608,984
Submarginal land program, payments for	448,049
State and private forestry cooperation	10,275,566
Removal of surplus agricultural commodities	66,024,948
Commodities donated by CCC to schools	12,986
Federal airport program, CAA	26,990,836
Bureau of Public Roads, highway grants	515,444,540
Bureau of Public Roads, emergency grants	1,866,254
Support of State maritime schools	266,432
Lease of flood-control lands, Army	869,051
Federal aid, wildlife restoration	12,474,131
Distribution under Minerals Leasing Act	17,010,013
Distribution from receipts, Migratory Bird Act	485,694
Payments to States from grazing receipts	7,190,714
Unemployment compensation and service	197,779,364
American Printing House for the Blind	185,000
Office of Vocational Rehabilitation	22,244,093
Colleges for agricultural and mechanical arts	5,030,000
Cooperative vocational education	25,420,754
School construction, and survey, grants	118,308,139
Maintenance and operation of schools, grants	65,994,669
Venereal disease control, grants	7,162,260
Tuberculosis control, grants	5,300,000
General health assistance, grants	13,536,970

Grants to States and local units—Continued

ACTIVITY AND TOTAL AMOUNT TO ALL STATES—continued	
Mental health activities, grants	$3,049,736
Cancer control, grants	2,894,666
Heart disease control, grants	1,348,104
Water pollution control, waste, studies	1,113,416
Hospital construction and survey	109,302,421
National Cancer Institute, grants	2,301,773
National Heart Institute, grants	1,685,740
Old-Age Assistance, regular grants	899,390,252
Aid to dependent children, grants	338,549,221
Aid to permanently disabled, grants	59,317,125
Aid to the blind, grants	32,668,872
Maternal and child health services, grants	13,299,919
Services for crippled children, grants	11,814,776
Child welfare services, grants	6,388,437
Housing aids of all kinds, grants	30,715,401
Disaster relief	4,629,128
Civil Defense Administration, grants	13,890,743
Federal Power Commission, payment to States	33,531
State and Territorial homes for veterans	3,722,190
Supervision, on-the-job training, veterans	1,890,574
Self-employment allowances for vets	242,156
Grants-in-aid	2,802,365,266
PAYMENTS DIRECT TO INDIVIDUALS	
Agricultural conservation program	$206,797,815
Administration Sugar Act, subsidies	61,210,169
Farm Housing Repair program, grants	56,310
Forest Highways, Bureau of Public Roads	22,334,373
State marine schools (4 States only)	273,298
National Guard and Air Guard	150,941,660
Unemployment compensation for veterans	25,907,392
Research grants, several fields, total	21,052,428
Traineeship awards, several fields, total	2,230,488
Teaching grants, etc	6,661,928
Fellowship awards, grants, total	1,784,673
Autos for disabled veterans	18,223,614
Readjustment benefits for veterans	734,073,888
Total payments to individuals	1,251,576,528
Plus grants-in-aid	2,802,365,266
Grand total (1953)	4,053,941,794

Compare that total of $4,053,941,795 to the total handed out to foreign countries during the same period of time. This total was $4,885,003,528.

The only place we can save money, and take off the backs of the people the onerous load of taxes, is to do it by cutting down this foreign aid. We cannot reduce our appropriations for national defense; we cannot do less than we have for the people of the United States—we should do more—but we can plug up this hole through which our billions are going in foreign aid.

The figures are taken from the News Bulletin No. 45, issued by Paul Peters.

As Things Look to Me

EXTENSION OF REMARKS
OF

HON. ORVIN B. FJARE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. FJARE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following speech by Mr. Ancher Nelsen, Administrator of Rural Electrification Administration, entitled "As Things Look to Me":

AS THINGS LOOK TO ME

(Address by Ancher Nelsen, Administrator, Rural Electrification Administration)

Years ago in Minnesota we had a farm magazine called the Farm Stock and Home, and a former editor of that paper by the name of Harry Owens used to write a column entitled "As Things Look to Me." Harry would tell us each month just exactly what was on his mind, what he thought was right and what he thought was wrong. He gave his own opinion and appraisal of happenings of the day and these expressions represented his honest views. As a result, his readers eagerly followed his column month after month.

I am going to borrow that column heading to use as the title of my speech here today. I want to emulate also Harry's forthrightness in stating the facts as I see them as I give my annual report to the farm people who make up this rural electrification program.

This opportunity to speak to so many of you people who have the first-hand responsibility to your farm neighbors for the management of the rural electric system over the country is to me a real challenge. As co-op directors, you are carrying a responsibility which I used to have in my own co-op, and actually I feel more at home talking with you whom I consider fellow directors than in talking as REA administrator.

As directors and officials of the rural electric systems, you are the custodians of a great trust which your neighbors and friends have placed in you. You share in responsibilities which are common to all of us in this program. The fact that more than 9 out of 10 of our farms today are enjoying central station electric service does not mean that the trust has been discharged. No, not by any means. In some respects, your responsibilities are just starting.

We in REA have responsibilities too. Most of them are similar to yours, area coverage, financial soundness, adequate low cost power, self-reliance. These are among the things that concern you as well as REA.

Since coming to REA from my local co-op now nearly 2 years ago, I have tried to keep a clear picture in my mind as to what our job should be and with the help of the many dedicated people we have in REA, we have sought to shape a program of action aimed at getting those jobs done. What we have is a program that is working effectively on many fronts.

I want to make use of this opportunity here today to give you a report of that comprehensive action program and the progress we are making toward the major REA goals. If you will accept this report with an open mind, weighing fairly what has been done, I am convinced you will agree that REA has gone forward so that today rural electrification stands more firmly on solid ground than ever before.

Let us outline the major jobs that we have before us and then appraise what we have done about them.

First, there is area coverage.

REA was established in the first place to accomplish this job. The REA borrowers came into being to accomplish this job. It is a responsibility that is shifting more and more to you, the borrowers. REA continues to have the financing part of the job but, in the final analysis, whether or not area coverage is achieved depends upon what you do.

During the last year the percentage of farms electrified moved a little nearer the 95-percent mark. REA approved loans in calendar 1954 that will finance central-station electric service to a total of 116,000 consumers, a substantial increase over the year before.

Loans are the first step in area coverage and we have sought to speed up our handling of loan applications. We adopted a fast, hard-hitting type of organization, with competent people in the key jobs, and we cut redtape to the bone. This has speeded up our handling of loan applications, and we have been able to cut down the backlog of applications to just about half of what it was a couple of years ago. There will, of course, always be some backlog but the present situations means that there is a minimum of delay for borrowers in getting their loans approved.

Moving over into the telephone program, we have proceeded diligently to speed up operations there too, and we believe that new preloan engineering procedures now in effect will speed things up still more. In calendar 1954 we made more than $66 million in telephone loans, more than in any other calendar year since the program began. More than 100,000 rural homes now have received new or improved service through the program, and construction is proceeding at a good pace.

One of the big difficulties in the telephone program is to get enough qualified telephone engineers. We need them for our own staff and there is alsd a need for more private consulting engineers to work with borrowers.

Good progress in the telephone program requires a high degree of industrywide cooperation. Every borrower must have connecting arrangements of some sort—always for nationwide long-distance service and usually for local service into trading centers as well.

Our endeavor has been to cultivate an atmosphere of understanding and cooperation with the industry. In turn we have expected their cooperation. Gradually much of the distrust and misunderstanding is being overcome. We have repeatedly indicated that we are not interested in building an empire in the telephone field. We are only interested in making telephones available to the farmers. To the extent the industry is financially able and willing to do this, that is fine. Where the industry can't, REA will push ahead as hard as it can to find ways for doing the job.

From President Eisenhower on down the administration objective in both the electric and telephone programs is to meet the needs. The needs are being met and there is going to be money left over.

When this fiscal year has been completed, we will have made another reduction in the backlog of loan applications and there will be a total of $56 million of surplus loan funds that will not have been used. Remember that statement.

In one State as of now, it seems likely that the State allotment formula will handicap the making of loans, but keep this one thing in mind: more money is not the solution to that difficulty.

If we were going to circumvent the law by asking Congress to pour extra appropriations into the State allotment formula, it would take a truly fantastic additional loan authorization. The figure would be something like $250 to $350 million and we would end the year with a carryover of unused loan funds of about $300 million.

The sensible answer is to remove the State allotment formula from the law. That is exactly what we have asked the Congress to do.

In the early days of the REA program this formula served a useful purpose in making sure that the lines were built where the need was the greatest. Today, it is no longer needed with almost every State at or above the 90 percent level of connected farms. It is obvious that the greatest need for loan funds will be in those States where improvements are needed in systems already built and in those States that need new or extra sources of power.

Briefly, the need of funds in the various States can no longer be measured accurately on the basis of farms without electricity. On the contrary, the size of the REA program in the State will be the principal determining factor as to how much will be needed.

As to our new budget it recognizes greater loan requirements next fiscal year than this. The 1956 budget provides for $20 million more than the amount loaned in each of the last 3 years.

Incidentally, I want to thank all the borrowers which cooperated with us so extensively in our survey of loan needs. We obtained responses from more than 80 percent of the borrowers.

In addition to the funds being provided in new loan authorization, there is still nearly a half billion dollars of approved loans that has not yet been drawn by the borrowers, so it is hard to think that any borrower can be hurting for lack of construction funds. If there is, I would ask this fact be brought to our attention.

In this 20th year of the program, however, area coverage is primarily a responsibility of the systems serving the rural areas. Area coverage can never be completely realized unless they continue to forge ahead toward this objective.

How many of REA's borrowers actually have 100 percent area coverage in their proper service area? That is a question that you should ask yourselves. Here are some of the questions you ought to consider:

Have you determined the geographical area within which you should be responsible for seeing that electric power is available?

Have you recently surveyed this area? If not, shouldn't you do so to determine if there are people without service who rightfully look to you for service?

Have you developed plans which you are carrying out that will make electric service available on a sound and businesslike basis to all those people?

If not, what should you do about it? What do you think REA should do to help you?

We can see as we travel over the country that progress toward area coverage has been made. What's before us now is a challenge of seeing to it that you, with the help of REA, can finish the job so well begun.

The second major responsibility, as I see it, is to build financially sound systems. That is another responsibility shared by both REA and the borrowers. Certainly the Government's stake is great. The REA loans will soon total $3 billion, and the only way to get this repaid—as it is being repaid—is to have financially sound businesses.

Although the Government's stake is large, ours as rural people is even larger. We must build financially sound electric systems so that we can be sure of continuing to have the benefits of electricity in our homes and in our farming operations.

From REA's standpoint, our action program is geared to approach this matter of loan security from several angles.

First of all, I would like to say a good word about the work of the Management Advisory Committee which represents your association in the field of management. The group executive training meetings and management improvement activities that this

committee has helped push along constitute one of the most significant developments of the last year. If this work is continued and expanded as it should be, it will do more for the future safety of rural electrification than any other single thing that I can think of.

Conversely, if serious financial reverses or defaults should occur, it would give the program a real body blow. Just at this time, we face one of the most serious threats of this type that has ever confronted the program. We have one borrower that is in a hopeless financial condition, and a loss amounting to upward of a half million dollars is possible if it goes under. Even though this loan was made before I became Administrator, I certainly don't want to see the program get such a black eye and we are giving the situation our closest attention, working with every agency we know of that can help.

In the program as a whole, we are working with co-op directors and managers not only in identifying the difficulties that may lie in the future but in drawing upon the kind of practical and tested skill and experience that is needed if we are going to have financially sound systems in the future.

One point on which we have the opportunity to draw upon this experience resource is in connection with capital credits. A number of people from many areas have raised questions with us as to the capital credits plan and we have it under examination with the air of bringing about improvements as these can be developed.

We proudly point to the fact that of the approximately 1,000 borrowers, only 14 are delinquent in their loan repayments. However, a look at the principal and interest payments that will come due in the period ahead will illustrate that we cannot be complacent but must plan carefully for the future. In 1954, the amount due on loans was about $72 million. By 1958, it will amount to $116 million. In other words, this debt amortization load will increase 50 percent within a short period of 4 years.

How well prepared is your cooperative to meet your future obligations so that you can maintain a sound, enduring business?

One way to answer this is to calculate how you would stand if you faced your full amortization schedule today. We have made that calculation for all of the borrowers, and we have found that nearly a fourth of the borrowers would be in some financial trouble to a major or minor degree in that case. I am happy to report that as a result of our joint efforts with borrowers, about three-fourths of those systems with financial problems have achieved some improvement in their position during the past year.

Another interesting thing we have found is this: Of the total number which need to do something to improve their future outlook, about half are selling less electricity than was figured at the time the loan was made. If they were meeting these estimates, they would be out of the woods.

That is one of the reasons why we started last spring to strengthen the power use program and get some results in the form of load-building. This program is tremendously important to you as a director responsible for the successful operation of your power system and it is even more important to you as a farmer who has much to gain from the use of electric power.

The big thing that was done in this program was to organize the Inter-Industry Farm Electric Utilization Council, headed by Deputy Administrator Fred Strong. Today, through this council's efforts, borrowers in most States are working in cooperation with all segments of the electric industry and with the colleges and extension service. It is a game where everybody wins—the REA borrowers, the electric appliance people, the power companies, who serve part of the farms directly and sell you more than $50 million a year in wholesale power. And the one who will benefit the most from this power-use program is the farmer himself as he makes more profitable use of electric power on his farm and in his home.

My third point has to do with our goal of adequate low-cost power.

During 1954, we made major progress in improving the supply of electric power in rural areas. REA has been determined to work with borrowers in whatever direction promises better and cheaper service for the farmer, whether it be generation or buying wholesale or a little of both. We have made generation and transmission loans where these have been necessary and we have encouraged integration and interconnection where this approach has been to the borrowers' advantage. From the standpoint of the long-range view, we are keeping a careful eye on developments which may lead to lower cost power whether it involves conventional fuels or atomic energy.

As I have previously stated, I believe the REA authority to make G–T loans is important to the farmers. It is a fundamental part of the REA program and must be preserved. To keep it we must use it wisely. This is our aim and we are making G–T loans where they are the means to lower cost electricity for the farmer.

We approved G–T loans in 1954 in the amount of more than $40 million. This was nearly a quarter of all the loans approved by the Agency during the year, slightly higher than usual for the Agency through the years.

We were providing financing that will boost the generating capacity of the cooperatives by something over 100,000 kilowatts. At the same time, loans already approved were making possible the construction of a recordbreaking amount of generating capacity. During the calendar year 1954, REA borrowers in 10 States and Alaska put into service more than 200,000 kilowatts of generating capacity. This is more capacity than there was in service on all REA-financed generating plants on January 1, 1948. This new capacity sets a record for any one year of the program.

You don't get very far into this matter of power supply before you run up against the question: Do we get it alone or do we engage in an effective cooperative effort with all other segments of the electric industry?

It seems to me that the only sound approach to that question is to think about what is best for the farmer, because the program was set up to benefit him. Looked at from that viewpoint, the cases where it will pay to go it alone are mighty few and far between.

We have learned by experience that an isolated system of relatively small capacity means high-energy costs and requires standby capacity that adds to the expense. During the past year, an alarming number of distribution borrowers have come to us because they feel their rates are higher than their distribution systems can continue to stand. Some are paying their wholesale bills under protest and some have requested that we agree to their release from their contracts to buy power from their own G–T systems. Developments of this kind, unless solutions are worked out, might well be a threat to the future of the G–T co-op which in turn would be a blow to the whole program. It underscores the need to move forward soundly and carefully.

These are some of the reasons why we have recommended that consideration be given to interconnections where capacity can be merchandised into a power pool and peaking capacity purchased, resulting in a better power rate to the farmer and in turn protecting the distribution cooperatives. Interconnection and integration agreements were actually completed in three States during the past year, while in other instances studies are under way to see what the possibilities might be for savings. In one case, the co-op saved about $3 million in transmission lines, and in another a co-op saved close to a million dollars by exchanging with a power company and alternating the installation of new generating capacity.

Half the power input of your systems is being purchased from power companies at this time. Generally speaking, you are getting better rates than in earlier years. The average rate of power company purchases today is 8.2 mills as compared with 12.4 mills 15 years ago. The cost of power through G–T federations is higher, although it is improving gradually. I anticipate that further reductions in costs of power produced in REA-financed generating plants will be achieved through the marketing arrangements like the ones I have mentioned.

Another question for us to consider as Government officials and as electric co-op people is: What about the challenge of atomic energy?

Nobody can say for sure that atomic energy will lead to cheaper production of power than the fuels we are presently using. However, we have tried to gear our operations on the assumption that this will be the case because we want the farmer to benefit along with other consumers if it is.

For approximately a year, we have been working with the Atomic Energy Commission. We have asked for and received security clearance for five of our top people and through them we keep advised on the progress and research and development in that field and also are able to keep the Commission informed as to our needs.

The suggestion has been made that REA should employ physicists, metallurgists, and other specialized personnel for experimental work in the atomic field. However, we have been assured by AEC that people on its staff will give us the help we need at no additional cost to REA or to the taxpayers. This would appear to be the wise and effective course, and it is the course we intend to follow.

At the present time, we are contacting borrowers which are planning construction of generation plants. We are seeking to determine their interest in looking into the possibilities of nuclear power as a source for generating electricity. Where any of them is interested, we will help them get security clearance so that they can work with AEC and us in getting the up-to-date information they need to make their decision.

On the basis of information available to our people who are working with the Atomic Energy Commission, the prospects are not bright for obtaining power cost reductions in the near future through the use of atomic energy. As of now, nuclear power reactors are in a developmental state and their costs are therefore high. Commercially atomic energy is not yet competitive. Moreover, there are questions of service interruptions, site of plant locations and liability that have a bearing on the consideration of this matter.

At the same time, AEC's research is steadily going forward and we must keep up with it. In that way, we will keep informed and we will take advantage of every development that gives concrete assurance of a lower cost power source that will be dependable and feasible. We are determined that the REA co-ops will be able to move into the atomic age just as soon as it makes economic sense to do so.

In these days we are in the midst of a great debate on what our national power policies ought to be for the future. It is good that this debate is going on. But let us not permit emotionalism to decide the course for us. One of the questions before us is this: What is the proper role of the Government in the electric-power picture? We know that many have decidedly strong points of view on what the answer should be. I do not pre-

tend to be a judge on this but I am impressed by that large group of our citizens who do not see a solution in any extreme—rather in a moderate program that will harness both our natural resources and our private capital for the benefit of all our people.

What is the role of government?

Lincoln said—as we have frequently heard quoted—"The legitimate object of government is to do for a community of people whatever they need to have done but cannot do at all or cannot so well do for themselves."

That certainly spells out a job for government. But the rest of that Lincoln quotation is this, and I quote: "In all that the people can individually do so well for themselves, government ought not to interfere."

And that spells out a job for you and me as private citizens. I am convinced we will be better off if we spend at least as much time and thought trying to figure out how we can do things for ourselves as we sometimes spend trying to figure out how we can get government to do things for us.

Thomas Jefferson's view on that subject was this: "Were we directed from Washington when to sow and when to reap, we should soon want bread."

And that brings me to my fourth point—that of borrower self-reliance. The rural electrification program is free enterprise. We own and operate our system. We have borrowed money to build our lines. We intend to pay it back. We are proud of our accomplishments to date. Likewise, we need to remember that there are others who have invested their savings and facilities who also deserve tolerant consideration on our part. We should always be willing to give the same degree of attention, respect, and recognition to the problems that others face. Commonsense and mutual understanding are not always easy to achieve, and the test of leadership is to find answers through those means.

It is sometimes tempting and easy to be critical, but there are many constructive things to be talking about. In the words of the popular song, let's "count our blessings instead of sheep."

Counting our blessings, we find that Congress in its wisdom and generosity has made some $3 billion available as loans to you and me so that we might have electric and telephone service.

We find that human ingenuity has designed and built more efficient equipment so that in spite of commodity cost increases, you and I are able to buy electricity cheaper today than ever before.

We find that a farm today can enjoy a telephone, running water, freezer, television, and countless other home appliances, as well as milking machines, hay driers, and motor-driven devices by the score for farmstead chores.

Taking stock of these and the many other blessings we enjoy, let us not lose sight of the fact that these are times of international tension and peril. We must keep our program in its proper perspective, mindful always of the overall interests and problems of our country. As President Eisenhower has said, "Citizenship is not just a privilege, but also a responsibility."

Looking to the future, we, the directors, managers, and officials in this rural electrification program need always remember that the best insurance we can get for the program is to establish in other people confidence in us and in our integrity.

I know that every employee of REA joins with me in expressing the hope that our handling of your business with REA will merit your confidence because of our performance.

If all of us in the program are fair, tolerant, and sound—if we are willing to hear all the facts in regard to a question—we will be accepted with dignity and we need have no fear that any force can destroy the program.

Think back to your own community and recall the men well regarded and who have earned roles of leadership and influence. You will find their stature has grown from conduct guided by fairness, soundness, and reasonableness.

So as we look to the future of our program let us remember the principles that have proved to be of enduring quality. There is a quotation hanging on the wall in a Missouri co-op which goes like this:

"Four ways to test:

"1. Is it the truth?

"2. Is it fair to all concerned?

"3. Will it bring good will and friendship?

"4. Will it be beneficial to all concerned?"

Proceeding on such a basis, I am sure, will lead the way to a great future for rural electrification.

William Wallace Royster

EXTENSION OF REMARKS

OF

HON. EUGENE J. McCARTHY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. McCARTHY. Mr. Speaker, today, March 7, is the 83d birthday of William Wallace Royster, a former resident of Glenwood, Minn., and now of Vallejo, Calif.

Numerous railroad employees, especially those of the old days, value the contribution that Mr. Royster made to the idea of a pension plan for railroad employees. Many old-timers of the railroads have expressed deep and heartfelt gratitude for Mr. Royster's efforts.

His story, as told to me by Gottfrid Lindsten, is that after completing his run as a Soo Line engineer in Minnesota, Mr. Royster worked into the late night hours to develop a railroad pension plan that was one of the earliest of these plans.

The essentials of a pension plan were developed in 1928 by Mr. Royster, when various railroads offered gratuity pensions to such employees as the management considered worthy, which pensions could be terminated at will by the railroads. In these plans discrimination was possible, but Mr. Royster's plan sought to eliminate possible injustices of the gratuity plans, making it obligatory for the railroads to pay pensions to qualified employees. His plan, printed in pamphlet form, was filed with the Minnesota Historical Society in St. Paul and with the Smithsonian Institution in Washington.

Many railroad employees supported Mr. Royster's plan; many joined his movement to effect such a plan. Their efforts, as well as those of many others, were successful when the Railroad Retirement Act was passed by Congress and signed into law by President Franklin D. Roosevelt.

It is fitting, therefore, that William Wallace Royster be remembered publicly today as he is remembered by many of his friends and coworkers, the old-timers of the Nation's railroads.

Rubber Plant Disposal

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. CELLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement made by me before the House Armed Services Committee, Thursday, March 10, 1955, in opposition to proposed disposal of Government-owned synthetic rubber facilities, in pursuance of Public Law 205 of the 83d Congress:

There are some antitrust and small-business facets in the rubber producing facilities disposal program which I should like to comment upon.

When we passed Public Law 205 in the 83d Congress, the development of a free competitive synthetic rubber industry was stressed by section 3 (c) which reads as follows:

"SEC. 3 (c). From the time of its appointment and throughout the course of the performance of its duties, the Commission shall consult and advise with the Attorney General in order (1) to secure guidance as to the type of disposal program which would best foster the development of a free competitive synthetic rubber industry, and (2) to supply the Attorney General with such information as he may deem requisite to enable him to provide the advice contemplated by this section and sections 9 (a) (4) and 9 (f) of this act."

Section 17 of the act reads as follows:

"SEC. 17. The following criteria, together with such other criteria as the Commission deems necessary or desirable to best effectuate the purposes of this act, shall be used by the Commission in arriving at its recommendations for disposal:

"(3) That the recommended sales shall provide for the development within the United States of a free, competitive, synthetic rubber industry, and do not permit any person to possess unreasonable control over the manufacture of synthetic rubber or its component materials."

Most of these plants are scheduled for transfer to companies and entities which, to say the least, have a very bad antitrust record. That augurs little if any expectation for free and open competition in the synthetic-rubber industry. The prospective plant purchasers include rubber and oil companies whose records raise serious doubt that their operations will make for a competitive synthetic-rubber industry. Each of the big-four rubber companies, Goodyear, Goodrich, Firestone, United States Rubber, among the successful bidders, has lost 4 to 6 antitrust suits in this country and Canada since World War II. Several of the other rubber companies and chemical companies participating in the proposed purchase also have been branded as offenders in one or more antitrust suits in recent years. Significantly all but 1 of the oil companies involved in the purchase are even currently defendants in a Federal antitrust suit or a State of Texas antitrust suit or both, and several of the oil companies in addition have lost 1 or 2 other such suits in the past 20 years. In effect, the present disposal program would transfer almost the entire synthetic-rubber industry to corporations which in the past have taken active steps to limit competition, to fix prices, to establish quotas—all to the detriment of a free-enterprise system and to the detriment of small business and with a "consumer be damned" attitude.

One cannot easily swallow the Attorney General's opinion in approval of the disposal program that these companies will best foster the development of a free competitive synthetic-rubber industry.

Let me point out specifically some of the cases brought by our Government against these companies which indicate that they have actively combined and conspired to restrict competition and to fix prices in rubber products and petroleum products and chemicals, and in such minor items as storage batteries, brake lining and peach-pitting machinery. One of the parent companies of the lesser participants stands accused in a pending suit monopolizing air transportation.

Here are some of the cases:

1. In *United States* v. *Rubber Manufacturers Association et al.*, the Big Four, Firestone, Goodrich, Goodyear, and United States Rubber Co., plus Dayton, Seiberling, and others, were charged with combination and conspiracy in restraint of trade in tires and tubes, from 1935 to 1947. They pleaded nolo contendere, and were fined $5,000 each.

2. In *United States* v. *The Metropolitan Leather & Findings Association, Inc.*, in 1948, Goodyear and others were charged with price fixing in rubber heels and soles, and were fined.

3. In *United States* v. *United States Rubber Co. et. al.*, United States Rubber and Dunlop Rubber Co., Ltd., were charged in 1948 with illegal cartel arrangements in latex; they took a consent decree in 1954.

4. In *United States* v. *Sears, Roebuck & Co. et. al.*, filed in 1952, Sears and Goodrich were held to be in violation of the Clayton Act by having a common director; he later resigned from the board of Sears.

5. In 2 1950 cases, 1 civil, 1 criminal, both known as *United States* v. *Association of American Battery Manufacturers*, Sears, Firestone, Goodrich, Goodyear, and others, were charged with price fixing and exercise of monopoly power to exclude competitors, among other things. They pleaded nolo contendere to one count in the criminal case, and took a consent decree in the civil case.

6. In *United States* v. *National City Lines, Inc., et al.*, also two cases filed in 1947, Firestone, Phillips, Standard Oil of California, and others, were charged with conspiracy, restraint, and monopolization of trade in the sale of buses, petroleum products, and tires and tubes. The charges went back to 1937. In the criminal case, the jury found them guilty on one count in 1949. The civil suit, involving injunctions against future violators, was still unsettled in 1954. Regulation of trade by law suit is sometimes a slow business.

7. Three Canadian antitrust cases are very enlightening. These are *Regina* v. *Goodyear Tire & Rubber Co. of Canada, Ltd. et al.* (mechanical goods); *Regina* v. *Firestone Tire & Rubber Co. of Canada, Ltd. et al.* (tires); and *Regina* v. *Dominion Rubber Co., Ltd. et al.* (rubber footwear).

In the first case, Goodyear, Goodrich, Dominion (the Canadian subsidiary of United States Rubber), Dunlop, and one other, pleaded guilty to conspiring to prevent or lessen competition from 1936 to 1952, and were fined $10,000 each. In the tire case, Firestone, Goodrich, Goodyear, Dominion, Dunlop and others, pleaded guilty to charges covering the period 1937 to 1952. They were fined $10,000, the then maximum fine, which the judge noted was wholly inadequate. The prosecutor estimated the companies had "illegally extracted" $1,300,000 a year for the 15 years they admitted operating the tire combine. The companies are reported to have replied that they were forced to band together for mutual protection during the depression. Banding together for mutual protection could be much more profitable in the United States, particularly if they own the GR–S plants which they now seek.

Dominion and Goodrich, and others, pleaded guilty in the footwear case, and were fined $10,000. The charges included identical product specifications and identical prices.

Canada has now removed the top limit on antitrust fines, permitting the court to assess such fines as the cases warrant. This should be a much greater deterrent than our $5,000 maximum fine.

In the *Regina* v. *Firestone* case, the Canadian High Court said as follows:

"Between the 1st day of January 1937, and the 31st day of October 1952, within the jurisdiction of this Honourable Court, they" (the defendants) "did unlawfully conspire, combine, agree or arrange together and with one another to unduly prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation or supply in * * * the Province of Ontario, * * * and elsewhere in Canada* * * of * * * rubber tires (casings) and rubber tubes for passenger vehicles, trucks and buses, agricultural and road implements and tractors and related products including tire and tube accessories, automotive accessories and tire repair and retread materials, and did thereby commit an indictable offence contrary to the provisions of the Criminal Code, section 498, subsection 1 (d)."

"Each of the accused corporations entered a plea of guilty and thereupon evidence was presented by the Crown to establish in a general way the nature and extent of the operations of these companies which resulted in this prosecution.

"In the view I entertain the maximum penalty of $10,000 provided by the code is wholly inadequate to meet the ends of justice, even as a punishment to the least of these offenders. This law has been in force for over 50 years and its provisions are, or should be, well known to the businessmen of this country. Their actions were cold-blooded, calculated, and deliberate violations of the law of the land and call for as severe a penalty as can be imposed within legal limits, both to mark the court's condemnation of the enormity of the offense from the standpoint of punishment, and for its deterrent effect upon other potential offenders. It is the sentence of this court that each of the accused shall pay a fine of $10,000 and that they be condemned to pay the costs incurred in and about the prosecution and conviction for the offenses of which they have been convicted, forthwith after taxation thereof."

In the case of *Regina* v. *Dominion Rubber Company, Ltd., et al.* the High Court of Ontario said:

"There were countless meetings and agreements among representatives of the accused and their co-conspirators at which an elaborate system of classifying their commodities was arranged, identifying them by common number. * * * A casual study of the analysis of common prices which resulted from these agreements, filed as exhibit A–3, will reveal how well they succeeded in maintaining an identical price level."

Now, let us take some of the cases against the oil companies who were successful bidders.

Standard Oil Co. (New Jersey), which controls both Esso Standard Oil Co. and Humble, was charged in 1942 with conspiracy with I. G. Farbenindustrie in two cases involving synthetic rubber. They pleaded nolo contendere in one case and took a consent decree in the other.

Several oil companies involved in the bidding for the synthetic rubber plants were also involved in losing two cases filed in 1936. *United States* v. *Standard Oil Co. (Indiana)*, a price-fixing case, was appealed to the Supreme Court under the name of *United States* v. *Socony-Vacuum Oil Co. et al.*, and conviction was sustained as to Phillips, Continental, Shell Petroleum Corp., and Empire (the predecessor of Cities Service). Continental and Cities Service make up Petroleum Chemicals, Inc.

The other 1936 case, also called *United States* v. *Socony-Vacuum Oil Co., Inc.*, concerned fixing jobber margins. In 1941 nolo pleas were entered by Cities Service, and an officer each of Empire, Shell, and Continental.

Among the 38 defendants pleading nolo contendere in *United States* v. *General Petroleum Corp. of California et al.*, a 1939 case charging illegal price raising and price maintenance, were Shell Oil Co., Standard Oil Co. of California, and the Texas Co. Fines were $4,000 for Texas, $4,500 for the other two.

Still pending is a suit brought by the present Attorney General, *United States* v. *Standard Oil Co. (New Jersey) et al.* Standard, Gulf, the Texas Co., Standard of California, and one other, are charged with attempting to secure and exercise control over foreign production and supplies of petroleum and petroleum products, to regulate imports in order to maintain a level of domestic and world prices agreed upon by the defendants, and to divide world foreign producing and marketing territories.

The State of Texas has an antitrust suit in the State courts against 10 major oil companies, including Cities Service, Continental, Gulf, the Texas Co., Humble, Phillips, and Standard Oil Co. of Texas (a subsidiary of Standard of California). This case was brought by PRICE DANIEL, then attorney general of Texas, now a Member of the Senate.

United States v. *Food Machinery and Chemical Corp. et al.*, involving monopoly of peach-pitting machinery, was settled by a consent decree last August.

Several of the companies which make up American Synthetic Rubber Corp. appear among the antitrust case losers. American Cyanamid Co., the largest stockholder in American Synthetic and scheduled to be its exclusive selling agent, has been in three cases. *United States* v. *Allied Chemical & Dye Corp.*, filed in 1942, and ended by nolo pleas in 1946, charged price fixing at exorbitant levels in dyestuffs. Cyanamid and one of its officers were each fined. A subsidiary, American Cyanamid & Chemical Corp., was a party to some chemical antitrust cases filed in 1942, and settled in 1945, by nolo pleas. The cases all charged price fixing. Cyanamid & Chemical was fined $7,500. In *United States* v. *Standard Ultramarine and Color Co. et al.*, American Cyanamid took a consent decree in October 1954, on charges of fixing and maintaining prices and allocating sales of ultramarine blue and laundry blue.

Anaconda Wire & Cable Co., a stockholder in American Synthetic, is a subsidiary of Anaconda Copper Mining Co. Two other Anaconda subsidiaries, Anaconda Sales Co. and Greene Cananea Copper Co., were named in *United States* v. *Climax Molybdenum Co., et al.*, in 1942, a price-fixing and competition-control case, which ended in a consent decree.

General Cable Co. and Phelps Dodge Copper Products Corp. are stockholders in American Synthetic, and have been together before; they took a consent decree in 1948 in *United States* v. *General Cable Corp., et al.*, a cartel, price-fixing, and development-suppression case.

Dewey & Almy Chemical Co. is a part of American Synthetic, and has recently been acquired by W. R. Grace & Co.; Grace, Pan American World Airways, Inc., and Pan American-Grace Airways, Inc., are defendants in a Sherman Act case filed in 1954, charging combination restricting competition and monopolizing air transportation between the United States and Latin American countries.

Raybestos-Manhattan, Inc., and Thermoid Co., both stockholders in American Synthetic, were also previously associated as nolo-pleaders in 1948 in *United States* v. *Brake Lining Manufacturers Ass'n, Inc.* They were fined $5,000 each on price-fixing charges.

Dunlop Tire & Rubber Co. is in American Synthetic; it is controlled by the British Dunlop, which was involved in the latex cartel case with United States Rubber.

It is only fair to add that some of the stockholders in American Synthetic Rubber Corp. have not been involved in antitrust suits.

The only plant, however, that would be sold to a company with no antitrust history is the Koppers Co. alcohol butadiene plant at Kobuta, Pa. Koppers Co., Inc., apparently didn't want the whole plant, but took it just to get the powerplant and utilities.

The list of antitrust cases is long, and perhaps boring. It could be extended by referring to Federal Trade Commission cease-and-desist orders covering such rubber items as golf balls, rubber soles and heels, canvas and rubber footwear, bicycle accessories, as well as tires and tubes.

The conclusion to be drawn is that competition in the future is no more likely than in the past. Banding together for mutual protection can be highly profitable in the case of synthetic rubber and its component raw materials.

The Attorney General, in his formal statement approving the pattern of disposal, completely ignored the antitrust history of the successful bidders. This is the more surprising, since he settled 3 and brought 2 of these suits in the past 2 years. With this record in his own files, it is extremely difficult to understand how he can make a positive finding that the proposed sales of the plants "will best foster the development of a free competitive synthetic rubber industry."

Indeed, throughout his statement, the Attorney General stressed the lack of competing bids for the several plants. For 10 out of 11 GR–S plants (GR–S is Government rubber styrene, mainly used for rubber in tires) for both the butyl plants (rubber used for tubes) for 3 out of the 4 petroleum butadiene plants including the largest, and for the alcohol butadiene plant, only one bid was received. The Attorney General seems to consider this paucity of bids as conducive to future competition. To a Congressman such limited bidding might well suggest a lack of competition, that indeed, competition in the synthetic rubber industry is doomed from the start.

The cases that I have cited are mostly settled and thus legally dead. But for purposes of considering the disposal of these plants these cited cases are not dead, morally. Many of these successful bidders are self-confessed law violators or have been found guilty before a judicial tribunal. They thus come before this tribunal with unclean hands. They are malefactors and should be treated as such. This Congress should not reward them by turning over to them valuable plants, no matter how convenient it might be to the Government or to the members of the Rubber Producing Facilities Disposal Commission. These prospective purchasers have snapped their fingers at the laws we made. They have used inordinate power to ride roughshod over competitors. They even tried to cheat the Government by conspiring to present identical bids in their dealings with the Government. I refer to the case of United States against Cooper Corp., Civil Action No. 2–396, Southern District of New York, complaint filed February 20, 1939. The defendants in the case included the Dayton Rubber Manufacturing Co., the Dunlop Tire & Rubber Corp., the Firestone Tire & Rubber Co., the B. F. Goodrich Co., the Goodyear Tire & Rubber Co., the Seiberling Rubber Co., United States Rubber Products, Inc. This was a triple damage suit for conspiracy, brought by the Government, to fix the prices of tires on sales to the United States Government. The case was dismissed on technical grounds because the United States was not a "person" within the meaning of section 7 of the Sherman Act. The complaint, however, showed identical bids for tires submitted to the United States Government to three decimal points.

One would be naive, if not foolish, to believe that disposal of these plants to these companies would satisfy the sine qua non we laid down in section 3 (c) of the Disposal Act; namely, to secure a program that would best foster the development of a free competitive synthetic-rubber industry.

Have these companies reformed? I see no signs of regeneration. They have habitually repeated their sins not only in the United States but in Canada. A leopard does not change its spots. Suppose you were a businessman and your supplier attempted to cheat you. You caught him redhanded. You'd be rather foolish to deal with him again. Frankly, you would boot him out. Well, these companies were guilty of wrongdoing against the United States. Shall the United States now reward them for their wrongdoing? The sales to any or all of these defendants in these antitrust suits should be canceled out. Otherwise we are guilty of double talk. We speak out of both sides of our mouths if we at one and the same time say we want free, open, competition and at the same time we say turn over these plants to antitrust violators.

Section 17, subsection (1) reads as follows:

"That the disposal program be designed best to afford small-business enterprises and users, other than the purchaser of a facility, the opportunity to obtain a fair share of the end products of the facilities sold and at fair prices."

Does anyone in his right senses say that these companies, if possessed of these plants, will help small-business enterprises? Their record proves to the contrary. Take a look at the list of the successful bidders, on pages 8 and 9 of the report to Congress by the Rubber-Producing Facilities Disposal Commission. With rare exceptions they are all huge companies. They are also huge users of synthetic rubber. They are going to supply themselves. They are not unselfishly going to cater to small-business enterprises; that is, small rubber fabricators. If rubber gets scarce they are going to husband unto themselves all the rubber they can produce. They are going to feather their own nests. All manner and kinds of subterfuges will be used to deprive the small fellows of a fair share of rubber. The little fabricators and manufacturers will die on the vine.

As far as I can see, there is no implementation of the declaration contained in section 17, subdivision (1). It is simply a pontifical declaration, with no sanctions for violation. There is no method of enforcement; it is simply a moral obligation. Antitrust violators do not usually abide by moral declarations. Take another look at the list of prospective purchasers. You will see that KYS Corp. is the only purchaser that really contains small operators. All the others are large or monolithic operators. None of these conditions make for fair dealing with small business and small fabricators of rubber.

For these reasons I think this committee should ponder long and well before granting any approval to the sale of these plants to antitrust-law violators. Conversely, as the law requires, such sales should be balked. In this respect I hope that this committee will negate the action of the Rubber-Producing Facilities Disposal Commisison.

House Resolution 151

EXTENSION OF REMARKS
OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. DOYLE. Mr. Speaker, I thank you and all the Members of this great legislative body for approving and granting my request for unanimous consent to place the following in our daily CONGRESSIONAL RECORD.

Herewith is the text of Doyle House Resolution 151, which resolution was several days ago authorized by the House Rules Committee to come to the floor of the House, and I am informed that it will shortly do so.

I insert the text and the following editorials about it for the information of all concerned as it appears to me, for the present, that these editorials are informative and also indicative. I trust the insertion of the resolution text, together with these editorials will prove helpful.

House Resolution 151

Resolved, That rule XI (25) (a) of the Rules of the House of Representatives is amended to read:

"25. (a) The Rules of the House are the rules of its committees so far as possible, except that a motion to recess from day to day is a motion of high privilege in committees. Committees may adopt additional rules not inconsistent therewith."

SEC. 2. Rule XI (25) is further amended by adding at the end thereof:

"(h) Each committee may fix the number of its members to constitute a quorum for taking testimony and receiving evidence, which shall be not less than two.

"(i) The chairman at an investigative hearing shall announce in an opening statement the subject of the investigation.

"(j) A copy of the committee rules, if any, and paragraph 25 of rule XI of the House of Representatives shall be made available to the witness.

"(k) Witnesses may be accompanied by their own counsel for the purpose of advising them concerning their constitutional rights.

"(l) The chairman may punish breaches of order and decorum, and of professional ethics on the part of counsel, by censure and exclusion from the hearings; and the committee may cite the offender to the House for contempt.

"(m) If the committee determines that evidence or testimony at an investigative hearing may tend to defame, degrade, or incriminate any person, it shall—

"(1) receive such evidence or testimony in executive session;

"(2) afford such person an opportunity voluntarily to appear as a witness; and

"(3) receive and dispose of requests from such person to subpena additional witnesses.

"(n) Except as provided in paragraph (m), the chairman shall receive and the committee shall dispose of requests to subpena additional witnesses.

"(o) No evidence or testimony taken in executive session may be released or used in public sessions without the consent of the committee.

"(p) In the discretion of the committee, witnesses may submit brief and pertinent sworn statements in writing for inclusion in the record. The committee is the sole judge of the pertinency of testimony and evidence adduced at its hearing.

"(q) Upon payment of the cost thereof, a witness may obtain a transcript copy of his testimony given at a public session or, if given at an executive session, when authorized by the committee."

[From the New York Times of March 9, 1955]

A CODE FOR INVESTIGATIONS

The excesses of some notorious congressional investigating committees have for years made it incumbent on both Houses of Congress to adopt general rules of procedure that would curb the worst of the abuses.

Congress is, in the last analysis, responsible for the conduct of its Members; and there is no doubt at all that the conduct of some of them, acting in their official capacity as investigators—or, more accurately, as inquisitors—has deeply reflected on the prestige and the dignity of the Congress and thereby done injury to our democratic institutions. This feeling took tangible form in a well-merited censure resolution against one Senator last fall. But the problem of establishing in each House a clearly defined minimum standard for congressional investigations remained.

Individual committees of both House and Senate have at various times adopted admirable codes for themselves, but what has been needed is a general expression representing the collective thought of each. The House Rules Committee has at last taken definite action in this regard. The resolution by Representative DOYLE, Democrat, of California, which it approved without dissent yesterday, represents no more than the predicted minimum; but if that minimum is adhered to some of the worst abuses that have tended to give congressional investigations a bad name may be eliminated. The reforms are generally intended to give committee witnesses a little more protection than they have sometimes had in the past. This is doing nothing more sensational than treating them in accordance with our constitutional tradition; but that, too, has not always been adhered to in the past.

Under the Doyle resolution each committee of the House would still have the right to draw up its own rules, but they would have to be not inconsistent with the guide set forth by the Rules Committee. Anyone familiar with congressional practice will realize at once that this code is not going to guarantee fairness to witnesses, because a committee chairman retains great power, and rules can always be ignored or broken. But what it can and probably will do will be to act as a valuable restraint on chairmen and their committees; it will make them think twice about abusing their powers; and it will stand as the conscience of the House, by which their conduct will be judged. This would be a useful innovation.

We hope the resolution is approved by the House and that one certainly no milder will also eventually be accepted by the Senate.

[From the Washington Post and Times Herald, of March 14, 1955]

AIMED AT INQUISITIONS

The House Rules Committee has made a good start toward curbing irresponsible investigating committees. The proposed code of fair procedure it has recommended to the House is by no means complete, and some of its provisions would be wide open to evasion. But at least it nails down a few simple rules that would be of value in keeping the more reckless investigators in line. Witnesses could stil be mistreated, but they would have better grounds for protest and the House itself would become responsible for enforcement of the rules of fair play.

The Rules Committee did not attempt to bring all House committees into conformity with a single set of regulations. Rather, it set up a few minimum requirements that all committees would have to incorporate in their own rules. Each committee would be free, for example, to fix the number of members required for taking testimony, except that this could not be fewer than two. Thus one-man hearings would be ended. The chairman would have to state the subject of the investigation and provide each witness with a copy of the rules. Witnesses could be accompanied by counsel, although the counsel would be limited to advising the witness as to his constitutional rights.

Several other devices would give at least qualified aid to witnesses under suspicion. Their testimony would be taken first in executive session; they could appear voluntarily as witnesses; they could ask the committee to summon witnesses in their behalf, although this would be solely within the discretion of the committee. Similarly witnesses could submit sworn statements for the record, but these would be included only at the discretion of the committee. No right of cross-examination would be granted; nor would the right of silence be recognized when the committee fished for information beyond the proper scope of its inquiry. Evidence taken behind closed doors would not be released or used in public sessions without the consent of the committee, but nothing is said about leaks.

With all its shortcomings, the proposed code is a valuable contribution to the cause of responsible investigation. We hope the House will adopt it, with improvements on the floor if possible, and that this example will stimulate the Senate into action in the same cause. No rules can change a witch hunter or a smear artist into a scrupulous factfinder, but rules help to make investigators more conscious of the public demand for fair play. Careful selection of investigating chairman, along with stiff rules at both ends of the Capitol, could help bring the disgrace of congressional inquisitions to a timely end.

[From the Washington Sunday Star of March 13, 1955]

BETTER BREAK FOR WITNESSES

The House Rules Committee has done a constructive day's work in reporting out the resolution submitted by Representative DOYLE, Democrat, of California.

This resolution proposes a variety of safeguards for the benefit of witnesses appearing before congressional committees. No set rules or regulations will prevent all abuse of witnesses, for this is a matter which is governed in considerable degree by the attitudes, the taste for fair or unfair play, of individual Congressmen. But Mr. DOYLE's proposals, if adopted, should curb the worst abuses, especially the one-man inquisitions of recent memory. It is to be hoped that the House will enact the proposals now before it, and that the Senate will take comparable action.

Mr. Speaker, the three foregoing editorials, which I have herein identified are but a few of a goodly number which have appeared in various places in the Nation, I am informed, in support of the objectives of House Resolution 151. I recite this information as it further indicates public interest in, and approval of same.

I desire to also state that the final text thereof is not the "brain child" of only myself. For, some of the distinguished members of this great legislative body who also worked strenuously and consistently with me to conclude a text which it was believed would be sound, reasonable and constructive, and yet not unnecessarily elaborate, or which would in any way interfere with the jurisdiction of each investigative committee, on its own behalf to write its own rules of procedure, were Messrs. WALTER of Pennsylvania, WILLIS of Louisiana, DAWSON of Illinois, and FORRESTER of Georgia. Also, we had the great benefit of counsel with, and material aid, by our distinguished Parliamentarian, Mr. Deschler. As to the final drafting thereof, we were greatly assisted by Mr. Charles J. Zinn, of the House Judiciary Committee.

I think it should be emphasized that a careful reading of the text of the above resolution will make it clear that it only applies to an investigative hearing. In the resolution see section 2, rule 11, subdivision (h), (i), and (m). Also please note, as provided in section 25, as follows: "Committees may adopt additional rules not inconsistent therewith."

On behalf of myself and colleagues herein named, I desire to herein express appreciation to all the members of the House Rules Committee for their most courteous and full consideration of the subject matter of my resolution and of the other similar resolutions which were considered by said committee. I consider my attendance upon the Rules Committee when they were considering the several resolutions dealing with code of procedures and ethics for investigative committees as one of the most pleasant experiences and sources of information which I have experienced during these more than 8 years I have already been a member of this great legislative body.

Our Soldiers Convicted Under Foreign Laws

EXTENSION OF REMARKS

OF

HON. USHER L. BURDICK

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 7, 1955

Mr. BURDICK. Mr. Speaker, we always thought the Constitution follows the flag, but that idea now is purely a myth. Congress passed an act making our soldiers subject to the laws of the country in which they are stationed.

Here is a case where a soldier assaulted a taxi driver in France and was given a 5-year sentence. In this country he would have probably been fined and perhaps given a few days jail sentence.

The following item appeared in the Washington Daily News of March 1, 1955:

The Supreme Court yesterday refused to review the case of Pfc. Richard T. Keefe, 26, formerly of 5310 Hamilton Street, Riverdale, who was sentenced to 5 years in jail in 1953 for assaulting a taxicab driver in Orleans, France. His wife, Gladys, contended that he was deprived of his rights in the French trial.

In view of the act passed by Congress, the Supreme Court could make no other decision.

Thomas G. Masaryk

EXTENSION OF REMARKS
OF
HON. ARTHUR G. KLEIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, March 7, 1955

Mr. KLEIN. Mr. Speaker, today, March 7, marks the anniversary of the birth of one of the great men of our times, Thomas G. Masaryk, founder and first President of Czechoslovakia. Much has happened since the establishment of that country, and much that has happened has been tragic. But history has a way of redeeming its tragedies and of restoring to its great and noble figures the status that is their due.

I was invited recently by the publishers of a Czechoslovakian newspaper in the United States to express my sentiments about Dr. Masaryk; and I was glad to do so in a message as follows:

Mr. ANDREW J. VALUCHEK,
New Yorksky Dennik-New Yorske Listy, C. S. Publishing Co., Inc., New York, N. Y.

MY DEAR SIR: I am deeply moved to be able to participate in the observance of the anniversary of the birth of Thomas G. Masaryk, one of the noble spirits of our times, a great leader of his country, and a distinguished citizen of the world family.

No matter how intensive the efforts of those, to whom his democratic ideals are repugnant, to besmirch his reputation and to seek to eradicate the memory of his great achievements, the name of Masaryk will survive. His enemies may demolish the stone memorials commemorating his name. They can never reach the shrine in which he is steadily revered, the hearts of his countrymen and indeed of the people of all the world.

Sincerely yours,

ARTHUR G. KLEIN,
Member of Congress.

SENATE

TUESDAY, MARCH 8, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O Thou God over all, blessed for evermore: Amid the seething strife which mars the earth and still builds its walls of separation, when all mankind ought to be one, whate'er vexatious problems we face in this volcanic day, this white altar reared at the gates of the morning speaks to us ever of our final reliance on those supreme spiritual forces, faith and hope and love, which alone abide and on which our salvation in the end depends. Before the toil of a new day opens before us we lay before Thee the meditations of our hearts; may they be acceptable in Thy sight.

Prepare us for the role committed to our fallible hands in this appalling day. May our loins be girt and our lamps burning, and ourselves as men who watch for their Lord's coming. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Friday, March 4, 1955, was dispensed with.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting a nomination was communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed, without amendment, the bill (S. 456) relating to the regulation of nets in Alaska waters.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. CLEMENTS, and by unanimous consent, the Subcommittee on Executive Nominations of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

On request of Mr. CLEMENTS, and by unanimous consent, the Committee on Government Reorganization of the Government Operations Committee was authorized to meet during the session of the Senate today.

On request of Mr. CLEMENTS, and by unanimous consent, the Committee on Banking and Currency was authorized to meet during the session of the Senate today.

On request of Mr. STENNIS, and by unanimous consent, the Subcommittee on Internal Security of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

DEFINITION OF "SERVICE" OF MEMBER OF WOMEN'S AUXILIARY CORPS

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to define service as a member of the Women's Army Auxiliary Corps as active military service under certain conditions (with an accompanying paper); to the Committee on Armed Services.

REPORT ON DEPARTMENT OF THE ARMY RESEARCH AND DEVELOPMENT CONTRACTS

A letter from the Assistant Secretary of the Army, transmitting, pursuant to law, a report of the Department of the Army on Research and Development contracts, for the period July 1, 1954 through December 31, 1954 (with an accompanying report); to the Committee on Armed Services.

AMENDMENTS OF ACT OF JUNE 3, 1916, RELATING TO FLIGHT INSTRUCTION

A letter from the Acting Secretary of the Air Force, transmitting a draft of proposed legislation to further amend the act of June 3, 1916, and for other purposes (with accompanying papers); to the Committee on Armed Services.

REPORT OF PROPERTY ACQUISITIONS, FEDERAL CIVIL DEFENSE ADMINISTRATION

A letter from the Administrator, Federal Civil Defense Administration, Washington, D. C., reporting, pursuant to law, on property acquisitions by that Administration, for the quarter ended December 31, 1954; to the Committee on Armed Services.

WAIVER OF COLLECTION OF CERTAIN FINANCIAL ASSISTANCE LOANS

A letter from the Acting Secretary, Department of State, transmitting a draft of proposed legislation to authorize the Secretary of State to evaluate and to waive collection of certain financial assistance loans, and for other purposes (with an accompanying paper); to the Committee on Foreign Relations.

REPORT ENTITLED "BRAZILIAN TECHNICAL STUDIES"

A letter from the Acting Director, Foreign Operations Administration, Washington, D. C., transmitting, for the information of the Senate, a copy of a report entitled "Brazilian Technical Studies" (with an accompanying document); to the Committee on Foreign Relations.

AUTHORIZATION FOR CERTAIN ADMINISTRATIVE EXPENSES IN TREASURY DEPARTMENT

A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to authorize certain administrative expenses in the Treasury Department, and for other purposes (with accompanying papers); to the Committee on Government Operations.

AUDIT REPORT AND SURVEY, NATIONAL SCHOOL LUNCH PROGRAM

A letter from the Assistant Comptroller General of the United States, transmitting, pursuant to law, an audit report on the national school lunch program, and an investigative survey of the operations of the program, in the State of Indiana (with accompanying papers); to the Committee on Government Operations.

PROPOSED CONCESSION PERMIT, TIMPANOGOS CAVE NATIONAL MONUMENT, UTAH

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed concession permit in the Timpanogos Cave National Monument, Utah (with accompanying papers); to the Committee on Interior and Insular Affairs.

KAW TRIBE OF INDIANS *v.* THE UNITED STATES

A letter from the Chief Commissioner, Indian Claims Commission, Washington, D. C., transmitting, pursuant to law, the findings of fact and opinion, and conclusions of law and final award, in the case of Felix McCauley, a member of the Kaw Tribe of Indians, on the relation of all members of the *Kaw Tribe of Indians, Plaintiff,* v. *The United States* (with accompanying papers); to the Committee on Interior and Insular Affairs.

EXTENSON OF LAW RELATING TO PERJURY IN CERTAIN CASES

A letter from the Attorney General, transmitting a draft of proposed legislation to amend title 18, United States Code, chapter 79, to add a new section, 1623, to extend the law relating to perjury to the wilful giving of contradictory statements under oath (with an accompanying paper); to the Committee on the Judiciary.

STANLEY RYDZON AND ALEXANDER F. ANDERSON

A letter from the Postmaster General, transmitting a draft of proposed legislation for the relief of Stanley Rydzon and Alexander F. Anderson (with an accompanying paper); to the Committee on the Judiciary.

REPORT OF DIRECTORS OF FEDERAL PRISON INDUSTRIES, INC.

A letter from the Secretary, Federal Prison Industries, Incorporated, Department of Justice, transmitting, pursuant to law, a report of the Directors of that organization, for the fiscal year 1954 (with an accompanying report); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of Utah; to the Committee on Interstate and Foreign Commerce:

"Senate Joint Resolution 12

"Joint resolution of the 31st Legislature of the State of Utah memorializing the Congress of the United States to enact legislation recognizing that the sale of natural gas by producers or gatherers in interstate commerce for resale are an integral part of the production and gathering of that resource and exempting such sales from any and all regulation by the Federal Government

"Be it resolved by the Legislature of the State of Utah (both houses concurring therein):

"Whereas the Congress of the United States in 1938 passed the Natural Gas Act which gave the Federal Power Commission regulatory authority over the transportation and sale of natural gas in interstate commerce and provided that the provisions of this act shall not apply to the production and gathering of natural gas; and

"Whereas the Federal Power Commission ruled on many occasions between 1938 and 1951 that it had no jurisdiction over sales of natural gas by producers and gatherers, and the United States Congress in 1950 again reiterated its intention that sales by producers or gatherers were exempt from Federal regulation under the Natural Gas Act; and

"Whereas the Supreme Court of the United States in 1954 held that all sales of natural gas for resale in interstate commerce are subject to regulation by the Federal Power Commission under the Natural Gas Act whether made before, during, or after production and gathering, such decision reversing a precedent of long standing; and

"Whereas it is the consensus of opinion of the Legislature of the State of Utah that the resultant subjection of theretofore unregulated activities of producers and gatherers to Federal regulation is not in the best interests of the people of the United States in that it will have a very detrimental effect on the future development and ultimate beneficial utilization of this very valuable natural resource, and will also result in an inevitable clash between the Federal regulating authorities and State regulation with respect to utilization of this resource, and will have the further effect of encouraging extension of crippling Federal controls to many other commodities in the American economy: Now, therefore, be it

"Resolved, That we do petition and memorialize the Congress of the United States to propose and enact an amendment to the Natural Gas Act of 1938 which will clearly and positively exempt from Federal regulation the activities of producers or gatherers of natural gas including sale by them of natural gas in interstate commerce for resale; be it further

"Resolved, That copies of this resolution be transmitted forthwith to the President of the United States, United States Senate, House of Representatives, and each congressional delegate from the State of Utah."

A concurrent resolution of the Legislature of the State of Utah; to the Committee on the Judiciary:

"Senate Concurrent Resolution 2

"Concurrent resolution memorializing the President and Congress of the United States of America to pass legislation curtailing and limiting the power and jurisdiction of inferior Federal courts to review criminal judgments of State courts

"Be it resolved by the Legislature of the State of Utah (the Governor concurring therein):

"Whereas the provisions of sections 2241 et seq. of the Revised Judicial Code, title 28, United States Code, purport to give to inferior Federal tribunals the right, by an application for habeas corpus, to review criminal judgments of State courts including jury verdicts, trial court rulings, and State supreme court decisions, and to issue orders staying the execution of such judgments by the duly constituted authorities of the States; and

"Whereas the exercise of such power serves to:

"(1) stultify prompt enforcement of capital sentences in the event of conviction;

"(2) produce disruption of State criminal proceedings;

"(3) disrupt the proper balance between the States and the Federal Government;

"(4) centralize and extend Federal power;

"(5) impair and debase the States' due powers and responsibilities in the detection and punishment of crime;

"(6) destroy the public faith in and respect for the judicial systems;

"(7) afford those guilty of heinous and reprehensible crimes the opportunity to delay, stultify, and avoid the enforcement of the sanctions imposed upon them by the legislatures of the various States; and

"Whereas the Honorable ARTHUR V. WATKINS, Senator from the State of Utah, has introduced in the 84th Congress, 1st session, S. 877, which will correct a duplicate jurisdiction given inferior Federal tribunals to review criminal judgments in the State courts including jury verdicts, trial-court rulings, and State supreme court decisions: Now, therefore, be it

"Resolved by the Legislature of the State of Utah (the Governor concurring), That the Congress of the United States is hereby urged to pass S. 877 curtailing and limiting the power and jurisdiction of inferior Federal tribunals to review criminal judgments of the courts of this and the other United States; be it further

"Resolved, That the secretary of state of the State of Utah be, and he is hereby authorized and directed to send copies of this joint memorial to the President of the United States and to the Senate and House of Representatives of the United States."

A joint resolution of the Legislature of the State of Montana; to the Committee on Public Works:

"Joint memorial of the Senate and House of Representatives of the State of Montana to the Honorable Dwight D. Eisenhower, President of the United States; to the Congress of the United States; to the Honorable Sinclair Weeks, Secretary of Commerce; to the Honorable C. D. Curtiss, Chief of Public Roads Administration; to the Honorable James E. Murray and the Honorable Mike Mansfield, United States Senators from Montana; to the Honorable Lee Metcalf and the Honorable Orvin Fjare, Congressmen from Montana, requesting a reallocation and increased strategic mileage in the Federal Aid Highway Act of 1944 to add United States Highway No. 2 to the national system of State highways

"Whereas the Federal-Aid Highway Act of 1944, which amended the Federal-Aid Road Act, approved July 11, 1916, as amended and supplemented, provided that there shall be designated in the continental United States a national system of interstate highways not exceeding 40,000 miles in extent, so located as to connect by routes as direct as practicable the principal metropolitan areas, cities, and industrial centers, to serve the national defense and to connect at suitable border points with routes of continental importance in the Dominion of Canada and the Republic of Mexico; and

"Whereas the act further provided that the routes of the national system of interstate highways shall be selected by joint action of the highway departments of each State and the adjoining States, and in another provision required approval by the Federal Works Administrator; and

"Whereas Phillip B. Fleming, major general, United States Army, Administrator of the Federal Works Agencies, caused to be entered a certificate of approval of the national system of interstate highways, dated the 2d day of August 1947, which adopted a national system of interstate highways selected by the joint action of the State highway department of each State and adjoining States, as provided by the Federal Highway Act of November 9, 1921, for selection of the Federal-aid highway system, and which was reviewed by the Public Roads Administration to determine its compliance with the requirements and purposes of the Federal-Aid Highway Act of 1944, and the system as revised and modified by the Public Roads Administration was approved by the said Phillip B. Fleming, major general, United States Army, or the aforesaid date, by virtue of the authority vested in him by the said highway act of November 9, 1921, the President's Reorganization Plan No. 1, effective July 1, 1939, in the Federal-Aid Highway Act of 1944; and

"Whereas the national system of interstate highways selected, modified, and revised, as aforesaid, is comprised of routes totaling approximately 37,800 miles in extent; and

"Whereas there is a balance of 2,200 miles within the 40,000-mile limit provided in the Federal-Aid Highway Act of 1944 which can be placed on the interstate system; and

"Whereas United States Highway No. 2 is the shortest through arterial highway link between Sault Ste. Marie, Mich., and Seattle, Wash., and runs parallel to the northern border of the United States and intercepts all highway communications with Canada and Alaska in the State of Montana and other boundary States; and

"Whereas said United States Highway No. 2 plays an ever-increasing integral and necessary role in the tremendous growth of oil, nuclear, mineral, and timber industries, and in the development of power generated by the Hungry Horse Dam and other power sites in the Pacific Northwest, and in the expand-

ing industrial development in the Western States and in Canada, notably the Provinces of Alberta and British Columbia, all of which demands a revision and an increase in our vital defense needs; and

"Whereas the said United States Highway No. 2, which can without any difficulty be linked from east coast to west coast through the States of New York, Vermont, New Hampshire, and Maine and connected with Canada's highways, No. 9 from New York to Montreal, and No. 17 from Montreal to Sault Ste. Marie, which are of continental importance in the Dominion of Canada, is the only connection between our air-defense bases, the number of which and the personnel involved are known only to Congress, along the entire northern boundary of the United States; and

"Whereas the total mileage involved in this petition is approximately 2,178 miles in length, and connects at points in 7 States from the city of Sault Ste. Marie, Mich., to the city of Everett, Wash.; and

"Whereas while this is a petition from the State of Montana, it contemplates the joining of similar petitions of the other six States involved; this is especially true in view of the gigantic growth and expansion of the areas served by, contiguous to and adjacent to United States Highway No. 2, because such areas, at their present accelerated progress, resulting from a shift in population to the Western States and increasing industrial expansion in all areas, demand a revision of the transportation needs; and

"Whereas this request that the designation of United States Highway No. 2 be placed on the national system of interstate highways is made without prejudice to existing interstate highways in the State of Montana and in the other States served by United States Highway No. 2: Now, therefore, be it

"*Resolved*, That the 34th Legislative Assembly of Montana of 1955, now in session, the Senate and House of Representatives concurring, do most earnestly and respectfully request that the Congress of the United States recognize the strategic importance of United States Highway No. 2, and through the proper Federal agencies take immediate action to have United States Highway No. 2 designated as an integral part of the national system of defense highways and that it be placed on the national system of interstate highways; be it further

"*Resolved*, That copies of this memorial be transmitted by the secretary of the State of Montana to the Honorable Dwight D. Eisenhower, President of the United States; to the Congress of the United States; to the Honorable Sinclair Weeks, Secretary of Commerce; to the Honorable C. D. Curtiss, Chief of Public Roads Administration; to the Honorable James E. Murray and the Honorable Mike Mansfield, United States Senators from Montana; to the Honorable Lee Metcalf and the Honorable Orvin Fjare, Congressmen from Montana.

"GEO. M. GOSMAN,
"President of the Senate.
"LEO C. GRAYBILL,
"Speaker of the House.

"Approved February 27, 1955."

A resolution adopted by the Nashville (Tenn.) Industrial Union Council, favoring the enactment of legislation to provide a Federal minimum wage of $1.25 an hour; to the Committee on Labor and Public Welfare.

A letter in the nature of a petition from the Okonite Co., of Passaic, N. J., signed by A. F. Metz, chairman of the board and chief executive officer, enclosing a copy of the "Recommendations of Electrical Manufacturers on Foreign Trade Policy" (with an accompanying document); to the Committee on Finance.

Fifteen resolutions adopted by the Retired Officers Association, Washington, D. C., relating to proposed legislation for the Armed Forces; to the Committee on Armed Services.

A resolution adopted by the Retired Officers Association, Washington, D. C., relating to credit for $1,200 of retired income, for income tax purposes; to the Committee on Finance.

By Mr. HAYDEN:

A joint resolution of the Legislature of the State of Arizona; to the Committee on Interior and Insular Affairs.

"House Joint Memorial 1

"Joint memorial relating to timberland in the Coconino and Sitgreaves National Forest in Arizona

"To the Congress of the United States:

"Your memorialist respectfully represents:

"For many years a controversy existed between the United States and the Aztec Land & Cattle Co. as to the ownership of 98,600 acres of timberland in the Coconino and Sitgreaves National Forest in Arizona.

"A court decision in 1952 resulted in the transfer of 98,600 acres of land in the Coconino and Sitgreaves National Forest in Arizona from Federal to private control and ownership.

"This acreage is a natural and integral part of the national forest in which it was formerly included and the best interests of the citizens of the State of Arizona and Nation require that it be returned to Federal ownership and control, as a part of the national forest in which it is located.

"At least 75 percent of this land is heavily forested and comprises probably the finest stand of virgin timber left on the Colorado plateau. Protection of this valuable timber and its proper sustained cutting can best be had by a return of ownership and management to the National Forest Service.

"This large acreage is valuable for timber, grazing and recreational purposes and is a natural resource that should not be jeopardized. It has immense value as a watershed.

"Without the protection and conservation practices of the Federal Forest Service this irreplaceable property will deteriorate to a point where the timber production and lumber business in Arizona will be extinct and the water cycle will be so affected as to drastically diminish the flow from the watershed.

"Wherefore your memorialist, the Legislature of the State of Arizona, prays:

"That the Congress give its full support to the bill introduced by Senators CARL HAYDEN and BARRY GOLDWATER, of Arizona, to provide for the purchase of the acreage described above so that it may again be a part of the Coconino and Sitgreaves National Forest."

Mr. GOLDWATER presented a joint resolution of the Legislature of the State of Arizona, identical with the foregoing, which was referred to the Committee on Interior and Insular Affairs.

ESTABLISHMENT OF NATIONAL CEMETERY IN ARIZONA—JOINT RESOLUTION OF ARIZONA LEGISLATURE

Mr. HAYDEN. Mr. President, I present, for appropriate reference, a joint resolution adopted by the Legislature of the State of Arizona, praying for the establishment of a national cemetery in that State.

I ask unanimous consent that following the joint resolution there be printed in the RECORD Senate bill 1331, which I am introducing today, and which is designed to carry out the purpose of the joint resolution.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution and bill will be printed in the RECORD.

The joint resolution was referred to the Committee on Interior and Insular Affairs, as follows:

House Joint Memorial 5

Joint memorial requesting the establishment of a national cemetery in Arizona

To the Congress of the United States:

Your memorialist respectfully represents:

There is no national cemetery in the State of Arizona.

Proportionately, there are more veterans in Arizona than in most of the States of the Union. This is due partly to the fact that for several generations there have been numerous military installations in the State, and partly because thousands of veterans have moved to Arizona to have the advantage of the dry, healthful climate.

A veteran on passing, who has expressed a desire to be buried in a national cemetery, has to be transported to a distant point in another State for burial. If he dies without financial means, he will be buried in facilities furnished by the county for indigent persons.

Wherefore your memorialist, the Legislature of the State of Arizona, requests:

That the Congress provide for the establishment of a national cemetery in the State of Arizona.

Mr. GOLDWATER presented a joint resolution of the Legislature of the State of Arizona, identical with the foregoing, which was referred to the Committee on Interior and Insular Affairs.

The bill (S. 1331) to provide for a national cemetery in the State of Arizona, introduced by Mr. HAYDEN, was ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Secretary of the Army is authorized and directed (1) to establish one national cemetery at a location selected by him in the State of Arizona and (2) to acquire, by donation, purchase, condemnation, or otherwise, such land as may be required for the estalishment of such national cemetery.

SEC. 2. When requested to do so by the Secretary of the Army, the Administrator of the General Services is authorized and directed to transfer to the Department of the Army, without reimbursement or transfer of funds, any Government-owned land in the State of Arizona, which the Secretary of the Army has determined to be suitable for the purposes of this statute and which is otherwise surplus to Government needs. In addition, the Secretary of the Army is authorized to utilize when practicable, for the establishment thereon of a national cemetery, such Government-owned lands under the jurisdiction of the Department of the Army which are located within the State of Arizona and which are no longer needed for military purposes.

SEC. 3. Upon selection by the Secretary of the Army of such land, as provided in sections 1 and 2 hereof, he is authorized to establish such national cemetery and to provide for the care and maintenance thereof.

SEC. 4. The Secretary of the Army is authorized to prescribe such regulations as he may deem necessary for the administration of this act.

SEC. 5. There are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry into effect the purposes of this act.

By Mr. MAGNUSON:

A concurrent resolution of the Legislature of the State of Washington; to the Committee on Foreign Relations:

"House Concurrent Resolution 9

"Be it resolved by the Senate and the House of Representatives of the State of Washington, in legislative session assembled:

"Whereas His Excellency, Abba Eban, Ambassador of Israel to the United States, will be the honored guest of the State of Washington on his first visit to the Northwest; and

"Whereas the friendship and understanding between America and Israel are cherished by the citizens of the State of Washington and have inspired and strengthened our mutual love of freedom and the republic; and

"Whereas the Ambassador of Israel, who is also his country's chief delegate to the United Nations, has been given worldwide recognition as an outstanding spokesman for the young Republic of Israel: Now, therefore, be it

"Resolved, by the Senate and the House of Representatives of the State of Washington in legislative session assembled, that they hereby extend their cordial greetings to the Ambassador of Israel, His Excellency, Abba Eban, and respectfully request that he address a joint session of the senate and the house of representatives on Thursday, February 24, 1955; and be it hereby further

"Resolved, That copies of this resolution be transmitted to the President of the United States, to the Vice President of the United States, to the Speaker of the House of Representatives of the United States, to each Member of the Washington congressional delegation, to the Secretary of the United Nations, to the Secretary of the Israel delegation to the United Nations, to the President of Israel, and to His Excellency, Abba Eban, the Ambassador of Israel to the United States.

"Adopted by the house February 1, 1955.
"JOHN L. O'BRIEN,
"Speaker of the House.
"Adopted by the senate February 2, 1955.
"EMMETT T. ANDERSON,
"President of the Senate."

A joint resolution of the Legislature of the State of Washington; to the Committee on Interstate and Foreign Commerce:

"House Joint Memorial 6

"To the Honorable Dwight D. Eisenhower, President of the United States, and to the Senate and the House of Representatives of the United States of America, in Congress assembled, and to the Honorable Chan Gurney, Chairman of the Civil Aeronautics Board:

"We, your memorialists, the Senate and the House of Representatives of the State of Washington, in legislative session assembled, most respectfully represent and petition, as follows:

"Whereas it has been reliably reported that the Civil Aeronautics Board has voted to issue a decision in the States-Alaska Case, Docket No. 5756, et al, which would reduce the number of air carriers now operating between the Pacific Northwest and the Territory of Alaska from 4 to 2 carriers; and

"Whereas the continuance of adequate air transportation services to Alaska is of vital importance to the further economic development of the Territory, the State of Washington, and to the national defense interests of the entire Nation; and

"Whereas the Board's decision would deprive every major city in Alaska of competitive air services, except the city of Anchorage; and would further deprive such important communities as Nome, Cordova, Kenai, Homer, Kodiak, and Bristol Bay of through services by any air carrier operating from the State of Washington and would thus require time-consuming and costly transshipment of all passenger, cargo, and mail traffic destined to these communities; and

"Whereas Alaska is almost wholly dependent upon air transportation facilities because of the recent discontinuance of passenger steamship services and because there is no railroad linking the Territory with the State of Washington, nor any satisfactory highway network; and

"Whereas Alaska is almost entirely dependent upon the State of Washington and other areas of the continental United States for its labor force and for virtually all of its foodstuffs, supplies, and materials, and is therefore peculiarly in need of adequate air transportation facilities especially tailored to its own needs; and

"Whereas the Territory is now on the threshold of significant business and industrial development which would be seriously impaired by any curtailment of air services as now contemplated by the Civil Aeronautics Board; and

"Whereas the Board's decision has resulted in an unprecedented storm of public protest throughout the entire Territory and the Pacific Northwest, resulting spontaneously in the sending of thousands of letters and telegrams to the Board and to the White House; and

"Whereas this public protest has been vigorously supported by the entire congressional delegation from the State of Washington, by virtually all of the other public and civic leaders in the Pacific Northwest, by newspapers, radio, and television commentators, and by most of the business concerns and labor unions in the State of Washington having trade interests with Alaska: Now, therefore, be it

"Resolved by the Senate and the House of Representatives of the State of Washington, in legislative session assembled, That we respectfully memorialize and petition the President of the United States and the Chairman of the Civil Aeronautics Board to reconsider the pending decision in the States-Alaska Case to insure that existing air transportation services to the Territory of Alaska are not curtailed, that competitive air services be maintained from the State of Washington to all of the principal gateway cities in Alaska, that through services by air from the State of Washington be preserved and expanded to as many Alaskan communities as possible, that the selection of the individual air carriers to perform such services be determined solely upon the basis of merit, and that paramount consideration be given to the vital need of Alaska for a system of air transportation services especially tailored to the peculiar requirements of the Territory and which will fully utilize the integrated operation of air carriers indigenous to Alaska, whose primary and exclusive interests are in serving the Pacific Northwest and the Territory; and be it further

"Resolved, That copies of this memorial be immediately transmitted to the President of the United States and to the Chairman of the Civil Aeronautics Board; and be it further

"Resolved, That a copy of this memorial be sent to all Members of the Senate and the House of Representatives of the United States.

"Passed the house February 2, 1955.
"JOHN L. O'BRIEN,
"Speaker of the House.
"Passed the senate February 3, 1955.
"EMMETT T. ANDERSON,
"President of the Senate."

CONSTRUCTION OF LIBBY AND YELLOWTAIL DAMS, MONT.—JOINT RESOLUTIONS OF MONTANA LEGISLATURE

Mr. MURRAY. Mr. President, every Member of the Senate is interested in conservation of our Nation's natural resources. Without question, the most important of all our resources, next to our people, are our soil and water. Closely allied to these two fundamental natural resources are the use and the development of water power as a basis of industrial progress.

Therefore, I am certain every Member of this body will be interested in two joint resolutions adopted by the Legislature of the State of Montana and approved February 26, 1955. One petitions for construction of Libby Dam, in northwestern Montana; and the other petitions for construction of Yellowtail Dam, in southeastern Montana. I ask unanimous consent that the text of these memorials appear in the body of the RECORD at this point.

The VICE PRESIDENT. The joint resolutions will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The joint resolutions were referred to the Committee on Appropriations, as follows:

Joint memorial of the Senate and House of Representatives of the State of Montana to the Honorable Dwight D. Eisenhower, President of the United States; the Honorable James E. Murray and Mike Mansfield, United States Senators from Montana; and to the Honorable Lee Metcalf and Orvin B. Fjare, Representatives in Congress from Montana; the Appropriations Committee of the Uniter States Senate; the Appropriations Committee of the House of Representatives; the Committee on Interior and Insular Affairs of the United States Senate; the Committee on Interior and Insular Affairs of the House of Representatives; and Joseph M. Dodge, Director of the Budget, requesting the introduction and early enactment into law the necessary and proper legislation authorizing sufficient appropriations be provided the Corps of Army Engineers for early construction of the Libby Dam located on the Kootenai River in Lincoln County in northwestern Montana

Whereas Libby Dam site is located in Lincoln County in northwestern Montana, and Lobby Dam will be constructed across the Kootenai River, at a point above and near to Libby, Mona.; and

Whereas preliminary geological investigation and work has been carefully completed and the findings compiled; and

Whereas the Libby Dam will be designed to provide power, flood control, and recreation benefits to Montana and the whole Pacific Northwest; and

Whereas existing industry and potential industrial development in timber, wood pulp and wood products, mining and its attendant products, will be greatly enhanced due to low-cost power at site of dam; and

Whereas the acre-feet of reservoir storage is estimated to be 6,483,000 acre-feet making a total accumulated acre-feet of 17,633,000 of regulated flow for the Columbia River for firm up-power for further industrial development: Now, therefore, be it

Resolved by the Senate and House of Representatives of the State of Montana, That the Congress of the United States be respectfully urged and requested to make sufficient funds available for the early initiation of construction of Libby Dam on the Kootenai River in Lincoln County in northwestern Montana; and be it further

Resolved, That a copy of this memorial be also submitted by the secretary of state of Montana to the presiding officers of both Houses of the natinal Congress, RICHARD M. NIXON and SAM E. RAYBURN; to the chairmen of the Appropriations Committees; and

Committees on Interior and Insular Affairs of both Houses of the national Congress.

GEO. M. GOSMAN,
President of the Senate.
LEO C. GRAYBILL,
Speaker of the House.

"Approved February 26, 1955."

Joint memorial of the Senate and the House of Representatives of the State of Montana to the President of the United States, Dwight D. Eisenhower, Senator James E. Murray, of Montana; Senator Mike Mansfield, of Montana; Senator Joseph C. O'Mahoney, of Wyoming; Senator Frank Barrett, of Wyoming; Congressman Lee Metcalf, of Montana; Congressman Orvin Fjare, of Montana; the Appropriations Committee of the United States Senate; the Appropriations Committee of the United States House of Representatives; the Committee on Interior and Insular Affairs of the United States Senate; the Committee on Interior and Insular Affairs of the United States House of Representatives; Wilbur A. Dexheimer, Commissioner of the Bureau of Reclamation; Rowland R. Hughes, Director of the Budget; Glenn L. Emmons, Commissioner of Indian Affairs; requesting the introduction and enactment into law of the necessary and proper legislation authorizing that sufficient appropriations be provided the Bureau of Reclamation for the immediate construction of Yellowtail Dam, located on the Big Horn River in Big Horn County in southeastern Montana

Whereas Yellowtail Dam site is located in Big Horn County in southeastern Montana, and Yellowtail Dam will be constructed across the Big Horn River, about three-fourths of a mile above the mouth of Big Horn Canyon, 35 miles southwest of Hardin, Mont.; and

Whereas Big Horn Canyon is the passageway of the Big Horn River between the northern end of the Big Horn Mountains and the Pryor Mountains. For more than 50 miles Yellowtail Dam Reservoir will lie within the rugged, inaccessible canyon, the steep walls of which tower hundreds of feet above the narrow and winding riverbed, forming a natural damsite of unique splendor that will in future years provide Montana, Wyoming, and the Nation with one of the greatest lake recreation areas in the Western Hemisphere; and

Whereas the backed-up waters of Yellowtail Dam will flood no presently used or usable land, which alone makes it one of the most desirable and economical of damsites available; and

Whereas the United States Bureau of Reclamation was authorized by section 9 of the Flood-Control Act of 1944 as a part of the Missouri River Basin project to prepare preliminary surveys and construction of Yellowtail Dam; and

Whereas the Bureau of Reclamation has long since completed preconstruction work at the site of Yellowtail Dam and only awaits a congressional appropriation to commence work. Design specifications for the dam and powerplant are available for immediate use. Surveys have been completed of the irrigable areas and transmission lines. Plans are ready for construction of access roads, construction camp, and other essential base work necessary for actual construction to now be undertaken; and

Whereas Yellowtail Dam is designed to provide for irrigation, hydroelectric power production, flood control, silt retention, conservation of fish and wild life, recreational development and other related beneficial uses of value to Montana, Wyoming, and the Nation generally; and

Whereas construction of Yellowtail Dam will make possible the irrigation of some 45,000 acres of new land by gravity flow along the Big Horn River from the Big Horn Canyon to approximately 10 miles north of the city of Hardin, and supplemental irrigation water will be provided for large areas now inadequately served. Because irrigation of lands along the Big Horn, Powder, and Yellowstone Rivers is dependent upon pumping, a source of low-cost power is a prerequisite toward bringing many acres of now unproductive land under the ditch. Construction of Yellowtail powerplant will make possible the irrigation of many proposed and desirable projects along these three valuable, but in many instances, little utilized river areas; and

Whereas construction of Yellowtail Dam offers a priceless solution for equitable interstate use of the waters of the Big Horn by the creation of the Yellowtail Reservoir on the Montana-Wyoming State boundary line; and

Whereas power-generating facilities to be constructed at the damsite will have an installed capacity of at least 120,000 kilowatt-hours of electrical energy annually. This power produced at Yellowtail Dam will be available for irrigation pumping, and will serve as a part of the Bureau of Reclamation's power system, constructed to provide power for construction of other developments and to supply surplus power to principal load centers to permit its use of old and new industries as well as residence—rural and urban—of the area; and

Whereas fish and wild life resources will gain by the dam, fishing and hunting, as well as the many allied recreational opportunities that will most surely follow will be of immense value to Montana and Wyoming, as well as the Nation generally; and

Whereas Yellowtail Dam as planned will be a concrete archetype structure, towering some 499 feet above the riverbed, and will have a crest length of 1,480 feet and will have a storage capacity of 1,366,000 acre-feet; and

Whereas the construction of Yellowtail Dam will attract new industries into southern Montana and northern Wyoming and thereby be of great benefit to the entire States of Montana and Wyoming, as well as the entire Nation by firming up the economy and by supplying cheap power for industrial and home use, and this postwar period is the time to develop such industries: Now, therefore, be it

Resolved by the senate and house of representatives of the State of Montana, That the Congress of the United States be respectfully urged and requested to make sufficient funds available for the construction of Yellowtail Dam now on the Big Horn River in Big Horn County in southeastern Montana; Be it further

Resolved, That a copy of this memorial be also submitted by the secretary of state of Montana to the presiding officers of both Houses of the National Congress, RICHARD NIXON and SAM RAYBURN, to the chairman of the Appropriations Committees and Committees on Interior and Insular Affairs of both Houses of the National Congress, to the regional director of the Bureau of Reclamation and area director of the Indian Bureau, both located in Billings, Mont., and to the Governor of the State of Wyoming and the presiding officers of both houses of the Wyoming Legislature.

GEO. M. GOSMAN,
President of the Senate.
LEO C. GRAYBILL,
Speaker of the House.

Approved February 26, 1955.

(The VICE PRESIDENT laid before the Senate two joint resolutions of the Legislature of the State of Montana, identical with the foregoing, which were referred to the Committee on Appropriations.)

By Mr. KERR:

Two concurrent resolutions of the Legislature of the State of Oklahoma; to the Committee on Interior and Insular Affairs:

"Senate Concurrent Resolution 7

"Concurrent resolution memorializing the Congress of the United States to act promptly and favorably upon the Washita Basin (Okla.) project report

"Whereas the Washita River Basin in Oklahoma is one of the most fertile in our State and Nation; and

"Whereas the people of this great valley very frequently suffer heavy loss of life and property because of recurring disastrous floods; and

"Whereas following such disastrous floods there are long periods of protracted droughts, resulting in heavy loss of crops, excessive shortages of water for domestic, municipal, and industrial supplies, and greatly jeopardizing the health, welfare, and economy of the valley; and

"Whereas for many years the several agencies of the Federal Government have been making surveys and studies of the problems in the Washita Basin; and

"Whereas on July 25, 1953, the Secretary of the Interior did transmit the Washita River Subbasin, Red River Basin, Okla. and Tex., project report through the Bureau of the Budget to the Congress, identified as House Document 219, 83d Congress, 1st session, and referred to the Committee on Interior and Insular Affairs; and

"Whereas aforementioned project report and plans provide adequately for the protection from destructive floods, storage for domestic, municipal, industrial, and irrigation water supplies; and

"Whereas on March 22 and 27, 1952, the Governor of Oklahoma and the Oklahoma Planning and Resources Board did approve and urge the development of the Washita Basin as provided in aforementioned House Document 219: Now, therefore, be it

"Resolved by the Senate of the 25th Legislature of the State of Oklahoma (the House of Representatives concurring therein), That we respectfully request the Committees on Interior and Insular Affairs and the Congress of the United States of America to consider at the earliest practical date and give their approval and to authorize for construction the Washita Basin (Okla.) projects.

"Adopted by the senate the 14th day of February 1955.

"PINK WILLIAMS,
"President of the Senate.

"Adopted by the house of representatives the 22d day of February 1955.

"B. E. HARKEY,
"Speaker of the House of Representatives."

"Senate Concurrent Resolution 9

"Concurrent resolution relating to a permanent location for the Cowboy Hall of Fame; respectfully requesting the location committee, Cowboy Hall of Fame, to consider the many advantages of the Will Rogers Memorial site, Claremore, Okla., as a permanent location for said Cowboy Hall of Fame; extending an invitation for the establishment of the Cowboy Hall of Fame at said site; and directing that certified copies of this resolution be mailed to the Honorable C. A. Reynolds, chairman, Cowboy Hall of Fame; to each member of the location committee thereof; to the Honorable Will Rogers, Jr.; and to all other members of the Will Rogers Memorial Commission; and to the Honorable James Hammett, mayor of Claremore, Okla.

"Whereas a location committee of the Cowboy Hall of Fame is now giving consideration to a permanent site for the Cowboy Hall of Fame; and

"Whereas the Will Rogers Memorial, Claremore, Okla., was an inspiration for the establishment of a permanent Cowboy Hall of Fame; and

"Whereas the Will Rogers Memorial and the proposed Cowboy Hall of Fame are inextricably related in the folklore of the American cowboy; and

"Whereas the city of Claremore, Okla., a progressive city of native Americans and one of America's best known and most visited cities, is in the heart of "cowboy country" and is an ideal location for said Cowboy Hall of Fame, offering, among other advantages, the following:

"(1) Home of Will Rogers, native son, world citizen, and the greatest cowboy of all time;

"(2) Site of the Will Rogers Memorial, having an average of 1,200 visitors daily and ranking second only to visitation of Mount Vernon;

"(3) Municipally owned Will Rogers Library of approximately 11,500 volumes;

"(4) Oklahoma's largest roundup club, and ranking in size among the largest in the Southwest;

"(5) Location of the Davis gun collection; the largest individual collection of guns in the United States;

"(6) Home of the Oklahoma Military Academy;

"(7) Gilcrease Art Museum, in nearby Tulsa, which includes the world's finest collection of materials relating to the American Indian, as well as the finest collections of Frederic Remington and Charles Russell paintings and sculpture;

"(8) Excellent highway facilities directly serving the Will Rogers Memorial site include United States Highway No. 66, the Main Street of America, Oklahoma State Highway No. 20 connecting United States Highways Nos. 77, 169, and 69, and Oklahoma State Highway No. 33 connecting Claremore with United States Highway No. 169 and Oklahoma State Highway No. 33;

"(9) Nearby the city of Tulsa, Okla., has 5 airlines operating into and out of the municipal airport with 59 daily schedules; and

"Whereas the State of Oklahoma embraces a major portion of 'cowboy country, United States of America,' and has produced four world's champion all-around cowboys: Now, therefore, be it

"Resolved by the Senate of the 25th Legislature of the State of Oklahoma (the House of Representatives concurring therein):

"SECTION 1. That the people of the State of Oklahoma through the 25th legislature do hereby respectfully request the location committee of the Cowboy Hall of Fame to give serious consideration to the many advantages of the Will Rogers site, Claremore, Okla., as a permanent location for the Cowboy Hall of Fame, and do hereby extend a cordial invitation for the establishment of said Cowboy Hall of Fame in the State of Oklahoma.

"SEC. 2. That a duly certified copy of this resolution be mailed to the Honorable C. A. Reynolds, chairman, Cowboy Hall of Fame, 804 West 67th Street Terrace, Kansas City, Mo.; to each member of the location committee; to the Honorable Will Rogers, Jr., Beverly Hills, Calif.; to all other members of the Will Rogers Commission; and to the Honorable James Hammett, mayor, Claremore, Okla.

"Adopted by the senate the 22d day of February 1955.

"PINK WILLIAMS,
"President of the Senate.

"Adopted by the house of representatives the 24th day of February 1955.

"B. E. HARKEY,
"Speaker of the House of Representatives."

IMPORTANCE OF UPHOLDING THE CONSTITUTION OF THE UNITED STATES—RESOLUTION

Mr. AIKEN. Mr. President, last Tuesday was Town Meeting Day in Vermont. The people of my home town of Putney adopted a resolution in regard to standing by the Constitution of the United States. I ask unanimous consent that this resolution be printed in the body of the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas there are several groups of people, both within and without the United States of America, which embrace various political ideologies, the effects of which are to enslave human beings; and

Whereas we, the people of Putney, being an informed, religious and patriotic people, do unequivocally reject all such political ideologies: Be it therefore

Resolved, That we, the people of Putney, go on record as firmly believing in, and as upholding the Constitution of the United States of America; be it further

Resolved, That we go on record as desiring to keep and retain, for ourselves and for our posterity, all of the liberties, freedoms, rights, and privileges now enjoyed by us, and guaranteed to us by the Constitution of the United States of America; and be it further

Resolved, That we go on record as favoring a standard of liberties, freedoms, rights, and privileges, comparable to our own present standard, for all peoples everywhere as soon as may be; and be it further

Resolved, That the town clerk of Putney be hereby authorized and instructed to forward, as soon as possible, a copy of the foregoing resolution in its entirety to each of the two United States Senators from Vermont, namely Senator AIKEN and Senator FLANDERS; and to forward a like copy to the congressional Representative from Vermont, namely, Representative PROUTY; and that the above resolution, so forwarded, shall have clearly indicated thereon that it has been approved by the people of Putney, in town meeting assembled.

IMPROVEMENT OF RURAL ROADS—RESOLUTION OF MINNESOTA STATE ASSOCIATION OF COUNTY COMMISSIONERS

Mr. THYE. Mr. President, I ask unanimous consent to have printed in the RECORD, as a part of my remarks, a resolution adopted by the State Association of County Commissioners of Minnesota on February 3, 1955, relating to the improvement of rural highways. I believe this resolution is timely, and should be given attention by all Members of Congress.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF STATE ASSOCIATION OF COUNTY COMMISSIONERS, ST. CLOUD, MINN., FEBRUARY 3, 1955

Whereas the FAS program, as it now stands, is 50 percent participation by the Federal Government and 50 percent participation by the county; and

Whereas the FAS funds allotted to the county were meant for and intended to be used by said county for the improvement of rural highways or farm-to-market roads; and

Whereas it is becoming more difficult for an increasing number of counties to match the present FAS fund allotment;

Therefore we do hereby respectfully request the Commissioner of Highways, United States Senators and United States Congressmen to work together for effecting legislation changing the present Federal law for Minnesota to read 75 percent participation by the Federal Government and 25 percent participation by the county.

LEO B. GAMBRINO,
Secretary and Manager.

EXECUTION OF JEWISH CITIZENS BY EGYPTIAN GOVERNMENT—RESOLUTION

Mr. SALTONSTALL. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Greenfield-Montague Zionist District, on February 15, 1955, relating to the execution of Jewish citizens by the Egyptian Government.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION ADOPTED BY THE GREENFIELD-MONTAGUE ZIONIST DISTRICT FEBRUARY 15, 1955

Whereas the Egyptian Government in its attempt to strengthen its unsettled internal position as well as to gain stature abroad, has so recently resorted to the hasty execution of some of its Jewish citizens after a shockingly unfair trial by Egypt's supreme military court; and

Whereas the 11th-hour pleas for clemency by the American, French, and other Governments fell upon deaf Egyptian ears; and

Whereas by their haste in carrying out these inhuman executions in spite of the intervention of the American Government, the Government of Premier Nasser has again demonstrated its contempt for American public opinion; and

Whereas by the continuation of abuses, calculated to harm the State of Israel ever since its establishment, in spite of repeated gestures of conciliation and goodwill by the Israeli Government: Be it hereby

Resolved, That the Greenfield-Montague Zionist District in meeting assembled this day goes on record as condemning the Egyptian Government in this their latest shedding of innocent Jewish blood; and be it further

Resolved, That the Greenfield-Montague Zionist District commends the Government of the United States for its effort in attempting to save the lives of the two Jews in Egypt; efforts which were so unsuccessful as to highlight the contempt of Egypt for American public opinion and democratic concepts.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. JOHNSTON of South Carolina, from the Committee on Agriculture and Forestry:

H. R. 3952. An act to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; with an amendment (Report No. 47).

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CLEMENTS:

S. 1325. A bill to amend the tobacco marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended;

S. 1326. A bill to amend the tobacco marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; and

S. 1327. A bill to amend the tobacco marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture and Forestry.

S. 1328. A bill for the relief of Doreen Tsung-tao Chen; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina:

S. 1329. A bill to require certain specifications to be included in star route and screen vehicle service contracts and in advertisements for bids on such contracts; and

S. 1330. A bill relating to the renewal and adjustment of star route and screen vehicle service contracts; to the Committee on Post Office and Civil Service.

By Mr. HAYDEN:

S. 1331. A bill to provide for a national cemetery in the State of Arizona; to the Committee on Interior and Insular Affairs.

By Mr. MCNAMARA:

S. 1332. A bill for the relief of Samuel Chalut; to the Committee on the Judiciary.

By Mr. MORSE (for himself, Mr. MAGNUSON, Mr. JACKSON, Mr. MURRAY, Mr. MANSFIELD, Mr. NEUBERGER, Mr. O'MAHONEY, Mr. ANDERSON, Mr. CHAVEZ, Mr. CLEMENTS, Mr. DOUGLAS, Mr. FULBRIGHT, Mr. GORE, Mr. GREEN, Mr. HENNINGS, Mr. HILL, Mr. HUMPHREY, Mr. JOHNSTON of South Carolina, Mr. KEFAUVER, Mr. KERR, Mr. KILGORE, Mr. LANGER, Mr. LEHMAN, Mr. MCCLELLAN, Mr. MCNAMARA, Mr. NEELY, Mr. SCOTT, Mr. SPARKMAN, Mr. SYMINGTON, and Mr. YOUNG):

S. 1333. A bill to authorize the construction, operation, and maintenance of the Hells Canyon Dam on the Snake River between Idaho and Oregon, and for related purposes; to the Committee on Interior and Insular Affairs.

(See the remarks by Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. CARLSON:

S. 1334. A bill for the relief of Harry Hume Ainsworth; to the Committee on Finance.

S. 1335. A bill to provide that the Secretary of the Interior shall investigate and report to the Congress as to the advisability of establishing Huron Cemetery, Kansas City, Kans., as a national monument; to the Committee on Interior and Insular Affairs.

By Mr. CARLSON (for himself and Mr. THYE):

S. 1336. A bill to provide for a refund or credit for tax on gasoline used or resold for certain farm equipment; to the Committee on Finance.

(See the remarks of Mr. CARLSON when he introduced the above bill, which appear under a separate heading.)

By Mr. JOHNSON of Texas:

S. 1337. A bill for the relief of Joseph Vyskocil;

S. 1338. A bill for the relief of Mrs. Margarete Schober Frugia; and

S. 1339. A bill for the relief of Mrs. Betty M. Boyersmith; to the Committee on the Judiciary.

By Mr. JOHNSON of Texas (for himself and Mr. DANIEL):

S. 1340. A bill to authorize the conveyance by quitclaim deed of certain land to the Brownsville Navigation District of Cameron County, Tex.; to the Committee on Public Works.

By Mr. BRIDGES:

S. 1341. A bill to require that the budget shall include each year a special analysis of certain long-term construction and development projects; to the Committee on Appropriations.

(See the remarks of Mr. BRIDGES when he introduced the above bill, which appear under a separate heading.)

S. 1342. A bill for the relief of Sayoko Fujimoto; to the Committee on the Judiciary.

S. 1343. A bill to require bills and resolutions authorizing appropriations reported by committees of Congress to be accompanied by an estimate of the probable cost of the legislation; to the Committee on Rules and Administration.

(See the remarks of Mr. BRIDGES when he introduced the above bill, which appear under a separate heading.)

S. 1344. A bill to extend the Federal old-age and survivors insurance system to dentists; to the Committee on Finance.

(See the remarks of Mr. BRIDGES when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. KERR:

S. 1345. A bill to readjust equitably the retirement benefits of certain individuals on the Emergency Officers' Retired List, and for other purposes; to the Committee on Armed Services.

By Mr. KEFAUVER:

S. 1346. A bill for the relief of Col. Benjamin Axelroad; to the Committee on the Judiciary.

By Mr. LEHMAN:

S. 1347. A bill for the relief of Jose Arriaga-Marin; and

S. 1348. A bill for the relief of Anna Jerman Bonito; to the Committee on the Judiciary.

By Mr. LANGER:

S. 1349. A bill to establish an internal revenue district consisting solely of the District of Columbia; to the Committee on Finance.

S. 1350. A bill for the relief of Guiseppi Castrogiovanni, his wife and child; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 1351. A bill to provide a means whereby domestic producers who are injured by increased imports resulting from trade-agreements concessions may obtain preferences in bidding for Government contracts; to the Committee on Finance.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. EASTLAND:

S. 1352. A bill for the relief of A. J. Crozat, Jr.; and

S. 1353. A bill for the relief of Mrs. Jeannette S. Hamilton; to the Committee on the Judiciary.

S. 1354. A bill to provide that one floating ocean station shall be maintained at all times in the Gulf of Mexico to provide storm warnings for States bordering on the Gulf of Mexico; to the Committee on Interstate and Foreign Commerce.

By Mr. PURTELL:

S. 1355. A bill for the relief of William Luke Phalen; to the Committee on Labor and Public Welfare.

By Mr. HOLLAND:

S. 1356. A bill to confer jurisdiction on the Court of Claims of the United States to hear, determine, and render judgment upon the claims of Trent Trust Co., Ltd., Honolulu, T. H.; to the Committee on the Judiciary.

By Mr. GEORGE:

S. 1357. A bill for the relief of Ingeburg Edith Stallings (nee Nitzki); to the Committee on the Judiciary.

By Mr. CURTIS (for himself and Mr. HRUSKA):

S. 1358. A bill to authorize modification of the flood control project for Missouri River agricultural levee unit 513–512–R, Richardson County, Nebr.; to the Committee on Public Works.

By Mr. CASE of South Dakota:

S. 1359. A bill to amend the Bankhead-Jones Farm Tenant Act to require the Secretary of Agriculture to come into agreement with the Committee on Agriculture and Forestry of the Senate, and the Committee on Agriculture of the House of Representatives with respect to any sale, exchange, grant, or transfer, in excess of 1,500 acres, of land acquired by the United States under title III of such act; to the Committee on Agriculture and Forestry.

S. 1360. A bill to amend the Internal Revenue Code of 1954 so as to provide for refunds to farmers of the amounts of tax paid on gasoline used by them in farming operations; to the Committee on Finance.

S. 1361. A bill for the relief of Margaretta Zwack; to the Committee on the Judiciary.

By Mr. BUSH:

S. 1362. A bill for the relief of William Luke Phalen; to the Committee on Labor and Public Welfare.

By Mr. MILLIKIN:

S. 1363. A bill for the relief of George B. Cox; to the Committee on the Judiciary.

By Mr. ANDERSON:

S. 1364. A bill for the relief of Elli Yorgiyadis; to the Committee on the Judiciary.

By Mr. MARTIN of Pennsylvania:

S. 1365. A bill to amend section 4091 of the Internal Revenue Code of 1954 (relating to imposition of tax upon lubricating oils), and to amend section 6416 (b) of the Internal Revenue Code of 1954 (relating to overpayments of tax); to the Committee on Finance.

By Mr. MAGNUSON:

S. 1366. A bill for the relief of the Ohio Casualty Insurance Co.;

S. 1367. A bill for the relief of Antonio Jacoe; and

S. 1368. A bill for the relief of Pedro P. Dagamac; to the Committee on the Judiciary.

S. 1369. A bill to amend section 302 of the Servicemen's Readjustment Act of 1944, as amended; to the Committee on Labor and Public Welfare.

By Mr. MAGNUSON (for himself and Mr. BUTLER):

S. 1370. A bill to amend Public Law 410, 78th Congress, with regard to compensation for overtime, Sunday, and holiday work of employees of the United States Public Health Service, Foreign Quarantine Division; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. ELLENDER (by request):

S. 1371. A bill to promote an agricultural development program under title III of the Bankhead-Jones Farm Tenant Act, and for other purposes; and

S. 1372. A bill to amend the act of April 6, 1949, to extend the period for emergency assistance to farmers and stockmen; to the Committee on Agriculture and Forestry.

By Mr. MURRAY (for himself, Mr. GOLDWATER, Mr. DWORSHAK, Mr. WELKER, Mr. MANSFIELD, Mr. YOUNG, Mr. MORSE, Mr. NEUBERGER, and Mr. BARRETT):

S. 1373. A bill to promote the economic use of Indian lands, alleviate and adjust the heirship problem involved in Indian trust or restricted allotments, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MCCARTHY:

S. 1374. A bill to provide for the termination of Government operations which are in competition with private enterprise; to the Committee on Government Operations.

By Mr. WILLIAMS:

S. 1375. A bill for the relief of Pingfong Ngo Chung and Pearl Wah Chung; and

S. 1376. A bill for the relief of Emil Arens; to the Committee on the Judiciary.

By Mr. MAGNUSON:

S. 1377. A bill to further define the national transportation policy; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. MAGNUSON (by request):

S. 1378. A bill to clarify and consolidate the authority to require the establishment, maintenance, and operation of aids to maritime navigation on fixed structures in or over navigable waters of the United States;

S. 1379. A bill to amend the definition of "airman" in the Civil Aeronautics Act of 1938, and for other purposes; and

S. 1380. A bill to authorize the imposition of civil penalties for violation of the security provisions of the Civil Aeronautics Act of 1938, and for other purposes; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bills, which appear under separate headings.)

By Mr. MARTIN of Pennsylvania (for himself, Mr. KERR, and Mr. POTTER):

S. 1381. A bill to incorporate the Society of the 28th Division; to the Committee on the Judiciary.

(See the remarks of Mr. MARTIN of Pennsylvania when he introduced the above bill, which appear under a separate heading.)

By Mr. STENNIS:

S. 1382. A bill for the relief of Homer E. Flynt; to the Committee on the Judiciary.

S. 1383. A bill to amend the act entitled "An act to facilitate and simplify the work of the Forest Service, and for other purposes," approved April 24, 1950 (64 Stat. 82); to the Committee on Agriculture and Forestry.

(See the remarks of Mr. STENNIS when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. STENNIS (for himself and Mr. EASTLAND):

S. 1384. A bill to provide that the Secretary of the Army shall return certain mineral interests, in land acquired by him for flood-control purposes, to the former owners of such land; to the Committee on Public Works.

By Mr. McCARTHY:

S. J. Res. 54. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1955, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

REFUND OR CREDIT FOR TAX ON GASOLINE USED FOR CERTAIN FARM EQUIPMENT

Mr. CARLSON. Mr. President, I introduce, for appropriate reference, a bill to provide a refund or credit on gasoline used or resold for certain farm equipment.

The Congress originally enacted the Federal gasoline tax in 1932 for purposes of general revenue. Despite this fact the concept has gradually evolved that the purpose of the tax is to finance highway construction.

This concept was crystallized by the enactment of the 1954 Federal Aid to Highway Act. The message from the President, the hearings in the Public Works Committees of both Houses, and the debate on the floor of both Houses, include numerous references to the effect that the amount appropriated for highways by the Federal Government should be equal to the amount estimated to be available from the Federal gasoline tax. The amount that was authorized by the 1954 act was in fact equal to the estimate of the revenue from the Federal gasoline tax.

The Congress has, therefore, for all practical purposes, established the principle that the Federal gasoline tax is to provide revenue to build highways. Even though the money collected from the gasoline tax is not formally earmarked for this purpose, the net effect is the same.

Since the Federal gasoline tax is considered as a use tax, that is, a tax for using the highways, then it is clearly inconsistent to collect the tax on gasoline used for nonhighway purposes.

The major form of nonhighway use of gasoline is on farms. Gasoline used on a farm is one of a number of farm production supplies—gasoline, farm machinery, insecticides, feed, fertilizer, and so on. There is no relationship whatsoever between these production supplies and the use of highways. It would be just as illogical to tax fertilizer and to use the tax for building highways as it would be to tax gasoline used on the farm for this purpose. I do not know of any other industry in which a production supply is taxed to build highways.

Looked at in another way, gasoline used on a farm is a source of power. If power used on the farm is to be taxed to build highways, it would be just as equitable to tax power used in other industries to build highways. We might, for example, tax coal, or electricity, or oil, or natural gas, or diesel fuel, and use the money thus acquired to build highways. But it would not be logical to tax these sources of power for this purpose. Nor is it equitable or logical to tax gasoline used on the farm to build highways.

The taxation of non-highway-used gasoline to build highways is, in my opinion, inequitable, illogical, and discriminatory.

Many of us who have served in various capacities in State government will remember that the same issue has been fought over in the State legislatures. In most States non-highway-used gasoline is exempt from the State gasoline tax. The only States in which the State tax is not refunded for non-highway-used gasoline are Vermont, Utah, and Wyoming. I understand that in two of these States, Utah and Wyoming, there is a considerable likelihood that nonhighway use of gasoline may be exempted from the State gasoline tax in the near future.

The reasons which have impelled 45 State legislatures to exempt nonhighway use of gasoline from the State gasoline tax, are the same as the reasons which should cause the Congress to exempt nonhighway use of gasoline from the Federal gasoline tax, that is, that it is plainly discriminatory to place on one class of citizens a tax for building highways that is not placed on other classes of citizens.

Farmers should pay their fair share of the cost of building highways, as measured by their use of the highways. They should pay both the State and Federal gasoline tax on gasoline used on the highways. But merely because gasoline happens to be the major source of power for farm production is no reason why farmers should pay the gasoline tax on gasoline that is not used on the highways.

It does not seem to me that the administration of this exemption represents any particular problem. There is no reason why the farmer, in applying for his refund of the State gasoline tax used for nonhighway purposes, should not, at the same time and on the same form, apply for a refund of the Federal tax paid for non-highway-used gasoline. The State agencies administering this program could merely act as fiscal agents for the Federal Government in this connection. I see no particular difficulty in the State and Federal tax administrators entering into arrangements whereby this could be accomplished without particular difficulty. And even if some difficulties were involved, this is no reason why the Congress should continue this inequitable tax treatment.

I expect some of my colleagues will want to ask, What is to prevent the farmer from including in his application for a refund a portion of his gasoline purchases used for highway purposes? The State governments have, over the years, developed techniques for auditing applications for refunds to prevent such abuse. Even if a few farmers do apply for more refund than they should have on the basis of nonhighway use, this is far more than offset by the fact that during many months of the year farmers do not buy enough gasoline to go to the trouble of applying for a refund on that portion of such gasoline used for nonhighway purposes. Thus, farmers as a group will continue to pay their fair share of the cost of building highways.

I am surprised at the fact that farmers have been fairly quiet over this inequitable situation in years past. I expect that the reason this is so is that most farmers have considered the Federal gasoline tax to be a temporary tax, and, since it would be terminated eventually, there was no purpose in becoming too concerned about the situation. But now that the Congress has extended the Federal gasoline tax year after year, increasing interest in correcting the inequity is developing. In the past few months I have received many letters from farmers on this situation. It appears to me that their case is fully justified and that the Congress has a responsibility to take action to eliminate this discrimination at the earliest feasible date.

Some of my colleagues may agree that nonhighway use of gasoline should be exempted from the Federal gasoline tax, but argue that this is not the time to reduce taxes. I would say to them that this is not a tax reduction, but, rather is a correction of an obvious inequity that the Congress should have corrected many years ago.

For these reasons, I am introducing a bill to provide for the exemption of gasoline used for nonhighway purposes from the Federal gasoline tax. Similar bills have been introduced in the House. I hope that the House Ways and Means Committee and the Senate Finance Committee will give such bills their early consideration.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD, following my remarks, and that, in addition, a letter from the American Farm Bureau Federation on this subject, and a letter from the Kansas Farm Bureau at Manhattan, Kans., be printed in the RECORD as a part of my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill and letters will be printed in the RECORD.

The bill (S. 1336) to provide for a refund or credit for tax on gasoline used or resold for certain farm equipment, introduced by Mr. CARLSON, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That section 6416 (b) (2) (H) of the Internal Revenue Code of 1954 (relating to special uses in which tax-payments considered overpayments) is hereby amended by striking out the period at the end of subparagraph (H) and inserting "; and"; and by adding after subparagraph (H) the following new subparagraph: "(I) In the case of gasoline taxable under section 4081, used or resold as fuel for the operation or propulsion of farm equipment."

SEC. 2. Effective date: The amendment made by section 1 of this act shall be effective with respect to gasoline used or resold on or after the first day of the first month beginning more than 10 days after the effective date of this act.

The letters, presented by Mr. CARLSON, are as follows:

AMERICAN FARM BUREAU FEDERATION,
Washington, D. C., March 7, 1955.

Hon. FRANK CARLSON,
United States Senator,
Senate Office Building,
Washington, D. C.

DEAR SENATOR CARLSON: The American Farm Bureau Federation has long favored termination of the Federal gasoline tax, thus leaving this source of revenue available to the States.

Until such time as the Federal gasoline tax is terminated, we recommend an exemption from taxation for gasoline used for nonhighway purposes.

Although the Federal gasoline tax was originally adopted to provide general revenues, the concept has been gradually adopted that the purpose of the tax is to finance highway construction. Current discussions of the Clay committee report and other proposals for an expanded highway construction program, all involve the idea that gasoline tax revenues are the source of highway financing.

We submit that to continue to tax gasoline used for nonhighway purposes to build highways is inequitable. Gasoline used for nonhighway purposes is no more related to the use of highways than fuel oil or coal used for heating buildings.

The American Farm Bureau Federation respectfully recommends that at an early date in the current Congress that hearings be held by the Senate Finance Committee on the proposal that nonhighway used gasoline be exempt from the Federal gasoline tax.

Very sincerely,

MATT TRIGGS,
Assistant Legislative Director.

KANSAS FARM BUREAU,
Manhattan, Kans., February 8, 1955.

Senator FRANK CARLSON,
Senate Office Building,
Washington, D. C.

DEAR SENATOR CARLSON: Since the Federal gasoline tax at the 2-cent rate will expire April 1, 1955, legislation to provide for extension will undoubtedly be considered in the near future.

Kansas Farm Bureau was willing to go along with the Federal gasoline tax at the time it was originally adopted as a means of financing necessary war effort with the idea that it would be only a temporary measure used not only for road purposes but other activities as well. The thinking is that a gasoline tax should be left to the State legislatures as a method of financing road construction and maintenancee by the States and counties.

It now appears that Federal financing of roads with some of the funds raised by a gasoline tax is to be a permanent policy of our National Government. If this policy is to continue, and so long as it does continue, that part of our gasoline consumption which is used for nonhighway purposes should be exempt from a Federal tax.

To impose a special tax on nonhighway gasoline for building roads is as unrealistic as it would be to impose a special tax on any other material used in the production of any commodity including agriculture commodities. Some method of exempting nonhighway gasoline from this tax must be found. This might be done by exemption or by a refund system as now practiced by many States. Arrangements could be made with the States, whereby a refund of the Federal tax might be applied for and paid along with the State.

We know that none of our Kansas congressional delegation are on the House Ways and Means Committee where the extension of the gasoline tax will first be considered. But we also know that you may be in a position to exert some influence with the House committee. With your knowledge of the history of gasoline taxes in Kansas, you realize that Kansas farmers are very much opposed to taxing gasoline which is not used on roads, regardless of whether the tax is State or Federal. To do otherwise is to burden farmers with an added heavy production cost to further aggravate the cost-price squeeze. Kansas stands near the top in the use of gasoline for agriculture production.

Many Congressmen will not have the direct interest in this issue that you have. We must depend on our representation from agricultural areas to explain the discrimination effected through a special tax on nonhighway gasoline used for road purposes.

Sincerely yours,

W. I. BOONE,
President.

Mr. THYE. Mr. President, will the Senator yield to me?

Mr. CARLSON. I yield.

Mr. THYE. I should like to ask the distinguished author of the bill to permit me to join with him as a cosponsor of the bill. I think the proposed legislation which the Senator has introduced is most appropriate, and I should like to be associated with the bill as cosponsor.

Mr. CARLSON. I would be most pleased to have the distinguished Senator from Minnesota be a cosponsor.

PROPOSED LEGISLATION RELATING TO BUDGETARY AND FISCAL MATTERS OF FEDERAL GOVERNMENT

Mr. BRIDGES. Mr. President, I introduce, for appropriate reference, two bills relating to the budgetary and fiscal matters of the Federal Government.

I am privileged to introduce them in the Senate as companion bills to measures introduced in the House of Representatives by the distinguished Member from the 24th District of California, the Honorable GLENARD P. LIPSCOMB.

Briefly, one bill would require that each bill reported by a committee of the Congress which would authorize the appropriation of moneys from the Treasury must be accompanied by a printed report which shall include an estimate from the department, or other agency concerned, of the probable cost of carrying out the legislation proposed in such bill or resolution.

The other bill would require the Bureau of the Budget to provide the Congress each year with a special analysis of certain long-term construction and development projects.

It is my opinion, Mr. President, that these two pieces of proposed legislation are vital to the proper function of the Congress. There has long been a critical need for the Congress to know to what extent the taxpayer has been committed to expenditures, annually, over long periods of time. This is particularly true in the case of great construction and development projects.

The VICE PRESIDENT. The bills will be received and appropriately referred.

The bills, introduced by Mr. BRIDGES, were received, read twice by their titles, and referred, as follows:

To the Committee on Appropriations:

S. 1341. A bill to require that the budget shall include each year a special analysis of certain long-term construction and development projects.

To the Committee on Rules and Administration:

S. 1343. A bill to require bills and resolutions authorizing appropriations reported by committees of Congress to be accompanied by an estimate of the probable cost of the legislation.

EXTENSION OF FEDERAL OLD-AGE AND SURVIVORS INSURANCE SYSTEM TO DENTISTS

Mr. BRIDGES. Mr. President, I introduce, for appropriate reference, a bill amending the Social Security Act so as to extend the benefits of the Federal old-age and survivors insurance system to our Nation's dentists.

During the 2d session of the 83d Congress, this proposal was voted favorably by the House of Representatives but failed to win approval from the Senate Finance Committee. Recently dental societies have conducted polls in many of the 48 States on this subject. Their members have favored the adoption of this retirement plan by ratios of up to 8 to 1.

The number of persons eligible for inclusion under social security has increased by more than 10 million during the past year. I am firmly of the opinion that our Nation's dentists are fully deserving of this opportunity.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1344) to extend the Federal old-age and survivors insurance system to dentists, introduced by Mr. BRIDGES, was received, read twice by its title, and referred to the Committee on Finance.

PROPOSED RECIPROCAL TRADE CASUALTIES ACT OF 1955

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, a bill to be known as the Reciprocal Trade Casualties Act of 1955, designed to cushion the impact of an expanded world-trade policy which may be felt by some segments of the American economy. The bill was originally introduced by the Honorable HENRY S. REUSS, Member from Wisconsin. It is a pleasure for me

to associate myself with Mr. REUSS and to publicly pay tribute to him for his imagination.

The House of Representatives has already passed a bill to renew and expand our reciprocal-trade-agreements program. It is my hope that the Senate will soon follow suit. Our Nation requires an expanded world trade and we know that the peace of the world depends upon increased commerce and industrial exchange. An ever larger amount of American industry is export oriented. The prosperity of these export industries and our American economy depends in the long run on the ability of the other nations to earn the dollars to buy our exports. We also appreciate that lower tariffs help the American consumer.

These comments are accurate and pertinent in the general. In the specific, unfortunately, a number of individuals, companies, and occasional communities suffer if imports to the United States increase. The legislative process in a democracy concerns itself with the specific, Mr. President, as well as with the general. We, therefore, have the responsibility to do what we can to prevent the individual specific injury as much as possible.

Earlier in the session it was a privilege for me to join with the distinguished junior Senator from Massachusetts [Mr. KENNEDY] in introducing a bill to provide some assistance to individuals, communities and industries jeopardized by lowering of trade barriers. The bill I introduce today is presented in the same spirit and with the same objective. It is designed specifically to provide import-endangered companies with certain advantages on Government procurement, and is in my judgment a supplement to the original Humphrey-Kennedy-Williams bill, S. 51.

The bill, in brief, provides that any domestic producer found by the Tariff Commission to be in danger by foreign imports may receive a certificate entitling it to a percentage advantage—up to 25 percent—in its bids for Government contracts. The idea is to provide an oxygen tent so that a company may keep busy and solvent while it finds new products which can sustain it in the long pull. The certificate would be good only for a limited period, while the company energetically sought to develop new products which could withstand competition. With the Government purchasing many billion dollars a year worth of materials, a percentage advantage of this type could be of real significance in tiding a hard-pressed producer over a transition period.

We have a responsibility to concern ourselves with these specific problems raised by expanded world trade, because every company that goes out of business and every industry that is seriously impaired and every individual who loses his job thereby, to that extent diminishes the strength of our Nation. We thereby lose savings, management, skill, and many economic and spiritual values associated with jobs, families and community living.

The principle of sharing burdens is a well-established one in the American society. The bill now at the desk would take the costs of a liberalized trade policy off the shoulders of a few isolated industries and spread that cost over the entire Nation as it should be. If we can accomplish this objective, we can move closer to our goal, a goal so ably characterized by the distinguished Member from Wisconsin [Mr. REUSS], as "trade without tears."

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1351) to provide a means whereby domestic producers who are injured by increased imports resulting from trade agreement concessions may obtain preferences in bidding for Government contracts, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Finance.

OVERTIME COMPENSATION FOR CERTAIN EMPLOYEES OF PUBLIC HEALTH SERVICE

Mr. MAGNUSON. Mr. President, on behalf of myself, and the Senator from Maryland [Mr. BUTLER], I introduce, for appropriate reference, a bill to amend Public Law 410, 78th Congress, with regard to compensation for overtime, Sunday, and holiday work of employees of the United States Public Health Service, Foreign Quarantine Division.

During the 2d session of the 83d Congress, legislation was approved by the Congress, at the request of ocean-shipping and other transportation interests, to adjust overtime pay rates for night, Sunday, and holiday inspections by employees of the Public Health Service at the various quarantine stations. The legislation did not receive Presidential approval and hence was not enacted into law.

In a statement explaining his refusal to approve the measure, President Eisenhower stated that "the claims of the shipowners for out-of-hours service have merit" and declared that "the problems which the bill seeks to solve are real and pressing." The Chief Executive further stated that he intended "to have these problems further explored," and promised a study of effective means to coordinate overtime pay for all inspectional services.

As the President so well made clear, the problems in the field of quarantine inspection are real and pressing, particularly with respect to ocean-cargo vessels and tankers. Because of weather and other conditions beyond their control, such vessels, and sometimes even the passenger liners, cannot reach port during the regularly prescribed daytime hours. Yet it may cost the owners as much as $5,000 if a vessel has to lay over until next day for quarantine inspections.

As is well known, operating costs for American vessels are extremely high in comparison to those of competing foreign ships. It is difficult enough to meet this low-cost foreign competition without running into additional quarantine-inspection costs every time a vessel fails to reach port before 6 p. m.

Inasmuch, also, as there has been no information forthcoming as to the results of the promised Presidential study, I consider the need so pressing that I have prepared a modified bill which merely seeks to place the Quarantine Inspection Service on an equality with similar inspection staffs of Customs and the Immigration Service with respect to overtime compensation.

All these employees are subject to 24-hour call and, as the President so justly stated, the Public Health group's claims for equal treatment with other inspectional groups have much merit.

Incidentally, the vessel owners for whom the overtime quarantine inspections will be made are quite willing to reimburse the Government for the full amount of overtime compensation paid, and this is provided for in the bill.

In view of the urgency of the matter, I sincerely hope that prompt consideration of the bill will be afforded in committee.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1370) to amend Public Law 410, 78th Congress, with regard to compensation for overtime, Sunday, and holiday work of employees of the United States Public Health Service, Foreign Quarantine Division, introduced by Mr. MAGNUSON (for himself and Mr. BUTLER), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

TO FURTHER DEFINE THE NATIONAL TRANSPORTATION POLICY

Mr. MAGNUSON. Mr. President, I introduce, for appropriate reference, a bill to further define the national transportation policy. This is the so-called antiracketeering amendment to the Interstate Commerce Act. Its purpose is to establish as a matter of policy the intent of Congress that the transportation industry, insofar as it is subject to the Interstate Commerce Act, shall be kept free of terrorism, extortion, racketeering, or similar unlawful tactics.

This proposed legislation springs from recommendations contained in the third interim report of the Special Committee To Investigate Organized Crime in Interstate Commerce. Its principal sponsor was the late Senator Lester C. Hunt, of Wyoming, who was a member of the Special Crime Committee.

Bills similar to the one which I am introducing today were introduced in the 82d and 83d Congresses; they were promptly reported favorably by the Committee on Interstate and Foreign Commerce, and passed the Senate. For reasons unknown to me, however, the legislation on this subject never was reported from the House Committee on Interstate and Foreign Commerce in either the 82d or 83d Congress.

As chairman of the Committee on Interstate and Foreign Commerce, I intend to ask for speedy consideration of this antiracketeering legislation.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1377) to further define the national transportation policy, introduced by Mr. MAGNUSON, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

ESTABLISHMENT OF AIDS TO CERTAIN MARITIME NAVIGATION

Mr. MAGNUSON. Mr. President, by request of the Secretary of the Treasury, I introduce for appropriate reference a bill to clarify and consolidate the authority to require the establishment, maintenance, and operation of aids to maritime navigation on fixed structures in or over navigable waters of the United States.

I ask that there be printed in the RECORD at this point a letter from the Secretary of the Treasury outlining the purpose and background of this proposed legislation.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 1378) to clarify and consolidate the authority to require the establishment, maintenance, and operation of aids to maritime navigation on fixed structures in or over navigable waters of the United States, introduced by Mr. MAGNUSON (by request), was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

TREASURY DEPARTMENT,
Washington, February 10, 1955.

The PRESIDENT OF THE SENATE.

SIR: There is transmitted herewith a draft of a proposed bill to clarify and consolidate the authority to require the establishment, maintenance, and operation of aids to maritime navigation on fixed structures in or over navigable waters of the United States.

The proposed legislation would amend section 85 of title 14, United States Code, to place in the Secretary of the Department in which the Coast Guard is operating the duty to prescribe and enforce necessary and reasonable regulations, for the protection of maritime navigation, concerning lights and other signals required on fixed structures in or over navigable waters of the United States. The amended section would contain penalty provisions.

A description of present diversity in authority is contained in the enclosure. It is believed desirable to concentrate in one agency the responsibility for prescribing and enforcing the requirements as to the lights and signals of these structures. The Coast Guard, which now has primary responsibility with respect to aids to maritime navigation generally, would appear to be the logical agency. Since the amended section is limited in its effect to the protection of maritime navigation, it would not in any way interfere with the existing authority of the Secretary of the Army to prescribe operating lights and signals for bridges.

It would be appreciated if you would lay the proposed bill before the Senate. A similar proposed bill has been transmitted to the Speaker of the House of Representatives.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

MEMORANDUM ACCOMPANYING A DRAFT BILL TO AMEND 14 U. S. C. 85

As background information for the proposed amendment to section 85 of title 14, an explanation of the present diversity of authority in connection with the lights and signals on various types of fixed structures is contained herein.

The act of August 7, 1882 (22 Stat. 309) and the act of March 23, 1906, as amended (34 Stat. 85; 33 U. S. C. 494) required owners and operators of bridges approved for construction under those acts to maintain, at their own expense such lights and other signals as prescribed by the Coast Guard. The General Bridge Act of 1946, as amended (60 Stat. 847; 33 U. S. C. 525–533), does not contain such a provision. While the Chief of Engineers and the Secretary of the Army may include compliance with Coast Guard requirements as a condition of maintenance and operation of a bridge under this later act, the Coast Guard does not now have specific statutory authority to control the navigational lights and signals on bridges approved for construction after August 2, 1946.

With respect to dams over navigable waters of the United States, the Federal Power Commission, under section 18 of the Federal Water Power Act, as amended (41 Stat. 1073; 16 U. S. C. 811), is authorized to require licensees to construct, maintain, and operate at their own expense such lights and signals as may be directed by the Secretary of the Army.

In connection with the lighting or marking of fixed structures other than bridges or dams, the authority for the Coast Guard to require certain lights and signals thereon is now derived from clauses in individual construction permits issued by the Department of the Army pursuant to authority contained in the act of August 18, 1894, as amended (28 Stat. 362; 33 U. S. C. 1).

Proposed legislation similar to the present bill was introduced in the 81st Congress and was passed by the House of Representatives, but action was not completed thereon by the Senate. At that time, the Corps of Engineers informally indicated that the Department of the Army would be in favor of such legislation.

AMENDMENT OF DEFINITION OF "AIRMAN" IN CIVIL AERONAUTICS ACT OF 1938

Mr. MAGNUSON. Mr. President, by request of the Secretary of Commerce, I introduce for appropriate reference a bill to amend the definition of "airman" in the Civil Aeronautics Act of 1938.

I ask that there be printed in the RECORD at this point a letter from Secretary Weeks explaining the purpose of this proposed legislation.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 1379) to amend the definition of "airman" in the Civil Aeronautics Act of 1938, and for other purposes, introduced by Mr. MAGNUSON (by request), was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

THE SECRETARY OF COMMERCE,
Washington, February 9, 1955.

Hon. RICHARD M. NIXON,
President of the Senate,
United States Senate,
Washington, D. C.

DEAR MR. PRESIDENT: It is requested that the enclosed proposed bill to amend the definition of "airman" in the Civil Aeronautics Act of 1938, and for other purposes, be introduced in the Senate at your earliest convenience.

As presently defined in section 1 (6) of the Civil Aeronautics Act of 1938 (49 U. S. C. 401 (6)), the term "airman" includes, among other aeronautical occupations, "any individual who is directly in charge of the inspection, maintenance, overhauling, or repair of aircraft" or their components. Section 610 (a) (2) of the act declares that it is illegal "for any person to serve * * * as an airman * * * without an airman certificate" issued by the Administrator of Civil Aeronautics of this Department. Thus all mechanics in charge of inspection, maintenance, overhauling, or repair of aircraft or their components in the United States must hold a certificate of competency issued by the Administrator. In consequence of this rigid provision of the act, some mechanics and repairmen are required to hold certificates although no substantial public interest requires it.

Aircraft manufacturers must employ certificated mechanics to repair their own products, although there is no such requirement with respect to the original production of the same article. Obviously a manufacturer who has demonstrated his ability to maintain the quality of his product under a Civil Aeronautics Administration production certificate is qualified to repair, restore, or rebuild the same product at his own factory.

Repair stations performing a great variety of special services to aircraft are also certificated by the Administrator of Civil Aeronautics. The qualifications of the employees are checked upon the initial application for the certificate, and the maintenance of a qualified staff, and of high standards in work done, is requisite to its retention. Since employee qualifications are cumulatively passed upon in connection with this Government certification and inspection program, it is unnecessary duplication to require in addition a check upon, and a certification of, the qualifications of the individual supervisory employees.

It is our opinion, therefore, that aviation safety does not require the certification either of mechanics who work for a manufacturer on aircraft and aircraft components which he produces, or of employees of a certificated repair station. The enclosed proposed bill would amend section 1 (6) of the Civil Aeronautics Act of 1938 so as to authorize the Civil Aeronautics Board to except persons so employed from the definition of "airman." This change would permit the elimination of regulation and control of these occupations where Government supervision serves no useful purpose. The Department of Commerce, therefore, recommends early and favorable consideration of this proposed legislation by the Congress.

We have been advised by the Bureau of the Budget that it would interpose no objection to the submission of this proposed legislation to the Congress for its consideration.

Sincerely yours,

SINCLAIR WEEKS,
Secretary of Commerce.

CIVIL PENALTIES FOR VIOLATION OF SECURITY PROVISIONS OF CIVIL AERONAUTICS ACT OF 1938

Mr. MAGNUSON. Mr. President, by request of the Secretary of Commerce, I introduce, for appropriate reference, a bill to authorize the imposition of civil penalties for violation of the security provisions of the Civil Aeronautics Act of 1938.

I ask that there be printed in the RECORD at this point a letter from Secretary Weeks explaining the purpose of this proposed legislation.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 1380) to authorize the imposition of civil penalties for violation of the security provisions of the Civil Aeronautics Act of 1938, and for other purposes, introduced by Mr. MAGNUSON (by request), was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

THE SECRETARY OF COMMERCE,
Washington, February 16, 1955.

Hon. RICHARD M. NIXON,
President of the Senate, United States Senate, Washington, D. C.

DEAR MR. PRESIDENT: It is requested that the enclosed draft of a bill be introduced in the Senate at your convenience. The purpose of the proposal is: "To authorize the imposition of civil penalties for violation of the security provisions of the Civil Aeronautics Act of 1938, and for other purposes."

Following the outbreak of hostilities in Korea, legislation was enacted authorizing the Secretary of Commerce, upon the direction of the President, to exercise control of the flight of aircraft over certain areas for national security purposes. (64 Stat. 825; title XII, Civil Aeronautics Act of 1938, as amended; 49 U. S. C. 701–705.) Thereafter, an Executive order was issued by the President (Executive Order No. 10197, December 21, 1950), directing the Secretary to put the program into effect. At present the only sanctions which may be applied for violations of the security regulations which have been issued by the Secretary under that authority are either (1) suspension or revocation of the offender's pilot certificate or operating authority, or (2) in the case of willful offenses, criminal penalties. In most cases, neither of these sanctions is appropriate.

To an airline or other commercial pilot, suspension or revocation means loss of earnings, and to the air transport industries, loss of essential man-hours of skilled services. Suspension of the operating certificate of a carrier, for example, means loss of essential transportation service to the Nation. These results are both inappropriate to the times and too severe for the usual offense.

Criminal penalties are even more drastic, and thus even less appropriate in most of the cases presented. In any event, criminal intent is usually lacking in these cases, which generally involve some unauthorized entry into an air defense identification zone through oversight or neglect.

The civil penalty which is the normal sanction applied for minor violations of other safety provisions of the Civil Aeronautics Act of 1938 would provide a moderate and expeditious remedy more appropriate to these technical violations. An amendment to the law is necessary to authorize the imposition of that sanction in such cases. The attached bill would provide that authority; it would amend section 901 (a) of the act so as to include within those infractions for which a civil penalty may be imposed, any violation of a "rule, regulation, or order issued under title XII" of the act.

The Bureau of the Budget has advised that it has no objection to the transmission of this letter and proposed legislation to the Congress.

Sincerely yours,

SINCLAIR WEEKS,
Secretary of Commerce.

INCORPORATION OF SOCIETY OF THE 28TH DIVISION

Mr. MARTIN of Pennsylvania. Mr. President, on behalf of myself, the distinguished Senator from Oklahoma [Mr. KERR], and the distinguished Senator from Michigan [Mr. POTTER], I introduce, for appropriate reference, a bill to incorporate the Society of the 28th Division. All three of the sponsors of this bill are veterans of that organization, and every State in the Union is represented in the 28th Division. Fourteen States are represented as the incorporators.

Units of the 28th Division trace their history back to the Revolution. It first fought as a division in World War I, and was the fourth division in the whole United States Army in number of casualties. It also fought in World War II, in Germany, and during the Korean conflict, was a part of our occupational troops in Germany.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1381) to incorporate the Society of the 28th Division, introduced by Mr. MARTIN of Pennsylvania (for himself, Mr. KERR, and Mr. POTTER), was received, read twice by its title, and referred to the Committee on the Judiciary.

IMPROVEMENT OF TIMBER DEVELOPMENT IN NATIONAL FORESTS

Mr. STENNIS. Mr. President, I introduce, for appropriate reference, a bill designed to improve timber development in national forests and to simplify the work of the Forest Service. This bill provides that 10 percent of all moneys received from the sale of timber and other forest products on the national forests during each fiscal year shall be available at the end thereof when appropriated by Congress. The bill further provides that these funds shall continue to be available until expended under such regulations as the Secretary of Agriculture may prescribe within the national forests in the States from which such receipts are derived for improvement. In other words, the funds made available by this proposed bill would facilitate needed improvement of timber stand through pruning, thinning, burning, poisoning, girdling, controlling rodents, and other improved cultural methods.

Membership on the National Forest Reservation Commission has given me an opportunity to observe the fine progress which the Forestry Service is making and also some of the problems facing reforestation.

I have been very much impressed with the work being accomplished under the Knutson-Vandenberg Act which, in my opinion, is extremely important and highly beneficial. However, some of the most urgent needs for reforestation and timber-stand improvement work on the national forest are on areas where timber sales are not yet possible. The present program is not adequate to provide needed improvement for these areas. There is a substantial area of timberlands which were cut over when in private ownership and now included in national forest regions. These areas are badly in need of stand improvement and reforestation measures. An example of such a situation is found in my State of Mississippi where 110,000 acres are in need of planting and another 100,000 acres which have been planted but in critical need of weeding and thinning. I also understand other desired work would include cutting and girdling low valued trees in 56,000 acres of natural stands of longleaf pine-scrub oak type in Mississippi. There are similar needs for the same type of work in Louisiana, Texas, Alabama, Florida, and South Carolina.

Officials of the Department of Agriculture estimate the cost of the high priority work for all national forests in the neighborhood of $115 million, which includes tree planting, timber-stand improvement, thinning, disease control—except white-pine blister rust—and rodent control work. This need when compared with present appropriations of less than $1 million—$810,000—for fiscal 1955 falls far short of meeting the critical need in developing reforestation and timber stand improvement work. The estimated $800,000 provided in the 1956 fiscal budget is not adequate to even restore the acreage of timber land annually destroyed nationwide by fire. Therefore, the backlog of work is increasing each year. The $115 million estimated for high priority work is far short of covering the cost of reforestation of the estimated 4 million acres within all national forests which need work so badly. Actually, these estimates would cover only the high priority work that should be accomplished on nonsale areas within a normal 10-year period.

Timber stand improvement measures and reforestation on several million acres where commercial cutting is not feasible cannot be accomplished under the provisions of the Knutson-Vandenberg Act. Neither can rodent control for the protection of established production and growing stock be protected under that act.

Mr. President, in my opinion the appropriation provided for in this bill amounting to about $7 million annually, based on the average of last 3-year sale of timber and other forest products on national forests, is not an expenditure, but can be considered a sound investment. I firmly believe that this is a pressing problem and I hope it will be given full consideration by the Senate Committee on Agriculture and Forestry.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1383) to amend the act entitled "An act to facilitate and simplify the work of the Forest Service, and for other purposes," approved April 24, 1950 (64 Stat. 82), introduced by Mr. STENNIS, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

TRUST ASSOCIATION OF H. KEMPNER — REFERENCE OF SENATE BILL 542 TO COURT OF CLAIMS

Mr. JOHNSON of Texas (for himself and Mr. DANIEL) submitted the following resolution (S. Res. 73), which was referred to the Committee on the Judiciary:

Resolved, That the bill (S. 542) entitled "A bill for the relief of the Trust Association of H. Kempner" now pending in the Senate, together with all the accompanying papers, is hereby referred to the Court of Claims;

and the court shall proceed with the same in accordance with the provisions of sections 1492 and 2509 of title 28 of the United States Code and report to the Senate, at the earliest practicable date, giving such findings of fact and conclusions thereon as shall be sufficient to inform the Congress of the nature and character of the demand as a claim, legal or equitable, against the United States and the amount, if any, legally or equitably due from the United States to the claimant.

COMMISSION TO STUDY COPYRIGHT LAWS—INDEFINITE POSTPONEMENT OF BILL

Mr. LANGER. Mr. President, on March 2, 1955, I introduced the bill (S. 1254) creating a Federal commission to study the copyright laws and to make recommendations for their revision. I ask unanimous consent that further consideration of the bill be indefinitely postponed.

The VICE PRESIDENT. Is there objection to the request of the Senator from North Dakota? The Chair hears none, and it is so ordered.

INTERSTATE COMPACT TO CONSERVE OIL AND GAS—CHANGE OF REFERENCE

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the Committee on Interstate and Foreign Commerce be discharged from further consideration of Senate Joint Resolution 38, consenting to an interstate compact to conserve oil and gas, and that the joint resolution be appropriately referred.

It is my understanding that in previous years proposed legislation relating to this subject has been referred to the Committee on Interior and Insular Affairs.

I see on the floor of the Senate the distinguished chairman of the Committee on Interior and Insular Affairs. I believe that is also his understanding, that compacts relating to oil and gas generally are referred to his committee.

Mr. MURRAY. That is correct.

Mr. MAGNUSON. I ask unanimous consent that the Committee on Interstate and Foreign Commerce be discharged from further consideration of the joint resolution.

The PRESIDING OFFICER. Without objection, it is so ordered, and the joint resolution will be referred to the Committee on Interior and Insular Affairs.

PROTECTION OF VALUES OF CERTAIN LANDS IN NATIONAL FORESTS—CHANGE OF REFERENCE

Mr. ELLENDER. Mr. President, under date of January 24 last the distinguished Senator from New Mexico [Mr. ANDERSON] introduced Senate bill 687, to authorize the Secretary of Agriculture to protect the timber and other surface values of lands within the national forests, and for other purposes, and it was referred to the Committee on Agriculture and Forestry. The bill really deals with mining, and should be referred to the Committee on Interior and Insular Affairs. I therefore ask unanimous consent that the Committee on Agriculture and Forestry be discharged from the further consideration of the bill, and that it be referred to the Committee on Interior and Insular Affairs.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

SUPPLEMENTARY BENEFITS FOR RECIPIENTS OF PUBLIC ASSISTANCE IN CERTAIN CASES—ADDITIONAL COSPONSOR OF BILL

Mr. KERR. Mr. President, I ask unanimous consent that the name of the distinguished junior Senator from Michigan [Mr. MCNAMARA] may appear as a joint cosponsor of Senate bill 627, to provide supplementary benefits for recipients of public assistance and benefits for others who are in need through the issuance of certificates to be used in the acquisition of surplus agricultural food products.

The VICE PRESIDENT. Is there objection to the request of the Senator from Oklahoma? The Chair hears none, and it is so ordered.

ANALYSIS AND REEVALUATION OF HUMAN AND ECONOMIC PROBLEMS OF MENTAL ILLNESS—ADDITIONAL COSPONSORS OF JOINT RESOLUTION

Mr. HILL. Mr. President, since the introduction of the joint resolution (S. J. Res. 46) providing for an objective, thorough, and nationwide analysis and reevaluation of the human and economic problems of mental illness, and for other purposes, and pursuant to my previous request, the names of the following Senators have been added as additional cosponsors: Mr. KEFAUVER, Mr. HUMPHREY, Mr. LANGER, Mr. NEUBERGER, Mr. YOUNG, Mr. CHAVEZ, Mr. IVES, Mr. MURRAY, Mr. NEELY, Mr. DOUGLAS, Mr. LEHMAN, Mr. KENNEDY, Mr. MCNAMARA, Mr. CLEMENTS, Mr. HENNINGS, Mr. JACKSON, Mr. KILGORE, Mr. LONG, Mr. MAGNUSON, Mr. MANSFIELD, Mr. MONRONEY, Mr. MORSE, Mr. PASTORE, Mr. PAYNE, Mr. POTTER, Mr. SCOTT, Mr. SMATHERS, Mr. SPARKMAN, and Mr. SYMINGTON.

EXPENDITURES BY COMMITTEE ON ARMED SERVICES — REFERENCE OF RESOLUTION TO COMMITTEE ON RULES AND ADMINISTRATION

Mr. CLEMENTS. Mr. President, I ask unanimous consent that Calendar No. 45, the resolution (S. Res. 72) authorizing expenditures for hearings and investigations by the Committee on Armed Services, be taken from the calendar and referred to the Committee and Rules and Administration.

The VICE PRESIDENT. Is there objection to the request of the Senator from Kentucky? The Chair hears none, and it is so ordered.

PROHIBITION OF ALCOHOLIC BEVERAGE ADVERTISING IN INTERSTATE COMMERCE—AMENDMENTS

Mr. LANGER submitted amendments, intended to be proposed by him to the bill (S. 923) to prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes, which were referred to the Committee on Interstate and Foreign Commerce, and ordered to be printed.

EXTENSION OF TRADE AGREEMENTS ACT—AMENDMENTS

Mr. PAYNE submitted amendments, in the nature of a substitute, intended to be proposed by him to the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, which were referred to the Committee on Finance, and ordered to be printed.

PROPOSED REVENUE ACT OF 1955—AMENDMENTS

Mr. NEUBERGER (for himself and Mr. MORSE) submitted amendments, intended to be proposed by them, jointly, to the bill (H. R. 4259) to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates, and to provide a $20 credit against the individual income tax for each personal exemption, which were ordered to lie on the table and to be printed.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. KERR:

Transcript of discussion on the "Capitol Cloakroom" radio program between Senator LONG and newspaper correspondents on March 5, 1955.

By Mr. KUCHEL:

Address delivered by Earl Warren, Chief Justice of the United States, at the Second Century Convocation of Washington University, St. Louis, Mo., February 19, 1955.

By Mr. KEFAUVER:

Recent correspondence between himself and Hon. Edmund G. Brown, attorney general of California, with reference to efforts to combat crime.

By Mr. DIRKSEN:

Document prepared under his direction relating to the historical development of the conference committee.

PROTECTION OF CONSUMERS OF NATURAL GAS

Mr. WILEY. Mr. President, the consumers of our Nation are following most anxiously the opening stages of the battle in the current 84th Congress which will determine whether or not the consuming public will be protected from being gouged by skyrocketing natural-gas rates.

It is my earnest hope that the very unsound legislation which has been introduced for the purpose of depriving consumers of protection will be rejected by the Senate and House of Representatives. This has been my position ever since the inception of this battle many years ago, and it remains my position.

I have, moreover, communicated to the President, respectfully urging that he reject the recent gas-exemption recommendations which were unfortunately made by the Committee on National Fuel Policy.

I present a letter which I wrote to the President, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. DWIGHT D. EISENHOWER,
The President of the United States,
The White House,
Washington, D. C.

MY DEAR MR. PRESIDENT: I am writing most respectfully to urge that you reject the recommendations of the Commission which had been appointed to study the Nation's fuel policies insofar as those recommendations relate to proposed exempting of natural gas from Federal control.

With all due respect to the distinguished members of that Commission, may I say frankly that in my judgment, were the recommendations of the Commission adopted, the net effects might be:

(a) To leave the consumers of the United States at the helpless mercy of a relatively small number of companies who have in the past shown themselves eager to skyrocket rates as high as the traffic would bear;

(b) somewhat to demoralize the people of the United States by weakening their respect of judicial process. Thus, decontrol would lead many people to feel that the judgment of the Supreme Court (which had fully confirmed the legality of such Federal control) has been arbitrarily tossed into the wastebasket because the majority decision did not please certain private interests and because those interests proceeded to raise a misleading hue and cry for decontrol.

May I say that I very definitely believe that in all fairness the investors in the vital natural-gas industry are entitled to a fair return on their investment and that they should be given sufficient incentive.

But unless they are subject to Federal control (which is, of course, always subject to court review), the respective consuming States like my own would be virtually helpless in trying to establish reasonable prices by the time the over-priced gas were to come into the respective State borders.

If we were to accept the absurd line of reasoning that the natural gas industry must be decontrolled in order for it to expand operations, then we would end up by scrapping Federal controls on railroads, on airplanes, on electric utilities, on the ground that Federal controls discourage those operations, too. I say that the public interest, through regulation, must remain superior to that of any purely private interest.

May I say, too, that the national defense with which you are naturally principally concerned, can best be served by reasonable Federal controls on natural gas.

Very shortly, Mr. President, I should like to submit to you the names of members of a highly qualified municipal delegation which would like to visit with you to explain the case for control of natural gas. I have been in close contact with Mr. Shanley toward such a meeting.

I know how heavy and time consuming are the countless burdens of your office and those of your staff, but I trust that you will find it possible to give this issue your considered personal judgment in consultation with staff experts.

With highest esteem of your great services, I remain,

Sincerely yours,

ALEXANDER WILEY.

THE NARCOTICS PROBLEM IN THE FAR EAST

Mr. WILEY. Mr. President, over a period of many months, I have pointed out to the Nation the seriousness of the problem of narcotics addiction among United States servicemen in the Far East.

Fortunately, this problem does not affect more than a very small proportion of our servicemen in that theater.

Nevertheless, as was pointed out during Foreign Relations Committee hearings which I conducted on the International Opium Protocol, Communist China has been flooding free Asia and the rest of the world with opium. And one of her main targets consists of American servicemen. Fortunately, I am glad to note that yesterday, the Senate Rules Committee approved Senate Resolution 67 offered by my distinguished colleague, the junior Senator from Texas [Mr. DANIEL] for a review of this addiction problem by a Judiciary Subcommittee.

By way of depicting various phases of the problem in the Far East, I send to the desk now excerpts from a report as furnished by the headquarters of the United States Army Forces for the Far East, Office of the Provost Marshal General, to Dr. Frank B. Berry, Assistant Secretary of Defense.

I believe that this background information will be of interest to my colleagues. While it does not relate the overall grim statistics but confines itself to exploratory data, it will help flash a warning to our people. This narcotics problem is no accident, no mere coincidence. It is obvious that Red China is determined to continue her diabolic drive to subvert the world through dope.

The latest warning of that danger came from Narcotics Bureau Commissioner Harry Anslinger, at his recent testimony before the House Appropriations Subcommittee.

I believe that only the most vigorous and articulate reaction by the conscience of the free world can serve to deter Red China from her present infamous campaign.

In addition, the most effective detection and enforcement efforts will be necessary on the part of all the free nations.

Unfortunately, however, in the Far East, particularly, only the most insignificant fraction of what could be done and should be done against the dope problem is now being done. The evil of domestic corruption allies itself with the evil of international trafficking and the result is to further endanger the free nations of that area.

I ask unanimous consent that the background material from the Defense Department be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEMORANDUM ON FAR EAST NARCOTICS PROBLEM

HEADQUARTERS, UNITED STATES
ARMY FORCES, FAR EAST,
OFFICE OF THE PROVOST MARSHAL,
APO 343, September 29, 1954.

INTRODUCTION

This briefing will cover the law enforcement and confinement program pertinent to the narcotics situation in Far East Command. The scope of the briefing encompasses several phases of police activity; jurisdiction, liaison arrangements with other agencies, apprehension methods employed, types of persons and drugs involved in illegal narcotics traffic, and procedures for handling narcotics offenders in military confinement facilities.

THE APPREHENSION PROGRAM

1. Jurisdiction

A. Service personnel and civilians accompanying United States forces. The Manual for Courts-martial, which governs all three services, provides jurisdiction over civilian personnel, and by one service over personnel of another service in accordance with regulations prescribed by the President. This is particularly applicable to service police personnel on duty. The post, base, or station commander is charged with discipline within the installation, and the operation of routine patrols in the vicinity of the installation. Most narcotics apprehensions, however, are made as the result of criminal investigation, or detective work. In Far East Command the Army is charged with "off-post" criminal investigation, except in specific areas where Air Force or Navy personnel predominate, such as at Tachikawa Air Base, or Yokosuka Naval Station. Under those situations agreements have been reached whereby the Air Force or Navy will conduct "off-post" investigations in those areas.

B. Japanese nationals. United States Armed Forces police do not have jurisdiction over Japanese nationals. The Japanese police are responsible for the police of Japanese citizens and foreigners living on the Japanese economy.

C. Korean nationals. United States Armed Forces police have limited jurisdiction over Korean nationals. Through agreements with the Korean Government, military police have authority to apprehend Korean nationals who commit offenses against United States property or persons. When apprehended the violators are delivered immediately to the Korean authorities for prosecution. The Korean national police have primary responsibility for apprehension of Korean law violators.

2. Liaison arrangements

A. Indigenous police. In consideration of the responsibilities of the Japanese and Korean Governments, the United States Armed Forces have not insisted upon authority to apprehend citizens of the two countries. Very satisfactory liaison arrangements have been effected that permit indigenous police to operate with United States Armed Forces police. In actuality the agreements have permitted a free exchange of police information on law violations, and if an apprehension is to be effected or a raid conducted, the police with unprejudiced jurisdiction are present to accomplish the task.

B. Narcotics Bureau of United States Treasury Department. The illegal narcotics traffic is such a problem in the United States that the Treasury Department maintains representatives in the Far East to help combat the traffic. Information on illegal narcotics or narcotics users is freely exchanged between United States Armed Forces police and the United States Treasury representative in Tokyo, Mr. Kent Lewis.

C. Indigenous governments. Continuous liaison with the Japanese Government is maintained for the Far East Command by Army forces, Far East Provost Marshal Liaison Division. The Chief of the Division acts as chairman of the Joint Committee for Suppression of Vice. The committee was organized in 1952 when the articles of agreement between the United States and Japan were signed. The commanding general of the Army forces was designated as responsible for police liaison with the Japanese Government for all three services. The committee provides for a mutual exchange of

information and coordination of effort, including legislation, toward suppression of illegal narcotics and other forms of vice in Japan.

The commanding general, Eighth United State Army, was delegated responsibility for liaison activities in Korea, and has effected a similar arrangement with the Republic of Korea Government aimed at the suppression of vice in Korea.

3. Apprehension methods employed

A. No unusual or sensational methods are employed in the apprehension program. Investigators are trained to observe, and to follow leads received from any source. Information on users or distributors and their source of supply is carefully investigated until the violators are apprehended or further investigation is useless.

B. Military investigators work very closely with the Korean and Japanese police. This is more important in the narcotics suppression program, perhaps than in any other phase of investigative activity because of the intermingling of civilian suppliers and servicemen users. In the metropolitan areas where the traffic is greater, special investigators are assigned exclusively to the narcotics program. Representatives of the Japanese police are assigned on a permanent basis to work with the United States investigators on the suppression of narcotics.

C. Army Forces, Far East, and Far East Air Forces each have an investigator group assigned to the headquarters which are available for immediate dispatch to assist local investigators in any part of the command. Special investigators are dispatched to a locality having an increase in narcotics incidents or suspected large-scale traffic in heoin or other drugs.

D. Science is also employed in the narcotics apprehension program. A lie detector is a standard piece of equipment in the larger criminal investigation detachments, and available to the smaller detachments. A complete criminal investigation laboratory is maintained in Tokyo for the benefit of any law enforcement agency that desires technical assistance in analysis of suspect articles or material. In addition to the Far East Criminal Investigation Laboratory, there is a medical laboratory in Tokyo, and another in Korea, which are available to investigators. All of the laboratories use the latest methods, such as paper chromotography, and are capable of detecting the most minute quantities of narcotics adhering to instruments, or present in specimens. The laboratories are invaluable in apprehending and convicting persons who use narcotics.

4. Statistical analysis of narcotics situation

A. The accumulation and analysis of statistical data is a vital part of police work. A successful narcotics suppression program must be based on knowledge of the type of person involved, the kind and source of the drugs used, and the attitude of the indigenous population in the locality.

B. The narcotics offender in the Far East.

(1) Usually he is a soldier. The Army has approximately 65 percent of the personnel in the command, but furnishes 80 percent of the convicted violators. The incidence of narcotics apprehensions among Army troops is twice as great as the incidence among Air Force and Navy personnel.

(2) Usually he is a Negro. Seventy-eight percent—3 out of every 4—are Negro. This is a very high proportion, and becomes even higher when command population ratios are compared. Only 13 percent of the command are Negroes, as against 78 percent of the offenders. The incidence among Negro troops is 20 times the incidence among white troops—14 per thousand compared to seven-tenths of 1 per thousand. This preponderance also exists among juvenile narcotics users in the United States. Negroes represent about 10 percent of the total juveniles but furnish 75 percent of the narcotics users.

(3) The violator is a reasonably well educated person. Seven percent have attended grade school, 87 percent have attended high school, and 6 percent have attended college.

(4) The majority are not new to the service, nor newly arrived in the Far East. In total service time, 29 percent have under 2 years, 34 percent have from 2 to 3 years, and 36 percent have over 3 years service. The amount of time in the Far East is very comparable to total service time. Thirty-five percent have been here less than 1 year, 42 percent have been here from 1 to 2 years, and 18 percent have been here more than 2 years.

(5) Many are chronic disciplinary problems. Twenty-one percent have been convicted by court-martial of other offenses once, 19 percent have been convicted twice, 20 percent have been convicted 3 or more times.

(6) The narotics problem is not confined to the Far East. There are an estimated [1] 50,000 adult, and 10,000 adolescent, addicts in the United States. It was reasonable to assume that some servicemen used narcotics before coming to the Far East. Research among convicted offenders revealed that many had. Nineteen percent used narcotics in civilian life before coming into the service, 5 percent first used narcotics after coming into the service, but while still stationed in the United States. Seventy-three percent first used narcotics after coming to the Far East; 40 percent in Japan, and 33 percent in Korea.

(7) Who induces the servicemen to use narcotics? Records show that 20 percent were introduced to drug use by prostitutes, 39 percent by service friends, 21 percent by civilian friends, and 20 percent by peddlers. Efforts directed against prostitution, and efforts to remove narcotics users from nonusers, reduces the possibility of others becoming users.

(8) It is a basic conclusion that among narcotics users there is a close affinity between the type of drug available and the user's choice of drug. Most of the world's supply of opium originates on the Asiatic mainland. The choice of drug in the Far East is an opium derivative. Heroin is the overwhelming choice—80 percent of the total. It is easy to conceal, the effect is quicker, and it can be taken in a number of ways. These factors are important to a person who uses or traffics in narcotics. Less than 1 percent of the illegal narcotics is raw opium. It is too difficult to conceal, and too difficult to use. Among narcotics users opium smoking is passé. Marihuana, synthetic opium derivatives, benzedrine, and other nervous system stimulants are used to some extent, but not to the same extent as heroin.

(9) The illegal narcotics traffic is not confined to service personnel. They do not smuggle or sell drugs. The smugglers and sellers are indigenous civilians, with whom the servicemen associate more or less freely and, over whom service police or courts have no jurisdiction. A soldier, sailor, or airman apprehended for a narcotics violation is almost certain to be tried by court martial, and if the evidence warrants, convicted. If convicted he will certainly be sentenced to confinement. The same attitude is taken by civil courts in the United States. Our national attitude toward illegal narcotics demands it. Such is not the case in Korea and Japan where the national attitude toward the traffic is more tolerant. Long association with the narcotics problem causes them to treat it more lightly than we do in the United States.

[1] Control of Narcotics Addiction, by George E. Connery, Washington, D. C.; published in J. A. M. A., vol. 147, No. 12, pp. 1162–1165, dated Nov. 17, 1951.

Japanese officials are becoming increasingly aware of the evils of narcotics and have passed many laws to control the traffic. Lesser officials, and the mass of the people, still regard the illegal traffic with no particular concern. Fifty percent of those apprehended are not brought to trial, 13 percent are given suspended sentences, 11 percent are given sentences of more than 1 year, 23 percent are given sentences of less than 1 year, 2 percent are fined more than 5,000 yen, and 1 percent are fined less than 5,000 yen. As a basis of comparison of the value of the fine, a housemaid will receive 6 to 10,000 yen monthly, and an average laborer will earn approximately 10,000 yen per month.

In Korea the situation is worse than it is in Japan. Of those narcotics cases referred to the prosecutor's office, 62 percent were dismissed without trial, 26 percent were tried by a summary court, and only 11 percent were tried by a court capable of sentencing to long prison terms. This chart does not show those cases summarily handled by the police and not referred to the prosecutor's office. There are only scattered statistics on police cases, but we know a very high percent of the cases are handled in the police station and never referred for trial. Narcotics offenders in Korea are never out of circulation for very long periods. There are many reasons for this. The government is bankrupt. Narcotics users are seldom productive workers and Korean prisons are expected to be self-supporting. Graft is commonplace. The general attitude of the Korean people toward narcotics is one of complete unconcern, despite laws forbidding the traffic.

CONFINEMENT PROCEDURES

1. A serviceman apprehended for a narcotics violation is tried by court-martial, and if found guilty, confined in a local stockade or guardhouse until the case is reviewed by the convening authority.

2. If in Japan, the prisoner is transferred directly to the United States Army Stockade in Tokyo when the sentence is approved. If in Korea, the prisoner is transferred immediately to the Pusan Military Post Stockade, and at the earliest opportunity transferred to the United States Army Stockade in Tokyo.

3. When the prisoner arrives at the United States Army Stockade in Tokyo he has actually entered the military penitentiary system. He is interviewed and completely classified as to background, type of offense, type of custody, and many other ways by the prison staff. The results of the interviews and classification determination will have a bearing on possible future rehabilitation and parole. The prisoner is held in Tokyo until shipped to the United States in a packet of other prisoners, either to serve his sentence, or earn parole.

4. The Narcotics Bureau of the United States Treasury Department is furnished the names of all prisoners convicted of narcotics offenses when they are shipped to the United States. This practice avoids the possibility of convicted narcotics offenders being released among the civilian population without the knowledge of the principal United States narcotics control agency.

5. At all stages of movement from local stockades to the United States, the prisoner is furnished necessary medical attention, carefully observed, and searched many times for narcotics or other contraband.

SUMMARY

We know we have a problem in the illegal use of narcotics by servicemen in the Far East. We do not think the problem is out of proportion, under the circumstances. The Orient is the traditional center of the illegal narcotics traffic. The attitude of the indigenous civilians is generally one of indifference and tolerance toward the use of drugs. It is not unusual for an otherwise honest worker to sell heroin in his spare

time to supplement his income. Opium and its derivatives are more available, and cheaper, here than in the United States. There is a wide variance in the price of narcotics. From day to day, and locality to locality, there are wide fluctuations. At the moment a 0.5-gram deck of heroin sells in southern Japan for 500 yen, $1.38. The same amount of heroin in New York City or Chicago would probably sell for more than $10, perhaps as much as $50.

Statistics on illegal users of narcotics in the United States show that 50 percent of the total are between 21 and 30 years old. Almost all service personnel in the Far East Command are in that age group.

Research among offending service personnel brought out the information that 24 percent were using narcotics in the United States. Many of those convicted of narcotics offenses in the Far East were previously convicted of other offenses, some of them 3 and 4 times. This group probably would have started to use narcotics had they never come to the Far East.

In view of these facts it is surprising that the ratio of users is as small as it is.

We are not attempting to pass over the problem. We are constantly working at it the same as we are at blackmarket, prostitution, pilferage, and other crimes. We maintain liaison with the Japanese and Korean officials, and keep pressure on them to work at the problem from the civilian angle. We spread the available men, money, and time as thick as we can on each of the problems. Unfortunately, it is never thick enough to eliminate any of the problems. We can devote enough effort to all of them to hold them in check.

We believe that the program of enforcement now in effect will keep the illegal use of narcotics by servicemen to a minimum.

ONE HUNDRED AND FIFTH ANNIVERSARY OF THE BIRTH OF THOMAS G. MASARYK

Mr. IVES. Mr. President, yesterday, March 7th, marked the 105th anniversary of the birth of Thomas G. Masaryk. I ask unanimous consent to have printed in the body of the RECORD, following my remarks, a statement I have prepared in recognition of this noteworthy occasion.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR IVES

Today, on the 105th anniversary of the birth of Thomas G. Masaryk, his unwavering faith and devotion to freedom which brought to realization his dreams of a free Czechoslovakia, continue to sustain the gallant Czech people in their dark hour.

Thomas Masaryk was a man of far-reaching accomplishments. But above all was his compassionate dedication to democratic ideals, which embraced all peoples. In every sense this great patriot was a world leader and humanitarian.

The legacy of liberty which Masaryk left to his beloved land will never be obliterated by the Soviet despots. It is enshrined in the hearts of his people who bravely resist the ruthless Communist tyranny.

This anniversary of Masaryk's birth should provide renewed courage to the brave people of Czechoslovakia. Equally it should provide determination to free peoples everywhere that the march of Communist despotism must be stopped.

Mr. LEHMAN. Mr. President, yesterday, March 7, marked the 105th anniversary of the birth of Thomas G. Masaryk, the late President of Czechoslovakia, who died some years ago.

I ask unanimous consent that a statement which I have prepared in commemoration of this anniversary be printed at this point in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LEHMAN

March 7 marks the 105th anniversary of the birth of Thomas G. Masaryk, that great world statesman and fighter for democracy, the late President of Czechoslovakia.

Thomas G. Masaryk was one of the world's great scholars and writers. His contributions to the writings of our times on the subject of democracy are of lasting significance.

His death, in 1937, at the age of 87, brought to an end one of the most fruitful lives of our time.

Today, the people of his beloved Czechoslovakia are living under the yoke of Communist enslavement. The memory of Thomas G. Masaryk, and the democratic ideals which he nurtured throughout his life bring continual hope to the people of Czechoslovakia. We have a special obligation to these people, who have kept the torch of freedom burning through the many long nights of foreign oppression and occupation. We must continually show, by our actions, that we are working toward eventual liberation of the people of Czechoslovakia. Such action by Americans should include the liberalization of our immigration and refugee laws to provide a haven in the United States for some of the refugees and escapees from Czechoslovakia. We must strengthen the Voice of America, so that the voices of freedom will continue to penetrate the Iron Curtain. In the Senate of the United States, we should press for the ratification of the Genocide Convention as a demonstration to the world of our conviction that the destruction of national, racial, or religious groups will be punished before the bar of international justice. Through these, and many other acts of faith in freedom, we in these United States will be preserving the fundamental principles for which Thomas G. Masaryk devoted his life.

SUBMARGINAL LANDS IN ARID AND SEMIARID AREAS

Mr. THYE. Mr. President, on February 9 last, I introduced S. 1023, which has been referred to the Committee on Agriculture and Forestry. This bill directs the Secretary of Agriculture to exercise his authority under title III of the Bankhead-Jones Farm Tenant Act, to retire submarginal lands located in the arid and semiarid areas of the United States.

Two of the important problems which confront this country are drought and agricultural surpluses. My bill seeks to take some of the marginal agricultural lands out of cropland. This, in my opinion, would be a step in the right direction.

It would assure that there would be no tilling of land which, while it is not needed, may be seriously eroded during the first dry period and at the first windstorm.

If we have too much land under cultivation, which is a certainty because we are reducing both wheat and cotton total acreage planted, then the wisest course is to keep idle acres or diverted acres under the protection of grass or legume crops. There would then be created a reserve or a good earth deposit, just the same as a cash deposit would be created in the bank, awaiting some future need. This practice would definitely assist in bringing about an orderly reduction of crops which are now in surplus.

As will be recalled, title III of the Bankhead-Jones Farm Tenant Act, enacted in 1937, provided specific authority for a program of Federal purchase of submarginal lands which had been in operation under emergency relief legislation since 1934.

During the period 1934 to 1942, 10,086,000 acres were acquired under the program. The bulk of this acreage acquired, or 6,440,731 acres, was used for grazing in 1953.

No lands were acquired subsequent to 1942, in part because of changed conditions brought about by World War II, when increased production of food and fiber was essential.

I wish to call attention to a report by the Administrator of the Soil Conservation Service of the Department of Agriculture to the Governors' Conference, April 26, 1954, in which the Administrator stated:

Two principal areas—one in southeastern Colorado and southwestern Kansas and the other in western Texas and eastern New Mexico—are in the most critical condition. Within these areas more than half of the cropland has been damaged. And it is from these areas that our worst dust storms have been coming. The severe damage in the two critical areas is due, in part, to the large acreage of grassland that has been plowed up and planted to wheat or cotton during the last 12 years.

Best estimates indicate that about 2 million acres of grassland have been converted to wheatland in the northern part of this region since 1942. Soil surveys indicate that at least 75 percent of this new wheatland is unsuited for cultivation. Most of it is in the western drier part of the region and has shallow or sandy soils. Such land will produce profitable crops only during wet years and will blow readily during drought years.

More than 1½ million acres of sandy land in the southern part of the region have been converted from grassland to cottonfields in the last 12 years. Nearly all of it is now blowing severely, and some of it has been blowing ever since it was first plowed. Newly formed sand dunes from 20 to 30 feet high may be found in many of the cottonfields of this area.

Out of the lands presently in cultivation, about seven or eight million acres have thin or sandy soils or lie in such low rainfall areas that they are unsuited for cultivation. These lands should never have been plowed. They should be diverted as quickly as possible to a permanent grass cover.

Supporting such legislative authorization as is proposed in my bill are many qualified individuals who appreciate the seriousness of the problem sought to be solved, and who are greatly concerned over the possibility of serious duststorms this year. They have specifically pointed out certain critical areas, such as western Texas, eastern New Mexico, western Oklahoma, western Kansas, eastern Colorado, southwestern Nebraska, and southeastern Wyoming.

The Soil Conservation Service has reviewed a recent survey of all lands in the United States, and officials estimate that approximately 20 million acres of cropland in 17 Western States covered by my bill are unsuitable for cultivation under

present methods of farming. This is approximately half such classified land existing in the United States.

In addition, there are approximately 25 million acres in these Western States which are now being farmed, but which would be classified on the borderline of lands suitable for farming and those not suitable. In other words, 25 million acres would be suitable for farming under best known methods, but normal weather conditions would have to prevail throughout the growing period.

No authority exists, and none would exist under the provisions of my bill, for sale of title III lands to private ownership, and exchanges could be made only if the Secretary of Agriculture found that they would not conflict with the purposes of the act.

The lands retired, therefore, would not be returned to improper utilization, but would be restricted principally to grazing.

Government ownership and leasing of these lands would further provide an example of proper utilization for surrounding landowners, and make it feasible for them to convert from cropping to livestock production with the aid of summer range leased from the Federal Government.

As I have already stated, wheat and cotton production are now being controlled through marketing quotas.

Surpluses in other commodities necessitate reductions in their production either through quotas, economic forces, or by some other means.

The bill which I have introduced provides for reductions, to the extent feasible for retirement of lands primarily unsuitable for production, which constitute a hazard to the communities in which they are situated.

There appeared in the Washington Post and Times Herald of Sunday, February 27, 1955, an article by Mr. Aubrey Graves, which deals with this important question. The article is most timely, and I ask unanimous consent that it be printed in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TWENTY MILLION ACRES ARE READY TO BLOW

(By Aubrey Graves)

The specter of continuing and worsening drought hovers over many areas of the country, particularly the Southern Great Plains. After 4 (and in some cases 5) dry years, some sections face conditions that can become more acute than those of 1954.

Compounding the accumulated effect of prolonged drought come depressing reports of greatly below normal winter precipitation. In 11 western States as of February 1, the mountain snowpack and reservoir storage, for instance, were reported to be low—in some areas, dangerously so.

More than 4 million acres of land have been damaged by wind erosion this winter, according to late Soil Conservation Service advices. Most of this soil blowing occurred in December. The high-velocity wind months (March and April) are yet to come.

"We are praying that in the period immediately ahead we get more moisture than we get wind," Harvey Dahl, Agriculture Department drought-program official, said last week.

MORE DISASTER AREAS

Last spring's soil blowing was the most widespread and severe since 1938. In some localities moisture and crop conditions have deteriorated still further since then. In the 1954 emergency, 945 of the Nation's 3,000 counties were given Federal drought relief. Today about 1,050 counties are officially designated disaster areas.

In Colorado the mountain snow cover in some regions is down to 50 percent of normal. The upland soils are dry. In 47 Colorado reservoirs storage is only about one-fifth of normal. In New Mexico flow of the three streams feeding into the San Luis Valley is expected to be three-fourths of normal. In this area the reservoir storage is 50 percent below the 10-year average.

In greatest jeopardy this spring are southeastern Wyoming, the extreme southwestern corner of Nebraska, eastern Colorado, western Kansas, the extreme northeastern part of New Mexico, and the Panhandles of Oklahoma and Texas. More than 20 million acres, according to statements by Agriculture Department spokesmen, are ready to blow.

Soil Conservation Service Administrator D. A. Williams blames present difficulties largely on 2 things: (1) The continued plowing up of range lands unsuitable for cultivation, and (2) improper farming and grazing methods. "There are now," he says, "about seven or eight million acres in cultivation in this region that should never have been cultivated."

There were few dust storms back in the early days when the hoofs of Indian ponies and buffaloes were about the only things that agitated the prairie sod. Until the coming of the white man (about 1870), wild grasses held the topsoil in place. But with the white man came the plow.

Moist seasons favored the first crops the settlers planted. They plowed up ever more land. But in 1890 came a dry growing season. The drought persisted for 4 years. Crop disasters were general in the Great Plains in 1894. Many farmers moved away.

In 1896 came the rains and shortly afterward the farmers returned. Fortune in the form of weather favored them for most of the next 14 years.

By 1912 the pendulum had swung back. In that year 65,000 acres of cropland in one Kansas county alone blew away. In the following spring, 38 dust storms lowered visibility to less than 1 mile on the southwestern plains.

In 1933, though the soil was extremely dry, only 22 hard blows occurred; the winds that spring were unusually mild. Forty storms plagued the area in 1935. In 1936 there were 68; in 1937, 72.

During these years, President Franklin D. Roosevelt proposed to plant belts of trees to serve as windbreaks at points throughout the Great Plains where cultivated fields were most unprotected. Farmers were educated to the advantages of contour plowing and strip cropping in combating erosion.

THE QUICK PROFIT

The great demands for wheat and cotton created by World Wars I and II are blamed for man's misuse of much western soil. It was not just the "suitcase farmers" of those eras who were responsible. These were the fly-by-nights who came in, leased lands and put in crops. In years of good crops, they took a quick profit and departed, leaving the fields devoid of protective winter cover.

The landowners themselves were guilty of the same offense, to a lesser degree. When they saw the possibility of making more money by plowing than by leaving their holdings in grass, they plowed.

Only one State—Colorado—has a law which really forces a man to protect his farmland in time of drought. Landowners there are required to "chisel" their fields when the soil starts blowing. A narrow plow point turns up moist soil in small ridges to arrest the destructive action of the wind. The State itself performs this service, and levies the cost of it against the treated land, just as it levies taxes. A few other States have wind erosion laws but with far less teeth in them.

SCS Administrator Williams believes that one of the big jobs of his agency is to induce farmers and ranchers of the arid and semiarid areas to farm and ranch "according to the existing climate, not according to what they hope it will be."

Soil surveys of the region show a wide variety of land conditions, ranging from that suitable for permanent cultivation (if good soil and water conservation practices are used) to that suitable only for range. In between these extremes are areas of hazardous croplands.

A farmer may produce profitable crops on this land in wet years, but he usually has a crop failure in drought years. And when drought persists the soil starts to blow away.

"After the soil blowing starts it is too late to plant grass on the land," Williams points out. "Hence, it usually continues to blow until another wet spell comes. By that time much of it may have been so seriously damaged that it will no longer produce profitable crops even in the wet years."

Williams says that our present dilemma was caused in part by improper methods of cultivating and grazing.

"The improper farming or grazing," Williams adds, "is not always done by the man whose crops and land are damaged. Some fields with an excellent cover of productive stubble or straw are covered with drifting silt or sand from nearby unprotected fields. Some good grassland was smothered with dust from adjacent misused land.

"There were many conservation farmers who followed the best advice they could get, yet saw their crops ruined and their land damaged by their neighbors' careless practices."

The problem of wind erosion, he insists, must be attacked on a community basis.

Williams reports that farmers cooperating in soil conservation measures in the potential Dust Bowl areas are practicing stubble-mulch tillage (leaving winter crops or wheat stubble and high-cut cotton stalks) on about 5.5 million acres. They are plowing on the contour on another 6 million acres and have built about 150,000 miles of terraces. They have reseeded nearly 1 million acres to grass since 1938.

There are at least 7 million acres of land which should not be cultivated at all, Williams says, land with thin or sandy soil, or land in low-rainfall areas. "These should be diverted to grass as soon as possible," he says.

The persistent drought harassing the farmer makes the men in the city street wonder what has been happening to the weather in recent years. Has less rain and snow fallen on the country as a whole, and has the climate actually gotten hotter?

Dr. Harry Wexler, Chief of the Scientific Services Division of the United States Weather Bureau, has a quick answer to the latter question. The earth, he says, has become only 2.2 degrees hotter in the last 60 years. In Philadelphia the rise has been 4 degrees since 1870.

The weather scientists assure that, on the average, the 48 States as a whole receive just about as much precipitation one year as another. It is just that the pattern shifts.

In recent years the Pacific coast, the northern border of the country and New England have been getting more than their normal share of the precipitation. The Great Plains and the South—including Maryland and Virginia—have been shortchanged. Some reason is given to hope that the pattern will change back again, sooner or later.

Virginia in particular hopes it will be sooner, Arlington and Alexandria found it necessary to ration water last summer. Some Fairfax County areas were left dry by the private utilities companies for days at a time. Wells went dry that had never gone dry before.

Prolonged dry weather decimated crops throughout the northern part of the State. And many a Virginia Guernsey got her drinking water courtesy of the volunteer fire department, which hauled it to her in fire engines.

Virginia uses about 1,300 gallons of water per capita per day. The average citizen, of course, does not use that much. The manufacture of 1 ton of steel, for instance, requires 65,000 gallons of water. It takes 300,000 gallons to make a ton of rayon.

More than 27,000 gallons of water is needed to irrigate an acre of land to the depth of 1 inch, and there were more than 700 irrigation systems taking water from Virginia streams during last summer's drought.

Virginia has an annual rainfall of about 42 inches. About one-third of it flows away unbeneficially to the sea.

With population increasing the way it is, there is a growing conviction that Virginia will have to adopt some sort of legislation regulating the use of water, perhaps as the Western States do. A State legislature commission on water resources opened public hearings at Staunton Friday. It hopes to make water-use recommendations to the next general assembly.

"The State needs a water code which recognizes the rights of everybody," said Dr. H. N. Young, director of the Agricultural Experiment Station at Blacksburg and a member of the commission.

By "everybody," he meant the farmer through whose fields a stream runs, the farmer who lives near a stream and feels he has a right to some of it, and the city fellow miles away who depends on the stream for his drinking and bath water.

Mr. THYE. I also ask that the bill, Senate bill 1023, to retire submarginal lands from the production of surplus agricultural commodities, be printed in the RECORD at this point in order that all may see just what the bill proposes.

There being no objection, the Senate bill, 1023, was ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Secretary of Agriculture is directed to exercise the authority granted to him by title III of the Bankhead-Jones Farm Tenant Act to retire from the production of agricultural commodities in surplus supply lands in the arid and semiarid areas of the United States which are submarginal or not primarily suitable for cultivation.

RETURN TO THE FLOOR BY SENATOR JOHNSON OF TEXAS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that I may speak for 2 minutes, and perhaps an additional 2 minutes.

The VICE PRESIDENT. The Senator from Texas is recognized.

Mr. JOHNSON of Texas. I wish to take this opportunity to thank personally all my colleagues who were so thoughtful and generous to me while I was away from the Senate. No matter how skillful the doctors, and no matter how kindly the treatment, a hospital bed is a pretty fretful place.

I have a very warm spot in my heart for those who cared for me while I was in the hospital. I hope to see them many times again in the future. They were very able and very understanding. There is no State in the Union, unless it be Texas, where the people are more considerate of a person than are people of Minnesota. However, I hope my visits to that great State in the future will be purely social.

There were some bright spots incident to my visit to the hospital. The brightest was the solicitude displayed by my colleagues. All of them were generous. I, therefore, cannot single out any one as outstanding. However, I wish to express my deep gratitude to the able Vice President for his interest in my welfare.

I also express my appreciation to my beloved friend, the able minority leader [Mr. KNOWLAND]. I believe the thing which caused me to feel better, and which did me more good than Senators may realize, was the fact that my Republican colleagues in the Senate, under BILL KNOWLAND'S leadership, sent me some beautiful flowers. The card which accompanied them read, "To a loyal Democrat, from his Republican colleagues in the Senate." I did not consider that a tribute to me, but I thought it was a tribute to the Republicans that they should feel and act in that way. I am very grateful for it.

I wish especially to thank the senior Senator from Kentucky [Mr. CLEMENTS] who took over my duties in my absence. I think he is one of the most outstanding men I have ever known. He is one of the great legislators of our time. I believe that every Member of the Senate counts EARLE CLEMENTS as a very close personal friend, and one who will always deal fairly and equitably with every man, regardless of party.

One of the most fortunate things that has happened since I came to the Senate was the selection of EARLE CLEMENTS by the Democratic conference as assistant Democratic leader. It brought to our leadership a mature mind and an able person. There have been few associations in my life that I have considered more rich and rewarding.

The State of Kentucky showed excellent judgment when it sent such a forceful and effective representative to the Senate as EARLE CLEMENTS. To me personally it has meant an enduring friendship.

Once more, I thank all my colleagues. I am glad to be back in the harness, even though my activity for the present must be on a somewhat reduced scale. [Applause, Senators rising.]

Mr. KNOWLAND. Mr. President, on behalf of all of us on this side of the aisle, I wish to say that we welcome back to his accustomed seat as majority leader of the Senate the distinguished Senator from Texas. We are delighted at his early recovery, even though it meant leaving such a delightful State as Minnesota, where he was temporarily incarcerated.

While the Senator from Texas was necessarily absent, he was ably represented by the distinguished senior Senator from Kentucky [Mr. CLEMENTS]. We continued the usual friendly and cooperative relationships which the Senator from Texas and I had previously enjoyed while holding these two positions of responsibility. I know that those of us on this side of the aisle are just as happy as are the Senator's own colleagues on the other side because of his return to the floor of the Senate.

Mr. STENNIS. Mr. President, I arrived in the Chamber in time to hear most of the remarks of the distinguished Senator from Texas. I am one of those who missed him. I wish to express my very great pleasure at having him back, and I wish him a speedy and complete recovery.

I desire to say a special word with respect to the very fine manner in which the assistant majority leader, the Senator from Kentucky [Mr. CLEMENTS], has carried on. He has been faithful to his trust. He has vindicated the judgment of those who thrust upon him these responsibilities. He has been faithful to the Senator from Texas. He has enjoyed the most implicit confidence of those on his side of the aisle, as well as Senators on the Republican side of the aisle. He has proved himself fully capable in every way, and has discharged his responsibilities in the finest traditions of the Senate. I commend him for his work.

Mr. CLEMENTS. Mr. President, I could not sit here without expressing to my friend from Texas my very deep appreciation for the warm sentiments expressed by him, even though his estimate of me may be somewhat exaggerated.

I wish to join with other Senators who have expressed their happiness over his early return to the Senate. I am happy to see him here, not only as evidence of his own improvement in health, but also for other reasons. For example, with him here I have just one-tenth of the responsibility as compared to that which devolves upon me when he is absent.

I should also like to say that I appreciate very much the expressions which have come from the lips of the Senator from California, the distinguished minority leader. Certainly there have existed kind and friendly relationships between the two sides of the aisle, and between the acting majority leader and the minority leader. However, all we did was to follow the pattern which had been established by the majority leader and the minority leader in the 83d Congress, and that pattern has been followed in the 84th Congress even though the positions of the two Senators were reversed.

As the assistant to the majority leader, I look forward to a continuation of that fine relationship.

Mr. KERR. Mr. President, I do not want the occasion to go by without expressing my enthusiastic approval of the generous comments which have been made in welcoming back our distinguished majority leader and in bestowing appropriate praise on and paying adequate tribute to the great senior Senator from Kentucky [Mr. CLEMENTS] for the magnificent way in which he carried on in the absence of the majority leader.

In that regard I wish to say that I have also been inspired by what appears to be a resurgence of the spirit of good
